

NEW HAMPSHIRE COLLEGE
1980

DID YOU EVER WONDER WHERE THE NHC LOGO CAME FROM

Developed by commercial design firm, Gregory Fossela of Boston. It was among several that were presented at the time. When the new campus was being built, the board of trustees, designers of the school, and administration got together and decided that something new would be needed to identify the college with besides its name. As long as there was a physical change, a new logo would be developed.

The logo was developed thusly: green represents growth, green represented the growth of the college, New Hampshire is thought of as the green state, the shape represents anything that grows. The outside is the flame of knowledge, representing education.

That is the origin of the NH College Logo.

Special thanks to Marianne Perry and Dean William Beane for their help in finding this information.

A NOTE FROM THE EDITOR

There is a feeling of satisfaction to do anything for your fellow students. I have gained this feeling in the past by planning events for campus enjoyment, now I find a tangible product at the end of one of my ventures, this book. I am overwhelmed by the planning and work that go into the production of a yearbook, I now can better understand the late books of the past. It is personally fulfilling to know that this book will be in the hands of the New Hampshire College Students by Fall, assuming all the bills are paid.

This book is the end result of the dedication and faith of the entire yearbook staff. Although there are problems with it I trust that you the students will be extremely pleased with the job that the yearbook staff has done.

I trust the enclosed memories will be both happy and satisfying.
