Welcome

Message from the President

It gives me great pleasure to present to you the Southern New Hampshire University catalogs. A university catalog offers a comprehensive overview of the variety of programs and classes offered both on campus and online. These catalogs contain information about our history and mission, our services and outreach, our facilities and the many opportunities we provide students for meeting their life and career goals.

It's certainly an exciting time to be a student at SNHU. Since our founding in 1932, the University has transformed from a school of accounting and secretarial science into an institution offering over 200 programs, from certificates to doctoral level degrees including business, education, liberal arts, social sciences and STEM. Recognized by *U.S. News and World Report*, *Forbes* and *Fast Company*, SNHU is committed to providing exceptional student experience and programs that fit the needs of today's students.

SNHU continues to give you more options to complete your degree than almost any other institution. You can blend traditional on campus courses with wholly online courses or take a mix in one of our hybrid courses. With a number of centers besides the main campus, you can access courses in a place most convenient to home or work and at a competitive cost.

We welcome you to explore all that we have to offer. We think that you'll find us to be an exciting institution that is dedicated to helping you make the most of your potential and committed to providing the types of programs that make all of your career aspirations possible. We hope that you will be part of the SNHU Community.

A handwritten signature of Paul J. LeBlanc in black ink, enclosed in a thin black rectangular border.

Sincerely,
Paul J. LeBlanc
President

University Mission

Southern New Hampshire University transforms the lives of learners. Our success is defined by our learners' success. By relentlessly challenging the status quo and providing the best support in higher education, Southern New Hampshire University expands access to education by creating high quality, affordable and innovative pathways to meet the unique needs of each and every learner.

The Purpose of a University Catalog

The purpose of an academic catalog is to present current or potential students and family members and the general public with important information about an institution's academic programs and academic policies. Every effort has been made to ensure the accuracy at the time of publication.

The online academic catalog contains the most current information and pertains to all students for the referenced academic year. Sections of the online academic catalog may be printed as needed. Archived versions of academic catalogs (PDF format) are also available.

Students have the responsibility to become familiar with academic catalog content as they pursue their educational goals. The academic catalog should be used as a guide in conjunction with the student's program evaluation and academic advisor in ensuring that the necessary requirements are met for graduation.

This publication is certified as true and correct in content and policy (academic) as of the date of publication. The university reserves the right to change any part of the academic catalog and to make any changes retroactive for students currently enrolled.

There are three central places for students to locate the policies and expectations that will apply to them throughout their education, whether taking courses online, on-campus, or at one of the instructional locations or across modalities. These resources are the:

- Academic Catalogs, which primarily pertains to academic-related policies; and
- Student Handbooks, which address both academic-and non-academic-related policies
- Consumer Information [page](#)

Student Handbook

The Student Handbook is a critical document for SNHU students, as it contains many of the institution's policies, expectations, and student rights and responsibilities, as well as important federal compliance information regarding the use of substances. The handbook includes information on the discipline system, expectations, and university conduct policies.

Students may access the handbook by going to my.snhu.edu, or through searching within the university's website www.snhu.edu. All members of the university community are expected to take the necessary time to review the handbook, familiarize themselves with the content, and seek clarification of information that is not clear to them.

Financial Aid Eligibility and Enrollment Criteria

Financial Aid Eligibility and Enrollment Criteria

As mandated by the U.S. Department of Education, only courses that are required for completion of a student's program may be included when determining a student's enrollment status for financial aid purposes. In addition, federal student aid regulations permit only one retake of a previously-passed course when determining a student's enrollment status for financial aid purposes.

If you register for a course that does not apply toward your current degree program (i.e. a course that falls into the 'other' category on your program evaluation), the credits associated with it may compromise your ability to receive financial aid, Veteran Affairs (VA) benefits or Tuition Assistance (TA) benefits.

If you are enrolled in less than the average estimates below, then your aid will be adjusted accordingly (including possible cancellation). Non-credit classes are not eligible for financial aid. It is your responsibility to notify Student Financial Services of any change to your enrollment status.

Financial aid is initially awarded based on the following average enrollments:

Policies

About SNHU

Academic Program Improvement

SNHU builds programs and courses based on real-world competencies that are grounded both in the academic canon of knowledge and the expertise of practitioners in the field. Student achievement in relation to these competencies are measured through outcomes at both the program and course level. Based on the data and feedback obtained regarding student achievement of program outcomes, SNHU modifies and improves programs and courses through an ongoing iterative process.

Accreditations, State Authorization and Program Approvals

Regional Accreditation:

New England Commission of Higher Education

Southern New Hampshire University is accredited by the New England Commission of Higher Education (NECHE). All Programs offered by SNHU are encompassed by this regional accreditation.

Inquiries regarding accreditations should be emailed to accreditation@snhu.edu.

Individuals may also contact:
New England Commission of Higher Education
3 Burlington Woods Drive, Suite 100
Burlington, MA 01803-4514
(781) 425-7785
info@neche.org

The New England Commission of Higher Education is the regional accreditation agency for colleges and universities in the six New England states: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. The New England Commission of Higher Education (NECHE) is recognized by the U.S. Secretary of Education as a reliable authority on the quality of education for the institutions it accredits. The Commission is also recognized by the Council for Higher Education Accreditation (CHEA), affirming that its standards and processes are consistent with the quality, improvement, and accountability expectations that CHEA has established. Recognition by the Department of Education provides access to federal financial aid for U.S. students attending institutions accredited by the Commission.

Degree Granting Approval:

[New Hampshire Department of Education, Division of Higher Education - Higher Education Commission](#)

Southern New Hampshire University maintains degree granting approval from the New Hampshire Department of Education, Division of Higher Education - Higher Education Commission.

Programmatic Accreditations:

In addition to the regional accreditation, certain SNHU undergraduate and graduate programs also carry specialized programmatic accreditations.

Accreditation Council for Business Schools and Programs (ACBSP)

Many of the undergraduate and graduate business programs offered by Southern New Hampshire University are accredited by the Accreditation Council for Business Schools and Programs (ACBSP). Business programs that are currently not listed as ACBSP accredited may become accredited upon eligibility. [View a list of our accredited business programs.](#)

Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM)

The B.S. in Health Information Management program is accredited by the [Commission on Accreditation for Health Informatics and Information Management Education](#) (CAHIIM).

Commission on Collegiate Nursing Education (CCNE)

The baccalaureate degree in nursing program and master's degree in nursing program at Southern New Hampshire University are accredited by the [Commission on Collegiate Nursing Education](#), 655 K Street NW, Suite 750, Washington DC 20001, 202-887-6791.

Council for Accreditation of Counseling and Related Educational Programs (CACREP)

The Master of Arts in Clinical Mental Health Counseling is accredited by the [Council for Accreditation of Counseling and Related Educational Programs](#) (CACREP).

Online Programs

Council for the Accreditation of Educator Preparation (CAEP)

The Elementary Education program at Southern New Hampshire University has been awarded [CAEP](#) accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP). Please access the following documents by clicking on the hyperlinks: [Summary of the Case](#); [Decision Letter](#); [CAEP Annual Reporting Measures](#)

Council on Education for Public Health (CEPH)

Southern New Hampshire University is an applicant for accreditation by the Council on Education for Public Health. The accreditation review will address the Master of Public Health and the Master of Public Health with a concentration in Global Health programs. Other degrees and areas of study offered by this institution will not be included in the unit of accreditation review. Additional information can be found on the [CEPH website](#).

Engineering Accreditation Commission of ABET (Accreditation Board for Engineering and Technology)

The baccalaureate degree in Mechanical Engineering and the baccalaureate degree in Aeronautical Engineering offered by Southern New Hampshire University's School of Engineering, Technology, and Aeronautics (SETA) are accredited by the [Engineering Accreditation Commission of ABET](#).

New Hampshire State Department of Education for Teacher Certification

Please review the [list of New Hampshire approved collegiate programs of preparation for the education professions](#)

Assessment:

Southern New Hampshire University programs complete a comprehensive review on a 3-5 year schedule. This review includes analysis of program outcomes and involves multiple constituents across the University, including department chairs, executive directors, assessment committees, and academic leadership. The University continually fosters transparency within program and course creation, assessment and evaluation, and alignment of program outcomes. In addition, all Southern New Hampshire University faculty are either academically or professionally qualified to teach, per the institutions credentialing requirements.

State Authorizations:

As an institution that has students residing across the United States, Southern New Hampshire University (SNHU), is required to obtain state approval to operate (state authorization) based on the activities it conducts in a state.

In some states SNHU is exempt from seeking approval to operate as some state regulations allow for institutions that meet specific criteria to apply for an exemption in lieu of approval to operate.

While in other states SNHU has SARA approval to operate. SARA, the State Authorization Reciprocity Agreement, is an agreement among member states, districts and territories that establishes comparable national standards for interstate offering of postsecondary distance education courses and programs. It is intended to make it easier for students to take online courses offered by postsecondary institutions based in another state. SARA is overseen by a National Council and administered by four regional education compacts: <http://nc-sara.org/content/basic-questions-about-sara#what>.

Indiana

This institution is authorized by The Indiana Commission for Higher Education/ Indiana Board for Proprietary Education, 101 West Ohio Street, Suite 300, Indianapolis, IN 46204-4206, 317-232-1033.

Academic Program Policies

Academic Progression Requirements for Nursing Programs

Online Programs

- Students must achieve a grade of B- or better in all NUR and IHP required program courses completed at SNHU to be allowed to continue in the program.
- Students must remain in compliance with the SNHU Code of Conduct and the American Nurses' Association Code of Ethics throughout their enrollment.
- Students must maintain an active unencumbered Registered Nurse license. If a student holds active licenses in more than one state/jurisdiction, all licenses must be unencumbered. Students must notify the advisor for any licensure status change and criminal arrests or convictions while enrolled in nursing program.
- Students must notify advising prior to relocation as continued enrollment and academic progression is contingent upon SNHU full authorization in other geographic locations.

Students who do not achieve a B- or better in a NUR or IHP required program course completed at SNHU **will be placed on Nursing program academic probation**. Students may not enroll in any other nursing courses until they have successfully retaken the course. During the probation period, students are encouraged to communicate regularly and consistently with their academic advisors and nursing program faculty to ensure students have the resources to maximize their opportunity for success when they retake the course.

If the student achieves a B- or better after repeating the NUR or IHP required program course, the nursing program academic probation status will be removed and the student restored to good standing. If the student does not achieve a B- or better after repeating the NUR or IHP required program course, the student will be dismissed from the nursing program. Nursing students are allowed to repeat only one required course in the nursing major and subsequent failure to meet academic requirements will result in immediate dismissal from the program. The student remains eligible to enroll in an alternate non-nursing degree-granting program offered by SNHU.

Students unable to achieve satisfactory grades in the nursing program pathway may request enrollment in a program in another academic area.

Enrolling in Nursing Courses as Non-degree Seeking Students

Students seeking to enroll in NUR coursework as non-degree seeking students must adhere to the following requirements:

- Meet all nursing programs admission requirements for the level of coursework sought:
 - [RN to BSN Nursing Admission and Academic Requirements](#)
 - [Graduate Nursing Admission and Academic Requirements](#)
- Earn a grade of B- or better in a Nursing (NUR) course in order to register for a subsequent course(s).
- Qualified health professionals who are not nurses may be eligible to take nursing courses in the Healthcare Quality and Safety Post-Master's Certificate as non-degree seeking students if they meet certificate admissions requirements.

Additional Considerations

- Students who wish to transfer their credit elsewhere are responsible for verifying the transferability of credit prior to enrollment. SNHU does not guarantee that courses will transfer.
- Students need to be aware that course registration will be contingent upon adequate enrollments.
- Financial aid is not available to non-degree seeking students.

Graduate Nursing Admission and Academic Requirements

MSN ADMISSION REQUIREMENTS

- Must maintain an active unencumbered Registered Nurse license. Licensure exam must be equivalent to NCLEX-RN examination. (If a student holds active licenses in more than one state/jurisdiction all licenses must be unencumbered.)
- Must have an earned bachelor's degree from an accredited nursing program (ACEN, CCNE, and CNEA) with a minimum cumulative GPA of 3.0
- Completion of the MSN acknowledgement form
- In addition, for students applying to the Family Nurse Practitioner track: two years of fulltime work experience as a licensed registered nurse, identification of one potential preceptor for a clinical practicum, and availability for one, in-person, immersion experience

Internationally-Educated Nurses

Internationally-educated nurses will be reviewed by the nursing team for admission to the nursing programs if they do not meet the above nursing admission requirements. Criteria established by the National Council of State Boards of Nursing (NCSBN) will be used to review applicants to ensure sufficient academic preparation, comparable licensure requirements and English language proficiency. Internationally-educated nurses is defined by NCSBN.

Post-Master's Healthcare Quality and Safety Certificate Program

Online Programs

Open to qualified nursing and health professions candidates only:

- **Nurse applicants** who wish to pursue this certificate must meet MSN nursing program admission requirements AND have earned a master's degree from an accredited nursing program (ACEN, CCNE, and CNEA) with a minimum cumulative GPA of 3.0
- **Non-nursing health professionals** who wish to pursue this certificate must have earned a health professions master's degree from an accredited institution with a minimum cumulative GPA of 3.0

Provisional Acceptance into Graduate Nursing

Please see the [Provisional Acceptance](#) policy.

MSN ACADEMIC REQUIREMENTS

Accelerated Pathway for MSN

Students who have graduated from SNHU's RN-BSN program and have successfully completed the graduate level course work in the Accelerated Pathway may earn credit toward applicable coursework in their MSN track. Students should speak with their Advisor before undertaking Accelerated Pathway coursework, as such MSN credit is track dependent. Criteria for acceptance into the Accelerated Pathway is a 3.5 GPA and Dean approval.

Transfer Credit

Students seeking to transfer credit for nursing courses must submit a course syllabus, course description, and transcript for the nursing course they wish to receive credit. The Dean of Nursing will review the transcripts, course syllabi, and any other required documentation to determine if nursing transfer credits can be awarded. Graduate courses accepted for transfer credit require a grade of "B" or higher and must have been completed within the last five (5) years. The MSN program may accept a maximum of twelve graduate credits at time of admission. Once students are matriculated at SNHU, students are expected to complete their course work at SNHU. Please see the [Transfer Credit](#) policy.

Requirements for Clinical Practice Experience

- Students must comply with the requirements of the organizations where their clinical practice experiences will be completed. These requirements must be met prior to registering for the clinical practice experience.
- These requirements include (but are not limited to) criminal background checks and verification of licensure, immunization records, health insurance, and liability insurance. Students may incur additional costs to meet the clinical practice organizations' requirements.

MA Clinical Mental Health Counseling Program Progression

A student's progression in the MA.CMHC program is dependent on three aspects of student performance: course grades, ongoing assessment of clinical skills and professional counseling dispositions, and field experience preparation.

Course Grades

CMHC Students must earn a minimum of a B- in all SNHU Counseling courses (except for the Practicum and Internship courses which are graded Pass/Fail) before progressing in the program.

Students who do not achieve a B- or better in a counseling course, will be placed on an Academic Student Support Plan that will include a plan for academic success which will be developed by the student and the Counseling Student Advancement, Dispositions, and Support Committee. The Academic Support Plan will be reviewed by an Academic Unit Leader to ensure the student has the resources to maximize the opportunity for success when retaking the course. During the term in which the student is retaking the course, the Faculty Advisor or a faculty member appointed by the Counseling Student Advancement, Dispositions, and Support Committee will monitor the student's progress in the course.

If the student achieves a B- or better after repeating the course, the student will be removed from the plan and restored to good standing. If the student does not achieve a B- or better after repeating the course, the student will be dismissed from the counseling program. The student remains eligible to enroll in an alternate degree-granting program offered by SNHU, provided they meet admissions requirements and are in good academic standing.

Registration Holds

ACADEMIC, DISPOSITIONAL, and/or CLINICAL SKILLS SUPPORT PLANS. Students who are placed on an Academic, Dispositional and/or Clinical Skills Support Plan(s) are required to successfully complete the plan before resuming course work and therefore may have a registration hold placed on their account. This may occur at the outset of the academic

Online Programs

plan or may occur during the student's attempt to complete the plan, should the student fail to accomplish any of the required steps of the plan within the timeline specified in the plan. This required hold will prevent future registrations in COU or MHC courses and will remain on the student's account until plan benchmarks are successfully met as outlined in the support plan.

Field Experience Preparation.

To ensure that students are well prepared for beginning the field experience portion of their training, and to ensure that the program is in compliance with the legal regulations, accreditation standards, and the ethical codes that direct clinical experience management, students in the CMHC program are required to complete a series of tasks and clinical assessment benchmarks related to applying to, securing, and preparing for eligibility to participate in a clinical placement.

Students who do not meet deadlines or minimum expectations related to field experience preparation, eligibility, and field site securement may have a registration hold placed on their account until the student completes the missing tasks.

Professional Standards for Nursing and Counseling Programs

Professional Standards for Nursing and Counseling Programs

1 - Ethics, Dispositions, Proficiencies and Professional Standards

Southern New Hampshire University supports professional practice standards and behaviors for students enrolled in nursing and mental health counseling programs aligned with applicable regulatory and legal standards. Students enrolled in these professional practice programs at SNHU will be required to demonstrate compliance with applicable professional organizations' standards and codes of ethics throughout their enrollment in the program. These ethics, dispositions, proficiencies and professional standards are critical components of the academic programs and review under this policy is conducted under the academic authority of the program.

Violations may include, but are not limited to: disrespectful or unprofessional conduct, failure to respond to supervisory feedback, deliberate misrepresentation or falsification of information, failure to meet professional obligations (including non-adherence to affiliation agreements), criminal acts, abuse of or improper relationship with clients/patients, misuse of alcohol or drugs, improper financial conduct, and disclosure of confidential client/patient information (excepted as required or permitted by law).

See: [ANA Code of Ethics](#); [ACA Code of Ethics](#); [AMHCA Code of Ethics](#); Nursing Student Handbook; and MA Counseling Student Handbook

Students are responsible for demonstrating behaviors that are consistent with these guidelines throughout their participation in the program, including in classes, during residencies, in communications with other students and university staff and faculty, and during practicum and internships. When confronted with an ethical question or dilemma and in instances where the guidelines do not suggest a clear course of action, students are expected to seek out consultation with a member of the faculty or program administration.

2 - Violation of Ethics, Standards, or Disposition

Conduct unbecoming of a student may constitute a valid reason not to recommend a student for clinical placement, progression, or licensure, and may result in the removal of the student from the educational program at SNHU. In addition, failure to adhere to the applicable code of ethics or dispositions, proficiencies and professional standards as outlined above may result in academic interventions up to and including expulsion from the program.

This policy and associated processes do not review violations of the SNHU code of conduct. However, potential violations of SNHU's Code of Conduct as set forth in the university catalog and university student handbook may be reviewed separately through the Office of Student Conduct in the event that a violation overlaps multiple policies. For clarity, the SNHU Code of Conduct focuses on student discipline while violations of ethics, standards, or dispositions are academic based decisions.

2.1 - SNHU Professional Standards Committee for Professional Practice Programs

In cases where a student's behavior raises a concern about violations of ethics, dispositions, proficiencies or professional standards, the student will initially be referred to their respective program for resolution and/or remediation.

Concerns that are not successfully addressed through the program level processes outlined in the Nursing or Counseling student handbook will be referred to the SNHU Professional Standards Committee for Professional Practice Programs (hereafter referred to as "the Committee"). The Committee receives, investigates, and resolves or makes recommendations regarding violations of the dispositions, proficiencies, professional standards, or an applicable code of ethics. The Committee does not review violations of the SNHU Code of Conduct. The Committee is comprised of:

- One (1) dean or director from *each* program affected by this policy (voting member)

Online Programs

- One (1) external member which may be a non-affected Executive Director, Academic Vice President or Assistant Vice President, or a non-affected Associate Dean (voting member)

The Committee meets on an as-needed basis and is chaired by the committee representative from the student's professional practice program.

2.2 - Filing and Investigation of Concerns

Any concern alleging a violation of the dispositions, proficiencies, professional standards or applicable code of ethics under this policy, may be submitted by a student, mentor, preceptor, staff member, clinical instructor, lab instructor, clinical agency personnel, or patient/client. All concerns must be submitted in writing using the SNHU Ethics & Professional Standards Referral Form. To request a form, click here: [Nursing, Counseling](#). The form will include the following:

- Identifying information regarding the student, including name and program of record
- A description of how the notifier became aware of the concern
- A description of the concern that references the specific ethics, disposition, proficiency or professional standard being addressed and how the student's behavior failed to meet that standard.

The Committee will investigate each student concern according to the following procedure:

- When a potential violation is reported, the Committee chair will initiate and conduct an investigation of the concern. (In cases where a standing committee member was the person who initiated the original concern, another dean or director from the same program may serve on the committee in their stead.)
- The investigation will include the collection of any information necessary to thoroughly investigate the concern, which may include meeting with external clinical agencies, faculty and/or SNHU staff, and other direct witnesses to the behavior, in addition to the student.
- Once the investigation is complete, the Committee chair will share the information collected, along with a recommendation regarding the proposed resolution and corrective action, with the full Committee and the affected student for resolution (see 2.3 below).

2.3 - Determining Resolution

Once the investigation is complete, the Committee chair will contact the student by email to arrange a time to discuss the investigation results with the full Committee and attempt to resolve behavioral changes required to align the student's conduct with the standards of professional conduct described in this policy. Generally, 72-hour notice is given prior to this meeting. The student may attend the meeting with a faculty or staff support person, with prior approval from the Committee chair. The support person may not participate directly in the hearing or disrupt it in any way. In the event that a student attends a meeting with legal representation without having notified the committee, the Committee may immediately choose to reschedule the meeting.

If a student fails to respond to the meeting request within three business days or does not attend a mutually agreed to meeting, the committee will make its determination based on the information that is available to it from the investigation.

2.4 - Actions

After a concern is investigated and the Committee has met with the student, the Committee will vote on one of the following actions:

- Dismissal of the complaint as unfounded;
- Referral of the student to the program's student remediation/support committee for corrective action;
- Dismissal of the student from the program. Provided no other SNHU standards of conduct were violated, students who are dismissed from a program due to a violation of this policy may be able to pursue another academic program at SNHU if they meet the requirements. Students should recognize, however, that certain violations of this code may bar entrance to other SNHU professional programs.

A record of the Committee's decision will be sent to the student electronically and placed in the student's file. The Committee Chair will notify the Student in writing within three business days of the decision and any action being taken.

Students who wish to respond to a decision, must respond to the Committee Chair in writing within three business days, indicating either their agreement with the corrective action or reasons for appealing a decision, along with any new documentation for consideration. Appeals will only be accepted based upon: new information that was not known at the time of original decision or procedural concerns based on grounds other than general dissatisfaction with the current resolution. The written appeal must explain why the factual information considered was incomplete and/or the appropriate procedure was not applied and how this should change the Committee's determination of the matter. Appeals involving new information will be reviewed by the committee and the Executive Director of the student's professional practice program. Appeals based on procedural concerns will be reviewed by the Executive Director and Associate Vice President for the student's professional practice program. Students who fail to respond are considered to have accepted the Committee decision and actions.

1. Student Rights

Students have the following rights pertaining to alleged and confirmed violations of the standards of professional conduct set forth in this code:

Online Programs

- The student must be notified in writing if they become the subject of a justifiable concern.
- The student must be provided an opportunity to respond to a concern and explain their behavior to the Committee.
- The Committee must notify the student in writing of its decision, including, as appropriate, the unacceptable behavior, the standard violated, and the corrective action.
- At the discretion of the Committee, students may be permitted to participate in SNHU course(s) during the investigation and decision-making processes, however, may be excluded from any lab or clinical experience until a final decision allowing participation is reached.

3- Academic Actions and Education Records

Records of concerns and corrective action will be maintained according to SNHU policy regarding student academic disciplinary records as well as applicable state and federal laws concerning maintenance and disclosure of student information.

RN to BSN Nursing Admission and Academic Requirements

RN to BSN ADMISSION REQUIREMENTS

To be fully accepted to the undergraduate nursing program, students must meet the following requirements:

- Hold an earned diploma or associate degree in nursing from an accredited nursing program (ACEN, CCNE, and CNEA) OR state Board of Nursing approved program that prepares students for the NCLEX-RN exam
- Have a cumulative GPA of at least 2.5 on the degree awarding transcript OR a cumulative GPA between 2.0 and 2.49 on the degree awarding transcript with a minimum of nine (9) credit hours earned subsequent to the diploma or associate degree with at least a 2.5 cumulative GPA
- Must maintain an active unencumbered Registered Nurse license. Licensure exam must be equivalent to NCLEX-RN examination. If a student holds active licenses in more than one state/jurisdiction, all licenses must be unencumbered.
- Students who do not hold a nursing license and have graduated from a nursing program within three months may be admitted if they meet all other admission requirements. Evidence of licensure must be provided within three months from date of admission.

Internationally Educated Nurses

Internationally-educated nurses will be reviewed by the nursing team for admission to the nursing programs if they do not meet the above nursing admission requirements. Criteria established by the National Council of State Boards of Nursing (NCSBN) will be used to review applicants to ensure sufficient academic preparation, comparable licensure requirements and English language proficiency. Internationally educated nurses are defined by NCSBN.

Academic Progression, RN to BSN Program

Nursing students must achieve a grade of B- or better in all undergraduate NUR and IHP required program courses completed at SNHU in order to continue in the program. See [Academic Progression Requirements for Nursing Programs policy](#).

Provisional Acceptance to Program

Students who do not meet requirements for full acceptance into the undergraduate nursing program may be eligible for provisional acceptance. Provisional acceptance may be extended to students with a cumulative GPA between 2.0 and 2.49 who meet all other admission criteria.

To be eligible for full acceptance, provisionally accepted students must achieve a cumulative GPA of at least 2.7 by the end of their second term. To foster success, it is recommended that students take one course per term but students may choose to take up to two courses each term. Regardless of the number of courses taken each term, the same rule applies: students must achieve a cumulative GPA of 2.7 by the end of their second term.

Provisional Student Enrollment in another Undergraduate Program

Provisionally accepted students who do not achieve full acceptance (those who do not receive a cumulative GPA of 2.7 by the end of their second term) in the nursing program may request enrollment in a new program in another academic area. Students must satisfy the admissions requirements of the new program.

RN to BSN ACADEMIC REQUIREMENTS

Transfer Credit

Up to 90 transfer credits may be accepted. A transfer block of 45 credits shall be awarded to students with an active unencumbered registered nurse license. If the student holds an associate degree or diploma in nursing from an accredited nursing program, they may be awarded additional credits in non-nursing courses such as those which fulfill General

Online Programs

Education or free elective requirements. There is no time limit for accepting science courses. In the case where transfer credits are granted, the student still will need to complete the 30 residency hours required for degree conferral at SNHU.

Transfer of Nursing Courses

The RN-BSN program has a unique curriculum that can make transfer credit for nursing courses difficult. Students who have completed Nursing courses similar to those required in the nursing major, may be required to submit a completed petition to amend degree requirements to request approval to transfer individual nursing course(s) into their program. The petition must be approved by a member of the nursing academics team and include a course syllabus, course description, and transcript for the nursing course for which they are seeking to receive credit. The course being considered must have been completed at an approved or accredited school of nursing. Unless otherwise stated, courses considered for transfer must be discrete courses and students must have achieved a B- or better. For example, Health Assessment content integrated in a Medical-Surgical Course will not be considered for transfer credit.

Accelerated Pathway for MSN

Students who have graduated from SNHU's RN-BSN program and have successfully completed the graduate level coursework in the Accelerated Pathway may earn credit toward applicable coursework in their MSN track. Students should speak with their Advisor before undertaking Accelerated Pathway coursework, as such MSN credit is track dependent. Criteria for acceptance into the Accelerated Pathway is a 3.5 GPA and Dean approval.

Standards for Student Creative Work

Southern New Hampshire University practices and embraces inclusiveness, diversity, and a safe learning environment. As stated in the [university mission](#), we believe in "using the power of education as a force for social good." We encourage creative expression and respect students' diverse voices. We strive to honor each student, instructor, and voice in the classroom through a culture of equity and respect.

Creative work is here defined as writing or artwork "which displays imagination or invention (sometimes differentiated from academic, journalistic, or other forms of writing which are more constrained in style or scope)" (Oxford English Dictionary). In line with our [Non-Discrimination, Equal Access & Equal Opportunity Statement](#), works which exhibit any of the following elements are unacceptable for student submission of creative work for grading and/or workshoping purposes:

- Hate speech, defined as "Any speech, gesture, writing, or display that encourages violence or prejudice against an individual or group based on perceived membership with a social identity (often a marginalized identity) group"
- Any work that, when taken as a whole by a reasonable person, obscenely glorifies violence, rape, and/or the sexualization of minors and fetishized groups and lacks serious literary or artistic value
- Writing or audio/visual media that targets, in an abusive, threatening, or discriminatory manner, specific individuals in the classroom community, including but not limited to instructors, peers, and university administrators, especially with regard to their identity, gender, race, religion, or sexuality, or that violate applicable University policy, including the [Sexual Misconduct Policy](#);
- Some genres in "extremist" categories, including but not limited to genres that explicitly glorify violence (e.g., splatterpunk) or non-consensual sexual situations (e.g., rape, stalking, pedophilia, necrophilia, bestiality) and other genres that are deliberately obscene or problematic.

Southern New Hampshire University fully supports artistic work that explores mature and complex themes that contribute to the creative and artistic and literary canon, and we will continue to do so. As an institution, we reserve the right to assess student submissions to determine if they meet any of the criteria above. If the submission does not meet expectations, students will be asked to resubmit new work that aligns with SNHU policy in an agreed-upon timeframe, and, if egregious, the student will be referred to the Student Conduct team. If new work is not submitted, the original submission will not be evaluated and will earn a grade of zero. If a student continues to submit work that breaks from the policies above, further disciplinary action will be taken.

Academic Standards

Academic Honors

President's List and Dean's List

At the close of each reporting term (fall, winter/spring, summer) at Southern New Hampshire University, the registrar's office publishes two lists of students who have achieved standards of academic excellence during the semester's work. As of June 1, 2013, full-time students who have earned a minimum grade-point average of 3.700 and above for the semesters are named to the President's List. Students who have earned a minimum grade-point average of 3.500 to 3.699 for the semesters are named to the Dean's List. Full-time status is achieved by earning 12 credits; undergraduate day students

Online Programs

must earn 12 credits in fall or spring semester, and COCE students must earn 12 credits in either EW1 & EW2, EW3 & EW4, or EW5 & EW6.

Alpha Sigma Lambda Honor Society

Alpha Sigma Lambda is a national honor society recognizing adult students with outstanding academic achievement. This group is designed to those students connect, building a community to help further their career and academic goals.

In 1946, Dr. Rollin B. Posey, Dean of University College at Northwestern University, realized that a measure of encouragement and recognition accorded a student's scholastic achievement at an early stage of their program could provide the thrust of desire to achieve their educational objectives. Dr. Posey founded a society, Alpha Sigma Lambda, to honor those dedicated adult students who, while adroitly handling their life responsibilities, achieve and maintain high scholastic standards.

Today there are over 300 chartered chapters throughout the United States. The camaraderie, advantages and benefits of Alpha Sigma Lambda are its own best incentive for being. The Society not only brings together outstanding students and faculty, but also offers each individual an exposure to interests other than their own.

For the nontraditional student, the Society stands as an inspiration for continuing scholastic growth and is a builder of pride through recognition. For the chapter institution, the Society serves as a vehicle for imparting appreciation for adult students' academic achievements and contributions. Also, the Society has been found to aid immensely in the recruitment and retention of nontraditional/adult students.

Student members must have completed a minimum of 24 graded semester hour credits at SNHU. At least 12 of a student's total credits should be earned in courses in Liberal Arts/Sciences. Student members selected must have a minimum grade point average of 3.2 on a 4.0 scale or its equivalent credits and are matriculated in an undergraduate degree program. We invite new members to join once each year, in late January or early February.

Delta Mu Delta Honor Society

Founded in 1913, Delta Mu Delta is an international business honor society that recognizes and encourages academic excellence of undergraduate and graduate students. The Southern New Hampshire University chapter, Gamma Nu, was installed in 1978. Its purpose is to promote and recognize students for their scholastic achievement in business and is the highest international recognition a student can earn.

Membership is extended to business students of good character, who have completed more than half of their program of study, have achieved a cumulative grade-point average of 3.6 and reside in the top 20 percent of their respective class.

National Society of Leadership and Success

The Society is the nation's largest leadership honor society. Students are selected by SNHU for membership based on either academic standing or leadership potential. With 472 chapters, the Society current has 419,794 members nationwide. In addition to honorable distinction, the Society provides a step-by-step program for members to build their leadership skills through participation at their campus or online. Upon completion of the program, members receive their leadership certificate and take their place among the top student leaders at their campus and across the country. Members are able to list their affiliations on all statements of personal accomplishment, including their resume. This program is conducted entirely online with an online-based advisor available to support you.

Criteria for nomination is a 3.0 cumulative GPA for undergraduate students and a 3.5 cumulative GPA for graduate students, as well as to have completed 9 credits. There is a one-time membership fee.

Pi Lambda Theta Honor Society

Founded in 1910, Pi Lambda Theta (PLT) is the most selective honor society for educators. Pi Lambda Theta recognizes the academic achievement and outstanding disposition of graduating education students. The accomplishments of exemplary education students are honored through this induction. Candidates' development of knowledge, skills, professionalism, and leadership are promoted and supported through their membership in Pi Lambda Theta, a member of Phi Delta Kappa International.

Undergraduate Criteria:

- Membership is extended to graduating students who have been identified by School of Education faculty as having satisfied the eligibility requirements
- Students must have earned a 3.5 GPA or above
- All candidates must have demonstrated exceptional disposition through their education program

Graduate Criteria:

- Membership is extended to graduating students who have been identified by School of Education faculty as having satisfied the eligibility requirements

Online Programs

- Students must have achieved a GPA of 3.9 or above
- All candidates must have demonstrated exceptional disposition through their education program

Sigma Tau Delta Honor Society

Sigma Tau Delta is the International English Honor Society. SNHU established its own chapter, Alpha Pi Psi, in the fall of 2008 for the University College and Alpha Phi Beta, in the spring of 2015 for the College of Online and Continuing Education. The Honor Society provides eligible English Language and Literature and Creative Writing majors and minors with opportunities to attend and present at conferences, publish undergraduate work, participate in field trips, and gain valuable networking opportunities.

Undergraduate inductees have completed at least three semesters at SNHU, have completed more than two (2) literature courses beyond the General Education requirements, and have maintained a minimum 3.3 GPA. Graduate inductees have completed at least six (6) semester hours at SNHU and have maintained a minimum 3.3 GPA.

NBEA Award of Merit

The National Business Education Association Award of Merit is presented to the outstanding graduating senior in business/marketing teacher education. This award is presented at the discretion of the business education program faculty.

Distinguished Scholar Award

The Distinguished Scholar Award recognizes outstanding online undergraduate and graduate students who have earned the highest cumulative GPA in their degree program, with a minimum cumulative GPA of 3.7. To be eligible, students must have conferral dates between April 1 of the previous year through March 1 of the current year. (See [Degree and Certificate Conferral](#).) Students will be notified in April if they receive this award. This policy only applies to students who have earned an Associates, Bachelors or Masters degree through a non-direct assessment program. Certificate students are not eligible for this award. The Distinguished Scholar Award is not recorded on the student's permanent record, transcript, or diploma.

Academic Renewal

Undergraduate Level

After an absence of at least one year, an undergraduate student who has been academically unsuccessful in the past may change programs and apply for academic renewal. This will remove the negative impact to their cumulative GPA for grades lower than "C". Additionally the student is required to complete a minimum of 30 credits at Southern New Hampshire University after renewal is granted.

Graduate Level

After changing to another graduate program and successfully completing the first 9 credit hours with a grade of "B-" or above in each course, a graduate student who has been academically unsuccessful in the past may apply for academic renewal. This will remove the negative impact to their cumulative GPA for grades lower than "B-".

Academic Renewal at either the undergraduate or graduate level:

- will only be granted once per academic level at the undergraduate and/or graduate level at SNHU
- cannot be reversed
- must be approved by the Scholastic Standing Committee
- will impact transcripts, cumulative GPA, and credit toward graduation:
 - undergraduate courses with a final grade below "C" and graduate courses with a final grade below "B-" will have an "R" precede the original grade (for example, an "RC-" will replace a final grade of "C-", "RF" will replace a final grade of "F", etc.). A new grade-point average will be calculated as academic renewal grades are applied;
 - courses so designated will:
 - appear on the transcript in the new format
 - be eliminated from the student's cumulative GPA
 - not earn credit toward graduation
 - undergraduate courses with a final grade of "C" or better and graduate courses with a final grade of "B-" or better will:
 - courses will continue to:
 - appear on the transcript
 - be included in the student's cumulative GPA
 - earn credit toward graduation
 - does not apply to courses that were part of a previously conferred degree or certificate
 - applies to every program affected by the renewal; the student is no longer eligible to return to the program(s) for which academic renewal was granted:
 - Change in concentration is not considered a program change for academic renewal purposes.
 - Academic renewal does not nullify policies restricting the age of coursework or time limits on program completion

Online Programs

NOTE: Academic Renewal may have a negative impact on the calculations utilized by financial aid to determine Satisfactory Academic Progress for Title IV purposes.

Amendment of Degree Requirements

The courses required for a specific degree are outlined in the university catalog. Any change in program course requirements must be approved by the student's program coordinator/department chair and school/associate dean. A completed and approved [Petition to Amend Degree Requirements](#) form must be received by the Office of the University Registrar before the change will become effective.

Ceremonial and Latin Honors

Academic Honors, Associate and Baccalaureate Degrees

The university acknowledges outstanding academic performance through Ceremonial Honors and Latin Honors. Ceremonial Honors serve as a way of recognizing students' outstanding academic performance during commencement ceremonies for those students who either do not qualify for Latin Honors at the time of commencement or who do not have enough institutional credits to be eligible for Latin Honors upon degree completion. Ceremonial Honors are not recorded on the student's permanent record, transcript or diploma whereas Latin Honors are. Ceremonial and Latin Honors apply only to undergraduate degree recipients.

Students who meet the criteria for either Ceremonial Honors or Latin Honors are recognized as honors recipients as they cross the stage at commencement. They receive honors regalia indicating their achievement. For commencement purposes, honors are assessed as of the first business day after the petitioning deadline of March 1 for the Spring ceremony and October 1 for the Fall ceremony and are based on GPA and institutional credits completed at that time. Students who are still completing course work as of the petitioning deadline are eligible for Ceremonial Honors but not Latin Honors. Latin Honors are assessed and awarded only upon completion of all course work for the degree. During commencement students are recognized for either Ceremonial or Latin Honors, not both.

This policy applies only to Associates and Bachelors degrees completed through non-direct assessment programs.

See criteria for Ceremonial and Latin Honors below.

Criteria for Ceremonial Honors

Minimum Institutional Credits Completed	Cumulative GPA	Associate Degree	Baccalaureate Degree
Associate's = 15 Bachelor's = 30	3.500 - 3.699	Honors	Cum Laude
Associate's = 15 Bachelor's = 30	3.700 - 3.849	High Honors	Magna Cum Laude
Associate's = 15 Bachelor's = 30	3.850 - 4.000	Highest Honors	Summa Cum Laude

Criteria for Latin Honors

Minimum Institutional Credits Completed	Cumulative GPA	Associate Degree	Baccalaureate Degree
Associate's = 30 Bachelor's = 60	3.500 - 3.699	Honors	Cum Laude
Associate's = 30 Bachelor's = 60	3.700 - 3.849	High Honors	Magna Cum Laude
Associate's = 30 Bachelor's = 60	3.850 - 4.000	Highest Honors	Summa Cum Laude

Class Schedules, Locations, Cancellations, and Modalities

The course locations, times, and delivery methods listed in the Catalog and course syllabi are subject to change. Courses may be cancelled due to low enrollment, scheduling issues, or government order.

Individual class sessions can be cancelled, or the time and location of classes changed, due to a variety of circumstances, including weather, illness, emergency, campus construction, or government order.

Class cancellations for in-person or synchronous online classes will be announced, prior to class start whenever possible, by either a faculty or staff member of the university. Cancellations may also be announced by posted notice issued by the

Online Programs

school's dean's office. When in doubt as to whether a class has been cancelled, students should check with school administrative staff. Cancelled classes and courses can be rescheduled at the option of the university or instructor but are not always made up. In-person classes can be taught remotely if necessary. There will be no refund or reduction of tuition or fees when classes are cancelled or moved to an online format, except as otherwise required by the university refund policy.

SNHU Alerts

SNHU Alerts is an optional emergency alert text messaging service for students, faculty and staff. SNHU Alerts is just one method the university will use to communicate emergency information. We will continue to use a variety of methods as appropriate, including e-mail, telephone and the web.

SNHU uses this notification system to send alerts about:

- Crisis situations affecting the SNHU community
- Closings, cancellations, or delays of office hours or classes

To register for SNHU Alerts, please go to <https://snhuweb.snhu.edu/snhu-alerts/>.

Credit Hour Definition

Southern New Hampshire University has adopted the US Department of Education and the New England Commission of Higher Education guidelines regarding the definition of a credit hour. Federal regulations define a credit hour under Section 600.2 of the Higher Education Opportunity Act as: an amount of student work defined by an institution, as approved by the institution's accrediting agency or State approval agency, that is consistent with commonly accepted practice in postsecondary education and that:

(1) Reasonably approximates not less than—

(i) One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different period of time; or

(ii) At least an equivalent amount of work as required in paragraph (1)(i) of this definition for other academic activities as established by the institution, including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours; and

(2) Permits an institution, in determining the amount of work associated with a credit hour, to take into account a variety of delivery methods, measurements of student work, academic calendars, disciplines, and degree levels.

Unit of Credit

The unit of credit at Southern New Hampshire University for all modalities is the semester hour

Institutional Review Board (IRB)

The Institutional Review Board (IRB) protects the rights and welfare of human subjects recruited to participate in research activities conducted on or by Southern New Hampshire University (SNHU) stakeholders. The IRB has the primary responsibility to review and monitor all human subject research in compliance with all local, state, and federal laws; SNHU policies and procedures; and the highest standards of ethical conduct and practice. All submissions come through one online platform and will be reviewed by appropriate IRB committee members.

The IRB follows [SNHU's Institutional Review Board \(IRB\) Handbook](#) that is designed to assist students, faculty, and staff who are seeking approval to conduct research while affiliated with SNHU. This includes all research involving human participants and dissertations, Applied Doctoral Projects (ADP), and other related research projects.

Scholastic Standing

In order to remain enrolled in courses and qualify for graduation, a student must be in good scholastic standing. Students with a cumulative GPA that falls below the minimum face scholastic sanctions that include Scholastic Warning, Continued Scholastic Warning, Academic Suspension, and Academic Dismissal.

Undergraduate Scholastic Standing

Undergraduate students* must maintain a cumulative GPA of 2.0 or higher.

- **Scholastic Warning:** Students with a cumulative GPA that falls below the minimum cumulative GPA of 2.0 are placed on Scholastic Warning.
- **Continued Scholastic Warning 1 (Not Advantage Applicable):** Students on Scholastic Warning who do not

Online Programs

achieve a cumulative GPA of 2.0 the following term are placed on Continued Scholastic Warning 1. This level does not apply to Advantage students, who proceed directly to Continued Scholastic Warning 2.

- **Continued Scholastic Warning 2:** Students on Continued Scholastic Warning 1 who do not achieve a cumulative GPA of 2.0 the following term are placed on Continued Scholastic Warning 2. Students on Continued Scholastic Warning 2 from a previous term who achieve at least a 2.0 term GPA for the current term but do not achieve a cumulative GPA of 2.0 remain on Continued Scholastic Warning 2 to allow them the opportunity to improve their cumulative GPA. As long as students continue to achieve at least a 2.0 term GPA they remain on Continued Scholastic Warning until they achieve a cumulative GPA of at least 2.0.
- **Academic Suspension:** Students on Continued Scholastic Warning 2 from a previous term who do not meet a minimum term GPA of 2.0 for the current term are placed on Academic Suspension. Students who do not meet these standards due to extenuating circumstances but who are making substantial progress towards the demonstration of the standard will be reviewed on a case-by-case basis.
- **Academic Dismissal:** Students are dismissed from undergraduate programs at the university in the following circumstances:
 - Students who are on any level of Scholastic Warning who cease submission of graded assignments for all registered classes prior to 60 percent of the term in two consecutive terms.
 - Students who do not successfully pass SNHU-107 Success Strategies for Online Learning after the completion of two attempts.
 - Students who do not maintain a term GPA of 2.0 each term following their return from suspension.

Academic Dismissal is considered final and appeals are not accepted.

- **Good Scholastic Standing:** Students who meet the required cumulative GPA of 2.0 or above are returned to good scholastic standing.

*Note: Nursing students must achieve a grade of B- or better in all NUR and IHP required program courses completed at SNHU. See [Academic Progression Requirements for Nursing Programs](#).

Graduate Scholastic Standing

Graduate students* must maintain a cumulative GPA of 3.0 or higher.

- **Scholastic Warning:** Students with a cumulative GPA that falls below the minimum cumulative GPA of 3.0 are placed on Scholastic Warning.
- **Continued Scholastic Warning:** Students on Scholastic Warning who do not achieve a cumulative GPA of 3.0 the following term are placed on Continued Scholastic Warning. Students on Continued Scholastic Warning from a previous term who achieve at least a 3.0 term GPA for the current term but do not achieve a cumulative GPA of 3.0 remain on Continued Scholastic Warning to allow them the opportunity to improve their cumulative GPA. As long as students continue to achieve at least a 3.0 term GPA they remain on Continued Scholastic Warning until they achieve a cumulative GPA of at least 3.0.
- **Academic Suspension:** Students on Continued Scholastic Warning from a previous term who do not meet a minimum term GPA of 3.0 for the current term are placed on Academic Suspension. Students who do not meet these standards due to extenuating circumstances but who are making substantial progress towards the demonstration of the standard will be reviewed on a case-by-case basis.
- **Academic Dismissal:** Students are dismissed from graduate programs at the university in the following circumstances:
 - Students who are on any level of Scholastic Warning who cease submission of graded assignments for all registered classes prior to 60 percent of the term in two consecutive terms.
 - Students who do not maintain a term GPA of 3.0 each term following their return from suspension.

Academic Dismissal is considered final and appeals are not accepted.

- **Academic Program Dismissal:**

Online Programs

- CMHC students who earn two Unsatisfactory (U) final course grades will be dismissed from the program.

- **Good Scholastic Standing:** Students who meet the required cumulative GPA of 3.0 or above are returned to good scholastic standing.

*Notes:

- Nursing students must achieve a grade of B- or better in all NUR and IHP required program courses completed at SNHU. See [Academic Progression Requirements for Nursing Programs](#)
- Counseling students must maintain a grade of B- or better in SNHU counseling courses. See [MA Clinical Mental Health Counseling Program Progression](#)

Readmission after Academic Suspension

Students who have been academically suspended must wait a period of six months before returning. Students who have been suspended are readmitted on Continued Scholastic Warning upon their return and must meet all scholastic standing requirements. This means that students who do not maintain a 2.0 term GPA for undergraduate, 2.67 for nursing undergraduate and a 3.0 term GPA for graduate will be suspended. Students who are suspended a second time are dismissed from undergraduate or graduate programs at the university as applicable and will not be considered for readmission at that level. Academic Dismissal is considered final and appeals are not accepted.

Students who are readmitted may be limited to enrolling in only one (1) course per term and will need to meet regularly with their advisor to discuss resources and review progress toward achieving the cumulative GPA required for good standing. All students must meet cumulative GPA requirements for good standing prior to graduation.

Note: Nursing and Counseling have program-specific requirements that supersede these minimum standards. Please see [Academic Progression Requirements for Nursing Programs](#), [MA Clinical Mental Health Counseling Program Progression](#), and [Professional Standards for Nursing and Counseling Programs](#).

COCE Scholastic Standing Committee

The COCE Scholastic Standing Committee is responsible for considering student cases for readmission after academic suspension, that are related to extenuating circumstances, and requests for academic renewal.

The Committee has the authority to:

- Uphold an academic suspension or dismissal decision for that academic level based on policy
- Grant or deny academic renewal

SNHU-107 Required Course

SNHU 107, Online Success Strategies, is a 3 credit hour course designed to help students be successful in SNHU's online environment. It is a required course for online students who enroll with fewer than 12 transfer credit hours. Students must enroll in SNHU 107 during their first term and may elect to take one additional course that term. Students who fail SNHU 107 will be required to re-enroll in SNHU 107 in the next term and will not be permitted to enroll in any other course during that term. Students who fail a second time will be dismissed from the university.

Students who take their courses in-person at a Center location may replace the SNHU 107 requirement with a free elective.

SNHU 107 is not required for conditionally accepted (AEP) students, but is highly recommended. AEP students who fail their first term course(s) will be required to take SNHU 107 and will be limited to that course. If they fail SNHU 107 in a second term, they will be dismissed from the university.

Admissions

Academic Articulation Agreements

The Office of Academic Quality, Accreditation & Support at Southern New Hampshire University maintains a list of schools and organizations with which we have articulation agreements. Please email accreditation@snhu.edu with any questions.

Admission Requirements, Graduate

General Information

Applicants who have earned a bachelor's degree or a graduate degree at an accredited institution in the United States or the equivalent of this degree from a comparable international post-secondary institution are eligible for application to the university. The decision to admit an applicant to a graduate program is based on a combination of criteria according to the requirements of the specific program.

Online Programs

Applicants in the process of completing their undergraduate degree and who have at least 108 credits completed may apply for limited admission to the university during their final year of undergraduate study. Applicants must supply proof of their bachelor's degree conferral prior to completing a maximum of two introductory -level graduate courses at Southern New Hampshire University. See [Limited Graduate Admissions](#) for additional information.

Applications are reviewed on a rolling basis unless otherwise noted.

Basic Admission Requirements

- [Admission application](#)
- Official transcripts from previous institutions for degree and post-degree coursework. A minimum of a bachelor's degree is required. All transcripts are to be submitted from the original institutions. Southern New Hampshire University will order and pay for domestic transcripts for most programs once an application has been received.
- All applicants must speak, understand, read, and write fluently in English.
- Minimum undergraduate cumulative GPA is 2.75 for full acceptance or 2.00 for provisional acceptance. Some SNHU programs may require a higher cumulative GPA, please see program specific requirements outlined below. (Completion of a post-bachelor's degree supersedes this requirement.)
- Applicants must submit an attestation form verifying information acknowledging requirements for certain programs.
- International Students must meet the [Admission Requirements for International Students](#)

Program requirements in addition to those above vary from program to program. See additional program requirements below.

Full Acceptance and Provisional Acceptance

Applicants who meet all of the basic admission requirements as well as any additional program requirements are fully accepted. Applicants whose cumulative GPA falls below 2.75 but who have at least 2.0 are provisionally accepted. Some SNHU programs may require a higher cumulative GPA, please see program specific requirements outlined below. See [Provisional Acceptance policy](#) for more information.

Additional Program Requirements

MA.CMHC, MA Clinical Mental Health Counseling

- Five Question **Personal Statement** (500-600 words) that addresses the student's interest in becoming a counselor
- Two Professional **Letters of Recommendation** using SNHU Letter of Recommendation Form
- MA Counseling Recommendation **Waiver Form**
- MA Counseling State Licensure **Acknowledgement Form ***
- Availability for two, in-person, week-long **residencies**

* *Due to the variance of state educational requirements for counseling licensure, the state selected on an applicant's State Licensing Acknowledgement Form must be the applicant's state of residence at the time of admission. The only exception to this requirement is for military students and/or spouses of actively military members who may be deployed in a state other than their state of residence. Students living in a state in which the program cannot meet the state education requirements for licensure are not eligible for the MA.CMHC program.*

MFA.CWR, MFA Creative Writing

- A **personal statement** of 200-300 words is required. Students are asked to explain how someone else's story – such as a novel, movie, or a personal account – has impacted their life and influenced their drive to become a writer.
- A **creative writing sample** of 8-12 pages of fiction is required (either a short story or an excerpt from a longer work).
 - The creative writing sample should include a brief, up to **50 word introductory paragraph** that explains the literary genre of the submission, whether the submission is a complete short story or an excerpt from something longer, and, if the latter, any information the writer feels is essential to properly evaluate the submission.

CERT.OTW and CERT.PWR, Certificate in Online Teaching of Writing and Certificate in Professional Writing

- Enrollment is restricted to candidates concurrently enrolled in the Master of Fine Arts in Creative Writing.
- Students who are enrolled in MFA.CWR must select one of the two certificates with their program.

MS.PSY, MS Psychology

- **PSY Non-Licensure Acknowledgment Form**

CERT.FAC, Forensic Accounting and Fraud Examination Certificate

- Resume showing two year's accounting experience, specifically in auditing and financial reporting analysis.

Online Programs

MED.CIN, M.ED Curriculum and Instruction

- Resume including any relevant K-12 instructional or curriculum development experience, for at least six months.
- MED Non-Licensure Acknowledgment Form

MA.COM, MA Communication

- Personal statement (500-600 words) that addresses the student's interest in the field of communication. Students in this program are expected to have a mastery of college-level writing.

MA.ECW, MA English and Creative Writing

- Personal statement (500-600 words) that addresses the student's interest in the fields of English and Creative Writing. Students in this program are expected to have a mastery of college-level writing.

MA.ENG, MA English

- Personal statement (500-600 words) that addresses the student's interest in the field of English. Students in this program are expected to have a mastery of college-level writing.

MA.HIS, MA History

- Personal statement (500-600 words) that addresses the student's interest in the field of history. Students in this program are expected to have a mastery of college-level writing.

MSN, MS Nursing

- Conferred BSN from an ACEN, CCNE or CNEA accredited program.
 - Acceptance- 3.0 or higher cumulative GPA
 - Provisional Acceptance- cumulative GPA Range 2.67 to 2.99 (provisional acceptance is not offered for the FNP track)
- Active, unencumbered Registered Nurse license
- Completion of the MSN acknowledgement form
- For students applying to the Family Nurse Practitioner track:
 - Two years of full-time work experience as a licensed registered nurse
 - Identification of one potential preceptor for a clinical practicum
 - Availability for one, in-person, immersion experience

CERT.HQS.PM, Healthcare Quality and Safety Post Master's Certificate

(Open to qualified nursing and health professions candidates only.)

- **Nurse** applicants who wish to pursue this certificate must meet MSN nursing program admissions requirements **AND** have earned a master's degree from an accredited nursing program (ACEN, CCNE, and CNEA) with a minimum cumulative GPA of 3.0.
- **Non-nursing health professionals** who wish to pursue this certificate must have earned a health professions master's degree from an accredited institution with a minimum cumulative GPA of 3.0.

MS.BAN.CO, MS Business Analytics (Cohort-Based Program)

- Phone call with admissions representative
- Resume
- Written personal and professional statements in response to career-related questions
- Recorded video telling us about yourself, your career aspirations and how this program will help you meet those goals. For an accommodation due to a disability, please contact Online Accessibility ([SNHU Accessibility](#)).
- Conferred bachelor's degree (official transcript)

MS.CSE, MS Cyber Security

- Resume

MS.DAN, MS Data Analytics

- Resume

MS.HIM, MS Health Information Management

- Students must provide proof of prior college level academic credit in Pathophysiology/Pharmacology; Anatomy and Physiology, Medical Terminology, Computer Concepts and Applications, and Statistics.

MS.IT, MS Information Technology

- Resume

Online Programs

Transfer Credit

See [Transfer Credit policy](#).

Initial Enrollment

Students must enroll within one year of the date of acceptance. Students who do not enroll within one year will be required to resubmit application materials and be readmitted under the catalog in effect at the time of readmission.

Admission Requirements, International Students

International students must meet all SNHU admission requirements for Undergraduate Admission ([campus/online](#)) or Graduate Admission ([campus/online](#)). **International students may not be eligible for Admission depending on programmatic requirements and/or existing regulations based on the country in which they reside.** Please speak with your Admission Counselor for more information. Students should check www.snhu.edu for any specific requirements for their program of interest. Individuals requiring a visa to study cannot receive a student visa for online programs.

International students must also meet the following requirements:

Undergraduate Admissions Requirements

1. Official diploma or document showing proof of graduation from high school (secondary school)

OR

A college transcript showing at least 24 transferrable post-secondary credits by a NACES or AICE recognized international evaluation agency or U.S. institution, or a designated, approved credential evaluation service.

OR

A signed form attesting to the completion of high school requirements or earned GED with applicable dates and locations.

2. Proof of English language proficiency as demonstrated by the Test of English as a Foreign Language or equivalent. Test scores must be sent to SNHU directly from the administering organization or released by the test provider to SNHU.

Proficiency requirements are as follows:

Direct to program placement:

- TOEFL score of 79 and greater with a minimum of 15 on each section.
- IELTS score of 6.5 and greater with a minimum of 5.5 on each section.
- PTE score of 58 or greater
- Duolingo score of 105 or higher
- Successful completion of appropriate level at an English Pathway Partner based on terms of current agreement.

Additional English language requirements for on *campus only* pathways:

Direct to program, placement into ENG 099i followed by ENG 120 (campus studies only)

- TOEFL score of 71 to 78
- IELTS score of 6.0 (sub-scores ≥ 5.5)
- PTE score 54 to 57
- Duolingo score of 100
- Successful completion of SNHU's English bridge program
- Successful completion of SNHU's ESL program with a qualifying score

Online Programs

English Bridge (Undergraduate Language Studies - campus studies only)

Students with the following scores will be assigned to the undergraduate bridge program (ULS) with some English and some academic course work. Students entering undergraduate programs via ESL will be required to complete the English Bridge program unless their English proficiency score meet direct to program requirements:

- TOEFL 61-70
- IELTS 6 (sub-scores ≤ 5.0)
- PTE 49-53
- Duolingo 95
- Successful completion of SNHU's ESL program
- Successful completion of appropriate level at an English Pathway Partner based on terms of current agreement.

English as a Second Language

Campus students with the scores that do not meet SNHU's current English requirements may apply for consideration for admittance into their academic program via the English as a Second Language (ESL) program. Some programs may not be eligible for entry via a pathway program.

Graduate Admissions Requirements:

1. Proof of bachelor's degree or graduate degree completion or equivalent with certified evaluation of university transcripts by a NACES or AICE recognized international evaluation agency, or a designated, approved credential evaluation service
2. Proof of English language proficiency as demonstrated by the Test of English as a Foreign Language or equivalent. Test scores must be sent to SNHU directly from the evaluating organization. Copies will not be accepted.

Online Admission Language Requirement:

- TOEFL: 79 iBT with a minimum of 15 on each section
- IELTS: 6.5 with a minimum of 5.5 on each section
- PTE: 58
- Duolingo: 105

In-person Admission Requirement**:

- TOEFL score of 71 or greater
- IELTS score of 6.0 or greater
- PTE score of 54 or greater
- Duolingo of 100 or greater
- Successful completion of SNHU's ESL program
- Successful completion of appropriate level at an English Pathway Partner based on terms of current agreement.

SNHU does not consider TOIEC or EF SET English proficiency exams for admission consideration.

Doctorate Admission Requirements:

- Official diploma and transcripts showing proof of graduation and completed bachelor and master degrees. Degrees earned outside of the US must be evaluated by a NACES or AICE approved evaluator.
- For requirements or additional information on doctoral admission, please see the PhD Admission (link to PhD Admission page) section. Admission decisions for the PhD program are at the discretion of the Doctoral Admission Committee.

Campus English as a Second Language Admission Requirements for non-degree seeking applicants:

Online Programs

- No academic documents are required for ESL-only admission.

SNHU uses a number of factors and criteria when evaluating an applicant for admissions to the campus ESL program. The decision to offer admission is at the general discretion of the International Admissions Office after a careful and holistic review of all materials for submission.

Exemptions to English Language Requirement

The following exemptions exist for the English language proficiency requirement:

1. Proof of U.S. Citizenship as demonstrated by an approved government-issued document
2. Proof of a full academic year of high school in the U.S. with passing grade in one year of standard English (not including ESL or developmental coursework)
3. Proof of a full year of post-secondary education in the U.S. with a minimum of 24 transferrable semester hours or equivalent at the baccalaureate level taught in English (not including ESL or developmental coursework)
4. Applicants may be considered for an English proficiency test waiver on a case by case basis at the discretion of SNHU International Admissions.

Immigration Documentation

International students accepted in-person programs must submit the following documentation to receive an I20:

- Financial documents - Applicants must submit documentation that funds are available, i.e. official bank letter. A demonstrated level of support not only for tuition and room and board, but also for living expenses, pocket money, books, etc., is necessary. Documents must be dated within the past six months.
- Affidavit of support – required if funds are not in applicant's name.
- A copy of applicant's passport identification page.
- A transfer i20 form (for applicants transferring from other institutions within the US.)
- Students may be required to pay a tuition deposit indicating an intent to enroll.

An accepted student must enroll within one year of the term indicated on the original acceptance offer. Those who fail to do so will be required to resubmit an application and may be required to resubmit materials and be reconsidered for admission. The student would be required to satisfy program and degree requirements implemented after the original acceptance date.

Students from partner institutions may be considered for exemption from language tests based upon written agreement of language proficiency with partner language school officials.

Admission Requirements, Undergraduate

The College of Online and Continuing Education offers six undergraduate terms per year. Applications are accepted throughout the year. To be considered for admission to the College of Online and Continuing Education, students are asked to submit the following documents:

- Online undergraduate application.
- Transcript Request Release Form to allow us to request U.S. transcripts directly from previous accredited institutions **OR** Official U.S. transcripts **OR** Transcript Waiver Form (indicating previous accredited institutions being waived). International applicants should refer to the [Admission Requirements, International Students](#) policy. Applicants using Military Education Benefits should consult their Admission Counselor or Academic Advisor regarding previously attempted academic credits.
- Attestation Form verifying graduation from a high school or successful completion of a high-school equivalency exam. Students applying to Southern New Hampshire University may submit one of the following credentials as proof of high school completion:
 - High school diploma
 - General Education Development (GED)
 - A state authorized high school equivalent certificate such as the High School Equivalency Test (HiSET) or the Test Assessing Secondary Completion (TASC).
 - Homeschooled documentation (check Homeschool Admission Policy)
 - A conferred Associates or Bachelor's Degree from an accredited institution.

Additional College for America (CfA) Program Admission Information:

Online Programs

College for America program students must meet the above requirements, and must be employees of a partner organization or participants in a specialized partner program. CfA programs are offered on a trimester schedule. Students with a conferred associate of arts (AA) or associate of science (AS) degree or the equivalent of 60 credit hours from an accredited institution are eligible to enter the CfA Bachelor of Arts programs. Students with the equivalent of 30 credit hours from an accredited institution are eligible to enter the CfA Associate of Arts programs, and be evaluated for a transfer block. For more details on transferring credits into CfA programs, please review the [Transfer Credit](#) policy.

College for America programs may be available to immediate family members of enrolled students. Please check your company specific landing page (the site shared with you by your company). An immediate family member is defined as the following:

- Spouse, domestic partner* and parents thereof
- Dependent children, and spouses thereof
- Parents, and spouses thereof
- Siblings, and spouses thereof
- Grandparents and grandchildren, and spouses thereof

*Domestic Partner for purposes of this policy is defined as an adult in a committed relationship with another adult.

Additional admission criteria may apply. Students should check www.snhu.edu for any specific requirements for their program of interest.

Admission Statuses

Admission Decisions

An admission decision is considered official upon notification to the student. Southern New Hampshire University may rescind an admission decision for any of the following reasons:

- Inaccurate information submitted in the application process
- High school transcripts not submitted, as required
- Any other required documentation not submitted
- Significant changes in qualifications after admission is offered, for example, if a student's disciplinary or criminal background changes

Full Acceptance

A student who is accepted to COCE has been fully admitted to enroll at the university with no additional conditions other than standard academic expectations of all COCE students.

Acceptance, Evaluation Pending (UG)

An undergraduate student whose status is accepted with evaluation pending (AEP) may submit transfer credits for review and approval through the end of the second term at SNHU. At the end of the second term, the student is automatically transitioned from AEP status to ACCEPTED status with all transfer credit that has been approved at that time.

Acceptance, Evaluation Pending (GR)

A graduate student whose status is accepted with evaluation pending (AEP) must provide official transcripts showing a conferred bachelor's degree by the end of their second term at SNHU. At the end of the second term, students remaining AEP will be reviewed and automatically transitioned from AEP status to ACCEPTED status when SNHU has received official transcripts showing a conferred bachelor's degree and any other outstanding transcript will be waived. If SNHU does not have official transcripts showing a conferred bachelor's degree the student will not be eligible to enroll in a third term.

Provisional Acceptance, Graduate

A student whose undergraduate GPA is below the GPA required for full acceptance and who does not hold a post-graduate degree may be provisionally accepted in certain programs.

Refer to the [Provisional Acceptance](#) policy for details.

Denial

A denial decision for admission is applicable to the term for which a student applies, and a student who is denied may reapply for a future term, provided that circumstances for the student have changed.

Matriculated

Students who wish to pursue a degree or certificate are considered matriculated upon enrollment in an academic program.

Non-Degree Seeking Students

Students who do not wish to pursue a degree or certificate may enroll in courses as non-degree seeking students. Refer to

Online Programs

the [Non-Degree Seeking Students](#) policy. Students seeking to enroll in nursing courses as non-degree seeking students should refer to the [Enrolling in Nursing Courses as Non-degree Seeking Students](#) policy.

Homeschool Admission Policy

- An applicant must submit the equivalent of a high school transcript or records of homeschool studies. If the applicant has finished coursework in a non-homeschool setting, official transcripts or an official copy of the General Educational Development (GED) test scores or equivalent are required.
- An applicant must provide verification that he or she has completed a secondary school education. This requirement may be satisfied by a signed statement from the parent or guardian, a home education diploma, or a graduation date posted on the home education records.
- The applicant must provide verification that the home education was carried out in compliance with applicable commonwealth or state laws. The form of this documentation will vary depending on the state statutes governing home education. The documentation may be a letter from the local school board or public school superintendent, a letter from an umbrella school, or a signed affidavit from the parent or guardian.

If the home school program is not accredited, the student must meet all state regulations put forth by their home state and the state of New Hampshire, and may be asked to submit a portfolio including course descriptions, an annotated reading list, and graded work for review.

Limited Graduate Admissions

Students who have completed 108 credits or more toward their undergraduate degree and meet minimum GPA requirements may apply for limited admission into designated SNHU graduate programs. Students opting for limited admission must have completed core requirements in their bachelor's degree program.

Limited admission students are restricted to a maximum of two introductory-level graduate courses and are only matriculated into the graduate program once they provide an official transcript showing bachelor's degree conferral from a regionally accredited institution (or approved equivalent for international students). Students accepted under limited admission are not eligible for financial aid for their graduate courses and are only allowed to register for additional courses in the graduate program once they have been unconditionally accepted. Not all programs allow for limited admission.

Non-Degree Seeking Students

Students who do not wish to pursue a degree or certificate may enroll in courses as non-degree seeking students upon meeting any of the following requirements:

- High school graduates who wish to enroll in undergraduate courses must submit an attestation of high school completion or the equivalent.
- Current high school students who wish to enroll in undergraduate courses must submit proof that they (1) hold junior or senior standing in high school, (2) have a minimum high school grade point average of 2.0, and (3) have the permission of a parent or guardian.
- Students with a bachelor's degree or higher who wish to enroll in graduate courses must submit proof of completion of that degree.

Students must fulfill course prerequisite requirements. Enrollment is on a space-available basis.

Non-degree seeking students are not eligible for federal financial aid at SNHU. All non-degree seeking students follow the College of Online and Continuing Education (COCE) Refund Policy ([campus/online](#)).

Non-degree seeking students who choose to enroll as degree-seeking students at a later date must meet the admission and academic requirements for that degree or certificate. Admission as a non-degree seeking student does not guarantee later admission as a degree-seeking student.

Students seeking to enroll in nursing courses as non-degree seeking students should refer to the [Enrolling in Nursing Courses as Non-degree Seeking Students](#) policy.

Non-Degree Seeking Students are not eligible to enroll in cohort-based courses or in Clinical Mental Health Counseling courses with the prefix MHC or COU.

Provisional Acceptance

Provisional Acceptance to Graduate Programs

Students who do not meet requirements for full acceptance into a graduate program may be eligible for provisional acceptance. Provisional acceptance may be extended to students with a conferred bachelor's degree with a GPA below 2.75 but 2.0 or above; or to students with a conferred bachelor's degree with a GPA below 3.0 but 2.67 or above for the MS in Nursing program (provisional acceptance is not offered for the MSN Family Nurse Practitioner track).^{*} Not all programs permit provisional acceptance.

To be eligible for full acceptance, provisionally accepted students must achieve a term GPA of at least 3.0 in their first term

Online Programs

and a cumulative GPA of at least 3.0 in their second term. In most cases, one course per term is recommended, although in certain programs or for personal reasons students may choose to take up to two courses each term. Regardless of the number of courses taken each term, the same rule applies: students must achieve a cumulative GPA of 3.0 in each of their first two terms. Students who meet this requirement will be fully accepted, and students who do not meet this requirement in either their first or second term will be denied full acceptance and withdrawn from the program. Exceptions will be made for students who complete their first term and have achieved at least a 2.0 term GPA and submitted all assignments.

Provisional Student Enrollment in another Graduate Program

Provisionally accepted students who do not achieve full acceptance in their program may, on a one-time basis, request enrollment in a new program in another academic area. Students must sit out at least one term prior to enrolling in a second program and satisfy the admissions requirements of the second program. Students who have been denied full acceptance are readmitted as provisional students with a provisional status indicating a program change. They must meet all requirements for full acceptance in the second program by maintaining a term GPA of at least 3.0 each term until they achieve a cumulative GPA of at least 3.0. Upon receiving a cumulative GPA of 3.0, students will be fully accepted in good academic standing. Students who do not meet this requirement will be denied full acceptance and withdrawn from the program. Students who enroll in a second program and who are denied full acceptance and withdrawn from the program will not be allowed to request enrollment in another graduate program.

Provisional Student Appeal to Re-enroll in the Same Graduate Program after Denial

Provisional students who have been denied full acceptance because they did not meet the academic requirements in certain programs may work with their advisor to appeal, in writing, to the Scholastic Standing Committee. Students must wait a period of six months from the date of denial before appealing. Students who have been denied full acceptance and successfully appeal to be readmitted are readmitted as provisional students with a provisional status indicating they are remaining in their original program. They must meet all requirements for full acceptance by maintaining a term GPA of at least 3.0 each term until they achieve a cumulative GPA of at least 3.0. Upon receiving a cumulative GPA of 3.0, students will be fully accepted in good academic standing. Students who re-enroll in a program and who are denied full acceptance and withdrawn from the program will not be allowed to request enrollment in another graduate program.

Students who are readmitted may be limited to enrolling in only one course per term and will need to meet regularly with the advisor to discuss resources and review progress toward achieving the cumulative GPA required for good standing. All students must meet cumulative GPA requirements for good standing prior to graduation.

Notes:

Nursing students must achieve a grade of B- or better in all NUR and IHP required program courses completed at SNHU. See [Academic Progression Requirements for Nursing Programs policy](#)

Students in the Clinical Mental Health Counseling program must earn a minimum of a B- in all SNHU Counseling courses. See [MA Clinical Mental Health Counseling Program Progression policy](#).

Readmission

Students pursuing a course based program of study must maintain an active status by registering for at least one course per year. Students who are absent for more than one year will be placed under the current academic catalog when they return. If their original program requirements have changed, they will have to meet any additional program requirements.

Students must provide updated transcripts if they have attended elsewhere. Being admitted for a previous term/trimester does not guarantee reactivation or readmission. If a student left the university and was not in "Good Academic Standing" or "Good Disciplinary Standing", the student must also meet all other requirements given at the time of suspension before an admission decision will be considered.

Additional College for America (CfA) Readmission Information:

Students pursuing competency based programs must maintain an active status by registering for at least one trimester per year.

If a student withdraws, outside of the trial period, the student is required to wait until the end of their sixteen week trimester to return.

If a balance exists, students are required to make payment arrangements with Student Financial Services before being readmitted to the program.

Please refer to the [Readmission for Military Students](#) policy for additional information.

Online Programs

Readmission for Military Students

Southern New Hampshire University (SNHU) acknowledges that students may be temporarily unable to attend classes or be required to suspend their studies in order to perform military service. SNHU encourages such students to resume their education once a military service obligation has ended and adopts this policy to ensure the timely readmission of such students.

The University will promptly readmit service members who seek readmission to a program that was interrupted due to a uniformed service obligation.

Eligibility

A student is eligible for readmission under this policy if, during an absence, the student performs uniformed service, voluntary or involuntary, in the Armed Forces, including the National Guard or Reserve, active duty, active duty for training or full-time National Guard (under federal authority). The cumulative length of all absences for uniformed service (service time only) must not exceed five (5) years.

Notification

A student must provide oral or written notice of a uniformed service obligation to Academic Advising as far in advance as possible, unless precluded by military necessity. Such notice does not need to indicate when the student will return to the university.

The student must also give oral or written notice of his/her intent to return to SNHU within three (3) years after the completion of the period of service. Immediately upon the student's return to school, the student must provide notice that he/she may be entitled to the tuition and enrollment benefits outlined in this policy. The returning student may be required to provide supporting documentation.

Notification under this section must be provided, by the student, to advising@snhu.edu.

Tuition and Fees

A returning student must be charged the same tuition and fees in effect during the last academic year the student attended, unless veterans' education benefits or other service member education benefits will pay the amount in excess. For subsequent academic years, the returning student may not be charged tuition and fees in excess of what other students in the program are charged.

Readmission Requirements

A returning student will be permitted to reenroll in the next class(es) scheduled in the same academic program, unless the student requests a later date of reenrollment or agrees to a different program. A returning student will be readmitted into the same academic program the student was enrolled in prior to the military service obligation. If the exact program no longer exists, the student will be admitted to the program that is most similar, unless the student requests or agrees to admission to a different program. Returning students will be reenrolled with the same enrollment status and academic standing as the last academic year of attendance. The changing of a program at the request of the student could affect credit counts based on the new program's degree requirements.

College for America (CfA) Program

CfA Attempted Competencies

Attempted competencies are defined as a student having submitted a project or mastered the competencies in question. If a student does not master his or her registered competencies during the trimester, College for America will process the competencies as follows:

- Competencies attempted, but not mastered by the end of the trimester will receive a status of "Not Mastered" (NM). The student may re-register for these competencies in a future trimester.
- Competencies not attempted by the end of the student's current trimester will be administratively dropped.

Students whose registrations are dropped will be reviewed for potential adjustments based on the number of registrations

Online Programs

reported at the beginning of the trimester versus the actual number of registrations attempted:

- Students receiving Title IV Pell Grant funds will have their financial aid enrollment status reviewed to determine if funds must be returned due to not having attempted enough competencies equivalent to the enrollment status used to determine their original eligibility. If funds must be returned, this may result in a balance owed to the University.
- Federal financial aid Satisfactory Academic Progress (SAP) will be calculated based on the comparison of mastered competencies and attempted competencies, with a performance threshold of 67%.
- Students must re-register for dropped or "Not Mastered (NM)" competencies in the following trimester. The re-registered competencies may again be included in determining the student's financial aid enrollment status for the new trimester.

Students will be notified of any adjustments to their aid eligibility through a revised award letter notice via the student's SNHU email address.

CfA Enrollment Status

- **Full Time:** A full-time academic load in College for America is 12 competencies (or 12 credit equivalencies) within a trimester.
- **Three-quarter Time:** A three-quarter time academic load in College for America is 9 competencies (or 9 credit equivalencies) within a trimester.
- **Half-Time:** A half-time academic load in College for America is 6 competencies (or 6 credit equivalencies) within a trimester.
- **Less than Half-Time:** A less than half-time academic load in College for America is fewer than 6 competencies (or 6 credit equivalencies) within a trimester. This may result in any student loans no longer being disbursed and/or deferred. Please check with the Student Financial Services office if you have questions about this.

Please see the [Financial Aid Enrollment Status Criteria policy](#) for additional details.

CfA Scholastic Standing

A student's scholastic standing is determined based upon information contained in the student's academic record at the end of each trimester. Students must meet both qualitative and quantitative (minimum completion rate) standards to remain in good scholastic standing. A student meets both the qualitative and quantitative requirement by mastering at least **six** competencies during each trimester.

Students who do not meet scholastic standing requirements face scholastic sanctions that include Scholastic Warning, Scholastic Suspension or Dismissal. Students who withdraw prior to completing 60% of the trimester will not be subject to scholastic sanctions for the trimester.

Scholastic Warning: Students who do not master at least six competencies in a trimester are placed on scholastic warning for the following trimester.

Continued Scholastic Warning 1: Students on Scholastic Warning who do not master at least six competencies in a trimester are placed on Continued Scholastic Warning 1 for the following trimester.

Academic Suspension: Students who are on Continued Scholastic Warning and fail to master at least six competencies in a trimester are suspended from the program.

Appeal Process for Readmission after Academic Suspension:

Students who have been scholastically suspended may appeal, in writing, to the Scholastic Standing Committee. A student must be suspended for a minimum of one term. If approved, students are readmitted on scholastic warning and must master at least six competencies during the trimester they are readmitted. If they fail to do so, they are dismissed from the university and may not appeal again.

Academic Dismissal: Students who are readmitted after Academic Suspension and fail to meet academic standards for the trimester in which they are readmitted are dismissed from the University. Academic Dismissal is considered final and appeals are not accepted.

Online Programs

Scholastic Standing Committee:

The Scholastic Standing Committee is responsible for considering student appeals for readmission after academic suspension

The Committee has the authority to:

- Readmit a student who was scholastically suspended.
- Uphold the academic suspension
- Dismiss a student from the university.

CfA Student Evaluation Appeal Policy

Purpose of Policy:

The purpose of the Student Evaluation Appeal policy is to provide students with a process to seek help or resolution when they feel that an evaluation and/or feedback for a Project are erroneous.

Process:

A student should first correspond with the Reviewer directly to clarify the evaluation and/or feedback. If no resolution is found through communication with the Reviewer, the student may request a second opinion of the accuracy of the rubric assessment and accompanying feedback. To do so, students complete the "[Dispute Resolution](#)" form. The Reviewer's Manager who oversees the competency module will evaluate the project for themselves independently of the Reviewer's input and either concur with the standing evaluation or override it in favor of the student. Under these conditions, the student will be held harmless for any part of the rubric criteria that the Manager believes ought to have remained Not Yet but was awarded Yes by the Reviewer.

CfA Transcript and Competency Statement Policy

At any time, a student may request an official copy of their SNHU Course Equivalency Transcript, or SNHU Competency Transcript; electronic transcripts are available for a 5.00 fee, and paper transcripts are available for a \$7.00 fee.

College for America is a competency-based program; mastery grades are issued once students master individual competencies and equivalencies. There are no quality points associated with mastery grades, therefore there is no GPA (Grade Point Average) for students in College for America programs; the Transcript Legend indicates that "MA" is equivalent to an "A" grade on a traditional grade scale.

The official SNHU Course Equivalency Transcript displays each course equivalency the student has earned with a grade of "MA" for mastery. The completion of each competency by demonstration of mastery has a one credit equivalency. A Course Equivalency Transcript is recommended for purposes of a transfer to another institution. The official SNHU Competency Transcript provides a detailed list of every mastered competency, which may also be provided to other institutions.

Employers requiring ongoing proof of degree progress may request an Employer Term Statement that shows mastered competencies or completed course equivalencies for a specific enrollment period. An Employer Term Statement is available free of charge. In the instance where an employer requires documentation of a student's progress to facilitate partner billing, Workforce Partnerships or Student Financial Services will release such documentation if the student has a signed [Authorization for Disclosure of Non-Directory Information](#) listing their employer, on file.

In accordance with the Federal Family Education Rights and Privacy Act (FERPA), the Office of the University Registrar or Student Financial Services will not furnish a transcript or statement to anyone other than the student, without the written permission of the student.

CfA Transfer out of Competencies Mastered or Credit Equivalencies to Other Educational Institutions

The University shall award one credit equivalency for each CfA competency that is mastered, up to 60 credits for the AA degree and up to 60 additional credits for the competencies leading to the BA degree, for a total of 120 credits. However, CfA cannot guarantee credits earned will be accepted at another institution. The transferability of credits to another institution is solely at the discretion of that institution. If a student is planning to transfer to another institution, he or she should check with that institution on the transferability of the credits.

One credit equivalency is earned with the mastery of each competency, and these are mapped to course equivalencies. View the [Program Requirements](#) for each program to determine which CfA competencies when completed are equivalent to which Southern New Hampshire University courses.

Online Programs

CfA Trial Period of Enrollment

CfA students are offered a trial period of enrollment which allows participation in the program before deciding to make a financial commitment to enroll and becoming a regular student. During the trial period of enrollment the student does not incur a financial obligation.

Students are provided a 14-day drop period at the beginning of each term during which they may also elect to withdraw without financial penalty. Students who withdraw during the 14-day period at the beginning of a term are considered regular students. If the student is otherwise eligible for Title IV federal financial aid he or she will be treated according to the Title IV federal financial aid withdrawal requirements, potentially including a Return of Title IV calculation and/or consideration for a Post-Withdrawal Disbursement.

Any competencies earned during the trial period of enrollment are not considered mastered unless the student fully enrolls in the term.

Dropping and Adding Competencies in CfA Programs

Students who wish to update their trimester registrations should contact their advisor. Students can be enrolled in a maximum of 12 unmastered competencies at a time. Students may add a new competency after mastering a competency. No new competencies may be added when only one week remains in the trimester.

Please see the [Financial Aid Enrollment Status Criteria](#) policy for additional details.

Course and Program Enrollment

Academic Year

An academic year extends from September 1st through August 31st of the following year.

Change of Program or Major and Second Major

Change of Program between COCE, UC, and CfA

Students may not concurrently enroll in courses that overlap term dates between University College (UC) and College of Online and Continuing Education (COCE), unless the class (term) start and end dates fall entirely within the UC semester start and end date. Students enrolled in College for America (CfA) programs are not permitted to be concurrently enrolled in either UC or COCE courses and vice versa. For more information, please consult with your academic advisor.

Change of Degree- Associate to Bachelor

When students change from an Associate degree program to a Bachelor degree program, the courses completed as part of the Associate degree will be counted toward the Bachelor degree program.

Change of Program (GR) or Major (UG)

Students who wish to change their major or program must submit a [Program Modification Form](#) (online) or [Program Change Request Form](#) (campus) to their academic advisor. The advisor will work with students to explain the impact of changing majors. All changes will take effect at the end of the current term.

Adding a Second Major

An undergraduate student may elect to earn a second major by completing the degree requirements of both majors. No more than 2 courses in the secondary major may overlap with the primary major. The student's diploma will show the primary major as the conferred degree; the transcript will reflect both majors.

Financial Aid Enrollment Status Criteria

As mandated by the U.S. Department of Education policy, only courses required for a student's degree can be used in determining enrollment status for financial aid purposes. In addition, federal student aid regulations permit only one repetition of a previously passed course in determining enrollment status for financial aid purposes.

Concurrent Program Enrollments

Enrollment in Multiple Programs Simultaneously

An undergraduate or graduate student, with the exception of those enrolled in a CfA program, may choose to be enrolled in multiple programs at the same time. SNHU's institutional credit minimums apply separately, however, to each degree or

Online Programs

certificate awarded. Students should be aware that enrollment in multiple programs may increase the number of courses they are required to take to complete their programs, above and beyond the minimums within the programs themselves.

Special Academic Options

Double Degrees

A student with a SNHU undergraduate degree seeking to earn an additional degree of the same level must complete at least 30 additional credits in residence, while satisfying all other requirements of the new degree. No more than 2 courses in the new major may overlap with the major(s) of the previous degree(s). Double degrees may be pursued concurrently; however, the courses satisfying institutional credit requirements cannot be shared between the two credentials.

Second Degrees

A student who wishes to earn a second master's degree through Southern New Hampshire University is required to take a minimum of 7 graduate courses beyond the first degree. All other requirements in the second degree program also must be satisfied. Students considering this option should meet with an advisor to determine specific additional requirements.

International students seeking a second degree also must obtain a new visa eligibility certificate (I-20 or DS-2019). This requires a new statement of financial responsibility and admission into the second degree. Students should contact International Admissions for more details and specific requirements.

Course Add and Late Enrollment

Students are not allowed to enroll late or add a course after a term has started.

Late enrollment differs based on whether a student is a new student (first term enrolled) or a current, continuing enrollment student. For new students, the last day for new student enrollment is the Saturday prior to term start date. For current, continuing enrollment students, the last day for current students to reenroll is the Sunday prior to term start date.

Approved Exceptions:

Exceptions to enrollment after a term start are granted only when current, continuing enrollment students (1) have enrolled in a course which they failed and must repeat or (2) have reenrolled in a course which they thought they needed to repeat but did not have a failing grade. The late enrollment exceptions to either of these cases must be made no later than day 4 of the term start date.

Course-by-Arrangement

Course-by-arrangement is a Southern New Hampshire University course appearing in the university catalog and required in the student's academic program of study, yet extraordinary circumstances prevent the student from enrolling in the course when it is normally offered. As such, all other possible alternatives should be exhausted. Course-by-arrangement may be available to Southern New Hampshire University students, who are unable to obtain a required course during the normal registration and scheduling process, but it is needed to fulfill a program requirement. Students who need to request this option should consult with their academic advisor as early as possible to discuss next steps.

Course Drop and Withdrawal

COCE undergraduate and graduate students may drop courses prior to the start of term, through week one of the term without penalty. All term weeks, including the first week of a term, begin on Monday at 12:00 a.m. and end on Sunday at 11:59 p.m., EST. Holidays during the first week of a class do not impact the Sunday 11:59 p.m. EST deadline for dropping courses. No tuition charges are incurred by students who drop courses during the first week of the term, and the dropped course(s) will not appear on the student's academic transcript.

Any withdrawal after week one and before the last week of the term will result in a grade of "W" appearing on the student's academic transcript. A withdrawal after the fourth week of a term for undergraduate students or the sixth week of term for graduate students may be allowed only with approval by the academic advisor. For Advantage students on a 16-week term, withdrawals after the tenth week of the term will only be allowed for serious unforeseen circumstances (see "Military Withdrawal", "Medical Withdrawal" and "Emergency Withdrawal" below). Students are charged 50% tuition for withdrawals that take place during week two and 100% tuition after week two of the term.

Withdrawals are not permitted, under any circumstance, in the last week of any term. This policy also applies to an undergraduate student taking a 16-week course.

Withdrawn courses will appear as credits attempted but no credits earned in a student's academic records. This could have implications in terms of Satisfactory Academic Progress or Scholastic Standing with SNHU. Students who do not maintain

Online Programs

Satisfactory Academic Progress will experience an impact on financial aid eligibility. Withdrawal from a course will likely impact eligibility for financial aid for the current term as well as future terms. Student should discuss these concerns with their academic advisor.

Merely ceasing to attend classes does not constitute an official withdrawal for academic or financial reasons. Any student who has not officially withdrawn from a course will be assigned the grade calculated based on all submitted and missed graded assignments for the course. Missed assignments will earn a grade of zero. Any student who has not officially withdrawn from a course will be responsible for full tuition and any accompanying fees.

Drop and Withdrawal Process

Students who wish to drop courses prior to the start of the term through week one of the term may do so by contacting their academic advisor who can assist them with the process.

After week one of the term, students are required to follow the steps below to withdraw from a course or courses. Students are encouraged to speak to their academic advisor for assistance. Students should consider factors, such as Financial Aid eligibility, Satisfactory Academic Progress and Scholastic Standing before dropping or withdrawing from a course or courses.

Step 1. Complete the [Course Withdrawal Request Form](#), located on the SNHU website. All withdrawals must be submitted using the online withdrawal form. No paper withdrawal forms or voice mail or email messages will be accepted. The date of withdrawal is the date the completed form is submitted. Term weeks, including the first week, start on Monday at 12:00 a.m. and end on Sunday at 11:59 p.m., EST.

Step 2. Print or save the acknowledgement page that displays upon submission of the COCE Withdrawal Form for your records.

Step 3. After submitting the COCE Withdrawal form, verify that the course no longer appears in mySNHU under the Class Schedule section.

College for America Students

During a student's trimester, withdrawal is the appropriate action if the student wants or needs to pause his or her studies for a variety of reasons (e.g. medical, military, personal).

CfA Student Initiated Withdrawal - (Official Withdrawal)

This process involves a few simple steps:

- Student consults with their Advisor
- Student completes the Withdrawal Form, located on the mySNHU website. All withdrawals must be submitted using the online withdrawal form. The date of withdrawal is the date the completed form is submitted.

Online Programs

- Student's status is reported as withdrawn

When this process is initiated during the first 14 days of a student's first trimester:

- Even if the student has participated in academic activity, the student is dropped at no charge.
- Any previously scheduled Title IV federal financial aid will be cancelled.
- Any competencies earned during the trial period of enrollment are not considered mastered.

When this process is initiated during the first 14 days of any subsequent trimester:

- If the student has not engaged in any academic activity, the student is dropped at no charge.
 - Any previously scheduled Title IV financial aid will be cancelled.
 - A Return to Title IV federal financial aid funds (R2T4) calculation is completed using the student's last date of academic activity (LDA).
 - If eligible, a Post-Withdrawal Disbursement is offered.
 - The student is reported as withdrawn to the National Student Clearinghouse, and any outstanding student loans will enter the applicable grace period repayment.
 - Any competencies earned during the trial period of enrollment are not considered mastered.

CfA Administrative Withdrawal - (Unofficial Withdrawal)

Students who otherwise do not follow the University's withdrawal procedures and who cease to participate in all registered competencies prior to the 60% point of a trimester (as measured in calendar days) may be subject to recalculation of their Title IV federal financial aid eligibility. Participation is demonstrated through submission of projects.

Students who have not participated as of the 60% point of a trimester or later are identified after that trimester has ended. Required changes to a student's financial aid eligibility are made at that time.

- His or her enrollment status will be re-evaluated to exclude any competencies in which a student did not participate.
- A Return of Title IV calculation will be completed using the student's last date of participation to determine the amount of Title IV financial aid that must be returned. This recalculation may leave the student with a balance due to the University.
- If the student is eligible, a Post-Withdrawal Disbursement will be offered.

Military Withdrawal

Enrolled active-duty military personnel may withdraw from a term if they are deployed to a location that has no civilian internet access. Any tuition refund requires students to provide a copy of military orders, as well as a letter from the superior officer confirming the lack of availability of civilian internet access. In appropriately documented cases, a student may be eligible to withdraw from a term with a full tuition refund if his or her withdrawal is predicated on an injury or illness directly related to his or her military service. Any such refund requires the student to provide supporting medical documentation.

Medical Withdrawal

Online Programs

A student may be allowed to withdraw from a term in the case of exceptional circumstances such as serious illness which must be documented by a letter from a physician, or other appropriately documented serious condition beyond the student's control. COCE administration reserves the right to make the final determination and give or deny approval for such a withdrawal. Any withdrawal made after the fourth week of term for undergraduate students and the sixth week of term for graduate students will be processed at no refund to the student.

Emergency Withdrawal

The goal of the Emergency Withdrawal policy is to support COCE and CfA students who may be experiencing serious extenuating personal circumstances during a term by allowing a course withdrawal after Week 1 of the term for COCE students and after the trial period for CfA students. An [Emergency Withdrawal](#), which is noted as a "W" on a student's transcript, may be granted for extraordinary cases in which a serious and unexpected medical issue or other significant personal circumstance prevents a student from continuing his or her class(es). While the [Refund Policy](#) applies, the University reserves discretion to allow financial consideration for Emergency Withdrawals.

In order for an Emergency Withdrawal to be considered the circumstance must be *serious*, *unforeseen*, and *documented*, and must not be able to be addressed through a reasonable academic arrangement:

- *Serious*: Reserved for circumstances that fall well outside the norm of everyday challenges or stresses and are severe enough to reasonably cause disruption to a student's personal and academic life.
- *Unforeseen*: Reserved for circumstances that are outside a student's control and were unanticipated at the time of registration and/or during the term's drop period. Students applying based on chronic or intermittent issues (including pregnancy) known at the time of registration will be reviewed on a case-by-case basis.
- *Documented*: All Emergency Withdrawal requests must be accompanied by supporting documentation which clearly shows that the student was not able to complete his or her online class successfully.

Examples of serious, unforeseen, extenuating circumstances include unexpected extended hospitalization, death of an immediate family member, severe illness of a dependent, or natural disaster. For the purposes of the Emergency Withdrawal policy immediate family is defined as a spouse, domestic partner, parent, sibling, child, grandparent, parent-in-law, grandchild, or a member of the immediate household.

Emergency Withdrawals are not granted for circumstances that are foreseeable, avoidable, or do not significantly and reasonably impact a student's ability to complete his or her online class. Examples of Emergency Withdrawal requests that do not qualify as an Emergency Withdrawal include change in employment, relocation, vacation, financial difficulties, or life stresses. Emergency Withdrawals are also not granted if a student does not provide sufficient documentation.

Deadlines

All [Emergency Withdrawal](#) requests must be received no later than 11:59pm on the Sunday preceding the last week of the term. Students who are not able to provide new documentation or who are not able to meet the deadlines of the Emergency Withdrawal policy can file a dispute up to 90 days after the close of the term. Requests that come in after the deadline should be submitted via the [Dispute Resolution form](#) and will be reviewed through the dispute resolution process.

For CfA students, Emergency Withdrawals can be filed after the trial period is over but must be submitted by 11:59 pm on the Sunday preceding the last week of the program term. CfA students should speak with their advisors and Student Financial Services to ensure they have exhausted all other options available to help them succeed before filing an Emergency Withdrawal request.

An Emergency Withdrawal, just like any withdrawal after the first week of the term, could have financial implications beyond the cost of the course, including a student's eligibility for Federal Student Aid, employer benefits, military/veterans benefits, etc. An Emergency Withdrawal is not the same as a Leave of Absence, for Federal Student Aid purposes, and does

Online Programs

not provide loan deferment benefits for any Federal loans. An Emergency Withdrawal could also impact a student's academic completion rate and/or delay a student's graduation date. *Students are strongly encouraged to speak with their Academic Advisor and Student Financial Services about the potential implications of withdrawing before submitting an Emergency Withdrawal request.*

Approval of an Emergency Withdrawal request is not guaranteed. Financial consideration outside this Course Drop and Withdrawal policy is not guaranteed.

University-Initiated Drop

The University will drop students who do not participate in class during the first week of term. Online students are required to submit a graded assignment or discussion during the first week of class. For students enrolled in a course at one of the satellite locations, participation is determined by attending the first class meeting. Students who do not participate during the first week may forfeit their rights to be reinstated into the course. No tuition charges for the course are incurred by students who are administratively dropped from a course for non-participation the first week, and the course will not appear on the student's academic transcript.

College for America students are required to submit at least one project by day 14 of each trimester. Students who do not submit by day 14 of each trimester will be administratively dropped on day 15.

The university reserves the right to drop students who fail to meet financial or academic obligations or who, because of misconduct, disrupt the academic process.

It is the responsibility of the student to be familiar with program-specific requirements around participation in the first week as they may supersede the university's minimum standards. Students should consult with their advisor on program requirements.

Withdrawal Disputes

Withdrawal disputes must be submitted online within thirty (30) days after the end of the term during which the student withdrew to coceappeals@snhu.edu.

Financial Aid Enrollment Status Criteria

As mandated by the U.S. Department of Education policy, only courses required for a student's degree can be used in determining undergraduate enrollment status for financial aid purposes. In addition, federal student aid regulations permit only one repetition of a previously passed course in determining enrollment status for financial aid purposes.

MA Counseling Residency Refund Policy

Residencies:

Students may withdraw from the residency course before the start of residency and receive a full refund of the residency fee. This refund excludes any travel or other costs incurred outside what is covered by the fee. Tuition refunds will follow the university's standard tuition [Refund Policy](#).

Online Programs

Students who fail to attend the residency without withdrawing prior to the start of residency will incur the residency fee, and will be subject to that fee a second time upon re-taking the residency course.

Course Load and Restrictions, International Students

International students in F-1 and J-1 student status must be enrolled full time to maintain lawful presence in the U.S. Online classes are limited to one class per term counting toward your minimum full-time course load. Any classes taken over the minimum full-time course load may be in-class or online format. NOTE: All reductions in a full course load for academic or medical reasons, as well as terms off, must be approved by the Office of International Student Services prior to the start of the term or class load reduction. In a final term, if only one course is remaining, it must be taken in-class to maintain F-1 or J-1 student status.

Course Participation Requirement and Unearned F

Course Participation and Administrative Withdrawal

Online students are required to submit a graded assignment or discussion during the first week of class. Regional center students are required to attend the first class session. Online students who do not submit a graded assignment or discussion during the first week of class or regional center students who do not attend the first class session are automatically dropped from the course for non-participation on day eight of the term. Automatic administrative drops for non-participation only take place during the first week. Students who do not participate during the first week may forfeit their rights to be reinstated into the course.

It is the responsibility of the student to be familiar with program-specific requirements around participation in the first week as these may supersede the university's minimum standards. Students should consult with their advisor on program requirements.

Students who stop participating after week one remain enrolled in the course. Students are responsible for completing the proper withdrawal procedures if they wish to withdraw from the course. Students who stop attending a course or courses after the first week and who do not officially withdraw will receive the grade calculated based on all submitted and missed graded assignments for the course. Missed assignments will earn a grade of zero. For more information regarding course withdrawal, see the [Course Drop and Withdrawal](#) policy.

College for America Students

College for America students are required to submit at least one project by day 14 of each trimester. Students who do not submit by day 14 of each trimester will be administratively dropped on day 15.

Unearned F Policy (Financial Aid and Military Students)

While Southern New Hampshire University does not measure student participation in courses past day 7 of the term, participation in courses and completion of assignments are two critical components to student success. Students who use financial aid or any type of military benefits and fail all courses in a term will be reviewed for participation. Students who cease participation in graded activities prior to completing 60 percent of the term will be classified as receiving an "unearned F" and a recalculation of their Financial Aid or military benefits eligibility will be conducted based on their last date of attendance. The last date of attendance is defined as the last time the student participated in a graded activity within the course. This recalculation may result in a balance owing and could place future financial aid, military benefits funding and registration at risk.

Credit Load

Credit Load

Credit Load, Enrollment Status, and Loan Deferment:

If a student is attending at a less than half-time credit load status, student loans will not go into deferment and eligibility for other benefits may be affected.

Credit load is defined as follows:

Undergraduates

Online Programs

Full Time	12 credits
Three-Quarter Time	9 – 11.99 credits
Half-Time	6 – 8.99 credits
Less than Half-Time	Under 6 credits

Students in 8 week (EW) terms:

- Credit load is based on total credits over entire trimester (two consecutive terms).
- In order to enroll in more than six credits in any given term, a student must obtain permission from his or her academic advisor and have a cumulative GPA of 3.0 or higher.

Students in all other undergraduate terms:

- Credit load is based on total credits in a single term.

Graduates

Full Time	6 credits
Three-Quarter Time	4.5 – 5.99 credits
Half-Time	3 – 4.49 credits
Less than Half-Time	Under 3 credits

- Credit load is based on total credits in a single term
- In order to enroll in more than six credits in any given term, a student must obtain permission from his or her academic advisor and have a cumulative GPA of 3.0 or higher.
- A student that is registered for a continuation course for a Counseling Practicum and/or Internship course is considered “Half-time,” due to the academic and experiential requirements of the Counseling continuation courses.

Refer to the [Financial Aid Enrollment Status Criteria](#) policy for additional information.

Criminal Background Check

All students taking courses offered by the School of Arts, Sciences, and Education where a Field Experience is required, must submit to a criminal history records check per NH RSA 189:13-a and the Adam Walsh Act as a prerequisite of participation. This process must be initiated through SNHU’s School of Arts, Sciences, and Education. If you are a currently licensed teacher in New Hampshire, this requirement still applies if you are participating in a field experience outside of the district in which you are employed. **A “Field Experience” is considered to occur when a student is working with children (whether supervised or not) and is required as part of a course.** Results of the criminal history records check will be reviewed by the Criminal Records Coordinator and shared with the Certification Officer if prior convictions are reported.

Freshman Course Requirements

Students with 63 or more credits who have not completed the **Foundations English and Math requirements** will not be allowed to register without completing the required freshman courses.

Transfer students must complete missing freshman and prerequisite courses within their first 30 credit hours at Southern New Hampshire University.

SNHU expects every graduate to be proficient in writing correct, coherent English. All entering freshmen are encouraged to participate in self-guided activities and self-place into either **ENG 099** or **ENG 120/ENG 122**. Students who do not participate in self-placement will be placed into either **ENG 099** or **ENG 120/ENG 122** at the discretion of the writing program. Students taking ENG 099 must pass a Basic Writing Competency Examination given at the end of the course.

SNHU expects every graduate to develop the skills necessary to work with quantitative information. All entering freshmen are encouraged to participate in self-guided activities and self-place into either MAT 050 (for students with weak algebra skills) or a 100-200 level Mathematics course.

The three credits received for ENG 099 or MAT 050 count towards a student’s GPA, but they **do not count towards the 120 credits required for graduation**. Students who take these courses will have to take additional courses to complete their degrees.

University College students may enroll in COCE sections of ENG 099, ENG 120, ENG 121, or ENG 200 only with the permission of the Dean of the School of Arts, Sciences, and Education. University College students are not permitted to enroll in ENG 122 or ENG 123, which are restricted to COCE students.

Online Programs

Independent Study

A Southern New Hampshire University student enrolled in an academic program may request approval to take an independent study course in a subject area, in which the content is not offered in any regularly scheduled Southern New Hampshire University course, for no more than six credits. Students should work with their advisor to make sure there is room in their academic program for this course. Independent studies will only fulfill a student's free electives unless a petition to amend degree requirements is submitted. A qualified Southern New Hampshire University full-time or adjunct faculty member is required to oversee and grade a student's work during the independent study. Students should consult with their academic advisor for more information about required documentation and identifying an appropriate faculty member.

Leave of Absence

SNHU does not grant leaves of absence to COCE students, as students are not required to be enrolled in classes every term.

Refer to the [Course Drop and Withdrawal](#) and [Readmission](#) policies for more information.

Religious Observance

Students may observe religious holy days that preclude them from studying or submitting assignments on those days. Because the College of Online and Continuing education allows students to work at their own pace within a week, students are expected to plan in advance and submit assignments on time. Extensions are not provided for religious observation, except in the case of required synchronous activities.

Students in programs with required synchronous activities should make alternate arrangements with their instructors regarding activities falling on a religious holy day. Such non-participation, when preceded by proper notification of teachers, will not carry any penalty or sanction. Teachers are expected to be inclusive of diverse religious practices by being willing to work out alternatives to scheduled activities and cultivate an academic culture of belonging. In all instances, however, excused non-participation does not mean excused from meeting course standards and expectations. Should a dispute occur the standard appeal process will be followed (see the [Student Academic Complaint policy](#)).

Transfer Among SNHU Colleges

Students in any of Southern New Hampshire University's programs may wish to transfer to the same program, or different, at another one of SNHU's units: COCE – College of Online and Continuing Education (including College for America programs) or UC – University College. Transfer procedures are described in a basic way here, but students are advised to work with their respective academic advising and admissions offices to confirm relevant details. Students may be enrolled only in one SNHU college at a time. Additionally, students must be in "good academic standing," as defined by the Scholastic Standing Policy.

COCE or CfA Student Transferring to the UC

Students currently enrolled in any of the Southern New Hampshire University College of Online and Continuing Education (COCE) or College for America (CfA) programs who wish to enroll in University College must file an Internal Transfer Application with the office of Transfer Admissions. Students will be evaluated on their academic performance in their current programs. Enrollment in a SNHU COCE or CfA program does not guarantee acceptance to a University College program.

UC Student Transferring to COCE

Students currently enrolled in University College undergraduate program who wish to transfer to a COCE program must file an Internal Transfer Application, and it must be filed with the Academic Advising Office on the Manchester Campus.

UC or COCE Student Transferring to CFA Program

Students currently enrolled in a University College (UC), or College of Online and Continuing Education (COCE) undergraduate program, who wish to transfer to a CFA program, must file an Internal Transfer Application with their respective academic advising office. For more details on CfA program eligibility, please review the Admission Requirements, Undergraduate policy.

International Student Transferring to COCE or UC

All international students who wish to begin or change programs must obtain appropriate forms and begin the process in the Office of International Student Services (ISS).

Failure to file an Internal Transfer form with the appropriate office may prevent the student from registering for classes, being billed correctly for tuition and fees, or graduating in a timely manner.

Undergraduates Taking Graduate Courses

Online Programs

Undergraduate students who have completed a minimum of 90 program credits* and have earned a minimum cumulative GPA of 3.0 may apply to take graduate courses through their academic advisor. Students may only enroll in a 500 or 600-level graduate course provided following eligibility requirements have been met:

- There is space available in the course.
- The student has met the prerequisites of the course.
- The course has been approved to fulfill program requirements.
- The graduate term dates fall within the undergraduate trimester/semester start and end dates
 - Note: Campus students must maintain a full-time undergraduate course load (12 credits) and will be charged the prevailing graduate level tuition rates when exceeding semester credit limitations.
- The student has submitted a completed copy of the Undergraduate Student Request to Take Graduate Courses form for each course including all necessary approvals. Students may enroll in more than one graduate course per term/semester.

Approval is limited to a maximum of twelve (12) credits. Undergraduate credits will be awarded upon successful completion of the course. If the student goes on to enroll in a graduate program at Southern New Hampshire University graduate credit will only be awarded if the student earned a grade of "B" or better; the course grade earned at the undergraduate level will not apply to the graduate program or appear on the graduate transcript. Students with courses that do not meet the minimum grade requirement will be required to repeat the course upon enrollment in the graduate program.

Online undergraduate Nursing students seeking to enroll in a graduate level course as an undergraduate student must follow the Accelerated Pathway for MSN. Please refer to [RN to BSN Nursing Admission and Academic Requirements](#) policy.

*Campus students enrolled in Degree in Three programs may apply after having completed a minimum of 60 program credits.

Withdrawal from SNHU

Students wishing to withdraw from the institution can do so by completing the **Withdrawal from SNHU form**. Students should communicate and work with their academic advisor when completing this process. International students should work with the International Student Services department.

Submission of the completed form will withdraw students from the university and from all courses/competencies in which they are currently enrolled, unless the student indicates on the form that they have intentions of completing the current semester/term. For students under the age of 18 years, a written parental/guardian consent is required. If a student cannot access the form due to extenuating circumstances, they must notify their academic advisor to begin the withdrawal process.

The official withdrawal date is the date the form is submitted, unless students choose to complete the current term, in which case their withdrawal from the University will be processed after final grades have been entered. The withdrawal date will be used to determine any tuition refund, in accordance with the University's refund policy. Students are encouraged to talk to their academic advisor and Student Financial Services regarding potential impacts to GPA, military benefits, and financial aid, especially as students near the end of their semester/term. Students can withdraw from the university at any point, however any requests within the last week of the term will be processed after term end and final grades have been awarded.

The University reserves the right to withdraw students who fail to meet academic requirements or who, because of misconduct, disrupt the academic process.

Financial Aid and Resources

Applying for Financial Aid

Eligibility Requirements:

To be eligible for federal financial aid, including grants, loans, and work-study funds, a student must meet certain requirements:

- Enroll as a degree-seeking student
- A U.S. citizen or an eligible non-citizen
- Not be in default on a federal student loan
- Not owe a refund on a federal student grant or loan
- Register with Selective Service (if you are a male born on or after January 1, 1960, are between the ages of 18 and 26, and not currently in the armed forces)
- Have a high school diploma or equivalent
- Maintain satisfactory academic progress

Dependency Status Criteria

The U.S. Department of Education considers the following students to be independent of their parents for purposes of

Online Programs

awarding federal financial aid for the 2020-2021 school year (July 1, 2020 through June 30, 2021):

- Students who were born before January 1, 1997
- Students who are married
- Students who are veterans of the U.S. Armed Forces*
- Students who have children, or will have, if they provide, or will provide, more than half of the support for the child
- Students who have dependents (other than a child or spouse) living with them, if they provide more than half of the support for the dependent
- Students who will be a graduate/professional student in 2020-2021
- Students who are serving on active duty in the armed forces for purposes other than training
- Students who are or were emancipated minors as determined by a court
- Students who are orphans or wards of the court, or were wards of the court as of age 13
- Students who are or were in a legal guardianship as determined by a court
- Students who are or were considered an unaccompanied youth who was homeless on or after May 1, 2019

**Please answer “no” to the dependency status question for veteran status if you (1) have never engaged in active duty in the U.S. armed forces, (2) are currently a Reserve Officers’ Training Corps (ROTC) student, cadet, or midshipman at a service academy, (3) are a National Guard or Reserves enlistee activated only for state or training purposes, or (4) were engaged in active duty in the U.S. armed forces but were released under dishonorable conditions.*

As the questions above illustrate, financial independence is not one of the criteria used in determining whether a student is considered dependent or independent. Parental data must be provided on the Free Application for Federal Student Aid (FAFSA) for students who are unable to answer “yes” to one of the listed criteria. Southern New Hampshire University (SNHU) uses the U.S. Department of Education’s definition of dependency status for all federal, state, institution, and private financial aid programs. Students should refer to the FAFSA for specific details on each of the above criteria or contact SNHU Student Finance Service’s for assistance in determining dependency status.

Prior Bachelor’s Degree

Students who possess a bachelor’s degree prior to enrollment at the University are not eligible for certain grant programs, including the Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, and state scholarship/grant programs.

Federal Financial Aid Penalties for Drug Convictions

The Higher Education Opportunity Act (HEOA) states that a federal or state drug conviction can disqualify a student for federal financial aid. In accordance with a HEOA provision, a student whose eligibility has been suspended may regain eligibility if the student satisfactorily completes a drug rehabilitation program that is approved by the U.S. Secretary of Education.

Federal Financial Aid Application

Free Application for Federal Student Aid

All students who would like to be considered for federal financial aid must complete the Free Application for Federal Student Aid (FAFSA) for the appropriate award year. The FAFSA will determine eligibility for need-based aid, such as Pell Grant and Direct Subsidized Loans. In addition, completion of the FAFSA will determine eligibility for non-need based aid, such as Direct Unsubsidized Loans, as well as being necessary to apply for a Federal PLUS Loan. The FAFSA can be completed at fafsa.ed.gov, with the SNHU federal school code of 002580.

FAFSA Follow-Up

C-Flags, Verification, Unusual Enrollment History

In some instances, SNHU is required by federal and state regulations to review the student’s FAFSA and confirm the accuracy of the information provided. SNHU reserves the right to verify any data submitted by applicants or the parents of applicants.

After the FAFSA has been signed, the application is run through a series database matches, including but not limited to, Social Security Administration, Selective Service, National Student Loan Data System, and Department of Homeland Security. If the student and/or parent does not successfully pass one of the matches, the student and/or parent may be required to submit additional documentation to the university to verify the accuracy of the data provided on the FAFSA. If additional documentation is required the student will be notified via e-mail of the documentation requirements.

Failure to submit requested documents within thirty (30) days may result in a delay or cancellation of a financial aid award. If during the process, data is found to be incorrect, the data may be corrected and the award revised.

If a student is found to have knowingly submitted falsified or intentionally misleading information, Southern New Hampshire University shall reserve the right to (1) refuse to award financial aid or (2) to cancel all aid that has previously been awarded, with all fraudulent information forwarded to the Office of Inspector General for further investigation.

FAFSA Corrections

Online Programs

Any corrections to a student's FAFSA information will be reported electronically by Southern New Hampshire University to the Central Processing System (the CPS) for processing. When electronic corrections are made, the school will receive a corrected Institutional Student Information Report (ISIR) and the CPS will notify the student of the corrections electronically via a Student Aid Report (SAR).

Duration & Renewal of Aid

The FAFSA becomes available for the new aid year on October 1st. It is the student's responsibility to complete this application each year to meet any applicable deadlines. Students intending to use financial aid in future terms will need to file a FAFSA that corresponds with the appropriate award year.

Awarding Financial Aid

Cost of Attendance

The cost of attendance (COA) is an estimate of the student's educational expenses for the period of enrollment. For the purposes of Southern New Hampshire University (SNHU), the period of enrollment will be one academic year. The COA at SNHU follows along with federal guidelines of what are considered allowable costs and exceptions to the rules. The components of the COA are: tuition, fees, books, miscellaneous expenses, transportation, and room & board. Currently at SNHU, the COA will be based on on-campus enrollment, off campus enrollment, as well as with parent enrollment.

For student's attending less than half-time, the COA cannot include allowances for miscellaneous expenses. In addition, the financial award may not exceed the COA for the academic year.

Expected Family Contribution (EFC)

The Expected Family Contribution (EFC) is a measure of a family's financial strength and is calculated according to a formula established by law. It is an index number that the staff at SNHU will use to determine how much financial aid the student would be eligible for, it is not the amount the student's family are required to pay. The student's taxed and untaxed income, assets, and benefits (such as unemployment or Social Security) are all considered in the formula. Also considered, are family size and the number of family members who will attend college during the year.

Determining Financial Need

The financial need for the student is determined by a simple formula: COA minus EFC equals the student's financial aid. This number is then used by SNHU to determine the amount of need-based financial aid the student is eligible to receive. Need-based financial aid includes Federal Direct Subsidized Loans and Federal Pell Grant, as well as Federal Supplemental Educational Opportunity Grant. As the COA cannot be exceeded for the academic year, the Financial Need also cannot be exceeded within the academic year.

Financial Aid Award Package

Once the COA, EFC, and Financial Need is determined, the student will receive the notification of a financial aid award package electronically. After the student reviews the package, the award may be reduced or canceled according to request. To complete a request, the student may contact Student Financial Services at Southern New Hampshire University.

Outside Resources

In addition to federal funds in the initial financial aid package, the student may receive additional outside resources to assist with educational expenses. This additional assistance may include, but is not limited to, employer reimbursement, tuition waivers, private scholarships, fellowships, veteran's benefits, or vocational rehabilitation benefits. Any outside resource that is used by the student will need to be reported to the financial aid office and be included in the student's financial aid package. If the student fails to inform the school of the additional funds, the student may be required to repay the school or the government all or part of the need-based financial aid package.

If the student's award with the outside resources exceeds either the COA or need, the student's financial aid package will be adjusted, even if the financial aid has already been disbursed. Should the additional funds result in a change to a student's financial aid status or eligibility, he/she will receive notification of the change.

Use of Aid

Funds listed on financial aid award letters may only be used for educationally related expenses incurred at SNHU for the respective academic year.

CfA Standards for Satisfactory Academic Progress (SAP)

CfA will evaluate SAP for students receiving Title IV aid on a payment period basis of each trimester.

Online Programs

To comply with Federal requirements, student academic progress will be measured based on a completion rate minimum of 67% of attempted competencies in the trimester. SAP is calculated cumulatively every trimester.

The maximum timeframe for Title IV eligibility is based on 150% of the number of competencies (or credit hour equivalencies) required to complete the program. For example, an Associate of Arts degree requires mastery of 60 competencies. An associate degree student may attempt no more than 90 competencies while receiving Title IV aid.

Competencies Included in the Calculation

- Attempted competencies are competencies that a student has participated in during the trimester regardless of the outcome.
- Successfully completed competencies are defined through the assignment of a Mastery (MA) grade.
- Unsuccessfully completed competencies are defined through the assignment of a Non-Mastery (NM) grade.
- Repeated competencies are counted in the calculation each term the competency is attempted.
- Transfer credits are considered to be credits attempted and completed toward the completion of the student's program and counted toward the maximum time frame.
- Competencies with a grade of 'W' are counted in the calculation as attempted.
- Dropped competencies are not counted in the calculation as attempted.
- Grade changes will be monitored and SAP will be recalculated using any new information

Enforcement

A student who does not meet the minimum of mastering 67% of attempted competencies cumulatively is either placed on Warning or Suspension for Title IV aid. The student will be notified of his or her status via their SNHU email address. This notification will come with instructions to contact his or her Advisor.

SAP Warning

Students who fail to make Satisfactory Academic Progress (SAP) are placed on SAP Warning. Students with the SAP Warning status will retain Title IV aid eligibility for one subsequent trimester. A student on a SAP Warning must meet SAP requirements during the following trimester or the student will be placed on SAP Suspension.

SAP Suspension

A student who does not meet SAP after being placed on Warning is placed on SAP Suspension. A student on Suspension is not eligible for Federal Title IV aid, but may continue working in their program. All future, pending Federal Title IV aid will be cancelled. A student on SAP Suspension has a right to appeal this decision.

Appeal Process

Students who lose their aid may appeal, provided there are mitigating circumstances that inhibited their academic progress. Students can appeal on the basis of illness, death of a relative or other extenuating circumstance. The student must also explain why they failed to meet the SAP requirement and what has changed to allow them to be successful in the future trimesters. If mitigating circumstances do not exist, students may take competencies at their own expense to demonstrate improvement to achieve the SAP standards.

Financial Aid SAP Appeal

Students who have been placed on Financial Aid Suspension will be allowed to appeal this decision.

To be considered, the appeal must include the following:

1. Reason(s) why the student failed to maintain SAP.
1. What has/will change that will allow the student to make SAP at the next evaluation period.
1. An academic plan agreed to by the student, developed by, and in place with their academic advisor. The plan must ensure that the student is able to meet SAP standards by a specific point in time.

Online Programs

Financial Aid SAP Probation

Students who have been initially placed on SAP Suspension and whose appeal is then approved, are placed on SAP probation. The student's eligibility for aid is reinstated.

Financial Aid Appeal Approval and Academic Plan

Students with an approved appeal who are placed on SAP Probation and an Academic Plan will have their status reviewed after each trimester following their successful appeal. Students who are not meeting the requirements of their Academic Plan will be returned to Suspension and all aid from that date forward will be canceled immediately, regardless of current enrollment. Students who are suspended from receiving financial aid as part of this process may appeal this decision after one (1) trimester.

Disbursement of Financial Aid Funds

After confirming enrollment and attendance, SNHU credits all available financial aid funds (excluding Federal Work-Study) to the eligible charges on a student's account. Eligible charges will include: tuition, book voucher (if used), room & board (if on-campus) and fees (if applicable). Once the charges are covered, any remaining financial aid funds will be released to the student in the form of a refund. If subsequent charges occur on the student's account after a refund is processed in a given term, the student will be responsible for these new charges.

Credit Balances and Refund

When financial aid is disbursed and/or payments are made, the funds will be applied to the student's allowable costs. If the amount credited to the account totals more than the billed amount, the additional funds will be refunded to the student.

The university processes refunds to students based on a published refund processing schedule and in a manner that complies with Department of Education requirements for refunding federal financial aid funds. All refunds will be processed through a student's refund preference with BankMobile. Any refunds occurring as a result of fees paid with a credit card will be credited back to the same credit card account.

In the event that non-eligible financial aid funds are disbursed in error, the student agrees to repay the full amount to SNHU. If a mistake was made, whether by the student, SNHU, or another agency, federal regulations require that the mistake be corrected and funds be returned.

Educational Loans

Federal Direct Loans

Federal Direct Loans are fixed-rate student loans for undergraduate and graduate students to help pay for the cost of their education. The lender of the loan will be the U.S. Department of Education.

The Direct Student Loan program offers the following types of loans for students in eligible programs:

Direct Subsidized Loan: Available to eligible undergraduate students who demonstrate financial need. The U.S. Department of Education pays the interest on a Direct Subsidized Loan while the student is in school at least half-time, for the first six months after the student leaves school (referred to as a grace period*), and during a period of deferment (a postponement of loan payments).

Direct Unsubsidized Loan: Available to eligible undergraduate and graduate students. In order to be eligible, the student does not need to demonstrate financial need. Unlike the Direct Subsidized loan, the interest begins accruing once the loan disburses on the student's account. Repayment of the loans begins 6 months after a student is no longer maintaining a minimum enrollment status of half-time.

Direct PLUS Loan: Available to eligible graduate or professional students and parents of undergraduate students to help pay for educational expenses not covered by other financial aid. To be eligible, the student must be enrolled at least half time in an eligible program of study. During the application process, the borrower may request any amount of PLUS funds, but not to exceed the COA. There are currently no aggregate limits for PLUS loans.

A credit check is required for PLUS Loan approvals which reviews credit history. If the potential borrower has an adverse credit history, an endorser option is available. If approved, the borrower(s) must complete PLUS loan counseling prior to receiving the PLUS loan.

PLUS loans must be repaid with interest. Repayment of principal and interest begins 30-60 days after the loan is fully disbursed.

*Grace Period: For Direct Subsidized and Unsubsidized loans, the grace period is the period of time after the student graduates, leaves school, or drops below half-time enrollment. During this time, the student is not required to make payments.

Online Programs

Federal 150% Direct Subsidized Loan Limit

Beginning on July 1, 2013, a new provision was added to the Direct Loan statutory requirements (see HEA section 455(q)). The provision put in place limits the period of eligibility for a first-time borrower* to receive Direct Subsidized loans only up to 150 percent of the length of the borrower's published educational program. Once the student reaches 150 percent used, the provision also causes the student to lose the interest subsidy on the disbursed Direct Subsidized loans.

Borrowers with existing balances at the time the provision was put in place will not be effected by this provision, only first-time borrowers on or after July 1, 2013 are subject.

*A first time borrower for the purposes of the Subsidized Loan Limit (SULA) is defined as a student who either (1) never received Federal Direct Loans and receives a disbursement after July 1, 2013, or (2) does not have a balance with any Direct Loan holders, returns to school and receives federal funding after July 1, 2013.

Federal Direct Loan Lifetime Limit

All student types are subject to aggregate lifetime borrowing limits. Please see the chart below:

Academic Career	Maximum Subsidized	Additional Unsubsidized	Combined Subsidized and Unsubsidized
Dependent Undergraduate	\$23,000	\$8,000	\$31,000
Independent Undergraduate	\$23,000	\$34,500	\$57,500
Graduate (Includes UG	\$65,500*	\$73,000	\$138,500

*As of the 2013-2014 award year, graduate students are no longer eligible to borrow Subsidized Direct Loans.

Private Student Loans

A private student loan is from a private lender that may be used to pay up to COA, less any federal financial aid received. Private loans usually require the applicant to be credit worthy or have a co-signer. Private loans have varying interest rates, fees and repayment options. Repayment of interest (and often principal) generally begins immediately, with some lenders offering deferment options for in-school periods.

Federal Work-Study (FWS)

The Federal Work-Study Program is an employment program funded by the federal government and the University. This program allows students with financial need to receive an hourly wage by working on or off-campus. Work-Study funds are available to students who demonstrate financial need through the completion of the Free Application for Federal Student Aid (FAFSA) and are enrolled in a degree program.

Each fall, Southern New Hampshire University will sponsor a job fair prior to the start of classes in order to help assist students in locating employment through the Work-Study program. It is the responsibility of the student to locate the employment as well as earning funds. The amount of funds earned may vary depending on the position offered.

Typical Federal Work-Study positions on campus are in the library, in department offices, the recreation center and in postal services. Students may also work off campus in community service positions such as the YMCA, Easter Seals, and the Salvation Army.

Federal Work-Study positions and other student employment opportunities are available throughout the year online at www.snhu.edu/jobs.

For further information, please email workstudy@snhu.edu

Financial Aid Enrollment Status Criteria

As mandated by the U.S. Department of Education, for financial aid purposes, only courses that are considered a requirement to complete the program can be included when the financial aid office determines the student's enrollment status. In addition, per regulations, a student may only retake a course one time after previously passing the course, when determining the student's enrollment status.

Students' financial aid eligibility is based on two parts: enrollment status and participation. The student's enrollment status is reviewed at time of disbursement and throughout the given term of enrollment. The student's participation is defined as the submission of a project or discussion, for online forums. The student must participate in any given class in order to receive disbursement. This will be reviewed on a weekly basis up to the end of a term.

Online Programs

As required by federal student aid rules, only competencies required for a student's degree can be used in determining undergraduate enrollment status for financial aid purposes. In addition, a repetition of a previously passed competency may only be considered once when determining enrollment status for financial aid purposes.

Grants

Federal Grants

Pell Grants

Federal Pell Grants are awarded on a sliding scale up to \$6,345 per year to students with exceptional financial need. Applicants must be enrolled in a degree program and have not already have obtained a bachelor's degree. Student eligibility and grant amounts are determined by the U.S. Department of Education but vary with enrollment status and program of study.

Federal Pell Grant Lifetime limit: An eligible Federal Pell Grant recipient has a lifetime limit of 12 full-time semesters or six full years of eligibility. This federal policy is retroactive to whenever a student first received a Federal Pell grant and includes payments received at colleges or universities that the student attended prior to SNHU.

Federal Supplemental Educational Opportunity Grant (FSEOG)

The FSEOG is a campus-based federal grant program with awards ranging from \$100 to \$1,000 per year, depending on demonstrated need and availability of funds. Grants are awarded to students with exceptional financial need, and typically to students receiving Federal Pell Grants.

Iraq and Afghanistan Service Grant

A student may be eligible to receive the Iraq and Afghanistan Service Grant if: they are not eligible for a Pell Grant, their parent or guardian was a member of the U.S. Armed Forces and died as a result of service performed in Iraq or Afghanistan after September 11, 2001. Additional eligibility requires the student to be under 24 years old or enrolled in college at least half-time at the time of the parent or guardian's death.

Children of Fallen Heroes Scholarship

A student may be eligible to receive the Children of Fallen Heroes Scholarship if the following terms are met: the student is eligible for Pell Grant and the student must have been less than 24 years of age or enrolled at an institute of higher education at the time of his or her parent's or guardian's death. The student becomes eligible if the parent or guardian died in the line of duty as a result of service while performing as a public safety officer or military service person. Unlike the Iraq and Afghanistan Service Grant, a student is not eligible for this scholarship if the student is not Pell Grant eligible.

State Grants and UNIQUE

State grant funding is received by SNHU from various states to assist students with the cost of education. Students should contact their home state agencies to see if they qualify for state assistance at Southern New Hampshire University.

NH Residents: The state of New Hampshire does not have a state grant program. However, students may qualify for the UNIQUE program. Eligible New Hampshire students will be automatically notified on their award letter if they qualify.

Loan Counseling and Federal Student Loan Repayment Options

Entrance Loan Counseling

Federal law requires that for any students who have not previously received a subsidized or unsubsidized loan (or PLUS Loan) to complete Entrance Loan Counseling. The purpose of completing this process is to gain a greater understanding of your rights and responsibilities in borrowing loans through the Direct Loan program. While completing entrance counseling,

Online Programs

the student will learn about what a Direct Loan is, as well as how the loan process works, as well as how to manage educational expenses, other financial resources, and what repayment programs are available. Entrance Loan Counseling can be completed online at studentloans.gov.

Financial Awareness Counseling

Unlike Entrance Loan Counseling, Financial Awareness Counseling is not a requirement by federal law, however SNHU encourages all students to complete Awareness Counseling routinely in order to stay up to date with Direct Loan information. This counseling includes topics such as understanding your loans, managing spending, repayment plans, avoiding default, and how to make finances a priority. Financial Awareness Counseling can be completed online at studentloans.gov.

Exit Loan Counseling Requirements

Similar to Entrance Loan Counseling, Exit Loan Counseling is a federal requirement of all students who received subsidized, unsubsidized or PLUS loans under the Direct Loan Program or the Federal Family Education Loan (FFEL) Program to complete once the student graduates, leaves school, or drops below half-time enrollment. As part of the Exit Loan requirements, student will be reminded of their obligations to repay, along with other information on deferment, forbearance, avoiding default, as well as how to make finances a priority.

Direct Loan Exit Counseling:

Borrowers of Federal Direct or Graduate PLUS loan can complete the online Exit Loan Counseling requirement at studentloans.gov.

Perkins Loan Exit Counseling:

Borrowers of Federal Perkins Loan will be contacted by their Perkins Loan Servicer, ECSI, with additional directions on how to complete Exit Loan Counseling.

Federal Direct Student Loan Repayment Options

Repayment Plan	Eligible Loans	Monthly Payment and Time Frame	Eligibility and Other Information
Standard Repayment Plan	<ul style="list-style-type: none">• Direct Subsidized Loans and Unsubsidized loans• Subsidized and Unsubsidized Federal Stafford Loans• All PLUS loans• All Consolidation Loans (Direct or FFEL)	Payments are a fixed amount that ensures your loans are paid off within 10 years (within 10 to 30 years for Consolidation Loans)	<p>All borrowers are eligible for this plan.</p> <p>You'll usually pay less over time than under other plans.</p> <p>Is not a good option for those seeking Public Service Loan Forgiveness (PSLF)</p> <p>Standard Repayment Plan for Consolidation Loans is not a qualifying repayment plan for PSLF.</p>

Loan Repayment Responsibility

It is the responsibility of the student borrower to repay student loans. This includes if financial circumstances become difficult, if the student did not receive the education or job expected, or if the education was not completed. At SNHU, there are many comprehensive resources available to help students learn about repayment options as well as how to manage your finances with the student's respective economic condition.

Prepayment of Student Loans

Online Programs

There are no penalties to paying on student loans prior to repayment or making larger monthly payments than is required. By doing this, the student will reduce the total interest applied to the loans and will pay less over the repayment time period.

National Student Loan Data System (NSLDS)

The National Student Loan Data System (NSLDS) is the U.S. Department of Education's (ED's) central database for student aid. NSLDS receives data from schools, guaranty agencies, the Direct Loan program, and other Department of ED programs. The student access section of NSLDS will offer the student a centralized and integrated view of Direct Student Loans and grants. This will allow the students to access and inquire information regarding their loans and/or grant data. Students may access their financial aid history at nslds.ed.gov. It will be necessary to have your FSA ID in order to access the site.

Loan Servicer

A loan servicer is a company that handles the billing and other services on a student's loan(s). Loans are assigned to a loan servicer by the U.S. Department of Education after the entire loan amount has disbursed (paid out). Once a loan servicer has been assigned, the company will work with the student to find appropriate repayment plans and to review the loan consolidation if necessary. This servicer will serve as a main contact point for the student when questions arise regarding student loan accounts. It is also the responsibility of the student to update the loan servicer at any time during the repayment period if circumstances change. Some circumstances may be: financial difficulty, address updates, and name update. Students can view their loan servicer on the National Student Loan Data System (NSLDS) at [NSLDS.ed.gov](https://nslds.ed.gov).

Federal Student Aid Repayment Estimator

In order to help students review and compare loan repayment options, SNHU encourages all students to use the Federal Student Aid Repayment Estimator in order to see what options will fit for their financial circumstances. The Federal Student Aid Repayment Estimator will allow students to make use of an interactive online tool to look through the above repayment options. It can be found online at: www.studentaid.gov/repayment-estimator.

Deferment

A deferment is a period during which payments of principal are postponed. No interest accrues on either Direct Subsidized or Perkins loans. Interest is charged on Direct Unsubsidized loans and may be paid or allowed to accrue and capitalize. Borrowers must meet specific eligibility criteria and request the deferment from their lender(s).

Forbearance

Forbearance is defined as a period in which your monthly loan payments are temporarily suspended or reduced. It is important that the student works hand in hand with their lender in order to be granted if the student is unable to make loan payments due to certain types of financial hardships. During the time of forbearance, principal payments are postponed but interest will still continue to accrue.

Visit <https://studentaid.ed.gov/sa/repay-loans> to learn more about the payment plans, payment deferment, and payment forbearance options that are available to you.

Military Benefits

Active Duty Military

First time students using tuition assistance must present a tuition assistance form prior to registration from the military branch in which they are enlisted.

Continuing students may enroll in successive terms without making initial payments but must submit tuition assistance forms prior to the term start to allow direct billing and payment from the military. Any portion of the tuition cost not covered must be paid prior to term start. If a tuition assistance form is not provided, your account will be placed on financial hold. This will prevent future registration and you will be responsible for the unpaid balance.

Veterans' Benefits

Southern New Hampshire University is approved for the education of veterans and the dependents of veterans. Questions

Online Programs

regarding benefits for veterans should be directed to the Military Financial and Benefits Services Office. Each new veteran should submit:

1. an application for admission
2. a registration form for the next term
3. an official high school transcript or an official copy of GED test scores
4. all copies of official university transcripts, if any
5. a copy of their certificate of eligibility and any service school data
6. the necessary Veterans Administration paperwork

Veterans enrolling under the G.I. Bill® for the first time may experience a delay of up to two months before they receive their first checks. Veterans should contact the Veterans Affairs Office at 1.888.442.4551 if no payment has been received by the seventh week of a term.

If a veteran student is transferring directly from another school where he or she had been using VA benefits, the student should ensure that the other school promptly notifies the VA of his or her effective date of termination. The student is also required to file Form 22-1995 with the Veteran Affairs Office.

Students requesting Veterans' Educational Assistance are required to have all previous postsecondary educational experience evaluated for possible transfer credits in order to be eligible for benefits. Students must notify the registrar of any past university credits that are transferable to Southern New Hampshire University.

New veteran students should matriculate immediately and select their degree programs. Because of VA regulations pertaining to certifications, a non-matriculated student will not be certified for educational benefits after two terms of attendance. Veteran students who take courses that are not applicable to or not required for their chosen degrees will not be certified by the VA for those courses. In order to maintain full-time status, veterans may take courses outside their majors only in the last term before graduating.

The VA requires strict compliance with a number of other regulations, including maintenance of satisfactory academic progress and notification of any status changes, such as withdrawal from a course. It is the ~~veteran's~~ VA benefit recipient's responsibility to be aware of all VA regulations that affect his or her educational program.

Veteran Benefits Transition Act of 2018

Title 38 United States Code Section 3679(e) School Compliance

NOTE: A **Covered Individual** is any individual who is entitled to educational assistance under Chapter 31, Vocational Rehabilitation and Employment, or Chapter 33, Post-9/11 GI Bill® benefits.

Any covered individual may attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility for entitlement to educational assistance under Chapter 31 or 33 (a "certificate of eligibility" can also include a "Statement of Benefits" obtained from the Department of Veterans Affairs' (VA) website – eBenefits, or a VA 28-1905 form for Chapter 31 authorization purposes) and ending on the earlier of the following dates:

1. The date on which payment from VA is made to the institution.
2. 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility.

Southern New Hampshire University will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual's inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from VA under Chapter 31 or 33.

In addition any covered individual will be required to provide the following:

- A certificate of eligibility for entitlement to Chapter 33 educational assistance as soon as it is available but no later than the last day of the second term of enrollment.
- Any additional information necessary to the proper certification of enrollment by Southern New Hampshire University.
- Any covered individual will be responsible for the amount that is the difference between the amount of the student's financial obligation and the amount of the VA education benefit disbursement.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by the VA is available at the official U.S. government website at <http://www.benefits.va.gov/gibill>

Return of Title IV Funds

Return of Title IV funds requirements applies to a Title IV grant and/or loan recipient or eligible recipient who withdraws or ceases attendance from Southern New Hampshire University (SNHU) before completing the payment period.

The payment period is the academic period established for which financial aid is awarded and disbursed. This may not always align with the registration and billing period for a program. Students are encouraged to learn and understand their

Online Programs

program's payment period definition.

- SNHU will perform a Return to Title IV calculation and notify the student of any Federal Student Aid (FSA) fund return within 30 days of the date of withdrawal or the last date of attendance.
- SNHU has 45 days from the date of determination that the student withdrew to return all unearned FSA funds for which we are responsible for.

SNHU divides the number of days attended for the student (numerator) by the number of days scheduled in the period (denominator), excluding breaks of five days or more. Once this calculation is completed, it will show the percent of earned aid. However, if the student has earned greater than 60% of the payment period, they are considered to be 100% earned.

The percent earned multiplied by the total federal aid (grants and/or loans) for the payment period is the amount the student earned based upon his or her withdrawal date or last date of attendance. If this amount is greater than what was actually disbursed, then SNHU will offer the student a post-withdrawal disbursement, provided the funds meet the conditions for a late disbursement. If the amount that was actually disbursed is greater than the amount earned, the excess is considered unearned federal aid.

SNHU will return a portion of any unearned FSA based upon the student's institutional charges for the payment period. Institutional charges may include tuition, book vouchers, and institutional housing and meal plans. The total amount of institutional charges is multiplied by the percent earned to determine the unearned amount of institutional charges. SNHU will return the lesser of the unearned institutional charges or the total amount unearned.

Return of Funds

SNHU will return FSA to the programs from which the student received aid during the payment period in the following order, up to the net amount disbursed from each source:

1. Direct Unsubsidized Loan
2. Direct Subsidized Loan
3. Direct PLUS Loan
4. Federal Pell Grant *
5. Federal Supplemental Education Opportunity Grant (FSEOG)*
6. Iraq and Afghanistan Service Grant*

*There is a 50% grant protection allowance for the student built into the Return to Title IV calculation. Students are also not required to return unearned funds of \$50 or less for Title IV grant programs.

Students are responsible for immediate payment on account balances that are a result of a Return to Title IV calculation.

Within the Return to Title IV calculation, there is also an amount of unearned Title IV aid due from the student.

- Title IV grant funds are typically repaid by SNHU and the student is responsible for payment to the University. SNHU will waive any grant repayment and will not report an overpayment for any affected individual covered by the HEROES Act.
- Direct Loans are to be repaid in accordance with the terms and conditions outlined in the student's signed Master Promissory Note (MPN).

Post-Withdrawal Disbursement

There may be an instance of a student who has aid returned due to the result of a Return to Title IV calculation but may have undisbursed aid. In this case, the student must decide if they would like the post-withdrawal disbursement of aid applied to their account. Post withdrawal disbursements fall into two categories when it comes to authorization: (1) grants do not require authorization, while (2) Direct Loan funds require student authorization.

Student Financial Services will notify students in writing if the student is eligible for any Direct Loan post-withdrawal disbursement eligibility. In order to receive the post-withdrawal disbursement, the student must sign and return the authorization letter within fourteen (14) days of the date of the notice. The Direct Loans are to be repaid in accordance with the terms and conditions outlined in the student's signed Master Promissory Note (MPN).

Programs Offered in Modules

At SNHU, there are some programs that are 'offered in modules.' According to the Department of Education, if a program is 'offered in modules,' it means that the course(s) do not span the entire length of the payment period or period of enrollment (this excludes subscription-based programs). For programs that are offered in modules (i.e. online undergraduate programs), the payment period would be considered two modules (8 week academic terms) within one

Online Programs

trimester (16 week payment period).

A student in a program offered in modules is scheduled to complete the days in a module if the student's coursework in that module was used to determine the amount of the student's eligibility for Title IV funds for the payment period. SNHU monitors changes in the student's enrollment throughout the payment period to determine the number of days scheduled to complete in modules that the student did not attend.

A student will have their Return to Title IV calculation 'undone' if the student ceases attendance during a payment period, then returns during the same payment period. This process will restore the FSA funds to the amount that the student was originally eligible/scheduled to receive. This process is only applicable to programs that are offered by the University where the student has the ability to cease attendance during a payment period.

Return to Title IV Calculation Example

A term start date is September 7 and the end date is December 23. There is a 5 day break for Thanksgiving. The total days for the term is 103 days. The student withdraws on October 2 which is day 26 of the term. The percentage of earned aid would be 25.2% (26 days/103 days) and the unearned aid percentage is 74.8%.

- If the student received \$5,500 in Title IV aid, then the student earned \$1,386 in Title IV aid and \$4,114 is the unearned amount.
- If institutional charges are \$6,000, then the amount of earned charges would be \$1,512 and the unearned charges would be \$4,488.
- SNHU is responsible for returning the lesser of the unearned institutional charges or the total amount of unearned Title IV aid, so SNHU would return \$4,114 in this example. The student is responsible for the immediate payment of the balance on the account.

Return of Title IV Fund Requirements

Return of Title IV funds requirements do apply to a student who:

- Officially withdraws during a payment period; or
- Unofficially withdraws during a payment period (student stops attending without providing notification to the university); or
- Ceases attendance during a payment period.

Return of Title IV funds requirements do not apply to a student who:

- Graduates during a payment period; or
- Successfully completes 49% (a non-rounded percentage) of a payment period that is constructed of modules (successful completion equates to earning a passing grade); or
- Withdraws from some classes but remains enrolled in other courses during the same payment period at Southern New Hampshire University; or
- Never attended any classes, or for whom SNHU cannot document academic engagement in at least one class for the payment period or period of enrollment. If the student never attended any classes or SNHU cannot document the student's academic engagement in at least one class, the student did not establish Title IV eligibility for the payment period and all funds must be returned.

Scholarship Opportunities

At Southern New Hampshire University we strive to acknowledge the academic achievement, community service and leadership experience of our students through a variety of merit based grants and scholarships.

The Continuing Education Scholarship:

This Scholarship is offered specifically to matriculated SNHU Continuing Education students or SNHU Online students. To be eligible students must have a minimum of 3.0 GPA, be solely responsible for their tuition (employer tuition assistance recipients are not eligible), be currently enrolled and have taken a minimum of fifteen (15) credits at SNHU.

Elaine I. Routhier Costigan & Ronald J. Costigan Scholarship:

This scholarship fund will be offered in the future to support continuing education students, based on financial need.

Wayne Dozier Memorial Fund:

Online Programs

Established in memory of former seacoast center student, Wayne Dozier. This fund provides scholarships to undergraduate SNHU Seacoast students with a minimum of 15 credits at SNHU and a minimum of 2.5 GPA.

Dr. Jeannette A. Ritzenthaler Scholarship:

The estate of Dr. Jeanette Ritzenthaler made provisions for an endowed scholarship to be awarded to a student from the Lakes Region of New Hampshire. Students should be enrolled in the Continuing Education or Online undergraduate program. The student must be in their junior year (or with junior level credits) pursuing a bachelor's degree, have financial need, be maintaining a GPA of 3.0 or higher, and provide evidence of leadership through involvement in school and community activities.

Martha Van Hyland Scholarship:

This fund was created in memory of Southern New Hampshire University alumna, Martha Van Hyland to support Belknap County residents matriculated in the university's Continuing Education or Online bachelor's degree program. Students must maintain 3.0 GPA or higher and show financial need.

Graduate School

Finlay Family Scholarship:

Established by Southern New Hampshire University alumnus, Robert J. Finlay, this scholarship supports New Hampshire residents enrolled in a graduate or undergraduate School of Business major. Preference will be given to full-time students who display an entrepreneurial spirit and can show financial need.

Hassa Jadvani Memorial Scholarship:

Supports students enrolled in the Graduate School of Business. Preference will be given to Sikh or Hindu students of Indian descent enrolled in the International business or Finance curriculum using standard need and academic criteria. In a year when there are no deserving needy students majoring in the indicated subject areas, the awards may be presented to other students enrolled in the Graduate School of Business.

Dr. Jacqueline Mara Scholarship:

Established by former Dean and Trustee emeritus, Dr. Jacqueline Mara, this scholarship supports full-time day graduate students of U.S. citizenship with preference given to those enrolled in traditional business disciplines; based on academic merit and need.

School of Business Scholarship Fund:

The Southern New Hampshire University Alumni Association and the School of Business have raised money to support this scholarship program. It provides scholarships to School of Business undergraduate and graduate students based on need and academic criteria.

Standards for Satisfactory Academic Progress (SAP)

In order to be eligible for FSA funds, students must make Satisfactory Academic Progress (SAP) by meeting both a qualitative and quantitative standard as defined by this policy.

Qualitative Standard

Cumulative GPA is the qualitative measure of SAP, meaning that it looks at the quality of the grades that each student earns in their courses.

- Students enrolled in undergraduate degree programs must maintain a minimum cumulative grade point average (GPA) of 2.0 on a 4.0 scale.
- A student enrolled in a graduate degree program or the Accounting graduate certificate must maintain a minimum

Online Programs

cumulative grade point average (GPA) of 3.0 on a 4.0 scale.

Quantitative Standard

A student must have successfully completed at least 67% of all the credits he or she has attempted at Southern New Hampshire University during the entire period of enrollment.

- Total credits earned divided by total credits attempted equals the percentage.

Credit Hour Completion (PACE)

Each academic program within our university system has a defined number of credit hours required for completion. A student must complete their undergraduate program within 150% of the published credits which is defined as the maximum time frame.

- Associate degree candidates may attempt a maximum of 90 credits
- Bachelor degree candidates may attempt a maximum of 180 credits
- Graduate degree candidates may attempt a maximum of eight years of study in a specific graduate program

Coursework in the Calculation

- Final grades that fall below the minimums (D for undergraduates, C for graduates) are not counted as credits completed but will be included as credits attempted.
- Transfer credits are considered to be credits attempted and completed toward the completion of the student's program and count toward the maximum time frame.
- Students who withdraw from a course are considered as having attempted the course.
- Courses with grades of Incomplete (I) will be counted as attempted but not earned. With an incomplete grade, when the grade is updated with an actual grade, the student will not have SAP re-run as the actual grade will be picked up with the student's next run. However, if the student would like to request a re-evaluation, the student can send in a written request asking for a new SAP evaluation.
- Courses that are dropped prior to the course start date or during the add/drop period in Week One will not count towards attempted credits.
- Any course in which the student remains beyond Week One will count towards attempted courses regardless of the grade received.
- All repeated courses will count as attempted courses but will not count as completed courses once repeated.

Frequency of Reviews

Satisfactory Academic Progress is evaluated for the following:

- Annual review not to exceed 52 calendar weeks for undergraduate students
- Annual review at the end of the 4th term for Global Campus graduate students
- Graduate students enrolled in the M.Ed. Online Instruction will be reviewed at the end of each trimester
- Annual review at the end of the 3rd term (xxEL3) for Advantage students in the Associate programs and the end of the Spring term for the Bachelor programs
- Payment period (term) review for students enrolled in programs that are less than or equal to one year in length
- Prior to an SNHU continuing student receiving FSA for the first time at our university or upon readmission after a period of absence

According to federal regulations, students who are scheduled for an annual SAP review and fail to meet the Satisfactory Academic Progress requirement of their program will lose Federal financial aid eligibility. This population would include undergraduate and graduate students.

Grade changes will be monitored and SAP will be rechecked using any new information to comply with the SAP new/conflicting information requirement.

Financial Aid Warning

Online Programs

Financial Aid Warning is a status assigned to students whose standard frequency of review is every payment period. The status is assigned after the first evaluation where the student fails the minimum Satisfactory Academic Progress standards. This status is assigned for one additional payment period. While on Financial Aid Warning, students remain eligible for Title IV Financial Aid. Students not meeting Satisfactory Academic Progress standards by the end of the next payment period evaluation are immediately suspended from receiving future Federal Financial Aid. Financial Aid Warning status will only be assigned to the following populations of students:

- CBE 2.0 students
- M.Ed Online students
- Programs that are less than or equal to one year in length

Appeal Process

Students who lose their aid may appeal the loss provided there are mitigating circumstances that inhibited their academic progress. Students can appeal on the basis of illness, death of a relative or other extenuating circumstances. The student must also explain why they failed to meet the SAP requirement and what has changed to allow them to be successful in future terms. If mitigating circumstances do not exist, students may take classes at their own expense to demonstrate improvement to achieve the SAP standards.

Financial Aid SAP Appeal

Students who have been placed on Financial Aid suspension will be allowed to appeal their suspension. To be considered, a SAP appeal must include the following elements:

- Reason(s) why the student failed to maintain SAP.
- What has/will change that will allow the student to make SAP at the next evaluation period?
- An academic plan agreed to by the student, developed by, and in place with their academic advisor. The plan must ensure that the student is able to meet SAP standards by a specific point in time.

Financial Aid SAP Probation

Students who have been initially placed on financial aid suspension, and who have an approved appeal, are placed on SAP probation. The student's eligibility for aid is considered to be reinstated.

Financial Aid Appeal Approval and Academic Plan

Students with an approved appeal who are placed on SAP probation and an academic plan will have their status reviewed after each payment period following their successful appeal. Students who are not meeting the requirements of their academic plan will be returned to suspension and all aid from that date forward will be canceled immediately, regardless of current enrollment. Global Campus students who are suspended from receiving financial aid as part of this process may appeal this decision after 2 payment periods.

Student Rights and Responsibilities

Each year, Southern New Hampshire University students request student financial assistance to help defray the cost of education. Federal, state, and institutional resources form a partnership with your (and your family's) own commitment to meet your educational costs. Federal, state, and institutional student financial aid is a privilege, which creates both rights and responsibilities.

Responsibilities

- Complete and submit application materials to the appropriate agencies within required or recommended time frames.
- Read all materials sent to you from Southern New Hampshire University and other agencies awarding you aid. Read, understand, and keep copies of all forms you sign.
- Know and comply with the rules governing the aid you receive. These rules include but are not limited to: you must not be in default on any prior educational loan, and you must not owe a refund on a Federal Pell Grant or a Federal Supplemental Educational Opportunity Grant due to repayment.
- Provide additional documentation, federal tax returns, W-2's, and any additional information if requested to by Southern New Hampshire University.

Online Programs

- Comply with the provisions of any promissory note and all other agreements you sign including repaying your student loans.
- Complete the registration process each term by the end of the drop/add period in order to ensure availability of all student aid funds you have been awarded.
- Use student financial aid proceeds solely for direct educational costs and related living expenses.
- Maintain satisfactory academic progress.
- Report private sources of student financial aid to Southern New Hampshire University.
- Report any changes in your status: marital, academic, enrollment, residential, or name changes.
- Keep your local and permanent addresses current with the University Registrar and loan servicers.
- Understand SNHU's withdrawal policy and how it affects return of financial aid.
- Complete mandatory loan exit counseling upon ceasing to be enrolled at least half-time or more if you have borrowed from the Federal Direct Loan program.
- Perform and complete satisfactory work assignments accepted through the Federal Work Study program (if applicable).

Rights

- Have all records and data submitted with your application for financial aid treated as confidential information, as prescribed by the Family Education Rights and Privacy Act (FERPA).
- Have an explanation of the award process including the understanding the financial aid programs offered, the cost of attending, the criteria used in the awarding process, and how financial need is determined.
- Understand the method by which disbursements will be made and the frequency of those disbursements.
- Understand the criteria for satisfactory academic progress.
- Be notified of changes in your financial aid status and the reasons for those changes.
- Know the conditions (interest rate, when repayment begins, and repayment programs) of any accepted loan.
- Know the terms, conditions, and pay rate for any student job you accept.

Grades and Credits

Audit a Course

Students may choose to audit courses offered by the College of Online and Continuing Education, provided vacancies exist in classes and they have received approval from an academic advisor. An audited course does not carry credits. The cost of an audited course is the same as if taken for credit. Students may attend classes but will not be held accountable for class requirements and will not receive a grade in the course. Any student wishing to audit a course must sign up for that course as an "Audit" by Friday during the first week of the term. After that time, no student may change any of his or her courses to an "Audit" status. A mark of "AU" will appear on the student's transcripts and grade report. Additionally, a student may not convert back to graded status after registering to audit.

Awarding of Credit by Examination

Southern New Hampshire University accepts the results of nationally accredited testing programs or institutionally developed examinations to satisfy the prerequisites of certain courses or degree requirements. Before deciding on a testing program, the student should review his or her program evaluation with an advisor to determine if testing is a practical alternative.

General Education Transfer Policy

Students who have a conferred Bachelor's or higher degree from an accredited institution are considered to have met their general education requirements. Transfer of General Education credits from conferred Associates Degrees and other credits are assessed on a case-by-case basis.

This policy complies with the University [Transfer Credit policy](#).

Note: It is the responsibility of the student to be familiar with his/her program-specific requirements as these may dictate specific general education courses be taken as part of the program. Transfer for these courses will be evaluated on a case-by-case basis. In addition, students with a conferred Bachelor's Degree from a recognized international higher education institution will be reviewed on a case-by-case basis to ensure student attainment of the General Education content areas.

Online Programs

Grade Appeal

Purpose of Policy

The purpose of this policy is to provide students protection against receiving an unfair final grade, while at the same time respecting the academic responsibility of instructors. A grade appeal shall be confined to charges of unfair action toward an individual student and may not involve challenging an instructor's judgment in assessing the quality of a student's work.

Grounds for Appeal

In a grade appeal, only error, prejudice or arbitrariness will be considered legitimate grounds for appeal:

- Error: The instructor made an error in calculating the grade;
- Prejudice: The instructor assigned the grade based on factors other than the student's performance in the course; or
- Arbitrariness: The instructor failed to notify the student in a clear manner as to the basis of grade determination, or the grade awarded departed substantially from the instructor's previously announced standards.

The grade appeal process does not cover instances in which students have been assigned grades based on academic dishonesty. Those instances are covered by the [COCE Academic Honesty Policy](#).

Pre-Appeal Actions

The expectation is that student and instructor resolve the grade disagreement informally in a collegial manner. The student is strongly encouraged first to talk through the situation with his or her advisor; and the advisor should help the student regarding how best to approach the instructor. In all cases, a student who believes a grade has been inappropriately awarded, in accordance with the Grounds for Appeal above, must seek to resolve the matter with the instructor within thirty (30) days after the term ends. If the grade dispute cannot be resolved informally with the instructor, then the student may present an appeal.

Student Grade Appeal Process

The steps for the grade appeal process are:

Step 1. If after talking with the instructor (but no later than thirty (30) days after the term ends) the matter is not resolved, then the student must talk to his or her advisor to determine if the student wishes to proceed with a formal Grade Appeal.

If the student wishes to proceed with an Appeal on the basis that the grade assigned was in error, prejudiced or arbitrary, then no later than thirty (30) days after the term ends the student shall complete the [COCE Student Concern/Dispute](#) form and submit online. This appeal must substantiate reasons that the assigned grade is in error, prejudiced or arbitrary.

Step 2. No later than ten (10) business days after the COCE Student Concern/Dispute form has been submitted, the Dispute Resolutions Specialist must review the Appeal, working with student and instructor and/or the appropriate dean to attempt a resolution of the Grade Appeal.

1. The instructor and/or, the appropriate dean may choose to uphold the grade or change the grade based on the Appeal.
2. The Dispute Resolutions Specialist will inform the student of the decision within fifteen (15) business days from receipt of the COCE Student Concern/Dispute form.

Step 3. If the Appeal is denied, and the student wishes to pursue the matter further, then the student must:

1. Within fifteen (15) business days of the Appeal denial, submit a written final appeal to the Committee for Appeal of a Grade (at coceappeals@snhu.edu). Such final appeal consists of a copy of the original Grade Appeal, and any additional information or clarification that the student wishes to add to the original Appeal.

The Committee for Appeal of a Grade is composed of three associate deans and associate vice presidents external to the program area. The Committee is charged with determining whether the grade was assigned without error, prejudice or arbitrariness.

If the Committee determines that the grade was awarded without error, prejudice, or arbitrariness, then within fifteen (15) business days of receipt of the Appeal, the Committee will report its conclusions to the student and the instructor, after which the matter will be considered to be closed.

2. If the Committee determines that the grade assigned should be changed, the Committee will take the appropriate action(s) to change the grade. Within fifteen (15) business days of receipt of the Appeal, the Committee must report its conclusions to the student and must inform the instructor of the reasons for its decision to change the grade, after which the matter will be considered to be closed.

Online Programs

Grade Change

Purpose of Policy

Final grades may only be changed by the instructor of record, or in extenuating circumstances a Dean, Executive Director, or their academic designee, within thirty (30) days after the term grade due date under the following circumstances:

- The instructor has made an error in calculating the final grade;
- The instructor is replacing an Incomplete grade with a letter grade (see [Incomplete Grade Policy](#));
- The instructor inadvertently did not post (or mis-posted) a grade in the Grade Center; or
- A successful grade appeal (see [Grade Appeal Policy](#)).

Outside of the 30-day grade change period, final grades may only be changed as the result of a successful grade appeal and must be approved and changed by the SVP or their academic designee. Otherwise, any grade changes made after the thirty (30) day deadline will be denied by the Office of the University Registrar.

Once final grades are posted, the instructor may not make grade changes in cases of students handing in late work, unless a request for an Incomplete grade was filed before the grade due date, in accordance with the Incomplete Grade Policy.

Instructor Grade Change Process

To make a grade change, the instructor must complete the Grade Change Request through the [Global Campus Faculty and Staff Inquiry Form](#), which can be accessed on the Service Portal on the [COLT website](#). The request will be automatically routed to the Office of the University Registrar.

Grade Scale and GPA

Grading System - Undergraduate

In determining grades at the university, the following grade system is used:

Grade	Numerical Equivalent	Points
A	93-100	4.00
A-	90-92	3.67
B+	87-89	3.33
B	83-86	3.00
B-	80-82	2.67
C+	77-79	2.33
C	73-76	2.00
C-	70-72	1.67
D+	67-69	1.33
D	60-66	1.00
F	0-59	0.00

Grading System - Graduate

In determining grades at the university, the following grade system is used:

Grade	Numerical Equivalent	Points
A	93-100	4.00
A-	90-92	3.67
B+	87-89	3.33
B	83-86	3.00
B-	80-82	2.67
C+	77-79	2.33
C	73-76	2.00
F	0-72	0.00

Online Programs

- Academic Renewal - Grades prefaced by "R" denote academic renewal
- Audit - AU
- Course Waived - WV
- Credit - CR
- Incomplete - I
- Incomplete/Fail - IF
- In Progress Passing - IP
- In Progress Transfer - IPT
- Mastery - MA*
- Non-course work - NC
- Non-graded - NG
- Passing - P (equivalent to C or better at the undergraduate level, B or better at the graduate level)
- Satisfactory - S (equivalent to C or better at the undergraduate level, B or better at the graduate level)
- Transfer Credit - T
- Unearned F - UF
- Unsatisfactory - U
- Withdrawal - W
- Withdrawal Pass - WP
- Withdrawal Fail - WF

*Note: "MA" grades are issued for College for America competency-based programs once individual competencies and equivalencies are mastered. "MA" is equivalent to an "A" grade on a traditional grade scale. There are no quality points associated with MA grades, therefore there is no GPA for students in College for America programs.

Grade Point Average

The grade-point average (GPA) is determined by dividing the sum of the quality points (QP) by the sum of the attempted credit hours (CR). An example of a student's grades and grade-point average is as follows:

ENG-120	3 Credits x A(4)=	12 QP
MAT-240	3 Credits x B(3)=	9 QP
MKT-113	3 Credits x C(2)=	6 QP
PSY-108	3 Credits x D(1)=	3 QP
IT-145	3 Credits x F(0)=	0 QP
	15 Credits	30 QP

30 QP divided by 15 CR = 2.00 GPA

Incomplete Grades

Purpose of Policy

In the case of extenuating circumstances the instructor may agree to give a student a final grade of *incomplete*. Allowing a student an *Incomplete* grade is left to the instructor's discretion, and students should not assume that they will be allowed to complete work after the term has ended.

Guidelines

In allowing a grade of *Incomplete* the instructor should observe the following guidelines:

- The instructor determines if the student may reasonably complete the work required within the 30 day incomplete grade completion time limit.
- The circumstances that have compelled the student to request the *incomplete* are extenuating circumstances that are serious and unforeseen, such as, but not limited to, unexpected extended hospitalization, death of an immediate family member, or natural disaster.
- The student requesting the *Incomplete* has successfully completed the majority (70% of graded course assignments including discussion boards) and has a reasonable expectation that with the completion of the additional work, the student will be able to pass the course.
- Students may be allowed to complete missed discussion board assignments within an Incomplete period.
- The student must submit the outstanding course work to the instructor within 30 days of the end of the term.

Online Programs

Incomplete Grade Process

If the instructor agrees to assign the student a grade of Incomplete, the instructor must take the following steps:

1. Prior to the grade due date, the instructor must complete the Incomplete Grade Request through the [Global Campus Faculty and Staff Inquiry Form](#), which can be accessed on the Service Portal on the [COLT website](#), which automatically routes to the registrar's office for processing.
2. On the Incomplete Grade Request the instructor indicates an expiration date for the student to submit outstanding course work that is no more than 30 days from the last day of the term. The instructor will have an additional seven calendar days after the student expiration date to grade and submit the Grade Change Request.
3. Provided that the instructor receives the student's completed course work on or before the expiration date, the instructor submits the Grade Change Request through the Service Portal that automatically routes to registrar's office authorizing the student's grade to be changed from "I" to the alpha grade earned.
4. Extensions beyond 30 days must receive Executive Director approval.

If the student fails to submit the outstanding course work by the expiration date or if the instructor has not submitted a Grade Change Request by the expiration date, the grade will automatically change from "I" to "IF." A grade of "IF" is calculated as an "F."

IP Grade

For courses that span more than one academic term, IP grades will be used to indicate each student's academic progress at the end of each associated term. IP grades indicate In-progress Passing. After the last term ends, the instructor will submit a grade change form with the final grade. IP grades for all sections of the course will receive that final grade.

Students should refer to their specific program for procedures regarding the application of the IP Grade.

Late Assignments

- Students must submit discussion board postings during the time frame indicated in the assignment rubric. Discussion board submissions will not be accepted for credit after the deadline.
- Students needing extra time may submit assignments, excluding discussion board postings, up to one week after the assignment due date. Students who submit work up to one week late will receive a penalty of 10 percent applied to the grade achieved on the late assignment regardless of the day of the week on which the work is submitted. *Students who submit assignments more than one week late will receive a grade of zero on the assignment unless they have made prior arrangements with the instructor.*
- Instructors will accept assignments, excluding discussion board postings, more than one week late if students have made prior arrangements with the instructor and the instructor agrees to an extension. Students who submit work late receive a penalty of 10 percent applied to the grade achieved on the late assignment. Students must meet the deadline agreed upon in advance with the instructor. *Students who do not meet the agreed-upon deadline will receive a grade of zero on the assignment.*
- Instructors may accept late work, including discussion board posts, with or without prior arrangement in the case of extenuating circumstances that are serious and unforeseen, such as, but not limited to, unexpected extended hospitalization, death of an immediate family member, or natural disaster. Exceptions to the late policy on these grounds are left to the instructor's discretion, and students should not assume that they will be allowed to submit assignments after the due dates. A student who has experienced an extenuating circumstance that prevented him/her from submitting work on time must notify the instructor as soon as possible to arrange new deadlines. In instances where the instructor agrees to make an exception the late penalty will be waived. *Students who do not meet the deadline arranged with the instructor will receive a grade of zero on the assignment.*
 - If an instructor finds that he/she is unable to determine if an exception to the late policy would be appropriate without documentation, the collection and review of student documentation should be handled through the Dispute Resolution team in order to protect student privacy; in these cases, students should file a [Student Concern Dispute form](#) to have the circumstances reviewed.
- If a student is experiencing, or knows that he/she will be experiencing, a circumstance that is protected under the Americans with Disabilities Act or Title IX, including pregnancy, he/she is encouraged to contact the [Online Accessibility Center](#) as soon as possible to explore what academic accommodations might be offered. Instructors must honor all alternative assignment deadlines established through the Online Accessibility Center.
- Students must submit the final assignment no later than the last day of the term. No assignments are accepted after the last day of the term.

Pathways to Math Success

Online Programs

Statement of Policy

As part of our Prior Learning Assessment (PLA) offerings, students may participate in the Pathways to Math Success Assessment to earn credit for math courses in their major.

What is the Pathways to Math Success Assessment?

The Pathways to Math Success Assessment is a placement and prior learning assessment tool that provides students with the opportunity to receive credit for the math competency they already possess and places them in the appropriate level of math.

Depending on their major, students may take either the Calculus or Statistics Pathway Assessment.

Students who participate in the Pathways to Math Success Assessment are permitted a maximum of five proctored attempts. Assessment results that do not meet the University Standards for Academic Honesty or that cannot continuously verify a student's identity will not be accepted.

Math placement exams taken at other institutions will not be considered in the evaluation of a student's math pathway.

Math Course Enrollment Requirements

Students who participate in the Pathways to Math Success Assessment and who do not already have transfer credit receive prior learning credit for math courses as outlined in Table 1:

Table 1

Course Credit Awarded	Pathways Assessment	Pathways Assessment Score
MAT-133 Introduction to Statistical Analysis	Statistics	46-75
MAT-136 Introduction to Quantitative Analysis	Calculus	46-75
MAT-136 Introduction to Quantitative Analysis	Calculus	76-100
MAT-140 Precalculus		
MAT-133 Introduction to Statistical Analysis	Statistics	76-100
MAT-240 Applied Statistics		

Repeating Courses

Students may repeat a course unless otherwise stated by their program specific requirements. Credit is only earned once with a passing grade. The last grade is included in the cumulative GPA; any other attempts are excluded. All prior grades will appear on the students' transcripts. There may be financial aid implications to repeating courses.

Transfer Credit

Purpose of Policy

The purpose of this policy is to describe transfer and external credit policies and procedures for undergraduate and graduate students.

General Information

Only official transcripts are considered for transfer credit. Official transcripts must be sent directly from the issuing institution. SNHU accepts secure electronic transcripts from issuing institutions or scanned documents sent directly from our international articulation partners. Credit considered for transfer must be from the issuing institution; transfer credit posted on another institution's transcript will not be accepted. In order for SNHU to accept credit in transfer, the coursework must be completed during dates that the institution or relevant program was accredited.

The grades for transfer courses are not factored into the student's grade point average (GPA) at SNHU. Developmental or remedial coursework is not accepted for transfer credit. In the event that the program from which the student wishes to transfer credit awards grades using a Pass/Fail or Satisfactory/Unsatisfactory system, rather than a letter-grade system, the credit may be transferred only if a grade of "Pass" or "Satisfactory" is described on the official transcript issued by the program as the equivalent of a "C-" or higher for undergraduate transfer credit or "B" or higher for graduate transfer credit.

Students cannot receive duplicate transfer credit. Duplicate transfer credit occurs when the content of two external courses has been equated to one SNHU course. In this instance, credit will only be awarded for one of the two external courses. SNHU awards transfer equivalencies based on individual course content.

Online Programs

SNHU will evaluate transfer credit for continuing education units (CEUs) that were awarded from an accredited university provided:

- The CEU course is listed on an official transcript with a grade and credits earned
- The CEU course fulfills one of the academic program requirements at the awarding institution
- The degree program for which the CEU course applies is accredited

Cohort-Based Programs

Transfer credit is generally not accepted and requires an exception from the respective Academic Dean.

Collegiate Transfer Credit Sources

Courses accepted for transfer credit must be at college level from a regionally or nationally accredited institution listed by the Council for Higher Education Accreditation (CHEA) or the Department of Education (DOE/DAPIP).

Other Transfer Credit Sources

Students may be awarded credit for non-traditional learning through the following services (for more information on any of these services, students are encouraged to speak with their Academic Advisor or Admission Counselor):

1. Credit by Examination. Students may be awarded credit by passing examinations offered by College Level Examination Program (CLEP), the Defense Activity for Non-Traditional Education Support (DANTES) Examination Program, the College Board Advanced Placement Examination (AP), the International Baccalaureate Diploma Programme (IBDP), ServSafe Certification exam, Series 7 – General Securities Representative Examination, NLN Nutrition Exam, New Hampshire Certified Management Program (CPMP), or Cambridge International Advanced-Level Examinations (A Level). For a complete list of the CLEP, AP, and DANTES exams that SNHU accepts, visit <https://www.snhu.edu/admission/transferring-credits/work-life-experience/testing-out>.
2. Prior Learning. Prior Learning Assessment (PLA) comprises the processes and practices of determining if knowledge gained in a variety of settings, and through formal and non-formal means, may warrant consideration of college credit and/or requirements (i.e. award of credit or a waiver of program requirement). To be eligible for prior learning credit students must be enrolled in an undergraduate program at SNHU.
3. Evaluation of Non-Traditional Learning Experiences. For evaluating non-traditional learning experience, SNHU recognizes the services of American Council on Education (ACE) and National College Credit Recommendation Service (NCCRS).
4. Industry-Recognized Certification. SNHU may also award credit for industry-recognized certification(s) that are not currently assessed for college credit by ACE/NCCRS and/or listed above upon departmental approval.
5. Credit for Courses in Other Postsecondary Settings. SNHU awards credit for some formal course work taken in non-accredited, postsecondary educational settings. These settings include postsecondary vocational and technical training, in-service training courses in the workplace, military service training programs and career-related workshops and seminars. In many cases, this type of training has been evaluated by ACE and criteria for awarding university credit is available in the various ACE guides in the Office of the University Registrar. Where there is no ACE criterion, SNHU may have to conduct an independent review of the training for the purpose of granting transfer credit. Students wishing to have their non-accredited, postsecondary course work evaluated should submit a letter requesting this evaluation, along with official transcripts or some original form of verification of successful completion of these courses, to the Office of the University Registrar. Students will be notified by the Office of the University Registrar if the experience warrants credit and, if so, the number of credits awarded and the requirements they satisfy.

Transfer Credit for Programmatic Accreditations and Affiliations

In addition to regional accreditation, certain SNHU undergraduate and graduate programs also carry specialized programmatic accreditations and affiliations. Programs with specific licensure, programmatic accreditation or affiliation requirements may place restrictions on transfer credits into major and concentration courses. In these instances, transfer students will have their previous credit and coursework evaluated by the appropriate Admission Office or the Office of the University Registrar, in conjunction with the appropriate academic department on a case-by-case basis. If you are a prospective student and need more information, please contact Admissions. If you are a current student and need more information, please contact your Academic Advisor.

International Transfer Credit

Students who wish to receive transfer credit for college-level coursework from an international institution outside of the United States or Canada must have their transcript(s) evaluated by an educational credential evaluation service that is recognized by the National Association of Credential Evaluation Services (NACES) or the Association of International Credentials Evaluators (AICES). Students may also use the services of the American Association of Collegiate Registrars and Admissions Officers International Education Services (AACRAO) or the Credentials Evaluation Service of the Commission on Graduates of Foreign Nursing Schools (CGFNS). The Office of the University Registrar holds the right to waive this stipulation for English-issued transcripts received from recognized foreign institutions the Office of the University Registrar deems appropriate to evaluate in-house.

Online Programs

NOTE: SNHU recognizes 3-year 180 ECTS credit bachelor's degrees (conferred after 2003, or year of [Bologna Process](#) adherence) from institutions in member countries that adhere to the Bologna Process as the equivalent of a 4-year 120 semester credit bachelor's degree from the United States. In order to validate equivalency, SNHU must receive official transcripts of the conferred degree along with a European Commission recognized [Diploma Supplement](#), both in English. *These international transcripts are excluded from the requirement of being evaluated by a recognized NACES or AICE international transcript evaluation agency.*

NOTE: Evaluations for on-campus international students are often conducted in-house by the International Admission Office staff.

Students may use only one evaluation service. Multiple evaluations for transfer credit will not be accepted. The official transcript evaluation must be sent directly from the credential evaluation service.

Undergraduate Transfer Credit Requirements

Undergraduate courses accepted for transfer credit require a grade of "C-" or higher. Most credits taken externally will be considered for transfer credit regardless of when they were completed. However, time limits exist in some academic programs, such as in Information Technology or Accounting, to ensure that transfer credits meet present-day academic standards. Students should consult with their Admission Counselor or Academic Advisor regarding these time limits. Time limits are set and approved by academic program leadership. Regardless of the total number of transfer credits awarded, students must meet minimum institutional and program credit requirements and institutional residency credit requirements as appropriate. See the [Institutional Credit Requirement Policy](#).

College for America (CfA)-Transfer Credit Requirements

• AA Programs

Students who completed a minimum of 30 credit hours through one of SNHU pre-approved Partner Programs are allowed to transfer in these credits as a block. The transfer block must demonstrate student command of General Education content areas.

The remaining 30 credit hours must be completed at CfA following the direct assessment approach as outlined in the AA program requirements.

• BA Programs

Students enrolled in a CfA BA program with a completed Associate Degree (or the equivalent of 60 credit hours) are awarded a transfer block to fulfill the associate's degree portion of the BA program. The transfer block must demonstrate student command of General Education content areas. This allows the student to enroll directly into the BA program of their choice to complete the additional 60 credit hours that are needed.

NOTE: The transfer block portion of CfA programs may be accepted in any combination of courses and/or prior learning assessment (PLA) credit, in alignment with this policy. PLA credit is not permitted in CfA direct assessment portion of programs.

Graduate Transfer Credit Requirements

Graduate courses accepted for transfer credit require a grade of "B" or higher and must have been completed within the last five (5) years. Some courses in certain subject areas, such as Accounting, may have a shorter expiration date to ensure that transfer credits meet present-day academic standards. Students should consult with their Admissions Counselor or Academic Advisor regarding these time limits. Time limits are set and approved by academic program leadership. A graduate course may be used only once to fulfill a requirement.

Graduate students may be awarded a maximum of credit hours, as follows:

- Master's degree: a maximum of four graduate-level courses not to exceed twelve (12)* graduate-level credits;
- Graduate certificate program or specialization: three (3) graduate-level credits;
- Low-Residency MFA students may transfer up to one (1) full semester of credit from another low-residency or full-residency MFA program in creative writing. A successfully completed semester at another low-residency or full-residency MFA program may be counted as one fifteen (15) credit semester in the Low-Residency MFA, which includes both residency and semester coursework.

*Students that are seeking transfer of nursing courses should review the [RN to BSN Nursing Admission and Academic Requirements](#) and [Graduate Nursing Admission and Academic Requirements](#) policies.

NOTE: Students must complete the minimum Institutional Credit Requirements for each credential.

Doctoral Transfer Credit Requirements

No transfer credit will be applied to Doctoral programs.

Online Programs

Transfer Evaluation Process

When a student applies to SNHU and official transcripts are received, the Admissions team compares and evaluates the SNHU course and the transfer course. The student then is sent a letter of acceptance along with transfer credit evaluation, listing all transfer credits accepted by the University and all courses remaining to be completed for a degree.

Request to Take Courses at Another Institution

Students who are enrolled at SNHU and wish to take a course elsewhere, must submit a request by filling out the Request to Take Courses at Another Institution form to ensure that the course fulfills the desired requirement. Failure to obtain prior approval to take a course at another institution may lead to SNHU's not granting transfer credit for that course. The following information is required by the Office of the University Registrar:

- Name of the institution
- Name and number of the course
- Anticipated completion date
- Course description
- Student's reason for taking the course elsewhere

Upon approval and once the course is completed, the student must arrange to have an official transcript sent to the Office of the University Registrar so that credit for the course may be applied toward degree completion.

NOTE: Nursing students may not transfer credit for nursing courses once they have enrolled at SNHU.

Quarter Hour to Semester Hour Conversion

One (1) quarter hour is equivalent to .67 semester hours. Two (2) semester hours of transfer credit for a transfer course that aligns to a corresponding SNHU course meets the required SNHU course equivalency. Students still must meet overall program and degree credit hour requirements.

Graduation and Commencement

Academic Record and Degree Revocation

Southern New Hampshire University's awards of academic credit and Degrees constitute its certification of student achievement. However, a student's academic record, admissions and/or a conferred degree may be awarded in error or as a result of fraud, misrepresentation, or other intentional or unintentional actions. To preserve the integrity of Southern New Hampshire University's academic standards and the Degrees granted by the University, the University may exercise its right to revoke a previously conferred Degree or academic credit as outlined in this procedure. The authority to revoke a Degree rests with the President. The President at this moment delegates that authority to the University Chief Academic Officer.

Definitions/General Provisions:

1. Clear and convincing evidence: Clear and convincing evidence is defined as evidence of such convincing force that it demonstrates, in contrast to the opposing evidence, a high probability of the truth of fact(s) for which it is offered as proof. Such evidence requires a higher standard of proof than proof "by a preponderance of the evidence" but a lower standard than required for proof "beyond a reasonable doubt."
2. Academic record: An academic record is defined as any academic activity attempted that becomes part of the student's permanent record.
3. Degree: A Degree is defined as any form of Degree, academic credential, certificate, professional designation, or another award (e.g., Honors designation) conferred by the University or any of its colleges, departments, or units.
4. Registrar: Registrar is defined as the management personnel in the Office of the Registrar at the University.
5. Notice of Intent to Revoke: Notice of Intent to Revoke is defined as the written notice issued to a student whose academic record, admissions and a conferred degree the University intends to revoke under the terms of this policy.
6. University Academic Record and Degree Revocation Committee: The University Academic Record and Degree Revocation Committee shall consist of members of each business unit.
7. Timelines: The University may, but is not required to, extend timelines set forth herein. The University Chief Academic Officer shall determine extensions. The UCAO or designee shall promptly and in writing notify the student and any University administrators involved of any revised timeline.

Basis for Revocation:

An academic record, admissions and/or a conferred degree may be revoked by the University if 1) upon examination of a student's record, it is determined that the requirements for the admissions and/or a conferred degree as established by Southern New Hampshire University at the time of admission or Degree conferral were not met or 2) information comes to light which, if known at the time of admission or the awarding of the Degree, would have resulted in a determination that the admission or the Degree should not have occurred. The basis for an academic record, admissions and/or a conferred

Online Programs

degree revocation include, but are not limited to, the following:

1. Intentional misconduct by administrators, faculty, staff, or students, including fraud, dishonesty, or falsification or unauthorized altering of information of a student record (including in an Official University student information system).
2. Error(s) by administrators, faculty, staff, or students which resulted in the granting of the Degree when the Degree otherwise would not have been awarded.
3. Other violations of the University's Student Conduct Code that are of such a nature that had they been discovered before the issuance of the Degree, they would have resulted in the suspension or expulsion of the student from the University.

Investigation:

1. When information comes to light that places into question the validity of an academic record, admissions and/or a conferred degree, it shall be referred to the Vice President/University Registrar or Assistant Vice President of Academic Operations & Strategy.
2. Upon receipt of such information, the Vice President/University Registrar or Assistant Vice President of Academic Operations & Strategy shall conduct an initial review of the information and determine whether such information is credible and whether, if established as true, the evidence would justify the revocation of an academic record, admissions and/or a conferred degree.
3. The Vice President/University Registrar or Assistant Vice President of Academic Operations & Strategy will contact the University Academic Record and Degree Revocation Committee to complete a further investigation, which will be completed within five calendar days. After such investigation, a report of the findings and recommendation will be sent to the University Chief Academic Officer.
4. The University Chief Academic Officer will determine if there is sufficient information to determine to revoke an academic record, admissions and/or a conferred degree and if so, he/she will issue a Notice of Intent to Revoke to the student. If the University Chief Academic Officer determines that there is insufficient evidence to justify a revocation, no further action shall be taken.
5. The University Chief Academic Officer may direct the Vice President/University Registrar or Assistant Vice President of Academic Operations & Strategy to place an administrative hold on the issuance of any official transcript for a student to whom a Notice of Intent to Revoke has been sent.

Process, when Notice of Intent to Revoke, is issued:

1. The Notice shall be a written notice sent to the student informing the student that the University has clear and convincing evidence that justifies the revocation of the student's academic record, admissions or a conferred degree under this policy. The Notice shall describe the evidence based on sufficient detail to allow the student to respond to the Notice. A copy of this policy shall also accompany the Notice. The Notice shall state that if the student decides to contest the revocation, the student shall, within thirty calendar days of confirmed receipt of the Notice, make a written request to the University Chief Academic Officer for a hearing. The confirmed receipt can be a document signed by the person who delivered the Notice indicating that the student was given the Notice; a receipt signed by the student acknowledging receipt of the Notice by certified mail; a signed acknowledgement by the student of receipt of the overnight mail containing the Notice; or other proof of actual receipt by the student, such as email delivery confirmation. The Notice shall also state that if the student requests a hearing, the student shall prepare a written response to the Notice stating whether the student disputes the information set forth in the Notice and/or the University's conclusion that the academic record, admissions and/or a conferred degree should be revoked as well as the specific evidence and reasons upon which the student bases such dispute or conclusion.
2. The Notice shall be sent by certified mail, personal or overnight delivery, to the last known mailing or contact address for the student. If possible, the request for a hearing shall be sent to the University Chief Academic Officer via certified mail.
3. If the student does not request a hearing within thirty calendar days of confirmed receipt of the Notice, the University may revoke the academic record, admissions and/or a conferred degree without further proceedings.
4. If the student requests a hearing, the University Chief Academic Officer shall use reasonable efforts to schedule such hearing no sooner than thirty and no later than sixty calendar days after the student notifies the University of the request for a hearing. The student shall be provided with written notice of the scheduled hearing date and location no later than fourteen days before the hearing.
5. The student shall be entitled to review the evidence that supports the University's Notice and may request a copy of such evidence at cost.
6. The student and the University may be accompanied at the hearing by an Advisor, who may neither speak for nor on behalf of, the student or University.
7. The student and the University shall be allowed to introduce evidence and call witnesses to testify at the hearing. The formal rules of evidence applied in courtroom proceedings do not apply in the hearing.
8. If, after requesting the hearing, the student fails to appear at the hearing without good cause, the hearing shall proceed, and the University Chief Academic Officer shall render a decision based on the evidence submitted. The University Chief Academic Officer shall weigh the evidence presented and shall draw no inferences from the student's absence from the hearing.
9. If despite its due diligence, the University received no confirmation that the student received the Notice or is unable to locate the student to provide the Notice, the University may nonetheless seek revocation of the academic record, admissions and/or a conferred degree. The University shall schedule a hearing within sixty calendar days of

Online Programs

the date of the Notice that shall proceed in the absence of the student. The University Chief Academic Officer shall consider the evidence presented at the hearing by the University and shall determine whether there is sufficient evidence to revoke the student's academic record, admissions and/or a conferred degree under this policy.

10. The University Chief Academic Officer shall consider and weigh the evidence and shall prepare written findings concerning whether there is clear and convincing evidence to revoke the academic record, admissions and/or a conferred degree. If the University Chief Academic Officer finds that the evidence establishes that the academic record, admissions and/or a conferred degree should be revoked, s/he shall also consider whether the student should be permitted to complete the requirements for his or her academic program after some sanction is applied. Sanctions may include but are not limited to, a ban from enrollment for some period or a loss of catalog year rights.
11. The University Chief Academic Officer shall prepare a letter that explains the reasons for the decision. The decision letter shall be issued within ten calendar days of the hearing.
12. Nothing in this policy shall be construed to prevent the University Chief Academic Officer from agreeing to an informal resolution of the matter with a student instead of, or after, a hearing.
13. The University shall allow any affected student to petition the University to reopen the revocation decision, provided the student establish that he/she received notice after the 60-day timeframe discussed in Section 1 above or, for a good cause shown, was unable to contact the University or to respond within the period specified. Any student who meets the above-noted requirements shall be provided an opportunity to respond and a hearing in the manner described in this policy.

Post-Revocation Steps-If an academic record, admissions and/or a conferred degree is revoked:

1. Ensure that all relevant records of the University relating to the student are promptly amended to reflect the revocation.
2. Note the effective date of the revocation on the student's transcript and use reasonable efforts to transmit a copy of the official (revised) transcript to the student.
3. The student should take appropriate steps to notify all former and current employers, relevant educational institutions, professional registration bodies or associations, or others as applicable to the revocation. If despite its due diligence, the University is unable to provide this notice to the student due to an inability to contact or locate the student, the University shall place a hold on the student's records until it can provide such notice.
4. If at the time of the revocation the student is enrolled at the University, the University Chief Academic Officer shall promptly notify the University Student Conduct Officer of the revocation so that the Student Conduct Officer can consider whether to take any further steps.
5. The student is not relieved of any financial obligation unless it is determined that fees shall be reversed after a comprehensive review completed by Student Financial Services.

Awarding Degrees in Cases of Death or Incapacity

An academic degree or certificate may be awarded to a student in the case of death or to a student who is permanently incapacitated to the point that continued academic progress is impossible even after reasonable accommodation if at least 75 percent of the degree program requirements have been completed (and in the case of thesis-based graduate degrees, the student had achieved significant progress on a thesis or dissertation, according to the opinion of the faculty advisor), the student has met 75 percent of institutional credit requirements, is in good standing, and meeting the minimum GPA of 2.0 for Undergraduate students and 3.0 GPA for Graduate and Doctoral students at the time of death or permanent incapacitation.

Commencement Participation

Petition for Degree Conferral

In order for degrees to be conferred and eligibility to participate in the commencement ceremony to be determined, students must Petition for Degree Conferral (commonly referred to as the Petition to Graduate). This link can be found under the Self Service section on the homepage of mySNHU. For full details on Degree and Certificate Conferral, click [here](#).

Participation in Commencement

Conferral of a degree and participation in the commencement ceremony are two distinct events. Participation in the ceremony does not indicate degree completion. Degree conferral is only confirmed when recorded on the official transcript. Those earning certificates or who are non-degree seeking students are not eligible to participate in any commencement ceremony.

Students are permitted to participate in only one commencement ceremony per degree. Students are assigned to a commencement ceremony in accordance with this policy based on their anticipated conferral date at the time of their initial degree audit. Changes to a student's anticipated conferral date do not change their original commencement ceremony eligibility. All requests to participate in a ceremony other than the one for which a student was originally eligible must be made by submitting an Appeal for Commencement Participation via mySNHU. This applies to both in person and virtual ceremonies.

Online Programs

Commencement Ceremonies

Southern New Hampshire University holds both in person and virtual commencement ceremonies in the Spring and Fall. Guidelines for participation are as follows:

Eligibility to Participate in a Spring Commencement Ceremony:

Candidates who have an anticipated conferral degree date between January 1 and May 31 will participate in a Spring Commencement ceremony.

To be eligible to participate in the Spring Commencement ceremony, campus students must complete the Petition for Degree Conferral by **December 1 (inclusive - 11 pm ET)** and online students (including direct assessment and students in international locations) must complete the Petition for Degree Conferral by **March 1 (inclusive - 11 pm ET)**. All students must meet the following criteria:

- Campus students must anticipate all program requirements be complete and all grades be received and verified by the University Registrar by the end of the Spring term.
- Online students (including direct assessment students and students in international locations) must anticipate all program requirements be complete and all grades be received and verified by the University Registrar by April 30.
- Students must be in good academic standing with at least a 2.0 cumulative GPA (undergraduate) and a 3.0 cumulative GPA (graduate).
- Mountainview Low-residency Master of Fine Arts Students have special guidelines. See **Mountainview Low-residency Master of Fine Arts Students** below.
- Doctoral Candidates have special guidelines. See **Doctoral Candidates**, below.

Appeals to Participate in Spring Commencement for Conferrals between January 1 and May 31- Students Who Filed the Petition for Degree Conferral Late

- Students who submit a Petition for Degree Conferral past the required Spring Commencement deadlines above and have an anticipated conferral degree date between January 1 and May 31 and also hope to participate in the Spring Commencement ceremony **may** be approved to participate in the ceremony. However, they will not be included in the commencement booklet, may not be eligible for ceremonial honors (including cords), and may not be eligible to receive the standard amount of ceremony tickets.
- See **Spring Appeals Process** below.

Appeals to Participate in Spring Commencement for Conferrals between June 1 and July 1

- In rare circumstances, a student who has submitted a Petition for Conferral by the required Spring Commencement deadline but has an anticipated conferral degree date no later than July 1 may be allowed to participate in the Spring Commencement ceremony. To be considered, the student must have compelling circumstances for the request and be in good academic standing.
- See **Spring Appeals Process** below.

Spring Appeals Process

Students who wish to file an Appeal for Commencement Participation should work with their academic advisors and forward the appeals to the Ceremonies and Events Office, which will make the final determination in consideration of space availability. Appeals must be submitted by April 1.

Mountainview Low-residency Master of Fine Arts Students

The Mountainview Low-residency Master of Fine Arts Program holds separate ceremonies from the Spring and Fall University commencement ceremonies. Students will be contacted directly by the Fine Arts Academic Leadership with details about the ceremony.

Doctoral Candidates

Doctoral hooding will only be included in the Spring Commencement ceremony.

Online Programs

All graduate requirements must be completed, including dissertation defense no later than **March 1st**. Exceptions may be requested by dean for students who are expected to meet all requirements including defense after March 1st if approved by the VPAA's office after consulting with the commencement office to see if commencement materials can be ordered. There is no guarantee that materials will be able to be ordered after the March 1st date.

Eligibility to Participate in a Fall Commencement Ceremony:

Candidates who have an anticipated conferral degree date between June 1 and December 31 will participate in a Fall Commencement ceremony.

To be eligible to participate in a Fall Commencement ceremony, all students (including direct assessment and students in international locations) must complete the Petition for Degree Conferral by **October 1 (inclusive - 11 pm ET)**. All students must meet the following criteria:

- Students must anticipate all program requirements be complete and all grades be received and verified by the University Registrar by November 30.
- Students must be in good academic standing with at least a 2.0 cumulative GPA (undergraduate) and a 3.0 cumulative GPA (graduate).
- Mountainview Low-residency Master of Fine Arts Students have special guidelines. See **Mountainview Low-residency Master of Fine Arts Students** below.
- Doctoral Candidates have special guidelines. See **Doctoral Candidates**, below and in the Spring guidelines for full details.

Special Case for Campus Students

- Campus students who complete degree requirements in the Fall Semester will have the option to participate in the Spring Commencement ceremony.
- See **Fall Appeals Process** below.

Appeals to Participate in Fall Commencement for Conferrals between June 1 and December 31- Students Who Filed the Petition for Degree Conferral Late

- Students who submit a Petition for Degree Conferral past the required Fall Commencement deadlines above and have an anticipated conferral degree date between June 1 and December 31 and also hope to participate in the Fall Commencement ceremony **may** be approved to participate in the ceremony. However, they will not be included in the commencement booklet, may not be eligible for ceremonial honors (including cords), and may not be eligible to receive the standard amount of ceremony tickets.
- See **Fall Appeals Process** below.

Appeals to Participate in Fall Commencement for Conferrals between January 1 and February 1

- In rare circumstances, a student who has submitted a Petition for Conferral by the required deadline but has an anticipated conferral degree date no later than February 1 may be allowed to participate in the Fall Commencement ceremony. To be considered, the student must have compelling circumstances for the request and be in good academic standing.
- See **Fall Appeals Process** below.

Fall Appeals Process

Students who wish to file an Appeal for Commencement Participation should work with their academic advisors and forward the appeals to the Ceremonies and Events Office, who will make the final determination in consideration of space availability. Appeals must be submitted by November 1.

Mountainview Low-residency Master of Fine Arts Students

The Mountainview Low-residency Master of Fine Arts Program holds separate ceremonies from the Spring and Fall University commencement ceremonies. Students will be contacted directly by the Fine Arts Academic Leadership with details about the ceremony

Online Programs

Doctoral Candidates

Doctoral hooding will only be included in the Spring Commencement ceremony.

Degree and Certificate Conferral

Petition for Degree Conferral

In order for degrees to be conferred and eligibility to participate in the commencement ceremony to be determined, students must Petition for Degree Conferral (commonly referred to as the Petition to Graduate). This link can be found under the Self Service section on the homepage of mySNHU.

Participation in Commencement

Conferral of a degree and participation in the commencement ceremony are two distinct events. Participation in the ceremony does not indicate degree completion. Degree conferral is only confirmed when recorded on the official transcript. Those earning certificates or who are non-degree seeking students are not eligible to participate in any commencement ceremony. Students are permitted to participate in only one commencement ceremony per degree.

For full details on participation in commencement, click [here](#).

Petition for Degree Conferral Deadlines:

Campus Student:

Students must submit a petition to graduate to the Office of the University Registrar in accordance with the following deadlines:

For a conferral date of:	January 1	Spring Commencement Ceremony
Petitions to Graduate are due no later than:	October 1	December 1
Program requirements must be complete and grades must be received and verified by the University Registrar by:	December 30	End of the Spring Term
Conferral Posted Date:	January 15	10 business days after Spring Commencement Ceremony

Campus Graduate Students and Online Graduate and Undergraduate Students (including direct assessment and students in international locations):

Students must submit a petition to graduate to the Office of the University Registrar no later than two months prior to their planned conferral date. For example, a student planning to be conferred as of March 1st must submit their petition by January 1st.

Direct assessment students must petition for both eligible programs:

- Undergraduate Degree Program (ex. AA.GST)
- Competency Program (ex. AA.GST.CFA)

Failure to petition for both programs may result in a delay to the graduation process.

Graduation Fee:

Upon petition submission, a non-refundable Petition to Graduate fee will be applied to the student's account. Certificate students and non-degree seeking students are not eligible to participate in any ceremony and therefore will not be assessed a fee.

Conferral Dates:

Degrees are conferred 15 times per year: the first of every month and, the dates of the Spring and Mountainview Low-residency MFA commencement ceremonies.

Conferral Requirements:

A credential will be conferred only when all program requirements are complete and all grades are received and verified by the Office of the University Registrar within the University's information system prior to or on the last business day of the month.

Online Programs

A period of ten business days following the conferral date is required to post the conferral information to the student record.

Credentials (Diplomas and Certificates)

Only the degree, primary major, Latin honors (if earned), and the University Honors program graduate indication will appear on the credential.

The name on the credential must be the legal name of the graduate or preferred name on the SNHU record, or within reason. For example, a student can request their middle initial rather than their full middle name.

All credentials will be mailed from the University's vendor within 20 business days of the conferral date.

If the student does not receive their credential within 30 days of it being mailed, at the address specified through the petition to graduate process, the student should contact the Office of the University Registrar. The student will be sent another credential. However, if the mailing address was not updated, the student will need to provide the updated address and pay the cost of a replacement credential.

Degree and Certificate Requirements

Undergraduate Students

Students must fulfill the following university requirements to be eligible for an undergraduate degree or certificate:

Undergraduate Degree

1. General education requirements.
2. All prescribed courses and program requirements.
3. A minimum of 120 credits of work in a bachelor's degree program (more than 120 credits may be required depending on the program of study) or 60 credits in a program leading to an associate degree (more than 60 credits may be required depending on the program of study). A minimum of 15 credit hours for an Associate degree or 30 credit hours for a bachelor's degree must be institutional credit taken at SNHU. This excludes developmental courses. See the [Institutional Credit Requirements](#) policy for additional details.
Southern New Hampshire University will limit academic residency to twenty-five percent of the degree requirement for all degrees for active-duty service members and their adult family members (spouse and college-age children). In addition, there are no "final year" or "final semester" residency requirements for active-duty service members and their family members. Academic residency can be completed at any time while active-duty service members and their family members are enrolled. Reservist and National Guardsmen on active-duty are covered in the same manner.
4. An overall undergraduate level GPA of 2.0 or higher; some programs require a higher GPA.

Undergraduate Certificate

1. All prescribed courses and program requirements.
2. A minimum of 12 credit hours of institutional work taken at SNHU.
3. An overall undergraduate level GPA of 2.0 or higher.

NOTE: It is the responsibility of the student to be familiar with program-specific requirements as these may supersede the university's minimum standards.

Graduate Students

Students must fulfill the following university requirements to be eligible for a graduate degree or certificate:

Ph.D. in International Business

1. Complete a minimum of 39 credit hours of required doctoral level courses, and possibly up to 15 credit hours of master's level international business courses as prerequisites for the doctoral level courses.
2. Complete and satisfactorily pass all written/oral comprehensive examinations.
3. Submit and receive approval of dissertation topic.
4. Finalize and receive approval of dissertation research.
5. Complete with a GPA of 3.0 or higher.
6. Complete the program within 8 years of their first day of their first term. Doctoral students who are enrolled in the PhD International Business program for more than eight (8) years (calculated by using the first term of enrollment) are dismissed from the program.

Ed.D. in Educational Leadership (on campus only)

1. Complete a minimum of 48 credit hours of required doctoral level courses with a GPA of 3.0 or higher.
2. Complete and satisfactorily pass all written/oral comprehensive examinations.
3. Complete Human Subjects Research training and submit certificate of completion.

Online Programs

4. Submit and receive approval of dissertation topic.
5. Complete dissertation research.
6. Successfully defend the dissertation proposal.
7. Submit the dissertation proposal and relevant documents to the University Institutional Review Board (IRB).
8. Successfully defend dissertation research.
9. Submit a final copy of the dissertation one month prior to graduation.

Master's Degree

1. All prescribed courses and program requirements.
2. A minimum of 24 credit hours of institutional credits taken at SNHU, with no more than four transfer courses, a maximum of 12 transfer credit hours.
Southern New Hampshire University will limit academic residency to twenty-five percent of the degree requirement for all degrees for active-duty servicemembers and their adult family members (spouse and college-age children). In addition, there are no "final year" or "final semester" residency requirements for active-duty servicemembers and their family members. Academic residency can be completed at any time while active-duty servicemembers and their family members are enrolled. Reservist and National Guardsmen on active-duty are covered in the same manner.
3. An overall graduate level GPA of 3.0 or higher.
4. No more than two grades of "C" or "C+" within the program's prescribed courses.
5. Completion within 8 years of the first day of the first term.

Graduate Certificate

1. All prescribed courses and program requirements.
2. A minimum of 12 credit hours in residence.
3. An overall graduate level GPA of 3.0 or higher.
4. No more than one grade of "C" or "C+" within the certificate's prescribed courses.
5. Completion within 8 years of the first day of the first term.

NOTE: It is the responsibility of the student to be familiar with program-specific requirements as these may supersede the university's minimum standards.

College for America Students

Students must fulfill the following requirements to be eligible for a certificate or an undergraduate degree:

Certificate:

- Mastery of 30 Competencies through the CFA program

Associates:

- Mastery of 60 Core Competencies through the CFA program

Bachelors:

- Satisfactory completion of all requirements for the CFA AA in General Studies degree OR approval to begin the BA program with the 60 Advanced Competencies
- Mastery of the 60 Advanced Competencies required by each degree through the CFA program

NOTE: It is the responsibility of the student to be familiar with program-specific requirements as these may supersede the university's minimum standards.

Institutional Credit Requirements

Associate degree-seeking students must complete a minimum of 15 institutional credit hours with SNHU. Bachelor's degree-seeking students must complete 30 institutional credit hours from SNHU. Graduate degree-seeking students must complete a minimum of 24 institutional credit hours from SNHU. Institutional credit requirements cannot be fulfilled by developmental courses. Bachelor's degree candidates must complete a minimum of 12 institutional credit hours within the major beyond required school core courses. Associate degree candidates must complete a minimum of 9 institutional credit hours within the major. For a minor, an optional bachelor's degree component, students must complete a minimum of 9 credit hours of institutional credit, and for a certificate, students must complete a minimum of 12 credits. Approved international study and consortium courses are considered to be institutional credit.

Students may use the same institutional credit to fulfill requirements for their first certificate and degree of the same level. For additional certificates, students must complete a minimum of 9 additional institutional credits. For additional associate

Online Programs

degrees, students must complete a minimum of 15 additional institutional credits. For additional bachelor degrees, students must complete a minimum of 30 additional institutional credits. For additional graduate degrees, students must complete a minimum of 21 additional institutional credits.

NOTE: Southern New Hampshire University will limit academic residency to twenty-five percent of the degree requirement for all degrees for active-duty service members and their adult family members (spouse and college-age children). Academic residency can be completed at any time while active-duty service members and their family members are enrolled. Reservist and National Guardsmen on active-duty are covered in the same manner.

Non-Conferred Completer (NCC)

A “non-conferred completer” is a student that has completed all program requirements or is enrolled in courses that will complete their program requirements.

The Office of the University Registrar will notify students via SNHU email if they fall into one of these categories. Students intending to increase their remaining requirements to graduate (for example, adding a minor) must file a Program Modification Form ([campus, online](#)) within 5 business days of the notification email*. If the student does not respond within 5 business days, a registration hold will be placed on the student’s account on the 6th business day. The student will be removed from any courses they are registered for in future terms and will not be able to register for any future courses. The Office of the University Registrar will officially confer the student’s credential in accordance with normal [petition to graduate](#) deadlines. The graduation fee will be applied to the student’s account. The student will not be able to obtain an official transcript or diploma until the account is settled.

If the student does not intend to increase their program requirements they should [Petition to Graduate](#) via [mySNHU](#) in accordance with official [Petition to Graduate](#) Deadlines.

*NOTE: The costs of courses taken above and beyond program requirements are not eligible for financial aid. If the student intends to take additional courses simply to raise their GPA, they must pay for the course (or courses) out-of-pocket. The registration hold will remain in place on the student’s account, so registration for these courses must be processed internally. Once the credential in question is officially conferred, the registration hold will be removed.

Miscellaneous

Definition of Terms

Academic Programs

A degree program is any program of study that results in the awarding of a formal, post-secondary degree. It is generally defined as the combination of the degree type (associates, bachelor’s, master’s, or doctorate) and the major/discipline of study (accounting, business administration, history, etc.). A certificate is a formal award that requires completion of an organized program of study.

- **Undergraduate Certificate.** An undergraduate certificate includes the equivalent of at least 12 credit hours certifying the satisfactory completion of a postsecondary education program. Undergraduate certificates are comprised of discipline-specific (or interdisciplinary) coursework. At least 12 credit hours must be institutional credits completed at SNHU.
- **Associates Degree.** A degree granted for the successful completion of a pre-baccalaureate program of study equivalent to two years of full-time study. An associates degree includes the equivalent of a minimum of 60 credit hours drawn from general education courses, electives, and courses required for a specific major. At least 15 credit hours must be institutional credits completed at SNHU. Associates degree programs may not have any program additions (majors, minors, concentrations) added to the base program.
- **Bachelor's Degree.** A degree granted for the successful completion of a baccalaureate program of study equivalent to four years of full-time study. A bachelor’s degree includes the equivalent of a minimum of 120 credit hours drawn from general education course requirements, major course requirements, and elective courses. At least 30 credit hours must be institutional credits completed at SNHU.
- **Graduate Certificate.** A graduate certificate includes the equivalent of at least 12 credit hours beyond the bachelor’s degree, but not meeting the requirements of a master’s degree. All graduate certificate coursework must be at the post-baccalaureate level. At least 12 credit hours must be institutional credits completed at SNHU. Successful completion of a competency-based program of study fulfills graduation requirements.
- **Master's Degree.** A degree awarded for successful completion of a post-baccalaureate program of study. A master’s degree includes the equivalent of a minimum of 30 credit hours, with most requiring 36 or more credit hours. All coursework must be at the post-baccalaureate level. At least 24 credit hours must be institutional credits completed at SNHU.
- **Doctorate Degree.** A degree awarded for successful completion of a program of advanced study and scholarly work equivalent to at least 3-years of full-time study beyond the master’s degree level. A doctoral degree includes at least 39 credit hours (but may require substantially more) and commonly requires a dissertation, comprehensive exam(s), or a comparable exit option. Required credit hours vary according to discipline and the speed at which the

Online Programs

student candidate can complete the work.

Academic Renewal

The purpose of Academic Renewal is to provide students who have been academically unsuccessful in the past with an academic fresh start in terms of cumulative GPA. Academic Renewal is only granted once at the undergraduate and/or graduate level, and students are not able to return to the program(s) for which it was granted. See academic catalog for policy requirements.

Additional Concentration

Additional concentrations are allowed at the undergraduate level in any program as long as all concentrations provide a more in-depth focus related to the major and each concentration has at least nine credits separate from the major and the other concentration(s). Requests to add additional concentrations must be reviewed and approved by the student's advisor.

Multiple concentrations are not permitted at the graduate level.

Additional Minor

A student may elect to earn additional minors by completing both the program requirements associated with the primary minor and the requirements of additional minor(s).

No more than fifty percent of the courses that fulfill a student's additional minor requirements can also be applied to a student's primary major or primary minor requirements.

Courses taken to complete a student's additional minor can also be used to fulfill general education, school core, and free elective requirements.

Capstone

A capstone is a culminating experience in which students apply the knowledge, skills, and abilities of their degree program to a project or similar demonstration of competency. A capstone generally does not introduce new content for students to learn, but rather asks them to demonstrate that they can integrate their learning into a cohesive body of work.

Commencement

The formal celebration for those who have completed or are near completing all requirements for their chosen program. Students may have already had their degrees conferred or may be completing final requirements and anticipate conferral at a later date. Participation in the Commencement ceremony does not mean that your degree is conferred (see below). There is only one annual Commencement ceremony weekend for SNHU, held in May, following the end of spring semester. Students may participate in one commencement ceremony for each degree conferred.

Concentration

A concentration is a sequence of inter-related coursework that a student chooses to pursue within a major or discipline. A concentration generally replaces elective coursework in the major or discipline, allowing students to focus their studies on an area of interest. A concentration is not an official credential, nor is it noted on the diploma. It is, however, acknowledged on student transcripts. A concentration is typically an optional component within a program of study. A concentration consists of at least nine credit hours.

For undergraduate programs only, the concentration is part of the major beginning with the 2013-2014 academic year. Beginning with this academic year, concentration courses will be combined with the major courses on the undergraduate degree audit so that they will automatically be considered to meet residency requirements.

For graduate programs, concentrations are not part of the major.

Conferral

The actual posting of a degree to your academic record (transcript). This is the SNHU's official seal of approval, indicating that all degree requirements are complete. Conferral can take place before or after the Commencement ceremony and conferrals take place once a month.

Conferral Date

The date on which a degree is effective. Degrees are conferred 15 times per year, the first of every month and the days of the May and MFA commencement ceremonies.

Course Numbering

Online Programs

001-099	Developmental coursework; does not count toward total hours needed for degree completion.
100-299	Lower division coursework; introductory level.
300-499	Upper division course work.
500-799	Graduate level course work.
800-999	Doctorate level coursework.

Credit Hours

SNHU has adopted the US Department of Education and the New England Commission of Higher Education guidelines regarding the definition of a credit hour. Federal regulations define a credit hour under Section 600.2 and 600.24(f) of the Higher Education Opportunity Act as: "An amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates not less than:

1. One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit or the equivalent amount of work over a different period of time; or
2. At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution, including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours."

Credit Load

Students attending at a less than half-time credit load status: 1) student loans will not go into deferment, 2) eligibility for other benefits may be affected. Credit load is defined by academic level as well as degree program in some instances. See the academic catalog for credit load requirements.

Double Major

A student may elect to earn a second major by completing both the degree requirements associated with a primary major and the requirements of a second major excluding associated school core courses. No more than two courses in the second major may overlap with the primary major. The student's diploma lists the primary major; the transcript reflects both majors.

Dual Degrees

A student seeking to earn an additional degree of the same level must complete additional institutional credits and complete all other requirements of the new degree. Dual degrees may be pursued concurrently. Students seeking another associates degree must complete at least 15 additional institutional credit hours. Students seeking another bachelor's degree must complete at least 30 additional institutional credits; no more than two courses in the new major may overlap with the major(s) of the previous degree(s). Students seeking another master's degree must complete at least 21 additional institutional credits. Students will receive individual diplomas for each degree that they earn. For details on credit requirements for each additional degree, reference the Institutional Credits Requirements Policy.

Elective Courses

An elective is a course that students choose from among various optional courses in a curriculum. Two types of electives exist. One is electives within a specific subject area, which fulfill the requirements of a major or program of study. The second type of electives is free electives, used to complete the number of credits required for a degree (commonly 60 for an associates, and 120 for a bachelor's). Students may choose any courses they wish to broaden their educational experience while completing their degree requirements.

Foundation Courses, Graduate

Certain master's degree programs may require foundational coursework as a prerequisite to core program requirements. Graduate program foundation courses serve to identify essential knowledge requirements for the respective program.

General Education Requirements

General education requirements strive to provide undergraduate students with an educational foundation of knowledge, skills and cultural awareness.

Students pursuing an associates degree must complete the equivalent of a minimum of 20* credit hours of general education coursework to include one composition course, one science or mathematics course, and one social and behavioral science course.

Students pursuing a bachelor's degree must complete the equivalent of a minimum of 42 credit hours of general education.

Online Programs

*Per New England Commission of Higher Education requirements.

Grade Point Average (GPA) Requirements

A grade point average (GPA) is a measure of scholastic achievement, calculated by dividing the number of quality points earned by the number of credits attempted. A detailed description of how SNHU calculates GPA is included in the current catalog. To meet program of study completion requirements, students must meet certain GPA requirements:*

- Associates degrees require a cumulative GPA of at least 2.0.
- Bachelor's degrees require a cumulative GPA of at least 2.0, but certain bachelor's degree programs require a higher GPA.
- Master's degrees require a cumulative GPA of at least 3.0.
- Doctorate degrees require a cumulative GPA of at least 3.0.
- Majors may have GPA or minimum grade requirements.
- Minors may have GPA or minimum grade requirements.
- Certificates, Undergraduate require a minimum of 2.0 GPA.
- Certificates, Graduate require a minimum of 3.0 GPA.

* There are no quality points associated with competency based MA grades, therefore there is no GPA for students in competency based programs.

Graduation

A term used interchangeably to refer to both Commencement and Conferral. It is more accurate to refer to these two events separately, as they have different requirements and one does not necessarily include the other. For example, attending Commencement does not guarantee the conferral of a degree.

Internship

An internship is a course of supervised practical training, frequently in an off-campus workplace, where the student is guided in his or her learning by a site supervisor and a faculty sponsor. Internships may be paid or unpaid, depending on the specific location and duties involved.

Major

A major is the disciplinary (or interdisciplinary) area of emphasis for an undergraduate degree program that includes coursework focused on a specific professional or academic area. The total number of credit hours required by a baccalaureate major is at least 42 credits (including school core) with most majors requiring more. Students pursuing a bachelor's degree must complete at least 12 credit hours of institutional credit at SNHU within the major that are in addition to school core courses within the major. Students pursuing an associates degree must complete at least nine credit hours of institutional credits at SNHU within the major.

No major courses may be used to meet general education requirements.

Minor

A minor is an optional secondary area of emphasis for a bachelor's degree program intended to enhance or broaden students' knowledge, skills, and abilities.

A minor consists of at least 15 credit hours. Of these, at least nine credit hours must be institutional credits completed at SNHU.

No more than fifty percent of the courses that fulfill a student's minor requirements can also be applied to a student's major requirements. Students cannot minor in the same area of the major or concentration.

Courses taken to complete a student's minor can also be used to fulfill general education, school core, and free elective requirements.

Program Offering

A program offering is any credit or non-credit course of study offered at SNHU by any of its divisions. Examples of program offerings include a concentration, certificate, minor, undergraduate program and graduate program.

Program of Study

A program of study is a coherent, logically-sequenced learning path that progressively leads to the mastery of a predefined set of program outcomes. A program of study is a general term used to describe awarded credentials including an undergraduate or graduate level degree or certificate.

Scholastic Standing

In order to remain enrolled in courses and qualify for graduation, a student must be in good scholastic standing. Students with a cumulative GPA that falls below the minimum face scholastic sanctions that include Scholastic Warning, Continued Scholastic Warning and Academic Suspension and Academic Dismissal. See academic catalog for policy requirements.

Online Programs

School Core

The School of Business and the School of Arts, Sciences, and Education have core requirements as part of their programs. The School of Business Core is comprised of 10 courses designed to meet program accreditation standards. The School of Arts, Sciences, and Education Required Courses are three courses from arts and sciences disciplines that complement each major.

Seminar

A seminar is a course offered to a small group of students engaged in intensive study.

Specialization

Used interchangeably with concentration or track. This term is being phased out in favor of the term concentration.

College for America Programs Key Terms

- A **Competency** is a “can do” statement, such as “can define and use marketing terminology and concepts” or “can generate a variety of approaches to addressing a problem.” At CfA you master Competencies by completing Projects.
- **Course Equivalency**: One credit equivalency is earned with the mastery of each competency, and these are mapped to course equivalencies.
- **Projects** are workplace relevant activities that enable you to demonstrate mastery of Competencies.
- **Mastery** lies at the heart of the College for America program. At CfA, you work on Projects that enable you to demonstrate what you know and can do. You either complete a Project by mastering a given set of Competencies, or you receive a ‘Not Yet.’
- **Not Yet**: If you receive a ‘Not Yet’ from a Reviewer . . . Congratulations! A ‘Not Yet’ indicates that you are on your way to mastering the Competencies inside the Project. When you receive a ‘Not Yet,’ you also receive detailed and targeted feedback from the Reviewer, so you know what you need to do to master the Competencies in that Project. The Reviewer may recommend resources for you to review or offer encouraging and specific suggestions to help you move toward mastery. You can continue to submit the Project until you achieve mastery of all the Competencies. Feel free to ask the Reviewer for clarification on the feedback, the Rubric criteria, or talk to your Advisor/Coach if you have questions.
- **Kudos**: Each week you should complete academic activities and earn Kudos. Kudos are participation points that help keep you on track to reaching your goals. You earn Kudos for completing academic activities. See the student handbook for more details.

General Education, Anti-Encroachment

Schools or Programs can dictate the MAT course in the Foundation section of the General Education program and any two (2) additional courses in the Exploration section of the General Education Program.

Note: Specific programs may have different or additional dictations based on accreditation standards. Refer to your program for details.

Records and Right to Privacy

Academic Record Retention

Introduction

Southern New Hampshire University (the “University”) requires that University student academic and course records be retained for specific periods of time. These academic records must be managed according to the guidelines outlined in this policy.

This policy establishes guidelines that set forth the minimum length of time that records should be retained. This will allow the University to:

- Meet its business and legal needs
- Optimize the use of space and minimize the cost of academic records retention

Ensure that outdated or useless records are deleted/destroyed

Record retention periods for selected academic records may be increased for various reasons including government regulation, judicial or administrative orders, contracts, pending or threatened litigation, or audit requirements. Such changes in the records retention schedule supersede the requirements listed in this schedule and will be so noted on the

Online Programs

appropriate document. When needed, the Dean of the University Library, or designee, provides advice as to what non-current records of enduring value should be transferred to the University Archives at the Shapiro Library.

Definitions

Academic Record

An academic record is anything containing academic or course related information regardless of format (paper, digital, photographic, recordings, etc.). Typical academic records include transcripts, admission documents, waivers, and other items found in student files, as well as instructor grade books, final exams, etc. Records will be retained, archived, and/or destroyed based on the retention periods defined in this policy.

Retention Schedules

A descriptive schedule that provides a guideline for the minimum length of time that selected records should be retained before they are deleted/destroyed or placed in archival preservation.

Retention Period

Minimum required length of time for maintaining records. Records may be held longer than the retention period, but should not be disposed of prior to that date.

Records Destruction

The physical or electronic destruction of a record after it has become obsolete or otherwise in accordance with this policy.

Litigation Hold

A communication issued as the result of current or anticipated litigation, audit, and government investigation or other similar matter that suspends the normal process regarding the retention and disposition of University records.

Associate

An employee, faculty member, or staff member of the University.

Policy

Purpose

The purpose of this policy is to allow the University to make sensible decisions about what information to keep and what information to discard, and to establish procedures for the maintenance, retention, preservation, and disposal of academic records.

Roles and Responsibilities

All employees, faculty members, or staff members of the University are responsible for being aware of, and adhering to, the provisions outlined within this Policy.

Procedure

Records for which there is a retention requirement in the retention schedule are recommended to be deleted/destroyed when they have reached the conclusion of their retention period. Academic records not specifically identified in this document should be retained a minimum of five (5) years if there is a legitimate business reason to do so, and deleted/destroyed if there is not.

Academic records should be deleted/destroyed in ways commensurate with their confidentiality and with methods which do not permit recovery, reconstruction or future use of confidential information. For example, paper records should be cross-shredded and not placed in recycle bins, electronic or machine readable records should undergo multiple overwrites, physical destruction, or degaussing. E-mails should be handled as any other record in terms of retention and disposal.

Online Programs

Academic Record Retention/Purge Schedule

Admission records for applicants who do not enroll

Retention Period: 2 years after application term

Record Type	Description
Acceptance Letters/Admission Letters/Decision Letters	Notices of admission, denial, or waitlist
Alien Registration Receipt Card (international students)	Evidence of admissibility as a permanent resident
Application for admission or readmission	Admission applications such as undergraduate, graduate, international, or non-degree/special admittance
Attestation Form	Student document certifying completion of high school program
Credit by examination	Reports/scores on AP, CLEP, etc.
Diploma	
Disciplinary Action	Documentation of violation and Disciplinary Action, including plagiarism
Dual Enrollment forms	
Entrance examination reports/test scores	Standardized test scores, such as ACT/SAT, LSAT, MCAT, GRE, TOEFL
Honors Application/Honors Essay	
1-20 (international students)	Certificate of eligibility for F-1 visa status
Letter of intent	
Manuscript (admission)	
Military documents	including Certificate of Eligibility, DD214, etc.
Personal Statement	
Request for final transcript letters	
Resume	
School Report	Common Application: includes senior grades, recommendation and transcript
Transcript - high school	
Transcript - other colleges	Including college courses in progress
Preliminary Transfer Credit Evaluation	
Statement of Educational Costs (international students)	Estimate of total school year costs
Statement of Financial Responsibility (international students)	Evidence of adequate financial resources
Waivers of rights of access	Waiving right of access to admission letters of recommendation
Waiver requests	Forms to waive: transfer credit evaluation from another institution, application fee, deposit fee

Admission records for applicants who do not enroll and Student Academic Records

Retention Period: 4 years after application term

Record Type	Description
Text Opt In	

Online Programs

Student Academic Records	
Retention Period: 5 years from receipt	
Record Type	Description
Academic Advising Records	Including, but not limited to, electronic and non-electronic documents, forms and records
Acceptance Letters/Admission Letters/Decision Letters	Notices of admission, denial, or waitlist
Add/Drop Course Withdrawal Form	(non-electronic)
Alien Registration Receipt Card (international students)	Evidence of admissibility as a permanent resident
Application for admission or readmission	Admission applications such as undergraduate, graduate, international, or non-degree/special admittance, MFA Manuscript
Athletic Eligibility Reports	
Attestation Form	Student document certifying completion of high school program
Class Schedules (students)	Student schedules for each term
Enrollment Verifications	Verifications of enrollment, graduation, GPA, and other related academics
Entrance examination reports/test scores	Standardized test scores, such as ACT/SAT, LSAT, MCAT, GRE, TOEFL
Degree Audit records	Degree audits in support of graduation clearing
Grade Change Forms	Non-electronic record of authorization to change grade
Grade Dispute Documents	Student final grade disputes
Honors Application/Honors Essay	
1-20 (international students)	Certificate of eligibility for F-1 visa status
Leave of Absence Forms	
Major/Minor Add/Drop Forms	
MFA Manuscript	
Military documents	
Personal Data Information Forms	Including Certificate of Eligibility, DD214, etc.
Personal Statement	Non-electronic change of address and other demographic data (excluding name changes)
Petitions to Graduate	
Preliminary Transfer Credit Evaluation	Degree application, record of degree name, etc.
Registration/Enrollment Records	
Release from high school or Dual Enrollment forms	(non-electronic)
Resume	
Returned Diplomas	

Online Programs

Scholastic Standing Documentation	Notice of academic scholastic standing related to academic nonperformance/deficiency (except academic dismissal, which is permanent)
Statement of Educational Costs (international students)	Estimate of total school year costs
Statement of Financial Responsibility	Evidence of adequate financial resources (international students)
Student Inquiries Relating to Academic Records	
Teacher Certifications	
Transcript Request Forms	Official transcript requests by student
Transfer Credit Evaluations	
VA certification records	Certifying documents for federal VA benefits
Waiver requests	Forms to waive: transfer credit evaluation from another institution, application fee, deposit fee
Withdrawal from the University Forms	(non-electronic)

Course Records

Retention Period: 1 year after course completion

Record Type	Description
Final Exams	If not returned to the student
Graded Coursework	If not returned to the student

Course Records

Retention Period: 2 years after course completion

Record Type	Description
Faculty grade book	Record of students in course and work completed

Student Academic Records

Retention Period: 7 years after course completion

Record Type	Description
Field Trip permission slips	

Student Academic Records

Retention Period: 10 years after graduation or non-attendance

Record Type	Description
Athletic Records	Initial and continuing eligibility information, academic information, documentation of participation, tutor evaluation and assessment
Data Change Logs	Electronic log of changes to enrollment and other data, including date/time stamp information and use that changed data if that data is maintained separately in the system
Email data/information	Emails and other electronic communications that authorize academic/enrollment actions and/or provide directory/non-directory information about a student
Enrollment Data	Electronic record of enrollment in classes, including records of drop, add and enrollment change activity
Letter of Intent	

Online Programs

Student Academic Records	
Retention Period: 50 years after graduation or non-attendance	
Record Type	Description
Student Demographic Information	Electronic student data including student characteristics, date of birth, former names, address information, photo ID and ethnic information, etc.

Student Academic Records	
Retention Period: Permanent	
Record Type	Description
Academic Dismissal	Notice of academic action related to academic non-performance/deficiency
Academic Integrity Code Violations (with sanctions)	Documentation of violation and Disciplinary Action, including plagiarism
Approvals for:	
Course Audit	
Course Repeat	
Credit/no Credit	Authorization for various enrollment options
Exceptions	Exceptions to academic rules
Overrides	Exceptions to academic rules
Petitions to Amend	Exceptions to academic rules
Waivers	Approvals to meet program requirements with administrative action
Catalogs	Published annually or bi-annually, record of courses, degrees, and programs of study offered
Class Lists/Rosters	Record of class rosters for each term
Commencement programs	Published annually or bi-annually, record of courses, degrees, and programs of study offered
Comprehensive Exams	
Credit by examination	Reports/scores on AP, CLEP, etc.
Degree statistics	Record of degrees granted by institution per graduation term and/or annually
Diploma	
Enrollment Statistics	Per term report of enrolled students, eg. by class, by course, totals, headcount, and FTE
FERPA:	(unless terminated by student)
Requests for formal hearings	Student-initiated request for formal hearing regarding amendment of education record
Authorization to disclose non- directory information	Necessary for compliance with record keeping requirements in FERPA
Authorization to prevent or resume directory information	Student request to opt-out of directory information disclosure
Statements on content of records regarding hearing panel decision	Documentation when student request for amendment of a record is not granted
Written decision of hearing panels	Decisions resulting from hearings regarding amendment of education records
Grade Data	Electronic record of submitted grades and grade changes, including date/time stamp and user data
Grade distribution and other grade statistics	Report of grades, given, including summary grade point statistics by class
Grade submission sheets	Non-electronic original record of grades submitted at end of term

Online Programs

Graduation lists	Lists of graduates for graduating class
Narrative Evaluations and Competency Assessments	
Race/ethnicity reporting	Report of student enrollment, graduation, and other metrics by race and ethnic origin
School Report	Common Application: includes senior grades, recommendation and transcript
Transcripts - high school	Including request for final transcript letters
Transcripts - other colleges	Including college courses in progress documents and request for final transcript letters
Thesis/Dissertation	

Change of Student Name, SSN or DOB

To request a change of legal name, diploma name, social security number, or date of birth from the one that is currently on record at SNHU, a student must submit appropriate documentation using the Change to Biographical Record form through the Service Portal on mySNHU. **This must be completed by the student requesting the change.**

The student must provide official supporting documentation. Acceptable documentation is limited to one of the following:

- Driver's license
- Marriage certificate
- Divorce decree
- Social Security card
- Court order verifying name change
- Government-issued non-driver ID card
- Government-issued passport

NOTE: Students who have submitted a Petition to Graduate, and wish to have their name updated on their diploma, should indicate that in their request.

FERPA Student Right to Privacy

Student Rights Under FERPA

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

(1) The right to inspect and review the student's education records within 45 days of the day the University receives a request for access.

A student should submit to the university registrar, dean, head of the academic department, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

(2) The right to request the amendment of the student's education records that the student believes are inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA.

A student who wishes to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed. If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

(3) The right to provide written consent before the University discloses personally identifiable information from the student's education records, except to the extent that FERPA authorizes disclosure without consent.

The University discloses education records without a student's prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

Online Programs

The University forwards education records to other agencies or institutions that have requested the records and in which the student seeks or intends to enroll or is already enrolled as long as the disclosure is for purposes related to the students' enrollment or transfer.

A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University.

(4) The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

The name and address of the Office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5901.

SNHU Directory Information

In compliance with FERPA, Southern New Hampshire University (SNHU) does not disclose personally identifiable information contained in student education records, except as authorized by law. SNHU may disclose appropriately designated Directory Information without a student's consent, unless the student has advised SNHU to the contrary in accordance with established procedures.

SNHU has designated the following information as directory information:

- Student's name
- Address(es)
- Telephone listing(s)
- Electronic mail address
- Photograph(s)
- Fields of study (major(s), minor(s), etc.)
- Dates of attendance/Enrollment status
- Anticipated program completion date
- Class level
- Degrees, honors, and awards received
- Weight and height of members of athletic teams
- Participation in officially recognized activities and sports
- The most recent educational agency or institution attended

If you do not want SNHU to disclose directory information from your education records without your prior written consent, you must notify the University in writing. This may be done at any time by submitting an [Authorization to Prevent or Resume Disclosure of Directory Information](#) to the Office of the University Registrar by fax 603-629-4647 or by email to registrar@snhu.edu. The primary purpose of Directory Information is to allow the University to confirm attendance to prospective employers and other third parties, and to include this type of information from your education records in certain University publications. Examples include: a playbill, showing your role in a drama production, the annual yearbook, Dean's List, President's List, recognition lists, Commencement Ceremony Program, and sports activity sheets/team rosters, showing weight and height of team members.

Directory information, which is information that is generally not considered harmful or an invasion of privacy if released, can also be disclosed to outside organizations without prior written consent. Outside organizations include, but are not limited to, companies that manufacture class rings or publish yearbooks. Disclosures of directory information will be limited to specific parties for specific purposes or both.

Solomon Amendment & FERPA

Solomon Amendment is a federal law that allows military recruiters to access the following "student recruiting" information on students age 17 and older at the time of the request:

- First Name
- Last Name
- Student Class Level (e.g. Freshman, Sophomore)
- Academic Program (e.g. BS in Accounting)
- Age
- Phone – Cell
- Phone – Home
- SNHU Email Address
- Preferred Address

Under the Solomon Amendment, information will be released for military recruitment purposes only. The military recruiters must be from one of the 12 eligible units within the five branches of the service:

Online Programs

1. **Army:** Army, Army Reserve, Army National Guard
2. **Navy:** Navy, Navy Reserve
3. **Marine Corps:** Marine Corps, Marine Corps Reserve
4. **Air Force:** Air Force, Air Force Reserve, Air Force National Guard
5. **Coast Guard:** Coast Guard, Coast Guard Reserve

The Department of Education has determined that the Solomon Amendment supersedes most elements of FERPA. An institution is therefore obligated to release data included in the list, which may or may not match FERPA directory information list. However, if a student has submitted an [Authorization to Prevent Disclosure of Directory Information](#) to the Office of the University of Registrar to prevent the release of their directory information, then no information from the student's education record will be released under the Solomon Amendment.

Releasing Academic Records of Deceased Students

Education records are no longer protected under FERPA after a student's death; consequently the disposition of records pertaining to a deceased individual is not a FERPA issue but a matter of institutional policy. Southern New Hampshire University maintains full discretion in deciding whether, and under what conditions, education records of deceased students should be disclosed.

The university will not release education records without written authorization of the executor/executrix of the deceased student's estate, or next of kin if an executor/executrix has not been appointed.

Request for Transcript

Except as provided by the Federal Family Education Rights and Privacy Act and in instances in which a student consents to release their transcript to another party, the Office of the University Registrar will not release a transcript to any person other than to the person identified by name on the transcript. To request an official copy, please visit the [Credential Solutions](#) website.

Students and SNHU Email

All students are expected to access their official SNHU email accounts regularly to check for official University communication and to respond as necessary to such communications. Students may not set up auto-forward rules from their official university email address to a non-university email system. Students communicating to the university from a non-university email address may be asked to resend from their SNHU email in order to receive a response or action.

Transcripts from Other Institutions

Student transcripts from previously-attended institutions that were provided to the university for any reason become the property of SNHU and are considered official only at the time of receipt. SNHU does not provide copies of transcripts from other institutions that are part of a student's education record to the student or any other third party. In order to obtain accurate up-to-date information and assure that no protocol of the issuing institution is circumvented, a student must contact the originating school for a copy of that transcript.

Rights and Responsibilities

Disability Access Statement

Individuals with disabilities requiring accommodations may contact the Online Accessibility Center at 1-866-305-9430 or oac@snhu.edu.

Non-Discrimination, Equal Access & Equal Opportunity

Non-Discrimination, Equal Access & Equal Opportunity Statement

Consistent with all applicable federal and state laws, rules, regulations and ordinances (e.g. Title III, Title VI, Title VII, Title IX, Section 504 of the Rehabilitation Act, and the Americans with Disabilities Act as amended), and in recognition of its responsibilities to its faculty, staff, and students as well as to the communities in which it operates, Southern New Hampshire University reaffirms its continuing commitment to afford qualified or qualifiable individuals equal access and equal opportunity within the University. To ensure equal access and equal opportunity, Southern New Hampshire University shall not discriminate against any individual or group because of race, color, creed, ethnicity, sex, religion, national origin, citizenship, marital or parental status, disability (including intellectual disability), age, gender, gender identity or expression, sexual orientation, pregnancy, veteran/military status, genetic information, or on any other legally prohibited basis.

Online Programs

Discrimination Complaint Process

The University will respond swiftly to concerns raised about behavior that is considered discriminatory, harassing or hateful. Complainants can expect a thorough investigative process which is outlined in the [Discrimination Complaint Protocol](#).

- **University College - Campus Students** may file a report in one of two ways. First by filing a report in person with the Office of Public Safety or by filing an online [Incident Form](#). A staff member from the Office of Community Standards or Title IX Coordinator and Equity Officer will be in touch once a report is filed.

Sexual Misconduct

1. Introduction 1.1

Southern New Hampshire University ("the University") is committed to providing a workplace and educational environment that are free from Sexual Misconduct, including unlawful Sexual Harassment, or associated Retaliation, on the basis of sex. Accordingly, the University adopts this policy and the associated procedures for a prompt and equitable grievance process for claims of Sexual Misconduct and Sexual Harassment, including sexual assault, stalking, Sexual Exploitation, dating violence, or domestic violence, all as further defined in this Policy. The University encourages prompt reporting of these matters to allow the University to quickly respond, address allegations, and offer immediate support to the affected community members, as set forth in this Policy.

1.2

Reports of Sexual Harassment and any inquiries concerning this Policy should be directed to the University's Title IX

Online Programs

Coordinator, whose contact information is as follows:

Kristin Scaduto
Title IX Coordinator/Equity Officer
2500 North River Road
Manchester, NH 03106
603.644.3188
k.scaduto@snhu.edu
titleix@snhu.edu

Further information regarding reporting is found in Section 6 of this Policy.

2. Definitions

For purposes of this Policy, these words have the following definitions:

2.1

Advisor means a person chosen by a Party or appointed by the University to accompany the Party to meetings related to the Resolution process, to advise the Party on that process, and to conduct cross-examination for the Party at the hearing, if any.

2.2

Complainant means an individual who is alleged to be the victim of conduct that could constitute Sexual Misconduct, Sexual Harassment, or Retaliation for engaging in a protected activity.

2.3

Confidential Professional means an employee who has a legally recognized professional duty of confidentiality and is not a Required Reporter of Notice of Sexual Misconduct, Sexual Harassment, or Retaliation on the basis of sex (irrespective of Clery Act Campus Security Authority status).

2.4

Consent: See Section 3.5 of this Policy.

2.5

Day means a business Day when Southern New Hampshire University is in normal operation. It does not include weekends or holidays.

2.6

Education Program or Activity means locations, events, or circumstances where the University exercises substantial control over both the Respondent and the context in which the Sexual Harassment or discrimination occurs and also includes any building owned or controlled by a student organization that is officially recognized by Southern New Hampshire University.

2.7

Final Determination means a binding conclusion by a Decision-Maker by a preponderance of the evidence whether the alleged conduct did or did not violate policy.

2.8

Finding means a conclusion by a preponderance of the evidence that conduct alleged did or did not occur.

2.9

Formal Complaint means a document filed by a Complainant or signed by the Title IX Coordinator alleging Sexual Harassment against a Respondent and requesting that the University investigate the allegation.

2.10

Formal Grievance Process means the method of formal resolution designated by this Policy by which the University addresses conduct prohibited by this Policy in compliance with the legal requirements of 34 CFR Part 106.45.

2.11

Grievance Process Pool includes any Investigators, Decision-Makers, appeal officers, and Advisors who may perform any or all of these roles (though not at the same time or with respect to the same case). At the discretion of the Title IX Coordinator, certain members of the Pool may be restricted to certain roles based on availability and individual training levels.

Online Programs

2.12

Decision-Maker or Panel refers to those who have decision-making and Sanctioning authority within the University's Formal Grievance processes.

2.13

Investigator means the person or persons tasked by the University with gathering facts about an alleged violation of this Policy, assessing relevance and credibility, synthesizing the evidence, and compiling this information into an investigation report and file of directly related evidence.

2.14

Notice means that an employee, student, or third-party informs the Title IX Coordinator or other Official with Authority of the alleged occurrence of harassing, discriminatory, and/or retaliatory conduct, or of violations of this Policy. When used in lower-case format in this Policy, notice has its normal dictionary meaning.

2.15

Official with Authority means an employee of the University explicitly vested with the responsibility to implement corrective measures for harassment or other conduct prohibited by this Policy, on behalf of the University.

2.16

Party/Parties include the Complainant(s) and Respondent(s), collectively. Neither the Title IX Coordinator nor the University are Parties.

2.17

Required Reporter means a University employee who is obligated by policy to share knowledge, Notice, and/or reports of Sexual Harassment, Sexual Misconduct, or Retaliation with the Title IX Coordinator. This reporting obligation is separate and independent from any reporting obligation under other University policies or from applicable state law reporting obligations with respect to child abuse, elder/incapacitated adult abuse, hazing/bullying, etc., though these responsibilities may overlap with reporting obligations set forth in this Policy.

2.18

Remedies are actions taken by University after a Final Determination, which are directed to the Complainant and/or the community as mechanisms to address safety, prevent recurrence, and ensure equitable access to the University's educational programs or activities.

2.19

Respondent means an individual who has been reported to be the perpetrator of conduct that could constitute Sexual Misconduct, Sexual Harassment, Retaliation for engaging in a protected activity, or otherwise violating this Policy.

2.20

Resolution means the result of an informal or Formal Grievance Process.

2.21

Retaliation means words or actions that intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by Title IX or this Policy, or because the individual has made a report or complaint, testified, assisted, or participated or refused to participate in any manner in an investigation, proceeding, or hearing under this Policy or Title IX.

2.22

Sanction means a consequence imposed by the University on a Respondent who is found to have violated this policy.

2.23

Sexual Exploitation occurs when an individual takes sexual advantage of another person for the benefit of anyone other than that person without that person's Consent, or in a circumstance where that person cannot legally Consent. Examples of behavior that could rise to the level of Sexual Exploitation include:

- I. Prostituting another person;
- II. Recording images (e.g., video, photograph) or audio of another person's sexual activity, intimate body parts, or nakedness without that person's Consent;
- III. Distributing, or threatening to distribute, images (e.g., video, photograph) or audio of another person's sexual activity, intimate body parts, or nakedness, if the individual distributing the images or audio knows or should have known that the person depicted in the images or audio did not Consent to such disclosure and/or objects to such disclosure; and,

Online Programs

- IV. Viewing another person's sexual activity, intimate body parts, or nakedness in a place where that person would have a reasonable expectation of privacy, without that person's Consent, and for the purpose of arousing or gratifying sexual desire.
- V. Coercing a person into engaging in unwanted sexual activity by exploiting that person's substance or drug dependence.

2.24

Sexual Harassment means harassment on the basis of sex, sexual assault, stalking, dating violence, or domestic violence, each as further defined in Section 3.4 of this Policy.

2.25

Sexual Misconduct includes a range of unwelcome conduct of a sexual nature occurring without Consent, including, Sexual Exploitation, Sexual Harassment, sexual assault, relationship violence (including domestic violence and dating violence), or stalking.

2.26

Student means, for the purpose of this Policy, any individual who has accepted an offer of admission, or who is registered or enrolled for coursework, and who maintains an ongoing relationship with the University.

2.27

Title IX Coordinator is the official (or officials) designated by the University to ensure compliance with Title IX, this Policy, and the University's Title IX program. References to the Title IX Coordinator throughout this policy may also encompass a designee of the Title IX Coordinator for specific tasks, where appropriate.

2.28

Title IX Team refers to the Title IX Coordinator, any Deputy Title IX Coordinators who may be designated from time to time, and any member of the Grievance Process Pool.

3. Policy 3.1 Scope

The University strictly prohibits all forms of Sexual Misconduct by any member of its community, whether occurring in University programming or off-campus but having an effect on the University's educational environment or a Complainant's educational experience. This Policy applies to Parties regardless of sexual orientation, gender identity, or expression.

The Sexual Harassment Grievance Procedure set forth in Section 9 of this Policy applies to Sexual Harassment occurring in all Programs and Activities of Southern New Hampshire University, and is available to Complainants in the United States. All Sexual Misconduct which does not fall within the jurisdiction of the Sexual Harassment Grievance Procedure, but which are otherwise actionable under this Policy, may be addressed under the Institutional Sexual Misconduct Grievance Procedures set forth in Section 10 of this Policy.

Conduct or grievances that fall outside the scope of this Policy may be addressed under other Southern New Hampshire University policies and procedures, as applicable. Nothing in this Policy shall be used to deny any individual's rights under Title VII of the Civil Rights Act of 1964, 42 U.S.C. 2000e et seq. or any regulations promulgated thereunder.

3.2 Purpose

The purpose of this Policy is to define, prevent, and respond to Sexual Misconduct, and Sexual Harassment as defined in 34 C.F.R. Part 106, and achieve compliance with Title IX of the Education Amendments of 1972 (20 U.S.C. §§ 1681-1688) and associated regulations, as well as applicable New Hampshire state law.

3.3 Policy Statement

It is the policy of Southern New Hampshire University to prohibit all forms of Sexual Misconduct and Sexual Harassment or Retaliation within the Scope of this Policy. The University will respond to Notice of allegations of Sexual Misconduct and Sexual Harassment or Retaliation in accordance with the appropriate procedures set forth below.

The University does not discriminate on the basis of sex in any education program or activity, and is prohibited from doing so by Title IX. This requirement not to discriminate extends to both admission and employment at the University.

3.4 Prohibited Sexual Harassment

The Department of Education's Office for Civil Rights (OCR), the Equal Employment Opportunity Commission (EEOC), and the State of New Hampshire regard Sexual Harassment, a specific form of discriminatory harassment, as an unlawful discriminatory practice. As stated above, Sexual Harassment is prohibited by this Policy.

The University has adopted the following definition of Sexual Harassment in order to address the unique environment of an academic community, which consists not only of employer and employees, but of students as well. Acts of Sexual Harassment can be committed by any person upon any other person, regardless of the sex, sexual orientation, and/or

Online Programs

gender identity of those involved.

Sexual Harassment, as an umbrella category, includes the offenses of Sexual Harassment, sexual assault, domestic violence, dating violence, and stalking*, and is defined as:

conduct on the basis of sex that satisfies one or more of the following:

- I. An employee of the University conditioning the provision of an aid, benefit, or service of the University on an individual's participation in unwelcome sexual conduct (often referred to as "quid pro quo");
- II. Unwelcome conduct determined by a reasonable person to be so severe, pervasive, and objectively offensive that it effectively denies a person equal access to the University's education program or activity; or
- III. Sexual assault, defined as:
 - A. **Sex Offenses, Forcible:** Any sexual act directed against another person, without the Consent of the victim, including instances in which the victim is incapable of giving Consent.
 - B. **Rape:** penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the Consent of the victim. Attempts or assaults to commit rape are also included; however, statutory rape and incest are excluded (each defined separately below).
 - C. **Forcible Sodomy:** Oral or anal sexual intercourse with another person, forcibly, and/or against that person's will (non-consensually), or not forcibly or against the person's will in instances in which the Complainant is incapable of giving Consent because of age or because of temporary or permanent mental or physical incapacity.
 - D. **Sexual Assault with an Object:** To use an object or instrument to unlawfully penetrate, however slightly, the genital or anal opening of the body of another person, forcibly and/or against that person's will or not forcibly or against the person's will in instances where the victim is incapable of giving Consent because of his/her youth or because of his/her temporary or permanent mental or physical incapacity.
 - E. **Forcible Fondling:** The touching of the private body parts of another person for the purpose of sexual gratification, forcibly and/or against that person's will or not forcibly or against the person's will in instances where the victim is incapable of giving Consent because of his/her youth or because of his/her temporary or permanent mental or physical incapacity.
 - F. **Sex Offenses, Non-forcible:**
 - i. **Incest:** Non-forcible sexual intercourse, between persons who are related to each other, within the degrees wherein marriage is prohibited by law.
 - ii. **Statutory Rape:** Non-forcible sexual intercourse, with a person who is under the statutory age of Consent.
 - G. **Dating Violence,** defined as: violence committed by a person—
 - i. who is or has been in a social relationship of a romantic or intimate nature with the victim; and
 - ii. where the existence of such a relationship shall be determined based on a consideration of the following factors:
 1. The length of the relationship;
 2. The type of relationship;
 3. The frequency of interaction between the persons involved in the relationship.
 - H. **Domestic Violence,** defined as: violence, on the basis of sex, committed by a current or former spouse or intimate partner of the Complainant, by a person with whom the Complainant shares a child in common, or by a person who is cohabitating with, or has cohabitated with, the Complainant as a spouse or intimate partner, or by a person similarly situated to a spouse of the Complainant under the domestic or family violence laws of New Hampshire, or by any other person against an adult or youth Complainant who is protected from that person's acts under the domestic or family violence laws of New Hampshire.
 - I. **Stalking,** defined as: engaging in a course of conduct, on the basis of sex, directed at a specific person, that
 - i. would cause a reasonable person to fear for the person's safety, or
 - ii. the safety of others; or
 - iii. suffer substantial emotional distress.

The University reserves the right to impose any level of Sanction, ranging from a reprimand up to and including suspension or expulsion/termination, for any offense under this Policy.

*The New Hampshire state law definitions of "Consent," "Domestic Violence," "Dating Violence," "Sexual Assault," and "Stalking" differ in some ways from the federal definitions listed here. SNHU will provide the state law definitions as part of its education programs for students (as required by the Clery Act) but definitions applied for purposes of this Policy will be the federal definitions provided here, as required by Title IX.

3.5 Force, Coercion, Consent, and Incapacitation

As used in this Policy and the offenses above, the following definitions apply:

- I. **Force:** Force is the use of physical violence and/or physical imposition to gain sexual access. Force also includes threats, intimidation (implied threats), and coercion that is intended to overcome resistance or produce Consent.

Sexual activity that is forced is, by definition, non-consensual, but non-consensual sexual activity is not necessarily forced. Silence or the absence of resistance alone is not Consent. Consent is not defined by the absence of

Online Programs

resistance. While resistance is not required or necessary, it is a clear demonstration of non-Consent.

- II. **Coercion:** Coercion is unreasonable pressure for sexual activity. Coercive conduct differs from seductive conduct based on factors such as the type and/or extent of the pressure used to obtain Consent. Consent is the equal approval, given freely, willingly, and knowingly of each participant to desired sexual involvement. Consent is an affirmative, conscious decision –indicated clearly by words or actions–to engage in mutually accepted sexual contact. A person forced to engage in sexual contact by force, threat of force, or coercion has not Consented to contact. Coercion includes unreasonably pressuring another to engage in sexual activity. Lack of mutual Consent is the crucial factor in any Sexual Misconduct. Consent to some form of sexual activity does not necessarily constitute Consent to another form of sexual activity. Silence without demonstrating permission does not constitute Consent.

Consent is not valid when a person is incapacitated, or when an intellectual or other disability prevents a person from having the capacity to give Consent. A person is incapacitated if they lack the capacity to Consent to sexual activity because the person is asleep, unconscious, mentally and/or physically helpless, or otherwise unaware that sexual activity is occurring. Incapacitation is not necessarily the same as legal intoxication. Where alcohol or other drugs are involved, evaluating Incapacitation requires an assessment of how the consumption of alcohol and/or drugs affects a person's: decision-making ability; awareness of consequences; ability to make informed, rational judgments; capacity to appreciate the nature and quality of the act; or level of consciousness. The assessment is based on objectively and reasonably apparent indications of incapacitation when viewed from the perspective of a sober, reasonable person.

Under New Hampshire state Law, a person under thirteen years of age cannot Consent to any form of sexual contact. Individuals between the age of thirteen and sixteen cannot Consent to penetrative sexual activity. Individuals between the age of thirteen and sixteen cannot Consent to non-penetrative sexual activity with individuals who are more than five years older than they are. Individuals older than sixteen years of age can legally Consent to sexual activity.

3.6 Retaliation Prohibited

Retaliation in response to a protected activity is strictly prohibited by this Policy. Protected activity under this Policy includes reporting an incident that may implicate this Policy, participating in the grievance process, supporting a Complainant or Respondent, assisting in providing information relevant to an investigation, and/or acting in good faith to oppose conduct that constitutes a violation of this Policy.

Acts of alleged Retaliation should be reported immediately to the Title IX Coordinator and will be promptly investigated. The University is prepared to take appropriate steps to protect individuals who fear that they may be subjected to Retaliation.

Charges against an individual for code of conduct violations that do not involve sex discrimination or Sexual Harassment but arise out of the same facts or circumstances as a report or complaint of sex discrimination, or a report or complaint of Sexual Harassment, for the purpose of interfering with any right or privilege secured by Title IX, constitutes Retaliation.

Charging an individual with a code of conduct violation for making a materially false statement in bad faith in the course of a grievance proceeding under this policy and procedure does not constitute Retaliation, provided that a determination regarding responsibility, alone, is not sufficient to conclude that any Party has made a materially false statement in bad faith.

3.7 Right to Report

Any person may report sex discrimination, Sexual Misconduct, including Sexual Harassment or related Retaliation (whether or not the person reporting is the person alleged to be the victim of conduct that could constitute Sexual Misconduct or Sexual Harassment), in person, by mail, by telephone, or by electronic mail, using the contact information listed for the Title IX Coordinator, or to an Official with Authority, or by any other means that results in the Title IX Coordinator receiving the person's verbal or written report. Such a report may be made at any time (including during non-business hours) by using the telephone number or electronic mail address, or by mail to the office address listed for the Title IX Coordinator herein.

3.8 False Allegations and Evidence

Deliberately false and/or malicious accusations under this Policy, as opposed to allegations which, even if erroneous, are made in good faith, are a violation of this Policy, and a serious offense that will be subject to appropriate disciplinary action. Additionally, witnesses and Parties knowingly providing false evidence, tampering with or destroying evidence after being directed to preserve such evidence, or deliberately misleading an official conducting an investigation can be subject to discipline.

4. Role of the Title IX Coordinator 4.1 Role Overview

The University's designated Title IX Coordinator has the primary responsibility for coordinating the University's efforts related to the intake, investigation, resolution, and implementation of measures to stop, remediate, and prevent Sexual Misconduct, Sexual Harassment and Retaliation prohibited under this Policy. The University's Title IX Coordinator is also responsible to provide or facilitate ongoing training, consultation, and technical assistance on Title IX for all students, faculty and staff, and other community members including:

Online Programs

- I. regular training for faculty and staff outlining their rights and obligations under Title IX and this Policy, including the appropriate response to reports of Sexual Misconduct, the obligation to report Sexual Misconduct (as applicable), and the scope and availability of confidentiality;
- II. annual training for other Title IX staff, Investigators, Decision-Makers, and any person who facilitates an Informal Resolution process, on the definition of Sexual Misconduct and Sexual Harassment, the scope of the University's education program or activities, how to conduct an investigation and grievance process including hearings, appeals, and Informal Resolution processes, as applicable, and how to serve impartially, including by avoiding prejudgment of the facts at issue, conflicts of interest, and bias;
- III. annual training for Investigators on issues of relevance to create an investigative report that fairly summarizes relevant evidence;
- IV. regular training for Decision-Makers on any technology to be used at a live hearing and on issues of relevance of questions and evidence, including when questions and evidence about the Complainant's sexual predisposition or prior sexual behavior are not relevant;
- V. regular training for students outlining their rights under Title IX; including with respect to Sexual Harassment, the reporting process (including reports to local law enforcement and confidential reporting to counselors or advocates), the procedures used to process complaints, applicable student conduct code provisions relating to Sexual Misconduct and the consequences of violating those provisions, the role of alcohol and drugs in Sexual Misconduct, the effects of trauma, strategies and skills for bystander intervention, the offices or individuals with whom students can speak confidentially, the offices or individuals who can provide support services, the Required Reporter employees who must report incidents to the Title IX Coordinator, and Title IX's protections against Retaliation.

4.2 Website and Training Materials

The Title IX Coordinator is responsible to ensure that all training materials used to train the Title IX Team are made publicly available on the University's designated Title IX webpage, for a period of seven years from issuance.

4.3 Requests for Confidentiality

The Title IX Coordinator also evaluates requests for confidentiality, as outlined below, by those who report or complain about Sexual Misconduct or Sexual Harassment in the context of the University's responsibility to provide a safe and non-discriminatory environment for all member of its community.

4.4 Bystander Policy

The University encourages all community members to take reasonable and prudent actions to prevent or stop an act of Sexual Harassment. Taking action may include direct intervention where it is safe to do so, creating a distraction, calling law enforcement, or seeking assistance from a person in authority.

4.5 Amnesty Policy

- I. **Students:** Student Complainants, bystanders, or witnesses may have concerns about reporting Sexual Misconduct because of the University's drug or alcohol policy, or other policy violations. The University's primary concern is community safety. A Complainant shall not be subject to a disciplinary proceeding or Sanction for a violation of the University's code of conduct related to the incident unless a University official determines that the report was not made in good faith or that the violation was egregious.
- II. **Employees:** The University may, at its discretion, offer employee Parties and witnesses amnesty from policy violations (typically more minor policy violations) related to the facts and circumstances surrounding the incident.

5. Healthcare and Support Resources 5.1 Resources Available

Complainant has the option to seek treatment for injuries sustained during an incident of Sexual Misconduct, preventative treatment for sexually transmitted diseases, and other health services. A medical exam is also an important way for a health provider to properly collect and preserve evidence, which could later be used in a civil or criminal case. In cases where necessary, rape kits are also available at local emergency rooms.

5.2 Medical Treatment

Medical Treatment in the area of the Manchester/Hooksett campus include the following:

Elliot Hospital
4 Elliot Way, Manchester, NH 03013
(603) 669-5300

Catholic Medical Center (CMC)
100 McGregor St, Manchester, NH 03102
(603) 668-3545

Sexual Assault and Domestic Violence resources in New Hampshire and the Manchester area include:

New Hampshire Sexual Assault Hotline
1-800-277-5570

Online Programs

New Hampshire Domestic Violence Hotline 1-866-644-3574

5.3 Community Services

Services for survivors of sexual assault, domestic violence, stalking and Sexual Harassment are available through the NH Coalition Against Domestic and Sexual Violence, which is comprised of thirteen member programs throughout the state. A community member does not need to be in crisis to call. According to the Coalition's website, services are free, confidential, and available to everyone regardless of gender, age, health status (including HIV-positive), physical, mental or emotional ability, sexual orientation, gender identity/expression, socio-economic status, race, national origin, immigration status or religious or political affiliation.

Coalition member agencies serving the Manchester and Hooksett campus areas include:

Crisis Center of Central New Hampshire (CCCNH)
PO Box 1344, Concord, NH 03302-1344
Crisis Line: 1-866-841-6229
Office: 603-225-7376

YWCA Crisis Service
72 Concord Street, Manchester, NH 03101
Crisis Line: 603-668-2299
Manchester Office: 603-625-5785
www.ywcanh.org

Coalition agencies provide the following services:

- Support and information, available in person and through a 24-hour hotline
- Accompaniment, support, and advocacy at local hospitals, courts, and police departments
- Access to emergency shelter
- Peer Support Groups
- Assistance with protective/restraining orders and referrals to legal services
- Information and referrals to community programs
- Community and professional outreach and education.

5.4 Financial Assistance Resources

Community members who require medical assistance but have financial hardship or limited financial resources may qualify for financial assistance through the NH Health Access Network. The New Hampshire Health Access Network helps low-income residents of New Hampshire who have health insurance but need financial assistance to help cover out of pocket medical expenses such as deductibles, co-pays, and co-insurance.

The NH Health Access Network NH Health Access Network
125 Airport Road
Concord, NH 03301
(603) 225-0900
www.healthynh.com

5.5 On-Campus Resources

Basic non-emergency medical treatment, and counseling for on-campus students, are also available at the Campus Wellness Center, located in the Robert A. Freese Student Center. Students can access health services during normal business hours by walk-in and may reach the Wellness Center Counselors at 603-645-9679. Emergency counseling services are also available twenty-four hours a Day. During regular business hours, a student can speak with a counselor by contacting the Wellness Center staff. During nights, weekends and holidays, a student seeking emergency counseling can access services by calling the Wellness Center and selecting the appropriate option to speak with an after-hours counselor.

5.6 Resources for Online Students and Remote Employees

In addition, a list of counseling, health, mental health, victim advocacy, legal assistance, and other services available including crisis help lines can also be found on the COCE Wellness Center's [webpage](#). Students and remote employees located outside of New Hampshire can click the "Locate Resources in Your Area" link to be directed to crisis resources based on their location.

5.7 Resources for Employees

Full and half-time University employees have access to the Employee Assistance Program (EAP) offered through Anthem, which provides assessment and referral for a wide range of concerns facing employees.

To speak with a consultant please call 1-800-647-9151.

6. Reporting Sexual Misconduct, Sexual Harassment, and Retaliation 6.1 Reporting Policy

Online Programs

The University encourages community members to promptly report incidents of Sexual Harassment, Sexual Misconduct, or Retaliation immediately to the University using the process described below. Required Reporters must inform the Title IX Coordinator or any Official with Authority of incidents of Sexual Misconduct of which they are aware, as further detailed below. Any person may inform the Title IX Coordinator or other Official with Authority of an alleged violation of this policy, however only a Complainant or the Title IX Coordinator can sign a Formal Complaint.

6.2 Reporting Process

Concerns of a violation of this Policy or seeking supportive measures may be made using the intake forms designated here:

- **University College** – Campus Students may file a report in one of two ways. First by filing a report in person at the Office of Public Safety or by filing an online [Incident Form](#).
- **College of Online and Continuing Education** – Online Students may file an online [Student Dispute Form](#) through the Office of Dispute Resolution and Student Conduct.
- **University Employees** may contact their Human Resources Business Partner or submit a [Complaint Notification Form](#).

Those wishing to engage the Formal Grievance Process for Sexual Harassment and/or Retaliation may file a Formal Complaint with the Title IX Coordinator or any Official with Authority. Such a report may be made at any time (including during non-business hours) by using the email or postal office address(es) listed for the Title IX Coordinator and/or any other official listed/designated below.

A Formal Complaint means a document filed/signed by the Complainant or signed by the Title IX Coordinator alleging a policy violation by a Respondent and requesting that the University investigate the allegation(s). A complaint may be filed with the Title IX Coordinator in person, by mail, or by electronic mail, by using the contact information set forth below, or as described in this section. As used in this paragraph, the phrase "document filed by a Complainant" means a document or electronic submission (such as by electronic mail or through an online portal provided for this purpose by the University) that contains the Complainant's physical or digital signature, or otherwise indicates that the Complainant is the person filing the complaint.

If Notice is submitted in a form that does not meet this standard, the Title IX Coordinator will contact the Complainant to ensure that it is filed correctly.

6.3 Anonymous Reports:

Reports that are submitted anonymously limit the ability of the University to respond in a formal manner. The privacy of those submitting bias reports will be maintained to the extent possible. Therefore, persons are strongly encouraged to identify themselves when submitting reports and participate in the investigation and response process.

6.4 Contact Information for Reporting:

Complaints or Notice of alleged Sexual Misconduct, including Sexual Harassment, Retaliation, other policy violations, or inquiries about or concerns regarding this policy and procedures, may be made internally to the University's Title IX Coordinator:

- Kristin Scaduto, Title IX Coordinator, can be reached on the University's main campus at 2500 North River Road, Manchester NH, by telephone at 603-644-3188, or by email at K.Scaduto@snhu.edu.

The following Deputy Title IX Coordinator(s) have also been designated as Officials with Authority and may also accept Notice or complaints on behalf of the University:

- Michael Graskemper is the Director of Dispute Resolution for the College of Continuing and Online Education (COCE) and is also the Deputy Title IX Coordinator for COCE. He can be reached at 603-314-7647, or at M.Graskemper@snhu.edu.

The following additional personnel are also identified as Officials with Authority by the University:

- All athletics coaches and athletic directors, including assistant directors.
- Residence life personnel (not including student employees)
- Dean of Students, Academic Deans & Office of Vice President of Academic Affairs
- President and CEO
- Chief Operating Officer
- Executive Vice President, Human Resources

6.5 Reporting to the Police

Complainants are also encouraged to consider reporting Sexual Misconduct that constitutes a crime, or any other related crime, to law enforcement authorities. Complainants may also wish to pursue a criminal or civil restraining order from a local court. However, Complainants have a right to choose not to file a report with law enforcement or seek a restraining order. The decision to file a criminal complaint or seek a court order is a deeply personal choice. Complainants often make this decision based on the circumstances surrounding the incident and the circumstances in their life at the time of the incident. Complainants must also understand that SNHU Public Safety is not a police force, and a report to Public Safety is

Online Programs

not equivalent to filing a police report.

Upon reporting an incident to the Title IX Coordinator (or other Official with Authority), Complainants will have the opportunity, if they choose, to speak with appropriate local law enforcement personnel to make the report. Confidential Resource Advisors can also assist with this process. Complainants do not need to file a criminal complaint with law enforcement in order to initiate a grievance with the University, and the University may find a Respondent responsible for violating this Policy regardless of the status or outcome of any criminal proceedings. Absent extenuating circumstances, the University will not unduly delay its grievance process to await the completion of any criminal proceeding or investigation, unless required to do so by valid court order.

In the case of an ongoing emergency, dial 911. Non-emergency contact information for local police in the Manchester area for non-emergency reporting is as follows:

Hooksett Police Department

15 Legends Dr.
Hooksett, NH 03106
(603) 624-1560

Manchester Police Department

405 Valley Street
Manchester, NH 03106
(603) 668-8711

6.6 Employee Reporting Obligation

The University takes the position that all employees except those with a legal duty of confidentiality (e.g. a licensed counselor, doctor, or nurse) or Confidential Resource Advisors, are Required Reporters. With respect to students who are also employed by the University, only those working in the office of Residence Life (RDs, CAs, RAs), Graduate Teaching Assistants or Instructors, and those student employees with similar significant responsibility for student welfare are Required Reporters under this Policy.

A Required Reporter who witnesses or has Notice of Sexual Misconduct, Sexual Harassment, or Retaliation against a student must immediately contact the Title IX Coordinator to make a report to allow the University to respond appropriately. A failure by a Required Reporter to report a violation of this Policy may warrant disciplinary action up to and including termination.

This reporting obligation does not apply for any employee who has themselves been an alleged victim of Sexual Misconduct, Sexual Harassment, or Retaliation, with respect to the specific conduct or incident(s) affecting them.

6.7 Additional Reporting Resources

A student or applicant who believes that he or she has been discriminated against can also file a Charge of Discrimination with the U.S. Department of Education Office for Civil Rights.

The Regional Office serving New Hampshire can be contacted at:

6.8 Timing of Complaints

There is no time limit for filing a complaint or providing Notice under this Policy. However, if the Respondent is no longer subject to University's jurisdiction and/or significant time has passed, the University's ability to investigate, respond, and provide Remedies may be limited or impossible. Complainants are therefore strongly encouraged to file complaints in a timely manner to maximize the University's ability to promptly gather evidence, and conduct a thorough, impartial, and reliable investigation. If the Respondent is expected to graduate or complete a program during the pendency of the process, the University may temporarily withhold that student's Southern New Hampshire University degree, certificate, or other terminal credential, pending conclusion of the complaint Resolution procedures.

Online Programs

6.9 Independence and Conflict of Interest

- I. The Title IX Coordinator is responsible for oversight of the Title IX Team, and acts with independence and authority free from bias and conflicts of interest. The Title IX Coordinator ultimately oversees all outcomes and Resolutions under this Policy and these procedures. The members of the Title IX Team are vetted and trained to ensure they are not biased for or against any Party in a specific case, or for or against Complainants and/or Respondents, generally. Reports of misconduct or discrimination committed by any other Title IX Team member should be reported to the Title IX Coordinator.
- II. To raise any concern involving bias or conflict of interest, or misconduct or discrimination committed by the Title IX Coordinator, contact the University's Chief of Staff, Donald Brezinski, by phone at (603) 644-3109, or email at d.brezinski@snhu.edu. The Chief of Staff may also coordinate with the Human Resources department regarding review and resolution of such concerns. Concerns of bias or a potential conflict of interest by any other Title IX Team member should be raised with the Title IX Coordinator.

7. Privacy and Confidentiality 7.1 Disambiguation

Cases involving alleged Sexual Harassment demand special attention to issues of privacy and confidentiality. For the purpose of this Policy, privacy and confidentiality have distinct meanings.

- I. **Privacy:** Privacy means that information related to a Formal Complaint will be shared with a limited number of University employees who "need to know" in order to assist in the assessment, investigation, and Resolution of the report, as well as the Parties and their Advisors. All employees who are involved in the University's response to Notice under this policy receive specific training and guidance about sharing and safeguarding private information in accordance with state and federal law. The privacy of student education records will be protected in accordance with the Family Educational Rights and Privacy Act ("FERPA"), as outlined in the University's FERPA policy, except where limited or superseded by the applicable Title IX regulations (found at 34 C.F.R. Part 106). The University reserves the right to designate which University officials have a legitimate educational interest in being informed about incidents that are subject to this Policy, consistent with FERPA. The privacy of employee records will be protected in accordance with Human Resources policies, except where limited by applicable law.

However, privacy in this context has limits:all Complainants must understand that the following receipt of a Formal Complaint of Sexual Harassment, the University is legally required to provide prompt written notice to all known Parties to the complaint of the following information:

- identities of Parties involved, if known
- conduct alleged to constitute Sexual Harassment
- date and location of incident(s)
- Notice of any additional allegations added after the initial notice to the known Parties

As further detailed below, known Parties are also entitled to receive certain evidence gathered during the investigation process that is directly related to the Formal Complaint.

The University will keep any supportive measures provided to any Complainant or Respondent private, to the extent that maintaining such privacy would not impair the ability to provide such measures.

The University may also by necessity contact parents/guardians or third-parties to inform them of situations in which there is a significant and articulable health and/or safety risk, but will usually consult with the student first before doing so.

7.2 Confidentiality

For purposes of this Policy, Confidentiality should be understood in the context of laws that protect certain relationships, including those who provide services related to medical and clinical care, mental health providers, counselors, ordained clergy, and some sexual assault or domestic violence counselors. The law (which varies by state) creates a privilege between certain health care providers, mental health care providers, attorneys, clergy, spouses, and others, with their patients, clients, parishioners, and spouses. The University has designated individuals who are able to have legally privileged communications as Confidential Professionals who are exempt from Required Reporter responsibilities. All other employees of the University are Required Reporters who must inform the Title IX Coordinator or other Official with Authority of any incidents subject to this policy.

When information is shared by a Complainant with a Confidential Professional, that person cannot reveal the information to any third party except when an applicable law or a court order requires or permits disclosure of such information.

All Confidential Professionals may be required or permitted to break confidentiality by law in certain circumstances, as more fully described in "Exceptions to Confidentiality," below.

Confidential Professionals will not inform the University's Title IX Coordinator of an incident, unless a Complainant directs them to do so, but can still assist the Complainant in receiving other necessary protection and support, such as academic support or accommodations, disability, health or mental health services. As a practical matter, the full availability of some of these services may be limited in certain circumstances by a victim's desire for confidentiality and level of cooperation.

A Complainant who at first requests confidentiality from a Confidential Professional may later decide to file a Formal

Online Programs

Complaint with the University.

7.3 Confidential Professionals

I. **Professional and Pastoral Counselors**

SNHU can provide campus-based students with professional, licensed counselors who provide mental-health counseling to members of the school community (and including those who act in that role under the supervision of a licensed counselor). SNHU Wellness counselors can be reached at 603-645-9679. Pastoral counselors may also be available to speak to campus-based students through Campus Ministry, which can be reached at 603-645-9608 or by referral at the Wellness Center.

These counselors are not required to report any identifying information about an incident to the Title IX Coordinator without a Complainant's permission. A counselor may collect and eventually report some general, non-identifying data that will not lead to an investigation, such as the date of the report, date of the crime, and general location as part of the University's crime data reporting responsibility. A member of the community wishing to speak with a professional, licensed counselor can request to do so through the on-campus Wellness Center.

Emergency services are available 24 hours a Day. Students can access services during normal business hours by calling 603-645-9679. During nights, weekends and holidays, a student can access services by contacting Public Safety at 603-645-9700 who will notify a counselor on call.

Employees and students in the College of Online and Continuing Education (COCE), and other non-campus based students can also log on to the Wellness HelpU Program [site](#) and find a list of available professional counseling resources in their state.

Employees also have access to the Employee Assistance Program (EAP) offered through Anthem, which can be reached at 1-800-647-9151.

II. **Registered Nurses**

In addition to counseling services, the campus Wellness Center is staffed by Advanced Practice Registered Nurse(s) (APRN) and licensed registered nurse(s). New Hampshire law (RSA 326-B) provides that confidential communications made to a nurse by a patient are entitled to the same privilege as those between a physician and a patient. As a result, a nurse in the Wellness Center is not required to reveal any details of an incident to the Title IX Coordinator. As with a professional counselor, a nurse may collect and eventually report some general, non-identifying data that will not lead to an investigation, such as the date of the report, date of the crime, and general location as part of the University's crime data reporting responsibility.

III. **Confidential Resource Advisors**

As required by New Hampshire state law, the University has also designated Confidential Resource Advisors, who shall not be Required Reporters, and who shall be permitted to assist students in a confidential manner and provide appropriate resources and information, and assist any student with the reporting process, if desired.

For purposes of this Policy, all University-appointed and trained Advisors within the Grievance Process Pool are designated as Confidential Resource Advisors. Advisors selected by parties from outside the Grievance Process Pool may not be designated as Confidential Resource Advisors as they may not have been trained or vetted by the University.

While communications between Advisors and their advisees are considered private as to the University and its personnel, Parties should be aware that legal privilege for communications made to Confidential Resource Advisors under New Hampshire law applies only to communications between victims of alleged sexual assault, alleged domestic abuse, alleged sexual harassment, or alleged stalking, and a Confidential Resource Advisor in the course of that relationship and in confidence. Therefore, communications made between a Respondent and their Advisor would typically be private as to the University, but may not be legally privileged communications under New Hampshire state law.

The University may from time to time designate other employees or categories of employees as Confidential Resource Advisors, and may also from time to time enter into Memoranda of Understanding with outside local, state, or national agencies to provide third-party Confidential Resource Advisors to Parties.

7.4 Exceptions to Confidentiality:

While these professional counselors and nurses may maintain a victim's confidentiality vis-à-vis the University, they (and other University personnel) may have mandatory reporting or other obligations under state or federal law. For example, New Hampshire has a mandated reporter law for when a person "has reasons to suspect that a child has been abused or neglected" (R.S.A. §169-C:29), which requires timely disclosure to the N.H. Department of Health and Human Services if the victim is under eighteen years of age. A similar reporting law applies to incapacitated and elderly adults. (RSA 161-F:46). New Hampshire also has an anti-hazing statute that requires that any person who is present or otherwise has direct knowledge of any student hazing must report the hazing to law enforcement or educational institution authorities. (RSA 631:7).

Likewise, behavior that poses a serious threat of harm to self or others, or receipt of a court order or a subpoena under

Online Programs

certain circumstances can trigger a duty to timely disclose confidential information, irrespective of the categories above.

Also, if the University determines that the alleged perpetrator(s) poses a serious and immediate threat to the University community, Campus Safety may be called upon to issue a timely warning to the community as required by federal law. Any such warning should not include any information that identifies the Complainant.

8. Supportive Measures and Emergency Removal 8.1 Supportive Measures

The University will offer and implement appropriate and reasonable supportive measures to the Parties upon Notice of alleged Sexual Misconduct, including Sexual Harassment, and/or Retaliation.

Supportive measures are non-disciplinary, non-punitive individualized services offered as appropriate, as reasonably available, and without fee or charge to the Parties to restore or preserve access to the University's education program or activity, including measures designed to protect the safety of all Parties or the University's educational environment, and/or deter further harassment, discrimination, and/or Retaliation.

The Title IX Coordinator promptly makes supportive measures available to the Parties upon receiving Notice or a complaint. At the time that supportive measures are offered, the University will inform the Complainant, in writing, that they may file a Formal Complaint with the University either at that time or in the future, if they have not done so already. The Title IX Coordinator works with the Complainant to ensure that their wishes are reasonably considered with respect to the supportive measures that are planned and implemented, including with respect to privacy.

The University will maintain the privacy of the supportive measures, solely to the extent that privacy does not impair the University's ability to provide the supportive measures. The University will seek to ensure as minimal an academic impact on the Parties as reasonably possible. The University will implement measures in a way that does not unreasonably burden the other Party.

Supportive measures may include, but are not limited to:

- A. Referral to counseling, medical, and/or other healthcare services
- B. Referral to the Employee Assistance Program
- C. Referral to community-based service providers
- D. Student financial aid counseling
- E. Education to the community or community subgroup(s)
- F. Altering campus housing assignment(s)
- G. Altering work arrangements for employees or student-employees
- H. Safety planning
- I. Implementing contact limitations (restricted contact orders) between the Parties
- J. Academic support, extensions of deadlines, or other course/program-related adjustments
- K. Timely warnings
- L. Class schedule modifications, withdrawals,
- M. Leaves of absence
- N. Increased security and monitoring of certain areas of the campus
- O. Any other actions deemed appropriate by the Title IX Coordinator

Violations of restricted contact orders will be referred to appropriate student or employee conduct processes for enforcement.

8.2 Emergency Removals and Administrative Leaves

I. Emergency Removals

The University can act to remove a Respondent entirely or partially from its education program or activities on an emergency basis when an individualized safety and risk analysis has determined that an immediate threat to the physical health or safety of any student or other individual justifies removal. This risk analysis is performed by the Title IX Coordinator in conjunction with the Public Safety Team, using objective violence risk assessment procedures.

In all cases in which an emergency removal is imposed, the student, employee, or two (2) representatives from a student organization will be given notice of the action and the option to request to meet with the Title IX Coordinator prior to such action/removal being imposed, or as soon thereafter as reasonably possible, to show cause why the action/removal should not be implemented or should be modified. This meeting will be conducted remotely using electronic video conferencing technology whenever possible.

This meeting is not a hearing on the merits of the allegation(s), but rather is an administrative process intended to determine solely whether the emergency removal is appropriate. When this meeting is not requested in a timely manner, objections to the emergency removal will be deemed waived. This section also applies to any restrictions that a coach or athletic administrator may place on a student-athlete arising from allegations related to Title IX. There is no appeal process for emergency removal decisions.

A Respondent may be accompanied by an Advisor of their choice when meeting with the Title IX Coordinator for the show cause meeting. The Respondent will be given access to a written summary of the basis for the emergency

Online Programs

removal prior to the meeting to allow for adequate preparation.

The Title IX Coordinator has sole discretion under this policy to implement or stay an emergency removal and to determine the conditions and duration. Violation of an emergency removal under this policy will be grounds for discipline, which may include expulsion or termination.

The University will implement the least restrictive emergency actions reasonably possible in light of the circumstances and safety concerns. As determined by the Title IX Coordinator, these actions could include, but are not limited to: removing a student from a residence hall, temporarily re-assigning an employee (in consultation with Human Resources), restricting a student's or employee's access to or use of facilities or equipment, allowing a student to withdraw or take grades of incomplete without financial penalty, authorizing an administrative leave, and suspending a student's participation in extracurricular activities, student employment, student organizational leadership, or intercollegiate/intramural athletics.

At the discretion of the Title IX Coordinator, alternative coursework options may be pursued to ensure as minimal an academic impact as possible on the Parties.

II. **Administrative Leaves**

The University reserves its right to place an employee on administrative leave during the pendency of a grievance related to alleged Sexual Misconduct, Sexual Harassment, or Retaliation, in accordance with existing HR policy and procedures. No Appeal of an administrative leave is provided pursuant to this Policy.

8.3 Grievance Procedures:

The University will apply one of two grievance procedures based on the specific conduct alleged. As further described in Sections 9 and 10 of this Policy, these procedures largely mirror one-another, with important exceptions. For purposes of both Grievance Procedures, the Respondent is presumed not responsible for the reported misconduct unless and until a Final Determination is made at the conclusion of the applicable grievance process that the Respondent is responsible. The burden of proof is on the University, and not on either Party.

- I. The Title IX Sexual Harassment Grievance Procedures set forth in Section 9 apply only to qualifying allegations of Sexual Harassment (including sexual assault, dating violence, domestic violence, and stalking, as defined above) as defined in this Policy.

The Sexual Harassment Grievance Procedures may be used to address collateral misconduct only if it is determined to be arising from the investigation of or occurring in conjunction with reported Sexual Harassment (e.g., Retaliation, vandalism, physical abuse of another).

- II. The Institutional Sexual Misconduct Grievance Procedures set forth in Section 10 to apply to Sexual Misconduct that does not constitute Sexual Harassment within the definitions and/or jurisdiction of the Title IX regulations. Complaints that are dismissed from the Sexual Harassment Grievance Procedures may (and often are) referred to be processed under the Institutional Sexual Misconduct Grievance Procedures, including for Sexual Harassment that does not meet the jurisdictional requirements of Title IX.

8.4 Other Policies and Procedures:

All other allegations of discrimination on the basis of a protected class (excluding Sexual Misconduct) will be referred to the [University's Discrimination Complaint Protocol](#), except that complaints of disability discrimination will be addressed under the [University's ADA/504 Grievance Procedure](#). Other incidents may be addressed through procedures elaborated in the student, faculty, and staff handbooks, or other applicable policies or procedures.

8.5 Timeframe for Response & Grievance Process

The University will conduct a timely review of complaints processed under either grievance process. Absent extenuating circumstances, review and Resolution is expected to take place within sixty (60) to ninety (90) days from Notice or receipt of the Formal Complaint. Absent extenuating circumstances, decisions on appeals are typically issued within thirty (30) days of the date of receipt of the appeal.

8.6 Extensions

For purposes of complaints processed under either grievance process, all deadlines and time requirements in the grievance process may be extended for good cause as determined by the Title IX Coordinator or their designee. Both the Respondent and the Complainant will be notified in writing of the delay, the reason for delay, and provided the date of the new deadline or event. Extensions requested by one Party will ordinarily not be longer than 5 business/school days.

9. Title IX Sexual Harassment Grievance Process 9.1 Initial Assessment

Following receipt of Notice or a complaint of an alleged violation of this Policy, the Title IX Coordinator engages in an initial assessment, which is typically one to five days in duration. The steps in an initial assessment can include:

- I. If Notice is given, the Title IX Coordinator seeks to determine if the Complainant wishes to make a Formal Complaint, explains the process to do so, and provides assistance with filing, if desired.
- II. If a Formal Complaint is received, the Title IX Coordinator assesses its sufficiency and works with the Complainant to

Online Programs

make sure it is correctly completed.

- III. At the time of filing a Formal Complaint, a Complainant must be participating in or attempting to participate in the education program or activity of the University.
- IV. The Title IX Coordinator reaches out to the Complainant to assess and offer supportive measures, (which may also have already been offered or provided prior to the filing of a Formal Complaint).
- V. The Title IX Coordinator works with the Complainant to ensure they are aware of the right to have an Advisor.
 - A. If a Formal Complaint has not been filed, and the Complainant wishes only to pursue supportive measures, the Title IX Coordinator works with the Complainant to identify their wishes and then seeks to facilitate implementation of appropriate supportive measures.
 - B. If the Complainant does not wish to file a Formal Complaint after the Title IX Coordinator describes the process, discusses availability of supportive measures, and considers the Complainant's wishes, the Title IX Coordinator may in their discretion still initiate a Formal Complaint by signing it in lieu of the Complainant. The Title IX Coordinator may consider a variety of factors in making this assessment, including a pattern of alleged misconduct by the Respondent.
 - C. If the Title IX Coordinator does not sign a Formal Complaint, and an Informal Resolution option is preferred by Complainant, the Title IX Coordinator assesses whether the complaint is suitable for Informal Resolution, which informal mechanism may serve the situation best or is available, and seek to determine if the Respondent is also willing to engage in Informal Resolution. If so, each Party's voluntary written Consent is required to proceed with Informal Resolution.
 - D. If a Formal Grievance Process is preferred, the Title IX Coordinator determines if the misconduct alleged falls within the scope of Title IX Sexual Harassment and this procedure,
 1. If it does, the Title IX Coordinator will initiate the formal investigation and grievance process.
 2. If it does not, the Title IX Coordinator issues a determination that this procedure does not apply (and will "dismiss" that aspect of the complaint, if any), assesses which other University policies may apply, which resolution process is applicable, and will refer the matter accordingly. Dismissing a complaint under these Sexual Harassment Grievance Procedures is procedural, and does not limit the University's authority to address a complaint with other appropriate processes and Remedies. Complaints dismissed from the Sexual Harassment Grievance Procedures will often be referred to the Institutional Sexual Misconduct Grievance Procedures (Section 10) or other applicable University process for Resolution.

† If circumstances require, the Vice President of Student Affairs or Title IX Coordinator will designate another person to oversee the process below should an allegation be made about the Coordinator or the Coordinator be otherwise unavailable or unable to fulfill their duties.

‡ A Complainant who has graduated may still be "attempting to participate" in the University's education program or activity; for example, where the Complainant has graduated from one program but intends to apply to a different program, or where the graduated Complainant intends to remain involved with a recipient's alumni programs and activities. Similarly, a Complainant who is on a leave of absence may be "participating or attempting to participate" in the recipient's education program or activity; such a Complainant may still be enrolled as a student even while on leave of absence, or may intend to re-apply after a leave of absence and thus is still "attempting to participate".

9.2 Dismissal (Mandatory and Discretionary)

- I. The University must dismiss a Formal Complaint or any allegations therein if, at any time during the investigation or hearing, it is determined that:
 - A. The conduct alleged in the Formal Complaint would not constitute Sexual Harassment as defined in the Policy hereinabove, even if proved; and/or
 - B. The conduct did not occur in an educational program or activity controlled by the University (including buildings or property controlled by recognized student organizations), and/or the University does not have control of the Respondent; and/or
 - C. The conduct did not occur against a person in the United States.
- II. The University may dismiss a Formal Complaint or any allegations therein if, at any time during the investigation or hearing:
 - A. A Complainant notifies the Title IX Coordinator in writing that the Complainant would like to withdraw the Formal Complaint or any allegations therein; or
 - B. The Respondent is no longer enrolled in or employed by the University; or
 - C. Specific circumstances prevent the University from gathering evidence sufficient to reach a determination as to the Formal Complaint or allegations therein.

Upon any dismissal, the University will promptly send written notice of the dismissal and the rationale for doing so simultaneously to the Parties.

This dismissal decision is appealable by any Party under the procedures for appeal below. A Complainant who decides to withdraw a complaint may later request to reinstate it or refile it.

9.3 Counterclaims

The University is obligated to ensure that the grievance process is not abused for retaliatory purposes. The University permits the filing of counterclaims but uses an initial assessment, described above, to assess whether the allegations in

Online Programs

the counterclaim are made in good faith. Counterclaims made with retaliatory intent will not be permitted.

Counterclaims determined to have been reported in good faith will be processed using the grievance procedures below. Investigation of such claims may take place after Resolution of the underlying initial allegation, in which case a delay may occur.

Counterclaims may also be resolved through the same investigation as the underlying allegation, at the discretion of the Title IX Coordinator. When counterclaims are not made in good faith, they will be considered retaliatory and may constitute a violation of this policy.

9.4 Right to an Advisor

The Parties may each have one Advisor of their choice present with them for all meetings and interviews within the Resolution process, if they so choose. The Parties may select whomever they wish to serve as their Advisor as long as the Advisor is eligible and available. §

Choosing an Advisor who is also a witness in the process creates potential for bias and conflict-of-interest. A Party who chooses an Advisor who is also a witness can anticipate that issues of potential bias will be explored by the hearing Decision-maker(s).

I. **Who Can Serve as an Advisor**

The Advisor may be a friend, mentor, family member, attorney, or any other individual a Party chooses to advise, support, and/or consult with them throughout the Resolution process. The Parties may choose Advisors from inside or outside of the University community.

The Title IX Coordinator will also offer to assign a trained Advisor for any Party if the Party so chooses. If the Parties choose an Advisor from the pool available from the University, the Advisor will be trained by the University and be familiar with the University's Resolution process, and will have been designated as a Confidential Resource Advisor under New Hampshire law.

If the Parties choose an Advisor from outside the pool of those identified by the University, the Advisor may not have been trained by the University and may not be familiar with the University policies and procedures.

Parties also have the right to choose not to have an Advisor in the initial stages of the Resolution process, prior to a hearing.

II. **Advisors in Hearings/The University-Appointed Advisor**

Under U.S. Department of Education regulations applicable to Title IX, cross-examination is required during the hearing, but must be conducted by the Parties' Advisors. The Parties are not permitted to directly cross-examine each other or any witnesses. If a Party does not have an Advisor for a hearing, the University will appoint a trained Advisor for the limited purpose of conducting any cross-examination.

A Party may reject this appointment and choose their own Advisor, but they may not proceed without an Advisor. If the Party's Advisor will not conduct cross-examination, the University will appoint an Advisor who will do so thoroughly, regardless of the participation or non-participation of the advised Party in the hearing itself. Questioning of the Parties and witnesses will also be conducted by the Decision-maker(s) during the hearing.

III. **Advisor's Role**

The Parties may be accompanied by their Advisor in all meetings and interviews at which the Party is entitled to be present, including intake and interviews. Advisors should help the Parties prepare for each meeting and are expected to advise ethically, with integrity, and in good faith.

The University cannot guarantee equal Advisory rights, meaning that if one Party selects an Advisor who is an attorney, but the other Party does not or cannot afford an attorney, the University is not obligated to provide an attorney.

IV. **Advisor Violations of University Policy**

All Advisors are subject to the same University policies and procedures, whether they are attorneys or not. Advisors are expected to advise their advisees without disrupting proceedings. Advisors should not address University officials in a meeting or interview unless invited to (e.g., asking procedural questions). The Advisor may not make a presentation or directly represent their advisee during any meeting or proceeding and may not speak on behalf of the advisee to the Investigator(s) or other Decision-maker(s) except during a hearing proceeding, during cross-examination, or as otherwise specifically permitted by this Policy.

The Parties are expected to ask and respond to questions on their own behalf throughout the investigation phase of the Resolution process. Although the Advisor generally may not speak on behalf of their advisee, the Advisor may consult with their advisee, either privately as needed, or by conferring or passing notes during any Resolution process meeting or interview. For longer or more involved discussions, the Parties and their Advisors should ask for breaks to allow for private consultation.

Any Advisor who oversteps their role as defined by this policy will be warned only once. If the Advisor continues to disrupt or otherwise fails to respect the limits of the Advisor role, the meeting will be ended, or other appropriate measures implemented. Subsequently, the Title IX Coordinator will determine how to address the Advisor's non-

Online Programs

compliance and future role.

V. **Sharing Information with the Advisor**

The University expects that the Parties may wish to have the University share documentation and evidence related to the allegations with their Advisors. Parties may share this information directly with their Advisor if they wish. Doing so may help the Parties participate more meaningfully in the Resolution process.

The University also provides a Consent form that authorizes the University to share such information directly with their Advisor. The Parties must either complete and submit this form to the Title IX Coordinator or provide similar documentation demonstrating Consent to a release of information to the Advisor before the University is able to share records with an Advisor.

VI. **Privacy of Records Shared with Advisor**

Advisors are expected to maintain the privacy of the records shared with them, except where their advisees provide express permission to share private information.

VII. **Expectations of an Advisor**

The University generally expects an Advisor to adjust their schedule to allow them to attend University meetings when planned, but may change scheduled meetings to accommodate an Advisor's inability to attend, if doing so does not cause an unreasonable delay.

The University may also make reasonable provisions to allow an Advisor who cannot attend in person to attend a meeting by telephone, video conferencing, or other similar technologies as may be convenient and available.

VIII. **Expectations of the Parties with Respect to Advisors**

A Party may elect to change Advisors during the process and is not obligated to use the same Advisor throughout. The Parties are expected to inform the Investigator(s) of the identity of their Advisor at least two (2) business days before the date of their first meeting with Investigators (or as soon as possible if a more expeditious meeting is necessary or desired).

The Parties are expected to provide timely notice to the Title IX Coordinator if they change Advisors at any time. It is assumed that if a Party changes Advisors, Consent to share information with the previous Advisor is terminated, and a release for the new Advisor must be secured. Parties are expected to inform the Title IX Coordinator of the identity of their hearing Advisor at least two (2) business days before the hearing.

§ "Available" means the Party cannot insist on an Advisor who simply doesn't have inclination, time, or availability. Also, the Advisor cannot have institutionally conflicting roles, such as being a Title IX administrator who has an active role in the matter, or a supervisor who must monitor and implement sanctions.

9.5 Resolution Processes

Resolution proceedings are private. All persons present at any time during the Resolution process are expected to maintain the privacy of the proceedings in accordance with this Policy. While there is an expectation of privacy around what Investigators share with Parties during interviews, the Parties have discretion to share their own knowledge and evidence with others if they so choose. The University encourages Parties to discuss this with their Advisors before doing so.

I. **Informal Resolution Options**

Informal Resolution can include three different approaches:

- A. When the Parties agree to resolve the matter through an offered alternate resolution mechanism including mediation, restorative practices, etc.;
- B. When the Respondent accepts responsibility for violating policy, and desires to accept a Sanction and end the resolution process; or
- C. When the Title IX Coordinator can resolve the matter informally by providing supportive measures to remedy the situation.

To initiate Informal Resolution, a Complainant needs to submit a Formal Complaint, as defined above. If a Respondent wishes to initiate Informal Resolution, they should contact the Title IX Coordinator to so indicate.

It is not necessary to pursue Informal Resolution first in order to pursue a Formal Grievance Process, and any Party participating in Informal Resolution can stop the process at any time and begin or resume the Formal Grievance Process.

Prior to implementing Informal Resolution, the University will provide the Parties with written notice of the reported misconduct and any Sanctions or measures that may result from participating in such a process, including information regarding any records that will be maintained or shared by the University.

The University will obtain voluntary, written confirmation that all Parties wish to resolve the matter through Informal Resolution before proceeding and will not pressure the Parties to participate in Informal Resolution. Informal resolution is never appropriate or available for allegations that an employee sexually harassed a student.

II. **Alternate Resolution**

Alternate Resolution is an informal process, including mediation or restorative practices, etc. by which a mutually agreed upon Resolution of an allegation is reached. All Parties must Consent in writing to the use of Alternate Resolution.

Online Programs

The Title IX Coordinator may look to the following factors to assess whether Alternate Resolution is appropriate, or which form of Alternate Resolution may be most successful for the Parties:

- A. The Parties' amenability to Alternate Resolution;
- B. Likelihood of potential Resolution, taking into account any power dynamics between the Parties;
- C. The Parties' motivation to participate;
- D. Civility of the Parties;
- E. Whether an emergency removal is needed;
- F. Skill of the Alternate Resolution facilitator with this type of complaint;
- G. Complaint complexity;
- H. Emotional investment of the Parties;
- I. Rationality of the Parties;
- J. Goals of the Parties;
- K. Adequate resources to invest in Alternate Resolution (time, staff, etc.)

The ultimate determination of whether Alternate Resolution is available (with Consent of the parties) or successful is to be made by the Title IX Coordinator. The Title IX Coordinator maintains records of any Resolution that is reached, and failure to abide by the Resolution agreement may result in appropriate responsive/disciplinary actions. Results of complaints resolved by Informal Resolution or Alternate Resolution are not appealable after a Resolution agreement has been signed.

III. **Respondent Accepts Responsibility for Alleged Violations**

The Respondent may accept responsibility for all or part of the alleged policy violations at any point during the Resolution process. If the Respondent indicates an intent to accept responsibility for all of the alleged misconduct, the formal process will be paused, and the Title IX Coordinator will determine whether Informal Resolution can be used according to the criteria in that section above.

If Informal Resolution is applicable, the Title IX Coordinator will determine whether all Parties and the University are able to agree on responsibility, Sanctions, and/or Remedies. If so, the Title IX Coordinator implements the accepted Finding that the Respondent is in violation of The University policy and implements agreed-upon Sanctions and/or Remedies, in coordination with other appropriate administrator(s), as necessary.

This result is not subject to appeal once all Parties indicate their written assent to all agreed upon terms of Resolution. When the Parties cannot agree on all terms of Resolution, the Formal Grievance Process will resume at the same point where it was paused.

When a Resolution is accomplished, the appropriate Sanction or responsive actions are promptly implemented under the direction of the Title IX Coordinator.

IV. **Negotiated Resolution**

The Title IX Coordinator, with the written Consent of the Parties, may negotiate and implement an agreement to resolve the allegations that satisfies all Parties and the University. Negotiated Resolutions are not appealable after agreement is reached. Failure by a Party to honor and portion of an agreement may be punishable under the Student Code of Conduct, or Employee Handbook, as applicable.

9.6 Grievance Process Pool

The Formal Grievance Process relies on the Grievance Process Pool ("the Pool") to carry out the process.

I. **Pool Member Roles**

Members of the Pool are trained, and can serve in the following roles, at the direction of the Title IX Coordinator:

1. To act as an Advisor to the Parties (note that Party-selected Advisors from outside the Pool are not considered part of the Pool and do not receive training from the University)
2. To serve in a facilitation role in Informal Resolution under the direction of the Title IX Coordinator
3. To investigate complaints
4. To serve as a hearing facilitator (process administrator, no decision-making role)
5. To serve as a Decision-Maker, either individually or as part of a panel, regarding the complaint
6. To serve as an Appeal Decision-maker

II. **Pool Member Appointment**

The Title IX Coordinator appoints the Pool, which acts with independence and impartiality. While members of the Pool are typically trained in a variety of skill sets and can rotate amongst the different roles listed above in different cases, the University can also designate permanent roles for individuals in the Pool, using others as substitutes or to provide greater depth of experience when necessary. This process of role assignment may be the result of particular skills, aptitudes, or talents identified in members of the Pool that make them best suited to particular roles.

The University reserves the right to supplement the pool on an as-needed basis with individuals from external service providers, consultants, or other firms.

III. **Pool Member Training**

The Pool members who will serve in an Investigator, Decision-Maker role, or who facilitate Informal Resolution processes, receive annual training related to their respective roles. This training includes, but is not limited to:

Online Programs

- A. The scope of this Policy and associated procedures
- B. The scope of the University's programs and activities
- C. The definition of Sexual Harassment
- D. How to conduct an investigation and grievance process including hearings, appeals, and Informal Resolution processes, as applicable
- E. How to serve impartially by avoiding prejudgment of the facts at issue, conflicts of interest, and bias, and how to avoid reliance on sex stereotypes
- F. Any technology to be used at a live hearing
- G. Issues of relevance of questions and evidence
- H. For those filling the Investigator role, Issues of relevance to create an investigation report that fairly summarizes relevant evidence
- I. Reporting, confidentiality, and privacy requirements
- J. How to apply definitions used by the University with respect to Consent (or the absence or negation of Consent) consistently, impartially, and in accordance with policy
- K. For Decision-Makers, how to determine appropriate Sanctions in reference Sexual Harassment findings.

All Pool members are required to attend these trainings. The materials used to train all members of the Pool are publicly posted here: <https://www.snhu.edu/consumer-information/title-ix-sexual-misconduct>

9.7 Formal Grievance Process: Notice of Investigation and Allegations

The Title IX Coordinator will provide written notice of the investigation and allegations (the "NOIA") to the Respondent upon commencement of the Formal Grievance Process. This facilitates the Respondent's ability to prepare for the interview and to identify and choose an Advisor to accompany them. The NOIA is also copied to the Complainant, who is to be given advance notice of when the NOIA will be delivered to the Respondent.

The NOIA will include:

- I. A meaningful summary of all of allegations,
- II. The identity of the involved Parties (if known),
- III. The specific conduct alleged to constitute Sexual Harassment,
- IV. The date and location of the alleged incident(s) (if known),
- V. A copy of the specific policies implicated (including this Policy),
- VI. The URL of the University's public webpage with Title IX materials
- VII. A description of the applicable procedures,
- VIII. A statement of the potential Sanctions/responsive actions that could result,
- IX. A statement that the University presumes the Respondent is not responsible for the reported misconduct unless and until the evidence supports a different determination,
- X. A statement that Final Determinations of responsibility are made at the conclusion of the process and that the Parties will be given an opportunity to inspect and review all directly related and/or relevant evidence obtained during the review and comment period,
- XI. A statement about the University's policy on Retaliation,
- XII. Information about the privacy of the process,
- XIII. Information on the right of Parties to have an Advisor of their choice, who may be, but is not required to be, an attorney,
- XIV. A statement informing the Parties that the University's Policy prohibits knowingly making false statements, including knowingly submitting false information during the Resolution process,
- XV. Detail on how the Party may request disability accommodations during the interview process,
- XVI. The name(s) of the Investigator(s), along with a process to identify, in advance of the interview process, to the Title IX Coordinator any bias or conflict of interest that the Investigator(s) may have, and
- XVII. An instruction to preserve any evidence that is directly related to the allegations.

Amendments and updates to the NOIA may be made as the investigation progresses and more information becomes available regarding the addition of various charges.

Notice will be made in writing and may be delivered by one or more of the following methods: in person, mailed to the local or permanent address(es) of the Parties as indicated in official University records, or emailed to the Parties' University-issued email or designated accounts. Once mailed, emailed, and/or received in-person, notice will be presumptively delivered.

9.8 Appointment of Investigators

Once the decision to commence a formal investigation is made, the Title IX Coordinator appoints Pool members to conduct the investigation (typically using a team of two Investigators), usually within two (2) business days of determining that an investigation should proceed.

9.9 Ensuring Impartiality

Any individual materially involved in the administration of the Resolution process may neither have a conflict of interest or bias for a Party generally, or for a specific Complainant or Respondent specifically.

Online Programs

The Title IX Coordinator will vet the assigned Investigator(s) to ensure impartiality by ensuring there are no actual or apparent conflicts of interest or disqualifying biases. The Parties may, at any time during the Resolution process, raise a concern regarding bias or conflict of interest, and the Title IX Coordinator will determine whether the concern is reasonable and supportable. If so, another Pool member will be assigned and the impact of the bias or conflict, if any, will be remedied. If the source of the conflict of interest or bias is the Title IX Coordinator, concerns should be raised with the University's Chief of Staff.

The Formal Grievance Process involves an objective evaluation of all relevant evidence obtained, including evidence which supports that the Respondent engaged in a policy violation and evidence which supports that the Respondent did not engage in a policy violation. Credibility determinations may not be based solely on an individual's status or participation as a Complainant, Respondent, or witness.

The University operates with the presumption that the Respondent is not responsible for the reported misconduct unless and until the Respondent is determined to be responsible for a policy violation by a preponderance of the evidence.

9.10 Investigation Timeline

Investigations are completed expeditiously, normally within thirty (30) business days, though some investigations may take weeks or even months, depending on the nature, extent, and complexity of the allegations, availability of witnesses, police involvement, etc.

The University will make a good faith effort to complete investigations as promptly as circumstances permit and will communicate regularly with the Parties to update them on the progress and timing of the investigation.

9.11 Delays in the Investigation Process and Interactions with Law Enforcement

The University may undertake a short delay in its investigation (several days to a few weeks) if circumstances require. Such circumstances include, but are not limited to: a request from law enforcement to temporarily delay the investigation, the need for language assistance, the absence of Parties and/or witnesses, and/or accommodations for disabilities or health conditions.

The University will communicate in writing the anticipated duration of the delay and reason to the Parties and provide the Parties with status updates if necessary. The University will promptly resume its investigation and Resolution process as soon as feasible. During such a delay, The University will implement supportive measures as deemed appropriate.

The University action(s) are not typically altered or precluded on the grounds that civil or criminal charges involving the underlying incident(s) have been filed or that criminal charges have been dismissed or reduced.

9.12 Steps in the Investigation Process

All investigations are thorough, reliable, impartial, prompt, and fair. Investigations involve interviews with all relevant Parties and witnesses; obtaining available, relevant evidence; and identifying sources of expert information, as necessary.

All Parties have a full and fair opportunity, through the investigation process, to suggest witnesses and questions, to provide evidence and expert witnesses, and to fully review and respond to all evidence on the record.

The Title IX Coordinator or assigned deputy coordinator may be present to observe any of the steps in the investigation process, including party or witness interviews, as part of their oversight responsibilities.

The Investigator(s) typically take(s) the following steps, if not already completed (not necessarily in this order):

- I. Determine the identity and contact information of the Complainant
- II. In coordination with campus partners (e.g., the Title IX Coordinator), initiate or assist with any necessary supportive measures
- III. Identify all policies implicated by the alleged misconduct and notify the Complainant and Respondent of all of the specific policies implicated
- IV. Assist the Title IX Coordinator with conducting a prompt initial assessment to determine if the allegations indicate a potential policy violation
- V. Commence a thorough, reliable, and impartial investigation by identifying issues and developing a strategic investigation plan, including a witness list, evidence list, intended investigation timeframe, and order of interviews for all witnesses and the Parties
- VI. Meet with the Complainant to finalize their interview/statement, if necessary
- VII. Prepare the initial Notice of Investigation and Allegation (NOIA). The NOIA may be amended with any additional or dismissed allegations
- VIII. Notice should inform the Parties of their right to have the assistance of an Advisor, who could be a member of the Pool or an Advisor of their choosing present for all meetings attended by the Party
- IX. Provide each interviewed Party and witness an opportunity to review and verify the Investigator's summary notes (or transcript) of the relevant evidence/testimony from their respective interviews and meetings
- X. Make good faith efforts to notify the Parties of any meeting or interview involving the other Party, in advance when possible
- XI. When participation of a Party is expected, provide that Party with written notice of the date, time, and location of the meeting, as well as the expected participants and purpose

Online Programs

- XII. Interview all available, relevant witnesses and conduct follow-up interviews as necessary
- XIII. Allow each Party the opportunity to suggest witnesses and questions they wish the Investigator(s) to ask of the other Party and witnesses, and document in the report which questions were asked, with a rationale for any changes or omissions.
- XIV. Complete the investigation promptly and without unreasonable deviation from the intended timeline
- XV. Provide regular status updates to the Parties throughout the investigation.
- XVI. Prior to the conclusion of the investigation, provide the Parties and their respective Advisors (if so desired by the Parties) with a list of witnesses whose information will be used to render a Finding
- XVII. Write a comprehensive investigation report fully summarizing the investigation, all witness interviews, and addressing all relevant evidence. Appendices including relevant physical or documentary evidence will be included
- XVIII. Prior to the conclusion of the investigation, provide the Parties and their respective Advisors (if so desired by the Parties) a secured electronic or hard copy of the draft investigation report as well as an opportunity to inspect and review all of the evidence obtained as part of the investigation that is directly related to the reported misconduct, including evidence upon which the University does not intend to rely in reaching a Final Determination, for a ten (10) business Day review and comment period so that each Party may meaningfully respond to the evidence. The Parties may elect to waive the full ten days. Each copy of the materials shared will be watermarked on each page with the role of the person receiving it (e.g., Complainant, Respondent, Complainant's Advisor, Respondent's Advisor).
- XIX. The Investigator(s) may elect to respond in writing in the investigation report to the Parties' submitted responses and/or to share the responses between the Parties for additional responses
- XX. The Investigator(s) will incorporate relevant elements of the Parties' written responses into the final investigation report, include any additional relevant evidence, make any necessary revisions, and finalize the report. The Investigator(s) should document all rationales for any changes made after the review and comment period
- XXI. The Investigator shall have an opportunity to receive confidential legal advice regarding any aspect of the investigation or the report from the University's legal counsel
- XXII. The Investigator will incorporate any relevant feedback, and the final report is then shared with all Parties and their Advisors through secure electronic transmission or hard copy at least ten (10) business days prior to a hearing. The Parties are also provided with a file of any directly related evidence that was not included in the report

9.13 Role and Participation of Witnesses in the Investigation

Witnesses (as distinguished from the Parties) who are employees of the University are expected to cooperate with and participate in the University's investigation and Resolution process. Failure of such witnesses to cooperate with and/or participate in the investigation or Resolution process constitutes a violation of policy and may warrant discipline.

While in-person interviews for Parties and all potential witnesses are ideal, circumstances (e.g., study abroad, summer break) may require individuals to be interviewed remotely. Remote conference technologies may be used for interviews in the Investigator's discretion. The University will take appropriate steps to reasonably ensure the security/privacy of remote interviews.

9.14 Recording of Interviews

No unauthorized audio or video recording of any kind is permitted during investigation meetings. If Investigator(s) elect to audio and/or video record interviews, all involved Parties must be made aware of audio and/or video recording.

9.15 Evidentiary Considerations in the Investigation

The investigation does not consider: 1) incidents not directly related to the possible violation, unless they evidence a pattern; 2) the character of the Parties; or 3) questions and evidence about the Complainant's sexual predisposition or prior sexual behavior, unless such questions and evidence about the Complainant's prior sexual behavior are offered to prove that someone other than the Respondent committed the conduct alleged by the Complainant, or if the questions and evidence concern specific incidents of the Complainant's prior sexual behavior with respect to the Respondent and are offered to prove Consent.

9.16 Referral for Hearing

Provided that the complaint is not resolved through Informal Resolution, once the final investigation report is shared with the Parties, the Title IX Coordinator will refer the matter for a hearing.

The hearing cannot be less than ten (10) business days from the conclusion of the investigation -when the final investigation report is transmitted to the Parties and the Decision-maker-unless all Parties and the Decision-maker agree to an expedited timeline.

The Title IX Coordinator will select an appropriate Decision-maker or panel of Decision-makers from the Pool.

9.17 Hearing Decision-maker Composition

The University will designate a single Decision-maker or a three-member panel from the Pool, at the discretion of the Title IX Coordinator. The single Decision-maker will also Chair the hearing. With a panel, one of the three members will be appointed as Chair by the Title IX Coordinator.

The Decision-maker(s) will not have had any previous involvement with the investigation. The Title IX Coordinator may elect

Online Programs

to have an alternate from the Pool sit in throughout the Resolution process in the event that a substitute is needed for any reason.

Those who have served as Investigators will be witnesses in the hearing and therefore may not serve as Decision-makers. Those who are serving as Advisors for any Party may not serve as Decision-makers in that matter.

The Title IX Coordinator may not serve as a Decision-maker or Chair in the matter but may serve as an administrative facilitator of the hearing if their previous role(s) in the matter do not create a conflict of interest. Otherwise, a designee may fulfill this role. The hearing will convene at a time determined by the Chair or designee.

Legal counsel for the University may be present in the hearing to observe and provide legal counsel to the Chair or panel during recesses which may be called by the Chair as reasonably necessary.

9.18 Evidentiary Considerations in the Hearing

Any evidence that the Decision-maker(s) determine(s) is relevant and credible may be considered. The hearing does not consider: 1) incidents not directly related to the possible violation, unless they evidence a pattern; 2) the character of the Parties; or 3) questions and evidence about the Complainant's sexual predisposition or prior sexual behavior, unless such questions and evidence about the Complainant's prior sexual behavior are offered to prove that someone other than the Respondent committed the conduct alleged by the Complainant, or if the questions and evidence concern specific incidents of the Complainant's prior sexual behavior with respect to the Respondent and are offered to prove Consent.

Previous disciplinary action of any kind involving the Respondent may be considered in determining an appropriate Sanction upon a determination of responsibility, in accordance with the University's progressive discipline system. This information is only considered at the Sanction stage of the process.

University personnel may not access, consider, disclose, or otherwise use a Party's records that are made or maintained by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional acting in the professional's or paraprofessional's capacity, or assisting in that capacity, and which are made and maintained in connection with the provision of treatment to the Party, unless the University obtains that Party's voluntary, written Consent to do so for a grievance process under this section.

After post-hearing deliberation, the Decision-maker renders a determination based on the preponderance of the evidence; whether it is more likely than not that the Respondent violated the Policy as alleged.

9.19 Notice of Hearing

No less than ten (10) business days prior to the hearing, the Title IX Coordinator or the Chair will send notice of the hearing to the Parties. Once mailed, emailed, and/or received in-person, notice will be presumptively delivered.

The notice will contain:

- I. A description of the alleged violation(s), a list of all policies allegedly violated, a description of the applicable procedures, and a statement of the potential Sanctions/responsive actions that could result.
- II. The time, date, and location of the hearing and a reminder that attendance is mandatory, superseding all other campus activities.
- III. Any technology that will be used to facilitate the hearing.
- IV. Information about the option for the live hearing to occur with the Parties located in separate rooms using technology that enables the Decision-maker(s) and Parties to see and hear a Party or witness answering questions. Such a request must be raised with the Title IX Coordinator at least five (5) business days prior to the hearing.
- V. A list of all those who will attend the hearing, along with an invitation to object to any Decision-maker on the basis of demonstrated bias. This must be raised with the Title IX Coordinator at least two (2) business days prior to the hearing.
- VI. Information on how the hearing will be recorded or transcribed and on access to the recording for the Parties after the hearing.
- VII. A statement that if any Party or witness does not appear at the scheduled hearing, the hearing may be held in their absence, and the Party's or witness's testimony and any statements given prior to the hearing will not be considered by the Decision-maker(s). For compelling reasons, the Chair may reschedule the hearing.
- VIII. Notification that the Parties may have the assistance of an Advisor of their choosing at the hearing and will be required to have one present for any questions they may desire to ask. The Party must notify the Title IX Coordinator if they do not have an Advisor, and the University will appoint one. Each Party must have an Advisor present. There are no exceptions.
- IX. A copy of all the materials provided to the Decision-maker(s) about the matter, unless they have been provided already.**
- X. An invitation to contact the Title IX Coordinator to arrange any disability accommodations, language assistance, and/or interpretation services that may be needed at the hearing, at least seven (7) business days prior to the hearing.

Hearings for possible violations that occur near or after the end of an academic term (assuming the Respondent is still subject to this Policy) and are unable to be resolved prior to the end of term will typically be held immediately after the end of the term or during the summer, as needed, to meet the Resolution timeline followed by the University and remain

Online Programs

within the 60-90 business Day goal for Resolution.

In these cases, if the Respondent is a graduating student, a hold may be placed on graduation and/or official transcripts until the matter is fully resolved (including any appeal). A student facing charges under this Policy is not in good standing to graduate.

** The final investigation report may be shared using electronic means that preclude downloading, forwarding, or otherwise sharing.

9.20 Alternative Hearing Participation Options

The Title IX Coordinator or the Chair can arrange to use web or video conferencing technology to allow remote testimony and otherwise conduct a live hearing by video conference without compromising the fairness of the hearing. Remote options may also be needed during in-person hearings for witnesses who cannot appear in person. Any witness who cannot attend in person should let the Title IX Coordinator or the Chair know at least five (5) business days prior to the hearing so that appropriate arrangements can be made.

9.21 Pre-Hearing Preparation

The Chair, after any necessary consultation with the Parties, Investigator(s) and/or Title IX Coordinator, will provide the names of persons who will be participating in the hearing, all pertinent documentary evidence, and the final investigation report to the Parties at least ten (10) business days prior to the hearing.

Any witness scheduled to participate in the hearing must have been first interviewed by the Investigator(s) or have proffered a written statement or answered written questions, unless all Parties and the Chair assent to the witness's participation in the hearing. The same holds for any evidence that is first offered at the hearing. If the Parties and Chair do not assent to the admission of evidence newly offered at the hearing, the Chair will delay the hearing and instruct that the investigation needs to be re-opened to consider that evidence.

The Parties will be given a list of the names of the Decision-maker(s) at least five (5) business days in advance of the hearing. All objections to any Decision-maker must be raised in writing, detailing the rationale for the objection, and must be submitted to the Title IX Coordinator as soon as possible and no later than 48 hours prior to the hearing. Decision-makers will only be substituted if the Title IX Coordinator concludes that their bias or conflict of interest precludes an impartial hearing of the allegation(s).

The Title IX Coordinator will give the Decision-maker(s) a list of the names of all Parties, witnesses, and Advisors at least five (5) business days in advance of the hearing. Any Decision-maker who cannot make an objective determination must recuse themselves from the proceedings when notified of the identity of the Parties, witnesses, and Advisors in advance of the hearing. If a Decision-maker is unsure of whether a bias or conflict of interest exists, they must raise the concern to the Title IX Coordinator as soon as possible.

During the ten (10) business Day period prior to the hearing, the Parties have the opportunity for continued review and comment on the final investigation report and available evidence. That review and comment can be shared with the Chair at the pre-hearing meeting or at the hearing and will be exchanged between each Party by the Chair.

9.22 Pre-Hearing Meetings

The Chair in their discretion may convene a pre-hearing meeting(s) with the Parties and their Advisors to invite them to submit the questions or topics they (the Parties and their Advisors) wish to ask or discuss at the hearing, so that the Chair can rule on their relevance ahead of time to avoid any improper evidentiary introduction in the hearing or provide recommendations for more appropriate phrasing. However, this advance review opportunity does not preclude the Advisors from asking at the hearing for a reconsideration based on any new information or testimony offered at the hearing. The Chair must document and share their rationale for any exclusion or inclusion at this pre-hearing meeting.

At each pre-hearing meeting with a Party and their Advisor, the Chair will consider arguments that evidence identified in the final investigation report as relevant is, in fact, not relevant. Similarly, evidence identified as directly related but not relevant by the Investigator(s) may be argued to be relevant. The Chair may rule on these arguments pre-hearing and will exchange those rulings between the Parties prior to the hearing to assist in preparation for the hearing. The Chair may during a recess consult with legal counsel and/or the Title IX Coordinator, or ask either or both to attend pre-hearing meetings.

9.23 Hearing Procedures

At the hearing, the Decision-maker(s) has the authority to hear and make determinations on all allegations of Sexual Harassment and may also hear and make determinations on any additional alleged policy violations that have occurred in concert with the Sexual Harassment, including related Retaliation.

Participants at the hearing may include the Chair, any additional panelists, a hearing facilitator (if deemed necessary) the Investigator(s) who conducted the investigation, the Parties, Advisors to the Parties, any called witnesses, the Title IX Coordinator, observing legal counsel for the University, and anyone providing authorized accommodations or assistive services.

Online Programs

The Chair will answer all questions of procedure. Anyone appearing at the hearing to provide information will respond to questions on their own behalf.

The Chair will allow witnesses who have relevant information to appear at a portion of the hearing in order to respond to specific questions from the Decision-maker(s) and the Parties and will then be excused.

9.24 Joint Hearings

In hearings involving more than one Respondent or in which two (2) or more Complainants have accused the same individual of substantially similar conduct, the default procedure will be to hear the allegations jointly.

However, the Title IX Coordinator may permit the investigation and/or hearings pertinent to each Respondent to be conducted separately if there is a compelling reason to do so. In joint hearings, separate determinations of responsibility will be made for each Respondent with respect to each alleged policy violation.

9.25 The Order of the Hearing – Introductions and Explanation of Procedure

The Chair explains the procedures and introduces the participants. This may include a final opportunity for challenge or recusal of the Decision-maker(s) on the basis of bias or conflict of interest. The Chair will rule on any such challenge unless the Chair is the individual who is the subject of the challenge, in which case the Title IX Coordinator will review and decide the challenge.

At the hearing, recording, witness logistics, Party logistics, curation of documents, separation of the Parties, and other administrative elements of the hearing process are managed by a non-voting hearing facilitator appointed by the Title IX Coordinator. The hearing facilitator may attend to: logistics of rooms for various Parties/witnesses as they wait; flow of Parties/witnesses in and out of the hearing space; ensuring recording and/or virtual conferencing technology is working as intended; copying and distributing materials to participants, as appropriate, etc.

9.26 Investigator Presents the Final Investigation Report

The Investigator(s) will then present a summary of the final investigation report, including items that are contested and those that are not, and will be subject to questioning by the Decision-maker(s) and the Parties (through their Advisors). The Investigator(s) will be present during the entire hearing process, but not during deliberations.

Neither the Parties nor the Decision-maker(s) should ask the Investigator(s) their opinions on credibility, recommended findings, or determinations, and the Investigators, Advisors, and Parties will refrain from discussion of or questions about these assessments. If such information is introduced, the Chair will direct that it be disregarded.

9.27 Testimony and Questioning

Once the Investigator(s) present their report and are questioned, the Parties and witnesses may provide relevant information in turn, beginning with the Complainant, and then in the order determined by the Chair. The Parties/witnesses will submit to questioning by the Decision-maker(s) and then by the Parties through their Advisors (“cross-examination”).

All questions are subject to a relevance determination by the Chair. The Advisor, who will remain seated during questioning, will pose the proposed question orally, electronically, or in writing (orally is the default, but other means of submission may be permitted by the Chair upon request or agreed to by the Parties and the Chair), the proceeding will pause to allow the Chair to consider it, and the Chair will determine whether the question will be permitted, disallowed, or rephrased.

The Chair may explore arguments regarding relevance with the Advisors, if the Chair so chooses. The Chair will then state their decision on the question for the record and advise the Party/witness to whom the question was directed, accordingly. The Chair will explain any decision to exclude a question as not relevant, or to reframe it for relevance.

The Chair will limit or disallow questions on the basis that they are irrelevant, unduly repetitious (and thus irrelevant), or abusive. The Chair has final say on all questions and determinations of relevance, subject to any appeal. The Chair may consult with legal counsel on any questions of admissibility. The Chair may ask Advisors to frame why a question is or is not relevant from their perspective but will not entertain argument from the Advisors on relevance once the Chair has ruled on a question.

If the Parties raise an issue of bias or conflict of interest of an Investigator or Decision-maker at the hearing, the Chair may elect to address those issues, consult with legal counsel, and/or refer them to the Title IX Coordinator, and/or preserve them for appeal. If bias is not in issue at the hearing, the Chair should not permit irrelevant questions that probe for bias.

9.28 Refusal to Submit to Cross-Examination and Inferences

If a Party or witness chooses not to submit to cross-examination at the hearing, either because they do not attend the meeting, or they attend but refuse to participate in questioning, then the Decision-maker(s) may not rely on any prior statement made by that Party or witness at the hearing (including those contained in the investigation report) in the ultimate determination of responsibility. The Decision-maker(s) must disregard that statement. Evidence provided that is something other than a statement by the Party or witness may be considered.

If the Party or witness attends the hearing and answers some cross-examination questions, only statements related to the

Online Programs

cross-examination questions they refuse to answer cannot be relied upon. However, if the statements of the Party who is refusing to submit to cross-examination or refuses to attend the hearing are the subject of the allegation itself (e.g., the case is about verbal harassment or a quid pro quo offer), then those statements are not precluded from admission. Similarly, statements can be relied upon when questions are posed by the Decision-maker(s), as distinguished from questions posed by Advisors through cross-examination.

The Decision-maker(s) may not draw any inference solely from a Party's or witness's absence from the hearing or refusal to answer cross-examination or other questions.

If charges of policy violations other than Sexual Harassment are considered at the same hearing, the Decision-maker(s) may consider all evidence it deems relevant, may rely on any relevant statement as long as the opportunity for cross-examination is afforded to all Parties through their Advisors, and may draw reasonable inferences from any decision by any Party or witness not to participate or respond to questions.

If a Party's Advisor of choice refuses to comply with the University's established rules of decorum for the hearing, the University may require the Party to use a different Advisor. If the University-provided Advisor refuses to comply with the rules of decorum, the University may provide that Party with a different Advisor to conduct cross-examination on behalf of that Party.

9.29 Recording Hearings

Hearings (but not deliberations) are recorded or transcribed by the University for purposes of review in the event of an appeal. The Parties may not record the proceedings and no other unauthorized recordings are permitted.

The Decision-maker(s), the Parties, their Advisors, and appropriate administrators of the University will be permitted to listen to the recording in a controlled environment determined by the Title IX Coordinator. No person will be given or be allowed to make a copy of the recording without permission of the Title IX Coordinator.

9.30 Deliberation, Decision-making, and Standard of Proof

The Decision-maker(s) will deliberate in closed session to determine whether the Respondent is responsible or not responsible for the policy violation(s) in question. If a panel is used, a simple majority vote is required to make a Finding or Final Determination. The preponderance of the evidence standard of proof is used. The hearing facilitator may be invited to attend the deliberation by the Chair, but is there only to facilitate procedurally, not to address the substance of the allegations.

The Decision-maker(s) will review the statements from the hearing and any pertinent conduct history and determine the appropriate Sanction(s).

The Chair will then prepare a written determination regarding responsibility and deliver it to the Title IX Coordinator, detailing the elements listed below:

- I. Identification of the allegations potentially constituting Sexual Harassment as defined in this Policy
- II. A description of the procedural steps taken from the receipt of the Formal Complaint through the determination, including any notifications to the Parties, interviews with Parties and witnesses, site visits, methods used to gather other evidence, and hearings held;
- III. Findings of fact supporting the Final Determination;
- IV. Conclusions regarding the application of the University's Policy to the facts;
- V. A statement of, and rationale for, the result as to each allegation, including a Final Determination regarding responsibility, any disciplinary Sanctions the University will impose on the Respondent, and whether Remedies designed to restore or preserve equal access to the recipient's education program or activity will be provided by the University to the Complainant; and
- VI. The University's procedures and permissible bases for the Complainant and Respondent to appeal.

This report typically should not exceed five (5) pages in length and must be submitted to the Title IX Coordinator within two (2) business days of the end of deliberations, unless the Title IX Coordinator grants an extension. If an extension is granted, the Title IX Coordinator will notify the Parties.

9.31 Resolution Letter

Within 7 days of receiving the deliberation statement, the Title IX Coordinator will assist the Decision Maker to convey the deliberation statement to all Parties, including any Sanctions and findings of fact, in the form of an Resolution Letter, signed by the Decision Maker.

The Resolution Letter will be shared with the Parties simultaneously. Notification will be made in writing and may be delivered by one or more of the following methods: in person, mailed to the local or permanent address of the Parties as indicated in official University records, or emailed to the Parties' University-issued email or otherwise approved account. Once mailed, emailed, and/or received in-person, notice will be presumptively delivered.

Remedies (other than Sanctions) provided to the Complainant designed to ensure access to the University's educational or employment program or activity are not typically shared with the Respondent unless the Remedy directly relates to the Respondent.

Online Programs

The Resolution Letter will also include information on when the results are considered by the University to be final, any changes that occur prior to finalization, and the relevant procedures and bases for any available appeal options.

9.32 Sanctions

I. **Factors:**

Factors that may be considered when determining a Sanction/responsive action may include, but are not limited to:

- A. The nature, severity of, and circumstances surrounding the violation(s)
- B. The Respondent's disciplinary history
- C. Previous allegations or allegations involving similar conduct
- D. The need for Sanctions/responsive actions to bring an end to the Sexual Misconduct, Sexual Harassment, and/or Retaliation
- E. The need for Sanctions/responsive actions to prevent the future recurrence of
- F. discrimination, harassment, and/or Retaliation
- G. The need to remedy the effects of the discrimination, harassment, and/or
- H. Retaliation on the Complainant and the community
- I. The impact on the Parties
- J. Any other information deemed relevant by the Decision-maker(s)

The Sanctions will be implemented as soon as is feasible, either upon the outcome of any appeal or the expiration of the window to appeal without an appeal being requested.

The Sanctions described in this policy are not exclusive of, and may be in addition to, other actions taken or Sanctions imposed by external authorities.

II. **Student Sanctions**

The following are the usual Sanctions that may be imposed upon students or organizations singly or in combination:

- A. **Warning** A warning consists of formal notification that the student has violated the university's community standards and advises that repetition will result in a more severe Sanction.
- B. **Reprimand** At this increased standing, students understand a formal reprimand is in place.
- C. **Residence Probation** Students are placed on residence probation for a minimum of one semester. The Decision-Maker reserves the right to determine the length of probation based on the incident and the student's past history. Any violation of university policy during the probationary period may result in the student's referral for residence suspension.
- D. **Residence Suspension** automatically carries with it the status of persona non grata in the residential areas. If the student has lost the privilege to live on campus, he/she/they is barred from the residence areas and will only be allowed in non-residential spaces, administrative and academic buildings, and the Dining Center between 7:30 am and 12:00 am The student's vehicle may only be on campus during that time, and parking is restricted to Lots 1 or 12.
- E. **University Probation** This Sanction is the most serious warning for violation of university regulations prior to university suspension, and it places limits on the student's good standing with the university. Students on university probation may be limited in their ability to attend university programs and if a student is currently in residence, this status automatically carries residence probation. If the student is found responsible for violating any university policy during the period of probation, both residence suspension and/or university suspension may become effective and the student may be subject to additional Sanctions.
- F. **University Suspension** means that the student is dismissed from the university for a given period of time, with an opportunity for re-admission. If suspended from the university, the student will be persona non grata in all university facilities and online environments and from all university functions for the period of his/her/their suspension.
- G. **University Dismissal** If a student is dismissed from the university, he/she/they is permanently dismissed from the university without opportunity for readmission. If dismissed from the university, the student will be persona non grata in all university facilities and online environments and from all university functions.

As this model is presented in increasing severity, it should be noted that violations may be cumulative. A student's prior conduct history and length of time between violations are factors considered when selecting a conduct Sanction.

In some cases, a Sanction may be held in abeyance. This means that the suspension will not be enforced immediately, but is "in place." This conduct status requires that specific conditions be fulfilled. Any violation of those conditions will result, at a minimum, in immediate enforcement of the suspension without a hearing. It may also result in further conduct action.

III. **Employee Sanctions**

Responsive actions available for an employee who has engaged in Sexual Harassment, Sexual Misconduct, and/or Retaliation include:

- A. Warning – Verbal or Written
- B. Performance Improvement/Management Process
- C. Required Training or Education
- D. Probation
- E. Loss of Annual Pay Increase
- F. Loss of Oversight or Supervisory Responsibility
- G. Demotion
- H. Suspension with pay
- I. Suspension without pay

Online Programs

J. Termination

K. Other Actions: In addition to or in place of the above Sanctions, the University may assign any other Sanctions as deemed appropriate.

9.33 Withdrawal or Resignation While Charges Pending

I. **Students:**

If a student has an allegation pending for violation of this Policy, the University may place a hold on a student's ability to graduate and/or to receive an official transcript/diploma.

Should a student decide to not participate in the Resolution process, the process proceeds absent their participation to a reasonable Resolution. Should a student Respondent permanently withdraw from the University, the Resolution process ends, as the University no longer has disciplinary jurisdiction over the withdrawn student with respect to Sexual Harassment.

However, the University will continue to address and remedy any systemic issues, variables that may have contributed to the alleged violation(s), and any ongoing effects of the alleged Sexual Harassment, and/or Retaliation. The student who withdraws or leaves while the process is pending may not return to the University. Such exclusion applies to all campuses and modalities of the University. A hold will be placed on their ability to be readmitted. They may also be barred from University property and/or events.

If the student Respondent only withdraws or takes a leave for a specified period of time (e.g., one semester or term), the Resolution process may continue remotely and that student is not permitted to return to the University unless and until all Sanctions have been satisfied.

II. **Employees:**

Should an employee Respondent resign with unresolved allegations pending, the Resolution process ends, as the University no longer has disciplinary jurisdiction over the resigned employee.

However, the University will continue to address and remedy any systemic issues, variables that contributed to the alleged violation(s), and any ongoing effects of the alleged Sexual Harassment.

The employee who resigns with unresolved allegations pending is not eligible for rehire with the University or any campus of the University, and the records retained by the Title IX Coordinator will reflect that status.

9.34 Appeals

Any Party may file a request for appeal ("Request for Appeal"), but it must be submitted in writing to the Title IX Coordinator within 7 days of the delivery of the Notice of Outcome.

A single Appeal Decision-maker will Chair the appeal. No Appeal Decision maker will have been involved in the process previously, including any dismissal appeal that may have been heard earlier in the process.

The Request for Appeal will be forwarded to the Appeal Chair for consideration to determine if the request meets the grounds for appeal.

This review is not a review of the merits of the appeal, but solely a determination as to whether the request meets the grounds and is timely filed.

I. **Grounds for Appeal**

Appeals are limited to the following grounds:

- A. Procedural irregularity that affected the outcome of the matter;
- B. New evidence that was not reasonably available at the time the Final Determination regarding responsibility or dismissal was made, that could affect the outcome of the matter; and
- C. The Title IX Coordinator, Investigator(s), or Decision-maker(s) had a conflict of interest or bias for or against Complainants or Respondents generally or the specific Complainant or Respondent that affected the outcome of the matter.

If any of the grounds in the Request for Appeal do not meet the grounds in this Policy, that request will be denied by the Chair and the Parties and their Advisors will be notified in writing of the denial and the rationale.

If any of the grounds in the Request for Appeal meet the grounds in this Policy, then the Appeal Chair will notify the other Party(ies) and their Advisors, the Title IX Coordinator, and, when appropriate, the Investigators and/or the original Decision-maker(s).

The other Party(ies) and their Advisors, the Title IX Coordinator, and, when appropriate, the Investigators and/or the original Decision-maker(s) will be mailed, emailed, and/or provided a hard copy of the request with the approved grounds and then be given 7 days to submit a response to the portion of the appeal that was approved and involves them. All responses will be forwarded by the Chair to all Parties for review and comment.

The Appeal Chair will collect any additional information needed and all documentation regarding the approved grounds and the subsequent responses and the Chair will render a decision in no more than 7 business days,

Online Programs

barring exigent circumstances.

A Notice of Appeal Outcome will be sent to all Parties simultaneously including the decision on each approved ground and rationale for each decision. The Notice of Appeal Outcome will specify the Finding on each ground for appeal, any specific instructions for remand or reconsideration, any Sanctions that may result which the University is permitted to share according to state or federal law, and the rationale supporting the essential findings to the extent the University is permitted to share under state or federal law.

Notification will be made in writing and may be delivered by one or more of the following methods: in person, mailed to the local or permanent address of the Parties as indicated in official institutional records, or emailed to the Parties' the University-issued email or otherwise approved account. Once mailed, emailed and/or received in-person, notice will be presumptively delivered.

II. **Sanctions Status During the Appeal**

Any Sanctions imposed as a result of the hearing are stayed during the appeal process. Supportive measures may be reinstated, subject to the same supportive measure procedures above.

If any of the Sanctions are to be implemented immediately post-hearing, then emergency removal procedures (detailed above) for a hearing on the justification for doing so must be permitted within 48 hours of implementation. The University may still place holds on official transcripts, diplomas, graduations, and course registration pending the outcome of an appeal when the original Sanctions included separation.

III. **Appeal Considerations**

- A. Decisions on appeal are to be deferential to the original decision, making changes to the Finding only when there is clear error and to the Sanction(s)/responsive action(s) only if there is a compelling justification to do so.
- B. Appeals are not intended to provide for a full re-hearing (de novo) of the allegation(s). In most cases, appeals are confined to a review of the written documentation or record of the original hearing and pertinent documentation regarding the specific grounds for appeal.
- C. An appeal is not an opportunity for Appeal Decision-makers to substitute their judgment for that of the original Decision-maker(s) merely because they disagree with the Finding and/or Sanction(s).
- D. The Appeal Chair/Panel may consult with the Title IX Coordinator on questions of procedure or rationale, for clarification, if needed. Documentation of all such consultation will be maintained.
- E. Appeals granted based on new evidence should normally be remanded to the original Investigator(s) and/or Decision-maker(s) for reconsideration. Other appeals may be remanded at the discretion of the Title IX Coordinator or, in limited circumstances, decided on appeal.
- F. Once an appeal is decided, the outcome is final: further appeals are not permitted, even if a decision or Sanction is changed on remand (except in the case of a new hearing).
- G. In rare cases where a procedural error cannot be cured by the original Decision-maker(s) (as in cases of bias), the appeal may order a new hearing with a new Decision-maker(s).
- H. The results of a new hearing can be appealed, once, on any of the three available appeal grounds.
- I. In cases in which the appeal results in reinstatement to the University or resumption of privileges, all reasonable attempts will be made to restore the Respondent to their prior status.

9.35 Failure to Comply with Sanctions

All Respondents are expected to comply with the assigned Sanctions, responsive actions, and/or corrective actions within the timeframe specified by the final Decision-maker(s) (including the Appeal Chair/Panel).

Failure to abide by the Sanction(s)/action(s) imposed by the date specified, whether by refusal, neglect, or any other reason, may result in additional Sanction(s)/action(s) pursuant to the University's standard conduct process, including suspension, expulsion, and/or termination from the University.

A suspension will only be lifted when compliance is achieved to the satisfaction of the Title IX Coordinator.

9.36 Recordkeeping

The University will maintain for a period of at least seven years records of:

- I. Each Sexual Harassment investigation including any determination regarding responsibility and any audio or audiovisual recording or transcript required under federal regulation;
- II. Any disciplinary Sanctions imposed on the Respondent;
- III. Any Remedies provided to the Complainant designed to restore or preserve equal access to the University's education program or activity;
- IV. Any appeal and the result therefrom;
- V. Any Informal Resolution and the result therefrom;
- VI. All materials used to train Title IX Coordinators, Investigators, Decision-makers, and any person who facilitates an Informal Resolution process. The University will make these training materials publicly available on the University's website; and
- VII. Any actions, including any supportive measures, taken in response to a report or Formal Complaint of Sexual Harassment, including:
 - A. The basis for all conclusions that the response was not deliberately indifferent;

Online Programs

- B. Any measures designed to restore or preserve equal access to the University's education program or activity; and
- C. If no supportive measures were provided to the Complainant, document the reasons why such a response was not clearly unreasonable in light of the known circumstances.

The University will also maintain any and all records in accordance with state and federal laws.

9.37 Disabilities Accommodations in the Resolution Process

The University is committed to providing reasonable accommodations and support to qualified students, employees, or others with disabilities to ensure equal access to the University's Resolution process.

Students needing such accommodations or support should contact the Campus or Online Accessibility Centers. Employees should notify their HR business partner. The request will be reviewed, and, in consultation with the person requesting the accommodation and the Title IX Coordinator, determine which accommodations are appropriate and necessary for full participation in the process.

10. Southern New Hampshire University Institutional Sexual Misconduct Grievance Procedures 10.1 Scope:

The University adopts these Institutional Sexual Misconduct Grievance Procedures for purposes of all Sexual Misconduct this is not otherwise subject to the Sexual Harassment Grievance Procedures (hereafter referred to as "other Sexual Misconduct").

These procedures do not apply for cases where both the Complainant and Respondent are employees, and not students. Instead, procedures and policies of the Employee Handbook and SNHUPEA Master Agreement (as applicable) apply to such matters between employees falling outside the scope of the definition/jurisdiction of Sexual Harassment under this Policy.

10.2 Procedure:

The University adopts and will employ the same procedures as are set forth in Section 9, above, including designated appeal procedures, for purposes of addressing all other Sexual Misconduct, with the following important exceptions.

For purposes of these Institutional Sexual Misconduct Grievance Procedures:

- I. **Advisors:** Advisors may attend Investigatory meetings and hearings, but may only provide input and advice to the student for whom they are appointed directly. They may not advocate directly or represent the student in any proceedings, nor question witnesses. Reasonable breaks or recesses can be provided to permit private consultation with Advisors.
- II. **Cross Examination:** Neither a student nor his or her Advisor is permitted to directly cross examine another Party. Questions for the witness may be submitted by the questioning student, and, after assessment by the Chair, may be asked, or modified, to the witness by the Chair directly.
- III. **Admissibility of Statements:** Statements made but which are not the subject of cross-examination may still be considered and weighed by the Decision-Maker(s). This may occur, for example, if a Respondent or Complainant does not attend a hearing, but made statements to the Investigator in the course of an Investigation. Section 9.28, therefore, does not apply.
- IV. **Dismissal Requirements:** The mandatory dismissal requirements set forth in Section 9.2, Subsection I. do not apply. The discretionary dismissal standards articulated in Subsection II do apply. In addition, the Title IX Coordinator may dismiss any complain that would not constitute Sexual Misconduct or a violation of this Policy, even if proved, or if the Respondent is not subject to the University's jurisdiction or control.

11. Revision of this Policy and Procedures

This Policy and procedures supersede any previous policy(ies) addressing Sexual Misconduct, including Sexual Harassment, and related Retaliation and will be reviewed and updated by the Title IX Coordinator. The University reserves the right to make changes to this document as necessary, and once those changes are posted online, they are in effect.

During the Resolution process, the Title IX Coordinator may make minor modifications to procedures that do not materially jeopardize the fairness owed to any Party, such as to accommodate summer schedules. The Title IX Coordinator may also vary procedures materially with notice (on the institutional website, with the appropriate effective date identified) upon determining that changes to law or regulation require policy or procedural alterations not reflected in this Policy and procedures.

If government laws or regulations change – or court decisions alter – the requirements in a way that impacts this document, this document will be construed to comply with the most recent government regulations or holdings.

This document does not create legally enforceable protections beyond the protection of the background state and federal laws which frame such policies and codes, generally.

Student Academic Complaint

Purpose of Policy

The purpose of the Student Academic Complaint policy is to provide students with an avenue to seek help or resolution when they feel that academic courses, program or services have failed to meet reasonable expectations. Examples might include complaints about the design or delivery of a course/competency/project or about the behavior of an instructor or staff member.

Process

Students are encouraged to address their concerns first with their instructors/reviewers or their advisors. If the issue cannot be resolved at that level, students who wish to file academic complaints must complete the [Student Concern Dispute Form](#). The form asks for a description of the student's complaint and the resolution sought. Upon receipt of the form, a member of the Dispute Resolution team will review and research the concern to determine a fair resolution in consultation with the appropriate academic dean/goal lead. Every effort will be made to resolve the issue in a timely manner, and students will be contacted during the process so that they know their complaints are under consideration. While complaints are being reviewed, students should continue to participate in their courses/program unless instructed otherwise by the Dispute Resolution team member.

Process for Arizona Students:

If the Student complaint cannot be resolved after exhausting the institution's grievance procedure, the student may file a complaint with the Arizona State Board for Private Postsecondary Education. The student must contact the State Board for further details.

The State Board Address is:

[1740 W. Adams Street, Suite 3008](#)

[Phoenix, Arizona 85007](#)

602-542-5709

Student Account and Fees

Course Withdrawal Refund

Undergraduate students may drop a course during the first week of a term, and the dropped course will not appear on the student's academic transcript. Undergraduate students may withdraw from courses at any time during the second through fourth week of the undergraduate term with the course grade of "W". Any withdrawals after the fourth week may only be allowed with approval by the academic advisor and will be processed at no refund. Withdrawals are not permitted in the last week of class. This policy also applies to an undergraduate student taking a 16-week course.

The following policies apply to undergraduate students taking online or center-based face-to-face and hybrid undergraduate courses.

1. Submission of Withdrawals

Requests to withdraw must be submitted via this form in mySNHU ([COCE Course Withdrawal](#)). In all cases, the date of withdrawal is the date the completed form is received. No paper withdrawal forms or emails will be accepted.

2. Tuition Fee & Refunds

Withdrawals from 8-week or 16-week course (all types, including online, hybrid, and face-to-face courses):

During Week 1 (Drop period): No tuition fee charged or 100% refund if full payment is submitted

During Week 2: 50% tuition fee charged or 50% refund if full payment is submitted

After Week 2: 100% tuition fee charged or no refund if full payment is submitted

Online Programs

For the purpose of withdrawals, all term weeks start on Monday and end on Sunday 11:59pm EST. Holidays during the week do not impact the Sunday 11:59PM deadline.

3. Financial Aid Disbursements and return of Title IV (Financial Aid Funds)

All tuition charges and withdrawal requests are subject to review, and students who withdraw may be responsible for paying back part or all of their financial aid disbursement for that term. In addition, withdrawals may have an impact on a student's eligibility for future financial aid. Please contact the Student Financial Services Office at 1-877-455-7648 or via email at studentfinance@snhu.edu for details.

QUESTIONS?

Students should contact an academic advisor for further clarification.

Payment Information

Student Payment Policies Online Students

Student Financial Services combines financial aid, billing, and student account services into one centralized location. You can visit Student Financial Services online at <https://mysnhu.force.com/mysnhu/s/student-financial-services>, email questions to studentfinance@snhu.edu or call 1-877-455-7648 to speak with a Finance Counselor.

Student Account Payment

Tuition must be paid prior to the start of coursework. Textbooks and supplies are sold separately. Student financial accounts must be settled in one of the following ways:

1. Students may make payments online at my.snhu.edu
2. Students may make payments through Student Financial Services in person (cash, check, money order, debit/credit cards and wires accepted)
3. Student may make payments through the mail by sending payments to:

Southern New Hampshire University

Client 800100

PO Box 55008

Boston, MA 02205-5008

Payment Options

Industry Sponsors

The university cooperates with many company tuition sponsorship and reimbursement plans. Students attending under these plans should provide Student Financial Services the necessary authorization and inform the office how the tuition payment will be handled.

Deferred Tuition

Southern New Hampshire University offers a Deferred Tuition Plan for employer reimbursed students to take advantage of their employer's tuition benefit plan. SNHU allows students to defer tuition payments for 45 days after completion of coursework within a specified academic period. This is a contract between the student and Southern New Hampshire University. Participating students may carry a one-term outstanding balance, allowing access to registration for the next term.

To enroll in this payment option, the student would register and activate an account with ECSI, our third party Deferred Tuition Plan company. A new plan must be completed for each enrollment period. Students who are enrolled in the

Online Programs

Deferred Tuition Plan should work with their employer to receive direct reimbursement. Tuition payment is solely the student's responsibility and is not dependent on grades, employment status or date of reimbursement from their employer.

If full payment is not received 45 days from the last day of the term, the student's personal debit/credit card on file will be charged. However, if the student pays their balance before the 45 day deadline, they may log back into ECSI to cancel the scheduled tuition payment.

Active Duty Military

First time students using tuition assistance must present a tuition assistance form from the military branch in which they are enlisted. Continuing students may enroll in successive trimesters without making initial payments but must submit tuition assistance forms to allow direct billing and payment from the military. If a tuition assistance form is not provided, the student's account will be placed on financial hold, which will prevent future registration, and the student will be responsible for the unpaid balance.

Third Party Direct Billing

Students may authorize direct billing from the university to a third party. Students must first submit a voucher, letter of credit or military tuition assistance form to Student Financial Services. The voucher must include beginning and end dates of the academic period, courses covered, books, and other fees covered (if any) and maximum dollar value. Paperwork is due before the term start date. Payers will be billed at the beginning of the academic period covered by the voucher. Payment is due within 30 days of the billing. Student reimbursement based upon satisfactory completion of the course and grades are not subject to third party billing.

Credit and Collections Policy

All outstanding balances are the student's responsibility to pay. Unpaid balances may be subject to further collections efforts as detailed below.

Other Information

All students with unresolved balances must contact the Credit Department for resolution. The Credit Department can be reached at:

Email: credit@SNHU.edu

Phone: 1-888-867-7376

Fax: 1-603-668-0259.

- Registration for future classes may be withheld if the student owes a balance.
- Students with unresolved balances will be placed on Financial Hold.
- All student accounts sent to a third-party collection agency will be reported to the credit bureaus.
- The Credit and Collections Policy is at the discretion of the Credit and Collections Department and subject to change without notice.
- Students acknowledge and authorize SNHU and/or its agents, including attorneys and/or collection agencies to allow contact via cellular telephone and /or all forms of electronic technology, unless such party is notified in writing to cease such communication.

College for America Students

CfA Student Financial Services

Online Programs

MySNHU provides quick access to your billing, payment and financial aid information. Through this site you can access your invoice, check your balance and make payments to your account on-line. If you have any questions, please contact Student Financial Services at 1-877-455-7648, option 3 or email sfscfa@snhu.edu.

Payment Options

Payment Plan

Students who wish to participate in a monthly payment plan may do so by completing a contract with Tuition Management Systems (TMS). Students will receive instructions via email to complete this plan prior to the start of every trimester. If the student fails to make 2 payments within a trimester, TMS will cancel the contract and tuition will then be immediately due to the University.

Title IV Federal Financial Aid

Students enrolled at College for America may be eligible to receive Title IV federal financial aid. A student pursuing his or her degree may apply for Federal Title IV financial aid by completing the Free Application for Federal Student Aid (FAFSA) form. A FAFSA form may be completed at www.fafsa.gov. When prompted, list Southern New Hampshire University's federal school code: 002580. The student must meet all eligibility requirements to qualify. If you have any questions regarding eligibility, please contact Student Financial Services at 1-877-455-7648.

Third Party Billing

A student eligible to participate in third party direct billing, in which a third party will authorize direct billing from the University, must first submit a third party voucher/letter to the Student Financial Services Office. The voucher must include beginning and end dates of the academic trimester, other fees covered (if any) and the maximum dollar value of the voucher. The voucher must be submitted prior to the payment due date.

Employee Reimbursement

Many CFA corporate and community partners provide tuition reimbursement for their employees. The specific policies regarding employee tuition reimbursement are determined with each partnering organization. Students should contact their Human Resources Department for information regarding specific employee reimbursement programs.

Deferred Tuition Plan

A student receiving tuition benefits from an employer/partner may qualify for deferred tuition. A student on a Deferred Tuition Plan Contract may carry a one-trimester outstanding balance. Eligibility is based on completion of a Deferred Tuition Plan Contract prior to the payment due date. The Deferred Tuition Plan Contract must be renewed each trimester.

Student Account Payment Due Date

Tuition must be paid prior to the start of the trimester.

Credit and Collections Policy

Online Programs

All outstanding balances are the student's responsibility to pay. Unpaid balances may be subject to further collections efforts as detailed below.

Other Information

All students with unresolved balances must contact the Credit Department for resolution. The Credit Department can be reached at:

Email: credit@SNHU.edu

Phone: 1-888-867-7376

Fax: 1-603-668-0259.

- Registration for future classes may be withheld if the student owes a balance.
- Students with unresolved balances will be placed on Financial Hold.
- All student accounts sent to a third-party collection agency will be reported to the credit bureaus.
- The Credit and Collections Policy is at the discretion of the Credit and Collections Department and subject to change without notice.
- Students acknowledge and authorize SNHU and/or its agents, including attorneys and/or collection agencies to allow contact via cellular telephone and /or all forms of electronic technology, unless such party is notified in writing to cease such communication.

Printing on Campus (PenmenPrint)

Students who use on campus printing are provided with an allotment for printing. This service is called PenmenPrint. All active student accounts will receive two printing allotments a year of \$50 each, which will be distributed on January 1st and July 1st of each year. PenmenPrint accounts will stay active the same length of time that a student's email remains active.

Refund Policy

University College

Students who withdraw from the university may be eligible to receive a refund according to the policy listed below that applies to their situations. This policy is also applicable to part-time undergraduate day school students.

Student accounts will be adjusted within 30 days of the notification of withdrawal.

Tuition, on-campus room and meal plans are canceled/reduced based on the following schedule for standard day school students and is the same schedule for institutional merit and need awards:

- 100 percent refund before the first day of the term (includes fees).
- 90 percent refund from day 1 to day 10 of the term.
- 50 percent refund from day 11 to day 25 of the term.
- 25 percent refund from day 26 to day 52 of the term.
- No refund after day 52 of the term.

Note: The refund calculation is based on calendar days.

Fees: No refund after the first day of class.

Meal plan refunds are based on the remaining balance the student has at the time of the withdrawal date.

Example: If a withdrawal occurs on day 5 of a semester, then tuition, on-campus room and meal plan (if applicable) would be refunded by 90%. Each SNHU merit and need award would be reduced by 90% as well. A revised award letter is provided for notification of award reductions.

College of Online and Continuing Education (COCE)

Undergraduate students may drop a course during the first week of a term, and the dropped course will not appear on the student's academic transcript. Undergraduate students may withdraw from courses at any time during the second through fourth week of the undergraduate term with the course grade of "W". Any withdrawals after the fourth week may only be allowed for significant conditions beyond the student's control (e.g. serious illness documented by a physician's letter), as determined and approved by COCE administration, and will be processed at no refund. Withdrawals are not permitted in the last week of class. This policy also applies to an undergraduate student taking a 16-week course.

The following policies apply to ALL students taking online or center-based face-to-face and hybrid courses.

Online Programs

Undergraduate Students:

Withdrawals from courses (all types, including online, hybrid, and face-to-face courses):

- During Week 1 (Drop period): No tuition fee charged or 100% refund if full payment is submitted
- During Week 2: 50% tuition fee charged or 50% refund if full payment is submitted
- After Week 2: 100% tuition fee charged or no refund if full payment is submitted.

For the purpose of withdrawals, all term weeks start on Monday and end on Sunday 11:59pm EST. Holidays during the week do not impact the Sunday 11:59PM deadline.

Graduate Students:

Withdrawals from courses (all types, including online, hybrid, and face-to-face courses):

- During Week 1 (Drop Period): No tuition fee charged or 100% refund if full payment is submitted
- During Week 2: 50% tuition fee charged or 50% refund if full payment is submitted
- After Week 2: 100% tuition fee charged or no refund if full payment is submitted

For the purpose of withdrawals, all term weeks start on Monday and end on Sunday 11:59 pm EST. Holidays during the week do not impact the Sunday 11:59PM deadline.

College for America Program

Cancellation and Refund Policy

Students have 14 days from the start of the trimester to cancel enrollment and receive a full refund of any tuition paid for that trimester. If the student withdraws after the 14-day period, the student will be responsible for the full tuition amount. If the student withdraws or is dismissed from CFA, the University and/or the student may be required to return a portion of any Federal Title IV financial aid received. A Return of Title IV calculation will be performed for any student who has received Federal Title IV financial aid to determine the amount of federal aid that must be returned to the federal government by the University and the student.

Return of Military Tuition Assistance

Return of Military Tuition Assistance

Military Tuition Assistance (TA) is awarded to a student under the assumption that the student will attend for the entire period for which the assistance is awarded. When a student withdraws or stops attending, the student may no longer be eligible for the full amount of TA funds originally awarded.

SNHU will return any unearned TA funds on a proportional basis to comply with Department of Defense policy. TA funds are earned proportionally, during an enrollment period, with unearned funds returned based upon when a student stops attending. Any SNHU balance due to a TA return is the responsibility of the student.

SNHU divides the number of days attended by the number of days in the term. This percentage (standard rounding to three decimal places) represents the earned TA amount for the term and the remaining percentage will identify the amount of unearned TA funds. The amount of unearned aid is rounded to the nearest dollar using standard rounding rules. However, if the student has attended to earn greater than 60% of the term, then s/he is considered to have earned 100% of his/her Tuition Assistance.

Calculation Example:

A term start date is August 31 and the end date is October 25. The total days for the term is 56 days. The student withdraws on September 23 which is day 24 of the term. The percentage of earned aid would be 42.9% (24 days/56 days) and the unearned aid percentage is 57.1%.

- If the student received \$1,350 in Tuition Assistance, then the student earned \$579 in TA funds and \$771 is the unearned amount of TA funds.
- SNHU is responsible for returning the unearned amount of TA funds (\$771) to the military branch that issued the assistance.
- The student is responsible for the immediate payment of the balance on the account.

In instances when a service member stops attending due to a military service obligation during the term, SNHU will remove the student from the coursework and will scholarship the amount owed to SNHU due to a return of unearned TA funds so no debt is incurred by the student. Please note – prior-existing service obligation will not warrant the reversal of charges. The service member will be required to provide documentation in the form of current military orders, signed letter from the

Online Programs

command, or a similar form of documentation.

Tuition and Fees

Online Undergraduate Program Tuition	Per Credit Hour	Per 3 Credit Course	Annual Cost for 30 credits

Withdrawal and Proration of Fees

Undergraduate students may drop a course during the first week of a term, and the dropped course will not appear on the student's academic transcript. Undergraduate students may withdraw from courses at any time during the second through fourth week of the undergraduate term with the course grade of "W". Any withdrawals after the fourth week may only be allowed with approval by the academic advisor and will be processed at no refund. Withdrawals are not permitted in the last week of class. This policy also applies to an undergraduate student taking a 16-week course.

The following policies apply to ALL students taking online or center-based face-to-face and hybrid courses.

Submission of Withdrawals

Requests to withdraw must be submitted via this [form](#) in mySNHU. In all cases, the date of withdrawal is the date the completed form is received. No paper withdrawal forms or emails will be accepted.

Tuition Fee & Refunds

Undergraduate Students:

Course Withdrawals (all types, including online, hybrid, and face-to-face courses):

- During Week 1 (Drop period): No tuition fee charged or 100% refund if full payment is submitted
- During Week 2: 50% tuition fee charged or 50% refund if full payment is submitted
- After Week 2: 100% tuition fee charged or no refund if full payment is submitted

For the purpose of withdrawals, all term weeks start on Monday and end on Sunday 11:59pm EST. Holidays during the week do not impact the Sunday 11:59PM deadline.

Graduate Students:

Course Withdrawals (all types, including online, hybrid, and face-to-face courses):

- During Week 1 (Drop period): No tuition fee charged or 100% refund if full payment is submitted
- During Week 2: 50% tuition fee charged or 50% refund if full payment is submitted
- After Week 2: 100% tuition fee charged or no refund if full payment is submitted

For the purpose of withdrawals, all term weeks start on Monday and end on Sunday 11:59pm EST. Holidays during the week do not impact the Sunday 11:59PM deadline.

Financial Aid Disbursements

All tuition charges and withdrawal requests are subject to review, and students who withdraw may be responsible for paying back part or all of their financial aid disbursement for that term. In addition, withdrawals may have an impact on a student's eligibility for future financial aid. Please contact the Student Financial Services office at 1-877-455-7648 or via email at studentfinance@snhu.edu for details.

Participation Policy Unofficial Withdrawal

Ongoing participation in courses and completion of assignments are two critical components to student success. The institution does not monitor attendance and withdraw students who stop participating, but students who use financial aid and fail all courses within a term will be reviewed for participation. Students who cease participation in graded activities before 60 percent of the term are classified as an "unofficial withdrawal" and may result in an adjustment of their Financial Aid. The last date of participation is defined as the last day the student participated in a graded activity within the course. This recalculation may result in a balance on their account and could place students' future financial aid funding and registration at risk.

Student Code of Conduct

Academic Honesty Policy

Please go [here](#) to view the Academic Integrity Policy.

Academic Integrity Policy

Standards of Academic Integrity

As an academic community committed to fostering an ethical and intellectual environment, Southern New Hampshire University holds its students to these standards of academic integrity; the University expects that all aspects of a student's educational path are conducted with the highest degree of integrity, accountability for one's own work, and respect for the intellectual property of others. Violations of these academic standards, such as cheating and plagiarism, will result in sanctions. This policy identifies the behaviors and sets the guidelines that members of the SNHU academic community are expected to follow.

Academic Integrity Expectations

All members of the university community have a responsibility to acquaint themselves with the expectations for academic integrity noted within this policy. Faculty and staff are asked to join in educating students about academic integrity, while students are expected to understand and follow policy, engaging in ethical academic practices.

A student remains responsible for the academic integrity of work submitted in courses at Southern New Hampshire University even if the student has received a final grade. Ignorance of these standards will not be considered a valid excuse or defense.

Academic Integrity Definitions

Violating the University's standards of academic integrity constitutes a serious offense. Violations of academic integrity include, but are not limited to, the major behaviors below:

Academic Misconduct: The intentional violation of college policies by tampering with grades or taking part in obtaining or distributing any part of a test, quiz, or graded assignment. Academic Misconduct includes, but is not limited to:

- Stealing, buying, downloading, or otherwise obtaining any coursework
- Distributing materials for the purpose of cheating
- Asking or bribing any other person to obtain a test or any information about a test
- Misrepresenting the truth; lying to an instructor to increase a grade; and lying or misrepresenting facts when confronted with an allegation of academic dishonesty
- Changing, altering, or being an accessory to changing and/or altering of a grade in a grade book or any other academic record, on a computer, on a test, on a "change of grade" form, or on other official academic records of the college that relate to grades.
- Sabotaging the work of another student
- Altering, forging, or misusing University-related documents
- Intentionally reporting a false violation of academic integrity
- Offering a bribe to any University member in exchange for special consideration or favors.

Alteration or Fabrication of Data: The submission of data not obtained or generated by the student during the course of research. The deceitful alteration of data obtained by the student during the course of research.

Cheating: The act of deceiving, which includes such acts as, but is not limited to:

- Using unauthorized notes, materials, or other study aids during course work
- Using unauthorized technology in completing course work
- Obtaining or providing assessment materials prior to its administration
- Allowing another person to do one's work and submitting it as one's own
- Doing work for another person for them to submit as their own
- Obstructing or interfering with another student's academic work
- Undertaking any activity intended to obtain an unfair advantage over other students
- Or whatever else is deemed contrary to the rules of fairness, including special rules designated by the instructor/reviewer in the course/competency

Conspiracy: Agreeing with any other person to commit or attempt to commit academic dishonesty.

Contract Cheating: The obtaining of academic work from another person or entity that is then submitted for academic credit as if the student had created the work themselves. Contract cheating can include, but is not limited to:

- The exchange of work for money or other goods, such as providing your own academic work to another or receiving work done by another person
- Can occur on a single assignment, an entire course, or multiple courses in an academic program

Online Programs

Electronic Devices: Examples of the improper use of electronic devices (such as personal computer, tablet, cell phone, and other devices) include but are not limited to:

- Unauthorized access, modification, use, creation, or destruction of data stored on electronic devices
- Selling or giving away all or part of the information on electronic devices that will be used as graded material
- Sharing an electronic device while leaving answers on display or in memory.

Misrepresentation: The substitution of another student/individual during the taking of a quiz/examination or for the completion of a course. Submitting a duplicate assignment with the student's name changed.

Plagiarism: The use, whether by paraphrase or direct quotation, of the published or unpublished work of another without full and clear acknowledgment through proper citation. Examples include:

- Misrepresentation of sources used in a work for which the student claims authorship
- Improper use of course materials in a work for which the student claims authorship
- Submission of written work such as laboratory reports, computer programs, or papers that have been copied from the work of other students, with or without their knowledge or consent.

A student can avoid the risk of plagiarism in written work, oral presentations, or other critical tasks by clearly identifying and indicating, either in citations or in the paper or presentation itself, the source of the idea or wording that they did not produce. Sources must be given regardless of whether the idea, phrase, or material is quoted directly, paraphrased, or summarized in the student's own words.

Self-Plagiarism: Self-plagiarism is work done for one course and submitted to another and refers to work previously submitted at this or any other institution to fulfill academic requirements in another class, to include repeated classes. Slightly altered work from one course that has been resubmitted to another is also considered to be fraudulent. In some instances, instructors may allow a certain amount of work from a prior course to be repurposed; students who wish to do this must seek express approval from the instructor in advance. Under no circumstances will a complaint be considered if resubmitted work earns a different grade than from the original submission. Some programs may have outlined exceptions to this policy including in their curricular expectations.

Unauthorized Collaboration: Unauthorized collaboration is the sharing of work completed for an assignment, project, quiz, or examination questions or answers with another student without the permission of the faculty member. Examples of unauthorized collaboration include, but are not limited to:

- Copying another student's academic work
- Allowing another student to copy one's work
- Group collaboration on individual assignments without express permission of the faculty member.

The processes for addressing concerns regarding academic integrity can be found in the current Student Handbook.

Support Services

ADA/504 Grievances

1 Introduction

Southern New Hampshire University (the University) is dedicated to providing equal access to individuals with disabilities in accordance with Section 504 of the Rehabilitation Act of 1973 and Title III of the Americans with Disabilities Act (ADA) of 1990, as amended by the Americans with Disabilities Act Amendments Act of 2008. The University prohibits unlawful discrimination on the basis of disability and takes action to prevent such discrimination by providing reasonable accommodations to eligible individuals with disabilities. The University has adopted this policy providing for prompt and equitable resolution of complaints regarding any action prohibited by the ADA or Section 504.

2 Definitions

Complaint	Disability discrimination concern handled informally through the appropriate department as outlined in the Informal Complaint Process
Grievance	Disability discrimination concern handled formally through the appropriate department as outlined in the Formal Grievance Process

3 Policy

Online Programs

3.1 Scope

It is the policy of Southern New Hampshire University to not discriminate on the basis of disability. This policy extends to all rights, privileges, programs, and activities including housing, employment, admissions, financial assistance, and educational and athletic programs. It is also the policy of the University to provide reasonable accommodations to persons with disabilities unless such accommodations would impose an undue burden or fundamental alteration to the program in question; or for employees, would unreasonably interfere with the performance of the position's essential functions.

3.2 Purpose

The purpose of this policy is to ensure that all complaints based on disability are thoroughly and fairly investigated by the authorized units of the University, which will conduct an adequate, reliable, and impartial investigation of all complaints, with due regard for the rights of all parties. The University will take steps to prevent the recurrence of any discrimination or harassment and to correct its discriminatory effects on the complainant and others, if appropriate. Retaliation against any individual who has filed a complaint, or who has cooperated in the investigation of such a complaint, is unlawful and in violation of University policy.

The University has adopted an internal grievance process providing for prompt and equitable resolution of complaints regarding any action prohibited by the Americans with Disabilities Act (ADA) and by the Department of Education regulations implementing Section 504 of the Rehabilitation Act of 1973, as amended. Section 504 states, in part, that "no otherwise qualified individual with a disability...shall solely by reason of his or her disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance..." Complaints can include physical, electronic, or programmatic barriers (such as an inoperative elevator, an inaccessible website, or a blocked access ramp), a refusal to make a reasonable accommodation, failure to follow an approved accommodation, the inadequacy of an accommodation that has been granted, etc.

4 Procedure

Any student, faculty, staff, or member of the public who believes he or she has been subject to discrimination on the basis of disability, by any party, may file a complaint or grievance under this procedure. Concerns can be handled through an *informal complaint process* or can be escalated to a more *formal grievance process*. Steps for both options are outlined below.

Southern New Hampshire University will make appropriate arrangements to ensure that persons with disabilities are provided reasonable accommodations, if needed, to participate in the grievance process. The complainant should contact the ADA/504 Compliance Coordinator by email at adacompliance@snhu.edu or phone 603.645.9664 for such arrangements.

Informal Complaint Process

The University encourages the informal resolution of complaints and will assist any individual with that process. The University is also committed to the prompt investigation and resolution of concerns pertaining to the civil rights of individuals attending the University, employed by the University or participating in University functions, of which it is aware regardless of the filing of an actual grievance. Complaints can be resolved informally by:

- Online & Advantage students should contact:

Director, Online Accessibility Center

866.305.9430

oac@snhu.edu

- Campus students should contact:

Director, Campus Accessibility Center

603.644.3118

cac@snhu.edu

- Staff and Faculty of the University should contact their local HR Business Partner or request information from:

Online Programs

Hr4u@snhu.edu

- Members of the public and those with questions should contact:

ADA/504 Compliance Coordinator

adacompliance@snhu.edu

Phone: 603.645.9664

- Students working in a paid capacity for the University should contact the appropriate department depending on the circumstances. Student-related complaints would be handled through the student channels listed above. Employment-related complaints would be handled through Human Resources.

Formal Grievance Process

1. An individual dissatisfied with the informal resolution attempt or wishing to forego an informal resolution may follow the more formal grievance process. A formal grievance should be filed as soon as possible after the incident or informal resolution attempt and no more than 180 calendar days from date of the incident. A formal grievance must be filed in writing and should contain a statement of facts, as specific as possible, regarding the concern or action. Any person having an issue with completing the grievance form may contact the ADA/504 Compliance Coordinator by email at adacompliance@snhu.edu or by phone at 603.645.9664 for assistance.

- **Online & Advantage:**

Students should file a grievance using the following form: https://cm.maxient.com/reportingform.php?SouthernNHUnivCOCE&layout_id=3

- **Campus:**

Students should file a grievance using the following form: https://cm.maxient.com/reportingform.php?SouthernNHUnivCOCE&layout_id=55

- **HR:**

Staff and Faculty should contact their local HR Business Partner or request information from Hr4u@snhu.edu

- The formal grievance process for employees will differ from the steps below. Employees should refer to the Employee Handbook and Master Agreement for details on the employee grievance process. Contact Human Resources for more information.

- **Members of the public:**

- Members of the public may file a formal grievance by requesting a formal grievance form from the ADA/504 Compliance Coordinator by email at adacompliance@snhu.edu or by phone at 603.645.9664.

- The formal grievance process for members of the public will be similar to the processes identified below and will be investigated by the appropriate reviewer depending on the nature of the grievance.

- Students working in a paid capacity for the University should contact the appropriate department depending on the circumstances. Student-related complaints would be handled through the student channels listed above. Employment-related complaints would be handled through Human Resources.

Online Programs

1. To be timely, a formal grievance must be filed within 180 calendar days of the date the incident.
2. Once a formal grievance form is received, the reviewer will investigate the matter set forth in the written grievance, as may be appropriate, within 20 working days following the opening of a grievance. These rules contemplate thorough investigations, affording all interested persons and their representatives, if any, an opportunity to present witnesses and submit evidence relevant to the grievance. In conducting an investigation, the reviewer may forward a copy of the grievance statement to the persons whose actions (or inactions) are the subject of the grievance and may request a written response from appropriate individuals within the University. The reviewer may also interview witnesses, meet with concerned parties, receive oral or written statements, and make other appropriate inquiries.
3. The reviewer will issue a written determination as to the validity of the grievance and a description of the resolution, if any, and forward a copy to the complainant's SNHU email account, and respondent if applicable, no later than 20 working days after the grievance is received. The deadline may be extended for good cause.

● **Online:**

After completing the investigation, if no discrimination is found, the reviewer will forward a copy of the report and recommendation to the Senior Director of Dispute Resolution. If discrimination is found, the reviewer will forward a copy of the report and recommendation to the appropriate University officials as follows:

COCE:

- If the grievance arises out of an academic unit, the report will be forwarded to the Senior Director of Dispute Resolution as well as the Dean of the appropriate school or college, unless he or she is the subject of the grievance. In such cases, the report will be sent to the COCE Vice President of Academic Affairs (or designee).
- If the grievance arises from a non-academic unit, the report will be forwarded to the Senior Director of Dispute Resolution as well as the administrative head of the unit, unless he or she is the subject of the grievance. In such cases, the report will be forwarded to the COCE Associate Vice President of Student Experience (or designee).
- In all cases, formal written notification will be sent to the student's SNHU email account at the conclusion of the investigation.

CfA:

- If the grievance arises out of an academic unit, the report will be forwarded to the Senior Director of Dispute Resolution as well as the Director of Academic Operations, unless he or she is the subject of the grievance. In such cases, the report will be sent to the Executive Director of CBE Programs (or designee).
- If the grievance arises from a non-academic unit, the report will be forwarded to the Senior Director of Dispute Resolution as well as the Associate Vice President of Student Experience.
- In all cases, formal written notification will be sent to the student's SNHU email account at the conclusion of the investigation.

● **Campus:**

After completing the investigation, if no discrimination is found, the reviewer will forward a copy of the report and recommendation to the Director of Campus Accessibility Center. If discrimination is found, the reviewer will forward a copy of the report and recommendation to the appropriate University officials as follows:

- If the grievance arises out of an academic unit, the report will be forwarded to the Director of Campus Accessibility Center as well as the Dean of the appropriate school or college, unless he or she is the subject of the grievance. In such cases, the report will be sent to the Vice President of Academic Affairs (or designee).
 - If the grievance arises from a non-academic unit, the report will be forwarded to the Director of Campus Accessibility Center as well as the administrative head of the unit, unless he or she is the subject of the grievance. In such cases, the report will be forwarded to the supervisor of the administrative head of the division.
 - In all cases, formal written notification will be sent to the student's SNHU email account at the conclusion of the investigation.
1. Southern New Hampshire University will keep all files and records related to the grievances filed for seven years.
 2. The complainant, or respondent if applicable, may appeal the decision of the initial grievance within 10 working days to the ADA/504 Compliance Coordinator who will involve other University officials as deemed necessary. A link to the appeals form will be included in the formal written notification sent to the complainant, and respondent if applicable, at the conclusion of the formal investigation.

The appeal must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the current resolution. In the written appeal, the appellant must explain why he or she believes the factual information considered was incomplete, the analysis of the facts was incorrect, and/or the

Online Programs

appropriate standard or procedure was not applied, *and* how this should change the University's determination of the matter.

A copy of the ADA/504 Compliance Coordinator's written decision will be sent to the reviewer of the formal grievance, the Senior Director of Dispute Resolution (for Online and Advantage students) or Director of Campus Accessibility Center (for Campus students), and the complainant's SNHU email account, and respondent's if applicable, within 20 working days of the filing of the appeal. The decision of the ADA/504 Compliance Coordinator is final.

1. The informal resolution option remains available at all stages of a grievance, up to and including appeal.

These rules will be construed to protect the substantive rights of interested persons, meet the appropriate due process standards, and assure that Southern New Hampshire University complies with the ADA and Section 504 and their implementing regulations. Any of the above time frames for the University may be extended if the University determines there are extenuating circumstances. Examples of extenuating circumstances include University holidays and absence or illness of witnesses or personnel. Under such circumstances, the complainant, and respondent if applicable, will be notified in writing as to the delay and a projected date for resolution.

Accounting and Finance (MS)

Description

The M.S. in Accounting/Finance is an inter-disciplinary degree program intended to provide students with a blend of knowledge and skills required of career professionals in these highly complementary fields. The fourteen course program (beyond program prerequisites) requires a near equal mix of accounting and finance coursework and prepares students for management positions in a wide range of organizations which require a working knowledge of budget analysis, accounting theory, financial decision making, and corporate finance.

Program Outcomes

1. Employ best cost accounting and statistical testing methods to inform strategic corporate decision-making and promote optimal impact on business operations
2. Analyze and apply best practices in financial reporting as determined by both domestic and international regulations and laws
3. Implement sound financial, tax, and auditing strategies to ensure legal and regulatory compliance while informing business decisions
4. Apply financial theories and research to construct efficient investment portfolios
5. Develop and employ targeted communication strategies to inform stakeholders of business objectives as guided by the overall accounting and financial health of the organization

Accounting (BS)

Online Programs

Description

The Accounting Program provides students with the educational prerequisites required for the certified public accountant examination, certified management accountant examination, certified internal auditor examination and a host of other professional titles related to accounting and taxation. Accounting students will receive general instruction in business and a thorough education in all areas of accounting, finance and taxation. Students majoring in accounting will be able to specialize in either the financial or managerial fields of accounting. An internship also is available in this program. Students will be able to take additional electives to supplement their knowledge or to further specialize their educations.

Program Outcomes

1. Analyze and apply the rules and regulations for financial accounting and reporting and how they are established in a global economy
2. Generate financial records and financial statements for internal and external users in accordance with applicable governing rules and regulations
3. Plan and prepare tax returns using knowledge of tax laws and regulations
4. Analyze, interpret and communicate accounting information to various internal and external stakeholders
5. Audit financial information and controls employing effective techniques and in accordance with professional standards
6. Apply professional ethics to guide conduct and decision-making in the field of accounting

Accounting (Graduate Certificate)

Description

Graduate Certificates may be pursued as independent programs of graduate study by students who already possess graduate business degrees and wish to enhance or update their skills in specific business disciplines, or who hold bachelor degrees and have the necessary educational background and professional experience. Graduate Business degrees and Graduate Certificates may be pursued concurrently. Courses successfully completed for a Certificate Program may later be applied to a graduate degree program. Successful completion of a Certificate Program requires that the student maintain a GPA of at least 3.0 and earn no more than one grade of "C+" or lower. Demand for individuals with accounting expertise is on the rise in the business world. This Graduate Certificate is a first step toward a variety of professional certifications such as a Certified Public Accountant (CPA), Certified Internal Auditor (CIA) or Certified Management Accountant (CMA). Completion of the certificate may lead to new career opportunities in public and private accounting. All courses taken in the certificate program could be applied toward an M.S. in Accounting for those students who decide to continue their graduate education.

Accounting (MS)

Online Programs

Description

The M.S. in Accounting curriculum offers concentrated studies in accounting for a broad-based study of management related to the application of accounting theory. The Master of Science in Accounting program is designed for students to gain a foundation in current accounting issues while exploring coursework relevant to your professional development, such as public accounting, auditing, forensic accounting, management accounting, or taxation. The content of this program aligns with the Content and Skill Specification Outlines (CSOs/SSOs) set by the American Institute of Certified Public Accountants (AICPA). Contact the Board of Accountancy in your state for complete details. The M.S. in Accounting program requires a minimum of 12 and a maximum of 21 graduate courses (3 credits each) as determined by a student's undergraduate background in business and undergraduate major. Students with 6 or more college-level credits in the disciplines of mathematics, economics, and accounting are exempt from "Level I Courses." Other courses are eligible for exemptions or waivers if a student has an undergraduate major or concentration in accounting or accounting/finance. A list of courses, including those eligible for exemption (followed by an asterisk) or waivers, is presented below.

Program Outcomes

1. Employ discipline-specific research strategies to appraise the effectiveness and limitations of financial accounting and reporting practices in a global economy
2. Generate complex financial statements for internal and external users including effective compliance with full-disclosure and in accordance with applicable governing rules and regulations
3. Apply IRS rules for tax planning to minimize the tax liability of individuals and organizations
4. Analyze, interpret and communicate to all stakeholders the significance of accounting information as it relates to an organization's strategic plans
5. Prepare components of financial statements in accordance with both US GAAP and IFRS reporting requirements
6. Assess an audit plan for compliance with PCAOB audit standards

Applied Economics (MS)

Online Programs

Description

Today's businesses and governments are wrestling with the proliferation of data being produced, collected, and analyzed. The skills and the knowledge that are needed in today's economy are constantly changing, in part due to advances in technology, yet mathematics and analytical skills are being given a renewed importance in the business world. Businesses are now growing on the back of mathematics, statistics, spreadsheets and econometrics. There is an increased demand within organizations to make big decisions with micro and macro-economic data, thus the need for professionals with specialized skills and education in applied economics to fill the tremendous talent gap is increasing today. The M.S. in Applied Economics provides rigorous technical and analytical training and explores diverse theoretical schools of thought. The courses will balance the most important aspects of the core of microeconomics, macroeconomic and econometric theory through a number of applied courses. The degree program focuses on the theoretical understanding, empirical investigation and analysis, and policy understanding and analysis. The Applied Economics graduate degree prepares students for real-world impact by analysis of empirical models based on the advanced micro and macro-economic theories and economic policies presented throughout the courses. Students in the program are engaged in advanced technologies for empirical analysis, visualization, modeling, and optimization while understanding the requirements and needs of the organizational environment through business research and in-depth analysis of the micro and macro environment. Students in the M.S. Applied Economics will acquire critical skills in data collection, data processing, investigative questioning techniques, building advanced economic models, formulating problem statements and hypotheses, econometric and empirical analysis, as well as the communication and presentation of findings. Graduates of this program will be prepared for professional careers as analysts, economists or related analytical positions in public, private, and government sectors. The degree prepares students to position themselves as a strategic asset to any organization by being able to analyze micro economic data and create macro-economic models, thus being immediately beneficial to strategic decision-making for any organization.

Program Outcomes

1. Communicate economic principles, problems, findings, and risk in effective verbal, written, visual and graphical formats
2. Integrate appropriate economic theories and principles into the analysis of real-world organizational, social, and political issues
3. Design and execute sound research studies that effectively and appropriately incorporate quantitative data analysis, econometrics and other key economic tools and methods
4. Incorporate accuracy, precision, and ethical decision-making into the analysis and reporting of economic data
5. Evaluate the impact of a wide variety of internal and external influences on personal, professional, and governmental decision-making

Business Administration (BS)

Online Programs

Description

The Bachelor of Science in Business Administration emphasizes interpersonal skills, strategic problem solving, and operational principles. Students will gain a strong, comprehensive business education, becoming resourceful and creative thinkers in diverse, professional environments. A hallmark of the degree is the opportunity to apply theoretical knowledge and business skills gained in the program both inside and outside the classroom. Experiential learning opportunities such as simulations and internships are available in some cases to provide additional engagement and help students learn the importance of teamwork, adaptability, and agility in a business context. Additionally, students may benefit from valuable networking opportunities with the alumni community, industry professionals, and regional business partners. Business clubs and professional groups are available to students who would like to connect with faculty and peers and hone their skills. Through the study of problem-solving, communication, collaboration, innovation, and data-informed decision-making, students are prepared to be entrepreneurial thinkers and decision-makers in fast paced, complex environments. Students gain confidence in identifying business opportunities using current tools and technologies, leveraging data to address business needs, and collaborating effectively in a variety of situations. The program's core courses provide a well-rounded business administration foundation, and students have the opportunity to dive deeper into specific disciplines to enhance their skill-sets and prepare them to enter a variety of professional fields. In some cases, students may also work with faculty to create a customized pathway in conjunction with the foundation that builds skills to support them in achieving their personal and professional goals. Additionally, the flexibility of elective courses offered in both online and campus based experiences allow students to further explore customizing their educational experience.

Program Outcomes

1. Develop business management approaches that align with organizational philosophies and help build collaborative relationships with diverse teams
2. Problem-solve across functional areas by integrating personal values with ethical, legal, and socially responsible business practices
3. Articulate implications of global and societal contexts on business decisions
4. Recommend strategic and creative business options using data gathered through research and current technological applications
5. Communicate effectively to diverse internal and external audiences to contribute to a positive team climate and address various strategic and operational business needs

Business Analytics (Cohort MS)

Description

Southern New Hampshire University's Master of Science Degree in Business Analytics develops analysts who address organizational challenges by analyzing data, developing insights, and communicating with business leaders. This program prepares learners to operate at the intersection of business strategy and analytics technology through a focus on specialized skills, industry-relevant tools, and authentic projects. Learners will gain skills in descriptive, predictive, and prescriptive analytics, data visualization, and communication and collaboration. Graduates of this program will be prepared to position themselves as strategic partners who provide organizations with data-driven solutions to business problems.

Program Outcomes

1. Apply appropriate business analytics concepts, tools, and methods to address organizational challenges
2. Integrate business analytics methods with the use of information technologies to extract value from data sets
3. Provide insight from business analytics methods to inform data-driven solutions to organizational challenges
4. Professionally communicate business analytics conclusions and recommendations to technical and non-technical audiences using industry-standard written, presentation, and visualization formats
5. Collaborate in cross-functional teams as a solutions-oriented contributor who brings leadership and sound ethical judgement to projects

Requirements

Major Courses

30 Total Credits

- Complete:
 - QSO513 - Business Strategy (3)
 - QSO533 - Business and Financial Modeling (3)
 - QSO553 - Business Metrics and Data Storytelling (3)

Fashion Merchandising and Management (BS)

Online Programs

Description

The business of fashion remains impervious to the economic environment. Fashion in the US is a multi-billion dollar industry. Despite economic shifts, people still buy clothing, buyers still choose fashions to sell, and retailers and contract manufacturers still make and sell clothing. Graduates of fashion merchandising management programs must demonstrate the skills, knowledge, and ability required for careers in the field. The Fashion Merchandising and Management program at Southern New Hampshire University fills a niche in the New England fashion education marketplace. It is one of only seven such programs in New England. It provides a strong combination of business, fashion and experiential learning to students enrolled in the program. Students explore the ever-changing fashion industry by investigating how fashion apparel is developed, marketed and distributed. They learn how technological and organizational changes affect the business of fashion. Through field trips, guest speaker series and internships, students develop a broad perspective about the business of fashion. Upon successfully completing the program students develop an understanding of merchandise planning and operation systems.

Program Outcomes

1. Develop fashion merchandise planning strategies that integrate the retailer's positioning, vendor's interests, and plans for generating profit
2. Apply management theories and techniques in the fashion merchandising environment to achieve retail objectives and remain competitive
3. Collect and organize industry data through the use of qualitative and quantitative tools
4. Interpret data to predict influences of fashion trends in the fashion merchandising environment
5. Employ effective decision-making skills to select textile and production sources from both domestic and international markets

Fashion Merchandising (AS)

Online Programs

Description

The Associate in Science Fashion Merchandising offers students a concentrated course of study that prepares them for entry-level positions in soft goods retailing or wholesaling in the fashion industry. Many students choose careers in the merchandising or operations departments of specialty, department and discount stores. Others opt for positions in manufacturers' showrooms or as sales representatives. Fashion Merchandising students are required to participate in an internship that will combine valuable practical experience with theories learned in the classroom. Since many of our two-year degree recipients stay on to complete four-year degree programs, the transition between the two-year Fashion Merchandising program and its closely related four-year counterpart, the Retailing program, is a smooth one. Students anticipating transfer to a four-year degree program should consult with their advisors regarding the most effective choices of free electives. It also is possible for students to complement Fashion Merchandising courses with other majors, such as Marketing or Communications. Such pursuits are limited only by students' needs, interests and creativity

Program Outcomes

1. Apply basic design, fabric, and color theory as related to fashion merchandising
2. Explain the effect of merchandising planning and purchasing on the financial performance of a fashion business unit
3. Conduct basic analyses of the merchandising components of sales promotion plans for fashion items or lines of items
4. Apply basic psychological principles to sales techniques

Finance (BS)

Description

The Bachelor of Science (B.S.) in Finance is designed for motivated professionals who have an interest in the management of money and wish to pursue a career in finance. The curriculum builds upon the Southern New Hampshire University's general education and business core foundation of knowledge, which emphasizes communication, critical, creative, and entrepreneurial thinking, collaboration and teamwork, personal and social responsibility, problem solving and decision-making, and global orientation. The B.S. Finance prepares students for entry- to mid-level finance positions by providing solid foundational knowledge of the global economic environment, financial statement analysis, financial investments and markets, quantitative analysis, and topics related to wealth management. Equally important, an appreciation of ethics and the regulatory environment is emphasized.

Program Outcomes

1. Develop financial plans that utilize appropriate investment for counseling clients in making appropriate investment recommendations
2. Assess domestic and global economic environments and market conditions for supporting strategic goals and effective financial planning within organizations
3. Analyze organizational financial statements for forecasting and meeting organizational goals and objectives
4. Apply quantitative and qualitative methods of analysis for supporting sound financial decisions
5. Apply ethical and legal practices that comply with internal policies and external regulations to guide conduct and decision-making in the field of finance

Finance (BS) - Financial Planning (Concentration)

Description

The Financial Planning concentration provides a learning environment for students to explore and experience what a financial planner does in practice. Financial Planning curriculum focuses on the application of knowledge in order to prepare students for entry or advancement in a financial planning career. The curriculum builds upon the Bachelor of Science in Finance program foundation that is focused on foundational knowledge of the global economic environment, financial statement analysis, financial investments and markets, quantitative analysis, topics related to wealth management, ethics and the regulatory environment. Additionally, the curriculum is designed with the industry standards in mind. The Financial Planning concentration is well suited for individuals interested in pursuing a career as a personal financial advisor. Students will consider professional conduct and regulation, general principles and regulation, education planning, risk management and insurance planning, investment planning, tax planning, retirement savings and income planning, and estate planning, in order to develop and recommend financial plans for a variety of client situations.

Concentration Outcomes

1. Apply personal financial planning knowledge to identify immediate and long-range measures to increase income, reduce expenditures, and achieve financial stability

Finance (Graduate Certificate)

Description

Graduate Certificates may be pursued as independent programs of graduate study by students who wish to enhance or update their skills in specific business disciplines, or who hold bachelor degrees and have the necessary educational background and professional experience. Graduate Business degrees and Graduate Certificates may be pursued concurrently. Courses successfully completed for a Certificate Program may later be applied to a graduate degree program. Successful completion of a Certificate Program requires that the student maintain a GPA of at least 3.0 and earn no more than one grade of "C+" or lower. This program provides students pursuing the M.B.A. or other master of science degree with focused study in finance theory to enable them to pursue management positions in the financial services industry, including corporations, insurance companies, banks, investment firms and government agencies. All courses taken in the Certificate Program could be applied toward an M.S. in Finance for those students who decide to continue their graduate education.

Finance (MS)

Description

The M.S. Finance program is designed for professionals seeking the tools, knowledge, and analytical skills needed for effective business analysis, decision-making, and management in a wide variety of organizations, including non-financial corporations, banks, insurance companies, investment firms, and government units. The courses will cover the most important aspects of the core of finance including investments, capital budgeting, portfolio management, minimizing risk and maximizing return, and shareholder value. Today's business environment requires professionals to rapidly adapt to change, strategically assess resource constraints, and provide solutions to complex problems related to customers or clients, staff, structure, operations, and shareholders. Therefore, a demand exists for financial managers, analysts, and consultants who possess the skills and abilities necessary to effectively make well-informed and strategic decisions to better position their company within the market. The M.S. Finance curriculum and outcomes are aligned with the Chartered Financial Analysis Institute's (CFA) competencies and curriculum standards. While the degree does not directly lead to certification, graduates will be prepared to sit for a certification in financial analysis. In addition, graduates will be positioned to enter management-level positions in finance and related business professions to include, but not limited to financial analyst, investment consultant, U.S. interest rate strategy associate, product analyst, or risk analyst.

Program Outcomes

1. Analyze and evaluate long-term corporate investment opportunities to increase shareholder value
2. Implement theories of asset allocation, security analysis, and portfolio diversification to efficiently manage an investment portfolio
3. Formulate testable hypotheses and conduct statistical tests using financial data to inform strategic corporate decision-making
4. Evaluate and interpret the effect of macroeconomic events and financial market conditions on the firm's strategic objectives
5. Utilize the tools of risk management in corporate management and portfolio management to effectively balance the relationship between risk and return

Human Resource Management (MS)

Description

Human resource management has evolved significantly over the past 50 years from the industrial relations professional to a strategic partner of the C-level executives in modern corporations. It is increasingly vital that individuals interested in joining organizations as an HR professional are prepared to enter the workplace with the appropriate business acumen and technical knowledge, skills, and preparation necessary to support an organization's vision, mission, and goals. The Master of Science in Human Resource Management degree offers students an opportunity to develop advanced human resource management skills in critical areas that prepare them to be an effective business partner. The program takes an integrated approach to developing relevant HR expertise by focusing on communication and negotiation skills, critical legal and ethical principles, strategic HR program development, and the global and cultural context of HR today. These skills are all developed in applied settings where graduates will acquire the appropriate business skills that support HR functions while they gain expertise in human resources theory and management. The Master of Science curriculum and outcomes of the graduate program were developed in accordance with the guidelines set forth by the Society of Human Resource Management (SHRM) competencies and master's degree curriculum standards. Graduates of this program will be well equipped to enter management-level positions in human resources and related business professions.

Online Programs

Program Outcomes

1. Leverage effective customer service and negotiation strategies that build engaging relationships with stakeholders through trust, teamwork, and direct communication
2. Integrate appropriate talent development and workforce planning strategies to effectively align employee competencies with business goals and provide a measurable return on investment for an organization
3. Operate as an effective business partner and leader in human resources through clear, concise, and accurate communication skills
4. Protect the integrity of the business, its employees, and its management practices through appropriate risk management and legal and ethical practices
5. Recommend appropriate evidence-based strategies that integrate sound, data-driven analysis and critical decision-making to support the goals, vision, and mission of the organization
6. Articulate the importance of a global outlook and cross-cultural approach for human resource professionals in the interest of improving cultural competence and valuing the commonalities, values, and individual uniqueness of organizational members
7. Advance an organization's vision and mission through effective leadership strategies that foster collaboration, promote consensus, and guide the organization through adversity and change with resilience and agility
8. Design, implement, and evaluate strategic human resource programs that deliver customized human resource solutions for organizational challenges and contribute to the success of the business

Management (MS)

Online Programs

Description

Today's managers are tasked with a multitude of strategic and tactical responsibilities that require them to be agile, adaptive, and accountable to the organization. Managers are stewards of the organization and the business' brand and are responsible for developing talent accordingly while maximizing production and output in ethical, effective, and supportive ways. Additionally, organizations face massive changes in structure, products, and goals in the midst of an ever-changing political, diverse, decentralized and global landscape. It is crucial that graduate education prepares individuals interested in assuming or advancing in current management positions to tackle these challenges with data driven decision making, strong ethics, courage, agility, and practical application of proven management theory. The Master of Science in Management degree offers a wide range of students the opportunity to develop advanced management skills in a variety of areas and contexts. Students deepen their understanding in critical areas such as effective business communication, data-driven decision making, developing and supporting talent, project management, supporting and fostering stewardship of an organization's culture and brand, leadership, and strategic planning. In this way, the M.S. in Management positions graduates as those who can support an organization's mission, values, and goals by getting the most out of their teams, resources, and processes. Graduates from this program will be well-prepared to manage through an unpredictable, changing landscape of business in whatever industry they choose.

Program Outcomes

1. Utilize multiple methods for supporting and developing talent in employees in the interest of facilitating high performance teams, dispersing expert knowledge, and guiding teams through organizational change
2. Integrate effective verbal, written, presentation, and technical communication skills for gathering and presenting information, facilitating groups and teams, and building appropriate business relationships across the organization
3. Apply critical thinking, data analysis, and ethical reasoning to ensure strategic, systems-level decision-making in business and management
4. Create project and management plans that effectively prioritize tasks, stabilize resource conflicts, and integrate appropriate project management tools
5. Articulate the importance of business metrics, performance data, and financial analysis for maintaining accountability to the business in management plans and decisions
6. Evaluate how the brand, mission, and values of organizations can integrate with effective management practices to encourage an enterprising organizational culture and brand stewardship in employees and one's management approach

Marketing (BS)

Description

The Bachelor of Science in Marketing program allows students to explore and apply foundational traditional and digital marketing terms and concepts to solve complex challenges faced by marketers globally. This program provides students with the tools to understand consumers and the ability to develop comprehensive research-based marketing recommendations to organizations of all sizes. In addition to foundational project-based coursework, students will select marketing elective coursework that aligns best with their personal and professional interests.

Additional Information

Marketing internships allow Marketing majors additional opportunities to link marketing theory with practice.

Online Programs

Program Outcomes

1. Utilize primary and secondary data to determine the position of a product in the market
2. Recommend strategies for maximizing both internal and external opportunities through the effective use of the marketing mix
3. Develop strategic marketing plans in alignment with stated missions, objectives, and goals of the organizations
4. Employ effective written and oral communication skills appropriate to the professional marketing context
5. Apply legal and ethical principles to marketing activities
6. Collaborate in cross-functional internal and external environments to ensure the creation, capture, and delivery of value

Marketing (MS)

Description

The Master of Science in Marketing curriculum includes an in-depth program of marketing study, while at the same time providing a broad range of elective courses that facilitate and support students' success in the workplace. Marketing Core Requirements provide a general marketing context while Marketing elective offerings provide more detailed study of specific areas within the marketing discipline. In addition, involvement with a variety of other disciplines, such as international business, information technology, sport management, is possible through related elective courses, allowing students to investigate and apply marketing theory and perspective in specific areas of interest.

Program Outcomes

1. Analyze and interpret qualitative and quantitative data to align marketing plans to the strategic goals of an organization
2. Create integrated and aligned strategies for maximizing both internal and external opportunities through the use of marketing theory and practices
3. Distill information through diverse mediums to inform, negotiate and persuade internal and external stakeholders
4. Develop international marketing strategies that address the commercial, political, legal and cultural environments in a global economy
5. Ensure marketing practices are compliant within internal and external legal environments, regulatory standards and ethical practices
6. Manage a brand in cross-functional internal and external environments to ensure the creation, capture, and delivery of value

Operations Management (BS)

Description

The Bachelor of Science in Operations Management is designed to provide a solid foundation of knowledge for managing operations in manufacturing as well as service organizations. The curriculum builds upon the Southern New Hampshire University general education and business core foundation of knowledge, which emphasizes communication, critical, creative, and entrepreneurial thinking, collaboration and teamwork, personal and social responsibility, problem solving and decision-making, and global orientation. In order to prepare students to be effective operations managers, the Bachelor of Science in Operations Management will assist students in being competent in evaluating and applying continuous improvement practices for achieving sustainable operations and effective resource management. With a focus on providing students with the tools and skills necessary to use quantitative and qualitative techniques toward solving problems, students will be able to assess and apply operations management theory and best practices in a global context for the achievement of operational goals.

Program Outcomes

1. Assess and apply operations management theory and best-practices effectively in a global environment to achieve operational goals in support of business strategies
2. Evaluate and apply appropriate continuous improvement practices for achieving sustainable operations in a given environment
3. Utilize quantitative and qualitative techniques for solving problems with processes, procedures and products
4. Evaluate the internal and external factors that influence business sustainability and competitive advantages in business
5. Make operations-management decisions which create value while minimizing risk for the purposes of meeting specified customer requirements
6. Develop and apply appropriate resource management techniques for promoting accountability, sustainability, and organizational effectiveness

Organizational Leadership (MS)

Description

The M.S. in Organizational Leadership focuses on providing students with the opportunity to develop skills in leadership, communication, problem-solving and teamwork. These skills are critical for successfully managing and leading organizations in today's chaotic environment. The 12-course (36-credit) program is designed for both experienced professionals who are seeking to advance in their careers, and for individuals with limited professional experience who are seeking to develop skills that will prepare them to successfully manage and lead teams, departments, areas and organizations.

Program Outcomes

1. Evaluate business and societal trends in their historical, political, economic, financial, social, cultural, geopolitical, and technological context for the purpose of leading a business
2. Establish an environment that is conducive to the development of shared values, attitudes, and beliefs of a business
3. Integrate shared leadership, group processes, and organizational learning theories into strategic leadership
4. Coordinate the development of an organization's corporate social responsibility (CSR) policies and practices
5. Facilitate the reorientation of organizations through the effective application of change management strategies

Requirements

Foundation Courses

0 Total Credits

- Complete all of the following
 - Complete:
 - OL501 - Business Foundations (3)
 - If you are required to take this course, you may use the course as General Business Electives if you have General Business Electives required for your program. You will only receive credit ONCE for this course even though it satisfies the additional requirement of General Business Electives.

Project Management and Operations (MS)

Description

The Master of Science in Project Management and Operations is a 36-credit program that gives students the knowledge, skills, and education necessary to pursue or accelerate careers in Project Management and Operations Management. This program provides a market-relevant combination of a comprehensive business education with real-world applications.

Program Outcomes

1. Recommend strategies for optimizing production of goods and services based on a detailed analysis of existing processes, resources, and business goals
2. Identify and recommend total quality management (TQM) principles and methods appropriate to a given context
3. Create, evaluate, and assess project plans to ensure desired project outcomes
4. Recommend inventory management strategies and techniques for improving the efficiency of a supply chain
5. Evaluate operational and project management environments using quantitative tools and techniques
6. Manage cross-functional environments to ensure the achievement of operational and project management goals

Requirements

Project Management (Graduate Certificate)

Description

Graduate Certificates may be pursued as independent programs of graduate study by students who wish to enhance or update their skills in specific business disciplines and by students who hold bachelor degrees and have the necessary educational background and professional experience. Graduate Business degrees and Graduate Certificates may be pursued concurrently. Courses successfully completed for a Certificate Program may later be applied to a graduate degree program. Successful completion of a Certificate Program requires that the student maintain a GPA of at least 3.0 and earn no more than one grade of "C+" or lower. Project Management knowledge and skills are highly sought after by today's project-driven companies operating in the global market. The Project Management body of knowledge, tools and practices has grown over the years. This Certificate Program will prepare you to effectively manage the projects from start to finish.

Six Sigma Black Belt (Graduate Certificate)

Description

Graduate Certificates may be pursued as independent programs of graduate study by students who wish to enhance or update their skills in specific business disciplines and by students who hold bachelor degrees and have the necessary educational background and professional experience. Graduate Business degrees and Graduate Certificates may be pursued concurrently. Courses successfully completed for a Certificate Program may later be applied to a graduate degree program. Successful completion of a Certificate Program requires that the student maintain a GPA of at least 3.0 and earn no more than one grade of "C+" or lower. Six Sigma is one of the most widely used quality management approaches in today's business world. Six Sigma skills and certifications are highly sought after by business and supply chains competing in the global economy. This concentration will prepare you to effectively implement the Define-Measure-Analyze-Improve-Control (DMAIC) approach to identify the root causes of process inefficiencies and eliminate the same. It will also help you in preparing for Six Sigma Green Belt and Black Belt certification exams.

Requirements

Sport Management (BS)

Description

The Bachelor of Science in Sport Management provides students with the fundamental business knowledge and sport management skills necessary to become successful, well-trained managers and leaders in the global sports industry. This degree program will provide an innovative educational experience grounded in relevant theory and practice that enables students to gain practical sport management skills such as strategic planning, project management, team leadership and dynamics, entrepreneurship, and marketing and sales. Throughout the program, students will engage with and complete courses in sport management, business, and the liberal arts. The program culminates with a series of sports-related field experiences that allow students to apply their practical knowledge and skills on authentic problems and challenges in the field with a variety of sport, fitness and recreational organizations. Accredited by the Accreditation Council for Business Schools and Programs (ACBSP), this program will have students examine topics such as, but not limited to, the business of sports, sports marketing, band management, sports facilitates management, and the interrelationship between sports and society.

Program Outcomes

1. Recognize management and leadership theory in an applied environment
2. Use management and leadership theory in an applied environment
3. Demonstrate problem solving in an applied environment
4. Formulate connections between classroom learning and practical experience
5. Demonstrate the ability to communicate
6. Understand and practice networking and relationship building
7. Employ ethical frameworks in decision-making
8. Display a professional personal image
9. Use reflection to develop multiple perspectives of self as a professional
10. Demonstrate an awareness of factors that contribute to global sport business issues
11. Apply sport management principles in an international context
12. Analyze the influences of social, cultural, or political institutions on global sport businesses
13. Analyze the role of social responsibility in global sport business
14. Understand the interrelationships between functional areas in sport organizations
15. Employ a strategic analysis to demonstrate an understanding of the forces that a sport business must have in order to achieve its mission
16. Integrate strategic analysis into the strategic planning process
17. Evaluate external and internal factors and the interrelationships affecting decision-making

Business Operations (Certificate)

Description

The Business Operations Certificate is designed to prepare students with the knowledge, skills and attitudes to actively support entry-level business service jobs, such as business and financial operations, or administrative support roles. Students learn key concepts in business that are relevant to entry-level business professionals, including business communication, quantitative reasoning, problem solving, organizational culture, and ethical decision-making. Additionally, students gain skills in effective self-management, cultural competence and technology to enhance their ability to contribute to high-functioning teams in a variety of companies. There is high demand for skilled business professionals from employers due to an aging population and declining workforce. Students in this program will acquire the tools they need to respond to this opportunity, while also putting themselves on a solid pathway of professional growth and degree attainment.

Competency Program Requirements

Communications (BA)

Description

The Bachelor of Arts in Communications at SNHU offers students a multidisciplinary and global approach to the study of the communication profession. The Communications program provides students with both the theoretical knowledge and practical skills that can be applied to a wide range of careers in both the public and private sectors in fields such as public relations, social media, advertising, organizational communications, new media, corporate communications, and visual media. In the age of instantaneous and unfiltered global communication, students in the program will develop the analytical and media literacy skills necessary for generating meaning from a myriad of communication messages across a wide variety of channels, cultures, contexts, and modes of delivery. Students will also develop the technical skills to create professional and effective communication messages for a multitude of specific purposes and that target diverse audiences.

Online Programs

Program Outcomes

1. Apply knowledge of the communication discipline in adapting to evolving workplace environments and changing technological landscapes
2. Engage targeted audiences with messages that are informed by analyses of stakeholder requirements and that are guided by ethical and legal considerations
3. Create messages using multiple modes of delivery that represent expressions of business and personal import and that honor the cultural contexts in which they occur
4. Demonstrate business acuity through the application of foundational business practices and the inter- and intra-personal skills required of successful communication professionals
5. Gather and interpret information needed to make informed decisions guided by communication theory and ethical and legal considerations

Competency Program Requirements

AA or Equivalent: 60 Total Credits

General Studies (AA)

Online Programs

Description

The Associate in Arts General Studies provides students with a strong foundation in the skills that employers and students value in the professional workplace. Designed to support today's workers in developing the competencies needed for advancing their careers, the degree draws upon insights from workforce and industry leaders about the skills and knowledge that are essential for professional success. Through an innovative, project-based approach, students complete competency-based, real-world deliverables, developing valuable competencies in the process. Students use constructive feedback to learn and improve, while strengthening written and oral communication, critical thinking and problem solving, ethics, and collaboration skills.

Program Outcomes

1. A graduate of SNHU is expected to gain awareness and understanding of human cultures and the physical and natural world through study in Fine Arts and Humanities; Social and Behavioral Sciences; and Science, Technology, and Mathematics
2. A graduate of SNHU is expected to use effective written, verbal, and non-verbal communication for a variety of situations, genres, purposes, and audiences
3. A graduate of SNHU is expected to think critically and creatively by locating, assessing, and analyzing relevant information using quantitative and qualitative reasoning
4. A graduate of SNHU is expected to demonstrate the ability to learn and work collaboratively with individuals of diverse cultures and perspectives in order to reach common goals
5. A graduate of SNHU is expected to assess and accept the consequences of one's actions, be an informed and responsible citizen, and affect positive change in the world
6. A graduate of SNHU is expected to integrate general and discipline-based knowledge, apply this knowledge in and beyond the classroom, and reflect upon these experiences

AA General Studies Competencies: 60 Total Credits

- IDS10006 - Evaluate time management, goal-setting, and planning approaches for independent and collaborative work (1)
- SCS20004 - Describe the influence of culture on beliefs, values, and behaviors (1)
- SCS20005 - Identify possible opportunities for civic engagement based on your field and experience (1)
- ENG10001 - Select relevant and authoritative information to fulfill an information need (1)
- COM10002 - Present information in a variety of professional formats (1)
- SCS10003 - Compare problem-solving methods in a variety of fields (1)
- ENG10007 - Analyze texts to draw meaningful conclusions (1)
- ENG10008 - Craft written messages for an intended audience (1)
- ENG10009 - Apply professional writing conventions to a piece of writing (1)
- PHL20010 - Make decisions informed by ethical frameworks (1)
- PHL10011 - Describe how your identity affects your values (1)
- HUM20012 - Draw connections between human creativity and culture (1)
- MAT20013 - Use basic quantitative methods of problem solving (1)
- MAT20014 - Use spreadsheet applications to interpret information and draw conclusions (1)
- SCS20015 - Examine human behavior through principles of social science (1)
- COM10016 - Integrate feedback from stakeholders into decision making (1)
- OL20017 - Address challenges in group collaboration through various approaches to leadership (1)
- SCS20018 - Analyze group interactions from social science perspectives (1)
- SCS20019 - Analyze the relationship between cultural artifacts and societal norms (1)
- HIS20020 - Explain the role of history in shaping current circumstances (1)
- HIS20021 - Describe perspectives of more than one worldview in real-world interactions (1)
- HUM20022 - Examine dimensions of culture to support effective intercultural interactions (1)
- HIS20023 - Use methods of historical inquiry to address a topic (1)
- IDS20024 - Determine how professional practice can be informed by the transfer of learning (1)
- SCS20025 - Describe cross-cultural perspectives on a complex global issue (1)
- SCI20026 - Describe how scientific approaches are used to address a complex practical problem (1)
- PHL20027 - Apply ethical perspectives to complex questions in science and technology (1)
- COM20028 - Prepare and perform a variety of verbal communications (1)
- COM20029 - Apply cross-cultural communication strategies for global audiences in real world contexts (1)
- HUM20030 - Support greater cultural understanding by examining historical and cultural contexts (1)
- ENG20031 - Construct a persuasive argument that is supported with research (1)
- ENG20032 - Examine assumptions and biases within an argument (1)
- ENG20033 - Analyze and evaluate ideas in a diverse range of texts (1)
- SCI20034 - Use natural sciences methodologies to explain natural phenomena (1)
- COM20035 - Deconstruct media messages in various forms and contexts (1)
- SCI20036 - Analyze the influence of technology on individuals and society (1)
- MAT20037 - Solve practical problems using basic mathematical calculations (1)
- SCI20038 - Evaluate arguments to determine logical soundness of position (1)
- IDS20039 - Apply various problem solving methods to determine innovative solutions (1)
- IDS20040 - Evaluate your development as a learner and articulate strategies for future growth (1)
- COM20041 - Generate recommendations for addressing a complex challenge (1)
- COM20042 - Communicate a position related to a complex issue in a civic context (1)
- ECO20043 - Inform business decisions using microeconomic models and theories (1)
- ECO20044 - Determine the impact of economic costs on organizational and individual decision-making (1)
- ECO20045 - Explain how market structure impacts a business' entry and exit into a market and its ability to generate economic profit (1)
- IT10046 - Evaluate new technologies in areas of educational or professional interest (1)
- DAT20047 - Apply common techniques used for working with data (1)
- IDS20048 - Establish plans for professional development that support goal achievement (1)
- COM10049 - Develop a professional identity using written and verbal communication strategies (1)
- IT10050 - Examine the influence technology and social media have on personal and professional identity (1)
- COM10051 - Build networking opportunities using face-to-face and digital methods (1)

Healthcare Management (AA)

Description

The Associate in Arts Healthcare Management is designed to prepare healthcare professionals with the knowledge, attitudes, and skills to actively support healthcare organizations. Students learn key concepts in healthcare and business that are relevant to all healthcare professionals, including organizational culture, ethics, and healthcare delivery. Students gain skills in effective collaboration, communication, and technology to enhance their ability to contribute to high-functioning teams in a variety of healthcare fields. There is high demand for skilled healthcare professionals from employers due to an aging population and declining workforce, and students in this program will acquire the tools they need to respond to this opportunity.

Program Outcomes

1. Promote an organizational culture of compliance in healthcare environments based on ethical, legal, and regulatory parameters that support healthcare delivery.
2. Communicate professionally and collaborate cross-functionally in support of a culturally competent healthcare environment.
3. Explore strategies that support continuous improvement of healthcare organizations based on sound decision-making strategies and interpretation of evidence-based data.

Competency Program Requirements

Healthcare Management Competencies:

- IDS10006 - Evaluate time management, goal-setting, and planning approaches for independent and collaborative work (1)

Healthcare Management (BA)

Online Programs

Description

The B.A. in Healthcare Management program prepares students with the knowledge and skills needed to successfully meet the needs of a growing healthcare industry. Students explore how healthcare managers, administrators, and executives plan, direct, and coordinate health services for the populations they serve. Students learn about key areas in healthcare, including regulation and compliance, healthcare quality management, finance, and emerging trends in the field. Students also gain valuable skills in effective professional communication, community engagement, and innovation that will help them grow as people-oriented professionals. This program was designed to align with Association of University Programs in Health Administration (AUPHA) Bodies of Knowledge to ensure that the knowledge, skills, and abilities mastered in the program are directly relevant to careers in healthcare. There is high demand for healthcare professionals by employers due to an aging population and declining workforce, and students in this program will develop the skills to lead a variety of healthcare organizations in response to this need.

Program Outcomes

1. Apply healthcare business practices in addressing organizational goals and challenges and managing project and employee performance guided by ethical, legal, and regulatory parameters
2. Foster cross-functional collaboration in creating a culturally competent healthcare environment that benefits all stakeholders using relevant management theories
3. Recommend strategies that support continuous improvement of healthcare organizations based on sound decision-making strategies and the gathering and interpreting of evidence-based data
4. Manage organizational processes and model practices that promote resourceful, flexible approaches to wellness, emerging issues, and daily operations in healthcare organizations
5. Communicate effectively and professionally to all stakeholders, especially in light of the constantly changing complexities in the healthcare field

Management (BA)

Description

The Bachelor of Arts in Management at Southern New Hampshire University prepares graduates to plan, oversee, coordinate, and direct the operations of organizations in a complex, fast-paced, and ever-changing world. Students explore the field of management from an integrated, holistic viewpoint, gaining the necessary knowledge, skills, abilities, and dispositions to be successful, adaptable managers in a variety of business environments. Weaving together theoretical, technical, and interpersonal aspects, the program highlights the functional areas of business and the practical skills needed to manage diverse people and projects. The program creates opportunities for students to develop a growth-mindset to solve challenges for one's self, a team, and an organization. Combining critical thinking and open-mindedness with innovative and entrepreneurial approaches, students practice making informed decisions. The integration of thematic knowledge and skills in team dynamics, communication, and design thinking throughout the program enables students to develop the ability to balance priorities between contributors in an organization, moving themselves and their teams forward.

Online Programs

Program Outcomes

1. Apply foundational business practices in solving organizational problems and managing project and employee performance guided by ethical and legal parameters
2. Foster team connections in varied contexts through interpersonal and group interactions as informed by current management principles and theories
3. Evaluate business and organizational opportunities in the context of internal and external environments
4. Manage organizational processes and model practices that promote resourceful, flexible approaches to both emerging issues and day-to-day operations
5. Communicate effectively in light of constantly changing business and technological environments

- MGT20062 - Demonstrate effective management skills and practices in diverse, distributed, and collaborative work environments (1)
- MGT20127 - Analyze the use of management styles in varying contexts to determine preferred approaches (1)
- COM20128 - Apply communication techniques to effectively negotiate and manage conflict (1)
- MGT20135 - Evaluate organizational culture in relation to organizational effectiveness and performance (1)
- MGT20136 - Apply organizational behavior theories to inform managerial decisions (1)
- MGT20137 - Shape and lead an organizational climate in support of mission, vision, and values (1)
- COM30093 - Align needs of various audiences with stakeholder requirements to craft messages that meet project goals (1)
- COM30114 - Produce various communications aligned to the mission and structure of an organization (1)
- COM20118 - Apply best practices to create, build, and maintain a brand (1)
- HRM20141 - Describe effective practices in the recruitment, selection, and retention of employees (1)
- HRM30142 - Select appropriate management interventions in human resource situations (1)
- HRM20143 - Craft employee development and training plans that encourage autonomy and initiative (1)
- POL10067 - Describe the foundational elements of the US legal system and the relationships among them (1)
- BUS20068 - Differentiate between matters of law and matters of ethics in business situations (1)
- BUS20069 - Apply relevant aspects of law to current business situations (1)
- ACC20132 - Demonstrate the foundational principles of financial accounting (1)
- ACC20133 - Interpret the key sections of financial statements to make management decisions (1)
- ACC30134 - Apply appropriate ratios and vertical and horizontal analysis to recommend business decisions (1)
- MGT20129 - Determine the appropriate tools and technology to support decision-making in the functional areas of business (1)
- MGT20130 - Leverage organizational information and data to inform decision-making (1)
- MGT20131 - Balance competing priorities in making decisions for your team that support organizational goals (1)
- MGT20138 - Determine appropriate metrics to evaluate day-to-day business operations (1)
- MGT20139 - Propose informed solutions to common management problems in order to enhance organizational operations (1)
- MGT20140 - Analyze the essential components of operational processes in relation to efficiency and improvement (1)
- ECO30144 - Describe how market forces impact prices and decision making (1)
- ACC30145 - Apply foundational managerial accounting concepts to make management decisions (1)
- FIN30146 - Allocate resources effectively through the evaluation of financing decisions (1)
- MGT30147 - Apply current management theories and team models to foster relationships across and among teams (1)
- MGT30148 - Apply leadership and followership in managing individuals and groups (1)
- MGT30149 - Determine how team performance is impacted by individual, group, and organizational goals (1)
- MKT20079 - Apply the marketing mix to inform business decisions that support organizational objectives (1)
- MKT20080 - Determine appropriate marketing and communication distribution channels (1)
- MKT20081 - Explain how marketing decisions are made to target the consumer (1)
- MGT20150 - Analyze global and domestic perspectives on managing people in multicultural contexts (1)
- INT20075 - Describe the factors that contribute to international market attractiveness and entry (1)
- INT20151 - Assess environmental factors to manage international business opportunities (1)
- MGT30152 - Evaluate trends in business for their potential impact on operations and personnel (1)
- MGT30153 - Demonstrate the manager's role in the change management process in an organization (1)
- COM20154 - Select appropriate communication techniques for managing change initiatives (1)

Online Programs

- MGT30155 - Identify consumer-focused solutions that deliver a value proposition utilizing the design-thinking process (1)
- MGT30156 - Demonstrate an entrepreneurial mindset in addressing business opportunities in varying business models (1)
- MGT30157 - Explain how product management techniques are used to manage the process of a product development (1)
- OL30158 - Explain the theory and process of strategic planning (1)
- MGT30159 - Develop a departmental strategic plan that aligns to an organization's strategic objectives (1)
- MGT30160 - Demonstrate how influence and power facilitates support and buy-in for your departmental strategic plan (1)

Concentration Courses: 9 Total Credits

Management (BA) - Public Administration (Concentration)

Competency Concentration Requirements

- POL20170 - Analyze how the U.S. Constitution shapes modern U.S. politics (1)
- POL20171 - Analyze the structure and function of the U.S. political system (1)
- POL20172 - Assess proposed solutions to current policy issues under debate (1)
- PAD30173 - Explore theoretical origins of public administration and the evolving nature of the profession (1)
- PAD30174 - Explain the impact of a federal system of government on the administration of public functions (1)
- PAD30175 - Describe the essential components of public administration and its role in contemporary society (1)
- PAD30176 - Examine the role of the public in government functions (1)
- PAD30177 - Examine the public policy development process (1)
- PAD30178 - Analyze the impact of public policy on finance, programs, and organizations (1)

Grand Total Credits: 9

Counseling

Clinical Mental Health Counseling (MA)

Description

The Master of Arts in Clinical Mental Health Counseling is a 60-credit degree that meets the academic requirements for licensure as a Clinical Mental Health Counselor in most states. The philosophy takes a broad view of counseling as a discipline to create an inclusive program incorporating a diverse range of counseling approaches. The overarching theme of the program centers around instilling the "counselor identity" in students. This involves helping them to develop an understanding that being a counselor is something that they "are," not just something that they "do." The program supports the development of a counselor identity by creating a safe space for students to engage in a process of self-reflection to develop insight and awareness about their own personality, learn how to bring this personality into a counseling relationship, and experience their own vulnerability as they come to understand their personal strengths and growth areas as a counselor. Four subsidiary themes are interwoven throughout the curriculum: developing ethical reasoning, valuing diversity, applying critical thinking, and integrating theory and technique in clinical practice. The program creates an authentic learning environment in which students learn how to apply the theories and techniques of counseling through role-play simulations, allowing them to experience the counseling process from the perspective of the counselor and the client. In addition to the online course work, the training experience includes two face-to-face residencies, a 100-hour practicum, and a 600-hour internship.

Program Outcomes

1. Develop a professional counseling identity in alignment with ethical and legal standards that advocates on behalf of the profession and promotes client access, equity, and success
2. Cultivate socially, culturally, and spiritually appropriate skills and practices in professional counseling that promote social justice and minimize barriers between counselors and clients
3. Apply theories and etiology of human growth and development and relevant environmental factors to promote optimum wellness for diverse clients across the lifespan
4. Develop strategies for supporting and advocating for clients in relation to their career development based on client needs, industry information, and identified opportunities within the global economy
5. Utilize appropriate counseling theories, models, and culturally relevant strategies in developing professional skills for client consultation, treatment, intervention, and prevention
6. Determine and implement appropriate strategies for effectively forming and facilitating group counseling and group work in a variety of settings with a diverse range of clients
7. Assess the needs of counseling clients validly and reliably through the application of basic testing principles, key statistical concepts, and industry-appropriate procedures
8. Evaluate counseling research, programs, and practices using a variety of methods and designs for advancing the counseling profession and incorporating evidence-based, data-driven approaches into current practice
9. Apply culturally relevant strategies, techniques, theories and models of clinical mental health counseling to the assessment and treatment planning of mental health issues, adhering to the legal and ethical standards of clinical and mental healthcare professionals

Requirements

Major Courses
60 Total Credits

- Complete all of the following

Online Programs

Core Courses

- o Complete all of the following
 - Complete:
 - COU500 - The Counseling Profession: Orientation, Identity, and Ethics (3)
 - COU510 - Human Development (3)
 - COU520 - Diversity in Counseling (3)
 - COU530 - Theories of Counseling (3)
 - COU600 - Research Methods and Program Evaluation (3)
 - COU610 - Assessment and Evaluation in Counseling (3)
 - COU630 - Career Counseling (3)
 - COU640 - Substance Use Disorders and Process Addictions (3)
 - COU650 - Diagnosis of Emotional and Mental Disorders (3)
 - COU660 - Group Counseling (3)
 - COU680 - Prevention and Intervention of Crisis and Trauma (3)
 - MHC500 - Professional Issues, Ethics, and Laws in Clinical Mental Health Counseling (3)
 - MHC610 - Treatment Planning in Clinical Mental Health Counseling (3)
 - MHC670 - Clinical Mental Health Counseling Practicum (3)
 - MHC680 - Clinical Mental Health Counseling Internship (3)
 - MHC690 - Advanced Internship in Clinical Mental Health Counseling (3)
 - COU 699 Must be completed twice in conjunction with COU 540 and COU 690
 - Complete all of the following
 - Earned a grade of B- or better in each of the following:
 - COU540 - Helping Skills and Techniques: Residency I (3)
 - COU699 - Counseling Skills Lab (0)
 - Earned a grade of B- or better in each of the following:
 - COU690 - Advanced Individual and Group Helping Skills and Techniques: Residency II (3)
 - COU699 - Counseling Skills Lab (0)

State Track Courses

- o Complete 1 of the following
 - NOTE: All courses require a minimum grade of B-.
 - General
 - 6 credit(s) from the following:
 - COU605 - Counseling Families, Couples, and Children (3)
 - COU625 - Use of Technology in Counseling (3)
 - COU635 - Psychopharmacology (3)
 - COU645 - Counseling Sexuality Issues (3)
 - COU665 - Advanced Psychopathology and Assessment Techniques (3)
 - MHC695 - Advanced Internship in Clinical Mental Health Counseling II (3)

Internship

- Complete all of the following
 - Complete:
 - MHC695 - Advanced Internship in Clinical Mental Health Counseling II (3)
 - 3 credit(s) from the following:
 - COU605 - Counseling Families, Couples, and Children (3)
 - COU625 - Use of Technology in Counseling (3)
 - COU635 - Psychopharmacology (3)
 - COU645 - Counseling Sexuality Issues (3)
 - COU665 - Advanced Psychopathology and Assessment Techniques (3)

Families

- Complete all of the following
 - Complete:
 - COU605 - Counseling Families, Couples, and Children (3)
 - 3 credit(s) from the following:
 - COU625 - Use of Technology in Counseling (3)
 - COU635 - Psychopharmacology (3)
 - COU645 - Counseling Sexuality Issues (3)
 - COU665 - Advanced Psychopathology and Assessment Techniques (3)
 - MHC695 - Advanced Internship in Clinical Mental Health Counseling II (3)

Families and Psychopathology

- Psychopharmacology and Psychopathology
 - Complete:
 - COU635 - Psychopharmacology (3)
 - COU665 - Advanced Psychopathology and Assessment Techniques (3)

Education

Curriculum and Instruction (MEd)

Description

The Masters of Education in Curriculum and Instruction prepares educators in all contexts to be leaders in their field, with global awareness across cultures and geographies. The degree program is guided by the necessity to prepare educators to teach in a 21st century context. Educators who complete the program learn to apply local, state, and national standards in designing transformative learning experiences that are relevant, outcome-driven, and culturally inclusive for all ages, education levels, and learning environments. Educators will be prepared to implement positive change within their learning communities by inspiring students and by serving as role models and support systems for colleagues. Within the degree pathway educators will learn how to be “educational leaders” in both a traditional and non-traditional setting. Educators will learn how to access and use current educational research and data for curricular decision-making. They will take four curriculum design courses that provide a focus on foundational design methodologies, differentiation approaches for diverse teaching and learning needs, assessment strategies and data use, and cutting-edge approaches to design. Moreover, educational technology to enhance both learning and instruction is an embedded aspect of all courses. Students are expected to integrate relevant technologies and applications into their curriculum designs. Other topics threaded throughout the program include creating and participating in communities of learning, creating community and business partnerships, and the importance of action research in education. Students complete the program with a ready-to-implement, fully fleshed-out curriculum for a chosen age/education-level group, along with a professional portfolio that showcases their abilities as professional education leaders.

Program Outcomes

1. Design curriculum that addresses the complex learning situations of today’s students through the application of relevant theory that will help inform flexible, adaptable instructional decisions
2. Support the needs of learners with different backgrounds, abilities, and experiences with targeted, data-informed instructional decisions and with curriculum that incorporates the principles of Universal Design for Learning and other relevant standards
3. Design assessment as an integral part of the curriculum that both guides and measures learners and that utilizes the data necessary for informed teaching and learning decisions
4. Integrate technology in curricular design to enhance teaching and learning that guides students through real world problem solving by incorporating research-based instructional strategies
5. Model educational leadership in implementing positive change for students and colleagues and in creating, sustaining, and supporting learning communities that empower oneself and others in the furtherance of ethical, reflective, and culturally competent teaching and learning
6. Position oneself as an education professional who promotes learning in any education context and who respects and actively works toward the acceptance and inclusion of all learners

Curriculum and Instruction (MEd) - Dyslexia Studies and LBLD (Concentration)

Description

The M.Ed. Curriculum & Instruction program is intended to help students develop a specialized understanding of the latest theories and practices in K-12 curriculum development. By concentrating in Dyslexia Studies and Language-based Learning Disabilities (LBLD), students will learn how to help school age children with language-based learning disabilities, such as dyslexia, succeed academically. Candidates will be introduced to guiding principles while learning how to apply innovative, highly structured practice and research based approaches. These approaches are designed to heighten school age student executive function, information processing skills, oral and written expression levels, social-emotional confidence, and ability to self-advocate. Courses will center on how students with LBLDs learn, self-regulate, and benefit from well-designed instruction. Concentration will require the completion of three courses. The program is a master's only pathway that does not lead to initial teacher licensure or to a NH curriculum administrator endorsement.

Requirements

Concentration Courses
9 Total Credits

- Complete:
 - SPED610 - Executive Function and Study Skills (3)
 - SPED630 - Expressive Language-Skills and Writing (3)
 - SPED635 - Reading Interventions for Students with LBLD (3)

Grand Total Credits: **9**

Curriculum and Instruction (MEd) - Educational Leadership (Concentration)

Description

Students in the Educational Leadership concentration delve into what it means to be a leader in the field of education through positional and dispositional lenses. Students explore leadership roles—such as district and site administrators, classroom teachers, directors of peer groups—and their responsibilities. In embracing the role of inspiring, motivating, and challenging their students, colleagues, and communities, students learn to become the drivers of educational change. Students examine the many facets of leading educational organizations, including the legal and ethical aspects and the building of educational communities.

Concentration Outcomes

1. Develop personalized approaches to leadership of educational organizations through the application of relevant strategies and philosophies of educational leadership
2. Determine appropriate courses of action within educational environments that create positive change for diverse learning communities

Requirements

Concentration Courses
9 Total Credits

- Complete:
 - EDU612 - Educational Law and Ethics (3)
 - EDU617 - Building Community Through Education (3)
 - EDU619 - Leading Educational Organizations (3)

Grand Total Credits: **9**

Online Programs

Curriculum and Instruction (MEd) - Online Teaching (Concentration)

Description

The concentration in Online Teaching provides learners with the opportunity to develop the practical knowledge and skills necessary for online teaching. Learners build upon the knowledge and skills of curriculum and instruction covered in the MED.CIN program core and develop the ability to efficiently translate and apply them within virtual learning environments. Learners will develop practical skills pertaining to differentiation, student engagement, individualized feedback, Learning Management Systems (LMS), and the development of age and grade-level appropriate content.

Requirements

Dyslexia and LBLD (Graduate Certificate)

Description

Teachers, administrators, parents and other caregivers have become increasingly aware of how students with language-based learning disabilities (LBLD) can be well served by deliberate instructional planning and engagement. The Graduate Certificate for Dyslexia and Other Language Based Learning Disabilities allows for myriad stakeholders to learn more about six guiding principles and how these can be leveraged to help school-aged students with language-based learning disabilities achieve academic and social success. Graduate certificate seekers are required to complete five courses that focus on how students with LBLD process information, express knowledge, respond well to appropriate instructional models and exemplars, and must learn to self-advocate for their own learning. This graduate certificate does not lead to initial teacher licensure or administrator endorsement.

Requirements

Higher Education Administration (MS)

Description

The field of higher education administration continues to evolve as it tries to keep pace with revolutionary changes in learning, technology, student demographics, and myriad regulations in our increasingly inclusive 21st century world. Effective administrators embrace this complexity and are now, more than ever, required to make empirical data-based decisions to create fiscally sound programs that capably address students' academic and non-academic needs. Furthermore, effective administrators must collaboratively craft accountability and evidence-based continuous improvement plans that will further the success of these programs and the university mission. The Master of Science in Higher Education Administration degree program equips graduates with the analytical skills necessary for leading within an institution of higher education in the 21st Century. After post-secondary education foundations are established, heavy emphasis is placed on the use of empirical research, data-centric decision-making and analytical problem-solving across various higher education contexts. Students will analyze and work with a variety of datasets to derive/infer the effectiveness of initiatives, draw data-based conclusions, and apply findings to solve real world problems.

Program Outcomes

1. Design, develop and implement innovative strategies based on empirically derived data and research to address the challenges facing higher education which further an institutions mission, vision and goals
2. Apply empirical research methodologies to evaluate program effectiveness that address underrepresented needs of the increasingly diverse college student population
3. Critically evaluate the historic and social context of higher education for its reciprocity between institutional, local and national policy
4. Utilize compliance, regulatory, and accreditation standards to inform institutional decision-making
5. Apply strategies for facilitating effective communication, collaboration, and data-based continuous improvement as an administrator across institutional units
6. Apply empirically based financial management skills related to budgeting, resource allocation, and funding to support an institution's strategic goals

General Education

General Education

Description

The General Education program at Southern New Hampshire University provides students with the knowledge, skills, abilities, and cultural awareness necessary to succeed in their major fields of study and become leaders in their chosen professions and communities. Students who complete the General Education program will acquire necessary core skills to become independent thinkers who are able to make informed moral and ethical decisions. These core skills (such as information literacy, critical thinking, global knowledge and awareness, emotional intelligence, etc.) are identified as critical factors toward a student's ability to succeed in their academic and professional goals and are applicable to any major in any discipline. Students investigate relevant topics across the General Education curriculum through the perspective of humanistic, historical, social scientific, and empirical (science) based lenses. By asking our students to study these worldviews, we equip them with lifelong skills to make sense of the world and information around them and analyze interdisciplinary connections within different modes of thought. ** Please refer to your Program Evaluation or your Academic Advisor for specific course information. **

Online Programs

Program Outcomes

1. A graduate of SNHU is expected to gain awareness and understanding of human cultures and the physical and natural world through study in Fine Arts and Humanities; Social and Behavioral Sciences; and Science, Technology, and Mathematics
2. A graduate of SNHU is expected to use effective written, verbal, and non-verbal communication for a variety of situations, genres, purposes, and audiences
3. A graduate of SNHU is expected to think critically and creatively by locating, assessing, and analyzing relevant information using quantitative and qualitative reasoning
4. A graduate of SNHU is expected to demonstrate the ability to learn and work collaboratively with individuals of diverse cultures and perspectives in order to reach common goals
5. A graduate of SNHU is expected to assess and accept the consequences of one's actions, be an informed and responsible citizen, and affect positive change in the world
6. A graduate of SNHU is expected to integrate general and discipline-based knowledge, apply this knowledge in and beyond the classroom, and reflect upon these experiences

Requirements

General Studies (BA)

Description

The purpose of the B.A. General Studies is to serve those students who want a broad general education without an in-depth study in one discipline area. This program provides students a broad education that permits them the freedom to take coursework in multiple academic disciplines but, at the same time, allows them to earn a concentration in one area of study. The degree consists of four separate sections. The first section of 42 credits is the university general education core. The core provides the broad general education that the university believes should be the foundation for all SNHU students. The second component of the degree consists of a degree planning course. The third section of the general studies degree is the 12 credit concentration. The final section of the general studies degree consists of 63 credits of free electives for students. These free electives serve multiple purposes. First, they enable the student to explore different discipline areas; an exploration that may lead to their changing their general studies degree to a specific discipline major or it may lead them to continue their general studies program with a specific concentration. Free electives also allow students who have chosen a concentration to complete any prerequisites that may be required for courses in that program. NOTE: Students must take or transfer at least twelve credits of 300-400 coursework in the BA General Studies program.

Program Outcomes

1. Evaluate human cultures and the physical and natural world using multiple lenses, including fine arts and humanities, social and behavioral sciences, and science, technology, and mathematics for their implications in contributing to cultural, historical, and social history
2. Apply and adapt appropriate written, verbal, and non-verbal communication for various situations and audiences
3. Analyze relevant information using qualitative and quantitative reasoning and evidence and assess it for its applicability to various situations
4. Demonstrate an empathetic and ethical viewpoint of diverse cultures and perspectives in achieving successful collaborative environments and reaching common goals
5. Apply professional and ethical approaches to decision-making that communicate personal integrity, responsible citizenship and commitment to positive change
6. Synthesize general and discipline-based knowledge for application to and reflection on experiences in and beyond the classroom

12 Total Credits

- Complete all of the following
 - 6 credit(s) from subject(s): POL SOC, or COM within the range of course numbers 100 - 499
 - 6 credit(s) from POL SOC, or COM within the 300 - 499 range or from the following courses:
 - SNHU495 - Internship (3)
 - No more than 2 courses of any discipline may apply to this concentration. Learners are responsible for any required prerequisite courses.

Grand Total Credits: **12**

General Studies (BA) - Coding Basics (Concentration)

Description

The Coding Basics concentration gives learners the opportunity to develop gain new knowledge and skills in creative problem-solving and through programming. Learners will be able to write simple scripts and learn the fundamentals of object-oriented programming. Furthermore, learners will learn the fundamentals of programming concepts including data types, variables, decision statements, loops and functions.

Requirements

Concentration Courses

12 Total Credits

- Complete all of the following
 - Complete:
 - IT140 - Introduction to Scripting (3)
 - IT145 - Foundation in Application Development (3)
 - 6 credit(s) from CS or IT within the 300 - 499 range or from the following courses:
 - SNHU495 - Internship (3)
 - Learners are responsible for any required prerequisite courses.

Grand Total Credits: **12**

Online Programs

General Studies (BA) - Communication Essentials (Concentration)

Description

The Communication Essentials concentration will provide learners with the opportunity to explore several key areas of communication, including active listening, effective oral and written communication strategies, recognizing nonverbal cues, and strategies to target different audiences. In addition, learners assess current trends in digital communication and select appropriate tools and technology to reach diverse cultures across the globe.

Requirements

Concentration Courses

12 Total Credits

- Complete all of the following
 - 6 credit(s) from subject(s): COM within the range of course numbers 100 - 499
 - 6 credit(s) from COM within the 300 - 499 range or from the following courses:
 - SNHU495 - Internship (3)
 - Learners are responsible for any required prerequisite courses.

Grand Total Credits: **12**

Online Programs

General Studies (BA) - Leadership Essentials (Concentration)

Description

The Leadership Essentials concentration will expose learners to fundamentals of effective leadership through studies in ethics and conflict management, team building skills, oral and written communication, and decision-making techniques. Learners can explore various kinds of leadership positions to prepare for productive team management. This concentration focuses on capabilities related to self-awareness, active listening, solutions-focused strategies, and the positive power of feedback for growth and understanding.

Requirements

Concentration Courses

12 Total Credits

- Complete all of the following
 - 6 credit(s) from subject(s): COM MGT, OL, or PSY within the range of course numbers 100 - 499
 - 6 credit(s) from COM MGT, OL, or PSY within the 300 - 499 range or from the following courses:
 - PAD331 - Public Administrative Ethics and Theory (3)
 - PHL316 - Business Ethics (3)
 - SNHU495 - Internship (3)
 - No more than 2 courses of any discipline may apply to this concentration. Learners are responsible for any required prerequisite courses.

Grand Total Credits: **12**

General Studies (BA) - Management Information Systems Essentials (Concentration)

Description

The Management Information Systems Essentials concentration provides learners with the essential skills necessary for managing information systems that support the operations of an organization. Learners will have the opportunity to select courses that examine topics such as systems architectures, basic programming languages, data management, manipulation, and analysis, as well as the electronic interactions of an organization. Learners will also learn about the flow of information through a system, and how to leverage this information to make informed decisions.

Requirements

Concentration Courses

12 Total Credits

- Complete all of the following
 - 6 credit(s) from subject(s): DAD DAT, or MIS within the range of course numbers 100 - 499
 - 6 credit(s) from DAD DAT, or MIS within the 300 - 499 range or from the following courses:
 - SNHU495 - Internship (3)
 - Learners are responsible for any required prerequisite courses.

Grand Total Credits: **12**

Online Programs

General Studies (BA) - Mathematics (Concentration)

Description

In the mathematics concentration, learners are exposed to mathematical concepts and methods that develop their reasoning and quantitative and problem solving skills. Additionally, learners engage in coursework that emphasizes the broad application of mathematics in the modern world, and its connections to both abstract and real world problems.

Concentration Outcomes

1. Apply mathematical reasoning and analysis in evaluating solutions and solving problems in a variety of contexts within the field of mathematics

Requirements

Concentration Courses

12 Total Credits

- Complete all of the following
 - 6 credit(s) from subject(s): MAT within the range of course numbers 100 - 499
 - 6 credit(s) from MAT within the 300 - 499 range or from the following courses:
 - SNHU495 - Internship (3)
 - Learners are responsible for any required prerequisite courses.

Grand Total Credits: **12**

General Studies (BA) - Professional Writing Essentials (Concentration)

Description

The Professional Writing Essentials concentration provides learners with the opportunity to explore foundational skills in editing, copywriting, and technical writing. Learners may create different formats of public communications and produce documents of a technical nature. Additionally, learners can develop skills and strategies for delivering content through new media and diverse multimedia platforms.

Concentration Outcomes

1. Apply industry-specific writing techniques in developing content appropriate for engaging diverse audiences

Requirements

Concentration Courses

12 Total Credits

- Complete all of the following
 - 6 credit(s) from subject(s): COM or ENG within the range of course numbers 100 - 499
 - 6 credit(s) from COM or ENG within the 300 - 499 range or from the following courses:
 - SNHU495 - Internship (3)
 - No more than 2 courses of any discipline may apply to this concentration. Learners are responsible for any required prerequisite courses.

Grand Total Credits: **12**

Online Programs

General Studies (BA) - Psychology (Concentration)

Description

The Psychology concentration offers students the opportunity to explore a variety of facets of psychology, while building skills in quantitative and qualitative research, critical thinking, collaboration, and communication. Learners will explore contemporary human issues and institutions through a psychological lens.

Concentration Outcomes

1. Examine contemporary issues and institutions through a psychological lens for informing research in human behavior, mental processes, and social interactions

Requirements

Concentration Courses

12 Total Credits

- Complete all of the following
 - Complete:
 - PSY108 - Introduction to Psychology (3)
 - 3 credit(s) from subject(s): PSY within the range of course numbers 100 - 499
 - 6 credit(s) from PSY within the 300 - 499 range or from the following courses:
 - SNHU495 - Internship (3)
 - Learners are responsible for any required prerequisite courses.

Grand Total Credits: **12**

General Studies (BA) - Social Justice Essentials (Concentration)

Description

The Social Justice Essentials concentration offers learners the opportunity to explore justice issues through contemporary topics in criminal and civil law, corrections, and ethical leadership. Learners can gain new skills in critical thinking and inquiry, effective communication, cultural awareness and social science investigation.

Requirements

Concentration Courses

12 Total Credits

- Complete all of the following
 - 6 credit(s) from ATH CJ, POL, or SOC within the 100 - 499 range or from the following courses:
 - PHL212 - Introduction to Ethics (3)
 - 6 credit(s) from ATH CJ, POL, or SOC within the 300 - 499 range or from the following courses:
 - SNHU495 - Internship (3)
 - No more than 2 courses of any discipline may apply to this concentration. Learners are responsible for any required prerequisite courses.

Grand Total Credits: **12**

Online Programs

General Studies (BA) - Society and Social Problems (Concentration)

Description

The Society and Social Problems concentration offers learners a foundation in larger sociological questions in the contemporary world. Learners will gain skills in the critical evaluation of society and social problems through experience-based methodology. Learners will increase their understanding of sociological perspectives on core areas of social life including family, gender, aging, deviant behavior, identity, culture, social structure and minority relations.

Requirements

Concentration Courses

Liberal Arts (AA)

Description

The Associate in Arts degree in Liberal Arts is a two-year program that provides students with a strong foundation in the skills valued in the 21st century. Designed to support development in the competencies needed for advancing their education and careers, students strengthen skills in communication, critical thinking and problem solving, ethics, and collaboration. Students completing this program may transfer to a four-year liberal arts major or a four year business program.

Program Outcomes

1. Interpret human cultures and the physical and natural world through the Humanities, Social and Behavioral Sciences, History, and Science, Technology, and Mathematics
2. Communicate effectively in written, verbal, and non-verbal forms for a variety of situations, purposes, and audiences
3. Locate and evaluate relevant information through the use of quantitative and qualitative reasoning and a variety of critical and creative approaches
4. Develop strategies for effective collaboration with individuals of diverse cultures and perspectives in order to reach common goals
5. Apply concepts and practices of civic engagement through the critical examination of relevant issues and reflective consideration of a variety of perspectives
6. Apply critical problem-solving approaches to challenges in academically and professionally relevant situations through the integration of general and field-based knowledge

Health Professions

Community Health Education (BS)

Online Programs

Description

The B.S. in Community Health Education program addresses the responsibilities, functions, skills, and knowledge to become a successful and effective community health educator. Students explore effective ways to promote health and prevent disease in populations, and to plan, develop, implement and evaluate community health education programs. Students learn important the critical components of community health education such as social and behavioral health, research and assessment, epidemiology and chronic and communicable diseases. According to the U.S. Bureau of Labor Statistics (2014), "employment of health educators and community health workers is projected to grow 21 percent from 2012 to 2022, faster than the average for all occupations. Growth will be driven by efforts to improve health outcomes and to reduce healthcare costs by teaching people about healthy habits, behaviors and utilization of available health care services." This degree program is designed for students who want careers in public or private health organizations. Health educators are professionals who plan, implement, and evaluate activities to help improve the health of people in settings such as schools, workplace programs, community agencies, health care facilities, government organizations, businesses, and colleges. The BS in Community Health Education program prepares the student for the professional certification examination to become a Certified Health Education Specialist (CHES) offered through the National Commission for Health Education Credentialing.

Program Outcomes

1. Apply statistical constructs and epidemiological principles to recognize patterns and trends within the scope of public health
2. Apply fundamental community health strategies in assessment, planning, and prevention to improve the health, safety, and quality of life for people in their communities
3. Analyze the efficacy of health programs targeted at improving healthcare access, quality, and delivery to ensure community and population health
4. Describe the fundamental social and behavioral theories relevant to community health to identify health disparities and promote social justice
5. Utilize principles and functions of management to foster consensus, promote effective use of human resources, and enhance operations
6. Evaluate health communication and literacy strategies to promote effective health communication campaigns
7. Develop a professional identity from which to make globally, socially, and ethically responsible decisions that are aligned with legal and organizational policy requirements

Health Information Management (BS)

Description

The Health Information Management program prepares students by developing essential knowledge, skills, and abilities for managing health data in today's complex healthcare landscape. Student learning centers on managing health data through compliance with regulations and the use of appropriate technologies to improve health information and patient outcomes. The highlights of the program include learning activities in the simulated electronic health record (EHR), a capstone course, and professional practice experience in which students will intern onsite with an HIM professional.

Online Programs

Program Outcomes

1. Apply health data structure, standards, and regulations, to manage clinical classification systems and reimbursement
2. Analyze the uses, risks, and management of health statistics and biomedical research data and their support to performance improvement programs
3. Interpret and apply current laws, regulations, policies, and healthcare ethics as they relate to decision-making in healthcare delivery and systems
4. Implement and manage hardware and software technologies to ensure effective data collection, storage, analysis, and reporting of information
5. Evaluate information system applications (databases, selection processes, service applications, etc.) for their capacity to meet the needs of health care organizations
6. Using current management principles, and recognizing limits on human and financial resources, propose solutions and develop project management plans to solve organizational challenges

Health Information Management (MS)

Description

The Master of Science in Health Information Management (HIM) program prepares professionals to apply leadership, critical thinking, communication and problem solving skills to various leadership and management roles in HIM. The curriculum utilizes an approach that focuses on information governance, data protection, health informatics, revenue management, compliance, healthcare law, ethics, and analytics.

Program Outcomes

1. Evaluate and create data management policies and procedures that help ensure data accuracy and integrity through focused attention on the application of health information management principles
2. Ensure the integrity and privacy of patient data through advanced technology solutions and ethical and legal practices in all aspects of the health information management profession
3. Leverage advanced data analytics, statistical, and research techniques and technologies in health care enterprise planning and decision making
4. Develop strategic and operational models for managing reimbursements and the revenue cycle in healthcare enterprises, adhering to current regulations
5. Formulate health information compliance programs that integrate data analytics and ensure compliance and fraud mitigation in healthcare organizations
6. Develop leadership approaches in relation to healthcare enterprise strategic goals that foster collaboration across functional areas and guide organizations through adversity and change

Requirements

Major Courses
36 Total Credits

- Complete:
 - HIM510 - HIM Applications and Systems (3)
 - HIM520 - Leading as a HIM Professional (3)
 - HIM530 - Information Protection & Security in HIM (3)
 - HIM540 - Health Information Governance (3)
 - HIM550 - Data Management and Data Quality (3)
 - HIM560 - HIM Informatics and Technology Infrastructure (3)
 - HIM600 - Managing Compliance (3)
 - HIM660 - HIM Strategic Planning and Financial Management (3)
 - HIM675 - Research Methods and Evaluation (3)
 - HIM680 - Advanced Topics in HIM I (3)
 - HIM685 - Advanced Topics in HIM II (3)
 - HIM690 - Health Information Management Capstone (3)

Grand Total Credits: **36**

Health Sciences (BS)

Description

The Bachelor of Science in Health Sciences is a transfer-friendly degree completion program targeting Associate degree holders in the Allied Health Sciences discipline. The program's design facilitates the transfer of prior clinical coursework typically found in degrees such as an Associate of Applied Science. The program is open only to graduates and degree holders of an Associate degree in the Allied Health field. The Allied Health Sciences encompasses a variety of occupations including diagnostic technicians and technologists, emergency medical technicians, medical assistants, dental hygienists, laboratory technicians and nuclear medicine technologists. The program builds on prior coursework and provides current practitioners with the competencies to qualify for supervisory and managerial roles in their respective fields. The Bachelor of Science in Health Sciences is designed for motivated professionals who have earned an allied-health related associate's degree and have a desire to advance in their careers. The degree program is structured to maximize the student's transfer of credit while at the same time ensuring the student benefits from a broad general curriculum as well as specific healthcare-related courses designed to develop a managerial perspective. The program recognizes that individuals admitted into the program possess an academic focus in their technical/clinical area. Students will find that the B.S. in Health Sciences accepts as transferable credit, acceptable college level courses in both general education / liberal arts as well as the applied sciences within their clinical focus area. This is of particular benefit to those graduating with an Associate of Applied Science. The Bachelor of Science in Health Sciences builds upon this prior learning to prepare the graduate to assume supervisory or managerial roles in healthcare.

Online Programs

Program Outcomes

1. Engage diverse health care stakeholders using communications that reflect keen interpersonal skills, effective collaboration practices, and deep cultural competence
2. Demonstrate knowledge of microeconomic, macroeconomic and financial principles through monitoring and utilization of financial and economic data for decision-making and strategic planning
3. Utilize principles and functions of management to foster organizational development, promote effective use of human resources, and enhance operations
4. Assess contemporary policies, regulations, and governance structures relevant to the United States health care delivery system and their implications for ethical decision-making
5. Promote dynamic organizational cultures that establish strategic visions, methodically analyze and interpret data based on sound epidemiological and statistical principles, and embrace change for continuous health care quality improvement
6. Demonstrate the application of healthcare management principles to improve the delivery of patient care within their technical discipline/department

Requirements

Transfer Requirement

Healthcare Administration (BS)

Online Programs

Description

Healthcare is the largest industry in the United States and the second largest employer, with more than 11 million jobs (AUPHA). Healthcare managers, administrators and executives are responsible for planning, directing, and coordination health services for the populations they serve at the micro, meso and macro levels. Healthcare administration professionals provide leadership in hospitals, physician group practices, skilled nursing facilities, home health and other community agencies. Healthcare Administration (HCA) professionals possess the knowledge, attitudes, and skills to successfully lead healthcare organizations while working closely with clinicians to ensure the highest quality of care is provided in a fiscally responsible manner. The B.S. Healthcare Administration program has been developed in alignment with Association of University Programs in Health Administration (AUPHA). Content areas selected for the B.S. Healthcare Administration program represent the core body of knowledge identified by AUPHA as being essential for the Healthcare Administrator. Competencies are the skills, knowledge and abilities that healthcare administrators need to master and transcend organizational settings (Healthcare Leadership Alliance, 2010). Upon completion of the B.S. Healthcare Administration program, graduates will demonstrate the four competencies identified by AUHPA as critical to their success including the following: communication (written and oral); computational skills (mathematics and quantification); critical thinking (ability to analyze problems); and societal and cultural context (historical, philosophical, social, cultural, economic, political, and scientific foundations). The Healthcare Leadership Alliance (HLA) created the HLA Competency Directory which provides an interactive tool to ensure current and future healthcare leaders have the training and expertise needed to manage the nation's healthcare organizations. The HLA is comprised of the following professional organizations: American College of Healthcare Executives (ACHE); American College of Physician Executives (ACPE); American Organization of Nurse Executives (AONE); Healthcare Financial Management Association (HFMA); Healthcare Information and Management Systems Society (HIMSS); and the Medical Group Management Association (MGMA). The AUPHA competencies are in alignment with the competencies identified as critical by the Healthcare Leadership Alliance. Through meeting Program Outcomes, graduates from the B.S. Healthcare Administration program will demonstrate these competencies.

Program Outcomes

1. Engage diverse health care stakeholders using communications that reflect keen interpersonal skills, effective collaboration practices, and deep cultural competence
2. Demonstrate knowledge of microeconomic, macroeconomic and financial principles through monitoring and utilization of financial and economic data for decision-making and strategic planning
3. Utilize principles and functions of management to interpret market analyses for strategic planning and to foster organizational development, promote effective use of human resources, and enhance operations
4. Propose recommendations to improve the effectiveness and integration of information management systems at the various levels of health care organizations and achieve organizational goals
5. Assess contemporary policies, regulations, and governance structures relevant to the United States health care delivery system for their impacts to populations' health and their implications for ethical decision-making
6. Promote dynamic organizational cultures that establish strategic visions, methodically analyze and interpret data based on sound epidemiological and statistical principles, and embrace change for continuous health care quality improvement

Healthcare Administration (BS) - Health Information Management (Concentration)

Description

The concentration in Health Information Management builds on the knowledge, attitudes, and skills developed in the core Healthcare Administration degree by focusing on the effective integration of technology in healthcare organizations. Students will be exposed to the design and use of medical databases, as well as how to implement business rules and data modeling to develop effective medical information management systems. Students will also engage in assignments focused on long and short-term planning, operations, maintenance and forecasting in healthcare organizations.

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - HIM220 - Healthcare Data Management (3)
 - HIM350 - Communication and Technologies (3)
 - HIM425 - Healthcare IT Infrastructure and Network Management (3)

Grand Total Credits: **9**

Healthcare Administration (BS) - Patient Safety and Quality (Concentration)

Description

The concentration in Patient Safety and Quality focuses on the development and use of techniques to raise patient quality and safety awareness within healthcare organizations, including the various factors that impact patient safety and quality and their inter-relationships.

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - IHP315 - Patient Safety Systems and Strategies (3)
 - IHP355 - Healthcare Regulatory Compliance and Accreditation (3)
 - IHP435 - Performance Improvement Measurement and Methodologies (3)

Grand Total Credits: **9**

Healthcare Administration (MS)

Online Programs

Description

Healthcare is the largest industry in the United States and the second largest employer, with more than 11 million jobs (AUPHA). Healthcare Administration (HCA) professionals educated at the graduate level have a strong foundation in healthcare finance and economics, law, policy, performance and process improvement, leadership, informatics and strategic planning. The Healthcare Administrator provides leadership and strategic vision for the organization in collaboration with clinicians and internal and external stakeholders to ensure equitable healthcare quality and access to care. The M.S. Healthcare Administration program has been developed in alignment with Association of University Programs in Health Administration (AUPHA). Content areas selected for the M.S. Healthcare Administration program represent the core body of knowledge identified by AUPHA as being essential for the Healthcare Administrator. Competencies are the skills, knowledge and abilities that healthcare administrators need to master and transcend organizational settings (Healthcare Leadership Alliance, 2010). Upon completion of the M.S. Healthcare Administration program, graduates will demonstrate the four competencies identified by AUPHA as critical to their success including the following: communication (written and oral); computational skills (mathematics and quantification); critical thinking (ability to analyze problems); and societal and cultural context (historical, philosophical, social, cultural, economic, political, and scientific foundations). The Healthcare Leadership Alliance (HLA) created the HLA Competency Directory which provides an interactive tool to ensure current and future healthcare leaders have the training and expertise needed to manage the nation's healthcare organizations. The HLA is comprised of the following professional organizations: American College of Healthcare Executives (ACHE); American College of Physician Executives (ACPE); American Organization of Nurse Executives (AONE); Healthcare Financial Management Association (HFMA); Healthcare Information and Management Systems Society (HIMSS); and the Medical Group Management Association (MGMA). The AUPHA competencies are in alignment with the competencies identified as critical by the Healthcare Leadership Alliance. Through meeting Program Outcomes, graduates from the M.S. Healthcare Administration program will demonstrate these competencies.

Program Outcomes

1. Demonstrate interpersonal skills, effective collaborative practices and cultural competence through meaningful verbal and written communication in individual and group interactions
2. Assimilate principles and functions of management to foster organizational development, promote effective use of human resources, enhance operations, and position the organization through application of market analysis
3. Integrate knowledge of microeconomic, macroeconomic and financial principles to monitor, analyze and interpret healthcare financial and economic data for decision-making and strategic planning
4. Appraise the effectiveness, utilization and integration of information management systems within the micro and meso systems of the organization
5. Translate the knowledge of U. S. Healthcare Delivery System, healthcare reimbursement, health policy, governance, and ethical considerations to promote population health and strategic planning at the organizational level
6. Propose strategies that foster a dynamic organizational culture that clearly defines its strategic vision, identifies opportunities, and methodically engages in data analysis using epidemiologic and statistical principles to support strategic planning, operations management, and continuous quality improvement

Master of Public Health (MPH)

Description

The Master of Public Health program prepares students for careers in public health practice, education, and research. Public Health is a discipline dedicated to preventing disease and promoting health equity. There is a strong demand for public health professionals to deal with chronic and emerging diseases, environmental health, health care policy and reform, and global health issues. This program provides students with the knowledge and skills to be a public health educator, affect policy change and development, and implement successful public health programs within local, state, and federal governments, schools, and private for profit and non-profits. The Master of Public Health is a widely recognized credential for those who are seeking leadership, program administration, and policy and education positions in public health. The program includes both a practicum and capstone experience.

Program Outcomes

1. Solve population-based, health problems by applying statistical constructs and epidemiological principles to recognize patterns and trends within the scope of public health
2. Integrate assessment, monitoring, and prevention strategies to address environmental insults that improve the health, safety, and quality of life for people in their communities
3. Develop evidence-based, health program proposals targeted at improving healthcare access, quality, and delivery to ensure community health
4. Apply social and behavioral health science frameworks and research to evaluate the development and implementation of programs that change behaviors
5. Analyze public health policy and formulate communication outreach strategies to promote the health and social justice of individuals, communities, and populations
6. Evaluate the emerging public health issues and trends to develop initiatives that protect and promote the health of individuals, communities, and populations

Requirements

Master of Public Health (MPH) - Global Health (Concentration)

Description

This concentration in Global Health provides students with a strong foundation in analyzing health issues in developing country contexts, assessing the root causes of health inequities in populations, addressing population health disparities, and critiquing global health interventions for their effectiveness. Integrating the global health practice domains instituted by the Association of Schools and Programs in Public Health (ASPPH), graduates will be prepared to understand the complexities of working in a global health environment, critically examine pressing global health issues, and create solutions to global health issues that are both meaningful, effective, and ethically sound.

Concentration Outcomes

1. Apply global health concepts, theories, and principles to effectively address global health issues

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - PHE550 - Principles of Global Health (3)
 - PHE660 - Global Health Policy, Practice, and Partnerships (3)
 - PHE665 - Case Studies in Global Health (3)

Grand Total Credits: **9**

Public Health (BS)

Description

The Centers for Disease Control and Prevention (CDC) notes that serious public health workforce shortages exist in disciplines that perform surveillance functions and the Association of Schools and Programs of Public Health (ASPH) estimates that 250,000 more public health workers will be needed by 2020 to meet these needs. Further complicating the workforce shortages is the need for a prevention and a population health perspective in healthcare educational programs (Institute of Medicine). The BS in Public Health program explores concepts of preventing disease, prolonging life, and improving health with a population-based focus. It provides a strong foundation in biological and social sciences with emphasis on evidence-based approaches in program assessment, planning and evaluation for the protection and improvement of the health of individuals, communities and populations. This program is aligned with the Council on Education for Public Health curriculum standards for baccalaureate programs to provide graduates with the core competencies for entry into the profession.

Program Outcomes

1. Apply statistical constructs and epidemiological principles to recognize patterns and trends within the scope of public health
2. Apply fundamental public health strategies in assessment, planning, and prevention to improve the health, safety, and quality of life for people in their communities
3. Articulate the efficacy of health programs targeted at improving healthcare access, quality, and delivery to ensure community and population health
4. Describe the fundamental social and behavioral frameworks in public health to identify health disparities and promote social justice
5. Develop a professional identity from which to make globally, socially, and ethically responsible public health decisions that are aligned with legal and organizational policy requirements
6. Design technical and professional communication strategies that promote effective public health campaigns

Kenzie Academy

Online Programs

Full Stack Web Development (Certificate)

Description

Learners will develop a self-efficacy in researching, designing, and developing web-based applications. They will learn to navigate the Software Development Lifecycle (SDLC) while working as collaborative members of Agile teams to complete projects with real-world relevance. Through their coursework and projects, learners will create web-based applications which request and process input from a user, implement basic logic, store and process data, provide visual representations to the user, and utilize the functionality of 3rd-party services. Once learners have developed these skills as a basic foundation, they will learn to build more complex solutions, as well as integrations with a variety of existing libraries and frameworks. Full Stack Web Development includes developing, building, and maintaining both the frontend and backend that support a website. Learners can expect to use systematic, disciplined, and measurable approaches to find efficient solutions to a problem for a company or client. Today, every company is a tech company. Mastering Full Stack Web Development allows learners to build and deploy the user and server facing systems of web-based applications, and so much more. This can set graduates up for a career in Web Development. As experience increases, opportunities to work in positions like Front End Developer, Web Designer, Entry Level Software Developer, Full Stack Developer, Web Analyst, Technical Consultant, and UX/UI Developer will be available.

Program Outcomes

1. Build foundational programming concepts that can easily transfer to other programming languages
2. Design and create complex solutions using a variety of existing libraries and frameworks
3. Develop an engineering mindset geared toward problem-solving
4. Understand how to effectively work and collaborate as a team within the Software Development Lifecycle (SDLC)
5. Identify and fix performance issues in web based application
6. Develop the skills required for technical and behavioral job interviews

Software Engineering - Backend Development (Certificate)

Description

Learners will develop a self-efficacy in researching, designing, and developing cloud-enabled software applications. They will learn to navigate the Software Development Lifecycle (SDLC) while working as collaborative members of Agile Scrum teams to complete software projects with real-world relevance. Learners will participate in a variety of learning experiences from independent learning modules and quizzes to mastery-based projects based on problems commonly encountered in developing business applications. They will create software systems to implement advanced logic, store and process data, and integrate with a variety of services to solve complex problems. This program includes developing, building, and maintaining computer systems, databases, and applications. Learners can expect to use systematic, disciplined, and measurable approaches to find efficient solutions to a problem for companies or clients. Today, every company is a tech company. Mastering software engineering skills with a specialization in backend Java programming will allow Learners to build and deploy cloud-based applications, and so much more. As experience increases, opportunities to work in positions like Java Back End Developer, DevOps Engineer, Solutions Architect, Scrum Master, Business Analyst, and Project Manager will be available.

Program Outcomes

1. Develop an engineering mindset geared towards problem-solving
2. Use logic and algorithms to solve problems
3. Design, create, and modify Java-based Applications on AWS Cloud Infrastructure
4. Utilize industry standard software tooling and libraries
5. Understand how to effectively work and collaborate on a software development team
6. Identify and fix performance issues in an application
7. Develop the skills required for technical and behavioral job interviews

Requirements

Online Programs

UX Design (Certificate)

Description

Learners will acquire skill in Design Thinking to empathize with users, and perform research, and use data to articulate problem statements. Using empathy, learners synthesize findings and iterate upon solutions, test their solutions, and build applications to solve real-world problems focusing on the end user. As learners iterate on solutions, they'll create high fidelity prototypes including the final build of the application. Learners graduate with a robust project portfolio and with knowledge of industry best practices. This program is meant to give learners invaluable experience designing solutions to real world problems through practical application. Learners are encouraged to solve more complex problems as they unlock the design thinking process of Research, Iteration, Prototyping, and Testing. Learners will progress their design thinking skills as they are introduced to more complex problems as they progress through the coursework. The program is meant to emulate a first-year internship experience in the industry.

Program Outcomes

1. Develop user empathy and a research mindset by writing non-leading research questions based on a user type to conduct discovery interviews and derive user needs based on data collected
2. Translate user needs into user steps via flow chart and produce visual artifacts to convey the user's journey of getting their needs met
3. Translate user steps into Graphical User Interface wireframes meeting their own needs with the design
4. Apply best practices for GUI design in the areas of navigation, searching/filtering, onboarding, notifications, form design, screen states, UX writing, and icons
5. Apply visual hierarchy to GUI design by the way of typographical hierarchy, color hierarchy, and proximity/whitespace
6. Interview user types about design solutions, gather and cassidy feedback, and iterate design solutions based upon feedback
7. Tell visual stories through producing high-fidelity mockups in order to produce a working prototype ready for development

American Studies (Minor)

Description

The American Studies minor at Southern New Hampshire University introduces students to a wide range of topics in American art, culture, history, literature, law, and politics. Through interdisciplinary coursework and project-based research, students will learn critical thinking skills, identify and interpret sources in different fields to support academic arguments, and communicate clearly and effectively. The open-ended nature of the minor allows students to pursue their individual interests. The American Studies minor will complement any other academic program and will provide students with the foundations for careers in a variety of fields, including teaching, law, journalism, government, and business.

Requirements

Communication (BA)

Description

The Communication major prepares students for a wide variety of fields including public relations, corporate communications and training, government relations, social media, professional writing, journalism, advertising, and other mass media professions. Students also have the opportunity to focus their studies through a variety of minors and internship experiences. At the same time, students are able to develop skill sets in particular areas that may be highlighted by portfolio work for future employment. Specific focus areas include business communication, new media, intercultural communications, leadership strategies, public relations, and professional writing.

Program Outcomes

1. Design, develop, and deliver professional quality oral, written, and visual communications that are coherent, technically sound, and appropriately adapted to specific audiences and contexts
2. Critically analyze and recommend strategies for addressing the impact of various physical, cognitive, cultural, and social factors that shape communication across interpersonal, group, and organizational settings
3. Evaluate, select, and effectively apply various tools and technology to the design, development, and dissemination of communication messages
4. Evaluate and respond to complex problems associated with the design, development, and delivery of communication messages through critical and creative thinking and collaboration with an interdisciplinary team of specialists and stakeholders
5. Apply professional, ethical, and socially and culturally sensitive communication practices across interpersonal, group, organizational, and intercultural settings

Communication (BA) - Business Communication (Concentration)

Description

The concentration in Business Communication provides students the opportunity to develop additional written and oral communication skills that are useful in any professional workplace. The courses in this concentration allow students to build upon their knowledge and skills regarding interpersonal relationships and teamwork, in order to gain a better understanding of the work processes that will influence and be influenced by the communication messages they create. Students interested in advanced graduate work in Business can choose to take a graduate-level business foundations course to prepare them for graduate work in the Business field. Students considering an advanced degree in Communication have the option to choose up to two graduate-level communication courses and earn up to six credits that can be dually applied to their concentration and as a head start to an advanced degree.

Communication (BA) - New Media (Concentration)

Description

The field and practice of communication is characterized by the continual evolutions of media technology and the impact that these changes have made on communication practices, relationships, and culture. Students who are seeking employment as a communication professional must be prepared to enter into a dynamic and shifting landscape of technology and media and approach these changes with technical savvy and an ethical mind. The concentration in New Media builds on the foundations of communication media and technology in the core Communication program and extends these ideas to the particular developments in new media technology, social media research and marketing, interpersonal development in mediated environments, and content production for new media platforms.

Concentration Outcomes

1. Utilize professional communication skills and competencies in evaluating the appropriate use of new media technologies and developing dynamic content and marketing messages for a variety of contemporary audiences.

Communication (MA)

Description

Technological advances present an exciting opportunity for a new type of communication professional that can effectively convey messages in a globalized society. The Master of Arts in Communication seeks to prepare students with the knowledge and skills that are most relevant to a wide variety of professions and organizations. Instead of focusing on particular technological tools, students will become self-directed learners that are fluent in the language of technology, thereby preparing them for the next major innovation—and, the one after that. In this way, the M.A. in Communication positions one as a "value add" to a range of employers within and outside of the traditional communication field. Graduates of the degree program could potentially pursue careers in public relations, business, writing, journalism, marketing, health, entertainment, politics, education, and many other fields.

Program Outcomes

1. Apply moral reasoning to make ethically sound and socially responsible choices that are consistent with a cogent personal framework and accepted standards in the field of communication
2. Utilize multiple appropriate, strategic approaches in making decisions, formulating solutions, and solving problems that reflect creativity and versatility of thought
3. Engage diverse audiences effectively through an open-minded, empathetic treatment of different cultural perspectives and an awareness of self and one's impact in a global, interdependent age
4. Integrate multiple communication technologies and collaborate in communities of practice to carefully curate shared messages while generating new meaning
5. Create, manage, and grow an authentic, personal brand with purpose and savvy using innovative communication strategies, professional networks, and relevant tools and technology
6. Employ a broad, contemporary knowledge base, self-directed learning skills, and a practiced adaptability to remain on the cutting edge of the communication field as an empowered agent of change

Creative Writing and English (BA)

Description

Writers articulate the questions of our time and give our culture a way to talk to itself, helping to free us from easy assumptions and to empathize with people whose circumstances differ from our own. In this spirit, SNHU's degree in Creative Writing and English is for students interested in careers in writing and book publishing, and also provides opportunities for students to cultivate and strengthen their skills and passion for writing. Published writers, professional editors, and established literary critics guide students through their work in SNHU's primary writing genres: fiction, nonfiction, screenwriting, and poetry. Students can complete the program with a genre concentration or no concentration within the major. All genres include traditional workshop opportunities, where students share work with peers and instructors to help strengthen their writing, reading, and revision skills. Additional courses focus on the publishing industry and provide students the chance to reflect and build their portfolios and digital presence. With requirements in literature, students graduate proficient in literary history and analysis. After advanced study in this program, graduates will have essential writing and critical thinking skillsets that can translate to a wide range of professions, including journalism, law, editing, copywriting, publishing, filmmaking, communications, and more. The degree also prepares students for graduate programs, like the university's Masters of Fine Arts programs. Creative writing courses can begin during the first year of study.

Program Outcomes

1. Apply techniques and terminology essential to analyzing (and appreciating) literary form, genre, structure, and style
2. Produce creative works in a variety of genres (fiction, non-fiction, poetry, drama, screenwriting), employing the conventions and techniques of those genres
3. Produce a body of advanced work in the student's chosen genre, reflecting a culmination of the student's workshop training and the beginning of professionalization

Creative Writing and English (BA) - Fiction Writing (Concentration)

Description

The fiction concentration is ideal for students who wish to focus and strengthen their abilities to build worlds, characters, and conflict. With this concentration, students will be able to hone in on the specific genre they are interested in and explore it in-depth in the program. Some common genres students pursue include literary, sci-fi, fantasy, romance, mystery, thriller/suspense, horror, and western. Students may choose to write short stories or chapters to a longer novel-length work. Having a concentration also opens additional opportunities to apply to MA or MFA creative writing programs.

Requirements

Concentration Courses

9 Total Credits

- Complete all of the following
 - Exception(s):

Creative Writing (MFA)

Description

The online Master of Fine Arts in Creative Writing provides broad access to writers to pursue a genre-focused, entirely online education that embraces practicality, diversity, and community. In choosing from four fiction genre tracks (contemporary, romance, young adult, and speculative) the SNHU online MFA brings together talented faculty and industry professionals to guide students in preparation for the art and business of writing in a realistic 21st century context. In doing so, students produce tangible works that build their resume as professional writers, including a finished, revised full-length novel. Students study elements of storytelling, including a keen focus on the aspects and specialties of their chosen genre, participating in genre-specific courses, and engaging as a literary citizen through genre-driven communities and practices. Employing a workshop format, the SNHU online MFA teaches students to revise and reflect on their art while learning the print and digital business models they need to support their creative endeavors. In addition, students choose one of two certificate options as they move through the online MFA program in either Professional Writing or Online Teaching of Writing. A hallmark of the SNHU online MFA is its focus on practicality and helping students understand the myriad of careers available to writers today. Students learn business skills that both help them develop an audience for their work as well support career aspirations in areas such as marketing, publishing, managing, content writing, teaching, and freelancing. Coursework includes the fundamentals of building a writer's platform, the use of social media tools, and copywriting. As students develop their writing skills, they also develop an understanding of the publishing landscape and how to position themselves in it. Throughout the program, students gain the confidence and flexibility to adapt to the ever-changing literary landscape.

Online Programs

Program Outcomes

1. Create publishable works of fiction in specific genre by effectively controlling and manipulating the elements of storytelling
2. Hone one's own writing process and craft through practice, constructive workshopping, and reflection
3. Synthesize the literature and history of one's chosen genre for situating oneself in the literary landscape
4. Leverage a realistic understanding of the publishing ecosystem in achieving business and artistic goals
5. Explore viable, current writing career opportunities that enhance and sustain one's experiences as a professional author
6. Build a writer's platform that advances artistic and career goals and is grounded in literary citizenship

Digital Photography (AA)

Description

The Associate in Arts Digital Photography at Southern New Hampshire University provides students the technical skills of digital camera operation, lighting, and post-production image editing while also developing a strong business acumen. Students of the Associate in Arts Digital Photography program will be current practitioners within the commercial industry seeking a degree and/or those who seek to establish the necessary foundation for a career as a commercial photographer. The Associate in Arts Digital Photography program equips students with knowledge of the latest technology as they focus their study on developing or furthering the necessary skills for a career in commercial photography. Coursework within the Associate in Arts Digital Photography program scaffolds projects with a focus on students building the necessary skill set to produce work typical of industry standards while also establishing a creative voice, brand identity, and ethical practice. The goal of the Associate in Arts Digital Photography is to promote professional development and to prepare students for a career in commercial photography.

Program Outcomes

1. Develop professional skills and behaviors that are aligned with legal and ethical standards and best practices of the photographic industry
2. Employ industry-appropriate tools and techniques in capturing, editing, and delivering high quality photographic works
3. Employ the elements and principles of art and design in making informed formal and conceptual decisions in photography
4. Communicate ideas and themes to specific audiences by applying a creative, client-centered approach to the creation of photographic works

Online Programs

Description

The BA in Digital Photography provides students with a strong foundation in the technical skills of digital camera operation, lighting, and post-production image editing while developing students' visual literacy, artistic talents, and foundation in the humanities. Graduates will be equipped with knowledge of the latest technology as they explore various genres of the photographic medium for possible career options after graduation. Because the degree is grounded in the Liberal Arts, students will be well versed with skills in written and oral communication, critical thinking and creative problem solving, and the ethical, dispositional, and collaborative abilities to succeed in the professional realm. Students enrolled in this program will develop a professional portfolio for career advancement and personal fulfillment. This program is especially designed for students who have artistic talent and/or professional interests in the field and also seek creative, meaningful, and practical employment upon graduation.

Program Outcomes

1. Create, manage, and grow an authentic, personal aesthetic and brand using professional networks and relevant tools and technologies
2. Cultivate skills and behaviors that foster professional success while adhering to legal and ethical standards of the photographic industry
3. Critique photographic works through historical, social, and political contexts to assess their impact on contemporary culture and one's personal vision
4. Employ industry-appropriate tools and techniques in capturing, editing, and delivering high quality photographic works
5. Employ the elements and principles of art and design in analyzing formal, aesthetic, and conceptual decisions in photography
6. Create photographic works that effectively communicate ideas, emotions, and messages to diverse audiences

English and Creative Writing (MA)

Description

The Master of Arts in English and Creative Writing fuses literary study with creative storytelling, guiding students through the art of the writing craft in four possible genres – fiction, nonfiction, screenwriting, and poetry – or a comprehensive capstone experience. Students have the opportunity to investigate and develop creative works that can contribute to their professional advancement. With additional study in teaching methodologies and language, as well as electives ranging from genre fiction to editing, students gain skillsets that contribute to a wide range of possible careers, including professional writing, editing, literary research, and higher education. This M.A. degree from Southern New Hampshire University also prepares graduates for further studies in a terminal degree track, such as a Ph.D. or an M.F.A.

Program Outcomes

1. Integrate principles drawn from evaluation of form, language, literary and cultural contexts, and historical traditions of classic and contemporary literary works into one's personal style and voice
2. Embrace and integrate an iterative, critical, and peer-based approach into the creative process for developing personal voice and the creation of original literary works of publishable quality
3. Maintain a reflective perspective on and articulate with analytic language one's goals, process, and ethos as a creative writer
4. Infuse current technologies into the writing process both as a stylistic tool and as a vehicle in the promotion of one's literary work
5. Cultivate a professional identity that promotes confident self-presentation in multiple media formats and contributes to one's advancement in the literary world

Requirements

English Language and Literature (BA)

Description

There is immense power in the written word. Texts have served as the foundation of nations. They've inspired revolts, sparked movements, and established unlikely unions. How, exactly, did seminal works inspire monumental acts? With an emphasis on critical thinking, analysis, and audience-appropriate writing, SNHU's BA in English Language and Literature degree gives students what they need to help them investigate and harness the power of the written word. Students also gain essential communication and research skills that are prized by employers. Possible careers include professional writing, editing, publishing, marketing, law, communication, politics, and more

Program Outcomes

1. Critical and Creative Thinking - Identify and analyze ambiguity; Interpret implicit meaning; Assess the reasoning in arguments by others; Support interpretations with textual evidence
2. Cultural Literacy - Differentiate between an author's historical period and place within a literary movement; Assess and critique the influence of cultural categories of race, class, gender, and orientation; Integrate a variety of historical perspectives into analysis of contemporary issues; Articulate orally and in writing the culturally important role of literature in different historical periods
3. Literary Analysis - Employ critical methods and terminology to analyze literary form, genre, structure, and style; Incorporate theoretical perspectives into interpretation of texts; Demonstrate skills of literary analysis through written and oral presentations
4. Analytical Writing - Develop an engaging literary analysis that develops an original thesis through a logical, organized argument that emphasizes close reading of the text; Integrate critical thinking, cultural knowledge, and critical analysis with (at 300-level and higher) research and documentation of secondary sources
5. Collaboration - Demonstrate an ability to work with peers on collaborative projects; Utilize oral and written communication skills in a group dynamic

English (MA)

Description

Literature stands the test of time. Seminal works created centuries ago have morphed and shifted, their meaning and themes altered to new audiences, but they have carried on with power and influence. Why have certain texts emerged to popular reception, whether positive or negative? Why have certain texts evolved over time? What themes continue to be explored across cultures and periods? How will we cement our place in the future through our development and study of literature? These are just some of the guiding questions in Southern New Hampshire University's MA English degree. With a multitude of courses in American, British, Global, and Ethnic literature, among others, students can tailor the program to fit their specialized interests. Through critical analysis and professional writing, students investigate texts and topics with the goal of adding to the current body of critical work. Upon completion of the MA English degree, students might pursue a doctoral degree in literature, teach at the community college or secondary levels, earn a professional degree in law or business, or work in publishing or public relations.

Program Outcomes

1. Evaluate, synthesize, and incorporate various theoretical arguments into original interpretation of literary texts
2. Demonstrate expertise in a literary subject and articulate new potential connections between language/literature and social and cultural history
3. Articulate several theoretical approaches to literature and apply both theory and form to primary texts, for purpose of informed, original interpretations that contribute to the field of study
4. Compose essays of significant depth that involve researching, evaluating, and integrating a variety of literary sources into scholarly papers, each containing an extended, cohesive and original literary argument that contributes to the field of study
5. Produce scholarship that adds to others' aesthetic appreciation for literature and articulates the critical role it plays in culture and society

Graphic Design and Media Arts (BA)

Description

The mission of the SNHU Graphic Design program is to prepare learners to be professional graphic designers educated in the design process and competent in the latest design technologies. With the inclusion of their general education, this degree provides learners with a well-rounded, versatile interdisciplinary learning experience. Learners are equipped with professional, practical, and business-oriented skills to assist with developing a personal brand identity and gaining a competitive edge in the marketplace. At the same time, learners will ground themselves in design etiquette and thinking to foster their creativity and help turn ideas into visual concepts. The degree provides learners with the opportunity to look at design from multiple perspectives in order to meet the needs of clients and audiences, while also being culturally and socially aware in all aspects of their work. The degree also includes authentic, workforce relevant learning experiences to prepare learners to enter the field.

Online Programs

Program Outcomes

1. Design, develop, adapt, and present professional quality graphic and media works that articulate a clear, coherent message using appropriate and effective technical and aesthetic design principles
2. Apply the design thinking process to address various physical, cognitive, cultural, and social factors in visual media and recommend creative solutions to design challenges
3. Evaluate, select, and effectively apply various tools and technology to the design, development, and dissemination of graphic and media works
4. Evaluate and respond to complex problems associated with the design, development, and delivery of graphic and visual media through critical and creative thinking and collaboration with an interdisciplinary team of specialists and stakeholders
5. Apply professional, ethical, and socially and culturally sensitive practices to the design and development of visual media elements

Graphic Design and Media Arts (BA) - 3-D Modeling and Animation (Concentration)

Description

The game design industry represents one of the most creative and lucrative fields in the entertainment industry. Students in the Graphic Design Program concentrating in 3D Modeling and Animation acquire the practical skills necessary to compete in this highly competitive field. Working with emerging technology and industry standard software students blend theory and practice assembling cutting edge skills including 3D modeling, anatomy illustration, digital painting, texturing, and rigging. Course curriculum exposes students to the industry's standard workflow pipeline and culminates in a comprehensive portfolio showcasing professional design work.

Concentration Outcomes

1. Design and present engaging 3D models and animated performances that utilize the principles of animation to follow basic standards and practices in the animation and game production environments

Requirements

Concentration Courses

12 Total Credits

- Complete:
 - GRA201 - Intro to Digital Sculpting (3)
 - GRA202 - 3-D Modeling and Animation (3)
 - GRA211 - Interactive Animation (3)
 - GRA212 - 3-D Character Animation (3)

Graphic Design and Media Arts (BA) - Web Design (Concentration)

Description

The B.A. in Graphic Design with a concentration in Web Design will provide students with artistic and design capabilities, user interface expertise, and hands-on technical proficiency to design and develop world class web page prototypes for real world use. Students will focus not only on the tools for developing web pages for a multitude of platforms and devices, but also on the strategies for publishing, self-promotion, and for continually improving one's skills in an ever changing marketplace. This concentration will balance design and artistic interests with practical applications for career opportunities.

Concentration Outcomes

1. Develop a variety of Web design solutions that function on multiple platforms and devices and are designed to meet changing client and user experience needs

Requirements

Concentration Courses

12 Total Credits

- Complete:
 - GRA332 - Digital Publishing (3)
 - GRA431 - Interactive Animation for the Web (3)
 - GRA451 - Advanced Multiplatform Design (3)
 - GRA470 - User Interface and Experience (3)

Graphic Design (Minor)

Description

The Graphic Design and Media Arts minor combine a foundation in the elements and principles of graphic design, design thinking, and creative processes with the conceptual and technical skills needed to communicate visually across various media. Students can apply this knowledge to different visual communication challenges spanning print, web, and interactive design. This minor will complement a variety of academic programs and provide students with the foundations for careers in other fields, including marketing, business, and communications.

History (BA)

Description

The History major at Southern New Hampshire University provides students with the intellectual training and the analytical skills needed to flourish in a variety of careers and to act as a productively engaged member of one's community. Through a combination of coursework and project-based research—enhanced by optional internships and study-abroad experiences—students learn to read and think critically and comparatively about evidence and sources, competing arguments and multiple perspectives, and patterns of individual and collective behavior throughout time. SNHU's history major emphasizes the ability to research any topic deeply and insightfully and to communicate one's findings clearly and effectively. SNHU students majoring in history have gone on to graduate work not only in history, but in library/information science, archival management, museum administration, and related fields. Many teach history and social studies at the high school and middle school levels, while others have pursued highly successful careers in law, journalism, government work, and business.

Program Outcomes

1. Demonstrate knowledge of the development of human societies by analyzing and interpreting a variety of sources that provide evidence to support an argument about the past
2. Utilize critical thinking skills for formulating effective analysis of appropriate primary and secondary sources
3. Develop historical perspectives and arguments and express those arguments in effective and applicable formats
4. Practice civic engagement through the application of history in the public realm
5. Analyze multiple historical and theoretical viewpoints effectively through an open-minded, empathetic perspective on the past

History (BA) - American History (Concentration)

Description

Students pursuing a BA in History with a Concentration in American History focus study on a comprehensive history of the United States of America. Building upon a foundational survey of Western Civilization, courses are arranged chronologically or thematically, with a focus on the colonial and national eras of American history. Students also complete courses in historical methods and a senior colloquium culminating in a senior thesis.

Concentration Outcomes

1. Assess the significance of larger historical periods and themes of American history through an analysis of key American events and figures and their connections to historical contexts

Requirements

Concentration Courses

9 Total Credits

- 9 credit(s) from the following:
 - HIS245 - United States History since 1945 (3)
 - HIS270 - American Environmental History (3)
 - HIS319 - African-American History since the Civil War (3)
 - HIS330 - Civil War and Reconstruction (3)
 - HIS332 - Colonial New England (3)
 - HIS338 - Young America (3)
 - HIS357 - American Slavery (3)

Grand Total Credits: **9**

History (BA) - European History (Concentration)

Description

Students pursuing a BA in History with a Concentration in European History focus study on the history of Europe and western Asia from antiquity to the present, with an emphasis on the twentieth century. Building upon a foundational survey of Western Civilization, courses are arranged chronologically and thematically but vary in scope. Students also complete courses in historical methods and a senior colloquium culminating in a senior thesis.

Concentration Outcomes

1. Assess the significance of larger historical periods and themes of European history through an analysis of key European events and figures and their connections to historical contexts

Requirements

Concentration Courses

9 Total Credits

- 9 credit(s) from the following:
 - HIS220 - Modern European History: 1890-Present (3)
 - HIS235 - Modern Russia (3)

Online Programs

History (MA)

Description

People often say that "history repeats itself," implying that there is a tangible benefit in accessing, absorbing, and understanding history. While many would deny that old adage, the implication is still true—history is not only relevant, but crucial for comprehending the present, articulating and justifying viewpoints, and preserving cultural identities. The practical need for historians is ever-present, including traditional historians, government employees, library curators, preservationists, secondary and post-secondary teachers, and educational publishers. The Master of Arts in History degree extends students' expertise in the discipline by effectively preparing them to apply their skills in a variety of professions and contexts. Students deepen their knowledge of the process of "making" history, through analyzing primary and secondary sources, evaluating historiography, applying research methods, defining and researching a specific area of history, and effectively defending and articulating theses. Students have the option of exploring history through traditional coursework, focused on research and writing, or by investigating subjects pertinent to public history, such as understanding the latest technology for preserving and digitizing history. Emphasis is also placed on strategies to keep the student on the cutting-edge of the field, such as using quantitative reasoning in historical analysis and information systems to promote the dissemination of meaningful interpretation of the past. This program will provide students the skills they need to function both ethically and practically in the real world and place themselves within the context of their field, whether in academia, the private business world, or the public realm. The abilities here will make the student a better researcher, writer, and critical thinker.

Program Outcomes

1. Develop sophisticated interpretations of history that are substantiated by cogent syntheses of appropriate primary and secondary sources
2. Analyze historical scholarship for its credibility, methodologies, biases, and potential implications with a professional level of objectivity and precision of thought
3. Craft written communications that are effectively tailored to one's audience, exhibit an economical command of language, and accurately apply appropriate styles and conventions
4. Articulate and act in accordance with an ethical system that incorporates the societal responsibilities entrusted to historians as the caretakers of our collective narratives and cultural identities
5. Defend the essential relevance of the past for making informed decisions in the future by promoting transparency in the interpretation of historical truth
6. Employ information systems, quantitative reasoning, and emerging technologies in the innovative preservation, organization, assessment, and dissemination of historical knowledge

Requirements

History (MA) - American History (Concentration)

Description

Students pursuing the MA History with Concentration in American History degree enhance their understanding of American History while mastering the skills of a Research Historian. Through a core curriculum focused on establishing responsible research techniques, critical-thinking, and writing skills students develop the expertise to contribute meaningful original scholarship in their desired field of concentration. Students focus their research through a variety of thematic-based courses followed by the Research Seminar for Historians and Research Capstone culminating in a project of original research.

Concentration Outcomes

1. Assess the significance of larger themes in American history within original scholarship by analyzing relationships among historical narratives, perspectives, and trends within particular contexts

Requirements

Concentration Courses
15 Total Credits

- 15 credit(s) from the following:
 - HIS600 - Early American Encounters (3)
 - HIS601 - New American Nation (3)
 - HIS602 - Era of the Civil War (3)
 - HIS603 - The Gilded Age and Progressive Era (3)
 - HIS604 - America and the World Wars (3)
 - HIS605 - Cold War and the American Empire (3)

Grand Total Credits: **15**

History (MA) - Military History (Concentration)

Description

Students pursuing the MA History with Concentration in Military History degree enhance their understanding of Military History while mastering the skills of a Research Historian. Through a core curriculum focused on establishing responsible research techniques, critical-thinking, and writing skills students develop the expertise to contribute meaningful original scholarship in their desired field of concentration. Students focus their research through a variety of thematic-based courses followed by the Research Seminar for Historians and Research Capstone culminating in a project of original research.

Concentration Outcomes

1. Assess wars and conflicts in the West from antiquity to modern times within original scholarship by analyzing the relationships among military and political institutions and their economic, technological, and social contexts

Requirements

Concentration Courses
15 Total Credits

- Complete all of the following
 - Complete:
 - HIS620 - History of Military Thought (3)
 - 12 credit(s) from the following:
 - HIS602 - Era of the Civil War (3)
 - HIS604 - America and the World Wars (3)
 - HIS605 - Cold War and the American Empire (3)
 - HIS630 - The Russian Revolutions (3)
 - HIS640 - Chinese Imperialism (3)

Grand Total Credits: **15**

Online Programs

History (MA) - Public History (Concentration)

Description

The MA History with Concentration in Public History degree offers graduate students the practical skills necessary to practice history outside the walls of the classroom, in the public domain. After completing the Master's in History core curriculum, Public History students take five Public History courses and complete a capstone experience that results in a Public History project. Students complete the Public History Concentration prepared to lead museum and historical society work, community history projects, preservation programs, and local and federal research projects.

Concentration Outcomes

1. Develop professional skills as a public historian that are applicable to a wide range of historical projects and research in real-world contexts

Requirements

Concentration Courses

15 Total Credits

- Complete all of the following
 - Exception(s):
 - HIS792 - Capstone for Public Historians (3)
 - NOTE: Students in the Public History concentration must take HIS 792 in the concentration, in place of HIS 791 in the major.
 - Complete:
 - HIS660 - Introduction to Public History (3)
 - HIS661 - Public History Strategic Management (3)
 - HIS662 - Digitization of History (3)
 - 6 credit(s) from the following:
 - HIS663 - Documentary Editing (3)
 - HIS664 - Archival Management (3)
 - HIS665 - Museum Collection Management (3)

Grand Total Credits: **15**

Online Programs

History (Minor)

Description

The History minor at Southern New Hampshire University introduces students to historical topics in a variety of regions and eras. Through a combination of coursework and project-based research, students will learn how to identify historical topics, identify and interpret sources, use evidence to support historical arguments, and communicate clearly and effectively. The open-ended nature of the minor allows students to pursue their individual historical interests. The history minor will complement any other academic program and will provide students with the foundations for careers in a variety of fields, including teaching, libraries and museums, law, journalism, government, and business.

Requirements

Minor Courses
15 Total Credits

- Complete all of the following
 - Complete all of the following
 - 6 credit(s) from subject(s): HIS within the range of course numbers 100 - 299
 - Excluding courses: HIS100, HIS101, HIS102, HIS103, HIS104, HIS113, HIS114, HIS117, HIS118, and HIS200
 - Complete all of the following
 - 6 credit(s) from subject(s): HIS within the range of course numbers 200 - 399
 - Excluding courses: HIS200
 - Complete 1 of the following
 - Complete:
 - HIS340 - Making History (3)
 - HIS401 offered on campus

Grand Total Credits: **15**

Online Programs

Online Teaching of Writing (Graduate Certificate)

Description

Specifically designed for students in the online Master of Fine Arts, the graduate certificate in Online Teaching of Writing guides students through the development of an individualized approach to pedagogy for teaching the craft of creative writing online. Students explore tools for facilitating learning environments such as web-based courses and writing workshops, and practice effective approaches to editing and coaching. Students learn how to establish a positive and influential virtual instructor presence and methods for supporting and engaging students within online writing communities.

Requirements

Foundation Courses
0 Total Credits

- Complete all of the following
 - Complete:
 - MFA514 - Advanced Studies in Genre Literature (3)
 - Complete 1 of the following
 - Complete:
 - MFA524 - Contemporary Fiction Writing I (3)
 - Complete:
 - MFA525 - Romance Fiction Writing I (3)
 - Complete:
 - MFA526 - Young Adult Fiction Writing I (3)
 - Complete:
 - MFA527 - Speculative Fiction Writing I (3)

Certificate Courses
12 Total Credits

- Complete all of the following
 - Complete:
 - MFA509 - Storytelling (3)
 - MFA608 - Editing and Coaching (3)
 - MFA640 - Engaging Online Writing Students (3)
 - 1 of the following:
 - ENG670 - Seminar in Writing Instruction (3)
 - ENG675 - Online Teaching Experience (3)

Grand Total Credits: **12**

Philosophy (Minor)

Description

The Philosophy minor introduces students to the fundamentals of philosophical thinking and its applications to historical and contemporary issues. Students are challenged to examine complex problems that cross intellectual domains and gain vital skills in critical thinking, communication, and research. This minor will complement a variety of academic programs and will provide students with the foundations for careers in a variety of fields, including business, government, law, and medicine.

Requirements

Healthcare Quality and Safety (Post Master's Graduate Certificate)

Description

Southern New Hampshire University's Post Master's Graduate Certificate in Healthcare Quality and Safety is intended for students who currently hold a master's degree, a doctoral degree, or are matriculated in a doctoral program in a health profession and would like to obtain knowledge, experience, and skills in the continuous improvement of healthcare delivery and patient care outcomes through design, development, and evaluation of healthcare quality improvement initiatives. This certificate emphasizes essential skills such as critical thinking, informed decision making, communication, legal and regulatory issues, ethical considerations, systems-thinking, technology, and resource management. The certificate focuses on healthcare quality improvement, health policy and law, compliance and accreditation, resource allocation, and program development and evaluation strategies that promote a culture of safety within various healthcare environments and organizations.

Requirements

Certificate Courses

12 Total Credits

- Complete:
 - IHP604 - Healthcare Quality and Improvement (3)
 - IHP610 - Health Policy and Law (3)
 - IHP670 - Program Design, Planning and Evaluation (3)
 - NUR659 - Healthcare Safety, Just Culture, and Regulation (3)

Grand Total Credits: **12**

Nursing (BSN)

Description

The RN to BSN program prepares the registered nurse with the core knowledge, attitude, skills, and abilities to confront complex healthcare challenges in nursing. The coursework provides the nurse with the core competencies essential to practice as recommended by American Association for Colleges of Nursing (AACN). The design of the program is based upon Transformational Learning Theory which promotes critical reflection and autonomous thinking. The goal is to educate the nurse to function effectively in the workforce to improve health outcomes of individuals and communities. The Capstone project designs individual experiences to apply personal and interpersonal skills to effectively promote health outcomes in complex health systems. Successful completion of the program provides the BSN with a foundation for graduate preparation in nursing.

Program Outcomes

1. Apply skills in using patient care technologies, information systems and clinical decision support tools to promote safe nursing practice and quality patient outcomes
2. Utilize evidence-based practice in planning, implementing and evaluating outcomes of care
3. Formulate strategies to promote health and prevent disease in individuals and populations across the lifespan
4. Implement patient safety and quality initiatives within the complex clinical microsystem using leadership and communication skills
5. Analyze trends in healthcare policy, finance and regulatory environments and their implications for healthcare access, equity, and affordability
6. Evaluate life-long learning and nursing engagement to promote personal and professional transformation

Online Programs

Requirements

Transfer Requirement
45 Total Credits

- Complete all of the following
 - 45 credit(s).
 - NOTE: Students who hold an active unencumbered Registered Nurse license are awarded 45 credits for pre-licensure nursing coursework.

General Education Courses
42 Total Credits

- Complete all of the following
 - 39 credit(s) from: General Education

Must include:

- SNHU107 - Success Strategies for Online Learning (3)
- ENG122 - English Composition I (3)
- ENG123 - English Composition II (3)
- PSY108 - Introduction to Psychology (3)
- PSY211 - Lifespan Development (3)
- BIO205 - Human Anatomy and Physiology I (3)
- BIO211 - Human Anatomy and Physiology II (3)
- BIO212 - Microbiology (3)
- IHP340 - Statistics for Healthcare Professionals (3)
- IDS400 - Diversity (3)
- EFAH: Take HUM-100 & HUM-200
- One (1) General Education course must be from Fine Arts and Humanities (EFAH), Social and Behavioral Sciences (ESBS), Science, Technology, and Mathematics (ESTM), or General Education Electives (EGED).
- 1 of the following:
 - MAT130 - Applied Finite Mathematics (3)
 - MAT135 - The Heart of Mathematics (3)
 - MAT136 - Introduction to Quantitative Analysis (3)
 - MAT140 - Precalculus (3)
 - MAT230 - Discrete Mathematics (3)
 - MAT299 - Mathematical Proof and Problem Solving (3)

Major Courses
30 Total Credits

- Complete all of the following
 - Complete:
 - NUR300 - Scholarly Inquiry (3)
 - NUR305 - Information Management and Patient Care Technologies (3)
 - NUR350 - Community and Population Health (3)

Nursing: Family Nurse Practitioner (MSN)

Description

Southern New Hampshire University's Master of Science in Nursing program, Family Nurse Practitioner (MSN.FNP) track is based on professional nursing standards and guidelines. The MSN program promotes advanced practice knowledge across the lifespan and is grounded in evidence-based practice, interprofessional leadership, and global health awareness. In this FNP track, students will develop the skills to assess, diagnose, create treatment plans, and manage the health of individuals across the lifespan with a variety of health needs in alignment with the role of an FNP. The track fosters advocacy for vulnerable patients and populations to ensure health equity for all persons. Upon successful completion of the Family Nurse Practitioner track, graduates will have met the educational requirements to sit for a Family Nurse Practitioner national certification examination. Graduates of the track will be able to employ various clinical technological tools and applications, collaborate with a diverse group of healthcare professionals, and provide primary care services to individuals, families and populations across the lifespan, consistent with independent practice as an Advanced Practice Registered Nurse (APRN). In addition to the online coursework, students in the FNP track will be required to complete 650 clinical practicum hours in a variety of settings and participate in an in-person immersion experience to demonstrate their skills.

Program Outcomes

1. Apply evidence-based practice, informatics, and healthcare technologies to support continuous quality improvement in complex health systems
2. Lead and collaborate within interprofessional teams and organizational structures to manage change, improve nursing practice, and coordinate care across populations
3. Develop advanced communication and advocacy strategies to improve health outcomes across the four spheres of care
4. Advance equitable health policies and regulations that reduce health risk and promote financial stewardship, in alignment with ethical and legal standards
5. Integrate person-centered health promotion and disease prevention strategies to address actual and potential problems through the role of change agent and patient advocate
6. Integrate an advanced level of scientific knowledge in the role of an advanced practice registered nurse to independently assess, diagnose, and manage the health outcomes of individuals, families, and populations across the lifespan in primary care settings
7. Collaborate interprofessionally to provide high quality, ethical, and safe care to diverse populations

Requirements

Major Courses

51 Total Credits

- Complete:
 - NUR508 - Role Development and Transformation of the MSN Professional Nurse (3)
 - NUR531 - Interprofessional Leadership in Healthcare (3)
 - NUR520 - Epidemiological and Biostatistical Applications in Healthcare (3)
 - IHP501 - Global Health and Diversity (3)
 - NUR550 - Evidence-Based Practice and Scholarly Inquiry (3)
 - NUR555 - Advanced Clinical Pathophysiology (3)
 - NUR560 - Advanced Health Assessment and Clinical Reasoning (3)
 - NUR600 - Advanced Pharmacology for the Prescriber, Immersion (3)
 - NUR616 - Primary Care of Adults and Gerontological Patients (3)
 - NUR626 - Primary Care Across the Lifespan Practicum I (3)
 - NUR636 - Primary Care of Infants, Children and Adolescents (3)
 - NUR646 - Primary Care Across the Lifespan Practicum II (3)
 - NUR656 - Primary Care of Women (3)
 - NUR669 - Primary Care Across the Lifespan Practicum III (3)
 - NUR676 - Primary Care for Mental Health (3)
 - NUR688 - Primary Care Across the Lifespan Practicum IV (3)
 - NUR696 - Primary Care Across the Lifespan Practicum V (3)

Grand Total Credits: **51**

Nursing: Healthcare Quality and Safety (MSN)

Description

Southern New Hampshire University's Master of Science in Nursing program, Healthcare Quality and Safety (MSN.HQS) track, is based on professional nursing standards and guidelines. The MSN program promotes advanced nursing knowledge across the four spheres of care, and is grounded in evidence-based practice, interprofessional leadership, and global health awareness. In this Healthcare Quality and Safety track, students will develop the skills to design, implement, and evaluate healthcare quality improvement initiatives guided by critical thinking, data-driven decision making, and evidence-based practices. The track focuses on developing leaders in healthcare quality and safety capable of advocating for and leading policy change to improve healthcare outcomes and promote a continual state of readiness. Graduates of the Healthcare Quality and Safety track will apply best practices to evaluate system efficiencies, promote a culture of safety, and determine the necessary resources for healthcare quality improvements. In addition to the online coursework, students in the Healthcare Quality and Safety track will be required to complete 135 supervised, clinical practicum hours in a healthcare setting, providing an opportunity to apply theory to practice.

Program Outcomes

1. Apply evidence-based practice, informatics, and healthcare technologies to support continuous quality improvement in complex health systems
2. Lead and collaborate within interprofessional teams and organizational structures to manage change, improve nursing practice, and coordinate care across populations
3. Develop advanced communication and advocacy strategies to improve health outcomes across the four spheres of care
4. Advance equitable health policies and regulations that reduce health risk and promote financial stewardship, in alignment with ethical and legal standards
5. Integrate systems-based quality improvements across various healthcare settings
6. Analyze integrated healthcare systems and processes to mitigate risks and advocate for a culture of safety

Nursing: Nurse Executive Leadership (MSN)

Description

Southern New Hampshire University's Master of Science in Nursing, Nurse Executive Leadership (MSN.NEL) track is based on professional nursing standards and guidelines. The MSN program promotes advanced nursing knowledge across the four spheres of care and is grounded in evidence-based practice, interprofessional leadership, and global health awareness. In this Nurse Executive Leadership track, students will develop advanced leadership and business skills necessary for championing healthcare processes that support regulatory compliance, risk mitigation, quality improvement and improved outcomes. The track focuses on developing interprofessional nursing leaders capable of capitalizing on new technology and markets and navigating teams through today's complex healthcare environment. In addition to the online coursework, students in the Nurse Executive Leadership track will be required to complete 135 supervised, clinical practicum hours in a healthcare setting, providing an opportunity to apply theory to practice.

Program Outcomes

1. Apply evidence-based practice, informatics, and healthcare technologies to support continuous quality improvement in complex health systems
2. Lead and collaborate within interprofessional teams and organizational structures to manage change, improve nursing practice, and coordinate care across populations
3. Develop advanced communication and advocacy strategies to improve health outcomes across the four spheres of care
4. Advance equitable health policies and regulations that reduce health risk and promote financial stewardship, in alignment with ethical and legal standards
5. Apply strategic planning and business principles to design, develop, and implement high quality, equitable, cost-effective healthcare
6. Lead interprofessional teams through the execution of innovative leadership strategies

Nursing: Nursing Education (MSN)

Description

Southern New Hampshire University's Master of Science in Nursing, Nursing Education (MSN.NSE) track is based on professional nursing standards and guidelines. The MSN program promotes advanced nursing knowledge across the four spheres of care, and is grounded in evidence-based practice, interprofessional leadership, and global health awareness. The Nursing Education track focuses on developing innovative nursing educators capable of leading and teaching the next generation of nursing professionals. In this track, students will explore teaching and learning strategies, the curriculum development process, and accreditation and regulatory standards to design and deliver high-quality nursing education. Graduates of the Nursing Education track will utilize best practices to create innovative learning experiences that integrate new technology and model professional practice. In addition to the online coursework students in the Nursing Education track will be required to complete 135 supervised, clinical practicum hours, divided between an academic and advanced nursing practice setting, providing an opportunity to apply theory to practice.

Program Outcomes

1. Apply evidence-based practice, informatics, and healthcare technologies to support continuous quality improvement in complex health systems
2. Lead and collaborate within interprofessional teams and organizational structures to manage change, improve nursing practice, and coordinate care across populations
3. Develop advanced communication and advocacy strategies to improve health outcomes across the four spheres of care
4. Advance equitable health policies and regulations that reduce health risk and promote financial stewardship, in alignment with ethical and legal standards
5. Integrate best-practices in teaching and learning to develop and evaluate high-quality educational experiences and model effective professional and leadership practices for diverse populations
6. Design, implement, and evaluate teaching and learning strategies in various educational and healthcare settings

Nursing: Population Healthcare (MSN)

Description

Southern New Hampshire University's Master of Science in Nursing program, Population Healthcare (MSN.PHC) track is based on professional nursing standards and guidelines. The MSN program promotes advanced nursing knowledge across the four spheres of care and is grounded in evidence-based practice, interprofessional leadership, and global health awareness. In this Population Healthcare track, students will develop the skills to compassionately lead, coordinate and manage healthcare across populations. This track focuses on the establishment of effective interprofessional partnerships, data-driven decision making, and examines accessibility, epidemiology, socio-economic, cultural, political and environmental factors that impact the health outcomes of groups of people. Graduates of the Population Healthcare track will lead teams to secure resources and create conditions that promote health, prevent disease events, and improve population outcomes. In addition to the online coursework students in the Population Healthcare track will be required to complete 135 supervised, clinical practicum hours in a healthcare setting, providing an opportunity to apply theory to practice.

Program Outcomes

1. Apply evidence-based practice, informatics, and healthcare technologies to support continuous quality improvement in complex health systems
2. Lead and collaborate within interprofessional teams and organizational structures to manage change, improve nursing practice, and coordinate care across populations
3. Develop advanced communication and advocacy strategies to improve health outcomes across the four spheres of care
4. Advance equitable health policies and regulations that reduce health risk and promote financial stewardship, in alignment with ethical and legal standards
5. Develop interprofessional partnerships to coordinate the delivery of health services across populations
6. Lead population-based care through ethically grounded policies, data-driven decisions, and value-based care management principles

Computer Information Systems (BS)

Description

The Computer Information Systems (CIS) program is an undergraduate major for students who want to design and implement effective solutions to meet organizational and management needs for information and decision support. Graduates of the Computer Information Systems program are poised to take a leading role in shaping our information-based future, in both small and large organizations. Students completing the program will be well grounded in the fundamentals of organization theory, decision making, teamwork and leadership, as well as current and emerging information systems tools and technologies. They will be able to communicate effectively with stakeholders. They will be able to bridge the gap between IT and business units to improve processes and solve challenges now and in the future.

Program Outcomes

1. Utilize business intelligence applications that address a variety of business needs and analyze the underlying data models
2. Analyze existing business information systems and identify new systems to meet an organization's needs
3. Develop communication strategies to bridge the IT and business units, using appropriate terminology and language to assist the units in working together effectively
4. Apply systems analysis and design and project management concepts to develop and implement systems to support an organization's goals

Computer Information Systems (BS) - Data Validation and Decision Making (Concentration)

Description

The concentration in Data Validation and Decision Making will provide learners with a foundational overview of essential data analysis concepts. Through this concentration, learners will gain exposure to areas such as emerging technologies, big data, ethics, and privacy. Learners will also recognize the importance of using and cleaning high quality data without impacting its integrity.

Requirements

Concentration Courses

9 Total Credits

- 9 credit(s) from the following:
 - DAT250 - Data Policy and Decision Making (3)
 - DAT260 - Emerging Technologies and Big Data (3)
 - DAT300 - Data Validation: Getting the Right Data (3)
 - DAT325 - Data Validation: Quality and Cleaning (3)

Grand Total Credits: **9**

Computer Information Systems (BS) - Networking and Security (Concentration)

Description

The Networking and Security concentration provides learners with a foundation in cybersecurity policies and procedures and best practices for security planning within the Information Technology field. Learners develop the knowledge and skills necessary to design basic and secure networked computer environments as well as maintain systems, including operating systems parameters. Learners also develop valuable troubleshooting and problem-solving skills related to the field.

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - IT202 - Computer Operating Systems (3)
 - IT212 - Introduction to Computer Networks (3)
 - IT253 - Computer Systems Security (3)

Grand Total Credits: **9**

Computer Science (AS)

Description

The Associate of Science in Computer Science at Southern New Hampshire University provides students with opportunities to develop critical technical and professional skills through work on authentic, industry-relevant projects in the field of computer science. The program curriculum will provide students with a solid understanding of the fundamental programming techniques and concepts in the field of computer science. Graduates of the Associate of Science in Computer Science program will be ready for entry level positions in the computing field in both the public and private sectors.

Online Programs

Program Outcomes

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline
3. Communicate effectively in a variety of professional contexts
4. Apply computer science theory and software development fundamentals to produce computing-based solutions

Requirements

General Education Courses

24 Total Credits

- Complete all of the following
 - English
 - Complete:
 - ENG122 - English Composition I (3)
 - ENG123 - English Composition II (3)
 - Mathematics
 - Complete:
 - MAT136 - Introduction to Quantitative Analysis (3)
 - SNHU
 - Complete:
 - SNHU107 - Success Strategies for Online Learning (3)
 - EFAH
 - 1 of the following:
 - HUM100 - Perspectives in the Humanities (3)
 - HUM200 - Applied Humanities (3)
 - ESBS
 - Complete:
 - ECO201 - Microeconomics (3)
 - ESTM
 - Complete:
 - PHY150 - Introductory Physics: Mechanics (3)
 - MAT243 - Applied Statistics for Science, Technology, Engineering, and Mathematics (STEM) (3)

Foundation Courses

15 Total Credits

- Complete:
 - MAT140 - Precalculus (3)
 - IT140 - Introduction to Scripting (3)
 - IT145 - Foundation in Application Development (3)
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT230 - Discrete Mathematics (3)

Major Courses

15 Total Credits

- Complete:
 - CS210 - Programming Languages (3)
 - CS300 - Data Structures and Algorithms: Analysis and Design (3)
 - CS250 - Software Development Lifecycle (3)
 - CS230 - Operating Platforms (3)
 - CS255 - System Analysis and Design (3)

Free Electives

6 Total Credits

- Complete all of the following
 - 6 credit(s).
 - Students select 6 credit hours from undergraduate-level courses. Students must meet all course prerequisite requirements for electives.

Grand Total Credits: **60**

Online Programs

Computer Science (BS)

Description

The Bachelor of Science in Computer Science at Southern New Hampshire University provides students with opportunities to develop critical technical and professional skills through work on authentic, collaborative, industry-relevant projects, as well as through the exploration of emerging tools, technologies, and environments in the field of computer science. The program curriculum provides students with a solid understanding of the fundamental programming techniques, algorithms and data structures, architecture design, networks and the mathematical computation and quantitative reasoning skills that underpin the work in the field of computer science. Students will use relevant industry/service-based projects to apply the basic concepts and theories in computer science. As a part of their coursework, students will have the ability to speak to and defend their design decisions and solutions to various audiences and in various formats. Graduates of the Bachelor of Science in Computer Science will be flexible and creative computer science practitioners prepared for various careers in both the public and private sectors, as well as for government agencies at the local and national levels.

Additional Information

SNHU's online degree program offers industry-standard software development methodologies with popular programming languages including Python, C++ and Java. The online program consists of advanced topics such as artificial intelligence, embedded software, reverse engineering, full stack, and cloud application development. Concentrations in the BS.CSC arena include software engineering, data analysis, information security and project management.

Program Outcomes

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline
3. Communicate effectively in a variety of professional contexts
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline
6. Apply computer science theory and software development fundamentals to produce computing-based solutions

Computer Science (BS) - Data Analysis (Concentration)

Description

The concentration in Data Analysis provides students with an introduction to various functions of a data analyst, including creating database environments, regression analysis, use tools and technologies for analysis, as well as many other data analysis methodologies and techniques. Students will have the option to explore topics of interest in either emerging technologies and big data or data validation.

Requirements

Concentration Courses

12 Total Credits

- Complete all of the following
 - Complete:
 - DAD220 - Introduction to Structured Database Environments (3)
 - DAT375 - Data Analysis Techniques (3)
 - MAT303 - Applied Statistics II for Science, Technology, Engineering, and Mathematics (STEM) (3)
 - 1 of the following:
 - DAT260 - Emerging Technologies and Big Data (3)
 - DAT325 - Data Validation: Quality and Cleaning (3)

Grand Total Credits: **12**

Computer Science (BS) - Information Security (Concentration)

Description

In the Information Security concentration, students will gain a fundamental overview of the basics of the interconnectivity of computer systems while exploring the fundamentals of computer networking. Students will gain familiarity with foundational cybersecurity concepts and terms, including policies and procedures, best practices and security planning within the IT field. They will explore legal and human factors while examining how they influence the development of information security strategies.

Concentration Outcomes

1. Analyze and mitigate security risks in designing and maintaining network systems and software

Requirements

Concentration Courses

12 Total Credits

- Complete:
 - CYB200 - Cybersecurity Foundations (3)
 - CYB210 - Computer Networking (3)
 - IT212 - Introduction to Computer Networks (3)

Online Programs

Computer Science (BS) - Project Management for STEM (Concentration)

Description

In the Project Management for STEM concentration, students will learn about the methodologies and tools necessary at each stage for managing the projects effectively in terms of time, cost, quality, risk and resources. Students will also develop the skills of an experienced project manager by creating detailed project plans for authentic scenarios, focusing on project risk, project integration, quality and procurement. Business processes and goals and necessary techniques are emphasized using authentic scenarios to ensure that business results are achieved.

Requirements

Concentration Courses

12 Total Credits

- Complete all of the following
 - Complete:
 - QSO340 - Project Management (3)
 - QSO355 - Resource Estimating and Scheduling (3)
 - QSO440 - Topics in Project Management (3)
 - 1 of the following:
 - BUS210 - Managing and Leading in Business (3)
 - BUS225 - Critical Business Skills for Success (3)

Grand Total Credits: **12**

Computer Science (BS) - Software Engineering (Concentration)

Description

The Software Engineering concentration introduces fundamental and advanced concepts, techniques and principles of software design and development as they relate to the field of software engineering. Students engage in sophisticated problem solving and analysis of software design patterns, and systems architecture. Students use varying approaches to reverse engineer code, develop secure code and perform software testing. In addition, students explore User Interface (UI) / User eXperience (UX) design concepts and development techniques with an emphasis on user-centricity and contemporary design patterns and techniques.

Concentration Outcomes

1. Employ proven, software engineering design methodologies, patterns, and processes for successful software design and development
2. Evaluate various system architectures, security approaches, and software functionalities for use in effective software development

Requirements

Concentration Courses

12 Total Credits

- Complete:
 - CS319 - UI/UX Design and Development (3)
 - CS350 - Emerging Systems Architectures & Technologies (3)
 - CS405 - Secure Coding (3)
 - CS410 - Software Reverse Engineering (3)

Grand Total Credits: **12**

Cyber Security (MS)

Online Programs

Description

With the rise in cybercrime in the US, the need for professionals to protect against ever increasing cyber security risks, stay current with rapid technology changes, and understand changing compliance requirements has become essential across organizations. Graduates of the Master of Science in Cyber Security program will gain competence in managing the design, oversight and assessment of information security for an enterprise with a focus on the human element of information security. The degree program will focus on five key areas of competence: information security governance, information security risk and compliance, information security program creation and management, information security incidence response and business continuity, and leadership/collaboration and communication. The Master of Science in Cyber Security program is designed for students who want to meet the challenges posed by security threats, learn to protect the confidentiality, availability, and integrity of data, and develop risk management and mitigation strategies. Graduates of this program will be prepared for a wide range of careers in the security field as managers, analysts, developers, or administrators of varying aspects of information security and assurance.

Program Outcomes

1. Assess the effectiveness of information security governance policies and strategies for planning, preparing, and responding to critical threats within diverse organizational contexts and situations in a manner aligned with cyber security standards and frameworks
2. Develop risk management plans for conducting risk assessment and managing identified risk to align with the needs of internal and external controls, governing bodies, and vested stakeholders
3. Develop strategic information security plans; strategies for establishing policies to guide internal and external influences that are aligned with national and international standards and practices
4. Develop information security incident management and business continuity plans aligned with legal, regulatory, and organizational standards for appropriately responding to incidents in consideration of diverse demographics
5. Employ leadership strategies for ethical behavior, tech standards, and emerging trends for advancing an organization's strategic goals in diverse and multi-functional cyber security teams
6. Enhance collaboration and communication by employing interpersonal communication skills and establishing communication plans and processes aligned to the needs of internal and external audiences

Requirements

Foundation Courses

0 Total Credits

- Complete:
 - IT505 - Core Technologies (3)

Major Courses

27 Total Credits

- Complete:
 - ISE510 - Security Risk Analysis and Planning (3)
 - ISE620 - Incident Detection and Response (3)
 - ISE640 - Investigation and Digital Forensics (3)
 - ISE690 - Cyber Security Capstone (3)
 - IT549 - Foundation in Information Assurance (3)
 - IT552 - Human Factors in Security (3)
 - IT640 - Telecommunications and Networking (3)
 - IT643 - Network Assessment and Defense (3)
 - IT659 - Cyberlaw and Ethics (3)

Cyber Security (MS) - Information Technology Management (Concentration)

Description

The concentration in Information Technology Management focuses on the critical role information technology plays in supporting every-day business operations and decision-making in order to achieve business objectives. Students focus on managing varying aspects of information technology including the relationships between structure and process in project management and the management of IT functions within an organization.

Concentration Outcomes

1. Facilitate best practices for managing information technology functions and interrelationships within an organization relating to organizational process and structure; adoption of new technologies; and projects within the IT organizational unit

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - IT510 - Advanced Information Technology (3)
 - IT550 - Management of Information Technology (3)
 - IT657 - Enterprise Resource Planning (3)

Grand Total Credits: **9**

Cybersecurity (AS)

Description

The Associate of Science in Cybersecurity prepares graduates to enter an exciting, challenging, and increasingly in-demand field. Guided by industry standards, the degree program prepares students to solve complex problems, respond to cyber threats, assess risk, and apply cutting-edge security techniques. Graduates of the program will demonstrate these abilities while developing a perspective of the cybersecurity field that integrates theory and application. Beginning with a solid foundation in computer technology, networking, and system administration, students develop the skills and confidence necessary for exploring modern cybersecurity theories through authentic, hands-on learning experiences. As students progress through the program, they will develop the diverse knowledge, skills, abilities, and dispositions needed to succeed as an entry-level cybersecurity professional or pursue further academic study in the cybersecurity field.

Program Outcomes

1. The ability to apply security principles and practices to the environmental, hardware, software, and human components of a system
2. The ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
3. The ability to design, implement, and evaluate a computer-based solution to meet a given set of computing requirements in the context of the discipline
4. The ability to communicate effectively with a range of audiences about technical information

Cybersecurity (BS)

Description

The Bachelors of Science in Cybersecurity prepares graduates to compete in an exciting, challenging, and increasingly in-demand field. Guided by industry standards, the degree program prepares students to solve complex problems, respond to cyber threats, assess risk, and apply cutting-edge security techniques. Graduates of the program will demonstrate these abilities while gaining a holistic view of the cybersecurity field that integrates theory and application. Beginning with a solid foundation in computer technology, networking, and system administration, students develop the skills and confidence necessary for exploring modern cybersecurity theories through authentic, hands-on learning experiences. Advanced network, system, software, and personnel protection methodologies are examined through the assessment of adversarial threats, organizational risk, and legal concerns. As students progress through the program, they will develop the diverse knowledge, skills, abilities, and dispositions needed to succeed as an entry-level cybersecurity professional in a broad range of public or private sector contexts.

Online Programs

Program Outcomes

1. The ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
2. The ability to design, implement, and evaluate a computer-based solution to meet a given set of computing requirements in the context of the discipline
3. The ability to communicate effectively with a range of audiences about technical information
4. The ability to make informed judgments in computing practice based on legal and ethical principles
5. The ability to function effectively on teams to establish goals, plan tasks, meet deadlines, manage risk, and produce deliverables
6. The ability to apply security principles and practices to the environmental, hardware, software, and human components of a system
7. The ability to analyze and evaluate systems with respect to maintaining operations in the presence of risks and threats

Online Programs

Cybersecurity (BS) - Data Analytics (Concentration)

Description

In the Data Analytics concentration, students will learn to gather and collect data, while gaining an understanding of the importance of high quality data and how to clean data without impacting its integrity. Students will gain experience through authentic scenarios and problems, using critical tools, technologies, and methods that are relevant to organizational challenges. Students will utilize data visualization to help communicate and collaborate with organizational stakeholders, sharing their work in ways that make their findings and results actionable.

Requirements

Concentration Courses

15 Total Credits

- Complete:
 - DAT223 - Gathering Requirements and Collecting Data (3)
 - DAT325 - Data Validation: Quality and Cleaning (3)
 - DAT375 - Data Analysis Techniques (3)
 - DAT430 - Leveraging Data Analysis for Organizational Results (3)
 - MAT303 - Applied Statistics II for Science, Technology, Engineering, and Mathematics (STEM) (3)

Grand Total Credits: **15**

Cybersecurity (BS) - Project Management for Cybersecurity (Concentration)

Description

In the Project Management for Cybersecurity concentration, students will learn about the methodologies and tools necessary at each stage for managing the projects effectively in terms of time, cost, quality, risk and resources. Students will also develop the skills of an experienced project manager by creating detailed project plans for authentic scenarios, focusing on project risk, project integration, quality and procurement.

Requirements

Concentration Courses

15 Total Credits

- Complete all of the following
 - Complete:
 - IT304 - Systems Requirements and Implementation Planning (3)
 - QSO349 - Project Contracting and Procurement (3)
 - QSO355 - Resource Estimating and Scheduling (3)
 - QSO420 - Integrated Cost and Schedule Control (3)
 - 1 of the following:
 - QSO340 - Project Management (3)
 - QSO345 - Project Management for CAPM® Certification (3)

Grand Total Credits: **15**

Data Analytics (AS)

Description

The Associate of Science in Data Analytics provides students with foundational analytical and technical skills to help organizations leverage data to inform decision-making. Students will be introduced to foundational quantitative skills up through and including calculus and regression analysis. They will also learn scripting techniques for analyzing, cleaning, and visualizing data. Students experience the data analytics lifecycle from consulting stakeholders on business problems, to delivering accurate information in support of successful business outcomes.

Online Programs

Program Outcomes

1. Translate organizational needs and business problems into data analytics requirements to inform possible solutions and communicate them to technical and non-technical audiences
2. Apply appropriate data analytics solutions, standards, and policies to meet the security, storage, and privacy needs of organizations
3. Use quantitative and qualitative data analytics methods in responding to a variety of situations that arise in the business environment

Data Analytics (BS)

Online Programs

Description

Across multiple industries, organizations are harnessing massive amounts of internal and external data to inform decision-making and innovations in areas such as customer service practices, consumer and public outreach, and the design of products and services. As businesses realize the need to become more proactive, thoughtful and efficient in their decision-making, the need for talented data analytics professionals increases. In addition, the increasing availability of public and private data creates a number of new challenges for organizations that require data analysis. Questions such as how to leverage data appropriately and about the most efficient and ethical ways to secure data and protect users and organizations allow data analysts to provide insights that can transform how the business moves forward. The Bachelor of Science in Data Analytics provides students with the technical abilities and professional skills to help organizations leverage data to innovate practices and processes, and inform decision-making. In addition to providing students with a solid foundation in data analytics, students will be introduced to aspects of data science including data management and security, project management workflow, and business analytics. Students experience the data analytics lifecycle from consulting stakeholders on business problems, to delivering accurate information in support of successful business outcomes. Graduates will be skilled in interpreting business questions through a data lens, collecting and cleaning data, visualizing data, and communicating analytical results and recommendations to technical and non-technical audiences.

Program Outcomes

1. Translate organizational needs and business problems into data analytics requirements to inform possible solutions and communicate them to technical and non-technical audiences
2. Apply appropriate data analytics solutions, standards, and policies to meet the security, quality, storage, and privacy needs of organizations
3. Collaborate in multi-functional teams on short and long term projects, providing the data analysis that helps inform decisions
4. Gather, clean, interpret, and visualize data using industry tools and techniques most appropriate to the situation
5. Use quantitative and qualitative data analytics methods in responding to a variety of situations that arise in the business environment

Data Analytics (MS)

Description

Today's businesses, government, health care organizations, manufacturing operations, and information technology security organizations (among many others) are wrestling with how to effectively leverage "big data" for competitiveness, risk-assessment, mission-critical decision-making, and organizational effectiveness. Data has become increasingly ubiquitous, particularly in unstructured formats and through disparate sources, requiring organizations to become more advanced in the collection, storage, analysis, security, and reporting of data. With increasing demand within organizations to make big decisions with big data, so too does the need for professionals with specialized skills and education in data analytics to fill the talent gap that exists today. The M.S. in Data Analytics focuses on the strategic and advanced uses of data analytics across a broad range of industries and occupations. Students in the program are engaged in advanced technologies for data mining, visualization, modeling, and optimization while understanding the requirements and needs of the organizational environment through business research and in-depth analysis. The ethical uses of data and ensuring appropriate security measures for data collection and storage are a key feature of the program and students will engage in advanced techniques for protecting the integrity and privacy of data, organizations, and consumers. The graduate degree program prepares students to position themselves as a strategic asset to any organization by making data immediately beneficial to strategic decision-making for any organization.

Online Programs

Program Outcomes

1. Conduct thorough needs assessments using statistical, analytical, and applied research techniques and consult organizational stakeholders on business requirements to offer logical and effective recommendations for data analytics initiatives
2. Design and implement advanced modeling techniques, such as predictive modeling, risk-assessment and optimization, and analytics algorithms using structured and unstructured data to provide new solutions to complex organizational issues
3. Communicate with professionalism, accuracy, and transparency using interactive and dynamic visualization tools to translate technical information and offer effective solutions to organizational stakeholders
4. Apply effective collaborative and essential project management strategies to facilitate and improve the work of diverse and multi-functional teams, streamline processes, and lead projects to successful outputs
5. Protect the integrity and privacy of data, organizations, and consumers through advanced technology solutions and ethical and legal practices in all aspects of the profession
6. Employ applied, contextual knowledge of an organizations industry to target new data opportunities that improve an organizations competitiveness, effectiveness, and longevity
7. Adapt and implement innovative methods, models, and technologies that allow for adaptability to new and unexpected changes and improve the agility of data analytics projects
8. Position data analytics as a competitive advantage to organizations by accurately communicating the cost and benefits of data analytics projects and technologies as well as the long-term benefits of data-driven decision making

Requirements

Foundation Courses

0 Total Credits

- Complete:
 - DAT500 - Data and Information Management (3)
 - SCS501 - Foundations in Statistics (3)

Major Courses

27 Total Credits

- Complete:
 - DAT510 - Foundations of Data (3)
 - DAT515 - Enterprise Data Management (3)
 - DAT520 - Decision Methods and Modeling (3)
 - DAT530 - Presentation and Visualization of Data (3)
 - DAT610 - Optimization and Risk Assessment (3)
 - DAT640 - Predictive Analytics (3)
 - DAT650 - Advanced Data Analytics (3)
 - DAT690 - Capstone in Data Analytics (3)
 - QSO640 - Project Management (3)

Major Electives

9 Total Credits

- Complete all of the following
 - 9 credit(s) from IT or QSO within the 500 - 799 range or from the following courses:
 - SNHU690 - Internship (3)
 - NOTE: IT 500 and IT 505 are excluded as options from Major Electives.

Grand Total Credits: **36**

Online Programs

Data Driven Decision Making (Certificate)

Description

The Data Driven Decision Making Certificate provides students with the skills to use and apply data in a wide variety of settings. In this certificate, students will explore the importance of data analysis within organizations and how data is utilized in decision making. Students will also learn how to apply statistical techniques to relevant business scenarios, design basic structured databases, use spreadsheet software to analyze raw data, and effectively present that data to key stakeholders.

Requirements

Certificate Courses

12 Total Credits

- Complete:
 - MAT240 - Applied Statistics (3)
 - DAT205 - Role of Data Analysis in Organizations (3)
 - QSO320 - Management Science through Spreadsheets (3)
 - DAD220 - Introduction to Structured Database Environments (3)

Grand Total Credits: **12**

Environmental Science (BS)

Description

One of the largest scientific challenges we face today is the health and well-being of our planet. The BS in Environmental Science tackles this challenge head-on by preparing students to think and act critically and creatively to address real-world environmental issues. Focused on experiential and project based learning, the major is built on a strong foundation of natural and physical sciences, while offering a flexible curriculum and opportunities to participate in internships, citizen science, research, and fieldwork. Through these experiences, students gain the communication, interpersonal, and technical skills needed to construct, evaluate, and present solutions to environmental problems. This exciting and timely field of study promotes scientific literacy and prepares students for careers with private, state, or federal agencies. Students majoring in Environmental Science have found employment opportunities in wildlife ecology and conservation, climate science, restoration ecology, natural resource management, as park and forest rangers, in land and nature preservation, environmental data analysis, and environmental ethics and activism. Finally, as the sustainability sector continues to grow, these students are well-positioned for careers as sustainability officers, health and safety inspectors, environmental law and policy advocates, as well as in jobs focused on alternative energy, sustainable food systems, and waste reduction.

Program Outcomes

1. Utilize effective oral and written communication strategies in the construction, evaluation, and presentation of solutions to environmental problems
2. Analyze intersections of the human and natural world drawing upon an understanding of the structures and functions of ecological systems and processes
3. Propose practical solutions that address the complexity of environmental problems by employing interdisciplinary approaches
4. Articulate a personal ethical framework that integrates environmental science concepts, principles, and practical experiences
5. Apply various technological and field-based methods to the study of the environment
6. Design and execute projects that effectively integrate the scientific method and quantitative and qualitative research methods (including laboratory procedures) as applied to questions related to the natural environment

Environmental Science (BS) - Natural Resources and Conservation (Concentration)

Description

The concentration in Natural Resources and Conservation focuses on the conservation and management of natural resources and remediation of natural and human hazards. With a foundation in the natural and physical sciences, students gain a broad-based interdisciplinary skill set that companies and organizations are looking for to solve complex environmental problems. Concepts addressed throughout the program will address important environmental challenges such as climate change, alternative energy, and sustainability.

Concentration Outcomes

1. Apply natural resources and conservation concepts, theories, and best practices to make informed decisions about resource use and management

Requirements

Concentration Courses
12 Total Credits

- 4 of the following:
 - BIO330 - Conservation Biology (3)
 - ENV305 - Global Climate Change (3)
 - SCI218 - Natural Resources (3)
 - SCI219 - Environmental Issues (3)
 - SCI220 - Energy and Society (3)
 - SCI333 - Waste: Sources, Reduction, & Remediation (3)

Grand Total Credits: **12**

Game Art and Development (BA)

Description

Whether it's creating lifelike characters, imagining rich virtual game worlds or designing creatures from another planet, SNHU's major in Game Art and Development can get learners on their way to working in the fast-paced, exciting world of video game art. This BA program balances fundamental skill development with advanced training in the techniques used by industry professionals today. Learners study and apply principles used in video game art asset creation such as 3D modeling, lighting, shading, anatomy illustration, digital painting, 3D mesh topology, texturing, rigging, and animation. Courses mirror the standard workflow pipeline used in industry for the production of art assets for multiple video game platforms, including web, console, PC, and mobile. Learners will graduate with a vast toolkit of skills and a body of work for their portfolio.

Program Outcomes

1. Design and develop professional quality digital game and interactive media elements that combine technical and aesthetic design principles to create engaging and dynamic experiences
2. Critically analyze and recommend strategies for addressing the impact of various physical, cognitive, cultural, and social factors that shape the design, development, and interpretation of digital games and interactive media
3. Evaluate, select, and effectively apply tools and technology commonly used in the design and production of digital games and other interactive media
4. Evaluate and respond to complex problems associated with the design and development of digital games through critical and creative thinking and collaboration with an interdisciplinary team of specialists and stakeholders
5. Optimize the design of interactive media elements to the strengths and limitations of the processes and techniques used in the production of digital games

Game Programming and Development (BS)

Description

Southern New Hampshire University's Bachelor of Science in Game Programming and Development degree prepares graduates with the knowledge and skills necessary for the challenging and rewarding field of game programming. Students go beyond traditional software development to gain the technical expertise necessary for realizing and enabling the creative vision of game designers and artists. The curriculum is grounded in game design theory, programming, and the various phases of the game development process. Emphasis is placed on the mastery of a variety of computer programming languages, scripting, artificial intelligence, game engine development and deployment, visual design, and the use of industry-standard software applications. Students gain experience in developing games across various platforms, including PC, console, web, and mobile devices. Graduates of the program are well-positioned for careers in game development, be it as part of small indie companies or larger video game development corporations.

Program Outcomes

1. Create, execute, and document clear and effective code in a variety of programming languages and game engines relevant to professional game development
2. Integrate methods and techniques for creating realistic, dynamic gameplay experiences, including game AI, game physics, 2D and 3D graphics, and interface design
3. Articulate and solve complex logic problems associated with programming interactive game systems
4. Apply effective, industry-standard design, production, and testing techniques through all phases of game development
5. Adhere to the standards and expectations of the professional game development community, especially regarding effective communication, respect for all people and cultures, ethical decision-making, and the ability to function effectively as a member of a team
6. Research, develop, and contribute to advances and trends within the field of game programming

Geosciences (BS)

Description

The geosciences are interdisciplinary sciences that integrate geography, geology, earth systems science, physics, chemistry, and spatial awareness into the course of study. According to the American Geosciences Institute (2014), "The major applications of the geosciences are: exploration and responsible development of natural resources (oil, gas, coal, minerals, construction aggregate, water, and soils), preservation of the natural environment, restoration from environmental damage, mitigation of geohazards such as earthquakes and landslides, and exploratory research." The program emphasizes the use of geoscience data for their uses in problem solving and establishing policies that support effective resource management, public health and safety, and environmental protection.

Program Outcomes

1. Develop technically correct maps and products using geospatial data to visualize spatial patterns
2. Communicate the results of geospatial analyses using audience specific tools and technologies to internal and external stakeholders
3. Synthesize qualitative and quantitative data to recognize occurrences and patterns within the scope of the geosciences
4. Develop a professional identity from which to make globally, socially, and ethically responsible geoscientific decisions that are in line with legal and organizational policy requirements
5. Integrate fundamental geographic and geological principles to solve environmental concerns and human-related issues
6. Justify the appropriate field and laboratory tools, technologies, and methods to solve problems in various geoscience settings

Information Technologies (AS)

Description

Technology has become inseparable from an organization's operations, including collaborating in virtual work environments and leveraging established and emerging technologies. The Associate in Science Information Technologies is designed to prepare students with the fundamental knowledge and skills in systems, technologies, and computational thinking strategies that are relevant to information technology professionals. Students also gain skills in effective collaboration, communication, and technology to enhance their ability to contribute to organizational success. The courses required in the associate program align to the requirements of the Bachelor of Science in Information Technologies, should students wish to pursue this degree later

Online Programs

Program Outcomes

1. Employ best practices in communicating and collaborating with diverse stakeholders about information technology projects and tasks
2. Solve fundamental information technology-related problems that meet organizational requirements and end-user needs
3. Utilize industry relevant tools and technologies to design and manage computer networks and systems

Information Technologies (BA)

Online Programs

Description

Technology has become inseparable from an organization's operations, including applying digital strategies to leverage data, collaborating in virtual work environments and leveraging established and emerging technologies. The Bachelor of Arts in Information Technologies gives students the opportunity to combine technical abilities, people skills, and a keen problem-solving mindset to help organizations large and small leverage new technologies for innovating practices, products, and processes. This degree will prepare students for current IT work and provide the skills and dispositions to ready themselves and their organizations for the rapid evolution of future technologies. Students will learn the fundamental information technologies, systems, data management methods, and computational thinking strategies necessary to support organizational decision-making and recommend effective system design and maintenance solutions. They will also learn to operate in an ever-changing work environment where communication, collaboration, and the drive to proactively identify and solve problems are markers of success. Learning through hands-on authentic problems, students in this degree program will demonstrate the necessary skills that will allow them to grow and adapt within the field of information technology.

Program Outcomes

1. The ability to analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions
2. The ability to design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline
3. The ability to communicate effectively in a variety of professional contexts
4. The ability to recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles
5. The ability to function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline
6. The ability to identify and analyze user needs and to take them into account in the selection, creation, integration, evaluation, and administration of computing-based systems

Information Technologies (BS) - Business Management for IT (Concentration)

Description

In the Business Management for IT concentration, students will examine the fundamentals and principles of management, policies and administration. Students will study the foundational and ethical aspects of the United States' legal system and international business. Students will also explore macroeconomics, exploring the manner in which the overall levels of output, income, employment and prices are determined in a capitalist economy, preparing students for a broad view in business management.

Requirements

Concentration Courses

15 Total Credits

- Complete:
 - BUS206 - Business Law I (3)
 - BUS210 - Managing and Leading in Business (3)
 - ECO202 - Macroeconomics (3)
 - INT220 - Global Dimensions in Business (3)
 - OL215 - Principles of Management (3)

Grand Total Credits: **15**

Information Technologies (BS) - Cybersecurity (Concentration)

Description

In the Cybersecurity Concentration, students will learn foundational cybersecurity concepts, terms, and the basics of computer networking. Students will examine security concerns and learn strategies for protecting, combating, and defeating attacks to networks, systems, applications, and data. In addition, students will explore the legal, ethical, and human factor aspects of privacy and security and how they influence the development of security strategies.

Requirements

Concentration Courses

Online Programs

Information Technologies (BS) - Data Analytics (Concentration)

Description

In the Data Analytics concentration, students will learn to gather and collect data, while gaining an understanding of the importance of high quality data and how to clean data without impacting its integrity. Students will gain experience through authentic scenarios and problems, using critical tools, technologies, and methods that are relevant to organizational challenges. Students will utilize data visualization to help communicate and collaborate with organizational stakeholders, sharing their work in ways that make their findings and results actionable.

Requirements

Concentration Courses

15 Total Credits

- Complete:
 - DAT223 - Gathering Requirements and Collecting Data (3)
 - DAT325 - Data Validation: Quality and Cleaning (3)
 - DAT375 - Data Analysis Techniques (3)
 - DAT430 - Leveraging Data Analysis for Organizational Results (3)
 - MAT303 - Applied Statistics II for Science, Technology, Engineering, and Mathematics (STEM) (3)

Grand Total Credits: **15**

Information Technologies (BS) - Project Management for IT (Concentration)

Description

In the Project Management in IT concentration, students will learn about the methodologies and tools necessary at each stage for managing projects effectively. Students will focus on overseeing a cost and schedule plan aligned to the appropriate scope. Students will also develop the skills of an experienced project manager by creating detailed project plans for authentic scenarios, focusing on project risk, project integration, quality and procurement.

Requirements

Concentration Courses

15 Total Credits

- Complete:
 - BUS250 - Legal Implications of Vendor Partnership (3)
 - QSO349 - Project Contracting and Procurement (3)
 - QSO355 - Resource Estimating and Scheduling (3)
 - QSO420 - Integrated Cost and Schedule Control (3)
 - QSO440 - Topics in Project Management (3)

Grand Total Credits: **15**

Online Programs

Information Technologies (BS) - Software Development (Concentration)

Description

The concentration in Software Development provides students with a fundamental overview of foundational concepts, tools, and techniques of software development. Students learn how to use basic programming constructs and languages, as well as how to write readable, maintainable, logical, structured, and organized code to develop fully functional and compliant programs. Application of the stages, principles, and practices of the Software Development Life Cycle (SDLC) in an agile environment will also be explored.

Requirements

Concentration Courses

15 Total Credits

- Complete:
 - CS205 - Foundations in Software Development (3)
 - CS210 - Programming Languages (3)
 - CS250 - Software Development Lifecycle (3)
 - IT145 - Foundation in Application Development (3)
 - MAT230 - Discrete Mathematics (3)

Grand Total Credits: **15**

Information Technology (Minor)

Requirements

Minor Courses

6 Total Credits

- Complete:
 - IT140 - Introduction to Scripting (3)
 - IT200 - Fundamentals of Information Technology (3)

Electives

9 Total Credits

- Complete all of the following
 - 9 credit(s) from subject(s): IT
 - NOTE: Excluding IT 100.

Grand Total Credits: **15**

Information Technology (MS)

Description

Businesses today are looking for employees with capabilities beyond traditional programming and IT expertise. Professionals who can bridge the communication gap between IT and business segments are valuable but hard to find, and the demand for this new breed of IT professional is growing. The Master of Science in Information Technology program is designed for students who wish to pursue careers in the analysis, design, creation and management of information technology systems through the application of contemporary technologies. The program emphasizes practical skills based on fundamental core technologies along with their technical and ethical foundations. Students will analyze business needs and determine information systems requirements for those needs by applying an iterative, case-driven process.

Online Programs

Program Outcomes

1. Develop innovative and agile, computer-based solutions to business problems through a systems analysis approach and technology integration and application
2. Design a plan for implementing and monitoring solutions that incorporate core information technologies, concepts and methods appropriate for secure information use across an enterprise
3. Collaborate and communicate effectively in a variety of environments through situational awareness and audience analysis
4. Develop an implementation plan for systematic information risk assessment for change management plans and processes within enterprise business and information technology environments
5. Using computational logic and critical analysis, construct ethically sound, technology-informed procedures to ensure legal compliance and maintain security within enterprise information technology environments

Requirements

Foundation Courses

0 Total Credits

- Complete:
 - IT505 - Core Technologies (3)

Major Courses

27 Total Credits

- Complete all of the following
 - Complete:
 - IT510 - Advanced Information Technology (3)
 - IT511 - Object Oriented Application Development (3)
 - IT515 - Innovations in Information Technology (3)
 - IT520 - Technical Communication (3)
 - IT600 - Operating Systems (3)
 - IT640 - Telecommunications and Networking (3)
 - IT700 - Capstone in Information Technology (3)
 - Complete all of the following
 - 1 of the following:
 - IT650 - Principles of Database Design (3)
 - CIS 525 offered on campus
 - 1 of the following:
 - IT625 - Information Technology Project and Team Management (3)
 - QSO640 - Project Management (3)

Major Electives or choose a Concentration

9 Total Credits

- Complete all of the following
 - 9 credit(s) from CIS DAT, IT, ISE, or QSO within the 500 - 799 range or from the following courses:
 - SNHU690 - Internship (3)
 - Except:
 - DAT500 - Data and Information Management (3)
 - IT505 - Core Technologies (3)
 - Campus offered course includes: IT 500

Grand Total Credits: **36**

Online Programs

Information Technology (MS) - Data Analytics (Concentration)

Description

The Data Analytics concentration focuses on big data and the analysis and visual representation of that data within the context of a business environment. Students will interpret data trends and communicate results using a variety of data visualizations appropriate and meaningful to intended audiences.

Concentration Outcomes

1. Analyze the impact of big data on an enterprise in given scenarios
2. Evaluate and interpret data and data trends in relation to other metrics
3. Synthesize technical components of data analysis into reports, presentations, and visual dashboards that are meaningful for the intended audience

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - DAT510 - Foundations of Data (3)
 - DAT520 - Decision Methods and Modeling (3)
 - DAT530 - Presentation and Visualization of Data (3)

Grand Total Credits: **9**

Information Technology (MS) - Database Design (Concentration)

Description

The concentration in Database Design focuses on the design and development of database applications, client/server systems and data warehouses within the context of a business environment. Students will learn to develop multi-user database applications and manipulate data in a shared database environment. Students will also explore principles of design, development and implementation of Data Warehouse DBMS based on the dimensional modeling architecture.

Concentration Outcomes

1. Develop advanced, multi-user database applications using large commercial database systems
2. Design and build client applications that manipulate data in a shared database environment on a network
3. Utilize principles of design to plan the development and implementation of Data Warehouse DBMS based on the dimensional modeling architecture

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - IT655 - Database Application Development (3)
 - IT665 - Client/Server Systems (3)
 - IT675 - Data Warehouse Concepts and Design (3)

Grand Total Credits: **9**

Online Programs

Information Technology (MS) - Enterprise Technology Management (Concentration)

Description

The Enterprise Technology Management concentration focuses on enterprise-level technology management. Students will focus on managing varying aspects of information technology including the relationships between structure and process in project management and the management of IT functions within an organization. Additionally, students will explore enterprise resource planning and the implications of cyber law and ethics.

Concentration Outcomes

1. Facilitate best practices for managing information technology functions and interrelationships within an organization relating to organizational process and structure; adoption of new technologies; and projects within the IT organizational unit
2. Justify recommendations for ERP (enterprise resource planning) technology solutions that manage the flow of information and integration in all facets in enterprise systems
3. Analyze ethical and legal issues related to varying technology scenarios within an enterprise in order to propose corrective actions to take in the future

Requirements

Select a Category
9 Total Credits

- Complete:
 - IT550 - Management of Information Technology (3)
 - IT657 - Enterprise Resource Planning (3)
 - IT659 - Cyberlaw and Ethics (3)

Grand Total Credits: **9**

Information Technology (MS) - Healthcare Informatics (Concentration)

Requirements

Concentration Courses
9 Total Credits

- Complete:
 - HIM500 - Healthcare Informatics (3)
 - IHP600 - Social & Organizational Issues in Healthcare (3)
 - IT550 - Management of Information Technology (3)

Grand Total Credits: **9**

Online Programs

Information Technology (MS) - Information Security (Concentration)

Description

The concentration in Information Security provides students with a deeper look into the complex and vital field of Information Security. Students will examine the current landscape of vulnerabilities, risks, and security disciplines, and how these relate to the field of computer science.

Concentration Outcomes

1. Recommend best practices for planning, implementing, and managing enterprise level security and system integrity
2. Develop organizational policies and procedures to mitigate potential security threats related to human behaviors
3. Analyze the overall network security posture of an enterprise in a given scenario

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - IT549 - Foundation in Information Assurance (3)
 - IT552 - Human Factors in Security (3)
 - IT643 - Network Assessment and Defense (3)

Grand Total Credits: **9**

Information Technology (MS) - Software Application Development (Concentration)

Description

The concentration in Software Application Development focuses on the software development practitioner. It covers topics such as object-oriented development, software design methodologies, mobile application development, and distributed application development. Current and emerging programming methodologies are covered to prepare the graduate to step into innovative projects, focusing on developing software solutions for the 21st Century.

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - IT632 - Software Design and Modeling (3)
 - IT633 - Mobile Application Development (3)
 - IT634 - Distributed Application Development (3)

Grand Total Credits: **9**

Online Programs

Information Technology (MS) - Web Design (Concentration)

Description

The concentration in Web Design focuses on the design and development of interactive web sites, web applications and methods for driving traffic to websites. Students will learn to design functional, attractive, and easy-to-navigate websites based on an understanding of how humans actually use the internet. They will also examine how to collect statistics on website usage, and how demographic and other data can be used to improve site functionality and popularity

Concentration Outcomes

1. Utilize appropriate tools and technologies to construct interactive websites
2. Recommend plans to drive traffic to websites using web analytics
3. Alter the interface design of websites using guidelines for identifying design problems and strengths, usability assessments, and best practices for common functions such as web navigation, menus, scrolling, graphics and icons

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - IT647 - Website Construction (3)
 - IT648 - Website Optimization (3)
 - IT649 - Interface Design for Websites (3)

Grand Total Credits: **9**

Introduction to Computer Programming (Certificate)

Description

The certificate in Introduction to Computer Programming provides learners with the foundational programming and software development knowledge and skills to develop efficient software applications. Learners will be able to apply object-oriented programming concepts and principles throughout the various phases of the Software Development Lifecycle, as well as develop the collaborative skills necessary to create solutions to problems within an agile development environment. Learners will explore various programming and software development concepts and principles such as data structures, inheritance, polymorphism, abstraction, and encapsulation.

Requirements

Certificate Courses

12 Total Credits

- Complete:
 - IT140 - Introduction to Scripting (3)
 - IT145 - Foundation in Application Development (3)
 - CS210 - Programming Languages (3)
 - CS250 - Software Development Lifecycle (3)

Grand Total Credits: **12**

Online Programs

Mathematics (BA)

Description

The Mathematics major at Southern New Hampshire University gives students a broad background in a wide array of mathematical areas. Students have the opportunity to see the beauty of mathematics, the utility of its applications, and their intersection. In particular, students pursuing the Mathematics major will develop an advanced ability in mathematical methods, reasoning, critical thinking, and problem-solving. Students pursuing the Mathematics major also elect to either take a concentration or choose courses based on their particular interests. An SNHU graduate with a Mathematics major is prepared for a broad range of careers in quantitative fields including, but not limited to, business, education, and government agencies. In addition, the SNHU Mathematics major will serve as strong preparation for students interested in pursuing graduate studies in quantitative fields.

Program Outcomes

1. Utilize effective oral and written communication strategies in the construction, evaluation, and presentation of solutions to mathematical problems
2. Apply mathematical reasoning, analysis, and problem-solving to complex, real world problems including problems in the natural and social sciences
3. Construct and defend clear, rigorous, and logical mathematical proofs
4. Analyze and accurately solve mathematical problems across a variety of mathematical areas including calculus, differential equations, linear algebra, abstract algebra and real analysis

Requirements

General Education Courses
42 Total Credits

- 42 credit(s) from: General Education

Must include:

- MAT136 - Introduction to Quantitative Analysis (3)
- MAT140 - Precalculus (3)
- MAT243 - Applied Statistics for Science, Technology, Engineering, and Mathematics (STEM) (3)

Arts and Sciences Courses
9 Total Credits

- 9 credit(s) from subject(s): BIO CHM, ENV, GAM, GEO, GRA, PHL, PHY, PSY, or SCI

Major Courses
30 Total Credits

- Complete:
 - IT140 - Introduction to Scripting (3)
 - IT226 - Communication in STEM Professions (3)
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT230 - Discrete Mathematics (3)
 - MAT275 - Calculus II: Integration & Series (3)
 - MAT299 - Mathematical Proof and Problem Solving (3)
 - MAT325 - Calculus III: Multivariable Calculus (3)
 - MAT330 - Differential Equations (3)
 - MAT350 - Applied Linear Algebra (3)
 - MAT470 - Real Analysis (3)

Major Electives or choose a Concentration
9 Total Credits

- Complete all of the following
 - 6 credit(s) from subject(s): MAT within the range of course numbers 200 - 499
 - 3 credit(s) from subject(s): MAT within the range of course numbers 400 - 499

Free Electives
30 Total Credits

- 30 credit(s).

Grand Total Credits: **120**

Online Programs

Mathematics (BA) - Applied Mathematics (Concentration)

Description

The Applied Mathematics concentration emphasizes mathematics as an interdisciplinary science, one with broad-reaching, authentic applications in the modern world. Scientific research and industry are increasingly relying on mathematical and computational tools to advance our understanding of complex real-world problems. Students will be exposed to commonly used methods, techniques, and tools in applied mathematics, with emphasis placed on those associated with mathematical modeling. Additionally, students will explore the vital role that mathematics plays in research and industry by completing a research project in the area of applied mathematics.

Requirements

Concentration Courses

9 Total Credits

- Complete all of the following
 - Complete:
 - MAT375 - Mathematical Modeling (3)
 - MAT430 - Seminar in Applied Mathematics (3)
 - 3 credit(s) from the following:
 - MAT303 - Applied Statistics II for Science, Technology, Engineering, and Mathematics (STEM) (3)
 - MAT410 - Operations Research (3)
 - MAT420 - Dynamical Modeling (3)

Grand Total Credits: **9**

Mathematics (Minor)

Description

The Mathematics Minor at SNHU is devoted to learning and understanding computational problems in calculus as well as proof and problem solving in pure mathematics. The Mathematics Minor has the following learning outcomes:
Demonstrate the capacity to solve computational problems in calculus. Demonstrate the capacity to write proofs and problem solve in pure mathematics.

Requirements

Minor Courses

12 Total Credits

- Complete all of the following
 - Complete:
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT230 - Discrete Mathematics (3)
 - MAT299 - Mathematical Proof and Problem Solving (3)
 - 1 of the following:
 - MAT415 - Abstract Algebra (3)
 - MAT470 - Real Analysis (3)

Electives

3 Total Credits

- Complete all of the following
 - 3 credit(s) from subject(s): MAT
 - NOTE: MAT 101, MAT 106, MAT 130, MAT 140, MAT 206, MAT 360, MAT 362 are excluded from the elective options.

Grand Total Credits: **15**

Social Sciences

Online Programs

Advanced Counterterrorism and Homeland Security (Graduate Certificate)

Description

The Advanced Counterterrorism and Homeland Security certificate offers students an opportunity to master the skills necessary to function in the industry. Intelligence analysis, threat management, advanced surveillance, and anti-terrorism techniques are examined.

Requirements

Certificate Courses
12 Total Credits

- Complete:
 - CJ530 - Global Terrorism (3)
 - CJ681 - Terrorist Techniques and Counterterrorism (3)
 - CJ682 - Threat Assessment (3)
 - CJ683 - Intelligence Collection and Analysis (3)

Grand Total Credits: **12**

Anthropology (BA)

Description

Anthropology is the study of people and their non-human primate relatives over space and time. It is the study of how human society has changed from a social, historical, and evolutionary perspective. Anthropology is a field that bridges Science and the Humanities examining and producing both qualitative and quantitative data. Anthropologists think holistically about the human society working to understand similarities and differences through cultural, biological, archaeological, and linguistic lenses. Anthropology prepares students for careers in the United States and abroad. Since the anthropology degree at Southern New Hampshire University is skill focused, it uniquely prepares students to either be employed following graduation or enter a graduate degree program. The application of anthropological skills is at the core of the degree program. The uniqueness of the degree is in the inclusion of skill-based concentrations that expand the list of potential jobs for which a graduate can apply. The Anthropology core courses and concentrations stress the application of anthropological theory and methods to real world problems through experiential assignments, ethnographic case studies, data collection, and the acquisition of skills in a specialty area. Anthropology is inherently multidisciplinary, and as such, its specialty areas draw from elements of many different fields in the sciences and humanities.

Program Outcomes

1. Evaluate diverse cultural behaviors and social interactions for their role in the complex interrelationships between individuals, cultures, social institutions, organizations, and the environment
2. Apply anthropological theories, concepts, and methodologies to complex contemporary and historical cultural issues for a broader understanding of human societies
3. Demonstrate professional ethics and responsibilities for the collection and dissemination of anthropological knowledge to promote the value of human diversity
4. Develop feasible anthropological research questions for designing implementation-worthy project proposals
5. Analyze anthropological research and data for assessing how human groups construct the cultural realities in which they live
6. Assess similarities and differences among cultures for developing culturally relevant perspectives that challenge ethnocentric notions and practices

Online Programs

Requirements

General Education Courses
42 Total Credits

- Complete all of the following
 - 39 credit(s) from: General Education
- Must include:
 - HIS117 - World Civilizations: Prehistory-1500 (3)
 - PHL111 - Introduction to Critical Thinking (3)
- 1 of the following:
 - MAT133 - Introduction to Statistical Analysis (3)
 - MAT240 - Applied Statistics (3)

Arts and Sciences Courses
9 Total Credits

- Complete:
 - GEO200 - World Geography (3)
 - PHL230 - Religions of the World (3)
 - PHY103 - Earth System Science (3)

Major Courses
24 Total Credits

- Complete:
 - ATH101 - The Human Experience: Introduction to Anthropology (3)
 - ATH111 - Introduction to Cultural Anthropology (3)
 - ATH205 - Discovering the Past: Foundations in Archaeology (3)
 - ATH210 - Human Origins and Evolution: Biological Anthropology (3)
 - ATH315 - Anthropology in the Contemporary World (3)
 - ATH320 - Who Owns Culture? Ethics in Anthropology (3)
 - ATH489 - Capstone in Anthropology (3)
 - SCS285 - Research Literacy in Social Sciences (3)

Major Electives or choose a Concentration
12 Total Credits

- Complete all of the following
 - 3 credit(s) from BIO ENV, PAD, POL, PSY, SCI, or SOC within the 100 - 499 range or from the following courses:
 - SNHU290 - Experiential Learning (3)
 - SNHU495 - Internship (3)
 - 9 credit(s) from subject(s): BIO ENV, PAD, POL, PSY, SCI, or SOC within the range of course numbers 300 - 499

Free Electives
33 Total Credits

- 33 credit(s).

Online Programs

Anthropology (BA) - Environmental Sustainability (Concentration)

Description

How sustainable are modern human lifestyles? Students will explore how human systems and environmental systems interact in the context of everyday life. Students will learn what they can contribute to good stewardship of the natural environment and the quality of life for groups and communities. Students completing this concentration will be prepared to contribute to the field of an environmental sustainability with a variety of anthropological approaches.

Concentration Outcomes

1. Examine the relationship between human activities and environmental processes for informing individual and community strategies that mitigate environmental issues and promote sustainable living

Requirements

Concentration Courses

12 Total Credits

- Complete:
 - BIO330 - Conservation Biology (3)
 - SCI219 - Environmental Issues (3)
 - SCI220 - Energy and Society (3)
 - SOC318 - Sustainable Communities (3)

Grand Total Credits: **12**

Criminal Justice (AS)

Description

The Associate in Science Criminal Justice program provides learners with an opportunity to explore sworn and civilian career opportunities within the field as they examine the structure and function of the criminal justice system. The program prepares learners to make discretionary decisions founded in ethics and to communicate effectively to internal and external audiences. Learners will develop a strong understanding of the roles of law, cultural awareness, and criminological theory and their influence on professional practice.

Program Outcomes

1. Explore the branches of the criminal justice system to determine career possibilities and professional responsibilities in criminal justice
2. Utilize effective communication skills and proper documentation to collect and convey information to diverse audiences within the criminal justice profession and community
3. Examine laws, regulations, and best practices that guide professional expectations to inform decision-making in criminal justice

Online Programs

Requirements

General Education Courses
24 Total Credits

- Complete all of the following
 - SNHU
 - Complete:
 - SNHU107 - Success Strategies for Online Learning (3)
 - English
 - Complete:
 - ENG122 - English Composition I (3)
 - ENG123 - English Composition II (3)
 - Mathematics
 - 1 of the following:
 - MAT133 - Introduction to Statistical Analysis (3)
 - MAT240 - Applied Statistics (3)
 - Interdisciplinary Studies
 - Complete:
 - IDS100 - Perspectives in Liberal Arts (3)
 - Exploration
 - Complete all of the following
 - Complete:
 - SCS100 - Perspectives in the Social Sciences (3)
 - 2 of the following:
 - HUM100 - Perspectives in the Humanities (3)
 - HUM200 - Applied Humanities (3)
 - HIS100 - Perspectives in History (3)
 - HIS200 - Applied History (3)
 - SCI100 - Perspectives in the Natural Sciences (3)
 - SCI200 - Applied Natural Sciences (3)
 - SCS200 - Applied Social Sciences (3)

Major Courses
24 Total Credits

- Complete:
 - CJ112 - Introduction to Criminal Justice (3)
 - CJ120 - Cultural Awareness in Criminal Justice (3)
 - CJ140 - Communication Skills for Criminal Justice (3)
 - CJ205 - Policing in the United States (3)
 - CJ207 - The United States Judicial System (3)
 - CJ210 - The United States Correctional System (3)
 - CJ230 - Discretion in Criminal Justice (3)
 - SCS285 - Research Literacy in Social Sciences (3)

- 12 credit(s).

Grand Total Credits: **60**

Criminal Justice (BS)

Online Programs

Description

The Bachelor of Science in Criminal Justice program provides learners and professionals with the practical knowledge and skills necessary to accomplish their career goals in both civilian and sworn positions in the field. The program prepares learners to make ethical, evidence-based decisions as well as to identify, analyze, and approach problems creatively in their chosen profession. Learners strengthen their personal and professional communication skills, critical thinking, and cultural awareness while exploring the impact of topics such as diversity and emerging technologies on criminal justice to aid in promoting positive relations and maintaining safety in the communities they serve. By expanding beyond the boundaries of a traditional degree program in criminal justice, learners are exposed to current theory, discretion in decision making, emerging national and global trends, and responses to crime through field authentic learning experiences.

Program Outcomes

1. Evaluate the impact of emerging technologies and societal trends on the operations of criminal justice agencies and allied organizations
2. Promote positive community relations and partnerships using strategies relevant to criminal justice professionals that incorporate diverse perspectives and cultural awareness
3. Communicate effectively and professionally in collecting and conveying criminal justice-related information to diverse audiences based on appropriate communication skills and procedures
4. Analyze the power of discretionary decision-making in relation to laws, regulations, and professional ethical standards in criminal justice
5. Explore the branches of the criminal justice system for developing research based solutions to complex problems facing sworn and civilian professionals in the field
6. Analyze issues in the criminal justice system through the lenses of various social, behavioral, and criminological theories to examine human motivation and behavior

Criminal Justice (BS) - Corrections (Concentration)

Description

The concentration in Corrections provides students with an opportunity to explore current issues in corrections, including evidence-based programs and practices that address the rehabilitation of offenders in an institution and the community. Coursework addresses the continuum of services provided in corrections, including community-based supervision and the social factors that lead to incarceration. Students will gain a solid foundation in policies and procedures, laws and regulations governing corrections, and staffing needs in correctional institutions.

Concentration Outcomes

1. Analyze contemporary issues and programs in Corrections to inform recommendations regarding offender management and rehabilitation within institutions and the community

Requirements

Concentration Courses

12 Total Credits

- Complete:
 - CJ320 - Corrections in the United States (3)
 - CJ321 - Offender Rehabilitation (3)
 - CJ322 - Community-based Corrections (3)
 - CJ323 - Correctional Administration (3)

Grand Total Credits: **12**

Criminal Justice (BS) - Criminology and Crime Analysis (Concentration)

Description

The concentration in Criminology and Crime Analysis provides the learners the opportunity to apply their knowledge of criminological theory and its relationship to the creation and deployment of research-based crime reduction and prevention strategies. Learners will examine the important roles that criminologists and crime analysts play in the development of data-based, proactive policing methods and crime prevention policies.

Requirements

Concentration Courses

12 Total Credits

- Complete:
 - CJ306 - Criminology and Public Policy (3)
 - CJ346 - Prevention of Crime (3)
 - CJ347 - Data-Based Policing Strategies (3)
 - CJ407 - Crime Analysis and Solutions (3)

Grand Total Credits: **12**

Online Programs

Criminal Justice (BS) - Cybercrime (Concentration)

Description

The concentration in Cybercrime provides students the opportunity to examine the nature of cybercrime, as well as the law enforcement tools, policies, and methods used to control and combat cybercrime. Students will explore the various categories and types of cybercrime, its impacts on society, and the specific methods and tactics that cybercriminals utilize to perpetrate crimes against individuals and organizations. The concentration will also allow students to explore the investigative process, analyze information and digital evidence associated with cybercrime investigations, as well as examine the challenges faced by investigators in prosecuting cybercrimes.

Requirements

Concentration Courses
12 Total Credits

- Complete:
 - CJ308 - Cybercrime Principles (3)
 - CJ344 - Cybercrime Targets: Organizations (3)
 - CJ345 - Cybercrime Targets: Individuals (3)
 - CJ410 - Cybercrime Investigations (3)

Grand Total Credits: **12**

Criminal Justice (BS) - Homeland Security and Counterterrorism (Concentration)

Description

The Concentration in Homeland Security and Counterterrorism offers learners and professionals a fundamental overview of the purpose and function of homeland security and counterterrorism. Learners will explore how historical events and cultural differences within and outside of the United States have influenced the evolution of these areas of criminal justice. Preventative and responsive strategies and techniques such as intelligence gathering, threat assessment, and collaboration among various components of the criminal justice system will be examined.

Concentration Outcomes

1. Gather and interpret intelligence and data on domestic and international terrorism for assessing threats, developing an effective terrorism response, and informing policy

Requirements

Concentration Courses
12 Total Credits

- Complete:
 - CJ310 - Introduction to Homeland Security and Counterterrorism (3)
 - CJ350 - Intelligence and Counterintelligence (3)
 - CJ360 - Terrorism in the United States (3)
 - CJ405 - Security Management (3)

Grand Total Credits: **12**

Online Programs

Criminal Justice (BS) - Human Services and Advocacy (Concentration)

Description

The concentration in Human Services and Advocacy offers learners an opportunity to explore the function and responsibilities of civilian advocacy and how advocates interact with the various components of the criminal justice system. Learners will examine public policy, child welfare, and support services so that they can learn how to help families negotiate the complex system of programs and organizations available. State and federal laws, regulations, and ethical principles that guide and impact child welfare programs will also be analyzed.

Requirements

Concentration Courses

12 Total Credits

- Complete:
 - HSE101 - Introduction to Human Services (3)
 - HSE310 - Family and Community Systems (3)
 - HSE325 - Ethics and Laws in Child Welfare (3)
 - HSE330 - Public Policy and Advocacy (3)

Grand Total Credits: **12**

Criminal Justice (BS) - Police Administration and Operations (Concentration)

Description

The concentration in Police Administration and Operations will serve to help criminal justice students understand the numerous demands, functions, goals, management, and leadership mechanisms of the modern police agency. From deployment of patrol assets, policy development, crime analysis, and management of crises, to the demands placed upon agencies in austere times, students will gain a thorough understanding of the multiple roles police agencies assume in the United States. More importantly, students will obtain a strong understanding of what their particular role may be as members of a police agency.

Concentration Outcomes

1. Analyze best practices in leadership of police administration and operations for managing personnel and resources that meet public safety goals

Requirements

Concentration Courses

12 Total Credits

- Complete:
 - CJ330 - Leadership and Management in Criminal Justice Organizations (3)
 - CJ331 - Effective Patrol and Community Policing (3)
 - CJ332 - Crisis Intervention for Police (3)
 - CJ400 - Crime Analysis and Effective Police Service (3)

Grand Total Credits: **12**

Online Programs

Criminal Justice (BS) - Security Management (Concentration)

Description

The Concentration in Security Management provides students the opportunity to examine the fundamental principles of security management and to develop professional skills aimed at ensuring the safety and protection of people, property, and organizational assets. Students will explore the differences between the various types of security management skills and techniques such as asset and vulnerability identification, the development of security partnerships, as well as current and emerging trends in the field. Students will also evaluate and develop various preventative and responsive plans and procedures, including preparedness, risk and threat assessment, crisis management, and business continuity.

Requirements

Concentration Courses
12 Total Credits

- Complete:
 - CJ328 - Security Management Principles (3)
 - CJ348 - Security Risk Assessment (3)
 - CJ368 - Security Crisis Management (3)
 - CJ408 - Business Continuity and Resiliency Planning (3)

Grand Total Credits: **12**

Criminal Justice (BS) - Substance Abuse (Concentration)

Description

The concentration in Substance Abuse provides students with a strong foundation in the International Certification & Reciprocity Consortium (IC&RC) 12 Core Functions of a drug and alcohol counselor, theories of addiction, assessment, diagnosis, and treatment of individuals diagnosed with substance use disorder, and legal and ethical issues associated with addiction. Graduates will be prepared to provide entry-level services to individuals, groups and families in residential addiction treatment facilities, outpatient addiction programs, Drug Court system, and the Department of Corrections.

Requirements

Concentration Courses
15 Total Credits

- Complete:
 - HSE350 - Substance Use: From Screening to Consultation (3)
 - HSE351 - Substance Use: From Prevention to Treatment (3)
 - HSE352 - Substance Use: Counseling Theory and Practice (3)
 - HSE353 - Pharmacological Factors in Substance Use Treatment (3)
 - PSY200 - Foundations of Addictions (3)

Criminal Justice (MS)

Description

The Master of Science in Criminal Justice program is designed for students seeking to enter or advance a career in criminal justice professions. Students will learn to apply the latest research, leadership strategies, and criminological theory for effective and strategic decision-making. With a focus on employing professional and appropriate leadership strategies for resource planning, consensus building, and long-term planning, this program provides students with valuable skills they need to address contemporary issues and challenges in the field of criminal justice and public safety. The Master of Science in Criminal Justice program is ideal for students who want to meet the challenges inherent in the United States justice system. Graduates of this program will be prepared for a wide range of careers in diverse fields, such as security, corrections, state and local government, and law enforcement.

Program Outcomes

1. Apply moral reasoning to make ethically sound and socially responsible decisions that exemplify service philosophy and leadership in the field of criminal justice
2. Employ criminological theory, research methodologies, and analysis to impact solutions to contemporary issues and problems in the field of criminal justice
3. Utilize multiple strategic planning and problem solving approaches that impact crime reduction and public service and that reflect critical and creative thinking
4. Create authentic strategies and plans designed to improve and maintain effective organizational structure and culture for influencing professional identities, criminal justice management, leadership, and policy making
5. Employ effective decision-making methods and strategies that reflect versatility of thought in addressing the diverse needs of public service agencies
6. Employ professional, appropriate communication strategies for effective resource planning, consensus building, and long-term planning

Requirements

Criminal Justice (MS) - Advanced Counterterrorism and Homeland Security (Concentration)

Description

The concentration in Advanced Counterterrorism and Homeland Security offers graduate criminal justice students an opportunity to master the skills necessary to function in the industry. Intelligence analysis, threat management, advanced surveillance, and antiterrorism techniques are examined. In addition, the program engages students in the exploration of multi-disciplinary counterterrorism analyses, cyber-security, and counterterrorism strategies.

Concentration Outcomes

1. Conduct historical and contemporary analyses of regions and terrorist organizations for determining the impact of social, political, and cultural trends on the evolution and acts of extremists and terrorists
2. Develop strategies in intelligence gathering and counterterrorism approaches for the mitigation of terrorist actions and improvement of responses to international and domestic terrorism

Requirements

Concentration Courses
12 Total Credits

- Complete:
 - CJ530 - Global Terrorism (3)
 - CJ681 - Terrorist Techniques and Counterterrorism (3)
 - CJ682 - Threat Assessment (3)
 - CJ683 - Intelligence Collection and Analysis (3)

Grand Total Credits: **12**

Criminal Justice (MS) - Public Safety Administration (Concentration)

Description

The M.S. in Criminal Justice concentration in Public Safety Administration provides students with the skills and assets necessary to fulfill the role of manager of agencies tasked with the responsibility of ensuring the safety of the public they serve. Students learn to make critical decisions involving, but not limited to, fiscal planning, advanced human resource management, project planning and implementation, and strategic planning methods.

Concentration Outcomes

1. Develop strategies that balance the needs and missions of organizations and the communities they serve for enhancing and promoting the effectiveness of public safety organizations

Requirements

Concentration Courses
12 Total Credits

- Complete:
 - CJ650 - Public Safety Administration (3)
 - OL600 - Strategic Human Resource Management (3)
 - PAD630 - Foundations of Public Administration (3)
 - PAD631 - Strategic Management in Public Service (3)

Grand Total Credits: **12**

Online Programs

Data Literacy in Psychology (Certificate)

Description

The Certificate of Data Literacy in Psychology provides learners with the foundations of psychological theories and how they are applied in research and authentic situations in related fields. Through the integration of quantitative and qualitative data and the use of various statistical and research methods, learners will develop the knowledge and skills needed to synthesize data and theory, and communicate findings to academic and non-academic audiences.

Requirements

Certificate Courses

12 Total Credits

- Complete:
 - MAT240 - Applied Statistics (3)
 - PSY108 - Introduction to Psychology (3)
 - PSY222 - Research Methods (3)
 - PSY260 - Statistical Literacy in Psychology (3)

Grand Total Credits: **12**

Human Services (BA)

Description

The focus of human services is to help people living in a variety of circumstances negotiate the complexities of American society and the systems that have been established to provide assistance. This help can range from direct, one-on-one services to the direction and management of large programs and organizations. These professional services are delivered within a complex web of laws and regulations, augmented with a fully developed set of professional ethics. In addition, recent changes in funding have increased the need for effective needs assessments, planning, monitoring, and evaluation in an atmosphere of evidence-based practice and outcome measurement. According to the US Department of Labor (2014), the demand for workers in Human Services is projected to double over the next decade largely due to the aging of the U.S. population. The Bachelor's in Human Services degree program prepares the graduate to assess the needs of clients and populations and to plan and implement programs and services that will assist in promoting improvement in personal and social functioning. Students will acquire the knowledge and skills to provide direct client services in sincere and compassionate relationships. In addition to direct services, students will learn the structures and underlying forces that characterize organizations and communities and the role that diversity plays in the functioning of larger groups. Basic knowledge of organizational management principles are provided as well as concepts relating to program advocacy and support development. The techniques and formal tools of conducting needs assessments and outcomes measurement and evaluation are presented to introduce students to the effective monitoring of interventions and programs.

Program Outcomes

1. Evaluate the social, political, and historical milestones and trends in human services in relation to the human services professionals' role in advocating for individuals, families, and communities in need
2. Apply culturally responsive strategies across diverse populations to strengthen professional practice and enhance human services outcomes
3. Apply legal and ethical standards in the administration and delivery of human services systems to provide comprehensive and well-informed care
4. Employ professional, interpersonal communication skills in formal and informal networks to improve human services delivery
5. Evaluate the policy development cycle for advocacy avenues, communication strategies, and coalition building opportunities to effect social change
6. Develop knowledge and skills in inquiry, critical and creative thinking, and decision-making to create and implement appropriate assessment and intervention strategies

Human Services (BA) - Child and Family Services (Concentration)

Description

Understanding the nature of individual and family interactions and how public policy and social issues influence individual development and family functioning are integral to the development of effective intervention programs for children and families. The concentration in Child and Family Services is designed for those students with an interest in working in child welfare, schools, juvenile corrections, family court, family support agencies, domestic violence agencies and other child and family organizations. The concentration's focus on child develop, the influence of stress and trauma, public policy, and the courts prepares students to develop evidence-based intervention strategies that improve the health and wellbeing of families and their communities.

Concentration Outcomes

1. Assess resources available to children and families for their ability to promote the health and well-being of the individuals and communities they serve
2. Develop evidence-based strategies that meet legal and ethical standards for improving the health and wellness needs of children and families

Requirements

Grand Total Credits: **12**

Human Services (BA) - Gerontology (Concentration)

Description

The concentration in Gerontology addresses the specific changes that occur as part of the aging process including psychosocial, economic, cultural, and health issues. According to the United States Census Bureau, in 2010, 13 percent of the total population (approximately 40 million people) were 65 and older. It is estimated that by 2050, nearly 20 percent of the population in the U.S. will be over the age of 65. This rapid increase in the number of older adults has numerous implications for the nation such as increased demands on services and programs. Graduates will be prepared to provide services to individuals, families, groups, and communities. Employment may be sought in community-based organizations, health-care and public health programs, senior centers, assisted living, hospitals, home health care, nursing homes and other agencies that serve aging adults.

Concentration Outcomes

1. Analyze various perspectives on aging through clinical, public, and theoretical lenses for determining their impact on the well-being of aging populations
2. Propose data-informed health plans that promote positive health and wellness choices for aging populations

Requirements

Concentration Courses
12 Total Credits

- Complete:
 - CHE320 - Perspectives in Aging (3)
 - CHE325 - Aging and Wellness (3)
 - CHE327 - The Epidemiology of Aging (3)
 - CHE329 - Aging, Politics, and Policy (3)

Political Science (BA)

Description

In addition to being known for a politically engaged populace, the state of New Hampshire is host to the first nationwide Presidential primary in the United States. From this position in the national spotlight, SNHU is afforded a unique opportunity to educate students toward careers in the growing fields and affiliations of political science, as well as promote active civic engagement in the realm of public service. The BA in Political Science at SNHU COCE benefits from this growth opportunity by taking a pragmatic approach to the study of political science and effectively preparing students for professional careers in a variety of occupations. Students will focus on developing effective communication abilities, utilizing analytical skills toward understanding and applying the tools of statistical analysis toward real world scenarios, exploring questions from a multitude of perspectives, and acquiring an empathetic and ethical viewpoint as they hone their critical thinking skills toward future graduate study or career paths. Graduates of the BA degree program could potentially pursue careers in advocacy, public policy, government business writing, campaign development and strategy, statistical analysis, and many other fields. The degree also positions students well toward advanced graduate studies in Political Science.

Program Outcomes

1. Differentiate among key components of various political systems and external factors for efficacy in a global society
2. Apply social scientific reasoning, theories, concepts, and methodologies to the analysis of a wide range of contemporary and historical political issues and problems using effective statistical research and analysis
3. Apply effective research literacy strategies in hypothesis testing and academic research for political science by identifying, analyzing, and integrating appropriate primary and secondary sources
4. Demonstrate appropriate oral and written communication strategies toward specific political audiences for effective, solution-oriented decision making
5. Demonstrate an empathetic and ethical viewpoint using civic discourse that promotes active citizenship and engagement in public service

Psychology (BA)

Description

Southern New Hampshire University's Bachelor of Arts in Psychology develops adaptable, emotionally intelligent, and growth-oriented professionals. Informed by the American Psychological Association (APA) Guidelines for the Undergraduate Psychology Major, this degree program provides authentic learning experiences that allow students to apply theory-based approaches in diverse and multidisciplinary environments. The program prepares students by building skills in scientific inquiry and the ability to interpret, communicate, and apply data and findings. Students strengthen their personal and professional communication skills, critical thinking, and respect for diversity, equity, and inclusivity. The program provides students with the foundational knowledge of psychology and flexible skills for entry into a variety of fields or for further study in graduate programs. As students explore the complexities of the human mind and behavior, they are empowered to use their knowledge and skills to collaborate with others in the field to encourage positive change in their lives and the world around them.

Program Outcomes

1. Apply foundational psychological theories, principles, and methodologies in accordance with ethical principles and professional standards
2. Develop researchable questions and methods of inquiry that inform further study in the field of psychology
3. Analyze and interpret data to communicate findings and implications to professionals in the field of psychology, interdisciplinary fields, and non-academic audiences
4. Develop and promote professional mindsets and practices grounded in psychological evidence that foster unbiased, globally aware, and culturally responsive behaviors in individuals and communities

Psychology (BA) - Addictions (Concentration)

Description

The concentration in Addictions provides students with a venue to explore theories and contemporary research in addictive behaviors, which encompass many types beyond drug and alcohol addiction. Students will be exposed to the science behind addiction as well as practical applications related to treatment and prevention. It is important to note that this concentration does not lead to licensure or certification of any kind in the addictions or substance abuse fields. However, students will be better prepared for pursuing peer-to-peer/community-related positions as well as pursuing graduate programs and/or future licensing opportunities. Behavioral Health Technician is another career direction that could be sought after completing this concentration.

Concentration Outcomes

1. Analyze the major concepts and theoretical perspectives related to various types of addictive behaviors
2. Apply knowledge of research methods to understand treatment and prevention of addictive behaviors
3. Evaluate contemporary research in addictions that addresses issues related to behavior and mental processes

Requirements

Concentration Courses

Psychology (BA) - Applied Psychology (Concentration)

Description

The concentration in Applied Psychology encourages students to apply psychological concepts and research skills to the societal institutions of health, industry, education, law, and community service. Students will investigate how different areas of psychology seek to answer pertinent research questions and apply the approaches and theories within these areas toward real-world situations. This concentration will help students identify potential specific areas of interest within psychology, which they may want to pursue further in graduate school.

Concentration Outcomes

1. Apply the major concepts, theoretical perspectives, empirical findings, and historical trends within various areas of psychology
2. Apply fundamental research methods that are pertinent to specific areas of psychology
3. Interpret behavior and mental process issues through different psychological perspectives

Requirements

Psychology (BA) - Social Psychology (Concentration)

Description

The concentration in Social Psychology extends students' expertise in a fundamental area of psychology. It immerses students in specific topics that are at the core of social psychology, including conformity, obedience, attitudes, cross-cultural issues, and influence, among others. The design of the concentration courses assumes a base knowledge from the existing Social Psychology course; each course allows students to delve deeper into the rich body of social psychology knowledge and learn how it applies to contemporary society. This concentration will provide students the skills they need to function practically in the real world and place themselves within the context of their selected field, whether in academia, the private business world, or the public realm. The abilities here will make the student a better researcher, writer, and critical thinker.

Concentration Outcomes

1. Analyze classic social psychology research studies and their relevance to the individual and group experience in contemporary society
2. Apply specialized knowledge of social psychology concepts toward a critical examination of individual and group behavior
3. Interpret behavior and mental process issues through different societal lenses

Requirements

 - PSY300 - Biopsychology (3)
 - PSY305 - Cognitive Psychology (3)
 - 3 credit(s) from subject(s): PSY

Grand Total Credits: **15**

Psychology (MS)

Description

The rapidly changing professional landscape of the 21st century has led to a growing demand for individuals with a formal psychology background. Industries such as business, marketing, education, health services, criminal justice, sports management, and information technology are increasingly seeking out individuals with these credentials to help improve performance, motivation, and general well-being within organizations. The Master of Science in Psychology degree extends students' knowledge and expertise in the discipline, effectively preparing them to apply their skills in a wide variety of professions and contexts. Students deepen their understanding in critical areas such as research methods, cognitive psychology, social psychology, personality, learning theory, and ethical practice in psychology. Emphasis is placed on the practical application of psychological research to real world contexts. Students will sharpen and hone their skills as they work through ill-structured case studies relevant to psychological theories and methods. While the Master of Science in Psychology degree does not lead to licensure or certification, students will find both the general psychology program and the concentrations well-aligned with industry standards and expectations. In addition, students will graduate with all of the knowledge and skill necessary for doctoral level coursework.

Program Outcomes

1. Advocate for and extends psychology's role and responsibility in promoting agency and the psychological well-being of individuals, communities, and organizations
2. Adapt to shifting demands and ill-structured problems by critically evaluating the relevance, priority, and appropriateness of various information and potential courses of action
3. Design, conduct, and evaluate research through the lens of its potential to advance knowledge in psychology as well as the psychological well-being of individuals, communities, and organizations
4. Integrate psychological theories, methods, and research to generate new knowledge and promote agency and the psychological well-being of individuals, communities, and organizations
5. Incorporate empathy, reflectivity, and an appreciation for collaboration and diversity of perspectives into efforts to promote agency and the psychological well-being of individuals, communities, and organizations
6. Protect the integrity and professional responsibility of psychology through the demonstration of ethical comportment in all aspects of the profession

Psychology (MS) - Forensic Psychology (Concentration)

Description

The concentration in Forensic Psychology provides candidates with grounding in the foundations of this field, providing the opportunity to practice and apply their learning, implement theory, and develop useful skills that are work-relevant. It is important to note that this concentration does not lead to licensure or certification in the Forensic Psychology field; however, candidates will be better prepared for pursuing opportunities to provide support within the courtroom as well as pursuing graduate programs and/or future licensing opportunities.

Concentration Outcomes

1. Adapt psychological theories and methods for their appropriate and effective application in forensic psychology settings
2. Evaluate the impact of the law on the field of forensic psychology and the roles of a forensic psychologist

Requirements

Sociology (BA)

Description

The field of Sociology is a scientific study of human group behavior and social patterns, including culture, history, economics, religion, and politics. The sociological perspective examines patterns in areas such as class, gender, race, policy, institutions, and all types of social organization. The emphasis is on professional practices as well as scholarship, with a career orientation and experiential learning approach. Graduates of the program seek employment in social services and counseling, management and administrative support, teaching, research, sales, marketing, public relations, criminal justice positions, military and many other fields.

Online Programs

Program Outcomes

1. Analyze group behavior through current and emerging sociological theory for a broader understanding of society
2. Analyze and employ appropriate sociological research to critically assess published research and develop sociological research proposals that address contemporary social issues
3. Evaluate the social construction of realities for their impact on human social interactions and their consequences across cultures
4. Develop sociological questions demonstrating versatility of thought and problem-solving skills in addressing contemporary social issues, employing ethical and professional communication of sociological information
5. Cultivate the sociological perspective in communicating research interests and career goals in the social sciences
6. Analyze social structures and processes within social institutions for recognizing patterns and relationships across cultures

Sociology (BA) - Community Health (Concentration)

Description

The Community Health concentration provides students in the Sociology program with the opportunity to apply sociological theories in the assessment of health policies, programs, and interventions that impact various individuals and communities. Students explore communication methods that enable appropriate dissemination of ethically and culturally sensitive health information to a variety of audiences and investigate the impact of communication strategies on health outcomes in relation to the importance of engaging individuals and communities with aspects of public health.

Concentration Outcomes

1. Assess health policies, programs, and interventions, utilizing sociological theory, for their ability to affect change in the health status and social development of individuals and communities
2. Develop effective strategies in communicating ethically and culturally sensitive information that engage individuals and communities in the promotion of health policies, programs, and interventions

ACC675 - Control/Audit of Accounting Info System

Description

New auditing and quality control standards adopted by the PCAOB and the AICPA require auditors to have adequate technical training and must understand the role information technologies play in the maintenance and effective internal control of financial information. Knowledge of EDP auditing and control is particularly important in complying with Section 404 of Sarbanes-Oxley (SOX), which requires auditors to attest to the standards of internal control and any material weaknesses disclosed by senior management. This course will give auditors the knowledge they need to comply with SOX Section 404 by allowing them to test the process rather than just the product of the financial information system. Select curricular standards set by ISACA will be addressed to assess and to improve auditing and internal control practices.

Credits

Anthropology

ATH101 - The Human Experience: Introduction to Anthropology

Description

Anthropologists seek to answer the questions of what it means to be human and how cultures shape societies. Anthropology is composed of four main fields-physical anthropology, cultural anthropology, linguistics, and archaeological anthropology-from which culture is examined. This course will introduce students to the anthropological study of cultures, including comparing and contrasting social relationships and belief systems in different cultural settings. Concepts learned in this course will then be used to understand contemporary world views.

Academic Level

Undergraduate

ATH205 - Discovering the Past: Foundations in Archaeology

Description

Archaeological anthropologists seek to discover and learn from what we know about people and cultures that lived long ago. Artifacts and environmental modifications have left behind traces that tell us about their culture and their lives. In this course students will learn about survey techniques, culture change, dating methods, and the reconstruction of economic, social and religious practices of prehistoric societies. Archaeologists often collaborate with scientists from other disciplines to learn about the past. Students will explore what archaeologists hope to learn and how they study the past to inform the present.

Undergraduate

ATH210 - Human Origins and Evolution: Biological Anthropology

Description

This course provides an introduction to biological anthropology which explores the evolution of the human species, as well as the biology of contemporary humans and their non-human primate relatives. Students will explore evolutionary theory and mechanisms, the fossil record of human evolution, and modern humans' adaptation to their environments. Basic concepts of genetics, geology, paleontology, comparative anatomy, and primate biology provide the foundation for understanding humanity from a biological anthropological standpoint.

BM515 - Music Business Structure and Strategies

Description

This course provides an in depth look at the structure of the evolving music business and strategies for creating successful business models. It will guide students through the critical areas of the music industry, including publishing and licensing; marketing, promotion, and retail; proper utilization of free music; fan funding and other forms of creative revenue for musicians; and new business opportunities. By the end of this course, students will have a deep understanding of the pressing issues that all musicians, music industry entrepreneurs, managers, and other music business professionals face in the main segments of the music industry, and how to leverage opportunities that the new business provides. This course is offered through Berklee Online.

Credits

3

Requisites

- Must be enrolled in MBA Music Business program.

Graduate

BM630 - The Business of Music Marketing

Description

In the Business of Music Marketing, you will gain a professional-level knowledge of cutting edge marketing techniques essential for any music-centric business. Starting with evergreen marketing best practices, you will learn specific approaches for building an engaged community, applying different forms of media for visibility, and utilizing professional marketing tools to plan, execute, and report back on results. Learn how to plan and support a product release, create and execute an integrated marketing campaign, and explore ways to create and run a successful music business. You will master marketing philosophy and gain critical knowledge and skills for both music product and marketing.

Credits

3

Requisites

BM670 - Music Business Leadership and Ethics

Description

Leadership, decision-making, and ethics represent vital foundations for business professionals in the music industry. The course examines the characteristics of notable leaders, leadership approaches, and music industry leadership scenarios. It explores ethics from a wide variety of industries to gain an understanding about why ethical choices are important, and analyzes current issues affecting the music industry, such as the treatment of artists, intellectual property rights, revenue sharing, and digital media and distribution. Students will apply specific decision-making approaches and ethical frameworks toward projects that mirror the real world. They will create a blueprint for sound decision-making, effective leadership, organizational planning, and ethical awareness that they can immediately apply toward advancing their careers. This course is offered through Berklee Online.

Online Programs

BIO205 - Human Anatomy and Physiology I

Description

BIO 205 Human Anatomy and Physiology I is the first of two courses examining the structure, function, and interdependence of human body systems. The course begins at the cellular and molecular levels with a concentration on the organization of the human body as a symbiotic system. The integumentary, skeletal, muscular, and nervous systems provide focal points for case studies and discussions throughout the term. The laboratory component allows the student to integrate and apply theory based knowledge from the course to simulations and critical appraisal exercises.

Credits

3

Academic Level

Undergraduate

BIO210 - Introduction to Anatomy and Physiology

Description

Discussion/comparison of the principles of mammalian form and function. Includes molecular and cellular mechanisms of major processes (such as muscle contraction, neural transmission, and signal transduction) and examines the structure and function of the 11 organ systems of the human body. Laboratory exercises (BIO-210L) to follow lecture topics.

Credits

3

Academic Level

Undergraduate

BIO211 - Human Anatomy and Physiology II

Description

BIO 211 Human Anatomy and Physiology II is the second of two courses examining the structure, function, and interdependence of human body systems. The course covers endocrine, circulatory, immune, respiratory, digestive, excretory, and reproductive systems. The laboratory component allows the student to integrate and apply theory based knowledge from the course to simulations and critical appraisal exercises.

Credits

BIO330 - Conservation Biology

Description

This course will focus on the importance of biodiversity. Currently, we are experiencing an unprecedented loss in species; losing, on average, two species a day. Unlike past mass extinctions humans are largely responsible. Following the Society of Conservation Biology's guidelines for conservation literacy, this course will investigate how we can apply biological principals to reverse trends in species loss. We will focus on case studies to develop our understanding of what maintains, reduces, and restores biodiversity. The course will be organized into three sections 1) history and value of conservation biology, 2) threats to biodiversity, and 3) approaches to solving conservation problems.

Credits

3

Requisites

- Complete 1 of the following
 - 1 of the following:
 - ENV101 - Environmental Science (3)

BUS490 - Business Internship

Description

The primary goal of the internship experience is to expose students to actual practices in the world of work outside of the classroom, to relate this experience to academic course work and to synthesize the two in a practical application of knowledge in an experiential setting. Secondly, internships offer the opportunity to develop crucial job searching skills, explore career interests, enhance your resume, make contacts in your chosen field and build references for future employment. Each intern will work in a career-related position during the academic term for which the student is enrolled for the internship completing a minimum of 150 hours on the job per 3 credits. This is an elective internship course intended for College of Online and Continuing Education students who do not have a required internship as part of their program.

COM431 - Organizational Branding

Description

In this course, students will examine how organizations brand themselves, as well as the role of branding in creating and disseminating communications. They will evaluate how audience needs and internal and external stakeholder requirements impact the development and maintenance of an organization's brand. Students will also gain hands-on experience in creating, building, and maintaining a brand.

Credits

3

Requisites

- Complete:
 - COM311 - Social Media Strategy (3)

Academic Level

Undergraduate

Online Programs

COM435 - Feature Writing

Description

This course is for students who want to explore feature writing as a means of improving their research and writing skills or to pursue a print journalism focus in the communication major. Students will learn how to develop and organize ideas, adapt their writing for specific audiences and revise and polish their prose style.

Credits

3

Requisites

- Complete:
 - COM235 - Multimedia Journalism (3)

Academic Level

Undergraduate

COM445 - Writing for New Media

Description

This course is an advanced writing experience that focuses on the content-development skills critical for new and emerging digital media technologies. Students engage with the essential concepts and issues surrounding media convergence and the various strategies for delivering and adapting essential information through diverse multimedia platforms.

Credits

3

Requisites

- Complete:
 - ENG122 - English Composition I (3)

Academic Level

Undergraduate

COM449 - Communication Law and Media Ethics

Description

In this course, students will examine the interrelationship of government oversight, public policy and regulation, and social responsibility in the communication profession. They will investigate how communication professionals abide by ethical codes of conduct and adhere to laws and regulations in the creation, repurposing, and dissemination of communication messages. Additionally, students will explore the various ways that communication professionals can demonstrate social responsibility when producing communication projects.

Credits

3

Requisites

- Complete:
 - COM225 - Communication with Diverse Audiences (3)

Academic Level

Undergraduate

Online Programs

COM452 - Public Relations Campaign Planning Seminar (Capstone)

Description

This capstone course offers practice in managing communication campaigns from the public relations perspective and emphasizes the production and presentation of campaign plans. Students will develop and pitch a campaign for a real client.

Credits

3

Requisites

- Complete:
 - COM227 - Public Relations (3)

Academic Level

Undergraduate

COM469 - Senior Seminar in Communication (Capstone)

Description

This course serves as the capstone experience for communication majors. Students synthesize past course work, knowledge, skills, and experiences in order to research and plan a scholarly applied communication study and/or campaign to solve a problem for a 'real world' client. Specific project requirements are tailored to meet students' planned career paths or areas of focus in the communication discipline. In-class sessions focus on enabling students to become effective independent researchers, while regular individual conferences with the instructor focus on project planning, charting progress, and addressing contingencies. The course results in each student producing a final written product - a research thesis or professional project report - along with a public oral presentation of the thesis/project.

Credits

3

Requisites

- 1 of the following:
 - PSY224 - Research II: Scientific Investigations (3)
 - SCS224 - Social Science Research Methods (3)

Academic Level

Undergraduate

COM476 - Corporate Communications Seminar (Capstone)

Description

This course will explore the growing field of corporate communication with special emphasis on, industry analysis, media relations, message strategies and crisis communication planning. Upon completion of the course, students will understand the theory, practice and functions of corporate communicators. This course will serve as a capstone experience for all communication majors.

Credits

Undergraduate

Online Programs

COM500 - Communication, Media & Society

Description

Communication, Media, and Society serves as an introduction to key concepts and theories in the study of communication and media. In this course, students will examine the foundations of the discipline of communication focusing particularly on the ways in which media and technology have impacted the study of culture, relationships, and messages. The course will explore the impact of communication on various arenas, including families, relationships, culture and the changes in communication and media over time. Students will analyze their own skills, communication patterns, networks, and resources and articulate a plan for future studies and career plans in communication.

Credits

3

Academic Level

Graduate

COM510 - The Vantage Point: Knowledge & New Media

Description

This course contends with the evolving concept of "knowledge production" in the new media environment. It focuses on strategies for independent online research, including processes for identifying, vetting, and citing appropriate sources of information, as well as best practices for writing in the online environment. Issues of copyright, plagiarism, and ethics related to the creation of online content will be evaluated. Finally, students will explore their role as producers of mediated communication, including primary authorship and the curating of content.

Credits

3

Academic Level

Graduate

COM530 - Law & Ethics: A Line in the Sand

Description

Legal issues related to communication and media in the U.S. are rapidly changing in an age where technology and the distribution of mediated messages are ubiquitous. Thus, this course contends with the major legal, ethical, and policy issues related to mass media communication particularly focusing on those issues that impact digital and public communication. Concepts related to the First Amendment to the U.S. Constitution, libel, obscenity, censorship, right to privacy, intellectual property, and the governance of media and digital technology will be explored. Additionally, this course asks students to contend with many ethical issues and philosophies pertinent to media and communication in the interest of articulating a personal ethical framework as a graduate communication student and practitioner.

Credits

Online Programs

COM540 - Second Self: Identity & Personal Brands

Description

Interactive and social media have opened up myriad opportunities for individuals to create, manage, re-create, and even fabricate their identity online. This course contends with the idea of a virtual or "second" self and the ways in which one navigates identities in a highly networked environment. Students will explore the relationship between professional and personal identities, privacy and security in online environments, and the creation of personal brands in various media. Students will have the opportunity to explore and experiment with various types of social media tools to develop an effective and active online brand.

Credits

3

Academic Level

Graduate

COM565 - Communication with Media Technology

Description

Media technologies are changing so rapidly that those currently designated as 'new' could become obsolete before the impact to the communication field is even fully understood. Communication professionals must seek to understand the catalysts of technological changes by conceiving of them as products of the values and assumptions held by the societies that create them. This course is focused on how new media technologies have developed, how they might modify previous understandings of the relationship between technology and culture, and how they have shaped industries (particularly media industries) today. Students will investigate the practical aspect of various technologies of interest in order to become more savvy consumers and critics of emerging media tools and resources.

Credits

3

Requisites

- 1 of the following:
 - COM500 - Communication, Media & Society (3)
 - COM510 - The Vantage Point: Knowledge & New Media (3)

Academic Level

Graduate

COM566 - Pen to Platform

Description

A corollary to and resulting challenge of new media technology is the need for messages that are applicable and effective in a myriad of different contexts. In this course, students will craft and structure written work so that it may be more easily translated to different platforms. Different writing processes, such as information mapping, will be employed to demonstrate new ways of thinking about information. Students will apply best practices for effectively communicating across different media and actualizing varied communication in their writing.

COM567 - Digital Tools and Teams

Description

Although modern technology empowers the individual to do far more with limited resources than ever before, it is certainly impossible to live and work in a vacuum in today's globalized society. Striking the balance between DIY, collaboration, and contracting help requires adept decision making and project management that must be rooted in the overall strategy and mission of the communication plan. In this course, students will explore and employ the practical resources, tools, economics, and logistics of new media and marketing. Additionally, students will determine and practice effective means for utilizing diverse networks of colleagues, mentors, clients, and critics to shape their media strategies.

Credits

3

Requisites

- 1 of the following:
 - COM500 - Communication, Media & Society (3)
 - COM510 - The Vantage Point: Knowledge & New Media (3)

Academic Level

Graduate

COM568 - New Media Campaign Design & Marketing

Description

Developing and executing a new media campaign requires the integration of skills, strategies, and tactics to create a cohesive, dynamic whole. Similarly, this course integrates components from previous coursework by addressing topics such as the life cycle of the campaign, campaign management strategies, effective tracking and measurement, and making modifications based on data analysis. Students will evaluate past successful and unsuccessful campaigns in order to glean and substantiate best practices in campaign design and execution. Finally, students will create structured components of new media campaigns in order to prepare for the critical assessment in the capstone course.

 - COM500 - Communication, Media & Society (3)
 - COM510 - The Vantage Point: Knowledge & New Media (3)

Academic Level

Graduate

COM600 - Communication for Leadership

Description

This course aims to prepare students for a variety of leadership roles in dynamic organizations and environments. Students will analyze key aspects of leadership, relationships, and organizations such as: organizational culture, conflict in interpersonal and organizational settings, organizational roles and socialization, power in personal and professional relationships, and group communication theories. Students will contend with these concepts from a personal standpoint by using examples from their own relationships and workplaces to apply best practices and improve their own communication and leadership skills. Additionally, this course takes a systems theory approach to organizations and teams, looking at the interrelationship of events, people, and ideas and the systemic impact of small and large changes.

COM610 - More than Words: Communication by Design

Description

Illustrations, photos, infographics, videos, animations, and dynamic interfaces often tell a consumer more about a brand or product than the product itself. It is increasingly important that media consumers and creators be fluent visual communicators. This course presents fundamentals of good visual design and presentation in media focusing on the best practices for a variety of design tools. Students will engage with key concepts related to visual production and consumption, media and web design, storytelling and narrative in visual formats, and accessibility of content for diverse audiences.

Credits

3

Academic Level

Graduate

COM620 - Strategic Communication in a New Age

Description

In today's public climate, political rhetoric is no longer just a tool of the immensely powerful or those who have access to a podium and speakers. The dissemination of mass messages can occur in any number of avenues and can reach audiences that were previously inaccessible or disinterested. Communication professionals today are in a powerful position to shape messaging and distribution strategies for many contexts: politics, popular culture, business, nonprofit advocacy, social movements, advertising, and marketing. In this course, students should develop the perspective and skill sets necessary to respond effectively and creatively to complex social problems and opportunities in written, verbal, and visual communication mediums.

Credits

3

Academic Level

Graduate

COM655 - Reputation Management: Building a Brand

Description

The public relations field distinguishes itself through its emphasis on capturing hearts and minds. Above and beyond the marketing goal of persuading target consumers to the desired economic end, it is the task of the public relations professional to persuade individuals and groups to accept a certain belief or opinion. In this way, the topics of messaging and branding take on new meaning within the context of public relations. In this course, students will make that transition in to the world of public relations by re-examining and building upon core principles to build a foundation for the public relations concentration.

COM656 - Spread the Word: Social Media Practices

Description

The ease of self-publishing using blogs, the dedication of entire mainstream news segments to the "conversation" on Twitter, the use of RSS feeds to immediately deliver customized messages and other personalization of communication all hail the dawn of a new era that is at once global and highly individualistic. For a public relations professional, social media technologies present unique challenges and opportunities to develop and protect one's brand. In this course, students will engage in thorough investigations and practical applications of the specific technologies, outlets, platforms, networks, and mediums that will populate their professional tool kit. Students will gain proficiency in particular, relevant tools, as well as add to their general fluency in the language of technology.

Graduate

COM657 - Crisis Communication in a 24/7 World

Description

The pervasiveness of social media, 24-hour news coverage, and mobile communications has transformed the role of public relations specialists. What constituted 'private' has become increasingly public given individuals' immediate access to multiple platforms and technologies to publish sensitive information. Protecting a brand and maintaining a consistent message in the maelstrom of broadcasted opinions is certainly more difficult than ever before. This course addresses the topics of public relations ethics and crisis management through the investigation of landmark cases and hypothetical crisis scenarios, preparing students to develop crisis management, prevention, and response skills crucial for today's media environment.

COM690 - Communication Capstone

Description

This capstone course integrates previous coursework and practical experience with a focus on authentic demonstration of competency in the student's chosen specialization in communication. Instead of introducing new concepts, students will synthesize prior learning to design, develop, and execute a communication campaign on their chosen subject as a culmination of their studies. The course will be structured around this critical task, so that students have the appropriate support and resources required to be successful.

Credits

3

Requisites

- 30 credit(s).

Academic Level

Graduate

COM710 - Communication Internship

Description

The primary goal of the internship experience is to expose graduate students to actual practices in the world of work outside of the classroom, to relate this experience to academic course work and to synthesize the two in a practical application of knowledge in an experiential setting. Secondly, internships offer the opportunity to develop crucial job searching skills, explore career interests, enhance your resume, make contacts in your chosen field and build references for future employment. Each intern will work in a career-related position during the academic term for which the student is enrolled for the internship, completing a minimum of 150 hours on the job per 3 credits.

Credits

Graduate

Community Economic Development

Online Programs

CED631 - Housing Policy and Development

Description

This course covers market analysis and housing needs assessments, site selection and control, financial feasibility reports, the selection of a development team, methods of obtaining approval from various government entities, identification of private and public funding and subsidies, and various forms of ownership, including cooperatives and land trusts. Students also learn about the policy framework for affordable housing development, and the legal, institutional, economic, political and environmental factors that shape that framework.

Credits

3

Academic Level

Graduate

CED632 - Urban Neighborhood Revitalization

Description

This course looks at CED in urban (mostly United States) settings. Following a review of urban geography and changes in cities over time, the course examines strategies of business development, job creation, and neighborhood revitalization that are particularly relevant to cities. Students will gain an understanding of the roles of development partners, methods for fostering stakeholder involvement, and understanding the relationship between critical demographic, socio-economic cultural and capital investment/infrastructure related trends and priorities. Students explore case studies and identify best practices.

Credits

3

Requisites

- Complete:
 - MBA520 - Accounting and Financial Analysis (3)

Academic Level

Graduate

CED634 - Financing Community Economic Development

Description

This course looks at how CED projects and organizations are financed, including the traditional and non-traditional and financial institutions involved; the various forms of financing that are possible; the factors involved in choosing the financing for a particular project; and the ways in which the choice of financing may influence a project's outcome.

Credits

3

Requisites

Graduate

Online Programs

CED652 - Community Building and Organizing

Description

Community economic development often requires an understanding of community organizing to successfully involve the community in the development process. This course acquaints participants with different models of community organizing. It also trains participants in specific organizing skills that can be used in their work as CED practitioners, including negotiation techniques.

Credits

3

Academic Level

Graduate

Community Health Education

CHE110 - Introduction to Community Health Education

Description

Explore the field of community health education through community health organizations, epidemiology, planning and assessment strategies such as Mobilizing for Action through Planning and Partnerships (MAPP), and the status of the nation's health. Examine the responsibilities, competencies, and skills of the community health education entry-level professional. Healthy People 2020 and Centers for Disease Control are used as important resources. Students begin to develop and implement program ePortfolios.

Credits

3

Academic Level

Undergraduate

CHE220 - Communicable Diseases

Description

Explore the nature and cause of human communicable diseases based on an understanding of pathogenic, behavioral, and environmental factors through the concepts of pathological process in public health. Review historical and contemporary disease patterns as they relate to common communicable diseases. Students learn disease prevention, treatment, and control approaches along with strategies promoting healthy behavior.

Credits

3

Academic Level

Undergraduate

CHE300 - Methods and Materials in Health Education

Description

The goal of this course is to explore innovative, meaningful, and effective teaching and learning approaches and materials in community health education. Students learn about curriculum planning and development, teaching strategies, creative learning resources and materials for workplace and community health education settings. Topics include developing health education materials and methods that are culturally and age appropriate.

Credits

3

Academic Level

Undergraduate

Online Programs

CHE320 - Perspectives in Aging

Description

Examine the growing field of gerontology, the scientific study of aging, with a multidisciplinary and developmental perspective that sees aging in a positive light with an emphasis on wellness, rather than disability and disease. Explore concepts of ageism, its history, and its impact on individuals, families, and communities.

Credits

3

Academic Level

Undergraduate

CHE325 - Aging and Wellness

Description

Investigate the health characteristics of aging populations and issues impacting quality of life. Examine the changes in various body systems and lifestyle factors, such as nutrition, sexuality, stress, and exercise, along with current trends in wellness.

Credits

3

Academic Level

Undergraduate

CHE327 - The Epidemiology of Aging

Description

This interdisciplinary course provides an overview of demography and methodology related to aging, and explores the specific health conditions common to older persons. The course covers methodological issues relevant to the study of aging, the biology of aging and the etiology and epidemiology of common geriatric syndromes and diseases.

Credits

3

Academic Level

Undergraduate

CHE329 - Aging, Politics, and Policy

Description

This course examines the critical issues and current policies impacting the aging U.S. population including Medicare and family caregiving, and introduces current trends in public health. The course covers public policies on retirement, employer pensions, workplace conditions, and entitlement programs, Social Security and health care reform, and the rise of the elderly as a powerful political force.

Credits

3

Academic Level

Undergraduate

Online Programs

CHE350 - Program Administration

Description

This course provides a strong foundation of the theories, principles, and practices in program administration of public health education and health promotion programs in a variety of settings on local, state, national, and international levels. Topics include: healthcare services and public health, the uninsured, public health law, emergency health preparedness.

Credits

3

Academic Level

Undergraduate

CHE460 - Health Communication, Social Marketing, and Advocacy

Description

This course explores the roles of communication and social marketing as indispensable tools in health promotion and disease prevention. Students learn about the power of effective health campaigns in changing health behaviors. Public debate, advocacy skills and policy development are examined in terms of their interrelationship.

Credits

3

Academic Level

Undergraduate

CHE490 - Community Health Capstone

Description

This capstone course is the culminating experience for the Bachelor of Science in Community Health Education. This course builds on the theories and concepts of all courses students have taken within the program of study. The capstone course provides students with the opportunity to integrate and synthesize the knowledge and skills acquired throughout their course work in an original comprehensive paper, and to assess their level of mastery of the stated outcomes of their degree program in community health education. This course is taken in the student's final term.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CHE460 - Health Communication, Social Marketing, and Advocacy (3)
 - PHE423 - Evaluation Methods in Public Health (3)
 - 111 credit(s).

Online Programs

CS200 - Computer Science's Role in Industry

Description

This course introduces the role of computer software in a variety of industries. Principles of hardware, software, computation, and algorithm development are introduced. Students learn the fundamentals of basic programming concepts including data types, variables, control structures, logical expressions, and arrays.

Credits

3

Academic Level

Undergraduate

CS205 - Foundations in Software Development

Description

Students will use basic programming constructs, focusing on writing readable and maintainable code for building programs. Students will use flowcharts and pseudocode to develop programming logic, leading into the development of a fully functional program.

Credits

3

Academic Level

Undergraduate

CS210 - Programming Languages

Description

Students will develop functional programs that comply with industry regulations and best practices using various programming languages. Special attention will be paid to the importance of developing code that is not only functional, but also secure, efficient, and professional.

Credits

3

Requisites

- Complete:
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

CS230 - Operating Platforms

Description

Students will develop a deeper understanding of operating platforms and architectures through the analysis and evaluation of the characteristics, advantages, and weaknesses of each. Students will learn the value of utilizing software design templates as well as how to utilize them to solve problems.

Credits

3

Requisites

- Complete:
 - CS210 - Programming Languages (3)

Academic Level

Undergraduate

Online Programs

CS250 - Software Development Lifecycle

Description

Students will explore the stages of the Software Development Lifecycle (SDLC) through the lens of developers and testers to examine the characteristics, documentation, and purpose of each stage. Through applying SDLC stages within an agile development environment, students will learn the principles and best practices used to develop high quality software while also assessing the impact of communication, documentation, and ethics on the SDLC.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - IT145 - Foundation in Application Development (3)
 - 1 of the following:
 - CS200 - Computer Science's Role in Industry (3)
 - IT140 - Introduction to Scripting (3)

Academic Level

Undergraduate

CS255 - System Analysis and Design

Description

Students will explore the principles, methods, and techniques used in systems development so that they can create system models using appropriate industry tools. As a part of creating system models, students will also learn to effectively communicate technical concepts and design decisions to various audiences in a professional manner.

Credits

3

- Complete:
 - CS230 - Operating Platforms (3)

Academic Level

Undergraduate

Online Programs

CS260 - Data Structures and Algorithms

Description

Students will develop code as well as use non-coding development methodologies in algorithmic design and problem solving. Students will use advanced algorithmic designs to evaluate complex data structures to aid in problem solving.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - MAT230 - Discrete Mathematics (3)
 - IT145 - Foundation in Application Development (3)
 - 1 of the following:
 - CS200 - Computer Science's Role in Industry (3)
 - IT140 - Introduction to Scripting (3)

Academic Level

Undergraduate

CS300 - Data Structures and Algorithms: Analysis and Design

Description

Students will develop code as well as use non-coding development methodologies in algorithmic design and problem solving. Students will use advanced algorithmic designs to evaluate complex data structures to aid in problem solving.

Credits

3

Requisites

- Complete:
 - CS210 - Programming Languages (3)
 - MAT230 - Discrete Mathematics (3)

Academic Level

Undergraduate

CS305 - Software Security

Description

Through the analysis of advanced security concepts, students will learn how to develop secure code that complies with security testing protocols. In addition to exploring and implementing security concepts through code, students will also learn why and how to apply encryption technologies and techniques to communicate securely.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CS230 - Operating Platforms (3)
 - CS250 - Software Development Lifecycle (3)
 - 1 of the following:
 - CS260 - Data Structures and Algorithms (3)
 - CS300 - Data Structures and Algorithms: Analysis and Design (3)

Academic Level

Undergraduate

Online Programs

CS310 - Collaboration and Team Projects

Description

Learn how to collaborate on a software project. Apply appropriate change control and versioning practices. Use technologies for supporting collaboration on a project in a distributed workforce with remote contributors.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CS250 - Software Development Lifecycle (3)
 - 1 of the following:
 - CS260 - Data Structures and Algorithms (3)
 - CS300 - Data Structures and Algorithms: Analysis and Design (3)

Academic Level

Undergraduate

CS319 - UI/UX Design and Development

Description

Students will explore User Interface (UI) and User eXperience (UX) design concepts and development techniques with an emphasis on user-centric and contemporary design patterns and techniques. Students will learn to conduct and evaluate user testing to inform user experience design. Use a variety of software tools to create wireframes and visual prototypes. This course provides students with authentic experiences in designing and developing user interfaces for embedded, cloud-based, and mobile systems.

Credits

3

Requisites

- Complete:
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

Online Programs

CS320 - Software Testing, Automation, and Quality Assurance

Description

Students will apply software engineering testing strategies and practices as part of the software development lifecycle, including requirements analysis, verification and validation, and quality management. The creation of unit tests and analysis of various testing approaches will also be covered.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CS250 - Software Development Lifecycle (3)
 - 1 of the following:
 - CS260 - Data Structures and Algorithms (3)
 - CS300 - Data Structures and Algorithms: Analysis and Design (3)

Academic Level

Undergraduate

CS330 - Computational Graphics and Visualization

Description

Students will create realistic, interactive three-dimensional objects through the use of application programming interface (API) libraries and best practices. Students will also develop fully formed graphic applications that meet project requirements.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:
 - CS260 - Data Structures and Algorithms (3)
 - CS300 - Data Structures and Algorithms: Analysis and Design (3)
 - 1 of the following:
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT350 - Applied Linear Algebra (3)
 - Complete 1 of the following
 - Complete:
 - PHY150 - Introductory Physics: Mechanics (3)
 - Complete:
 - PHY101 - Principles of Physics (3)
 - PHY101L - Principles of Physics Lab (1)

CS340 - Client/Server Development

Description

Students will learn how to apply database systems concepts and principles to develop client/server applications that interface client-side code with databases.

Credits

3

Requisites

- Complete:
 - CS320 - Software Testing, Automation, and Quality Assurance (3)

Academic Level

Undergraduate

CS350 - Emerging Systems Architectures & Technologies

Description

Students will explore emerging systems, architectures and technologies. Students will be provided with an in-depth evaluation of emerging system architecture focusing on performance and the software/hardware interface. Emphasis is on analyzing fundamental issues in architecture design and the impact on application performance to enable better understanding of the concepts. Students will learn to evaluate software architectures, both established and emerging, and gain experience in determining when to implement architectures and technologies to fulfill business needs.

Credits

3

Requisites

- Complete:
 - CS330 - Computational Graphics and Visualization (3)
 - CS230 - Operating Platforms (3)

Academic Level

Undergraduate

CS360 - Mobile Architecture and Programming

Description

Students will apply mobile development principles and best practices to develop mobile applications using user-centered design principles and industry standards. Upon completion of a fully-functional mobile application, students will conduct security, product assuredness, and compatibility checks before launching the application.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CS250 - Software Development Lifecycle (3)
 - 1 of the following:
 - CS260 - Data Structures and Algorithms (3)
 - CS300 - Data Structures and Algorithms: Analysis and Design (3)

Undergraduate

Online Programs

CS370 - Current and Emerging Trends in Computer Science

Description

Students will explore advanced topics in Computer Science through analysis of authentic scenarios. Students will analyze the role of ethics in current trends within the field as well as apply fundamental concepts of the field to solve complex problems in new ways.

Credits

3

Requisites

- Complete:
 - CS255 - System Analysis and Design (3)
 - CS305 - Software Security (3)

Academic Level

Undergraduate

CS405 - Secure Coding

Description

Students will focus on common security vulnerabilities that are found in software. Students will learn techniques and strategies to develop robust and secure code, leveraging secure programming principles. Students will gain authentic experience identifying security vulnerabilities and writing secure code to mitigate risks to software and data.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CS230 - Operating Platforms (3)
 - CS340 - Client/Server Development (3)
 - 1 of the following:
 - CS260 - Data Structures and Algorithms (3)
 - CS300 - Data Structures and Algorithms: Analysis and Design (3)

Academic Level

Undergraduate

Online Programs

CS410 - Software Reverse Engineering

Description

Students will learn the basics of reverse engineering specific to software systems. Learn how reverse engineering is used to recreate missing documentation to support legacy software code. Examine how reverse engineering is used to make new software products, enhance the functionality and efficiency of software components, and recreate the code for applications. Apply fundamental reverse engineering technologies and practices for maintainability and security-related use cases.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CS230 - Operating Platforms (3)
 - 1 of the following:
 - CS260 - Data Structures and Algorithms (3)
 - CS300 - Data Structures and Algorithms: Analysis and Design (3)

Academic Level

Undergraduate

CS465 - Full Stack Development I

Description

Students will design and develop a full stack application through the utilization of programming language frameworks. In creating a full stack application, students will also be responsible for developing a database as well as the code that interfaces their application to the database. This course is the first course in a two-course sequence.

Credits

Online Programs

CS470 - Full Stack Development II

Description

In this course, students will develop a full stack application that runs in the cloud. Through the application of cloud-based development principles and best practices, students will take their software stack from Full Stack Development I and utilize frameworks to build the cloud architecture upon which the software stack application will run. In addition, students will also demonstrate their career-readiness by articulating highly technical content to various audiences and in various formats. This course is the second course in a two-course sequence.

Credits

3

Requisites

- Complete:
 - CS465 - Full Stack Development I (3)

Academic Level

Undergraduate

CS499 - Computer Science Capstone

Description

Taken in the student's final term, the capstone course is the culminating experience for the Bachelor of Science in Computer Science. Integrate previous coursework and practical experience with a focus on authentic demonstration of competencies outlined by the program. Enhance previously submitted programming projects that demonstrates a level of mastery of the stated outcomes of their degree program in computer science.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CS340 - Client/Server Development (3)
 - 111 credit(s).

Graduate

CSR620 - Corporate Governance and Accountability

Description

A proper governance framework is fundamentally important in enhancing the economic performance not only in individual firms but also in promoting welfare in society. Companies need to be accountable to wider stakeholder interests and within the context of corporate social responsibility. The number of stakeholders involved in governance systems is constantly increasing. Government and other regulatory agencies provide the platform through legislation, and boards of directors, auditors, shareholders, accounting professionals, company secretaries and employees all play their individual roles. The goal of this course is to introduce students to a wide range of accountability issues and governance procedures in the context of social contact.

CJ406 - Contemporary Issues in Criminal Justice

Description

Through the analysis of contemporary issues in criminal justice, students will develop an understanding of the need for sworn and civilian criminal justice professionals to be adaptive, flexible, and reflective. Students will explore issues in law, technology, and communication while also examining the importance of wellness within the field of criminal justice.

Credits

3

Requisites

- Complete:
 - CJ112 - Introduction to Criminal Justice (3)
 - SCS285 - Research Literacy in Social Sciences (3)

Academic Level

Undergraduate

CJ407 - Crime Analysis and Solutions

Description

In this course, students will examine the various methodologies used in research to analyze the successes and failures of research based policing strategies. Common tools and technology will be used to determine patterns and trends related to criminal activity.

Credits

3

Requisites

- Complete:
 - CJ347 - Data-Based Policing Strategies (3)

Academic Level

Undergraduate

CJ408 - Business Continuity and Resiliency Planning

Description

In this course, students will explore the necessary knowledge and skills for security professionals to apply when working within an organizational environment post-crisis situation. They will evaluate the failures and successes of various responses in order to continuously optimize future plans. Students will also predict the impacts of crisis situations on business continuity and public safety in order to create a business continuity plan.

Credits

3

Requisites

- Complete:
 - CJ368 - Security Crisis Management (3)

Academic Level

Undergraduate

Online Programs

CJ410 - Cybercrime Investigations

Description

In this course, students will examine the processes, challenges, and legal issues associated with the investigation and prosecution of cybercrime. They will study the specific factors and challenges that differentiate cybercrime and cyber-enabled crime investigations from traditional crime investigations. Students will also develop the skills to appropriately analyze digital evidence and collaborate with various stakeholders in the investigative process, while gaining experience preparing investigative reports for the court system.

Credits

3

Requisites

- Complete:
 - CJ344 - Cybercrime Targets: Organizations (3)
 - CJ345 - Cybercrime Targets: Individuals (3)

Academic Level

Undergraduate

CJ430 - Terrorist Techniques

Description

This course provides the student with the latest and most effective information pertaining to the strategies, tactics and methods used by terrorists. It will discuss and analyze methods of financing used by terrorists, choice of weaponry, and the criteria used for target selection. In addition, the course will cover the most up-to-date and progressive responses to acts of terror as well as preventive measures used by the military and criminal justice professionals.

Credits

3

Requisites

- Complete:
 - JUS305 - International Criminal Justice (3)

Academic Level

Undergraduate

CJ467 - Threat Assessment Fundamentals

Description

This course will introduce the student to the basic aspects of attack prevention, identification and assessment of various threats, intelligence- gathering, protection management and counterterrorism techniques used by the military and criminal justice professionals.

Credits

3

Requisites

- Complete:
 - CJ430 - Terrorist Techniques (3)

Academic Level

Undergraduate

Online Programs

CJ468 - Intelligence, Surveillance, and Reconnaissance

Description

This course covers the processes involved in culling data as it relates to intelligence gathering and the methods of analysis. Students are introduced to the various techniques of analysis, evaluation of sources, and testing the validity of terrorism-related intelligence. In addition, the course will cover the tactics of surveillance, intelligence gathering, and the methods used to thwart illegal activities.

Credits

3

Requisites

- Complete:
 - CJ430 - Terrorist Techniques (3)

Academic Level

Undergraduate

CJ469 - Counterterrorism Techniques

Description

This course will introduce the student to the most effective strategies, techniques and tactics used to combat terrorism. In addition, the course will cover the organization of counterterrorist organizations, task forces and operational entities, the tools of the trade, along with analysis of counterterrorism policies.

Credits

3

Requisites

- Complete:
 - CJ430 - Terrorist Techniques (3)

Academic Level

Undergraduate

CJ480 - Capstone in Criminal Justice

Description

This capstone course is the culminating experience for the B.S. in Criminal Justice program. The aim of the capstone is to assess students' ability to synthesize and integrate the knowledge and skills they have developed throughout their coursework, rather than introducing new concepts. This course is structured to support student success in fulfilling program requirements.

Credits

3

Requisites

- 111 credit(s).

Academic Level

Undergraduate

Online Programs

CJ485 - Problem Solving for Criminal Justice Professionals

Description

Knowledge of criminal justice theory and practice will be applied to develop creative, evidence-informed solutions to identified professional problems. Students will evaluate potential solutions for feasibility before presenting recommendations to various audiences.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CJ406 - Contemporary Issues in Criminal Justice (3)
 - 111 credit(s).

Academic Level

Undergraduate

CJ500 - Critical Issues in the Criminal Justice System

Description

This course offers the Criminal Justice graduate student the opportunity to identify, analyze and discuss the most prevalent issues affecting the delivery of criminal justice and public safety services today. Students will examine the civic responsibilities of criminal justice professionals and the challenges facing our contemporary criminal justice system, while also developing an understanding of the key criminal justice theories.

Credits

3

Academic Level

Graduate

CJ510 - Ethical Leadership in Criminal Justice

Description

This course will emphasize the principles of strategic management, ethical leadership, and community involvement as they apply to a public safety organization within the criminal justice system. The course focuses on the student's development of leadership qualities that address the difficult questions, such as risk management and budgetary constraints, faced by public safety leaders.

Credits

3

Academic Level

Graduate

Online Programs

CJ520 - Criminology and Public Policy

Description

This course focuses on the relationship between prevailing criminological theories and the development and implementation of public policy. Students will learn how to evaluate policy recommendations and their effect on a range of public safety organizations.

Credits

3

Requisites

- Complete:
 - CJ500 - Critical Issues in the Criminal Justice System (3)

Academic Level

Graduate

CJ530 - Global Terrorism

Description

Explore how geopolitics and terrorist attacks influence the world today. Examine historical events and the impact on foreign and domestic policy. Students dispel misconceptions and create a new evidence-based response to address global terrorism.

Credits

3

Academic Level

Graduate

CJ550 - Assessing Organizational Performance

Description

Explore the techniques and methods used to evaluate the performance of a criminal justice organization by examining a real-world scenario. Students assess an organization to identify factors impacting the overall performance including its mission, goals, structure, policies, and processes. Students use applicable methods and data to determine effective resource and communication strategies for continuous improvement within criminal justice organizations.

Credits

3

Academic Level

Graduate

CJ560 - Courts and Judicial Process

Description

Explore the different roles of criminal justice professionals in navigating critical issues and challenges in the judicial process from the initial crime through the appeals phases. Students compare the procedural impact of local, state, and federal court systems through the examination of controversial court cases and inequalities within the judicial process.

Credits

3

Academic Level

Graduate

Online Programs

CJ650 - Public Safety Administration

Description

This course examines the key functions and responsibilities of a public safety administrator, including management of organizational structure, strategic decision-making, fiscal responsibility, and coordinated public safety approaches to address fiscal, political, and social challenges. Students examine fiscal management, the problems of governmental funding, service and equipment cutbacks, cost comparison, and accessibility of federal grants. Additionally, the course reinforces ethical foundations in public safety, critical thinking and analysis, and innovative solutions to contemporary public safety problems. Students also explore administrative opportunities within public safety, and career paths to reach these positions.

Credits

3

Requisites

- Complete:
 - OL600 - Strategic Human Resource Management (3)
 - PAD630 - Foundations of Public Administration (3)
 - PAD631 - Strategic Management in Public Service (3)

Academic Level

Graduate

CJ675 - Data-Driven Decision-Making in Criminal Justice

Description

This course promotes the value of using both quantitative and qualitative research methods in leadership, planning and decision-making. Students learn how to forge data-driven strategies for effective criminal justice problem-solving.

Credits

3

Academic Level

Graduate

CJ681 - Terrorist Techniques and Counterterrorism

Description

Deconstruct biases and mindsets about terrorism. Explore modern international and domestic counterterrorism as techniques to mitigate actions by terrorist organizations and extremists. Students gain a comprehensive view of the motivation and nature behind terrorism.

Credits

3

Requisites

- Complete:
 - CJ530 - Global Terrorism (3)

Academic Level

Graduate

Online Programs

CJ682 - Threat Assessment

Description

Analyze international and domestic terrorist threats utilizing threat assessment techniques. Examine viable responses and communication strategies identified from a critical assessment. Using these responses and strategies, scrutinize intelligence to create a viable solution to mitigate a terrorist threat.

Credits

3

Requisites

- Complete:
 - CJ530 - Global Terrorism (3)

Academic Level

Graduate

CJ683 - Intelligence Collection and Analysis

Description

Examine and interpret intelligence gathered using industry standard practices. Apply structured analytic techniques to review data and information for the purpose of synthesizing and communicating findings to a variety of audiences. Students acquire the know-how in applying the right technique(s) to produce the type of information needed to take action in addressing terrorism related problems.

Credits

3

Requisites

- Complete:
 - CJ530 - Global Terrorism (3)

Academic Level

Graduate

CJ790 - Criminal Justice Capstone

Description

This capstone course is the culminating experience for the M.S. in Criminal Justice program. The aim of the capstone is to assess students' ability to synthesize and integrate the knowledge and skills they have developed throughout their coursework, rather than introducing new concepts. This course is structured to support student success in fulfilling program requirements.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CJ550 - Assessing Organizational Performance (3)
 - CJ675 - Data-Driven Decision-Making in Criminal Justice (3)
 - 30 credit(s).

Academic Level

Graduate

Online Programs

CUS110 - Customer Service Fundamentals

Description

Develop professional plans for advancing customer service skills. Analyze customer service interactions using various models of communication. Create customer-facing messages that take into consideration culturally and socially diverse customers. This course is currently available for direct assessment programs only.

Additional Information

The goal name associated with this course is Connect with Customers

Credits

3

Academic Level

Undergraduate

CUS210 - Sales and Customer Service

Description

Utilize effective selling techniques in relation to the consumer decision-making process. Employ accepted customer service problem-solving techniques in responding to challenging customer behaviors. Describe the functions of customer service departments and their significance within organizations. This course is currently available for direct assessment programs only.

Additional Information

The goal name associated with this course is Analyze the Customer Experience

Credits

3

Academic Level

Undergraduate

CUS230 - Customer Service and Branding

Description

Employ techniques that nurture customer relationships across the customer lifecycle. Differentiate between and address legal, ethical, and regulatory issues in customer service. Align customer communications with an organization's brand and mission. This course is currently available for direct assessment programs only.

Additional Information

The goal name associated with this course is Represent the Brand

Credits

3

Academic Level

Undergraduate

Cybersecurity

Online Programs

CYB200 - Cybersecurity Foundations

Description

Gain familiarity with foundational cybersecurity concepts and terms. Learn the difference between adversarial and environmental threats and analyze how security practitioners respond to each. Explore legal and human factors and examine how they influence the development of organizational security strategies.

Credits

3

Academic Level

Undergraduate

CYB210 - Computer Networking

Description

Learn the basics of computer networking. Examine different network architectures and approaches to network design. Gain practical experience by performing common network implementation and administration tasks.

Credits

3

Requisites

- 1 of the following:
 - IT212 - Introduction to Computer Networks (3)
 - IT340 - Network and Telecommunication Management (3)

Academic Level

Undergraduate

CYB220 - Network Security

Description

Learn about common network-based attacks and how to defeat them. Explore the use of intrusion detection/prevention technologies and information flow controls to protect networked systems. Analyze security concerns related to virtual systems and networks.

Credits

3

Requisites

- Complete:
 - CYB200 - Cybersecurity Foundations (3)
 - CYB210 - Computer Networking (3)

Academic Level

Undergraduate

Online Programs

CYB230 - Operating System Security

Description

Learn the techniques and strategies used to protect modern operating systems. Employ best practices to securely provision operating system components and services. Troubleshoot insecure settings to reduce the risk of system compromise.

Credits

3

Requisites

- 1 of the following:
 - IT202 - Computer Operating Systems (3)
 - IT255 - Introduction to the Linux Operating System (3)

Academic Level

Undergraduate

CYB240 - Application Security

Description

Explore the fundamental principles and practices of application security. Identify common software vulnerabilities and develop strategies to reduce their potential impact. Analyze and assess the security posture of multi-tiered web applications.

Credits

3

Requisites

- Complete:
 - IT145 - Foundation in Application Development (3)
 - CYB200 - Cybersecurity Foundations (3)
 - CYB210 - Computer Networking (3)

Academic Level

Undergraduate

CYB250 - Cyber Defense

Description

Explore common strategies and tactics employed by security practitioners to protect networks, systems, applications, and data. Learn the principles of cryptography and examine the critical role it plays in protecting information assets. Analyze the impact of emerging technologies and evolving social trends on the field of cybersecurity.

Credits

3

Requisites

- Complete:
 - CYB200 - Cybersecurity Foundations (3)

Academic Level

Undergraduate

Online Programs

CYB260 - Legal and Human Factors of Cybersecurity

Description

Examine security concerns associated with humans and their interactions with information systems. Learn about social engineering and how to combat human-focused cyber attacks. Examine the legal and ethical aspects of individual privacy, acceptable use, and other social concerns.

Credits

3

Requisites

- Complete:
 - CYB200 - Cybersecurity Foundations (3)

Academic Level

Undergraduate

CYB300 - System and Communication Security

Description

Build upon basic operating system security by securing communication between networked systems. Implement transport layer security (TLS) and a public key infrastructure (PKI). Use a scripting language to automate security-relevant tasks and verify compliance with organizational security standards.

Credits

3

Requisites

- Complete:
 - CYB200 - Cybersecurity Foundations (3)
 - CYB230 - Operating System Security (3)

Academic Level

Undergraduate

CYB310 - Network Defense

Description

Deploy technologies to detect and defeat network-based attacks. Use common tools to operate at different layers of the network stack, implement information flow controls, and develop reliable methods to identify malicious network traffic.

Credits

3

Requisites

- Complete:
 - CYB220 - Network Security (3)
 - CYB250 - Cyber Defense (3)

Academic Level

Undergraduate

Online Programs

CYB320 - Incident Response and Investigation

Description

Explore incident analysis and response techniques within the context of an enterprise. Learn basic digital forensic terminology and how incident response activities inform and augment digital investigations.

Credits

3

Requisites

- Complete:
 - CYB300 - System and Communication Security (3)
 - CYB310 - Network Defense (3)

Academic Level

Undergraduate

CYB400 - Security Assessment and Auditing

Description

Learn how to assess and audit information systems using structured approaches. Discover compliance gaps, identify security vulnerabilities, and recommend corrective actions. Learn how to effectively communicate findings and recommendations to organizational stakeholders.

Credits

3

Requisites

- Complete:
 - CYB220 - Network Security (3)
 - CYB260 - Legal and Human Factors of Cybersecurity (3)
 - CYB300 - System and Communication Security (3)

Academic Level

Undergraduate

CYB410 - Security Risk Management

Description

Apply the principles of risk management to solve real-world security problems. Learn how risk management influences organizational security programs. Explore how the concepts of threat, impact, relevance, and likelihood are woven together to develop balanced, effective security controls.

Credits

3

Requisites

- Complete:
 - CYB250 - Cyber Defense (3)

Academic Level

Undergraduate

Online Programs

CYB420 - Enterprise Security

Description

Create and implement a comprehensive plan to protect an organization's assets from relevant adversarial and environmental threats. Employ basic project management methods to achieve milestones, align resources, and foster collaboration with stakeholders.

Credits

3

Requisites

- Complete:
 - CYB310 - Network Defense (3)
 - CYB400 - Security Assessment and Auditing (3)
 - CYB410 - Security Risk Management (3)

Academic Level

Undergraduate

Data Analytics

DAT205 - Role of Data Analysis in Organizations

Description

Students will analyze the role of data analysis and data analysts within organizations. Students will also gain an understanding of the various areas of data analysis as well as the industries in which it is used, and explore the types of professional roles that exist in the world of data.

Credits

3

Academic Level

Undergraduate

DAT210 - Foundation of Data Analytics

Description

The emergence of new data sources is transforming the role of the data analyst from one who simply reports information to one who is charged with making sense of the available data and distilling from it the salient aspects for the given audience. In this course, students will examine the concepts of data analysis and how it informs the business process. Emphasis will be placed on the development of sound research questions, the identification and verification of data sources, the retrieval, cleaning, and manipulation of data, and the process for identifying the data elements that are relevant for a given audience. An overview of the regulatory organizations that govern the release of data will also be reviewed.

Credits

3

Academic Level

Undergraduate

Online Programs

DAT220 - Fundamentals of Data Mining

Description

A large portion of data analytics focuses on identifying meaningful patterns in data. Using a case studies approach, students will examine effective strategies that blend both hypothesis testing and data-driven discovery methods to identify meaningful data patterns and apply that knowledge to common business problems. Emphasis will be placed on data-mining tasks such as classification, clustering, and sequential pattern discovery.

Credits

3

Requisites

- 1 of the following:
 - DAD215 - Introduction to Statistical Analysis System (3)
 - DAD220 - Introduction to Structured Database Environments (3)
 - DAD334 - Oracle SQL Fundamentals (3)

Academic Level

Undergraduate

DAT223 - Gathering Requirements and Collecting Data

Description

Students will examine methods for diagnosing organizational problems in order to determine the data requirements to solve them. In addition, students will learn how to gather data and supporting documentation necessary for effective data analysis.

Credits

3

Requisites

- Complete:
 - DAD220 - Introduction to Structured Database Environments (3)

Academic Level

Undergraduate

DAT250 - Data Policy and Decision Making

Description

Students will explore the emergence of data governance at both the legal/regulatory and organizational policy levels, with a focus on its implications for data analytics. Students will also learn how data analysts can act ethically when confronted with data privacy and security concerns.

Credits

3

Academic Level

Undergraduate

Online Programs

DAT260 - Emerging Technologies and Big Data

Description

Students will explore contemporary systems and technologies impacting the field of data analytics, including the cloud, AI, and machine learning. Students will also gain exposure to areas of technology that provide opportunities for future professional specialization, such as emerging Big Data technologies that can support the work of data analysts.

Credits

3

Requisites

- Complete:
 - DAD220 - Introduction to Structured Database Environments (3)

Academic Level

Undergraduate

DAT300 - Data Validation: Getting the Right Data

Description

Students will learn to both assess whether data on hand can be used to address real world challenges faced by organizations as well as to determine additional data that may be needed. Students will also explore how to find such data and practice the kinds of communication and collaboration skills that are necessary to obtain it.

Additional Information

The goal name associated with this course is Data Validation: Getting the Right Data

Credits

3

Academic Level

Undergraduate

DAT310 - Data Analytics I

Description

Learn how to apply a comprehensive approach to data analytics in the solving of business problems by building upon the principles set forth in DAT 210. Evaluate the tools and resources available in terms of their appropriateness to complex business scenarios. Explore the collaborative nature of data analytics projects and the necessity for coordination across projects through conducting an initial data analytics project and creating a collaborative report of findings.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:
 - DAT210 - Foundation of Data Analytics (3)
 - 1 of the following:
 - DAD215 - Introduction to Statistical Analysis System (3)
 - DAD220 - Introduction to Structured Database Environments (3)
 - DAD334 - Oracle SQL Fundamentals (3)

Academic Level

Undergraduate

Online Programs

DAT320 - Data Analytics II

Description

Building upon the principles set forth in prior coursework, students will engage in a comprehensive approach to the application of data analytics in the solving of business problems employing the techniques frequently used in the discipline. Emphasis will be placed on the different types of forecasting techniques such as sales, risk, retention, and attrition as applied to a variety of industries.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:
 - DAD215 - Introduction to Statistical Analysis System (3)
 - DAD220 - Introduction to Structured Database Environments (3)
 - Complete:
 - DAT210 - Foundation of Data Analytics (3)
 - DAT310 - Data Analytics I (3)

Academic Level

Undergraduate

DAT325 - Data Validation: Quality and Cleaning

Description

Students will gain an understanding of the importance of ensuring high data quality prior to performing analysis on data. Students will also learn how to assess industry standard dimensions of data quality and how to clean problematic data without reducing data integrity.

Additional Information

The goal name associated with this course is Data Validation: Quality and Cleaning

Credits

3

Requisites

- Complete:
 - DAD220 - Introduction to Structured Database Environments (3)

Academic Level

Undergraduate

DAT375 - Data Analysis Techniques

Description

Students will apply common methods that data analysts use to perform data analysis. Students will also use critical tools and technology to draw conclusions from the analysis that are relevant to organizational challenges.

Credits

3

Requisites

- Complete:
 - MAT303 - Applied Statistics II for Science, Technology, Engineering, and Mathematics (STEM) (3)
 - DAD220 - Introduction to Structured Database Environments (3)

Academic Level

Undergraduate

Online Programs

DAT410 - Decision Support Presentation

Description

In order for data analytics to be effective, reports and findings must be presented in a manner that is relevant to one's audience. In this course students will hone their technical writing and presentation skills to engage individuals at all levels throughout an organization. Ethics, security, and privacy considerations as they relate to reporting will also be discussed.

Credits

3

Requisites

- Complete:
 - DAT210 - Foundation of Data Analytics (3)
 - DAT310 - Data Analytics I (3)
 - DAT320 - Data Analytics II (3)

Academic Level

Undergraduate

DAT430 - Leveraging Data Analysis for Organizational Results

Description

Students will learn how data analysis can be leveraged for the advancement of organizational initiatives through effective collaboration with organizational stakeholders. Students will also explore data visualization tools and techniques that help data analysts communicate the results of their work in ways that make those results actionable.

Credits

3

Requisites

- Complete:
 - DAT375 - Data Analysis Techniques (3)

Academic Level

Undergraduate

DAT475 - Applied Data Analysis

Description

Students will discover how data analysis is applied in organizational scenarios to gain insight from even imperfect data. Students will also explore more advanced data analytics methods such as collaborating on hypothesis testing and performing root cause analysis, and they will practice presenting visualizations of data analysis that highlight the insights gained from analysis.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - DAT430 - Leveraging Data Analysis for Organizational Results (3)
 - 90 credit(s).

Academic Level

Undergraduate

Online Programs

DAT490 - Capstone in Data Analytics

Description

This capstone course is the culminating experience for the B.S. in Data Analytics program. The aim of the capstone is to assess students' ability to synthesize and integrate the knowledge and skills they have developed throughout their coursework, rather than introducing new concepts. This course is structured to support student success in fulfilling program requirements.

Credits

3

Requisites

- Complete all of the following
 - 111 credit(s).
 - Complete:
 - DAT410 - Decision Support Presentation (3)

Academic Level

Undergraduate

DAT500 - Data and Information Management

Description

Master key foundational concepts and tools in data and information management. Learn data analysis skills required for data assessment and data validation for creating data structures and data analysis reports. Gain exposure to common data and information management technologies that provide decision support capabilities to organizations.

Credits

3

Academic Level

Graduate

DAT501 - Foundations in Data Science

Description

In this course, students will learn about the foundational data, database, and scripting skills necessary for data science. Students will gain exposure to both database management and scripting languages, and will learn to develop code that adheres to industry-standard best practices. Additionally, students will leverage their skills in these languages to develop both structured and unstructured database environments, as well as a fully-functional program.

Credits

3

Academic Level

Graduate

Online Programs

DAT510 - Foundations of Data

Description

We live in a world where substantial amounts of data are available at the touch of a button. While this may be a very empowering prospect, it can also be overwhelming. In this course, students will examine the status of Big Data and its impact on the business world, framing analytics challenges using a structured life cycle approach to data analytics problems. Emphasis will be placed upon the verification of data, analytic techniques and open source tools for analyzing data, the role of regulatory organizations, and the privacy and ethics issues that surround its use.

Credits

3

Academic Level

Graduate

DAT515 - Enterprise Data Management

Description

Understanding the complexity of current data management systems and the ever evolving technology necessary to leverage such data is essential in making sound data-driven decisions. In this course, students will examine the issues in managing data and information from an enterprise perspective, and explore data management as an essential resource to organizational success through a deeper understanding of the concepts and techniques for managing the design, development, and maintenance of all the components of enterprise information management. The course will examine the roles and responsibilities of the various professionals that manage data and information in an organization.

Credits

3

Requisites

- Complete:
 - DAT510 - Foundations of Data (3)

Academic Level

Graduate

DAT520 - Decision Methods and Modeling

Description

The role of many analysts is as much about interpreting the results of data analysis as it is about gathering the data and "crunching the numbers." In this course, students will learn how to evaluate data in context, interpret data trends, and receive an overview of decision support management techniques such as predictive modeling, risk assessment and optimization, and analytics algorithms, which will set the stage for more advanced study in subsequent courses. Concepts from enterprise data management, including data warehousing and business intelligence, will provide a foundation for examining the topics of data mining, advanced and dimensional data modeling, and decision support system development as techniques for an organization's competitive advantage.

Credits

3

Requisites

- Complete:
 - DAT510 - Foundations of Data (3)

Academic Level

Graduate

Online Programs

DAT530 - Presentation and Visualization of Data

Description

In addition to the gathering and interpretation of data, today's business environment calls upon the analyst to communicate the results of data analysis to a variety of audiences. In this course students will learn how to synthesize the technical components of data analysis into reports, presentations, and visual dashboards that are meaningful for the intended audience and deliver those components in a coherent, convincing format.

Credits

3

Requisites

- Complete:
 - DAT510 - Foundations of Data (3)

Academic Level

Graduate

DAT540 - High Performance Teams in Data Science

Description

In this course, students will learn about the dynamics and processes of a high-performance data science team while working with people who have a variety of expertise, experience, perspectives, and backgrounds. They will develop an understanding of the challenges involved in the integration of the data science team alongside other internal and external organizational areas, and apply that knowledge in the implementation of a team working structure that will serve to support organizational problem-solving and decision-making. Additionally, students will learn how to improve communications and manage conflict on diverse teams, where all members are working on a common goal.

Credits

3

Academic Level

Graduate

DAT610 - Optimization and Risk Assessment

Description

In the competitive business world, using data to its best advantage becomes all the more crucial. In this course, students will learn how to discern the levels of relevancy of data and the impact it has on operations as well as hone their ability to identify macro and micro level risk and evaluate risk management programs, policies, and strategies.

Credits

3

Requisites

- Complete:
 - DAT520 - Decision Methods and Modeling (3)

Academic Level

Graduate

Online Programs

DAT640 - Predictive Analytics

Description

Building on prior coursework in decision methods and modeling, students will get a deeper understanding of the art and science of predictive analysis. Students will examine the elements that contribute to building reliable predictive models that result in actionable performance predictions such as identifying the variables that have the most predictive power and developing and deploying predictive models currently in use.

Credits

3

Requisites

- Complete:
 - DAT510 - Foundations of Data (3)
 - DAT520 - Decision Methods and Modeling (3)

Academic Level

Graduate

DAT645 - Data Ethics, Issues and Legal Considerations

Description

In this course, students will gain an overview of legal and ethical issues surrounding data science. Students will gain exposure to the various rules, regulations, and policies that impact the usage of data. Additionally, students will analyze data, data sources, and algorithms to determine potential legal and ethical issues that must be considered and mitigated as data scientists work through the data analytics lifecycle.

Credits

3

Academic Level

Graduate

DAT650 - Advanced Data Analytics

Description

This course will emphasize the employment of advanced analytic strategies over the entire life cycle of the data analysis process. Using a comprehensive case-studies approach, students will logically extend and add definition to their existing analytic skill set, resulting in the development of a project proposal that will serve as preparation for the capstone experience.

Credits

3

Requisites

- Complete:
 - DAT510 - Foundations of Data (3)
 - DAT520 - Decision Methods and Modeling (3)
 - DAT640 - Predictive Analytics (3)

Academic Level

Graduate

Online Programs

DAT690 - Capstone in Data Analytics

Description

This capstone course is the culminating experience for the M.S. in Data Analytics program. The aim of the capstone is to assess students' ability to synthesize and integrate the knowledge and skills they have developed throughout their coursework, rather than introducing new concepts. This course is structured to support student success in fulfilling program requirements.

Credits

3

Requisites

- Complete all of the following
 - 30 credit(s).
 - Complete:
 - DAT650 - Advanced Data Analytics (3)

Academic Level

Graduate

Database Administration

DAD215 - Introduction to Statistical Analysis System

Description

The SAS programming suite of products is commonly used throughout the industry for analyzing the vast amount of data that are available today and for turning that data into actionable items for an organization. Through the creation of SAS programs of varying complexity, students will solve common data analysis problems and learn the general programming conventions of SAS along with the data management and reporting utilities of the basic SAS product.

Credits

3

Requisites

- 1 of the following:
 - IT140 - Introduction to Scripting (3)
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

DAD220 - Introduction to Structured Database Environments

Description

Students will learn to create structured database environments that incorporate basic processing functionality and allow for data management, data manipulation, and data analysis. Students will also construct and analyze queries to address data requirements.

Additional Information

The goal name associated with this course is Introduction to Structured Database Environments.

Credits

3

Academic Level

Undergraduate

Online Programs

DAD334 - Oracle SQL Fundamentals

Description

Learn to retrieve, restrict, sort, report, and display data using SQL statements within an Oracle database environment. In addition, obtain experience writing sub-queries, manipulating data, creating and managing tables, and working with schema objects. Gain practical hands-on experience in a functional Oracle database environment.

Credits

3

Requisites

- 1 of the following:
 - IT140 - Introduction to Scripting (3)
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

DAD350 - Oracle Database Administration I

Description

This is the first course in a two part series. This course covers Oracle Database Administration Part I. Students will use Oracle to prepare a database environment, create, manage and administer database and user security. Students will also learn how to manage data, concurrencies, undo data, and implement database security. Topics will include database maintenance, performance management, recovery, and backup.

Credits

3

Requisites

- 1 of the following:
 - DAD220 - Introduction to Structured Database Environments (3)
 - DAD334 - Oracle SQL Fundamentals (3)

Academic Level

Undergraduate

DAD405 - Oracle Database Administration II

Description

This is the second of a two part series. This course covers Oracle Database Administration Part II. Students will use Oracle to design database architectures and automatic storage management solutions. Students will learn how to configure a database for recoverability, to meet backup specifications, and to perform user-managed backup and recovery. Additionally, students will use Oracles Recovery Manager (RMAN) for performing for multiple database administration tasks.

Credits

Economics

ECO201 - Microeconomics

Description

This course examines the role of economic systems in allocating scarce resources to satisfy the needs and wants of individual members of a society. After a brief exposure to alternative economic systems, the focus becomes the nature and performance of American capitalism. Primary emphasis is placed upon the development of models that explain the behavior of consumers, producers and resource suppliers in various market structures.

Additional Information

The goal name associated with this course is Microeconomics

Credits

3

Academic Level

Undergraduate

ECO202 - Macroeconomics

Description

This course explores the manner in which the overall levels of output, income, employment and prices are determined in a capitalist economy. The focus is on the forces that act to shape these factors and determine their fluctuations. The role of government fiscal and monetary policy in influencing the level of economic activity is also a major area of study. The impact of international transactions on the domestic economy also is discussed.

Additional Information

The goal name associated with this course is Macroeconomics

Credits

3

Academic Level

Undergraduate

Online Programs

ECO301 - Managerial Economics

Description

This course applies economic theory and quantitative techniques to solving business decision problems. The principal economic framework is that of microeconomics and covers such topics as demand, production, cost and market structures. Regression and linear programming are the main quantitative tools developed in the course. Computer applications are a required part of the course.

Credits

3

Requisites

- Complete:
 - ACC202 - Managerial Accounting (3)
 - ECO201 - Microeconomics (3)
 - ECO202 - Macroeconomics (3)
 - MAT240 - Applied Statistics (3)

Academic Level

Undergraduate

ECO306 - Money and Banking

Description

This course covers three broad areas. The first is the banking industry's regulations and internal operations. The second area focuses on the banking industry's role in the national economy, including monetary policy and its macroeconomic effect on prices, employment and growth. International banking is the third area covered and includes an overview of institutional arrangements and the effects of international banking on the world economy. Writing intensive course.

Credits

3

Requisites

- Complete:
 - ECO201 - Microeconomics (3)
 - ECO202 - Macroeconomics (3)

Academic Level

Undergraduate

ECO322 - International Economics

Description

International Economics develops and explores alternative explanations for the determinants of international trade and financial flows. Emphasis is placed on analyzing the cause and effect of such international phenomena as trade patterns, factor mobility, direct and portfolio investment, multinational corporations, balance of payments disequilibria, and government trade and exchange controls. The course highlights the interdependence of nation-states in the world economy and the development of national policies that are designed to alter or control the pattern of international trade and investment.

Credits

ECO327 - Economic Development

Description

Economic explanations for development and underdevelopment are studied in this course. The course focuses on the problems that less-developed countries face and on alternative approaches to addressing these problems.

Credits

3

Requisites

- Complete:
 - ECO201 - Microeconomics (3)
 - ECO202 - Macroeconomics (3)

Academic Level

Undergraduate

ECO330 - Public Finance

Description

This course examines the economic rationale for government provision of goods and services in a market system. Efficiency criteria for evaluating government programs, tax policy and the current U.S. tax structure also are studied.

Additional Information

Offered every fall term.

Credits

3

Requisites

- Complete:
 - ECO201 - Microeconomics (3)
 - ECO202 - Macroeconomics (3)

Academic Level

Undergraduate

ECO402 - Intermediate Macroeconometrics

Description

This course develops models of short-to-medium-run fluctuations in overall economic activity as well as long-run models of economic growth of a nation. The former category of models includes the Keynesian, New Classical, and New Keynesian frameworks. Particular emphasis will be placed on the New Keynesian model. Empirical testing of the models using computer software will involve the statistical analysis of macroeconomic data. The primary econometric tools for analyzing this data will be regression and its extensions and modern time series analysis. Long-run models of economic growth including the Solow model and the Romer model will also be examined.

Credits

ECO505 - Introduction to Graduate Economics

Description

This course serves as an introduction to economics at the graduate level. Exploration of the major schools of thought in economics as well as a historical approach to economics will introduce students to graduate level studies in economics. The historical review of economic theory will provide the basis for economic research. The course will explore economic agents and their interaction with the markets. An interdisciplinary approach will be used for this course in order to show the effects of economic thought and analysis through different areas.

Credits

3

Academic Level

Graduate

ECO510 - Mathematics and Statistics for Economics

Description

This course will explore the more advanced areas of statistics and math, with a focus on economics and the methods that are mostly used in the applied economics field. The course will build on the mathematics and statistics background that the students have explored in previous courses. Advance regressions methods will be used, and a number of tools will be used for calculation. This course prepares the students in the Applied Economics degree for the advanced courses in econometrics.

Credits

3

Requisites

- Complete:
 - MBA501 - Mathematics and Statistics for Business (3)
 - MBA502 - Economics for Business (3)

Graduate

Online Programs

ECO520 - Microeconomics Theory and Analysis

Description

This course serves as a graduate-level introduction to advanced microeconomic theories and the application of these theories. The course will look at irrational versus rational decision making, market structure, market failure, resource markets, and other microeconomic principles. Modern theory of consumer behavior and theory of the firm will be discussed, along with optimization models for achieving and analyzing productive, allocative, and distributive efficiency.

Credits

3

Requisites

- Complete:
 - ECO510 - Mathematics and Statistics for Economics (3)

Academic Level

Graduate

ECO530 - Macroeconomics Theory and Analysis

Description

This course serves as a preparation for graduate economic research. The course will explore the three major schools of thought and will lay the groundwork for macroeconomic research. Through examples of static macroeconomic models and theoretical analysis, students will be introduced to macroeconomic research. The economics of growth will be given particular focus.

Credits

3

Requisites

- Complete:
 - ECO510 - Mathematics and Statistics for Economics (3)

Academic Level

Graduate

ECO540 - Game Theory and Industrial Organization

Description

This course serves as an exploration of game theory and its applications in economic analysis. Various models of static and dynamic games are explored, along with the applications of game theory in negotiations, voting, conflict resolution, and pricing decisions. The course also reviews industrial organization theory, exploring the interaction between the firm and the market, and the linkage between market structure, firm conduct, and economic performance. The ideas of market power and its regulation through government policy, and the firm's price and non-price strategic behaviors will be discussed.

Credits

 - ECO520 - Microeconomics Theory and Analysis (3)

Academic Level

Graduate

Online Programs

ECO605 - Environmental and Natural Resource Economics

Description

This course serves as an introduction to the natural resource economics area. The course will look at the global aspect of environmental and natural resource economics, and will explore topics like efficient use of resources, allocation of resources, population growth, green economics, global trade effects, and global climate change.

Credits

3

Academic Level

Graduate

ECO610 - Fiscal & Monetary Policies & Practices

Description

Students in this course examine the performance of the national economy and its impact on a firm. Students analyze the formulation and impact of monetary and fiscal policies and their relationships with money and capital markets. Background preparation: 6 credit hours in economics.

Credits

3

Requisites

- 1 of the following:
 - MBA502 - Economics for Business (3)
 - QSO510 - Quantitative Analysis for Decision Making (3)

Academic Level

Graduate

ECO620 - Applied Econometrics I

Description

This course looks at common econometric models, with a focus on regression models. Through empirical work and analysis, the students will extend their understanding of econometric theory. The course will provide an understanding of the relationship between economic variables that can be used for statistical estimation. The students will learn how to use observational data and how to construct econometric models and methods.

Credits

3

EDU500 - Foundations in Online Instruction

Description

Educators will learn how to critically examine research to inform their online teaching practice. Special attention will be spent on evaluating how education theory, teaching principles, and laws and policies impact instructional practice and development of learning environments.

Credits

3

Requisites

- Advisor Registration Required

Academic Level

Graduate

EDU501 - Methods of Teaching Reading

Description

This course is an overview of reading and writing processes. The course addresses current trends for teaching literacy including basal programs, whole language, language experience, thematic teaching, literature-based instruction, and technology-based instruction. Students will learn about the components of balanced literacy instruction that includes word attack, word identification, vocabulary development, fluency, comprehension and writing.

Credits

3

Academic Level

Graduate

EDU506 - Teaching English Learners

Description

In this course students will study the history, pedagogy and techniques for specific ESL/EFL methods and approaches used to teach in culturally diverse classrooms. The course intends to equip mainstream classroom teachers with background, introduction and understanding necessary to teach EL students. The course will include clarification of issues such as the differences between bilingual instruction and teaching English Learners in the classroom. The course will enable teachers to learn how to modify content and scaffold learning for ELs.

Online Programs

EDU520 - The Educator Researcher

Description

This course provides an introduction to methods of educational research. These methods encourage educators to be action researchers in their own classrooms, school districts, and/or communities to improve teaching and learning practice. Students will become familiar with purposeful quantitative and qualitative research designs to develop an increased understanding of the issues, both theoretical and practical, arising through the research process. An emphasis will be placed on understanding, interpreting, and critiquing educational research and developing research proposals.

Credits

3

Academic Level

Graduate

EDU530 - Evidence-Based Research for Education

Description

Learn about the various types and methods of educational research. Examine the value of education focused action research in a variety of learning environments. Develop foundational knowledge and skills to read, interpret, and use data to enable professional growth and improve student learning experience.

Credits

3

Academic Level

Graduate

EDU537 - Social Studies/Arts for Young Children

Description

This course will explore the concepts, methods, techniques, and material necessary to effectively teach social studies and fine arts in early childhood. Using national and state standards and frameworks, students will develop learning experiences that meet curriculum objectives in both social studies and the fine arts. Strategies for integrating social studies and fine arts across all curriculum areas will be addressed.

Credits

3

Academic Level

Graduate

EDU545 - Leadership in Teaching and Learning

Description

Explore educational leadership concepts by focusing on the characteristics and best practices needed to define and increase success in learning. Employ multiple measures to resolve learning challenges utilizing effective communication and collaboration in ways that empower oneself and others to enhance one's role as an educational leader. Learn about legal, ethical, and professional issues existing in today's educational environments that impact effective leadership.

Credits

3

Academic Level

Graduate

Online Programs

EDU550 - Educational Assessment

Description

This course builds assessment competency by analyzing recent trends in assessment for evaluating and documenting student performance and progress toward desired outcomes. Students examine the uses of assessment at the individual, class and school levels; including New England Common Assessment Data. Students will select and design assessments suitable for instructional decisions that support planning developing curriculum, and making recommendations for instructional improvement. Students will interpret and communicate the results of both externally produced and teacher-produced assessment for a variety of audiences. Students will describe valid grading procedures and discuss ethical issues linked to assessment methods and uses of assessment information.

Credits

3

Academic Level

Graduate

EDU570 - Curriculum Design 1: Foundations in Curriculum Design

Description

Explore the foundations of curriculum design theories and principles used in various learning environments. Apply Understanding by Design (UbD), Differentiated Instruction (DI), and the standards of Universal Design for Learning (UDL), for designing and developing a functional and effective curriculum that matches all students' learning needs.

EDU760 - School Facilities and Finance

Description

This course offers a study of the management and operation of a school facility and an understanding of school finance as it relates to the teaching and learning process. Students will learn how to engage school board members in a discussion about how school finance and facility relate to student achievement. Students will examine various tools and methodologies that support the school process and how to connect with community members in the budget building process. This course aims to make students better managers and consumers of financial information rather than budget officers; students will better understand the real-world implications and consequences of their decisions and allocations.

Credits

3

Academic Level

Graduate

EDU765 - School and Community Relations

Description

This course explores relationships with the broader community to foster learning. Students learn how to engage stakeholders, create and communicate a school vision of learning, develop community collaboration skills, capitalize on the diversity of the school community and use the cultural context of the larger community to develop activities and policies that benefit students and their families. This course makes use of individualized programs of study and experience.

Credits

3

Academic Level

Graduate

EDU770 - Certification Internship

Description

This is the capstone course for candidates seeking initial licensure or those certified teachers seeking an additional endorsement. Students complete a full-time, competency-based internship at a site appropriate to the area of certification being sought. During this internship, the student is mentored by like-credentialed site personnel as well as by a member of the Southern New Hampshire University faculty. To be eligible for this course, candidates must have previously completed a minimum of six institutional credits at Southern New Hampshire University.

Credits

1 - 9

Academic Level

Graduate

EDU775 - Practicum in Curriculum and Instruction

Description

Students are required to develop and implement two products and/or experiences and document a leadership role in the area of curriculum. Students complete a detailed proposal or plan of study on their goals, product(s), audience, follow-up, etc. for this practicum. The purpose of this practicum is to encourage the teacher as researcher and leader in curriculum development and encourage the integration and application of course work. The practicum is completed during the semester under the supervision of a school district administrator and the student's advisor.

Credits

1 - 3

Academic Level

Graduate

Online Programs

EDU780 - School Organizational Leadership

Description

The course explores the dynamics of transformational leadership that looks beyond traditional school environments and welcomes non-traditional thinking. Students will consider themselves "architects" of the teaching and learning environments within their schools wherein there is a culture of continuous improvement. Future school leaders will: explore technology that supports teachers and administrators decision-making; learn how to develop policies and practices that support learning; explore how extended learning time can advantage underachieving students; investigate the benefits and challenges of risk taking and transparency; and look at models of professional learning communities.

Credits

ENG120 - College Composition I

Description

ENG 120 is a college-level writing course that introduces students to various forms of academic discourse. Students are required to prepare essays in a variety of rhetorical modes, including exposition, description and argumentation. In addition to out-of-class writing assignments, students will be required to compose in-class essays in response to readings and other prompts. ENG 120 introduces students to process-writing techniques, library research and MLA documentation procedures. The primary focus of ENG 120 is to help students acquire the writing skills they need to succeed in an academic environment. Enrollment is kept intentionally small, typically 15 students per section, to assure maximum benefit.

Undergraduate

ENG122 - English Composition I

Description

English 122 is a college-level writing course that introduces students to the various forms of academic discourse. This course focuses primarily on the basic elements of college composition and writing as a process in both narrative and analytical forms. Students will investigate the importance and promise of effective written communication in various personal and professional contexts and identify effective strategies through critical analysis of written works as well as their own writing. Finally, this course prepares students for more advanced research analysis by connecting students to important avenues of research.

ENG349 - Intermediate Fiction Writing Workshop

Description

This course expands upon the content covered in ENG 329. Students will continue to develop strategies for choosing point of view and creating characters. They will explore the appropriate uses of exposition, learn techniques to control pacing, and reflect upon the importance of word choice. Students will practice writing effective dialogue and evaluate how it differs from everyday conversation. Students will also study methods for conveying a story with brevity and creativity and demonstrate their knowledge by writing 'short short' and 'postcard' stories. In addition, they will study and practice techniques for creating effective story endings. Throughout the course, students will continue to practice their skills in constructive criticism, by reading and evaluating the work of their peers and other writers.

Undergraduate

ENG510 - Studying the Craft

Description

Reading is an essential part of the writing process. To write an effective piece, an author must first read the essential creative works that have informed the genre and delivered on similar themes. In this course students will study the craft of creative writing in close detail. Understanding and identifying the core, foundational elements of quality storytelling, regardless of genre, is crucial to the advancement of a creative writer. In preparation for the development of their own creative works and techniques, students will study the strategic use of common storytelling elements in self-selected texts, and practice applying them in their own work.

Credits

3

Academic Level

Graduate

ENG520 - Story and Concept

Description

How do authors generate creative ideas? How do they know when to reveal certain information? Do the chapters flow naturally from the broader story concept, or should they be planned? What makes for a rich environment? These are the types of questions we will consider in this course. With these in mind, students will conceptualize a writing project of significant length. The focus will not be on the writing of actual scenes or chapters from this work, but on the drafting of plot arcs, detailed outlines, character sketches/development, world-building, and thematic development. The concepts developed in this course may indirectly or directly inform writing projects in future courses.

Credits

ENG523 - Screenwriting Fundamentals

Description

In this course, writers will learn the essential elements of screenwriting, including plot structure, character, scene, dialogue, and the craft of visual storytelling. Beginning with the mechanics of scripts for television and film and the process of script outline and written synopses ("treatments"), attention is then given to storytelling through script structure with a focus on feature-length film. Existing movie scripts and films will be examined as writers create and build on scenes and dialogue in preparation for the course's final project a short one-act screenplay.

ENG531 - Fiction and Film

Description

This course provides students with the opportunity to explore storytelling through two of its most popular mediums: film and literature. Students will examine basic principles of storytelling; point of view, voice, rhythm, character and plot development, theme, symbols and how those principles are represented differently or correspondingly in each form. Students will be expected to use analytical skills to dissect stories and recreate their essence through a number of creative writing exercises. They will also be expected to read their peers' writing and use constructive criticism to provide supportive feedback.

ENG533 - Genres: Fantasy, Sci-Fi, and Other Popular Fiction

Description

What does it take to be a good sci-fi writer? How does a writer become the next Tolkien? Beyond the scope of general genres - fiction, nonfiction, poetry, and screenwriting - there are specific sub-genres to consider at the start of a novel and, in some cases, a career. In popular fiction, these genres tend to cycle through the bestsellers lists. In this course, students select a particular genre to explore in more depth, and apply that genre to their writing throughout the term. While crafting and critiquing these pieces with their peers, they develop their professional identity as authors of their genre, and research and apply methods that will help them market themselves as genre writers.

ENG542 - The Editor

Description

Writing a story is only half the battle. What happens when the writer finishes the first draft and any subsequent revisions? When is the work finally ready for someone else's eyes? Should someone be reviewing every step in the process? With expanding opportunities in social media and self-publishing, the role of the editor may be shifting. Whether pursuing traditional publication or new media platforms, writers may be in need of editors now more than ever. In this class, we focus on the relationship between author and editor by placing students in the role of the editor. Students study the different responsibilities of each editor type - from developmental editors and proofreaders to acquisitions editors and copy editors - and where these play a part in the writing and publishing process. Students practically apply the multifaceted role of the editor and compile their feedback as the start of a professional portfolio.

ENV305 - Global Climate Change

Description

This interdisciplinary course brings students up to date on what is known and not known about the causes and consequences of global climate change, and about viable response options. Topics include analysis of climate drivers such as greenhouse gas emissions, and land-use changes, and investigation of some climate system responses such as increased storm intensity and increased surface temperature. Students also explore some of the societal and economic impacts of global climate change. By reference to the most recent report of the Intergovernmental Panel on Climate Change, paleoclimate studies, and other authoritative sources, students learn how to separate fact from fiction in the often publicized debate about the dynamics of global climate change and about how we should respond to it.

3

Requisites

- 1 of the following:
 - ENV101 - Environmental Science (3)
 - SCI219 - Environmental Issues (3)

Academic Level

Undergraduate

Online Programs

ENV319 - US Environmental Law and Politics

Description

How can businesses, governments, and public interest groups achieve environmental sustainability goals in legal and political contexts that were designed with other goals in mind? Students spend about half of the course learning how to spot facts that give rise to compliance issues for businesses and other private parties under a full spectrum of federal environmental laws, and to identify opportunities for achieving broader sustainability goals within the constraints imposed by the law. In the other half, students learn both how to predict environmental law and policy outcomes and how to shape them adaptively in pursuit of sustainability goals in a fragmented system of governance that was designed to privilege special interests and to favor the status quo.

Fashion Merchandising Management

FMM101 - Basic Design and Color Theory

Description

This course examines the basic principles of design, including balance, emphasis, proportion and rhythm. The art elements of line, space, texture and color are studied with special emphasis on how they relate to advertising layout and design and visual merchandising. This course is cross-listed with GRA-101.

Credits

3

Academic Level

Undergraduate

Online Programs

FMM114 - Introduction to Fashion Merchandising

Description

Fashion principles and procedures used in planning, selecting, pricing and selling fashion goods in retail stores, catalogs and on the Internet are studied. Merchandising systems, assortment plans and inventory control methods are analyzed.

Credits

3

Academic Level

Undergraduate

FMM204 - Textiles and Color Theory

Description

Textile information pertinent to merchandising is included in this course. Analysis of fibers, yarns and weaves, fabric recognition, and a detailed study of natural and man-made materials are emphasized.

Credits

3

Academic Level

Undergraduate

FMM208 - History of Fashion and Costume

Description

Fashion is another term for the costume of a time and place, an expression of a period with all of its passions, politics, attitudes and history. This course considers textiles, silhouettes, shapes, and design adaptations in light of the technological capacities of the time, the geographic environment, social structure, political systems and economic conditions around the globe and over time. Students will gain an understanding of appreciation of how these underpin and influence contemporary fashion design and development.

Credits

3

Academic Level

Undergraduate

FMM225 - Merchandise Planning

Description

This course seeks to instill in students a complete understanding of the influence of merchandise planning and purchasing on retail profit. Students analyze profit and loss statement and demonstrate a complete understanding of the factors that influence the retailer's financial performance.

Credits

3

Academic Level

Undergraduate

Online Programs

FMM325 - Sustainability in Fashion

Description

The overall objective of this course is to explore the role that sustainability plays in fashion merchandising managers' decision to buy from vendors. It explores production and commercialization decisions with respect to buying green. It exposes students to the influence of social responsibility on fashion retailers' decisions.

Credits

3

Academic Level

Undergraduate

FMM340 - Merchandise Management Strategies

Description

Effective merchandise management involves efficient decision making. Ordering, keeping and managing the right merchandise in terms of size and quantity are the key to a retailer's success. Retail merchandise management brings to light the vital relationship between the manufacturer and the retailer. Students explore various strategic techniques that influence profit including vendors-fashion retailers' negotiations over merchandise.

FAS226 - Digital Photography

Description

Photography as a visual medium is integral to the study of contemporary communication. This course introduces students to the history and practice of producing photographic images. The course is a combination of lecture and the hands-on practice of both the analog and digital methods of photographic image-making. The traditional darkroom is dispensed with, giving over to the computer the role of dark-room, with the student using Adobe Photoshop and other image editors to process traditional film and digital image captures. The student is taught to use various digital cameras techniques to capture, process, and print a portfolio of several original photographic images. Lectures on pictorial composition, subject matter choice, and methods of presentation display will accompany hands-on technical exercises.

Credits

3

Academic Level

Undergraduate

FAS235 - Photographic Practice in the Digital Age

Description

As the practice of digital photography leverages new technical skills through software programs and digital editing, it is critically important that practicing photographers gain a greater understanding of emerging methods for producing, editing, and distributing photographic works. This course provides an intermediate experience in the process of generating portfolios of digital images for presentation, distribution, or exhibition. Key to this experience is a broad understanding of design concepts that lead to decisions in coloring, resolution, formatting, and so on to produce high quality images that reflect a creative point of view. Students are exposed to advanced techniques using industry standard software to manipulate digital works for print and digital output, including color theory, management, calibration, and standard file formatting.

FAS370 - American Art

Description

This course will introduce students to the unique artistic tradition of the United States from the Colonial era to the present. In addition to studying masterworks from these periods, students will engage with issues such as the construction of an American identity, the role of the fine arts in American society, and the tensions of class, gender, race, and ethnicity in American art. As such the course functions as a vibrant retelling of American history as revealed through its visual production.

Credits

3

Academic Level

Undergraduate

FAS375 - Photographic Aesthetic Concepts

Description

This course explores various aesthetic theories of photographic practice and the evolution of photography as a respectable fine art medium available to contemporary artists and subject to critical inquiry. Students learn how photographic images shape our understanding of both the past and present as well as the very nature of photography as an art form and how this has changed over time. Besides theory, students also explore through hands on practice the methods and techniques for developing one's own aesthetic characteristics and personal style in photographic work.

Description

Participate in an advanced exploration of the concepts of narrative and linear vs. non-linear imagery. Research the history of documentary photography, focusing on how creative works produced as professionals can be used to make an impact on communities and audiences. With an emphasis on storytelling through creative imagery, develop a digital narrative showcasing advanced techniques in camerawork, lighting, and other pre- and post-production skills.

Online Programs

MFA505 - Introduction to the Online MFA

Description

Explore a unique culture and approach to fiction writing at SNHU that embraces practicality, diversity and community. Understand the history and major categories of genre fiction, including the role genre plays for readers, writers, and publishers. Develop techniques for effective workshopping. Discover habits and behaviors that support the creative process and forge ties with a peer and faculty community that support a rewarding writing career.

Credits

3

Academic Level

Graduate

MFA507 - Advanced Studies in Literature

Description

Study classic and contemporary literature by exploring published authors' usage of creative writing craft elements. Analyze the applications of these storytelling craft elements in published literature, and identify why the literature, as a cohesive whole, is successful. Develop individual approaches to the "writer's toolkit," by employing the craft elements of storytelling into personal works for advancing a career as a creative writer.

Credits

3

Academic Level

Graduate

MFA509 - Storytelling

Description

Analyze and practice fundamentals of storytelling, including narrative arc, plot, and character development. Deconstruct popular stories in literature and film to understand characteristics of beginnings that hook, tension-building middles and satisfying endings. Refine and polish an original premise through workshop and reflection. Apply techniques to your own stories.

Credits

3

Academic Level

Graduate

MFA514 - Advanced Studies in Genre Literature

Description

Cultivate an appreciation for several literary genres through the study of various important works, authors, key historical developments, characteristic tropes, and conventions. Prepare for upcoming cross-genre creative writing workshops. Analyze one genre novel for how it fits within the literary landscape in preparation for genre concentration selection. Research market trends to gain a practical grasp of how a genre's history continues to influence popular books today.

Credits

Academic Level

Graduate

Online Programs

MFA524 - Contemporary Fiction Writing I

Description

Explore the various characteristics and elements that describe the Contemporary Fiction Writing genre. Formulate an initial novel-writing premise, applying early conceptualizations of character arcs, plot arcs, motivation, pacing, and research. Develop an individualized approach to structuring stories through immersion in titles within the genre landscape.

Credits

3

Academic Level

Graduate

MFA525 - Romance Fiction Writing I

Description

Explore the various characteristics and elements that describe the Romance Fiction Writing genre. Formulate an initial novel-writing premise, applying early conceptualizations of character arcs, plot arcs, motivation, pacing, and research. Develop an individualized approach to structuring stories through immersion in titles within the genre landscape.

Credits

3

Academic Level

Graduate

MFA526 - Young Adult Fiction Writing I

Description

Explore the various characteristics and elements that describe the Young Adult Fiction Writing genre. Formulate an initial novel-writing premise, applying early conceptualizations of character arcs, plot arcs, motivation, pacing, and research. Develop an individualized approach to structuring stories through immersion in titles within the genre landscape.

Credits

3

Academic Level

Graduate

MFA527 - Speculative Fiction Writing I

Description

Explore the various characteristics and elements that describe the Speculative Fiction Writing genre. Formulate an initial novel-writing premise, applying early conceptualizations of character arcs, plot arcs, motivation, pacing, and research. Develop an individualized approach to structuring stories through immersion in titles within the genre landscape.

MFA600 - The Publishing Ecosystem

Description

Follow the journey of publication from initial manuscript submission to a finished book in a reader's hands. Investigate business models and key roles in the publishing world, learn conventions of submission, and identify networking opportunities. Research the critical organizations, communities, and industry publications and resources unique to a chosen genre.

Credits

3

Academic Level

Graduate

MFA602 - The Business of Writing

Description

Explore the many methods and strategies that professional writers employ to leverage their creative talents into financially sustaining work. Investigate the many types of writing opportunities available beyond book publishing, and learn how to start and grow a successful freelance business. Research freelance opportunities, learn how to manage a sole proprietorship, and find resources about various industry tools and conventions.

Credits

3

Academic Level

Graduate

MFA604 - Finding and Reaching an Audience

Description

Develop strategies to find a readership and build an audience. Investigate approaches and tools for building a writer's platform and increasing visibility in a chosen market. Create a customized, multi-faceted plan to cultivate and engage new fans.

Credits

3

Academic Level

Graduate

MFA606 - Copy and Content Writing

Description

Target a specific readership by applying copywriting and content writing skills. Learn how to write effectively and persuasively for marketing purposes, particularly when crafting book descriptions or book marketing materials, social media posts, email newsletters, and other types of copy. Focus on producing effective headlines and content for search engine optimization purposes.

Credits

Full Stack Web Development

FSWD101 - Introduction to Web Development 1 **Description**

This course introduces Kenzie Academy's Full Stack Web Development program. Learners set up their development environment and learn fundamental programming concepts and practice them in JavaScript. Programming concepts include instructing a computer to perform operations using knowledge of programming syntax and logic, accounting for a variety of possible inputs, and understanding and optimizing the amount of time and memory required for a solution. Enrollment in the Full Stack Web Development certificate program required.

Credits

3

Academic Level

Undergraduate

FSWD102 - Introduction to Web Development 2 **Description**

This course builds upon Intro to Web Development 1 and teaches how to enhance HTML pages by adding styles with CSS to add formatting, color, and more to elements on webpages while considering and accounting for varied user behaviors and accessibility within design solutions. Learners progress by learning how to use JavaScript to manipulate the Document Object Model (DOM), which defines and adds asynchronous interaction to the elements on an HTML page. To wrap up this course, learners learn about Array and String methods, how to create and use Objects, and ways to clean up code through refactoring. Enrollment in the Full Stack Web Development certificate program required.

Credits

3

Requisites

- Complete:
 - FSWD101 - Introduction to Web Development 1 (3)

Academic Level

Undergraduate

FSWD103 - Introduction to Web Development 3 **Description**

Building upon Intro to Web Development 2, in this course learners learn how to use Arrays and Objects to create multi-dimensional data representations, best practices for storing Objects, and their impact on computer memory usage including optimization decision-making. Learners will be introduced to Object Oriented Programming and how to create objects in repeatable ways using Abstraction, Encapsulation, Inheritance, and Polymorphism. Learners will write code that is easy to read and follow, sensibly organized, and reusable in various applications while working on teams to learn how to review code and provide feedback to other team members in accordance with industry standards. Enrollment in the Full Stack Web Development certificate program required.

Credits

3

Requisites

- Complete:
 - FSWD102 - Introduction to Web Development 2 (3)

Academic Level

Undergraduate

Online Programs

FSWD121 - Full Stack Web Development 1

Description

This begins the second sequence of courses in the Full Stack Web Development Certificate. Learners learn about the Client and Server, JavaScript's asynchronous capabilities, and better organization of code that is easy to read and follow. They are introduced to the React.js library and learn how to create and reuse components. By the end of this course, learners will be able to implement the various parts of a modern web application and understand the architectural design principles. Enrollment in the Full Stack Web Development certificate program required.

Credits

3

Requisites

- Complete:
 - FSWD103 - Introduction to Web Development 3 (3)

Academic Level

Undergraduate

FSWD122 - Full Stack Web Development 2

Description

Building upon Full Stack Web Development 1, learners learn about advanced routing and styling frameworks for React before being introduced to the backend including MERN applications, Express Endpoints, Node.js, and MongoDB. Learners will be able to run a MERN application locally by creating navigation links within an application and calling backend endpoints to display results in the UI. Learners will learn to differentiate between different REST methods and modify existing API endpoints along with existing database schema. Enrollment in the Full Stack Web Development certificate program required.

Credits

3

Requisites

- Complete:
 - FSWD121 - Full Stack Web Development 1 (3)

Academic Level

Undergraduate

FSWD123 - Full Stack Web Development 3

Description

In this course, learners build upon the introduction to Node.js and MongoDB in Full Stack Web Development 2 by building a full-stack application including populating the fields of a nested object reference, receiving and storing a file on the backend, and implementing a third-party library. Enrollment in the Full Stack Web Development certificate program required.

Credits

3

Requisites

- Complete:
 - FSWD122 - Full Stack Web Development 2 (3)

Online Programs

FSWD201 - Full Stack Web Development 4

Description

The third sequence of courses are designed to give learners more autonomy and flexibility to develop their programming knowledge and skills while beginning their career search. Full Stack Web Development 4 encapsulates Advanced Modules in the third sequence of courses, which focus on learning independent research skills along with problem-solving processes and optimizing solutions for time and space efficiency. At the end of this course, learners will start to focus on their upcoming career search through portfolio development, resume writing, practicing for technical interviews, and defining a job search strategy. Enrollment in the Full Stack Web Development certificate program required.

Credits

3

Requisites

- Complete:
 - FSWD123 - Full Stack Web Development 3 (3)

Academic Level

Undergraduate

FSWD202 - Full Stack Web Development 5

Description

Full Stack Web Development 5 encapsulates the second phase of work and includes a capstone project. Capstone focuses on an open-ended group project utilizing the Software Development Lifecycle (SDLC) and all of the skills acquired throughout the program. The capstone project includes development of a Full-Stack MERN Application and will be presented to the cohort and Kenzie staff members prior to graduation and will be used within the graduate's portfolio. Enrollment in the Full Stack Web Development certificate program required.

Credits

3

Requisites

- Complete:
 - FSWD201 - Full Stack Web Development 4 (3)

Academic Level

Undergraduate

FSWD203 - Full Stack Web Development 6

Description

This course is a continuation of the capstone experience which began in Full Stack Web Development 5. Learners continue working on an open-ended, group capstone project utilizing all of the skills acquired and the Software Development Lifecycle (SDLC). At the end of the course, groups will present the completed capstone project to the cohort and Kenzie staff members and will be used within the graduate's portfolio. Enrollment in the Full Stack Web Development certificate program required.

Game Design & Development

GAM207 - Information Technology and Digital Games

Description

Introduction to digital games and information technology covers game genres and platforms, interface design, game implementation, artificial intelligence, business economics of the game industry, game marketing and design, e-collaboration, and e-commerce. Students learn how to use software packages to design and implement digital games and how to use the Internet to market and distribute digital games. The course includes a project which will culminate in the conception, design, and prototype of an original digital game. The course is designed for students who have an interest in IT and games, including original game concepts, design and implementation, and executive leadership in the game industry. Knowledge of computer programming is not required.

Credits

3

Requisites

- Complete:
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

GAM303 - Design of Virtual Game Environments

Description

This core topic addresses the fundamental ideas behind the design of electronic games as virtual environments. It touches on relevant formal fields such as systems theory, cybernetics, and game theory. Included are basics of interactive design, including interface design, information design and human-computer interaction. Emphasis is placed on how virtual game environments function to create experiences, including rule design, play mechanics, game balancing, social game interaction and the integration of visual, audio, tactile and textual elements into the total virtual game environment experience. Game documentation and play-testing are also covered.

Credits

3

Requisites

- Complete:
 - GAM207 - Information Technology and Digital Games (3)

Academic Level

Undergraduate

GAM305 - Digital Game Development

Description

To provide a technically well-founded introduction to game development using programming languages and various gaming editors. On completing this course, the student will have acquired a fundamental understanding of the Windows API, the use of sprites, animation and audio in an integrated game environment. This course is cross-listed with IT 305.

Credits

3

Requisites

- Complete:
 - GAM303 - Design of Virtual Game Environments (3)

Academic Level

Undergraduate

Online Programs

GAM312 - Gameplay Systems Development

Description

This class builds on the programming fundamentals learned in previous courses, and covers topics relating to technical systems for video games. Students will learn how to create complex game systems using scripts and will learn advanced scripting techniques. The technical aspects of common gameplay systems will be explored and implemented in various projects.

Credits

3

Requisites

- Complete:
 - IT312 - Software Development with C++.NET (3)
 - GAM207 - Information Technology and Digital Games (3)
 - MAT350 - Applied Linear Algebra (3)

Academic Level

Undergraduate

GAM380 - Game Experiential Learning

Description

Learn how to mix direct practice, discussion and self-reflection, and gain experience in the game development environment using the latest tools and technology. Develop real world skills through this experiential learning coursework to be better prepared for the competitive job market. May be taken two times for credit for each time.

Credits

3

Requisites

- 1 of the following:
 - GAM305 - Digital Game Development (3)
 - GRA311 - Environment Design (3)

Academic Level

Undergraduate

GAM415 - Graphics Game Engine

Description

Students get an introduction to advanced graphics topics including skeletal animation, ray tracing, particle integration, lighting, shaders and materials. Projects are introduced to implement these important visual effects. The knowledge obtained will be assimilated and applied to a wide range of usages and application. Linear Algebra algorithms will be refreshed and/or introduced specific to the topic at hand. Students will learn the basics of Direct X, Open GL, and Rendering solutions (forward and deferred).

Credits

3

Requisites

- Complete:
 - IT230 - Software Development with C#.NET (3)
 - MAT350 - Applied Linear Algebra (3)
 - IT312 - Software Development with C++.NET (3)
 - GAM312 - Gameplay Systems Development (3)

Academic Level

Undergraduate

Online Programs

GAM465 - Digital Multimedia Development

Description

This course presents digital multimedia theory and develops skills that meet the design and technical requirements of professionally created multimedia for World Wide Web commercial applications on a variety of platforms and Internet applications. Each student develops a professional portfolio consisting of CD-ROM material. Students also develop working Web sites that display their multimedia projects. Topics include sound, animation, video, interactivity and multimedia distribution.

Credits

3

Requisites

- Complete:
 - GAM303 - Design of Virtual Game Environments (3)
 - GAM415 - Graphics Game Engine (3)

Academic Level

Undergraduate

GAM495 - Game Programming Capstone

Description

This course integrates previous coursework and practical experience with a focus on authentic demonstration of competencies outlined by the program. Rather than introducing new concepts, students will synthesize and integrate prior learning to develop a capstone project. The course will be structured around this critical task so that students have the appropriate support and resources required to be successful.

Credits

3

Requisites

- Complete all of the following
 - 111 credit(s).
 - Complete:
 - GAM465 - Digital Multimedia Development (3)

Geography

GEO200 - World Geography

Description

This course examines the implications of global location and topography for the people of planet Earth. Students will explore how geography shapes the dynamics of human societies, with an emphasis on the geoenvironmental, geopolitical, and geosocial phenomena that help to define the modern world.

Credits

3

Academic Level

Undergraduate

Online Programs

GEO330 - Geohazards

Description

This course will explore disasters due to natural phenomena such as climate change, hurricanes, tornadoes, earthquakes, tsunamis, volcanic eruptions, asteroid/comet impacts, and mass extinctions. Each type of event will be considered in terms of its origin, evolution, warning potential, range of significant environmental impacts and possible mitigation strategies, as well as key historical cases of these geohazards.

Credits

3

Requisites

- Complete:
 - PHY103 - Earth System Science (3)
 - PHY205 - Principles of Geology (3)
 - PHY205L - Principles of Geology Lab (1)

Academic Level

Undergraduate

GEO345 - Remote Sensing and Imagery Analysis

Description

This course will provide an overview of the technology by which aircraft and satellite images of the Earth are produced as well as hands on experience manipulating and interpreting remote sensing data. Students will gain practical experience in environmental analysis using satellite imagery and commonly used sensors and analytical methods for the Earth sciences.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:
 - PHY105 - Geology (3)
 - PHY205 - Principles of Geology (3)
 - Complete:
 - IT242 - Introduction to Geographic Information Systems (3)
 - SCI225 - Spatial Awareness (3)

Academic Level

Undergraduate

Online Programs

GEO450 - Spatial Analysis

Description

This course will investigate geospatial statistical analyses that aim to provide students with the background necessary to investigate geographically represented data. The specific focus will be on spatial data analysis, such as the analysis of autocorrelation, principles of geostatistics and analysis methods that are relevant in the fields of public health, environmental/earth science and social science. The focus of this course will be to gain hands-on experience in applying these techniques with Geographic Information Systems (GIS) and spatial analytical software, and essential methodological and practical issues that are involved in sophisticated spatial analyses.

Credits

3

Requisites

- Complete:
 - GEO345 - Remote Sensing and Imagery Analysis (3)

Undergraduate

Graduate Business Administration

MBA500 - Building Business Leaders

Description

This course will provide the student with a comprehensive look at the alignment between an organization's vision, mission, values, culture and strategies. The student will demonstrate the ability to evaluate both internal and external factors impacting business sustainability. The internal factors will include an understanding of key financial statements, forecasting and the identification and review of key performance indicators.

Credits

3

Academic Level

Graduate

MBA501 - Mathematics and Statistics for Business

Description

This is an applied course, which will provide students with the mathematical knowledge and skills that underlie many courses offered in the school of business. Students will learn the fundamental concepts and methods of linear algebra, mathematical functions, differential calculus and statistics and their applications to business. They will also sharpen their quantitative, analytical and problem-solving skills that are so important for success in the world of business today.

Credits

3

Academic Level

Graduate

Online Programs

MBA502 - Economics for Business

Description

This course is intended to provide the student with a concisely focused yet rigorous introduction to both micro- and macroeconomic theory needed at the foundational level of a graduate degree program. Some of the topics to be addressed include: market behavior; demand theory and related elasticity concepts; production and cost theory; managerial decision-making in perfectly competitive and imperfectly competitive markets; GDP determination; unemployment and inflation; and fiscal and monetary policy.

Credits

3

Requisites

- Complete:
 - MBA501 - Mathematics and Statistics for Business (3)

Academic Level

Graduate

MBA503 - Financial Reporting and Analysis

Description

This course emphasizes the creation and interpretation of financial statements critical to an understanding of today's economy. Various financial topics related to financial statements are covered. Income statements, balance sheets, and cash flow statements are explored in-depth giving students an appreciation of how these statements are prepared and the standard accounting rules that apply to their creation.

Credits

3

Academic Level

Graduate

MBA504 - Applied Business Statistics

Description

This course will focus on the application of statistical techniques to analyze data in order to make critical business decisions. Starting with an overview of how to use and interpret descriptive statistics, students will be challenged to think critically and derive significance from a large volume of data and how this data can be used to determine causes, forecast the future, and measure performance. Using these tools, the student may develop the information needed to increase productivity, identify opportunities for improvements and assist leadership in making sound judgements.

Credits

MBA580 - Innovation and Strategy for High-Performance Organizations

Description

High performance organizational leaders cultivate innovative thinking and processes and their application to developing successful business strategies. Students will analyze the attributes of innovative thinkers and cultures and how organizational structure and policy can promote or inhibit innovation. The course will explore the market and technology forces that drive the adoption of innovation and the tools and methods--such as risk analysis, economic analysis, statistics, and forecasting--to drive the analysis, selection, and implementation of innovative products and processes.

Credits

Requisites

- 1 of the following:
 - BMB670 - Music Business Leadership and Ethics (3)
 - MBA540 - Organizational Strategy in a Global Environment (3)

Academic Level

Graduate

MBA610 - Business Law

Description

This course provides a survey of the legal environment of business by looking at legal issues and regulations in a business context. The students assess the impact of business law on organizational decision making for informing strategic legal decisions. The course covers employment law, contracts, tort and product liability, internet law as well as other legal issues affecting the business environment. The students also assess the legal and ethical implications of US companies doing business abroad.

Credits

3

Academic Level

Graduate

MBA620 - Measuring Success in an Organization

Description

Effective leaders need a comprehensive understanding of financial and management accounting principles, analytical techniques, and computer-based tools. Students will prepare, monitor, and evaluate financial and accounting reports and metrics and present their findings and recommendations. From reporting to planning, students will develop an acute awareness of a perpetually changing business environment and how entities measure its success, challenges and resources.

MBA635 - Ethics, Corporate Culture, and Social Responsibility

Description

This course examines corporate culture and social responsibility, how to build a sustainable business, and how to promote corporate ethics and values. The course also looks at how to deal with group think, diversity and cultural awareness, civic engagement, and how to be at the forefront of using environmental and sustainable practices that have a positive global impact. The course will also examine personal ethics in relationship to corporate ethics, governance, and civic mindedness.

Credits

3

Requisites

- Complete:
 - MBA515 - Business Environment, Innovations and Entrepreneurship (3)
 - MBA520 - Accounting and Financial Analysis (3)
 - MBA550 - Leading in an Organization (3)
 - MBA560 - Marketing and Strategy (3)

Academic Level

Graduate

MBA640 - Finance, Economics, and Decision Making

Description

The course is a continuation of MBA 520 Accounting and Financial Analysis and focuses on effective business decisions using quantitative and qualitative data, microeconomic and macroeconomic variables, and internal financial priorities. The students refine operational and investment decision-making skills with respect to organizational sustainability and growth, mergers, debt vs. equity funding and capital markets. In addition, students are exposed to foreign currencies, foreign direct investment (FDI), and international trade.

Credits

3

Requisites

- Complete:
 - MBA550 - Leading in an Organization (3)
 - MBA560 - Marketing and Strategy (3)

Academic Level

Graduate

MBA645 - Optimizing Brands

Description

Organizational leaders balance brand management and its relationship with impactful marketing strategies. Students will study the key brand elements of identity, trust, and building habit-forming brand experiences. By applying market research, target market identification, customer trends in the marketplace, and ethical considerations, students will develop a marketing strategy for an organization.

MBA687 - Leading Organizational Change

Description

Leadership requires the understanding of human intelligence and how individuals function within an organization to achieve winning results. In this course, students will explore how to develop a workforce to actualize business goals and objectives and study how to manage organizational change through communication strategies that reduce risk, address employee dissatisfaction and apprehension, and increase strategic alignment among leaders, managers and employees. This course will emphasize the blending of financial and human capital resources to effectively complete organizational change and proffer solutions that are strategic and balanced.

MBA690 - Operations Management and Technology

Description

This course explores essential aspects of project management, the tracking and measurement of key performance indicators (KPI), and the use of current technology to create automation and sustainability. Students have the opportunity to examine technology management and operations management from a strategic perspective, creating a common view into the different layers of a business. In addition, students learn to collect, identify, and determine quality measures and use common methodologies and strategic planning processes.

Credits

3

Requisites

- Complete:
 - MBA550 - Leading in an Organization (3)
 - MBA560 - Marketing and Strategy (3)

Academic Level

Graphics

Online Programs

GRA101 - Basic Design and Color Theory

Description

This course examines the basic elements and principles of design, including balance, emphasis, proportion and rhythm. Students are introduced to visual designing systems that guide the student through the application of computer graphics tools. The basic visual design elements of line, space, texture and color are creatively explored as students complete a series of projects that relate to advertising layout and design and visual merchandising.

Credits

3

Academic Level

Undergraduate

GRA200 - Digital Design Tools

Description

In this course, students will explore industry-standard software to understand their purpose, similarities, differences, and how to apply them to various design mediums. Students will also have the opportunity to practice navigating and using the software and their tools to prepare for applying them to revise and refine basic designs. This course will provide students with the foundational knowledge necessary for more hands-on application and design in future learning experiences.

Credits

3

Academic Level

Undergraduate

GRA201 - Intro to Digital Sculpting

Description

In this course students will be introduced into Digital sculpting with zbrush. Also understand how digital sculpting fits into a pipeline in a game production environment. Techniques covered in this course will be software navigation, sculpting with multiple brushes, masking, poly painting, and materials. The course will cover some practices used to prep a model for the next stage in creating a game model. Some techniques will show how zbrush can work seamlessly with other 3D modeling software. The class will also have assignments that include observational and concept drawing.

Credits

Undergraduate

Online Programs

GRA202 - 3-D Modeling and Animation

Description

In this course students will be introduced to 3DS max. It will give them an overview of what max does specifically for games. This course will be focused on modeling. Students will learn the basics of modeling low poly and high poly models. How they are unwrapped and used in conjunction with textures. It will also show a wide range of techniques used in the industry for modeling for mobile, PC and current generation consoles.

Credits

3

Requisites

- Complete:
 - GRA220 - Introduction to Digital Imaging (3)

Undergraduate

GRA211 - Interactive Animation

Description

This course focuses on programming capabilities to enhance graphic animations and user interfaces to provide spectacular interactive results. Those benefiting from this course include students in game development, advertising, marketing, education, web development, art and other fields that can benefit from interactive animated graphics helping to convey concepts. The course is intended for those with no programming experience as well as those with some programming background. The use and creation of animations will be covered at a level of interest to both those new as well as experienced. The results can be displayed by a browser from the internet or as standalone results displayable on a range of operating systems. This is a hands on computer based course in which the students create a number of individual projects based on their interests and capabilities, focusing on creativity and programming aspects of interactive animation. The course utilizes emerging technologies in interactive animation.

Credits

3

Academic Level

Undergraduate

GRA212 - 3-D Character Animation

Description

This course will introduce students to character animation by learning the 12 principles of animation. We will also be going over the pipeline for skinning and rigging a character.

Credits

3

Requisites

- Complete:
 - GRA202 - 3-D Modeling and Animation (3)

Online Programs

GRA220 - Introduction to Digital Imaging

Description

Using Photoshop and Illustrator software, this course is an introduction to professional computer graphics creation and to the software and hardware typically used in the graphic design, video, photography and interactive Web/multimedia industries. Emphasis will be placed on the professional use of image-capturing devices, such as scanners, digital still cameras and video cameras. Image editing and color management systems will be discussed and demonstrated. The important differences between vector and bitmap graphics will be defined, as will the significant differences in preparing images for print, broadcast and Web distribution. Students will be encouraged to experiment with their own and pre-existing images using sophisticated digital editing techniques such as layering, channel masking, filtering, cloning and montaging. Special attention will be paid to copyright awareness in the age of digital image.

Credits

3

Academic Level

Undergraduate

GRA310 - Digital Graphic Design for the Web

Description

This course focuses on digital graphic design theory and its application to web design. Students learn about the technical requirements of professionally created digital web documents. Students will be focused on designing communication and marketing applications for the World Wide Web all the while considering user experience and functionality. Differences in designing for the desktop computer and mobile internet appliances will be a topic for discussion and incorporated in hands-on exercises and projects. Each student will develop several minisites and by the end of the semester will have produced at least one deployable site. Topics include design strategies, web authoring/editing environments, color calibration and aesthetics, web typography, style sheets, template use, graphics format selecting and optimization, and HTML coding and debugging.

GRA311 - Environment Design

Description

In the first half of this course students will be introduced to a pipeline for the creation of environments inside of a game studio. Students will be shown how to use reference drawings and images to help build props and environment pieces. Students will also be shown how these assets can be used, not only as standalone assets but to create other bigger picture assets when used as a modular set piece. Then the students will digitally sculpt environment assets from references provided to them. When the sculpting phase is finished the students will learn how to build a game model from their digital sculpt. Students will then create the textures that will be used for a final render. In the second half of this course students will be able to go through this same pipeline but instead of using provided artwork, they will create something from their own imagination.

Credits

3

Requisites

- Complete:
 - GRA201 - Intro to Digital Sculpting (3)
 - GRA202 - 3-D Modeling and Animation (3)

Academic Level

Undergraduate

GRA332 - Digital Publishing

Description

In this course, students will be introduced to the creative and practical aspects of digital publishing. Students will identify and explore differences between designing for the iPad, smartphone, tablet, laptop, and desktop computers. This course shows students how to step outside of print design and learn about interactive design, and the differences and similarities between the two. Through targeted assignments students will develop an understanding of the variety of tools used to create publications for electronic media. Students will capture key insights to improve content and deepen reader engagement.

Credits

3

Requisites

- Complete:
 - COM232 - Desktop Publishing (3)

Online Programs

GRA340 - Typography

Description

Typography deals with the language of type, the history of typography, typeface and character recognition, legibility, appropriate uses of measure, manuscript specifications and the individual visual dynamics of letterforms. In this class students will learn how to work with type as a stand-alone design element. Students will also learn how to incorporate type successfully with imagery. The assignments will cover a broad range of type applications. Students will primarily focus their efforts towards developing a greater understanding of typographic form through exercises based on the setting of words, phrases, sentences and short paragraphs. Students will first focus on the appropriate setting of spaces in-between the letters that make up words and projects will gradually increase in scope and complexity up to the setting of pages of text with multiple levels of hierarchical meaning.

Credits

Requisites

- Complete:
 - GRA220 - Introduction to Digital Imaging (3)

Academic Level

Undergraduate

GRA401 - Character Design

Description

This course will involve a combination of concept, texturing, digital sculpting and 3d modeling to create characters that would appear on both mobile and current generation consoles. Students will learn a proven pipeline used in the gaming industry to bring a concept to creation and ready for game implementation. The course will begin showing students how this pipeline works in combination of different types of software following a given concept. They will have the understanding of how specific software works along the path of the pipeline to create a character. Students will then be asked to create their own concept following the techniques used in class to present a finished game character for their final project.

Online Programs

GRA402 - Creature Design

Description

In this course students will be shown how creatures are created from an idea to a fully fleshed out game model. They will work through weekly assignments to see the connection of real world animals and fantasy creatures. Students will follow step by step instruction with supplied concepts to build a fantasy creature through real world animal anatomy and the creative process. In the second half of this course students will learn how to go through this same process of using reference of actual creatures/animals from the real world as a spring board to create their own fantasy creature.

Undergraduate

GRA410 - Advanced Digital Graphic Design for Web

Description

This course engages upper-level design students in current industry standards used in designing content for multimedia and interactive communication. Emphasis is placed on designing for computers, tablets and phones. The course is divided into teaching modules emphasizing the integration of several software packages for design problem solving. Emphasis is placed on conceptualization and the mastery of professional site mapping and wire framing techniques. Exercises and projects provide challenging design problem-solving experience. Project themes involve self-promotion and client-based work. All projects rely on the student's ability to integrate previously mastered techniques in a broad range of software.

Credits

3

Requisites

- Complete:
 - GRA310 - Digital Graphic Design for the Web (3)

Academic Level

Undergraduate

GRA420 - Advanced Digital Imaging

Description

This hands-on computer graphics course combines skills from previous design courses to explore the history, process and essential skills required to develop successful brand identity systems. Topics such as logo design, selection of fonts and colors, and the development of branded marketing materials are covered in depth. In addition, the important techniques of imaging software integration and file format compatibilities are discussed and applied while preparing images for print, video and Web. At the conclusion of this course, students will have developed a complete branded identity system and assembled a portfolio presentation for public viewing.

GRA431 - Interactive Animation for the Web

Description

This class focuses on the design principles of dynamic web page animation to create rich, interactive web content. Students explore the design of characters, animated graphics, light programming, and navigational elements in animated content. Using design software, students develop interactive animations, learn the tricks of controlling file size, integrate special approaches for importing and creating animation, and develop skills in many other production techniques needed for building complete web animation projects.

Credits

3

Requisites

- Complete:
 - GRA410 - Advanced Digital Graphic Design for Web (3)

Academic Level

Undergraduate

GRA440 - 3-D Art and Design

Description

In this course students will explore how their individual creative strengths and digital skill sets fit into a professional work flow of commercial game production. Students will choose one or multiple aspects of game art creation: Character design, Environment design, or Animation. All creative work produced in this course will be executed in the context of strict deadlines that simulate industry expectation. Students will concentrate on game development source control and integration of art assets into a production pipeline. Each student develops a digital portfolio and website that showcase their ability to create professional creative art work. Students will learn the process of objective self-evaluation and peer criticism and preparing their portfolios to match professional job board postings.

Credits

3

Requisites

- Complete:
 - GRA311 - Environment Design (3)
 - GRA402 - Creature Design (3)

GRA470 - User Interface and Experience

Description

This course provides a culminating experience in web design by focusing on advanced concepts in user interface design and user-centered design. Students integrate multiple interactive and rich media techniques to develop user experiences reflecting new and innovative developments in web design. The course covers principles of usability and usability testing, case studies, advanced prototyping tools and techniques, and the concepts and techniques behind several methods of user interface design.

Credits

3

Requisites

- Complete:
 - GRA310 - Digital Graphic Design for the Web (3)

Academic Level

Undergraduate

GRA491 - Graphic Design Portfolio

Description

The graphic design portfolio course will provide students with a comprehensive development opportunity to showcase their professional design work, establish a branded identity as a working professional, and engage in peer and professional critiques of design work in preparation for formal employment and contract interviews. Students will create both digital and print portfolios that demonstrate their competencies in the graphic design and media arts program outcomes.

Health Information Management

HIM200 - Introduction to Health Information Technology

Description

This course describes the use of information technology and the role of HIT professionals in the development of the electronic health record. It introduces the health information infrastructure and systems along with healthcare informatics, including applications, technology, privacy, and security.

Credits

3

Academic Level

Undergraduate

HIM215 - Coding & Classification Systems

Description

The purpose of this course is to provide students with the basic ability to identify nomenclatures and classification systems as well as assign codes using the appropriate principles, guidelines, and conventions and apply ICD-10-CM, CPT and HCPCS rules and guidelines.

Additional Information

The goal name associated with this course is Healthcare Information Management

Credits

3

Academic Level

Undergraduate

HIM220 - Healthcare Data Management

Description

This course examines the design and the use of medical databases. Students will learn how to implement business rules and data modeling to develop medical information management systems. The course further explores database applications for decision support including evidence-based practice, alerts, allergy management, and identification of gaps in care. Students will design databases and systems that reflect privacy and security requirements of HIPAA and HITECH Act.

Credits

3

Academic Level

Undergraduate

Online Programs

HIM350 - Communication and Technologies

Description

The Communication and Technologies course will review and evaluate an assortment of technologies including: data, information, and file structures (data administration, data definitions, data dictionary, data modeling, data structures, data warehousing, database management systems), system interoperability, data sharing, Health Information Exchanges (HIE), and the Nation-wide Health Information Infrastructure (NHIN).

Credits

3

Academic Level

Undergraduate

HIM360 - Coding and Classifications Systems II

Description

In this course, students will learn to manage health data elements, data sets (i.e., HEDIS, UHDDS, OASIS), and databases as well as perform a data quality assessment and integrity review. Health information archival and retrieval systems, as well as data capture tools and technologies (i.e., forms, data input screens, templates, other health record documentation tools), will be analyzed. Students will review healthcare taxonomies, clinical vocabularies nomenclatures (e.g., ICD-9-CM, ICD-10-CM/PCS, CPT, SNOMED, DSMIV). Topics will include severity of illness systems, data integrity, coding audits, CCI, electronic billing, patient identity management policies, and X12N. Additionally, the course will review charge master management, revenue cycles, and audit processes (e.g., compliance and reimbursement).

Credits

HIM422 - Ethical and Legal Considerations in Health Information Management

Description

Students in this course will examine ethics and the fundamentals of law as they pertain to health information management professionals. Students will practice developing organization-wide ethical guidelines, policies, and procedures which comply with current healthcare law and best practices. Students will learn about the U.S. legal system, civil procedure, evidence, and tort law. Students will analyze the legal health record (maintenance, content, documentation, & disposition). Students will review corporations, contracts, business associate agreements, anti-trust legal issues, medical staff, and work place law. Other areas covered include: consent to treat, HIPAA privacy rule, HIPAA security rule, security threats and controls, risk management, access, use, & disclosure/release of health information, corporate compliance, required reporting, and mandatory disclosure laws.

Credits

3

Requisites

- Placement in BS.HIT

Academic Level

Undergraduate

HIM425 - Healthcare IT Infrastructure and Network Management

Description

In this course, students learn about the primary infrastructure components of the modern healthcare information systems including hardware, software, and storage systems relevant to maintaining the healthcare network. Students will learn about planning, maintaining and auditing data communications and networks in an organization. Students engage in assignments focused on long and short-term planning, operations, maintenance and forecasting.

Credits

3

Academic Level

Undergraduate

HIM440 - Management of Health Information Services

Description

Evaluate information management planning, strategic planning, process re-engineering and work redesign, change management, and accreditation survey readiness.

Credits

Undergraduate

HIM480 - Health Information Management Capstone

Description

The capstone course is the culminating experience for the Bachelor of Science in Health Information Management or the Bachelor of Science in Health Information Management - Professional Practice Concentration. This course builds on the concepts of all courses students have taken within the program of study. The capstone course provides students with the opportunity to integrate and synthesize the knowledge and skills acquired throughout their course work in an original comprehensive project, and to assess their level of mastery of the stated outcomes of their degree program in Bachelor of Science in Health Information Management or the Bachelor of Science in Health Information Management - Professional Practice Concentration.

Credits

Undergraduate

Online Programs

HIM500 - Healthcare Informatics

Description

Students will learn the history and current state of healthcare and how the industry uses information systems. Throughout the course students will discuss types of information systems, such as the electronic medical record (EMR), laboratory and radiology systems and more. Students will also study trends in new practices, such as telemedicine and home healthcare, and how they function in various healthcare settings. Finally, students will explore how these and other industry trends, with the use of technology, can improve patient care.

Credits

3

Academic Level

Graduate

HIM510 - HIM Applications and Systems

Description

Topics related to health information management, including revenue management, coding and compliance, developing professional identity, terminology and classification systems, Health Insurance Portability and Accountability Act of 1996 (HIPAA), and current trends are explored. Students tour a medical facility either virtually or in person.

Credits

3

Academic Level

Graduate

HIM520 - Leading as a HIM Professional

Description

This course explores leadership roles, change management, and key topics in the health information management industry through an overview of leadership in organizations, human resource (HR) management, training and development, ethics, process improvements, work design, and developing and revising policies. Students examine ethical concepts and learn first-hand what the role of a health information management professional entails.

Credits

3

Academic Level

Graduate

HIM530 - Information Protection & Security in HIM

Description

Building on the HIPAA foundation established in HIM-510, students learn how to create and revise working policies and regulations within organizations based on existing laws, and how to adapt infrastructures to support these policy changes. Students explore access of medical records and how to discern when access should be prohibited based on the policies in place.

Credits

- Complete:
 - HIM510 - HIM Applications and Systems (3)

Academic Level

Graduate

HIM550 - Data Management and Data Quality

Description

Explore meaningful use of data and the management of patient-centered health information systems. Review data management policies, evaluate data from varying sources to create meaningful presentations/reports, design patient-centered health information systems, and manage virtual network communications. Learn how to collect data, evaluate it, and turn it into valuable information to present to various audiences.

Credits

3

Academic Level

Graduate

HIM560 - HIM Informatics and Technology Infrastructure

Description

Explore the technologies that support health information systems by examining different patient medical records and the various uses and steps in developing medical records. Create models of portals from a database-perspective.

Credits

3

Academic Level

Graduate

Online Programs

HIM600 - Managing Compliance

Description

Review the laws and regulations that are applicable to health information management professionals in regards to compliance, medical documentation, fraud, abuse, and penalties for documentation and coding violations based on governmental guidelines. Learn principles of medical auditing, medical record auditing skills, chart abstraction and perform a coding risk analysis.

Credits

3

Requisites

- Complete:
 - HIM520 - Leading as a HIM Professional (3)

Academic Level

Graduate

Online Programs

HEA530 - Data-Driven Decision-Making in Higher Education

Description

This course will further candidates' ability to methodically apply empirically based, data-centric approaches to inform institutional decision making across multiple university sectors. Through contextualized, authentic experiences, candidates will analyze, evaluate, and assess programs using contemporary technologies and develop evidence-based approaches to meet desired outcomes. Candidates will be required to justify the empirically based process by which they reached their programmatic decisions. Specific modes of inquiry driving this course will be strongly represented in subsequent course work.

Credits

3

Requisites

- 1 of the following:
 - HEA510 - Philosophy and History of Higher Education (3)
 - HEA520 - Contemporary Issues in Higher Education (3)

History

HIS100 - Perspectives in History

Description

More than just dates, names, and places, history is the study of the human condition. It seeks to understand human behavior through the thoughtful examination of different types of historical sources. The study of history is a living subject, always changing as new discoveries and interpretations are presented. This course examines the process of investigating and writing about history through analysis of sources and the presentation of this analysis as an argument. Through this exploration of historical investigation, students will develop a holistic perspective on the contemporary relevance of history and their responsibility to participate and engage in such discourse.

HIS520 - Historical Lenses and Scholarship

Description

What does it mean to focus on the economic issues of an historical event? What considerations of race, gender, class, or other lenses of difference can be made to illuminate the social and cultural experiences of people throughout history? The central focus of this course is to provide students with an exploration into various lenses of historical research and analysis and how these lenses can structure the types of questions an historian asks. The course uses the topic of transatlantic slavery to introduce several lenses that can be applied to future topics of interest to students. Students will integrate best practices for the production and writing of historical scholarship using a chosen lens (or lenses) of analysis.

HIS600 - Early American Encounters

Description

The modern nation of the United States of America was born out of European colonization and the early encounters between European colonists, Native Americans, and Africans and their descendants. The themes that arise from these early encounters as they created the New World continue to shape America's social, political, economic, and cultural landscape to this day. In this course, students investigate how historians understand the different facets of the creation of this New World, including armed conflict, cultural cooperation, gender roles, free and coerced labor, environmental issues, and the role of religion in conquest.

HIS601 - New American Nation

Description

America has held many titles as a result of its political inception, including "the birthplace of democracy" and "the first nation based on an idea." Does the historical evidence substantiate those claims? Was the American Revolution truly "revolutionary"? In this course, the separation of the American colonies from England and the political, cultural, social, and economic realities that resulted are critically examined. Students will challenge and refine previously held or popular notions of the period encompassing Revolutionary-era America through the early nineteenth century.

HIS602 - Era of the Civil War

Description

The era of the American Civil War is one of the most studied periods in American history. Despite the robust and well-established scholarship on the topic, vibrant debates and competing schools of thought still exist. In this course, students will add to this rich tradition with their own interpretations of the social, economic, cultural, and political roots of the conflict and its relevant impacts on the American narrative. Emphasis is placed on applying different methodologies and lenses to the vast historical body of knowledge surrounding the antebellum period through the Reconstruction era. Students evaluate the implications of methodology and lens on interpretations of the Civil War.

HIS604 - America and the World Wars

Description

As America emerged on the stage as a world power, it is not surprising that increased involvement in international affairs followed. America's participation in the world wars of the twentieth century brought about profound changes related to international diplomatic relations, the expanding role of the state in economic and military policy, cultural and ideological shifts domestically and globally, and technological innovations in weaponry, transportation, and manufacturing. While the consequences of warfare on the greater world stage are central to this course, students also will examine the myriad ways in which social, political, and cultural life transformed in the United States during this era. Students contend with how historians have, both implicitly and explicitly, inserted value judgments into their interpretations of the methods of war, political regimes, human rights issues, and geopolitical reorganizations of the era.

HIS605 - Cold War and the American Empire

Description

The Cold War period has been defined by America's ideological conflict and proxy warfare with the Soviet Union. The tremendous cultural, social, economic, and political turmoil that resulted from this era, including such events as the Vietnam War and the civil rights movement, can still be felt throughout the globe today. In this course, students draw connections among contemporary issues and their foundations in the period between the end of World War II and the fall of the Soviet Union. Students explore how the essential nature of this conflict compares and contrasts to traditional conceptions of "war," examine to what extent the Cold War was representative of a paradigm shift in terms of foreign policy and military engagements, and investigate the general relationship between war and society in this period.

HIS630 - The Russian Revolutions

Description

The Russian revolutions of 1917 rank among the most monumental events of the modern era. The collapse of the tsarist regime and the triumph of communism placed Russia on a tumultuous and often painful path toward modernization and forever changed the course of world history. Beginning with the 1890s and continuing until the early 1920s, this course will analyze the background, the unfolding, and the aftermath of the twin upheavals of 1917: the February Revolution that destroyed the Russian monarchy and the October Revolution that brought the Soviet government to power. Students will investigate the political, socio-economic, cultural, and ideological factors that shaped this transformation, and will also explore the interactions among revolutionary processes and military events such as World War I and the Russian Civil War. They will utilize recent scholarship on these topics to develop their own understanding of the historiography of the subject.

HIS660 - Introduction to Public History

Description

Unlike many other areas of history, public history distinguishes itself in its application focus and community orientation. Public historians are charged with protecting our historically significant artifacts, cataloging our historical wisdom, and communicating our cultural narratives. In this course, the foundational principles and mission of public history are investigated and evaluated. Students assess the landscape of public history, including the major thinkers, controversies, emerging trends, and ethical demands. Finally, students must articulate a distinct identity for public history and situate themselves within that context.

HIS662 - Digitization of History

Description

The potential and possibilities for preserving historical artifacts have been fundamentally transformed by digitization. The ability to design, plan, execute, and maintain digitization projects and repositories has become essential for public historians. In this course, students apply information system theories and utilize relevant technologies and tools to engage in the digitization process. An emphasis is placed on the need for public historians to take an adaptive and open-minded approach to technology, due to its capabilities for furthering the missions of public history.

HIS663 - Documentary Editing

Description

This course is one of three specialized offerings in public history collections management. The focus of this course is documentary editing, or the assembling of comprehensive document collections. Documentary editors must scrutinize, verify, and organize the resources upon which historical scholarship rests. This includes making the difficult, and potentially controversial, decisions about what is included and what is not. In this course, students engage in research, evaluation, transcription, annotation, and compilation of historical artifacts. The implications of documentary editorial decisions on future understandings of the past are assessed.

HIS664 - Archival Management

Description

This course is one of three specialized offerings in public history collections management. The focus of this course is archives, or the accumulation of historical records that have been set aside for future reference. Archivists must store, catalog, preserve, and retrieve archival materials that are considered to be of significance to a group. In this course, students apply the major theories of archival science to determine the authenticity, reliability, integrity, and usability of various records. Best practices for developing and maintaining archives are investigated. Additionally, the ethical considerations surrounding the care of records of social value are evaluated.

Humanities

HUM100 - Perspectives in the Humanities

Description

Art, literature, and philosophy tell lasting stories. Beyond the intended purpose of the artists and authors, or the shifting interpretations of the audiences, these creations tell us about cultural development, changes in worldview, and common themes that span centuries and continents. How have you come to understand the world? How do you express that understanding through the act of creating? This course investigates the purpose of art, literature, and philosophy across different periods, how its themes represent the cultures that produced it, and how that art still serves society today.

Credits

3

Academic Level

Undergraduate

Online Programs

HUM101 - Fundamentals of Ethics and Decision Making

Description

Explore the significance of individuality and human creativity. Consider the beliefs and values that drive your decisions, and examine the role of ethics in decision-making. This course is currently available for direct assessment programs only.

Additional Information

The goal name associated with this course is Identity and Decision Making

Credits

3

Academic Level

Undergraduate

HUM200 - Applied Humanities

Description

What is the purpose of art, literature, and philosophy? Is it enough to create simply for the act of creating, or should a work serve as a deliberate commentary, be it political, social, personal, or derivative of other motivations? In this course, students have the opportunity to select works, collections, or periods within the humanities for research and study. The study is guided by both subjective and objective analyses to differentiate between an artist's or author's intended meaning and a society's interpretation of that meaning.

Information Technology

IT100 - Introduction to Information Technology

Description

This is the fundamental computer fluency course. It is designed to promote a working knowledge and understanding of computer information technology concepts, skills and capabilities that support academic and professionally related goals and requirements. Students learn about the application and science of information technology. Concepts to master include the fundamentals of computer information technologies along with issues that affect people today such as : Internet and other network technologies, web publishing, digital media, hardware, software, file and database management, information security, viruses, and spyware, social impact, as well as algorithmic thinking and the limits of computation. Students develop capabilities such a managing complexity, assessing the quality of information, collaborating and communicating using IT, anticipating technological change and thinking abstractly and critically about IT. Students develop computer-related skills in support of their college studies and career goals. This is accomplished, in part, by the mastery of word processing, spreadsheet, presentation, and database software.

Credits

3

Academic Level

Undergraduate

IT101 - Professional Skills and Development

Description

In this course, students evaluate new technologies in areas of educational or professional interest. They establish plans for professional development that support goal achievement. Students also apply common techniques used for working with data. This course is currently available for direct assessment programs only.

3

Requisites

- 1 of the following:
 - IT200 - Fundamentals of Information Technology (3)
 - CS230 - Operating Platforms (3)

Academic Level

Undergraduate

Online Programs

IT226 - Communication in STEM Professions

Description

STEM professionals work in diverse organizational environments in which they must communicate varying types of information in different ways to multiple stakeholder audiences. Students will learn fundamental communication strategies for communicating technical and non-technical information to diverse audiences, and how to effectively negotiate and manage difficult conversations in the workplace.

Credits

3

Academic Level

Undergraduate

IT230 - Software Development with C#.NET

Description

This course is designed to introduce C#, an event-driven, fully object-oriented, visual programming language. The course covers the Visual Studio.NET integrated development environment (IDE) while covering the basics of the C# language. Topics include input / output statements, arithmetic and logical operations, control structures, program modules (methods and classes) and arrays. Students will be involved in writing programs of increasing complexity throughout the course. This is a programming course.

Credits

3

Requisites

- Complete:
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

IT235 - Database Design

Description

Develop database designs using industry-standard modelling tools and techniques. Evaluate user requirements to identify optimal database models that solve common business problems. Examine approaches to structural and object-orient design that consider today's varied data types.

Credits

3

Academic Level

Undergraduate

IT241 - Human Factors in Cybersecurity

Description

This course introduces students to the human factors present in cyber security related to ethics, integrity, practices, policies and procedures. Using a scenario-based approach, students will examine the human behaviors that could potentially cause a security threat and investigate how organizational policies and procedures can be developed to mitigate them.

Credits

3

Academic Level

Undergraduate

Online Programs

IT242 - Introduction to Geographic Information Systems

Description

This course is designed to introduce the student into the exciting new world of mapping software. Mapping software has found many uses throughout government, universities, business, as well as in the public policy arena. Students will learn how to use mapping tools that are available with data driven web sites, as well as learn how to create their own maps with mapping software. Students will learn how to work with different kinds of data sets and how to incorporate them into customized maps for analysis and presentation.

Credits

3

Academic Level

Undergraduate

IT252 - Information Technology Teams and Group Dynamics

Description

This course focuses on group functioning and leadership and the factors involved in group cohesion and conflict, and communication systems with a focus on the IT enterprise.

Credits

3

Academic Level

Undergraduate

IT253 - Computer Systems Security

Description

Students will explore the fundamentals of cybersecurity and related policies and procedures. Within the context of an organizational environment, they will examine concepts in the protection of data and personal information, and learn best practices in security planning within the information technology (IT) field.

Credits

3

Requisites

- Complete:
 - IT212 - Introduction to Computer Networks (3)

Academic Level

Undergraduate

Online Programs

IT255 - Introduction to the Linux Operating System

Description

Introduce students to the major components of the Linux operating system and the basics of the Linux command line. Work with files and directories, archive and compress files, and search and extract data from files using pipes and redirection. Learn how to package Linux commands within a script.

Credits

3

Requisites

- Complete:
 - IT201 - Computer Platform Technologies (3)

Academic Level

Undergraduate

IT260 - Web-Oriented Services

Description

Students will explore the purpose of various web-oriented services. In the context of an organizational environment, they will determine which web-oriented service would satisfy a business need or requirement, and learn the skills necessary for maintaining a web-oriented service solution.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - IT200 - Fundamentals of Information Technology (3)
 - 1 of the following:
 - CS200 - Computer Science's Role in Industry (3)
 - IT140 - Introduction to Scripting (3)
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

IT261 - IT Service Management

Description

The purpose of this course is to provide students with an understanding of the management of information technology, including the relationships of parties involved, the tools for IT process improvement, and best practices involved in the field. Students focus on the relationship among an IT organization, business customers, and users. They explore the customer's perspective of IT's contribution to the organization and they learn ways to communicate effectively with stakeholders. Students examine the relationships of IT service management to process improvement movements, for example, Six Sigma improvement methodology, total quality management (TQM), business process management (BPM), and Capability Maturity Model Integration (CMMI) standards.

Credits

3

Academic Level

Undergraduate

Online Programs

IT270 - Web Site Design

Description

This course serves as an introduction to creating interactive pages for the World Wide Web. Specifically, it will survey Internet concepts, network protocols and client-server communications. The course covers HTML, the language of the World Wide Web; the Document Object Model (DOM), essential to creating and manipulating elements of a Web page under program control; CSS, the syntax for building consistent styles and appearances across Web pages; and JavaScript, the programming language that cements the various technologies together to facilitate dynamic interactive elements.

Credits

3

Academic Level

Undergraduate

IT272 - Cross-Platform Technologies

Description

Students will explore contemporary systems and technologies such as virtualization, the Internet of Things (IoT), and artificial intelligence (AI). They will further examine the business, commercial, and personal implications, risks, and strategies of using cross-platform technologies.

Credits

3

Requisites

- Complete:
 - IT202 - Computer Operating Systems (3)
 - IT212 - Introduction to Computer Networks (3)

Academic Level

Undergraduate

IT304 - Systems Requirements and Implementation Planning

Description

Students will develop system requirements specifications and implementation plans reflecting organizational needs. As part of that process, they will explore the ethical implications of decisions with consideration of legal and organizational requirements.

Credits

3

Requisites

- Complete:
 - IT200 - Fundamentals of Information Technology (3)
 - QSO340 - Project Management (3)

Academic Level

Undergraduate

Online Programs

IT312 - Software Development with C++.NET

Description

This course teaches students how to design, implement and test applications in the C++ programming language. Topics include C++ data types, operators, functions, classes and inheritance. The course introduces students to issues associated with developing real-world applications by presenting several case studies. The concepts of object-oriented design and programming are covered. This is a programming course.

Credits

3

Requisites

- Complete:
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

IT313 - Risk Management and Mitigation in System Design

Description

Students will identify resources on legal, cultural, and internal requirements and assess the impact of those factors on an organization's information technology (IT) environment and systems design. Students will also learn industry best practices in order to analyze and develop risk analyses, mitigation plans, and communications to inform stakeholders.

Credits

3

Requisites

- Complete:
 - IT226 - Communication in STEM Professions (3)
 - QSO340 - Project Management (3)

Academic Level

Undergraduate

IT315 - Object Oriented Analysis and Design

Description

This course develops software systems engineering principles combining object-oriented design principles and methods augmented by computer assisted engineering (CASE) technology. The course involves use of the unified modeling language (UML) and, through the vehicle of a student group project, applies these elements to the system development life cycle. This course is writing intensive, as student project teams are required to submit a comprehensive project report and a PowerPoint presentation. Specialized Systems Development Computer Laboratory intensive and open laboratory intensive. Writing intensive course.

Credits

3

Academic Level

Undergraduate

Online Programs

IT320 - Network Security

Description

Gain an overview of network security defense techniques and countermeasures. Develop communication and analytical skills through the discussion and debate of a variety of topics, such as cryptanalysis and attacks, safety of wireless connections, intrusion detection methods, and access control. Engage in assignments designed to provide practical applications of content, such as the design and configuration of firewalls, traffic analysis and filtering, intrusion detection, statistical anomaly detection, and wireless security.

Credits

3

Requisites

- Complete:
 - IT340 - Network and Telecommunication Management (3)

Academic Level

Undergraduate

IT328 - Project Management in Information Technology

Description

Employ project management strategies specific to IT projects. Examine responsibilities of key stakeholders. Explain project planning with key considerations related to risk management and project tracking.

Credits

3

Academic Level

Undergraduate

IT331 - Human Factors in Information Technology

Description

This course addresses the importance of understanding and advocating for the end user in the development of IT applications and systems. Students will be exposed to Human-Computer Interaction (HCI) fundamentals including user and task analysis, human factors, ergonomics, accessibility standards, and cognitive psychology. Emphasis will be placed on user-centered methodologies in the development, evaluation, and deployment of IT applications and systems.

Credits

3

Academic Level

Undergraduate

Online Programs

IT332 - Infrastructure Management

Description

This course investigates the primary infrastructure components of modern information systems. In particular the course focuses on the main components of an information technology infrastructure: hardware systems; network; and storage structures. Students will recommend tools and technologies for managing IT infrastructures. Students will recommend solutions for enhancing information technology infrastructures to solve business problems resulting from process change or growth to an enterprise.

Credits

3

Requisites

- Complete:
 - IT340 - Network and Telecommunication Management (3)

Academic Level

Undergraduate

IT335 - Security Principles

Description

This course will focus on the fundamental principles of information security management from a systems perspective. While other courses will provide the deep dive into specific areas of security, this course will serve as an exploration into how the varying principles of systems-level information security management are employed to achieve secure solutions. Students will examine how security policies, standards, and controls can be reliably implemented to create trustworthy systems that mitigate risk in accordance with organizational security postures. Students will also gain insight into the systems-level security of information over time, touching on organizational, legal, and technological changes that impact the safety, reliability, and validity of information.

Credits

3

Requisites

- Complete:
 - IT320 - Network Security (3)
 - IT380 - Cybersecurity and Information Assurance (3)

Academic Level

Undergraduate

IT337 - User-Centered Systems Design and Evaluation

Description

Students will explore the process of designing systems with a concerted focus on end-users. By employing user-centered methodologies, students will design information technology (IT) applications and systems, as well as evaluate the user-experience for existing systems.

Credits

3

Requisites

- Complete:
 - IT304 - Systems Requirements and Implementation Planning (3)

Academic Level

Undergraduate

Online Programs

IT338 - Geospatial Programming

Description

This course will provide the fundamental skills necessary for geospatial programming. Topics will include calling geographic processing tools, batch processing, performing file input/output in an external computing language and building, graphical user interfaces, and displays. To support these tasks, students will learn basic object-oriented programming concepts.

Credits

3

Requisites

- Complete:
 - IT242 - Introduction to Geographic Information Systems (3)

Academic Level

Undergraduate

IT340 - Network and Telecommunication Management

Description

This course provides an in-depth knowledge of data communications and networking theory, concepts and requirements relative to telecommunications and networking technologies, structures, hardware and software. Emphasis is on the concepts of communications theory and practices, terminology, and the analysis and design of networking applications. Management of telecommunications networks, cost-benefit analysis and evaluation of connectivity options are covered. Students can design, build and maintain a local area network (LAN).

Credits

3

Requisites

- Complete:
 - IT201 - Computer Platform Technologies (3)

Academic Level

Undergraduate

IT345 - Network Planning and Maintenance

Description

In this course, students learn about the specifics of planning, maintaining, and auditing data communications and networks in an organization. Students engage in assignments focusing on business planning, long- and short-term planning, operations, maintenance, and forecasting. They also explore topological design, network synthesis, and network realization.

Credits

3

Academic Level

Undergraduate

Online Programs

IT355 - Web and Mobile User Experience

Description

Designers strive to optimize the interaction between the user and the system to create a smooth and productive user experience. Students in this course focus on the particular challenges of creating user-centered mobile applications. They also investigate the design process deliverables used to communicate with clients, technical leads, and stakeholders.

Credits

3

Academic Level

Undergraduate

IT365 - Operating Environments

Description

Learn about operating environments used in today's business computing environments, including enterprise level systems down to mobile devices. Gain an understanding of the components in an operating system and how they interact with each other and with system hardware and application software. Explore the importance of writing programs that take full advantage of operating support.

Credits

3

Requisites

- Complete:
 - IT145 - Foundation in Application Development (3)
 - IT255 - Introduction to the Linux Operating System (3)

Academic Level

Undergraduate

IT380 - Cybersecurity and Information Assurance

Description

This course explores the basic concepts in cybersecurity and information assurance. Topics include security policies, models, and mechanisms for secrecy, integrity, and availability of communications and information. The course also covers approaches to prevent, detect and recover from the loss of information, cryptography and its applications, vulnerability scanning, functions of a chief security officer software applications and web services for maintaining information security and security in computer networks and distributed systems.

Credits

3

Requisites

- Complete:
 - IT340 - Network and Telecommunication Management (3)

Academic Level

Undergraduate

Online Programs

IT385 - Information Technology Communications

Description

The course focuses on the essential oral and written communication tools and strategies used when communicating in technology organizations, emphasizing on how to make information more usable and accessible to multiple audiences. Students will review how to develop functional specifications and proposals, training programs, technical illustrations, and web information architecture.

Credits

3

Academic Level

Undergraduate

IT390 - Mobile Application Design and Development

Description

This course focuses on the techniques and tools necessary to achieve successful system implementation of mobile applications. Topics covered include managing the system implementation process, implementation design issues, how mobile application development is affected/constrained by existing software, techniques for writing quality code, techniques for testing code, understanding the role of proper documentation, and understanding, designing and managing implementation support functions. Students go through all the steps necessary to code, test and develop an actual mobile application. The course consists of a mix of lectures and hands-on laboratory work.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - IT145 - Foundation in Application Development (3)
 - 1 of the following:
 - IT201 - Computer Platform Technologies (3)
 - IT210 - Business Systems Analysis and Design (3)
 - Permission of instructor

Academic Level

Undergraduate

IT409 - Impact of Systems on Organizations

Description

Information Technology (IT) systems, business requirements, and constraints impact proposed changes to an organization's computing environment. Students will analyze current IT systems and the constraints and opportunities of an organization in order to solve computing problems and determine impacts of systems decisions on an organization.

Credits

3

Requisites

- Complete:
 - IT313 - Risk Management and Mitigation in System Design (3)

Academic Level

Undergraduate

Online Programs

IT412 - Cyberlaw and Ethics

Description

This course stresses the social and professional context of IT and computing related to ethical codes of conduct. Students will examine the historical, social, professional, ethical, and legal aspects of computing in the 21st century.

Credits

3

Academic Level

Undergraduate

IT415 - Advanced Information Systems Design (Capstone)

Description

This is the first of a two-part capstone course for IT majors which covers the major methodologies used in Systems Analysis, Design, and Implementation. This course focuses mainly on the systems analysis part of the systems development process and emphasizes SDLC (Software Development Life Cycle). Different system development strategies are examined within the broader context of identifying and understanding the detailed stages the make up the systems analysis process. Students will learn how to a perform feasibility analysis, and to create a system proposal. Fact finding techniques used to determine system requirements will be identified and studied. Standard graphical modeling tools used in systems analysis will be covered: process modeling with data flow diagrams; data modeling with entity relationship diagrams; and object-oriented modeling using UML. The basic activities of project management are examined. Students will be assigned a systems development project case with concrete milestones, enabling the practical application of concepts presented in the course. This is a lab intensive course.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - IT201 - Computer Platform Technologies (3)
 - IT235 - Database Design (3)
 - 90 credit(s).

Academic Level

Undergraduate

IT420 - Advanced Information Systems Implementation (Capstone)

Description

This is the second part of the Capstone course for IT majors. The student groups will implement and document the systems project designed in IT 415 using an appropriate computer programming language or database management system. The instructor and students critique all projects weekly.

Credits

3

Requisites

- Complete:
 - IT415 - Advanced Information Systems Design (Capstone) (3)

Academic Level

Undergraduate

Online Programs

IT423 - Computing as a Service

Description

Students will explore the use of cloud-based databases and design and implement a cloud-based system for an organizational need. Students will also learn about the implications for designing Internet of Things (IoT) software applications.

Credits

3

Requisites

- Complete:
 - IT272 - Cross-Platform Technologies (3)

Academic Level

Undergraduate

IT431 - Software Development in Distributed Systems

Description

Students learn XHTML, including how to use image maps, frames, cascading style sheets and scripting languages. Various browsers will be introduced. Server-side development using CGI, ASP, ColdFusion and PHP for distributed applications will be covered. Server-side topics such as servlets and JSPs, along with Java and XML, will be introduced. Writing intensive course.

Credits

3

Requisites

- Complete:
 - IT210 - Business Systems Analysis and Design (3)

Academic Level

Undergraduate

IT450 - Artificial Intelligence

Description

This course explores contemporary tools and principles of artificial intelligence that focus on Web commerce applications and business intelligence in particular. Topics include mining data for business intelligence and collaborative software agents that utilize resources on the Web to carry out tasks for individuals and organizations.

Credits

3

Requisites

- Complete:
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

Online Programs

IT460 - Machine Learning

Description

This course will address the computational study of artificial systems that adapt to novel situations, discover patterns from data, and improve performance with practice through popular frameworks for learning, including supervised, reinforcement, and unsupervised learning. Students will examine a state-of-the-art overview of the field, emphasizing the core statistical foundations.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:
 - MAT240 - Applied Statistics (3)
 - MAT243 - Applied Statistics for Science, Technology, Engineering, and Mathematics (STEM) (3)
 - Complete:
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

IT476 - Experiential Learning

Description

Participate in an experiential learning elective course that focuses on professional development, certification preparation or professional practice opportunities. Explore and learn new tools and technologies that help you hone your real-world technical knowledge, skills and abilities. This course requires a minimum of 60 hours in the learning experience and may be taken for credit a maximum of two times.

Credits

3

Requisites

- 60 credit(s).

Academic Level

Undergraduate

IT482 - IT Operations and Systems Planning

Description

Organizational strategy, mission, and vision influence the operational and strategic plans of an organization's information technology (IT) environment. Through the integration of these organizational requirements and consideration of applicable laws and regulations, students will design an IT operations plan and a strategic plan for the implementation of a new system architecture.

Credits

3

Requisites

- Complete all of the following
 - 90 credit(s).
 - Complete:
 - IT272 - Cross-Platform Technologies (3)
 - IT337 - User-Centered Systems Design and Evaluation (3)
 - IT409 - Impact of Systems on Organizations (3)

Academic Level

Undergraduate

Online Programs

IT489 - Information Technology Portfolio Planning

Description

This capstone course is the culminating experience for the B.S. in Information Technologies program. The aim of the capstone is to assess students' ability to synthesize and integrate the knowledge and skills they have developed throughout their coursework, rather than introducing new concepts. This course is structured to support student success in fulfilling program requirements.

Credits

3

Requisites

- Complete all of the following
 - 111 credit(s).
 - Complete:
 - IT420 - Advanced Information Systems Implementation (Capstone) (3)

Academic Level

Undergraduate

IT505 - Core Technologies

Description

This course familiarizes students with the basic concepts of information systems to strengthen their knowledge of hardware and software systems, including supporting information technology infrastructures. Students will gain an understanding of the application of fundamental information technology competencies related to computer networks, software and delivery systems for delivering products and service within an enterprise to customers, suppliers and clients. Additionally, students examine the skills and dispositions that shape their professional identities.

Credits

3

Academic Level

Graduate

IT510 - Advanced Information Technology

Description

This course focuses on the principles and practices underlying the analysis, design, implementation and management of information technology systems. Topics include information system development methodologies, systems planning, requirements analysis, systems implementation, software engineering, project management, and interface, database and process design.

Credits

3

Academic Level

Graduate

Online Programs

IT511 - Object Oriented Application Development

Description

This course provides a comprehensive introduction to the principles and practices of object-oriented software development and provides a foundation for developing quality software. Students develop skills in applying object-oriented concepts to solve software problems and implement solutions. The course also teaches the concepts and design of algorithms for problem solving and includes the topics of data structures as they are related to the algorithms that use them. The course provides the technical foundation necessary to handle the material covered in the subsequent IT courses.

Credits

3

Academic Level

Graduate

IT515 - Innovations in Information Technology

Description

In this course, students strengthen their understanding of leadership theory and ethical frameworks in the context of a technology enterprise. Students will apply this understanding to business cases that reflect the need for innovative technology solutions in today's workplace in order to transform the thinking of an organization when change is required or to develop ideas that enable new business strategies.

Credits

3

Academic Level

Graduate

IT520 - Technical Communication

Description

The course focuses on the essential oral and written technical communication skills needed for producing technical documentation and presentations in many different forms for varying business situations. The course enables students to understand the needs of stakeholders in order to develop different technical documents such as white papers, design specifications, project plans, test plans, user manuals, etc. The ability to communicate research findings using appropriate academic formatting will also be addressed.

Credits

3

Academic Level

Graduate

Online Programs

IT549 - Foundation in Information Assurance

Description

This course explores the basic concepts and prepares students with the foundation skills for the protection of networks, communication, and data, as well as the knowledge base for planning, implementing, and managing enterprise level security and system integrity. Topics include approaches in an organization to prevent, detect and recover from the loss of information, cryptography and its applications, security in networks and distributed environments.

Credits

3

Requisites

- Complete:
 - IT640 - Telecommunications and Networking (3)

Academic Level

Graduate

IT550 - Management of Information Technology

Description

This course is a detailed introduction to the major issues underlying the successful management of information technology in contemporary organizations. The course covers three major areas: (1) The interrelations between organizational structure and process, and the adoption of new information systems technologies; (2) The actual management of the IT function within the organization; and (3) IT project management which focuses on the operational steps in designing and carrying out specific IT projects. This course will utilize case studies as an introduction to real-world IT management best practices and strategies, and to guide students to understanding the impact of emerging technologies in business contexts.

Credits

3

Academic Level

Graduate

IT552 - Human Factors in Security

Description

This course examines the human factors present in cyber security related to ethics, integrity, practices, policies and procedures. Students will design information technology security awareness training and optimize information technology organizational factors to foster a healthy security culture within an organization. Additionally, students will recommend mitigation strategies to protect an organization from human behaviors that could potentially cause a security threat.

Credits

3

Requisites

- Complete:
 - IT549 - Foundation in Information Assurance (3)

Academic Level

Graduate

Online Programs

IT600 - Operating Systems

Description

This course focuses on computer architecture and the operating systems of digital computers. Students learn about the operational methods of hardware; the services provided by operating systems' software; acquisition, processing, storage and output data; and the interaction between computers. Topics include widely used operating systems such as DOS, Windows, and UNIX.

Credits

3

Requisites

- Complete:
 - IT510 - Advanced Information Technology (3)

Academic Level

Graduate

IT625 - Information Technology Project and Team Management

Description

This course introduces the students to the principles and practices necessary to be an effective IT project manager. The course covers project scope, time, cost, quality and human resource management techniques as applied to the kinds of project management problems and issues unique to the IT environment. Students learn how to design an actual IT project structure and will obtain hands-on experience using project management software. Emphasis is on the techniques of project management, leadership, teamwork and project risk management as applied to the IT environment. Case work is an important part of this course.

Credits

3

Academic Level

Graduate

IT632 - Software Design and Modeling

Description

This course covers software development life cycle models (waterfall, spiral, agile, etc.) with an emphasis on the design phase. Given software system requirements, students will create and document a software design using industry standard modeling techniques with emphasis on UML (class, sequence, state). Subtopics include software design patterns and software architecture (MVC).

Credits

3

Requisites

- Complete:
 - IT511 - Object Oriented Application Development (3)

Academic Level

Graduate

Online Programs

IT633 - Mobile Application Development

Description

This course examines the development of mobile applications, including mobile application frameworks, effective mobile application design, and data persistence. Students will construct a mobile application for the Android, iOS, or Windows mobile application market using Java, C# or Objective-C.

Credits

3

Requisites

- Complete:
 - IT511 - Object Oriented Application Development (3)

Academic Level

Graduate

IT634 - Distributed Application Development

Description

This course explores how to develop and deploy distributed web applications, including web services and HTML5 applications that run on a mobile device.

Credits

3

Requisites

- Complete:
 - IT511 - Object Oriented Application Development (3)

Academic Level

Graduate

IT640 - Telecommunications and Networking

Description

Telecommunications is a business resource that must be well managed. This includes the technical aspects and the application of telecommunications technology to solve specific business problems and enhance the strategic position of a business enterprise. Topics include the importance of telecommunication in today's business environment, the analysis, design and implementation of telecommunications systems, the scope of the telecommunications industry and current trends; telecommunications hardware, the Open Systems Interconnection (OSI) network model, networking technologies and telecommunications software, protocols and standards.

Credits

3

Requisites

- Complete:
 - IT505 - Core Technologies (3)

Academic Level

Graduate

Online Programs

IT643 - Network Assessment and Defense

Description

Explore a broad range of topics from secure network fundamentals, protocols and analysis; threats and vulnerabilities; application, data and host security, access control and identity management. Examine defensive measures to secure an organization's network. Identify overall network security posture and the basic practices in vulnerability assessment.

Credits

3

Requisites

- Complete:
 - IT549 - Foundation in Information Assurance (3)
 - IT640 - Telecommunications and Networking (3)

Academic Level

Graduate

IT647 - Website Construction

Description

This course is an introduction to the construction of interactive websites. It involves technical issues such as standards, HTML/XML, scripting, embedded rich media, and database connectivity, and design issues such as audience analysis, content organization, accessibility, page layout, styling and templates. The course focuses on designing websites with creative interfaces, aesthetic style, functional structure, and navigation.

Credits

3

Requisites

- Complete:
 - IT511 - Object Oriented Application Development (3)
 - IT650 - Principles of Database Design (3)

Academic Level

Graduate

IT648 - Website Optimization

Description

This course covers the methodologies that are used to drive traffic to websites and how to make websites profitable. In addition, methods of monitoring websites, such as counting users, click-throughs and more are explored. Students will examine how to gather statistics about website usage, demographics and other data relative to site popularity. This course also focuses on the creation of websites that serve diverse purposes, such as marketing, customer service, recruitment and more, including websites with international audiences. The differences between general and secure sites and the linking of diverse websites also will be explored.

Credits

3

Requisites

- Complete:
 - IT510 - Advanced Information Technology (3)
 - IT647 - Website Construction (3)

Academic Level

Graduate

Online Programs

IT649 - Interface Design for Websites

Description

This course expands the student's basic knowledge of web page and website development by providing in-depth focus on designing web applications with the user in mind. Students gain knowledge about how human factors relate to interface design. Guidelines for determining design problems and strengths, usability assessments, and best practices for common functions such as web navigation, menus, scrolling, graphics and icons are explored.

Credits

3

Requisites

- Complete:
 - IT647 - Website Construction (3)

Academic Level

Graduate

IT650 - Principles of Database Design

Description

This course is a study of the design, development and implementation of database management systems (DBMS) that emphasize relational DBMS architecture using SQL. Students will design and implement projects and complete case exercises as they are introduced to new developments in database design.

Credits

3

Requisites

- Complete:
 - IT510 - Advanced Information Technology (3)
 - IT511 - Object Oriented Application Development (3)

Academic Level

Graduate

IT655 - Database Application Development

Description

Analyze database designs and application functions and respond to run-time errors to identify opportunities for performance tuning. Utilize normalization techniques and optimize database queries to improve application performance. Develop recommendations for enhancing performance of commercial multi-user database applications.

Credits

3

Requisites

- Complete:
 - IT510 - Advanced Information Technology (3)
 - IT650 - Principles of Database Design (3)

Academic Level

Graduate

Online Programs

IT657 - Enterprise Resource Planning

Description

This course combines the practice of business management with information technology at the point where technology integrates with fundamental business skills that support business objectives. Students will examine business management best practices and enterprise systems in organizations that support business functions. Emphasis will be placed on how information technology can support and enable integration of technology and business process re-engineering.

Credits

3

Academic Level

Graduate

IT659 - Cyberlaw and Ethics

Description

This course addresses ethical and legal issues related to e-commerce and e-business. Students will investigate government approaches to content control and rights, access and jurisdiction regarding personal information, digital property, U.S. and international law, antitrust law, fraud and more.

Credits

3

Academic Level

Graduate

IT665 - Client/Server Systems

Description

This course focuses on the elements and methodologies used in the development of client server applications. Students design and build client applications that manipulate data in a shared database environment on a network. Topics include user interface design, object- oriented design, data management and data security. Theoretical concepts are reinforced with applications. The course is project- oriented, with students implementing projects using a front-end application development language.

Credits

3

Requisites

- Complete:
 - IT511 - Object Oriented Application Development (3)
 - IT650 - Principles of Database Design (3)

Academic Level

Graduate

Online Programs

IT675 - Data Warehouse Concepts and Design

Description

This course presents the principles of design, development, and recommended implementation strategies of a Data Warehouse DBMS based on the dimensional modeling architecture. Data warehouse management issues will also be examined, along with an introduction to data mining as a tool for analytical decision support. Students will design and recommend implementation strategies of a data warehouse architecture.

Graduate

IT697 - Experiential Learning

Description

Experiential learning is a short-term educational professional development or training experience opportunity that allow students to explore professional development; certification preparation and/or professional practice experiences, completing a minimum of 80 hours in that experience. The primary goal of the experiential learning opportunity is to expose students to actual practices in the professional workspace outside of the classroom. The students will relate this experience to academic coursework and synthesize the practical application of knowledge in an experiential setting. This is an elective experiential learning opportunity course intended for College of Online and Continuing Education students.

Graduate

IT700 - Capstone in Information Technology

Description

This capstone course is the culminating experience for the M.S. in Information Technology program. The aim of the capstone is to assess students' ability to synthesize and integrate the knowledge and skills they have developed throughout their coursework, rather than introducing new concepts. This course is structured to support student success in fulfilling program requirements.

Integrated Health Profession

Online Programs

IHP200 - Wellness Across the Lifespan

Description

Examine the stages of human development and life events that influence health and wellness throughout the lifespan. Students focus on a developmental framework as a frame to explore early adulthood through old age and death.

Credits

3

Academic Level

Undergraduate

IHP310 - Pathophysiology and Pharmacology Concepts

Description

This course explores common diseases, treatments, procedures and drugs needed to analyze healthcare documentation for functions such as abstracting, coding, auditing, and reimbursement. Drug classifications are also included. Implications related to pathophysiological and pharmacological concepts are applied to health information management.

Credits

3

Requisites

- Complete:
 - BIO210 - Introduction to Anatomy and Physiology (3)

Academic Level

Undergraduate

IHP315 - Patient Safety Systems and Strategies

Description

Students explore core tenets that promote a culture of patient safety, including assessment through the Hospital Survey on Patient Safety (HSOPS), incident and safety reporting systems, disclosure policies and communication and teamwork strategies including human factors and TeamSTEPPS. Additionally, students will examine methodologies to improve patient safety, including Root Cause Analysis, Failure Mode Effects Analysis and utilization of a system-wide Patient Safety Plan.

Credits

3

Academic Level

Undergraduate

IHP330 - Principles of Epidemiology

Description

Learn basic principles of epidemiology with emphasis on applications in healthcare management. Examine specific epidemiology tools used for purposes of planning, monitoring, and evaluating population health. Consider methods for managing the health of populations, understanding the factors that influence population health, and strategies that healthcare organizations and systems can use to control these factors.

IHP340 - Statistics for Healthcare Professionals

Description

This course explores the basic statistical concepts of inference, variability, and statistical significance. Statistical methods used to describe data, quantify relationships and to test for differences between means will be studied. Parametric statistics will be the main focus but some common nonparametric tests will be introduced. The course will focus on the interpretation of published research findings.

Credits

3

Academic Level

Undergraduate

IHP355 - Healthcare Regulatory Compliance and Accreditation

Description

Students will explore the history and development of key regulatory agency requirements and accreditation standards enacted to improve Patient Safety and Quality. Agencies reviewed will include The Joint Commission, Magnet, OSHA, CMS and state licensing bodies. Students will also explore how to assess compliance, manage quality and patient safety processes through development of healthcare organization plans, and ongoing evaluation and reporting requirements for key metrics and sentinel events.

Additional Information

The goal name associated with this course is Regulation and Compliance in Healthcare

Credits

3

Requisites

- Complete:
 - HCM340 - Healthcare Delivery Systems (3)

Academic Level

IHP420 - Ethical and Legal Considerations of Healthcare

Description

Students in this course examine the role of health care policy and legal, regulatory, and quality control in ethical decision making in healthcare. Students explore concepts and principles of health care policy, legal control, ethical conduct, and regulatory environments and their application to the health care environment. The impact of health care policy and multicultural, socioeconomic, political, legal, and regulatory factors on health care systems is explored.

Credits

3

Academic Level

Undergraduate

IHP430 - Healthcare Quality Management

Description

The goal of this course is to introduce students to the management of operations and explore how healthcare organizations can use advance methods to improve healthcare processes, delivery, and outcomes. Specific focus will be on analyzing cycle times (e.g., patient wait times), measuring productivity, streamlining process flows, tracking outcomes and performance metrics, and generally improving health management processes and health outcomes. The process improvement will be measured by how it can improve quality of care and safety of healthcare delivery, reduce waste, and reduce costs. The role of technology and innovative approaches in improving continuing quality improvement in healthcare delivery will be presented.

Additional Information

The goal name associated with this course is Healthcare Quality

Credits

3

Academic Level

Undergraduate

IHP435 - Performance Improvement Measurement and Methodologies

Description

This course will explore methodologies for performance improvement including PDSA, Six Sigma and Lean, principles of measurement, and selection of appropriate measures including structure, process and outcome measures. Students will determine how data should be displayed for target audience, identify statistical measures to describe data, and distinguish between common and special cause variation. Other topics will include developing operational definitions, establishing benchmarks and sampling.

Credits

3

Academic Level

Undergraduate

Online Programs

IHP450 - Healthcare Management and Finance

Description

This course focuses on the concepts, principles, tools, finances and strategies used in managing operations within a performance improvement model. Students will explore problem solving and decision making models as well as tools and techniques for planning, organizing, directing, controlling, reporting, and improving the productivity and performance of resources within a healthcare department. Additionally, topics will include healthcare finance reimbursement, bookkeeping, accounting principles, budgeting processes (capital and operating), and cost/benefits analysis.

Credits

3

Academic Level

Undergraduate

IHP501 - Global Health and Diversity

Description

In this interprofessional course students will explore major global health challenges and their impact on healthcare delivery systems. Topics explored include determinants of health, multiple approaches to advance health, social justice principles, and strategies to advocate for social justice. Students will gain knowledge to apply social justice and human rights principles to address global health and wellness.

Credits

3

Academic Level

Graduate

IHP505 - Leadership in Clinical Microsystems

Description

This course covers clinical microsystem concepts, tools, techniques, and processes. This course uses current theories to approach issues related to the redesign of healthcare services to improve quality, add value, reduce variation and improve morale, by empowering frontline caregivers.

Credits

3

Academic Level

Graduate

IHP510 - Marketing, Communications Strategies and Outreach

Description

This integrated course will explore healthcare strategic planning from a marketing and public relations perspectives. Topics explored will include health literacy, communicating the message, use of media and social media, and advertising. Students will understand how to conduct market needs assessment and develop and evaluate a marketing campaign.

Credits

3

Academic Level

Graduate

Online Programs

IHP515 - Population-Based Epidemiology

Description

This course focuses on research designs and methods to describe measures of disease occurrence and risk factor associations utilizing quantitative information to ascertain whether relationships exist between risk or protective factors and diseases in population. When looking at potential causal associations, it explores the role of chance, bias, and confounding and effect modification and how this may influence the design and interpretation of epidemiologic studies.

Credits

3

Academic Level

Graduate

IHP525 - Biostatistics

Description

This course provides students with a basic foundation of biostatistics and its role in public health and health sciences. The course covers the statistical principles that govern the analysis of data in public health and health sciences. Included in this course are exploratory data analysis, probability theory, confidence interval testing, hypotheses testing, power and sample size determination, and multivariable methods.

Credits

3

Academic Level

Graduate

IHP600 - Social & Organizational Issues in Healthcare

Description

Students will learn the social, ethical and organizational challenges healthcare workers at all levels face with the incorporation of technology into the healthcare setting. Students will study change management strategies, current in the Healthcare Industry, including the impact of introducing or enhancing clinical information systems, while providing quality care, and the effect of these systems on patients and on interdisciplinary teams within the healthcare setting.

Credits

3

Academic Level

Graduate

IHP604 - Healthcare Quality and Improvement

Description

This interprofessional course will take students through the process of healthcare delivery from a quality and safety lens. Students will gain a deeper understanding of how quality is measured, tracked, and improved in healthcare. They will focus on organizational assessments, commonly used tools, and the application of analytical frameworks to identify the root cause of an event. Students will gain knowledge of healthcare data relevance, use of change management principles and tools, and evaluation methods.

Credits

3

Academic Level

Graduate

Online Programs

IHP605 - Error Science, Risk Assess & Disclosures

Description

This course focuses on error theory and systems thinking as well as methods for risk assessment and safety improvement, including high-risk contexts for error occurrence. Students will be introduced to what is currently known about effective methods for error disclosure. Students will develop proficiency with patient safety risk assessment and improvement methods, principles of safe system design, apology and related patient safety priorities. The course includes a discussion of the legal issues prevalent in the current health care environment.

Credits

3

Academic Level

Graduate

IHP610 - Health Policy and Law

Description

In this interprofessional course, students will examine the ways that stakeholders and interest groups can influence health law and policies. Students will examine ways to articulate the needs of individuals, communities, and vulnerable populations based on cultural, socioeconomic, and political factors to key decision makers. They will explore concepts and principles of public health, health law, health policy, finance, and risk management in healthcare. Students will gain knowledge regarding health law and policy to inform decision-making.

Credits

3

Academic Level

Graduate

IHP620 - Economic Principles of Healthcare

Description

This course provides the student with a rigorous introduction to the micro- and macroeconomic theory to understand the healthcare landscape both from a financing and policy perspective. Topics explored include market behavior; demand theory; production and cost theory; decision-making in competitive and non-competitive markets, Gross Domestic Product determination; unemployment and inflation; and fiscal and monetary policy.

Credits

3

Academic Level

Graduate

IHP630 - Healthcare Finance and Reimbursement

Description

In this interprofessional course, students will explore healthcare reimbursement systems and financial principles relevant to strategic planning for healthcare organizations. Topics explored include revenue cycle management, governmental and non-governmental payment methodologies, and financial accounting principles. Students will gain knowledge of reimbursement methods and models, regulatory compliance requirements, and collaborative teamwork principles related to revenue cycle management.

Credits

Graduate

Online Programs

IHP640 - Measurement, Analysis, & Models for Performance Improvement

Description

This course examines the principles of measurement, analysis and models for performance improvement to promote continuous quality improvement. Design and data collection will be explored including sampling methodology, operational definitions, establishment of benchmarks, and data integrity and differentiating between structure, process and outcome measures. Topics for measurement and analysis examined include using statistics to describe data (e.g. mean, median, standard deviation); using statistical process control charts to identify trends and distinguish between common and special cause variation; using tools to evaluate a process or display data (e.g. fishbone, run charts, Pareto chart, control chart, etc.); and evaluating data to support decision-making. Students will also explore models for performance improvement including PDSA, Six Sigma and Lean. Nursing students who successfully complete the course with a B- or better will receive 45 indirect practice hours.

Credits

Graduate

IHP645 - Regulatory Compliance, Accreditation and Promoting a Patient Safety Culture

Description

This course explores the history of the patient safety movement, regulatory requirements and accreditation standards for healthcare organizations. Principles of patient safety and error science will include methods for risk assessment and safety improvement and analysis of errors through Serious Reportable Events, Root Cause Analysis and Failure Mode Effects Analysis. Students will be introduced to advanced communication strategies including group dynamics, power structures, team and team roles, hand-offs, chain-of-command, and error disclosure. Utilizing a systems thinking approach students will explore change management, collaborative practice, human factors, just and punitive cultures, and creating a high reliability organization through standardization of processes and transparency. Nursing students who successfully complete the course with a B- or better will receive 45 indirect practice hours.

Credits

Justice Studies

JUS101 - Introduction to Criminal Justice

Description

This course covers the nature, scope and impact of crime in the United States, independent and interdependent operations and procedures of police, courts and corrections, and introductory theories of crime and delinquency. The course introduces the justice model in a systematic way whereby students delve into the numerous components of the justice system including law enforcement, legal and judicial process and correctional operations. Career opportunities will be fully covered throughout the course.

Credits

3

Academic Level

Undergraduate

Online Programs

JUS102 - American Policing

Description

An introduction to the police system in America, which is the gateway to the criminal justice process. Topics considered include the historical foundations of police processes, occupational roles and tasks of law enforcement, and the nature and designs of typical, as well as innovative, police systems. Perennial problems of policing, particularly as it relates to community interaction, are also essential components of the course.

Credits

3

Academic Level

Undergraduate

JUS103 - Correctional Systems

Description

This course examines the management, structure, and organizational design of correctional institutions. Correctional planning, construction, program evaluation and community interaction will be considered and improvement strategies for correctional operations will be debated and critiqued. The course provides a broad based overview of the correctional system which incarcerates and confines, treats, and reclaims criminal personalities and protects and serves the state and the community by removing threats to the social order.

Credits

3

Academic Level

Undergraduate

JUS201 - Criminal Investigation

Description

This course is a comprehensive examination of civil and criminal investigations in both public and private modes, including most major felony processes and relevant civil actions. Focus is on the fundamentals of the investigative process and the range of skills necessary for successful performance and management of investigations, including evidence gathering and analysis, witness assessment, field techniques, and linkage between investigative and prosecutorial agencies.

Credits

3

Academic Level

Undergraduate

JUS215 - The Victim and the Justice System

Description

This course will examine issues surrounding the central character in a criminal act - the victim. Contents are designed to develop an understanding of what it means to be victimized, including the physical, psychological, and economic impact of crime upon victims, their families, and society in general. Special consideration will be given to specific victim populations (i.e. survivors of homicides, sexual assault, and family violence), secondary victimization by the criminal system, victim assistance programs, and future trends in this field. A full review of how the American justice system has responded to the needs of victims is part of the course content and includes a look at victim testimony at sentencing and parole and probation hearings, victim notification, Meghan's law, victim advisory and protection services, and other means in which the judicial system assures victim participation during the adjudicative phase.

Credits

3

Academic Level

Undergraduate

Online Programs

JUS261 - Judicial Administration

Description

An examination of the American judicial system, highlighting state, local, and federal tribunals, including an assessment of their hierarchy, subject matter jurisdiction, and administration. Also reviewed will be judicial reasoning, judicial process and the chief personnel responsible for judicial operations. More particularly the course will expose the various phases inherent in civil and criminal litigation including the concepts of jurisdiction, venue, parties and the pleadings that guide advocacy. Typical case calendars and dockets will be examined throughout the course so that students may acquire a complete understanding of the litigation process.

Credits

3

Academic Level

Undergraduate

JUS305 - International Criminal Justice

Description

This course compares and contrasts the criminal justice system of the United States with the systems of other countries on a substantive and procedural basis. A thorough examination of other cultural models of law and justice in order that differences in justice processing and definition become apparent. Some emphasis is placed on international policing and legal enforcement, whether through INTERPOL, treaty or other regulation.

Credits

3

Academic Level

Undergraduate

JUS325 - Law, Justice and Family

Description

A full-fledged review of the justice system's response to the establishment and maintenance of family in the American culture. How the family is defined, its heritage of rights and protections and the differentiated roles of parent and child are central considerations. Further review includes a look at family dissolution, divorce, custody and support disputes and the ongoing problems of visitation. The emerging problems of spousal and child abuse will be keenly analyzed and how the legal systems provide protection from these abuses will be closely scrutinized.

Credits

3

Academic Level

Undergraduate

JUS331 - Juvenile Justice System

Description

This course covers the juvenile justice system, with special emphasis on the way it procedurally differs from adult offender adjudication. The parts of the juvenile justice system, hearings, due process standards and constitutional mandates are fully reviewed. Status offenders and other youth classifications are considered, together with a historical summary of juvenile court philosophy. New trends in the procedural disposition of juveniles especially transfer to adult jurisdiction, types of punishment, suitability of the death penalty are discussed.

JUS375 - Criminal Law

Description

An introduction to substantive criminal law that reviews the social, philosophical, and legal foundations of criminal codification. In addition, the course covers the historical development of criminal law in the U.S. Other subject matters include parties to crimes including principals/accessories, criminal capacity, criminal elements, e.g. mens rea, actus rea, and the specific crimes against person, property, and public order. Lastly, the course captures criminal law from the defendant's perspective by reviewing the accuser's mental states, potential defenses and uses of mitigation.

JUS455 - Legal Traditions

Description

This course encompasses a complete examination of the law, its origins, roots and underpinnings in a jurisprudential context. Coverage includes a focused examination of classical, medieval and contemporary legal thinkers. Problems of personal privacy, sexual freedom, procreative control, the imposition of penalties, and notions of good will be considered. Course participants will consider these questions: What is law? Is law related to religion and morality? What are the foundations of law in Western Culture? Can law, ethics and morality be differentiated? How can a legal system be just? Can law shape morality or does morality shape law? How does Western legal tradition resolve ethical questions such as abortion, suicide, euthanasia, and the death penalty? Is there a unified vision of law that consists of the good, of virtue and the idea of justice?

LIT322 - Popular and Contemporary Fiction

Description

This course will analyze today's popular and contemporary fiction. What makes a book a "best seller" What makes literature sell in the millions of copies Writers who strike it rich generally write books that are fast paced and easy to read, following a set of conventions that readers recognize, and touch a nerve within their society. Writers who win the hearts of the literati and schoolmarms generally try to touch that nerve also, but they do so with language and plots that are inventive, artistic, and memorable. With a focus on current and past best sellers, this course will introduce you to a variety of literary sub-genres (true crime, memoir, road novel, extreme adventure, western, roots quest). The books we will read often return to themes of individualism, race, and violence in American culture- prominent elements in our psyches, popular culture, and pulp fiction- though we will certainly discuss other themes as well.

LIT330 - Gender and Text

Description

This course examines gender in and through literary texts and considers the ways in which categories of sexuality, sex, race, class, ethnicity, nationality, religion, and other factors influence writers' depictions of gender. The course analyzes historical conditions relevant to gender studies, and may address social and theoretical topics such as womens suffrage, feminisms, third-world feminism, the LGBTQ community, and queer theory. The course explores these topics through the lens of literature and asks: how is gender represented in literary texts how do literary texts not only replicate but sometimes contest or imagine new realities for gendered subjects what does it mean to write as a gendered subject Readings may include works by authors such as Mary Wollstonecraft, Oscar Wilde, Virginia Woolf, Audre Lorde, Gloria Anzalda, and Michael Cunningham.

LIT350 - The Black Literary Tradition

Description

This course offers an overview of African-American literature, with glimpses into African and Caribbean literature. Beginning around 1845 with Frederick Douglass' Narrative, students will read from various literary genres, including slave narratives, poetry, short stories, fiction and plays that illuminate both the history of African America and changing ideas of race. Students will conduct ongoing independent research, which they will present to the class, on the major literary and historical periods we cover, including the Harlem Renaissance in the 1920s and early 1930s, the civil rights movement(s), the Black Arts movement of the 1960s and early 1970s and the decades following. Reading works by Booker T. Washington, W.E.B. Dubois, Zora Neale Thurston, Ralph Ellison, Gwendolyn Brooks, Chinua Achebe, Toni Morrison and Ishmael Reed, among others, will enable us to analyze how sexuality, gender, class and nationality influence various writers' definitions of race and ethnicity.

LIT485A - Senior Thesis in Literature

Description

This course is an option for seniors of exceptional ability who are majoring in English language and literature and who wish to have a graduate-level research and writing experience in some chosen area of American, British or world literature. Students must petition to take the course. The following requirements are for undergraduate day campus students. Students who receive permission from the area coordinator/department chair and their academic advisors must proceed to formulate a written thesis proposal and assemble a three-person academic support committee, equipped with relevant expertise, no later than March 30th of the junior year. The proposal will then be submitted for approval to the individual's advisory committee. Assuming the project is universally approved, the student will meet with one or more members of the committee on a biweekly basis to review progress on research and written work. The final result will be a scholarly essay of 40 to 60 pages, to be presented as an academic paper in a public forum at least three weeks before graduation. Offered on an ongoing basis, as this is a yearlong course option. The following requirements are for undergraduate COCE students: Students who receive permission from their academic advisors must proceed to formulate a written thesis proposal to be submitted for approval to the selected instructor. If the project is approved, the student will collaborate with the instructor in the online course to review progress on research and written work. The final result will be a scholarly essay of 40 to 60 pages, to be presented to the instructor as a cohesive and polished academic paper with a supplemental essay that outlines plans to present/publish the paper after the course is complete. Offered on an ongoing basis, as this is, at a minimum, a two-term research and writing project.

LIT528 - Graduate Studies in Multi-Ethnic Literature

Description

Since the beginnings of American literature, writers have been concerned with defining and creating American identity through their art. Since the 1960s, during and after the Civil Rights movement, numerous writers have defined their American identity in relation to specific ethnic identities, writing works that explore how dual or multiple cultural identities coexist within themselves and within American culture, sorting through the stories they've heard and created about who they are. In this course, we will read fiction, poetry, and essays by twentieth-century American authors who identify with African American, Native American, Asian American, Jewish, Latino and Chicano heritages. In addition to race and ethnicity, we will discuss how class, native language, religion, gender, sexuality, and history figure into these writers' images of an American self and community.

MGT620 - Principles of Emergency Management

Description

This course examines the nation's emergency management system at all levels of government. Using exemplars and anti-exemplars, students will study how the system works to prevent disasters that are preventable, and how it works to mitigate the consequences of those disasters that are not. The National Incident Management System and the National Preparedness System will be studied and emphasized. Topics will include: communications, leadership, disaster management methods and program building models, the all-hazards concept and analysis, community resiliency, the whole-community concept, and the five national frameworks (Prevention, Protection, Mitigation, Response and Recovery) under the National Preparedness System. Students who complete this course will have a comprehensive understanding of the nation's emergency management system, and of how communities mitigate against, respond to, and recover from all disaster events.

MGT622 - Emergency Planning and Preparedness

Description

This course uses real-world disaster planning strategies and structures to prepare students for roles encompassing the construction of community or organizational disaster-preparedness programs. Various types of threats and hazards to communities and organizations will be studied. Using a scenario-based approach, students will examine existing real-world planning strategies intended to prevent or mitigate the consequences of a disaster event on communities. Students will use the latest guidelines and strategies from the Department of Homeland Security (DHS) and the Federal Emergency Management Agency (FEMA). Emphasis is on assessing risk, threats, and vulnerabilities to safeguard against disaster incidents. Emphasis will be on using FEMA systems and tools to assess and construct community disaster preparedness plans. Topics include: all aspects of the all hazards analysis, proper emergency management program building, including the use of community working groups, The National Preparedness System, the National Incident Management System, resilience planning, the whole community concept, the construction of community emergency management plans with FEMA standards, and roles and responsibilities of local, state, and federal government. Students who have completed this course will be well-prepared to plan and prepare for different types of emergencies, using the same FEMA guidelines and tools for disaster planning and program building currently in use by emergency managers throughout the county.

MKT231 - Visual Merchandising

Description

Retail marketing is a highly charged, highly competitive component of the marketing discipline. Consumers everywhere and of every age and economic category, are well informed by internet sources. Driven by access and awareness, they are looking to be courted and enticed to buy one merchant's goods over another. Visual merchandising is the art and business of creating such attraction, using merchandise that is color coordinated, accessorized, sparkling, exciting, and causing shoppers to stop, take a closer look, and buy. Visual merchandising is retail theater at its best, complete with costumes, props, and sets. Like all marketing, however, visual merchandising has a clear purpose - sales- and therefore is strategic in nature, a component of a larger marketing picture. This course addresses the creative and strategic nature of visual merchandising, connecting students with both the flair and fancy of visual merchandising and the nitty-gritty of strategic planning, and clarifying the connection between them.

Credits

MKT326 - Global Consumer Culture

Description

Every day, everywhere in the world, people make decisions about what to wear and how to wear it. Daily dressing is about much more than clothing. It includes making choices of clothing, accessories and grooming. Its relationship to human nature is at once biological, social and aesthetic. As cultures and geography changes around the world, so too do the representations of that relationship become more diverse. Dressing thus represents a broad swath of widely differing actions and decisions. This course studies the way consumers worldwide choose their dress forms to represent who and what they are, and how they wish to express themselves those around them. It considers both commonalities and differences in global consumer cultures of dress.

This course will develop the students' ability to effectively and successfully create, and implement a social media marketing campaign and evaluate as well as measure its success. Intensive skill building will be placed on creating, applying and integrating the appropriate social media tool that will enable marketers to build high-value relationships with their constituencies. The course will focus on key elements such as determining and matching social media tactics with the appropriate target market and developing strategies to engage those markets using relevant social media channels.

Credits

3

- Complete:
 - MKT555 - Social Media Marketing (3)

Academic Level

Graduate

MKT660 - Marketing Strategies for Not-For-Profit Organizations

Description

Students in this course apply marketing concepts and practices to not-for-profit organizations. This course also explores sources of financial support and strategies for their development.

Credits

3

Requisites

- Complete:
 - MKT500 - Marketing Strategies (3)

Academic Level

Graduate

MKT665 - Digital Story Telling and Branding

Description

Explore marketing theories and application of digital storytelling for the purpose of engaging an organization's consumers and stakeholders. In addition, focus on digital branding through storytelling to differentiate an organization from competitors while conveying its purpose and mission. Gain hands-on experience in the strategic implementation of a brand narrative using various marketing approaches and analyses.

MKT666 - Social Media Marketing Campaigns

Description

This course will develop the student's ability to effectively and successfully create and implement a social media marketing campaign and evaluate as well as measure its success. Intensive skill building will be placed on creating, applying and integrating the appropriate social media tools to meet the marketing objectives of the organization. The course will focus on key elements such as a) audience, b) campaign objectives, c) strategic plan, d) tactics, e) tools, and f) metrics to measure the campaign.

MKT668 - Services Marketing

Description

The world's economy is undergoing substantial change. Globally, many manufactured products have service components. Domestically, a shift in emphasis from a base in manufactured goods to an economy based in services is in progress. Whether a firm is marketing manufactured goods, services, or a combination, services marketing can provide a competitive advantage. Therefore, understanding the service aspect of business is a requirement for every marketer, in every company, in every industry. This course presents concepts, theories, models and measurements of services marketing using current literature in the field, cases and experiential opportunities. It stresses the global perspective and covers both B2B and consumer services.

Credits

3

Academic Level

Graduate

MKT675 - Ethical and Legal Issues in Marketing

Description

This course examines a range of ethical issues facing marketing managers as seen through the viewpoints of various comprehensive ethical theories. The goal is for students to develop their own ethical framework for making marketing decisions within the knowledge of the various ethical theories and U.S. marketing laws. Traditional topics such as ethics in marketing research, product liability, selling, advertising, and pricing are covered. Emerging ethical issues such as international marketing, competitive intelligence, socially controversial products, privacy, and corporate policies are also examined. However, topics may change to reflect current business concerns. The course is taught using a seminar format utilizing cases and readings.

MKT678 - Brand Management

Description

Strong brands are increasingly recognized as one of a company's most valuable assets. Brands create expectations in consumers, and by their nature implicate the company in delivering on those expectations. Therefore, the tasks of creating, building and managing brands are critical success factors for a firm. This course seeks to develop in students an understanding of the theories, models, and strategies that enable a firm to achieve its branding goals. Through a combination of text and current research publications, students will be exposed to current and emerging brand theories and models. By analyzing cases, and reading and reviewing current business literature, students will gain understanding into how those theories and models translate into strategies and implementations.

MKT679 - Advanced Marketing Research and Analytics (Capstone)

Description

This course is the capstone for the Marketing Research and Analytics concentration. The course will use the background knowledge from the Marketing Analytics and Marketing Research courses to assess marketing strategies based upon the analysis and interpretation of consumer behavior data.

Credits

3

Requisites

- Complete:
 - MKT618 - Marketing Analytics (3)
 - MKT630 - Market Research (3)

Academic Level

Graduate

MKT700 - Marketing Capstone

Description

This capstone course is the culminating experience for the M.S. in Marketing program. The aim of the capstone is to assess students' ability to synthesize and integrate the knowledge and skills they have developed throughout their coursework, rather than introducing new concepts. This course is structured to support student success in fulfilling program requirements.

Credits

3

Requisites

- Complete all of the following
 - 30 credit(s).
 - Complete:
 - MKT675 - Ethical and Legal Issues in Marketing (3)

Graduate

Online Programs

MKT710 - Marketing Internship

Description

The primary goal of the internship experience is to expose graduate students to actual practices in the world of work outside of the classroom, to relate this experience to academic course work and to synthesize the two in a practical application of knowledge in an experiential setting. Secondly, internships offer the opportunity to develop crucial job searching skills, explore career interests, enhance your resume, make contacts in your chosen field and build references for future employment. Each intern will work in a career-related position during the academic term for which the student is enrolled for the internship - Term 1, Term 2, Term 3 or Term 4 - completing a minimum of 150 hours on the job per 3 credits.

Credits

3

Requisites

- Complete all of the following
 - 18 credit(s).
 - Earned a minimum cumulative GPA of 3
 - Grad Internship only
 - Instructor approval to register
 - CDC approval to register

Mathematics

MAT050 - Fundamentals of Algebra

Description

This course includes a review of basic arithmetic and an introduction to elementary algebra. Topics may include: pre-algebra review; real numbers; algebraic expressions; linear equations/inequalities; quadratic equations; graphing; systems of equations; exponents, polynomials and rational expressions. (Credits awarded for this course are in addition to the 120-credit minimum graduation requirement.)

Credits

3

Academic Level

Developmental

MAT125 - Quantitative Reasoning & Problem Solving

Description

This course focuses on the development of sound quantitative reasoning and problem solving skills, as applied to everyday situations. While this course will have computational elements, the focus is to be placed on conceptual understanding and creative problem solving through relevant applications. Problem solving strategies, inductive/deductive reasoning, analysis of quantitative information and arguments, and communication are the enduring threads.

Additional Information

The goal name associated with this course is Using Data to Inform Decisions

Credits

3

Academic Level

Undergraduate

Online Programs

MAT130 - Applied Finite Mathematics

Description

This course is designed to prepare students for other courses in the core curriculum and in their majors and to provide a basis for making decisions in life after graduation. Topics include mathematics of finance, probability and counting, descriptive statistics and basic linear regression. (Students who have successfully completed MAT 120 or MAT 150 may not register for MAT 130).

Credits

3

Academic Level

Undergraduate

MAT133 - Introduction to Statistical Analysis

Description

Explore the concepts of probability and statistics using technology applications. Learn about statistical design and analysis using the theories of probability and the tools of descriptive statistics. Gain statistical analysis skills through the use of computer software.

Credits

3

Academic Level

Undergraduate

MAT135 - The Heart of Mathematics

Description

The Heart of Mathematics considers the history, mathematical beauty, and real world applications of a wide variety of topics. This discussion-based course encourages "out-of-the-box" thinking to explore the connections between mathematics and the world around us. Topics may include: patterns in nature, infinity, topology, geometry, networking, fractals, and chaos theory, among others.

Credits

3

Academic Level

Undergraduate

MAT136 - Introduction to Quantitative Analysis

Description

Students will learn about simplification of algebraic expressions, techniques for solving equations and functions, and graphical and numerical summaries of data, and their authentic applications. Students will develop quantitative analysis skills in systems of linear equations, properties of functions and expressions, polynomials, and their representations.

Additional Information

The goal title associated with this course is Introduction to Quantitative Analysis

Credits

3

Academic Level

Undergraduate

Online Programs

MAT140 - Precalculus

Description

This course emphasizes the algebra and concepts of functions. Students will learn the properties and graphing techniques for different types of functions including: linear, polynomial, rational, trigonometric, exponential, and logarithmic functions. Students will also learn to solve a variety of real world problems that rely on a number of different problem solving strategies and an understanding of these different types of functions. This course is intended for those students who wish to prepare for Calculus.

Credits

3

Requisites

- Complete 1 of the following
 - Complete:
 - MAT136 - Introduction to Quantitative Analysis (3)
 - Passing Math Alignment Score

Academic Level

Undergraduate

MAT210 - Applied Calculus I

Description

This is an introductory course in single-variable calculus. Topics include limits, continuity, derivatives, differentiation, integration and the Fundamental Theorem of Calculus. Students will gain experience solving real-world problems involving calculus, including problems in business, economics, natural sciences and social sciences.

Credits

3

Academic Level

Undergraduate

MAT211 - Applied Calculus II

Description

This course is a continuation of MAT 210. Topics include integration by parts, functions of several variables, trigonometric functions, techniques of integration, differential equations, Taylor polynomials and infinite series. Students will learn applications in business, economics, natural sciences and social sciences. Students may not take both MAT 211 and MAT 275 for credit.

Credits

3

Requisites

- Complete 1 of the following
 - Complete all of the following
 - of the following:
 - MAT210 - Applied Calculus I (3)
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - Complete course with C or better grade.
 - AP Calculus with exam grade of 3 or better

Academic Level

Undergraduate

Online Programs

MAT223 - Applications of Calculus

Description

Examine the applications of differential and integral calculus within the fields of STEM. Learn about limits, continuity, derivatives, differentiation, integration, and the Fundamental Theorem of Calculus. Develop in-depth knowledge of techniques of calculus used to solve application problems encountered in STEM studies.

Credits

3

Requisites

- Complete:
 - MAT140 - Precalculus (3)

Academic Level

Undergraduate

MAT225 - Calculus I: Single-Variable Calculus

Description

Calculus is the mathematical study of change that has widespread applications in science, engineering, economics and business. This course provides a rigorous introduction to single-variable calculus. Topics include limits, continuity, differentiation and integration of algebraic, trigonometric, exponential, and logarithmic functions, applications of derivatives, and integration, including the Fundamental Theorem of Calculus. This course will encourage students to think beyond memorizing formulas and to work towards understanding concepts.

Credits

3

Requisites

- Complete 1 of the following
 - Complete:
 - MAT140 - Precalculus (3)
 - Passing Math Alignment Score

Academic Level

Undergraduate

MAT230 - Discrete Mathematics

Description

Discrete mathematics is the study of mathematical structures that are fundamentally discrete rather than continuous. That is, in contrast to the real numbers that vary continuously, the objects of study in discrete mathematics take on distinct, separated values. Topics include operations on sets, logic, truth tables, counting, relations and digraphs, functions, trees and graph theory. A significant goal of this course is to improve students' critical-thinking and problem-solving skills.

Credits

3

Academic Level

Undergraduate

Online Programs

MAT240 - Applied Statistics

Description

This is a fundamental course in the application of statistics. In this course, students will learn to apply statistical techniques to a variety of applications in business and the social sciences. Students will learn how to solve statistical problems by hand and through the use of computer software. Topics include probability distribution functions, sampling distributions, estimation, hypothesis testing and linear regression.

Additional Information

The goal name associated with this course is Applied Statistics

Credits

3

Academic Level

Undergraduate

MAT243 - Applied Statistics for Science, Technology, Engineering, and Mathematics (STEM)

Description

Students will examine STEM applications of statistical inferential techniques. Students will learn how to solve statistical problems using a scripting language. Additionally, students will learn how to apply various statistical techniques such as probability distributions, sampling distributions, estimation, hypothesis testing, and linear regression.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - MAT136 - Introduction to Quantitative Analysis (3)
 - 1 of the following:
 - IT140 - Introduction to Scripting (3)
 - CS200 - Computer Science's Role in Industry (3)

Online Programs

MAT260 - Cryptology

Description

Cryptology is a mathematically rich subject that includes both cryptography - the science of making secret codes - and cryptanalysis - the science of breaking secret codes. Historically, cryptology has played a central role in military and government covert actions and modern-day data security. In this course, we develop a number of mathematical topics including modular arithmetic, statistics, probability, permutation functions, algorithms, binary numbers, base twenty-six, primes, factorization, the Euclidean algorithm, and Fermat's Little Theorem as they pertain to classical cryptographic techniques, symmetric computer-based cryptography, and public key cryptography. We also examine the historical backdrop of cryptology and examine legal issues concerning cryptology.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:
 - MAT140 - Precalculus (3)
 - MAT210 - Applied Calculus I (3)
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT230 - Discrete Mathematics (3)
 - NOTE: Students must earn a grade of C or better.

Academic Level

Undergraduate

MAT275 - Calculus II: Integration & Series

Description

This course is a continuation of MAT 225 that deepens a student's understanding of single-variable calculus. Students will learn new techniques of integration, including substitution, integration by parts, partial fractions, and integration tables. This course will also extend a student's knowledge of addition. That is, students already know how to add two, three, or n numbers together but, in this course they will learn how to add an infinitely many numbers together. This will enable students to represent differentiable functions-including exponential, trigonometric and logarithmic functions-as functions that look like polynomials with infinitely many terms. In doing so, students will enhance their abilities to evaluate and estimate integrals. Finally, students will also learn about parametric curves and polar coordinates-both useful tools for describing the motion of moving objects such as projectiles, planets, or satellites-in order to apply single-variable calculus skills in additional settings. Students may not take both MAT 211 and MAT 275 for credit.

Credits

3

Requisites

- Complete:
 - MAT225 - Calculus I: Single-Variable Calculus (3)

Academic Level

Undergraduate

Online Programs

MAT299 - Mathematical Proof and Problem Solving

Description

This course introduces students to the language and methods used to create and write mathematical proofs and solve problems. Methods of proof will include: direct, contrapositive, contradiction, and induction. Methods of problem solving will be based on Polya's four steps for problem solving. Students will learn about and utilize the many functions of proof including: verification, explanation, communication, discovery, justification, and inquiry. The course will also explore the relationship between problem solving and the process of proving. Students will explore fundamental abstract concepts in mathematics including: functions and relations, set theory, number theory, and logic.

Credits

3

Requisites

- Complete:
 - MAT230 - Discrete Mathematics (3)

Academic Level

Undergraduate

MAT300 - Applied Statistics II: Regression Analysis

Description

This is a second course in statistics that builds upon knowledge gained in an introduction to statistics course. Students will learn to build statistical models and implement regression analysis in real-world problems from engineering, sociology, psychology, science, and business. Topics include multiple regression models (including first-order, second-order and interaction models with quantitative and qualitative variables), regression pitfalls, and residual analysis. Students will gain experience not only in the mechanics of regression analysis (often by means of a statistical software package) but also in deciding on appropriate models, selecting inferential techniques to answer a particular question, interpreting results, and diagnosing problems.

Credits

3

Requisites

- 1 of the following:
 - MAT240 - Applied Statistics (3)
 - MAT243 - Applied Statistics for Science, Technology, Engineering, and Mathematics (STEM) (3)

Academic Level

Undergraduate

MAT303 - Applied Statistics II for Science, Technology, Engineering, and Mathematics (STEM)

Description

In this course, students will build upon the knowledge and skill gained in Applied Statistics for STEM. Students will learn to build statistical models and implement regression models with a scripting language for various authentic STEM applications. In addition, students will learn to apply quantitative and qualitative models for making estimations and predictions. Students will also gain experience conducting regression diagnostics to validate models utilized for statistical analysis.

Credits

3

Requisites

- Complete:
 - MAT243 - Applied Statistics for Science, Technology, Engineering, and Mathematics (STEM) (3)

Academic Level

Undergraduate

Online Programs

MAT325 - Calculus III: Multivariable Calculus

Description

Many real-world applications of calculus in science, engineering, economics, and business employ functions with many variables. This course extends the basic concepts of single-variable calculus developed in MAT 225 and MAT 275 to functions of several variables. Topics include vectors, the geometry of space, vector-valued functions, motion in space, partial derivatives and multiple integrals.

Credits

3

Requisites

- Complete:
 - MAT275 - Calculus II: Integration & Series (3)

Academic Level

Undergraduate

MAT330 - Differential Equations

Description

Differential equations are useful in modeling real-world phenomenon involving rates of change such as the spread of disease, the change in a population, the free fall of an object, and the decay of a radioactive substance. This is a first course in differential equations. Topics include solving first- and higher-order differential equations and modeling with first- and higher-order differential equations.

Credits

3

Requisites

- 1 of the following:
 - MAT211 - Applied Calculus II (3)
 - MAT275 - Calculus II: Integration & Series (3)

Academic Level

Undergraduate

MAT350 - Applied Linear Algebra

Description

This is a first course in linear algebra and matrices. Topics include systems of linear equations, linear independence, matrices of linear transformations, matrix algebra, determinants, vector spaces, eigenvalues and eigenvectors. After mastering the basic concepts and skills, students will use their knowledge of linear algebra to model a selection of applied mathematics problems in business, science, computer science and economics.

Credits

3

Requisites

- 1 of the following:
 - MAT210 - Applied Calculus I (3)
 - MAT225 - Calculus I: Single-Variable Calculus (3)

Academic Level

Undergraduate

Online Programs

MAT375 - Mathematical Modeling

Description

This course introduces students to the art of mathematical modeling. Using a scenario-based approach, students will examine model construction, analysis, interpretation, and evaluation in a wide variety of contexts. Graphical, numerical, and symbolic techniques are employed to investigate real world data and phenomena.

Credits

3

Requisites

- Complete:
 - MAT325 - Calculus III: Multivariable Calculus (3)
 - MAT330 - Differential Equations (3)
 - MAT350 - Applied Linear Algebra (3)

Academic Level

Undergraduate

MAT410 - Operations Research

Description

This course introduces students to deterministic modeling in the field of operations research. Using a scenario-based approach, students will explore linear, integer, and nonlinear programming as applied to classical and contemporary optimization problems.

Credits

3

Requisites

- Complete:
 - MAT375 - Mathematical Modeling (3)

Academic Level

Undergraduate

MAT415 - Abstract Algebra

Description

Algebra is concerned with sets of objects and operations on these sets. This course will take students beyond the real number and polynomials to groups and other algebraic structures. In a modern, or abstract algebra course, one assumes a small number of basic properties as axioms and then proves many other properties from the axioms. This will assist the student in becoming more proficient at proof-writing.

Credits

3

Requisites

- Complete:
 - MAT299 - Mathematical Proof and Problem Solving (3)

Academic Level

Undergraduate

Online Programs

MAT420 - Dynamical Modeling

Description

This course introduces students to dynamical models within the field of science. Linear and nonlinear models and systems are explored through the lens of classical and contemporary science applications. Emphasis is placed on stability, bifurcations, and linearization.

Credits

3

Requisites

- Complete:
 - MAT375 - Mathematical Modeling (3)

Academic Level

Undergraduate

MAT430 - Seminar in Applied Mathematics

Description

In this culminating course, students apply mathematical and/or statistical skills to a particular focus area by completing a research project in applied mathematics. The topic of the project is selected from a list of topics in the applied sciences (economics, engineering, physics, chemistry, biology, epidemiology, pharmacology, physiology, music, or the social sciences) or may be chosen by the student with instructor approval. Application of technology tools is required to model the problem, obtain quantitative results, and complete the project.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - MAT375 - Mathematical Modeling (3)
 - 1 of the following:
 - MAT300 - Applied Statistics II: Regression Analysis (3)
 - MAT303 - Applied Statistics II for Science, Technology, Engineering, and Mathematics (STEM) (3)
 - MAT410 - Operations Research (3)
 - MAT420 - Dynamical Modeling (3)

Academic Level

Undergraduate

MAT450 - History of Math and Math Education

Description

This course will look at the historical development of the disciplines of mathematics and mathematics education. Within the discipline of mathematics we will examine the development of number and number systems, geometry and measurement, algebra, probability and statistics, calculus, and discrete mathematics. Within the discipline of mathematics education we will examine the development of learning theories, theories of teaching mathematics, research trends, and mathematics curriculum. Throughout this course students will study the history of mathematics and mathematics education through readings, case studies, and problem sets.

Credits

3

Requisites

- 60 credit(s).

Academic Level

Undergraduate

Online Programs

MAT470 - Real Analysis

Description

This course provides a theoretical foundation for single-variable calculus concepts. Topics include the structure of the real numbers, sequences, continuity, differentiation and Riemann integration. This course will be run as a seminar that emphasize problem solving, proof writing and orally defending proofs.

Credits

3

Requisites

- Complete:
 - MAT299 - Mathematical Proof and Problem Solving (3)

Academic Level

Undergraduate

Mental Health Counseling

MHC500 - Professional Issues, Ethics, and Laws in Clinical Mental Health Counseling

Description

Focus on the role of the counseling profession in the variety of mental health systems, including community, state, and federal agencies, hospitals, and private-practice. Explore HIPAA and related laws, informed consent policies, internal procedures, populations served, relevant laws and state statutes, funding, and ethical considerations counselors' role in the legal system, consultation, operationalizing of a practice, grants and program evaluations. Consider questions such as, 'where do I fit in the profession?' and 'how does the counseling profession impose structure on the mental health system?'.

Credits

3

Requisites

- Complete:
 - COU650 - Diagnosis of Emotional and Mental Disorders (3)

Academic Level

Graduate

MHC610 - Treatment Planning in Clinical Mental Health Counseling

Description

Integrate the content learned throughout the program regarding evaluation, assessment, and diagnosis so that it may be utilized in practicum. Develop treatment plans that include risk assessment, goal setting, and treatment intervention strategies. Communicate treatment plans to clients.

Credits

3

Requisites

- Complete:
 - COU680 - Prevention and Intervention of Crisis and Trauma (3)

Academic Level

Graduate

Online Programs

MHC670 - Clinical Mental Health Counseling Practicum

Description

Integrate skills and knowledge by working with actual clients under the supervision of a licensed clinician. Meet weekly in a required synchronous small group session in a seminar-style course led by a faculty supervisor. A minimum of 100 hours at an approved counseling site is required. Demonstrate success in field experience through a satisfactory/unsatisfactory grade evaluation.

Credits

3

Requisites

- Complete:
 - COU690 - Advanced Individual and Group Helping Skills and Techniques: Residency II (3)
 - MHC610 - Treatment Planning in Clinical Mental Health Counseling (3)

Academic Level

Graduate

MHC680 - Clinical Mental Health Counseling Internship

Description

Integrate skills and knowledge by working with actual clients under the supervision of a licensed clinician. Meet weekly in a required synchronous group session in a seminar-style course led by a faculty supervisor. A minimum of 600 hours of total internship time split between Internship and Advanced Internship at an approved counseling site is required. Demonstrate success in field experience through a satisfactory/unsatisfactory grade evaluation.

Credits

3

Requisites

- Complete:
 - MHC670 - Clinical Mental Health Counseling Practicum (3)

Music

MUS223 - Appreciation and History of Music

Description

This course introduces students to the scope and history of Western art music, with emphasis on music of the Baroque, Classical, Romantic and Modern periods. It provides vocabulary, concepts and aural skills that allow listeners to hear with greater discernment and appreciation. Topics include composers, styles, instrumentation, form, texture and cultural contexts.

Credits

3

Academic Level

Undergraduate

Nursing

NUR300 - Scholarly Inquiry

Description

This course is designed to introduce the licensed registered nurse to the role of the bachelor's prepared nurse in complex health care setting. The Transformational model of learning will be the foundation to develop scholarly inquiry in order to improve practice. Skill development in critical reflection, assessing evidence, professional writing, study habits, and work-life balance will be essential for success. The goal is to provide a knowledge base in nursing theory to improve nursing practice. The role of the Bachelor's prepared nurse as a patient advocate, clinical expert and a leader in evidence-based practice and transformation of health care will be emphasized. The course will discuss the capstone course and development of a project.

Credits

3

Requisites

- Must be enrolled in Nursing program

Academic Level

Undergraduate

Online Programs

NUR305 - Information Management and Patient Care Technologies

Description

This course explores patient care technologies, information systems, telecommunication technologies, and communication devices that support safe nursing practice. Topics covered include standardized terminology; electronic health record, patient portal, meaningful use, and pay for performance; data integrity, abstraction and mining; use of clinical decision support tools to promote patient safety, and ethical and legal issues related to information technology.

Credits

3

Requisites

- Must be enrolled in Nursing program

Academic Level

Undergraduate

NUR315 - Pathophysiology for Nurses

Description

This course introduces the student to common health problems in individuals. Adult conditions will be reviewed. Cellular disruptions resulting from environmental, genetic, and stress conditions will be analyzed. The understanding of nursing process to assess, diagnose, plan and implement treatments for disease processes will serve as the foundation for decision-making and management. Diagnostic evaluations and holistic management of selected disease processes will be explored.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - BIO205 - Human Anatomy and Physiology I (3)
 - BIO211 - Human Anatomy and Physiology II (3)
 - BIO212 - Microbiology (3)
 - Placement in BSNII

Undergraduate

Online Programs

NUR325 - Patient Assessment and Health Literacy

Description

The student will analyze health assessment methods and communication strategies for diverse populations across the continuum of care in this course. An overview of assessment techniques and patient education will be explored in order to support informed health care decisions. Development of interpersonal effectiveness and cultural competence will be the focus of competency for the student. The goal of health literacy will be to develop verbal and written communication strategies that nurses can use to effectively meet the individualized needs of the patient to promote health and address illness. The student will review standards of care and regulations which oversee the provision of safe and effective care. This three-credit hour course will include 45 hours of practical application of the knowledge, skills, and attitudes acquired in the course.

Credits

3

Requisites

- Complete all of the following
 - Must be enrolled in Nursing Program
 - Complete:
 - NUR315 - Pathophysiology for Nurses (3)

Academic Level

Undergraduate

NUR350 - Community and Population Health

Description

In this course, the student will develop the ability to assess, analyze, and recommend change for health issues for groups and in communities. Topics will include local and regional conditions that affect vulnerable populations through the lifespan. Case management and care coordination will be discussed. Application of community health principles will be the foundation for recommending interventions. The prevention will include diverse, environmental disease treatments and healthcare policy strategies. This three credit hour course will include 45 hours of practical application of the knowledge, skills, and attitudes acquired in the course.

Additional Information

NUR350AP - Community and Population Health AP

Description

In this course, the student develops the ability to assess, analyze, and recommend change for health issues encountered in groups and communities. Topics include local, regional, and global conditions affecting vulnerable populations throughout the lifespan. Application of community health principles are the foundation for recommending interventions. Diverse environmental, disease treatments, and health care policy strategies are the goal for prevention. Focus is on the leadership role of the nurse in collaborating to improve and promote health. Students are expected to demonstrate competency in one Master's level program outcome. This course includes 45 hours of practical application of knowledge, skills, and attitudes required of the baccalaureate-prepared nurse.

Credits

3

Requisites

- Complete all of the following
 - Complete all of the following
 - Placement in BSNII
 - or placement in Nursing, RN to BSN
 - Advanced Pathway Student

Academic Level

Undergraduate

NUR400 - Systems Leadership for Continuous Quality

Description

This course will explore organizational and systems leadership within the complex clinical microsystems to promote high quality patient care utilizing the knowledge, skills and attitudes to promote care coordination, negotiation, change management, team building and collaboration within the interdisciplinary team. Topics will include quality improvement and safety concepts using structure, process and outcome measures, and performance improvement methodologies to promote quality outcomes for diverse populations. This three credit hour course will include 45 hours of practical application of knowledge, skills, and attitudes.

Credits

3

Requisites

- Must be enrolled in Nursing program

Academic Level

Undergraduate

NUR440 - Research & Evidence-Based Practice

Description

Undergraduate students will be introduced to theory-guided and evidence-based nursing practice. Students will acquire the skills to become proficient consumers of nursing research. Focus is placed on understanding established research methodologies, ways of knowing in nursing, and developing the knowledge, attitudes, skills, and behaviors to retrieve and critique published studies for application to evidence-based nursing practice. This three credit course will include 45 hours of practical application of knowledge, skills, and attitudes required of the baccalaureate-prepared nurse.

NUR490 - Transformational Capstone

Description

The Transformational Capstone course will utilize a seminar process, portfolio development, and final project to illustrate achievement of all program outcomes. In keeping with the Transformational Learning Theory, the summative activities will provide evidence of the student's progression to a baccalaureate-professional nurse. This three credit hour course will include 90 hours of practicum experience to demonstrate synthesis of the knowledge, skills, and attitudes acquired in the program.

Credits

3

Requisites

- Complete all of the following
 - Must be enrolled in a Nursing Program
 - 111 credit(s).

Academic Level

Undergraduate

NUR502 - Teaching and Learning in Nursing

Description

This course covers instructional frameworks, learning environments, and classroom and student management and motivation techniques. Students explore theories associated with optimizing the teaching experience and student outcomes and gain an understanding of the teaching, learning, communication, and motivation strategies used for specific learning situations and student populations. Students identify various learning barriers and formulate appropriate teaching strategies to address them, including acknowledging and using emotional intelligence. As part of this course, students are required to teach in an online course room. Must be enrolled in MSN program.

Credits

3

Requisites

- Placement in MSN program

Graduate

Online Programs

NUR506 - Evidence-Based Practice

Description

Graduate nursing students build upon previous learning of nursing research and evidence-based practice in order to become proficient in critiquing, generating, translating research evidence into practice, and disseminating results to advance nursing knowledge. Emphasis is placed on identifying a researchable practice question, analysis of research findings for evidence-based practice, and ethical issues in nursing research. Students demonstrate proficiency in selection of methodologies which may be used to generate research evidence for practice.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - NUR515 - Advanced Nursing Concepts (3)
 - 1 of the following:
 - IHP525 - Biostatistics (3)
 - MBA501 - Mathematics and Statistics for Business (3)

Graduate

NUR507 - Transition to Graduate Nursing Practice

Description

This course is designed to assist the registered nurse with a BSN degree to transition to graduate study in order to maximize their performance and opportunities for success. The course will cover such topics as the standards for scholarly writing, using evidence, study habits, and managing a graduate-level workload. The role of the Master's-prepared nurse as a clinical scholar, clinical expert and as leader in evidence-based practice and transformation of health care will be emphasized. The course will introduce the final capstone course and the development of a professional portfolio.

Credits

3

Requisites

- Must be enrolled in Nursing program

Academic Level

Graduate

NUR508 - Role Development and Transformation of the MSN Professional Nurse

Description

In this course, students will explore the roles of an MSN professional nurse. This includes the differentiation of the APRN role and scope of practice and development of a plan for career-long learning. Students will evaluate practice experiences and explore the influence of healthcare systems, policy, and trends in shaping MSN professional practice. Students will continue to form and cultivate their professional nursing identity, through critique, engagement and the development of interprofessional relationships.

Credits

3

Academic Level

Graduate

Online Programs

NUR515 - Advanced Nursing Concepts

Description

In this course, students will analyze the history and evolution of nursing conceptual models and theories. Students examine the linkages between empirical, aesthetic, ethical, personal, and sociopolitical patterns of knowing with the conceptual models and paradigms of nursing. Students will explore the components of conceptual-theoretical-empirical structures for theory-generating, theory-testing research, and application to practice. Students who successfully complete the course (B- or better, course work & projects) will receive 45 indirect practice hours.

Credits

3

Requisites

- Complete:
 - NUR507 - Transition to Graduate Nursing Practice (3)

Academic Level

Graduate

NUR520 - Epidemiological and Biostatistical Applications in Healthcare

Description

This course focuses on the principles and foundations in epidemiology and biostatistics for healthcare application. Students will evaluate basic concepts of disease transmission and study designs as they learn to quantify disease progression and assess risk factors of disease. Students will gain skills in the application of data collection, data analysis, and hypothesis testing to health data as a way to support health promotion, disease prevention, and clinical decision-making.

Credits

3

Academic Level

Graduate

NUR530 - Systems Leadership and Collaborative Practice

Description

This course provides students with the strategies and tools necessary for leadership roles in systems management and inter-professional practice. Ethical leadership concepts, analysis of diverse organizational systems across the healthcare continuum, change agency and communication skills are emphasized in the processes of coalition building, negotiating conflict, workforce planning and inter-professional team relationship building to produce quality patient outcomes. The course will enhance student ability to think systematically and develop comprehensive understanding of core competencies required to initiate and sustain change in organizations.

Credits

Graduate

Online Programs

NUR531 - Interprofessional Leadership in Healthcare

Description

Students will develop key attributes of an MSN professional functioning in complex healthcare systems to promote a culture of safety and quality outcomes. Students will challenge assumptions, be prepared to proactively take action based on timely and reliable information, and create solutions that anticipate needs across the four spheres of care. They will develop leadership, communication skills and strategies to promote interprofessional team collaboration and strengthen partnerships to improve outcomes across a variety of settings.

Credits

3

Academic Level

Graduate

NUR540 - Advanced Pathophysiology Across the Life Span

Description

Analyze the relationships between normal physiology and specific system alterations produced by injury and disease to foster clinical reasoning skills. Determine the developmental, genetic, environmental influences, and clinical manifestations of major health problems across the lifespan with a focus on etiology and pathogenesis. Utilize the nursing process as the foundation for decision-making and holistic management.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - BIO205 - Human Anatomy and Physiology I (3)
 - BIO211 - Human Anatomy and Physiology II (3)
 - BIO212 - Microbiology (3)
 - Earned a minimum cumulative GPA of 3.5
 - Requires dean approval.

Academic Level

Graduate

NUR545 - Advanced Health and Literacy Assessment

Description

Build on knowledge of pathophysiology and clinical experience to master health assessment skills and communication strategies. Conduct comprehensive, evidence-based health assessments encompassing environmental, genetic, multicultural, ethnic, and socioeconomic factors. Explore ways of adapting their communication style to meet the specific needs of their clients. Examine the physical and mental health exam and formulate plans to ensure effective patient-centered care, including assessing health literacy when conducting care and education. Utilize simulations to practice knowledge and skill acquisition (additional costs for practice simulation software may occur).

Credits

3

Online Programs

NUR550 - Evidence-Based Practice and Scholarly Inquiry

Description

In this course, students will translate evidence-based practice that is essential for continuous improvement in a variety of healthcare settings. Course topics include the use of scholarly inquiry, evaluation of existing clinical practice guidelines, critical analysis and synthesis of the best evidence to inform practice. Students will gain skills in utilizing various databases for retrieving scholarly evidence and best practices to improve healthcare outcomes. Students will apply evidence-based practices to the role of the MSN professional.

Credits

3

Requisites

- Complete:
 - NUR520 - Epidemiological and Biostatistical Applications in Healthcare (3)

Academic Level

Graduate

NUR555 - Advanced Clinical Pathophysiology

Description

In this course, students will build upon existing knowledge of physiology and pathologic aspects of human disease across the lifespan. Advanced clinical pathophysiology, pathobiology, immunology, and genetics will be analyzed. Students will gain knowledge to foster advanced clinical reasoning and decision-making skills. Students will examine clinical manifestations of major health problems across the lifespan and explore the management of illness and health restoration.

Credits

3

Academic Level

Graduate

NUR557 - Advanced Pathophysiology and Pharmacology Across the Lifespan

Description

In this course, students will build on prior learning of biological sciences to explore normal and pathological conditions and pharmacological treatment options. Students will use a person-centered approach to investigate alterations of various health states across the lifespan incorporating the use of clinical reasoning skills, best practice, current practice guidelines, and technologies. Students will gain this advanced knowledge by evaluating the impact of disease conditions and pharmacotherapies to support holistic, collaborative treatment options.

Credits

3

Academic Level

Graduate

Online Programs

NUR560 - Advanced Health Assessment and Clinical Reasoning

Description

In this course, students will build on previous clinical experience and prior knowledge to master health assessment skills and advanced communication strategies. Students will conduct comprehensive health assessments incorporating environmental, genetic, multicultural, ethnic, and socioeconomic factors. Students will gain mastery of the advanced history and physical exam, formulate plans to ensure effective patient-centered care, and adapt their communication style to meet the specific needs of individuals and families.

Credits

3

Academic Level

Graduate

NUR600 - Advanced Pharmacology for the Prescriber, Immersion

Description

In this course, students will apply the advanced principles of pharmacology for the nurse practitioner by analyzing drug classifications for the management of acute and chronic disease states across the lifespan. Students will use clinical reasoning to formulate pharmacologic and non-pharmacologic approaches for individuals within a primary care setting. Students will gain the foundational knowledge for prescribing medications across the lifespan, considering legal, ethical, quality, and regulatory implications. As part of the course, students will participate in a required in-person immersion opportunity to demonstrate advanced principles of assessment, diagnostic skills, and pharmacotherapies in a simulated clinical environment. The immersion experience will also prepare the learner for an advanced practice role with prescriptive authority.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - NUR555 - Advanced Clinical Pathophysiology (3)
 - NUR560 - Advanced Health Assessment and Clinical Reasoning (3)
 - Admission into the FNP track

Academic Level

Graduate

NUR601 - Advanced Pathophysiology

Description

Students build upon prior knowledge of physiology and pathophysiological processes to acquire advanced knowledge of the relationships between normal physiology and specific system alterations produced by injury and disease to foster clinical reasoning skills. Focus is placed on etiology, pathogenesis, developmental, genetic, environmental influences, and clinical manifestations of major health problems across the lifespan.

Credits

3

Academic Level

Graduate

Online Programs

NUR602 - Advanced Pharmacology Across the Life Span

Description

Content focuses on current concepts in the pharmacologic therapies of common health care problems seen in primary and acute care health care. Basic pathophysiology, clinical pharmacology, modes of therapy, and monitoring parameters are explored. Diagnosis and management of health care problems and their treatment regimens are discussed. Case studies are utilized to clarify, reinforce, and correlate therapeutics with specific health care problems.

Credits

3

Requisites

- Complete:
 - NUR601 - Advanced Pathophysiology (3)

Academic Level

Graduate

NUR603 - Epidemiology

Description

This course provides an in-depth exploration of the concepts and methods of epidemiological research. Students will critique the principles of epidemiology with an emphasis on health promotion and disease prevention research. Epidemiologic concepts, bio-statistical principles and research design strategies are emphasized. Students will critique current epidemiologic study designs and develop an epidemiologic proposal with implications for health promotion.

Credits

3

Academic Level

Graduate

NUR606 - Communications and Collaboration

Description

This course introduces advanced communication strategies for patient safety success in the current healthcare environment. Course topics include: enhanced communication skills, individual and group design/presentation techniques, hand-off, chain of command, critical thinking strategies and skills, stress and time management, group process and group dynamics. This course challenges the students to use creative and critical thinking to become a creative patient safety/problem-solver and leader working within a complex healthcare environment.

Credits

3

Academic Level

Graduate

Online Programs

NUR607 - Advanced Health Assessment

Description

In this course, students will build on previous clinical experience, as well as undergraduate course work to master health assessment skills and communication strategies. Students conduct comprehensive, evidence-based health assessments encompassing environmental, genetic, multicultural, ethnic, and socioeconomic factors. Students also explore ways of adapting their communication style to meet the specific needs of their audience. The course also focuses on mastering the physical and mental health exam and formulating plans to ensure effective patient-centered care. Periodic hands on simulation assignments will be utilized formatively to practice knowledge and skill acquisition. *This course may incur additional costs for practice simulation software.

Credits

3

Requisites

- Complete:
 - NUR601 - Advanced Pathophysiology (3)

Academic Level

Graduate

NUR616 - Primary Care of Adults and Gerontological Patients

Description

In this course, students will apply evidence-based practice to the primary care of adult and gerontological populations. Concepts from pharmacology, pathophysiology, and health assessment will be integrated with advanced practice nursing theory, process, and research to assess, diagnose, and manage patient care. Students will gain skills in clinical decision-making and management of adult and gerontological populations, utilizing current clinical practice guidelines to help guide their decision-making process.

Credits

3

Requisites

- Complete:
 - NUR600 - Advanced Pharmacology for the Prescriber, Immersion (3)

Academic Level

Graduate

NUR626 - Primary Care Across the Lifespan Practicum I

Description

This course will serve as the foundational course in a five-course series introducing the FNP student to the APRN role through 135 precepted hours of clinical practice experiences in a primary care setting. Emphasis is placed on applying knowledge of advanced health assessment and health promotion, advanced pathophysiology, pharmacology, and patient interviewing techniques.

Credits

3

Requisites

- Complete:
 - NUR600 - Advanced Pharmacology for the Prescriber, Immersion (3)

Online Programs

NUR631 - Strategic Skills for Nurse Executive Leaders

Description

In this course, students will examine the role of the nurse executive as it relates to best practices in human resource, finance, and strategic management within organizations. Topics include the ethical use of data in budget development, resource allocation, and controlling operating, revenue, and capital budgets. Students will apply performance evaluation frameworks that foster the development of high performing, innovative teams. Students will also explore strategic management best practices and the impact of political, regulatory, and economic issues on an organization's ability to achieve its strategic goals.

Credits

3

Academic Level

Graduate

NUR633 - Informatics and Communication Technology

Description

In this course, students will explore informatics and emerging information and communication technology. Students will assess potential ethical, legal, and regulatory impacts associated with health information systems and apply strategies to reduce misuse of information. Students will utilize best practices to appraise the impact of information and communication technologies on workflow processes and healthcare outcomes.

Credits

3

Academic Level

Graduate

NUR634 - Facilitating Learning and Teaching Innovation in Nursing Education

Description

In this course, students explore the use of teaching and learning assessment strategies for nurse educators. Emphasis is placed on application of evidence-based practice to enhance student learning in clinical, didactic, and online learning environments. Students will examine various teaching and learning methods, including using innovative education technologies. Topics in this course include feedback strategies, test construction and item analysis, and developing and using rubrics.

Credits

3

Academic Level

Graduate

Online Programs

NUR635 - Teaching and Learning for Nurse Educator

Description

This course explores the process of teaching and learning in nursing education. Nurse educator roles and expectations are examined. Theories and philosophies of learning and different types of teaching strategies are evaluated for their application in a variety of nursing education settings and levels of education, and for their impact on diverse students. Emphasis is placed on who the learner is and how they learn, who the faculty is and what the faculty role entails, and the use of appropriate evidence-based teaching strategies.

Credits

3

Requisites

- Placement in MSN program

Academic Level

Graduate

NUR636 - Primary Care of Infants, Children and Adolescents

Description

Students will examine the physical, cognitive, psychosocial, growth, and developmental milestones from infancy through adolescence. Emphasis will be placed on the assessment and management of the child within the realm and context of cultural, environmental, and social factors of growth and development. Students will gain knowledge of caring for well and sick children and adolescents. Students will refer to and utilize current care protocols and guidelines in the primary care of children and adolescents to help guide their decision-making process.

Credits

3

Requisites

- Complete:
 - NUR616 - Primary Care of Adults and Gerontological Patients (3)
 - NUR626 - Primary Care Across the Lifespan Practicum I (3)

Academic Level

Graduate

NUR640 - Assessment and Evaluation in Nursing Education

Description

This course examines basic principles of assessment and evaluation of learning in academic, online, and clinical settings. Students will explore content about assessment versus evaluation; formative and summative assessments; test development, item analysis, developing and using grading rubrics; standardized testing in nursing - ATI, HESI, NCLEX - and evaluation of clinical performance. The course also explores legal and ethical issues related to evaluation and grading. Students who successfully complete the course (B- or better, course work & projects) will receive 45 indirect practice hours.

Credits

3

Requisites

- Complete:
 - IHP525 - Biostatistics (3)
 - NUR635 - Teaching and Learning for Nurse Educator (3)

Academic Level

Graduate

Online Programs

NUR645 - Curriculum Design in Nursing

Description

Explore strategies for the development of curricula in nursing education. Learn how to synthesize evidence from the science of nursing education with nursing professional standards and institutional missions and philosophies in developing nursing curricula. Students gain a comprehensive view of the nurse educator's responsibility in curriculum development, evaluation, and revision.

Credits

3

Requisites

- Complete:
 - NUR635 - Teaching and Learning for Nurse Educator (3)
 - NUR640 - Assessment and Evaluation in Nursing Education (3)

Academic Level

Graduate

NUR646 - Primary Care Across the Lifespan Practicum II

Description

This course will serve as the second course in a five-course series for the FNP student as they precept with an APRN in a primary care setting for 135 hours of clinical practice experiences. Emphasis is placed on continued progressive development of knowledge and skills for advanced assessment, health promotion, diagnostic reasoning, advocacy for the patient/caregiver, development of a differential diagnosis and management of simple problems within the primary care setting across the lifespan.

Credits

3

Requisites

- Complete:
 - NUR616 - Primary Care of Adults and Gerontological Patients (3)
 - NUR626 - Primary Care Across the Lifespan Practicum I (3)

Academic Level

Graduate

NUR650 - Care Coordination and Outcomes Management

Description

This course is designed to prepare CNL students to lead and collaborate with members of the healthcare team to deliver high quality, coordinated care to diverse populations of patients as they transition through a variety of healthcare settings. The course will focus on the relationship between care coordination, the patient experience, and the national quality outcomes that hospitals and nursing professionals should be meeting. Students will explore concepts related to transition management, team-based care, and quality improvement measures across healthcare settings, with care coordination as a central element of the patient-centered experience.

Credits

Academic Level

Graduate

Online Programs

NUR651 - Advanced Concepts for Nurse Executive Leaders

Description

Through the lens of the nurse executive leader, students will develop the practical skills to lead change and empower interprofessional teams to attain organizational goals. Students will examine the influence of health policy, regulations and accreditation standards to ensure policy and process compliance, continuous improvement and to mitigate risk. This course will include the concepts of project development, data-driven decision making, advocacy, just culture, quality control, and cost-containment.

Credits

3

Requisites

- Complete:
 - NUR631 - Strategic Skills for Nurse Executive Leaders (3)

Academic Level

Graduate

NUR653 - Population Care Management

Description

In this course, students will build upon previous health promotion and disease prevention knowledge and gain additional management skills to improve the health of populations. Students will assess health risks, services and needs of populations, analyze data to drive the improvement of care, and investigate funding resources to address deficiencies. Students will demonstrate the ability to coordinate care through the establishment of interprofessional partnerships to address gaps in care and develop, implement and evaluate improvement plans.

Credits

3

Academic Level

Graduate

NUR654 - Curriculum Foundations in Nursing Education

Description

In this course, students will explore the role of the nurse educator in curriculum design and evaluation. Emphasis is placed on the process of developing curricula to include evaluation of program outcomes. Students will examine policies, accreditation, professional standards, and regulations that are designed to ensure program compliance and the achievement of learner outcomes. Students will explore learning strategies that guide the development and revision of programs and outcomes.

Organizational Leadership

OL110 - Introduction to Business

Description

This course introduces basic business functions and how businesses are owned, managed and controlled. Elements of a business are integrated to reflect how each interacts with the other to provide the concept of a systems background. A broad background in business practices, principles and economic concepts is discussed and provides the basis for use in more advanced courses. This course includes an introduction to international business.

Additional Information

Philosophy

PHL111 - Introduction to Critical Thinking

Description

What makes a good argument? Are some beliefs better than others? Why should we believe in a certain view? This course is an introduction to critical thinking and reasoning, and demonstrates philosophy's practical value for effectively solving problems, communicating ideas, achieving goals, and uncovering truth. Students will challenge assumptions, evaluate arguments from different perspectives, and articulate positions on contemporary issues. This course draws from students' own experience, asking them to examine real-world situations and case studies in order to apply critical thinking to actual practice. Critical thinking skills and strategies in this course are foundational and directly applicable to a variety of future professional or personal endeavors.

Credits

3

Academic Level

Undergraduate

PHL210 - Introduction to Philosophy

Description

This course provides a general introduction to the big questions of philosophy, including questions of existence, knowledge, freedom and meaning. The purpose of the course is to introduce students to great thinkers and theories while engaging them in the exploration of the same beginning questions applied to contemporary issues.

Credits

3

Academic Level

Undergraduate

Online Programs

PHL212 - Introduction to Ethics

Description

This course introduces students to ethical theory or the study of how people make decisions about how to treat one another. It emphasizes the historical and theoretical development of answers to such questions as: What kind of a person do I want to be and How do we figure out what the right thing to do is

Credits

Physics / Atomic Physics

PHY101 - Principles of Physics

Description

Principles of Physics is an algebra based course that explores the major topics in physics, such as motion and forces, gravity and projectiles, energy and work, thermodynamics, vibrations and waves, electricity and magnetism, solids and fluids, light and optics, and atomic and nuclear physics.

Credits

3

Requisites

- Placement in BS.CSC, BS.ESC, or BS.GEO

Academic Level

Undergraduate

Online Programs

PHY101L - Principles of Physics Lab

Description

This course will use laboratory techniques to study the fundamental principles of physics. Topics such as motion and forces, gravity and projectiles, and energy and work will be covered along with other topics important to physics.

Credits

1

Requisites

- Complete all of the following
 - Complete:
 - PHY101 - Principles of Physics (3)
 - Placement in BS.CSC, BS.ESC, or BS.GEO

Academic Level

Undergraduate

PHY103 - Earth System Science

Description

Earth Science presents the basic dynamics of cycles and processes of the Earth, including an overview of the origin of the planet, its physical and chemical composition, and geological and chemical interactions. The course culminates in a discussion of the current health of the planet and examines related environmental issues and evidence.

Credits

3

Academic Level

Undergraduate

PHY105 - Geology

Description

This course surveys the major themes in geology. Students will examine topics such as plate tectonics, the rock cycle, surface processes, and concept of geologic time.

Credits

3

Requisites

- Placement in BS.ESC, or BS.GEO

Academic Level

Undergraduate

Online Programs

PHY150 - Introductory Physics: Mechanics

Description

In this algebra-based physics course, students will explore the major fundamental topics in physics as they relate to mechanics, such as motion and forces, gravity and projectiles, and energy and work. Through their exploration of these topics and embedded lab work, students will learn to describe the motion of objects in both one and two dimensions, and to solve problems through the application of Newton's Laws of Motion. Additionally, they will also apply the principles of the conservation of energy and momentum to analyze the behavior of interacting objects.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - MAT140 - Precalculus (3)
 - Must be enrolled in the BS Computer Science program.

Academic Level

Undergraduate

PHY205 - Principles of Geology

Description

This course will introduce students to the Earth's structure and composition, minerals and rocks, surface processes, elementary petrology, and the principle of plate tectonics. Additionally, historical geology, including paleontology, glaciation, earthquakes and seismology, rivers and drainage, and groundwater will be discussed.

Credits

3

Requisites

- Complete 1 of the following
 - Complete all of the following
 - Placement in BS.ESC, or BS.GEO
 - Complete:

Undergraduate

Online Programs

POL211 - International Relations

Description

This course offers a broad introduction to the study and practice of international relations, including the roles played by states and nations, non-state actors, national interests, power, morality and international law. This course places special emphasis on realism and idealism as alternative approaches to the study and practice of international relations and on their implications for ongoing efforts to construct a peaceful and prosperous global political system in the aftermath of the Cold War.

Credits

3

Academic Level

Undergraduate

POL309 - American State and Local Government

Description

Many political issues in the United States, such as education, public safety, environmental protection, and transportation, are first handled and addressed by state and local governments. This course explores the structure, function, and distribution of power between state and local governments and the federal government of the United States. Particular emphasis is placed on the necessary collaboration of state and local governments and their roles as partners with the federal government in effecting improvements in policies and services as well as the exploration of the legal and constitutional relationships between state and local governments.

Credits

3

Academic Level

Undergraduate

POL313 - Political Theory and Applications

Description

This course covers the study of the conceptual foundations of political systems and behavior including the historical contributions of Western political theorists toward critically analyzing contemporary political institutions and ideas. Special emphasis is placed on exploring how the social and cultural contexts in which these theorists lived and worked helped to shape their political ideas.

Credits

3

POL372 - Campaign Finance and Fundraising

Description

Financing a successful campaign requires dedicated fundraising at the beginning, middle, end and every stage in between. It is increasingly important that all members of a campaign understand the importance of fundraising and the regulations around campaign finance. This course takes these topics head on and introduces students to successful fundraising tactics, the role money has played in campaigns, elections, and policy development, and the key laws and regulations around campaign finance.

POL612 - State, Local, and Urban Politics

Description

State and local governments play an important role in the formation and implementation of public policies. In truth, state and local governments have a larger effect on the daily lives of most U.S. citizens than the Federal government. This course examines the politics, institutions, and policy processes of state and local governments. Topics covered include large urban settings where larger social, political, and economic demands and constraints lead to more complex and dynamic political systems in comparison to rural settings which have much different issues to contend with.

Credits

3

Academic Level

Graduate

POL634 - Campaigns, Elections, and Strategic Messaging

Description

This course involves an integrated and advanced study in historical and contemporary theoretical approaches to campaigns and elections. Topics for investigation include fundraising, recruitment and capacity planning, use of various communication tools such as social media, long-term strategies of staying on message, and analyzing audience and public speaking scenarios, among others. Emphasis will be placed on the impact of these factors on how messages are interpreted through historical case studies. Students will also be engaged in recommending strategies for addressing these concerns.

PSY108 - Introduction to Psychology

Description

In this course, students will explore the complexities of the human mind by examining the science behind why we think, feel, and do. Students will experience the evolution of psychology through the early schools of thought, major branches, and core theories that guide contemporary perspectives. As students consider the broad influence of psychology on their perceptions, emotions, and everyday choices, they will acknowledge the idea that, in the human experience, "psychology is everywhere."

Credits

3

Academic Level

Undergraduate

PSY200 - Foundations of Addictions

Description

This course introduces students to various types of addictive behaviors as well as their causes and consequences in relation to the individual, family, community, and society. It includes an overview of theories on addiction and approaches to identification, prevention, and treatment.

Credits

3

Academic Level

Undergraduate

PSY201 - Educational Psychology

Description

This course emphasizes the nature of human learning, with a study of the concepts of readiness, motivation, retention, individual differences, development, reasoning and measurement in relation to the learning process. Consideration of the psychological principles of testing and learning technology are also emphasized. Writing intensive course.

Credits

Undergraduate

PSY223 - Research I: Statistics for Psychology

Description

How do psychologists organize, summarize, and interpret information? Students in this course study applications of statistical methods in psychological research and practice. The emphasis of the course is on the conceptual understanding of statistics so that students can read and conduct psychological research; those skills will be applied to students' original projects in PSY224 - Research II: Scientific Investigations. Computation of tests will be conducted on the computer. Students will build upon statistical knowledge and develop an in-depth conceptual and practical understanding of hypothesis testing, tests of significance, standardization, correlation, and analysis of variance in a wide variety of psychological uses. Students will learn the theory of statistical decisions, practical application of statistical software, and how to analyze journal articles. This course typically should be completed during the first semester of the sophomore year.

Credits

3

Requisites

- 1 of the following:
 - MAT133 - Introduction to Statistical Analysis (3)
 - MAT240 - Applied Statistics (3)

Academic Level

Undergraduate

Online Programs

PSY224 - Research II: Scientific Investigations

Description

Students in this course will develop an understanding of a variety of research methods, including experimental, survey, correlation and case-history techniques. They will become aware of the strengths and weaknesses of each method and understand when each method is best used. Writing intensive course.

Credits

3

Requisites

- Complete:
 - PSY108 - Introduction to Psychology (3)
 - PSY223 - Research I: Statistics for Psychology (3)

Academic Level

Undergraduate

PSY225 - Health Psychology

Description

This course introduces students to the field of health psychology through an exploration of ways in which the biopsychosocial (holistic) model is applied to promote health and improve coping with illness. Topics include health beliefs and behaviors, delay in seeking medical care, factors influencing individuals' responses to the health care system and practitioners, acute and chronic illness, treatment adherence, pain and pain management, stress and coping, social support and psychoneuroimmunology.

Credits

3

Requisites

- Complete:
 - PSY108 - Introduction to Psychology (3)

Academic Level

Undergraduate

PSY226 - Sport Psychology

Description

The course offers an in-depth examination of the major psychological issues associated with athletic competition. Topics include motivation, anxiety, aggression, commitment, self-control, leadership and excellence. While using athletic competition as its focus, the course also established the relationship between athletic competition and the pursuit of excellence in any human endeavor. This course also has a significant research component designed to help students develop a sound understanding of the research methodology that supports theories of athletic competition.

Undergraduate

Online Programs

PSY260 - Statistical Literacy in Psychology

Description

In this course, students will evaluate research by others and develop as consumers of information shared in the general public. Students will explore how to identify interest in isolating a topic that can be tackled with statistics and gain practical experience with statistical methods. Students summarize and analyze data using descriptive and inferential statistics with a focus on applications related to fields in psychology.

Credits

3

Requisites

- Complete:
 - MAT240 - Applied Statistics (3)
 - PSY222 - Research Methods (3)

Academic Level

Undergraduate

PSY300 - Biopsychology

Description

This course explores how the brain influences our behaviors, thoughts, and feelings. Topics include: evolution, genetics, anatomy and function of the nervous system, psychopharmacology, brain dysfunction, neuropsychological testing, sleep and circadian rhythms, neuroplasticity, emotions, and mental illness.

Credits

3

Requisites

- Complete:
 - PSY108 - Introduction to Psychology (3)

Academic Level

Undergraduate

PSY305 - Cognitive Psychology

Description

Cognitive psychology focuses on mental processes; we explore research and theory relating to memory, thinking, problem-solving, and language. Applied topics will include learning skills to help improve memory, accommodating memory/language disorders, such as Alzheimer's disease and dyslexia, and understanding how brain scanning techniques can be used to understand memory.

Credits

3

PSY636 - Intervention Strategies

Description

This course introduces students to the major intervention strategies in child and adolescent development. Contemporary strategies will be covered, and traditional approaches and strategies of the field will be examined as needed. Students will also practice applications of the strategies to real-world scenarios.

Credits

3

Requisites

- 18 credit(s).

Academic Level

Graduate

PSY638 - Child and Developmental Psychology Seminar

Description

This course is a culmination of the student's work in child and adolescent psychology. It will bring together the skills and knowledge learned in the previous courses and requires that students demonstrate their proficiency in the areas of developmental psychology, cognitive neuropsychology, and intervention strategies.

Credits

3

Requisites

- Complete:
 - PSY632 - Developmental Psychology (3)
 - PSY634 - Cognitive Neuropsychology (3)
 - PSY636 - Intervention Strategies (3)

Academic Level

Graduate

Online Programs

PSY790 - Capstone in Psychology

Description

This capstone course is the culminating experience for the M.S. in Psychology program. The aim of the capstone is to assess students' ability to synthesize and integrate the knowledge and skills they have developed throughout their coursework, rather than introducing new concepts. This course is structured to support student success in fulfilling program requirements.

Credits

3

Requisites

- Complete all of the following
 - 30 credit(s).
 - Complete:
 - PSY550 - Measurement and Assessment (3)

Academic Level

Graduate

Public Administration

PAD330 - Public Administration

Description

Explore the field of public administration through the analysis of key theory and career possibilities. Examine the role of government and regulation in public policy development. Analyze how ethics drives conduct within the field.

Additional Information

The goal name associated with this course is Public Administration

Credits

3

Academic Level

Undergraduate

PAD331 - Public Administrative Ethics and Theory

Description

This course will examine the underlying theories of public administration and their impact on community goal achievement. Students will examine supervisory and leadership behaviors in public administration and consider the ethical implications of public administration.

Credits

3

Academic Level

Undergraduate

Online Programs

PAD332 - Municipal Government Operations

Description

This course will examine the functions, hierarchy and management of various local government departments. Students will learn the interrelationship of various community departments as well as the roles of leadership and community boards within local government.

Credits

3

Academic Level

Undergraduate

PAD340 - Public Fiscal Management

Description

Analyze the processes and techniques used to secure and manage public funds. Examine considerations public administrators utilize when making fiscal decisions. Explore the role of oversight committees, audits, and other accountability measures to ensure accuracy of financial documents and processes.

Credits

3

Requisites

- Complete:
 - PAD330 - Public Administration (3)

Academic Level

Undergraduate

PAD341 - Disaster Recovery and Response

Description

This course will examine government and community behaviors, responses and recovery efforts following emergencies and disasters. Specific emphasis will be place of service delivery models and strategies, coordination of assistant services, and the dynamics of the recovery process.

Credits

3

Academic Level

Undergraduate

Online Programs

PAD345 - Policy Analysis and the Role of the Public

Description

Explore the role of policy in public administration, how the public influences policy, and the impact of policy on decision-making. Learn the stages of the public policy process and how the public's involvement in policy making has evolved. Develop techniques for managing and interacting with the public.

Additional Information

The goal name associated with this course is Policy Analysis and the Role of the Public

Credits

3

Requisites

- Complete:
 - PAD330 - Public Administration (3)

Academic Level

Undergraduate

PAD410 - Program Evaluation and Accountability

Description

Learn the six steps of program development and evaluation, including designing program evaluation processes to measure outcomes and analyzing data to assess program success. Create purpose-driven communications to gain support for programs, disseminate program information, and report to stakeholders.

Credits

3

Requisites

- Complete:
 - PAD330 - Public Administration (3)

Academic Level

Undergraduate

PAD630 - Foundations of Public Administration

Description

This course is designed to introduce students to the foundations and constraints that form the environment of the public administration. It will encourage and enable the view of governance issues through the eyes of a public administrator. The course is structured to provide basic skills and set the context of contemporary political, social, economic, and administrative realities. It explores responsive, equitable, effective, efficient, and accountable governance processes, public policies, and institutional-based programs. It also examines, from a multidisciplinary perspective, those essential competencies, values, and issues important to public service organizations and the importance of public policy at the local, state, national and international levels.

Credits

3

Academic Level

Graduate

Online Programs

PAD631 - Strategic Management in Public Service

Description

This course is designed to provide an academic foundation to applied strategic management in public service. Identifying the factors that differentiate public service from the private sector, strategic planning and the implications those differences have for managers. Emphasis is placed on applied strategic planning and management including how to create a mission statement, conduct a SWOT analysis, conduct a stakeholder analysis, writing goals and objectives, and how to design and implement a performance measurement and management system. Current approaches to strategic management used by federal, state, local, and non-profit organizations are emphasized.

Credits

3

Academic Level

Graduate

PAD632 - Foundations of Public Policy

Description

This course is an introduction to the public policy process. Students will develop an understanding of what "political" and "public policy" mean. Topics discussed include why some problems reach the public agenda, why some solutions are adopted, why others are rejected, why some policies appear to succeed while others appear to fail. The course also examines the complexity of policymaking at the national, state, and local levels.

Credits

3

Academic Level

Graduate

PAD633 - Intergovernmental Relations

Description

This course is designed to demonstrate the challenges and strategies for governance and administration in an institutional environment of fragmented authority and dispersed power. It defines the balance of shared powers between the layers and institutions of government poses and the considerable challenges to policymakers and administrators. Major dimensions of intergovernmental relations: the vertical dimension of federal, states, and local governments, that cooperate, coordinate, and compete for shares of power, and the horizontal dimension in which sub-governments interact with one another. The course examines the structure of American political institutions, the nature of complex policymaking, governance by networks, and the consequences of competition between governments.

Public Health

Online Programs

PHE101 - Fundamentals of Public Health

Description

This course introduces students to the field of public health: its historical evolution, fundamental theories, concepts and practice in the US, and its core values and ethical principles. The structure of the public health system, the ten essential services, and the core knowledge areas (epidemiology, biostatistics, social and behavioral sciences, environmental health, and healthcare policy and administration) are outlined in order for students to comprehend the breadth of complex factors impacting health and the tools available to protect and promote health.

Additional Information

The goal name associated with this course is Global Healthcare Perspectives

Credits

3

Academic Level

Undergraduate

PHE321 - Biological Concepts for Public Health

Description

This course explores the major determinants of human disease from an integrated ecological perspective that brings together population-based approaches to the study of infectious disease and genetically determined diseases. Students learn about how infectious diseases are transmitted, risk factors and biological processes for common diseases, and the impact of these and control strategies on public health.

Credits

3

Academic Level

Undergraduate

PHE327 - Research and Assessment in Public Health

Description

Students in this class will develop the introductory knowledge and skills to apply assessment instruments, data collection, research designs, and statistical analysis to assess need, assets, and capacity for health education programs. Existing data sets will be introduced that will increase access to information to develop and implement health promotion projects that are fiscally feasible while meeting specific health promotion needs of a targeted population.

Credits

3

Academic Level

Undergraduate

PHE330 - Public Health Education and Communication

Description

The purpose of this course is to develop communication skills relevant to public health and examine the impact of mass media, social media, and the internet on health outcomes. Communications is a crucial tool in dealing with global public health challenges. Strong communication skills are necessary in the developing effective public health education, sound advocacy and successful policy development and implementation. In addition, the course explores how communication is currently being used by public health organizations and agencies.

Credits

3

Academic Level

Undergraduate

Online Programs

PHE340 - Social and Behavioral Health

Description

The course provides an overview of the contribution of the social and behavioral sciences to health behavior. Social and behavioral science fundamentals (principles, theories, research, and techniques) that are employed to address current and past public health problems are examined. Key concepts such culture, race/ethnicity, gender, poverty/disparities, factors related to behavior change, community, organizational climate, family are examined from a social and behavioral sciences perspective.

Credits

3

Academic Level

Undergraduate

PHE423 - Evaluation Methods in Public Health

Description

This course will cover contextual issues surrounding evaluation, evaluation designs and methodological issues, steps involved in conducting an evaluation, communicating the results, and ensuring that evaluation findings are used by intended users.

Credits

3

Requisites

- Complete:
 - PHE425 - Programming Planning in Public Health (3)

Academic Level

Undergraduate

PHE425 - Programming Planning in Public Health

Description

The purpose of this course is to provide basic knowledge in public health sciences, and practical skills to effectively plan, implement, and manage programs that address public health problems in a variety of settings. The course explores key concepts, theories, and methods in planning and implementing successful health promotion programs and healthy public policy.

PHE489 - Public Health Capstone Communication

Description

Taken in the student's final term, the capstone course is the culminating experience for the Bachelor of Science in Public Health. This course builds on the theories and concepts of all courses students have taken within the program of study. The capstone course provides students with the opportunity to integrate and synthesize the knowledge and skills acquired throughout their coursework in an original comprehensive project/paper, while assessing their level of mastery of the stated outcomes of their degree program in public health. In addition, students present their capstone project and reflection on the experience to their instructor and their peers in the course. Students will also post their capstone project and presentation into their e-Portfolio.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - PHE423 - Evaluation Methods in Public Health (3)
 - PHE425 - Programming Planning in Public Health (3)
 - 111 credit(s).

Academic Level

Undergraduate

PHE500 - Principles of Public Health

Description

This course is a required, foundational course. It acquaints the student with the history of public health, the structure of the public health system, the ten essentials services, and the core knowledge areas in order to gain an understanding of the complex factors impacting health behaviors in the community. This course is designed to introduce the students to the range of public health professions and to motivate their interests in public health courses. The course also will introduce the development of a professional portfolio.

Credits

3

Academic Level

Graduate

PHE505 - Research Methods in Public Health

Description

The course introduces students to the basics of research design and methodology in public health. It provides coverage of quantitative and qualitative methods. Topics include: development of a hypothesis, sampling, data collection and structure, survey design and administration, and analytic interpretation. In public health, carefully designed research studies and their results are critical in the development of evidence-based policies, programs, and interventions. Students apply their knowledge acquired in the course by developing a research proposal. Research skills are in high demand by public health employers.

Credits

3

Academic Level

Graduate

Online Programs

PHE510 - Public Health Biology

Description

This course explores the biological basis of disease. It focuses on the impact of diseases on public health decision-making. The pathogenesis of various disease conditions are covered and how such pathogenesis could either be prevented or interrupted.

Credits

3

Academic Level

Graduate

PHE525 - Social and Behavioral Sciences

Description

The course provides a foundation in the application of social and behavioral sciences to public health. Social and behavior theories are examined in terms of understanding health-related behavior and applying these theories to health promotion. The course covers existing social inequalities in health status related to race, social class and gender and the critical intersection between social risk factors, behavioral risk factors and the development and implementation of public health interventions.

Credits

3

Academic Level

Graduate

PHE540 - Principles of Environmental Health

Description

This course offers students an overview of basic concepts in environmental sciences, an understanding of the health impact of various environmental exposures, and the public health approach to controlling and eliminating environmental health risks. The effects of agents on disease, water quality, air quality, food safety, and land resources are explored.

Credits

3

Academic Level

Graduate

PHE550 - Principles of Global Health

Description

Provides an overview of the history of global health, the diversity of determinants of health and disease, and the importance of ethics and human rights. Examines major global health challenges, contemporary issues, and policies. Topics include: health systems, health disparities, culture and health, nutrition, maternal and child health, infectious and chronic diseases, injuries, and natural disaster and humanitarian relief.

Credits

3

Academic Level

Graduate

Online Programs

PHE610 - Health Policy and Management

Description

Students in this course examine the health services system in the U. S., the role of healthcare policy and management, and the health delivery system. The recent healthcare reform legislation and its implications are explored. Topics include: the origins of the US healthcare system, health behaviors and disease, the management of health service personnel and organizations.

Credits

3

Academic Level

Graduate

PHE630 - Program Planning and Evaluation in Public Health

Description

This course explores the key approaches used to conduct and evaluate effective public health programs. Topics include: collection of primary data, analysis of data, presentation of findings for the target audience, and information systems and technology in the planning and evaluation processes.

Credits

3

Academic Level

Graduate

PHE660 - Global Health Policy, Practice, and Partnerships

Description

Explore the historical evolution of global health, policies that have shaped the field, and the international community's response to health determinants around the world. Critically analyze the roles and relationships of local, national, and international actors. Students synthesize policy, practice and partnerships, which are essential for improving health in low and middle income countries.

Credits

Graduate

Online Programs

PHE665 - Case Studies in Global Health

Description

Examine how people, organizations, companies and governments can work together to solve some of the most complex global health issues. Using real-world examples, students examine situations, programs and partnerships and analyze innovative solutions in each presented case. From reducing child mortality to improving health through multifaceted interventions that address multiple determinants of health, students learn how global public health efforts have improved the health of populations, even in the poorest countries, worldwide.

Credits

3

Requisites

- Complete:
 - PHE550 - Principles of Global Health (3)

Academic Level

Graduate

PHE680 - Practical Experience in Public Health Part I

Description

Succeed working on a real-world public health project under the supervision of the public health instructor, an approved preceptor, and a SNHU Career advisor. Refine developed competencies and skills sets that were introduced in the MPH courses. This course requires a minimum of 60 practical experience hours.

Credits

3

Academic Level

Graduate

PHE685 - Practical Experience in Public Health Part II

Description

Successfully complete a real-world project initiated in PHE-680 Part I under the supervision of the public health instructor, an approved preceptor, and a career advisor. Refine developed competencies and skills sets that were introduced in the MPH courses. This course requires a minimum of 60 practical experience hours.

Credits

3

Requisites

Undergraduate

Online Programs

QSO321 - People, Planet, and Profit

Description

Students will evaluate business operations for their efficiency, effectiveness, and quality. Through learning to balance operations decisions, students will be able to support the long-term sustainability and maintain ethical standards of the organization. Students will also learn to make recommendations on operations that increase value to the organization and customer.

Additional Information

The goal title associated with this course is People, Planet, and Profit.

Credits

3

Requisites

- 1 of the following:
 - INT220 - Global Dimensions in Business (3)
 - SPT465 - Global Sport Business (3)

Academic Level

Undergraduate

QSO322 - Logistics Management

Description

This course provides an overview of the field of logistics including its nature, scope, and process, including logistics management functions and the interrelationships among strategic support and operational logistics. Students examine the logistics functions of business involved in the movement and storage of supplies, work-in-progress, and finished goods. Additionally, it explores the trade-offs between cost and service and the purchase and supply of raw materials.

Additional Information

The goal name associated with this course is Oversee Logistics

QSO325 - Continuous Improvement Tools and Techniques

Description

This course examines continuous improvement tools and techniques used in problem solving supporting sustainable operations. Topics include lean techniques, quality management, TQM, JIT, and product experimental design.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - QSO320 - Management Science through Spreadsheets (3)
 - 1 of the following:
 - QSO300 - Operations Management (3)
 - QSO321 - People, Planet, and Profit (3)

Academic Level

Undergraduate

QSO328 - Sustainable Operations

Description

This course focuses on manufacturing and service operations control and the importance of making operations decisions that support the long-term sustainability of organizations while meeting the needs of the customers. Students explore topics such as brand management, closed loop supply chains, competition, environmental management, safety and compliance, and social responsibility.

Credits

3

Requisites

- Complete:
 - QSO330 - Supply Chain Management (3)

Academic Level

Undergraduate

QSO330 - Supply Chain Management

Description

This course focuses on effective supply chain strategies for companies that operate globally with emphasis on how to plan and integrate supply chain components into a coordinated system. Students are exposed to concepts and models important in supply chain planning with emphasis on key tradeoffs and phenomena. The course introduces and utilizes key tactics such as risk pooling and inventory placement, integrated planning and collaboration, and information sharing.

Credits

3

Undergraduate

Online Programs

QSO340 - Project Management

Description

As modern organizations have become more complex, they have also become more project-driven. This course uses a basic project management framework in which the project life-cycle is broken into organizing, planning, monitoring and controlling the project. You will learn the methodologies and tools necessary at each stage for managing the projects effectively in terms of time, cost, quality, risk and resources.

Additional Information

The goal name associated with this course is Project Management in Healthcare

Credits

3

Requisites

- 1 of the following:
 - MAT240 - Applied Statistics (3)
 - MAT243 - Applied Statistics for Science, Technology, Engineering, and Mathematics (STEM) (3)

Academic Level

Undergraduate

QSO345 - Project Management for CAPM® Certification

Description

This course teaches the five process groups and nine knowledge areas described in the Project Management Body of Knowledge (PMBOK®) of the Project Management Institute (PMI®). The course is designed to help students prepare for the Certified Associate in Project Management (CAPM®) certification exam. However, it neither guarantees to help satisfy the eligibility requirements for taking the CAPM® certification exam nor ensures success on the CAPM® certification exam.

Credits

3

Requisites

- 1 of the following:
 - MAT240 - Applied Statistics (3)
 - MAT243 - Applied Statistics for Science, Technology, Engineering, and Mathematics (STEM) (3)

Academic Level

Undergraduate

QSO349 - Project Contracting and Procurement

Description

This course addresses the process of acquiring products, resources, services, or results from outside the project team. How to plan procurement management, conduct procurements, control procurements, and close procurements is covered.

Credits

3

Requisites

- 1 of the following:
 - QSO340 - Project Management (3)
 - QSO345 - Project Management for CAPM® Certification (3)

Academic Level

Undergraduate

Online Programs

QSO355 - Resource Estimating and Scheduling

Description

Project managers are responsible for keeping projects on time, on budget, and within scope. This course reviews the critical processes of activity definition, resource estimating, and scheduling.

Credits

3

Requisites

- 1 of the following:
 - QSO340 - Project Management (3)
 - QSO345 - Project Management for CAPM® Certification (3)

Academic Level

Undergraduate

QSO360 - Six Sigma Quality Management

Description

This course teaches the fundamental tools and techniques used to improve service and manufacturing processes through the Define-Measure-Analyze-Improve-Control (DMAIC) methodology of Six Sigma quality management. Statistical process control, design and analysis of statistical experiments, process mapping, cause-and-effect diagram, 5S methodology, and process waste identification via lean techniques, are the major topics of this course.

Credits

3

Requisites

- Complete:
 - MAT240 - Applied Statistics (3)

Academic Level

Undergraduate

QSO415 - Trends in Operations Management

Description

This course focuses on contemporary topics in operations management. Examples of topics that will be explored included assessing and managing disruptive change, agile project management, automation, innovation, and technology trends.

Additional Information

The goal name associated with this course is Automation and System Integration

Credits

3

Requisites

- Complete:
 - QSO325 - Continuous Improvement Tools and Techniques (3)
 - QSO330 - Supply Chain Management (3)

Academic Level

Undergraduate

Online Programs

QSO420 - Integrated Cost and Schedule Control

Description

This course reviews cost and schedule control techniques that are integrated with project scope as well as overseeing a cost and schedule plan aligned to that scope. The importance of measuring a project's performance using Earned Value Management (EVM) is reviewed.

Credits

3

Requisites

- 1 of the following:
 - QSO340 - Project Management (3)
 - QSO345 - Project Management for CAPM® Certification (3)

Academic Level

Undergraduate

QSO425 - Reverse Logistics

Description

This course provides students with an overview of today's best practices in reverse logistics. An application perspective is examined in manufacturing, retail and in the military. Students examine the nature, scope, practices, procedures, and processes of adding a reverse logistics operations center to a forward logistics supply chain.

Credits

3

Requisites

- Complete:
 - QSO322 - Logistics Management (3)

Academic Level

Undergraduate

QSO435 - Adaptive Project Management

Description

Adaptive project management recognizes the nature of changing business processes and goals and the need for iterative techniques to ensure business results are achieved. Agile frameworks including Scrum are reviewed.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:

QSO440 - Topics in Project Management

Description

This course covers advanced topics in project management such as project risk, project integration, project quality, and project procurement. Advanced project selection, planning, and control methods of project management are taught with hands-on-applications of MS Project. Students will learn the knowledge and skills of an experienced project manager by creating a detailed project plan for a real-world project.

Credits

3

Requisites

- Complete:
 - QSO340 - Project Management (3)

Academic Level

Undergraduate

QSO450 - Transportation Management

Description

This course provides an overview of the transportation industry to include providers, users, and government agencies. It examines contemporary public policy issues, along with managerial strategies in transportation. Additional focus will be given to micro and macroeconomic issues in the transportation industry. Topics include the economic aspects of rail, water, air, ground, and other transport modes, inventory, and supply.

Credits

3

Requisites

- Complete:
 - QSO322 - Logistics Management (3)

Academic Level

Undergraduate

QSO455 - Integrated Supply Chain Management

Description

This course examines key issues associated with the design and management of supply chains. Students examine modern supply chain management practices. Emphasis is placed on the exploration of how to integrate suppliers, factories, warehouses and stores so that products are distributed to customers in the right quantity and at the right time. A key topic area is the service logistics and distribution component of the supply chain.

Credits

Graduate

QS0570 - Predictive Business Analytics

Description

Predictive Analytics is used to make predictions about future business activities. The predictions are used to make business plans and take actions to bring about the desired business outcomes. In this course, you will learn about and apply the principles, tools and techniques of predictive analytics using Excel and popular data analytics software.

Credits

3

Requisites

- 1 of the following:
 - MBA501 - Mathematics and Statistics for Business (3)
 - MBA504 - Applied Business Statistics (3)

Academic Level

Graduate

QS0573 - Data Visualization Techniques

Description

In this course, students will develop, through hands-on-practice, deep familiarity with the industry-dominant tools for visualization. Students will clean data by applying appropriate techniques while maintaining data integrity. They will use data visualization tools and descriptive analytic techniques to create clear and compelling visualizations intended to develop business insights and communicate critical business information to technical and non-technical audiences.

Credits

3

Requisites

- Placement in MS.BAN.COH

Graduate

Online Programs

QSO593 - Analytics Strategy and Methods

Description

In this course, students will use various statistical techniques to develop consistent strategies for solving complex analytic problems. These strategies will help anchor students' understanding of the various analytic tools in the context of the typical tasks associated with preparing data for visualization and analysis.

Credits

3

Requisites

- Placement in MS.BAN.COH

Academic Level

Graduate

QSO600 - Operations Management

Description

This is a study of the concepts of production and operations and of a variety of methods and techniques used in their management. Background preparation: 6 credit hours in economics.

Credits

3

Requisites

- Complete:
 - QSO510 - Quantitative Analysis for Decision Making (3)

Academic Level

Graduate

QSO610 - Management of Service Operations

Description

This course is intended to help students prepare for management opportunities in service firms that represent the fastest-growing sector of the economy. The material focuses on the role and nature of service operations, and the relationship of operations to other business functions. The students will develop skills and learn techniques for effective management of service operations.

Credits

3

Requisites

- Complete:
 - QSO510 - Quantitative Analysis for Decision Making (3)

Academic Level

Graduate

Online Programs

QSO613 - Data Analytics Toolkit I

Description

In this course, students will acquire new skills in coding to refine their ability to cleanse data. Through the use of coding to automate procedures and tasks, they will integrate various types of data to create data-driven insights to meet business needs.

Credits

3

Requisites

- Placement in MS.BAN.COH

Academic Level

Graduate

QSO620 - Six Sigma Quality Management

Description

This course is designed to provide an understanding of the design and implementation of quality control and improvement systems. It is an introduction to current quality management approaches, statistical quality control and quality improvement techniques. ISO-9000 also will be discussed. Case studies and the use of computer technology will be integral to the course.

Credits

3

Requisites

- 1 of the following:
 - QSO510 - Quantitative Analysis for Decision Making (3)
 - QSO530 - Applied Statistics for Managers (3)

Academic Level

Graduate

QSO625 - Six Sigma for Black Belt Certification

Description

This course teaches advanced concepts in Six Sigma while incorporating Lean Management tools. Students learn waste elimination, value stream mapping, Six Sigma roles and responsibilities, team management, and the various elements of the Define-Measure-Analyze-Improve-Control (DMAIC) phases of a Six Sigma project. The Design for Six Sigma (SFSS) approach to design a new process is also reviewed. The course is designed to help students prepare for a Six Sigma Black Belt certification exam. However, it neither guarantees to help satisfy the eligibility requirements for taking a Six Sigma Black Belt certification exam nor ensures success on a Six Sigma Black Belt certification exam.

Credits

3

Requisites

- Complete:
 - QSO620 - Six Sigma Quality Management (3)

Academic Level

Graduate

QSO630 - Supply Chain Management

Description

This course analyses the role and activities of those involved in supply chain management decision making. It emphasizes the importance of transportation planning, inventory control, warehouse management, development of customer service standards, and procurement in the design and operation of supply and distribution systems. The importance of information systems and the internet in supporting such activities is also discussed. Special attention is given to the close working relationships with managers in other functional areas including information systems, marketing, and international operations.

Credits

3

Requisites

- Complete:
 - QSO510 - Quantitative Analysis for Decision Making (3)

Academic Level

Graduate

QSO633 - Full-Stack Data Analytics

Description

Analytics solutions provide business leaders with decision support. In this course, students will work to solve an analytic challenge, combining disparate data sources to identify insights relevant to business stakeholders. Students will develop an end-to-end analytic approach, utilizing their technical skills to complete necessary tasks, and present their findings in a formal communication to business leaders.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - QSO593 - Analytics Strategy and Methods (3)
 - QSO613 - Data Analytics Toolkit I (3)
 - Placement in MS.BAN.COH

QSO640 - Project Management

Description

This course includes the study of concepts, tools, and practices of project management. The course adopts a managerial process approach to Project Management, which consists of initiating, planning, executing, controlling and closing the project. Major topics will include project scope, project time, project cost, project quality, project risk, project resources, project communications and how to be an effective project manager. Cases are utilized to integrate the learning in the course and provide decision-making experience for the student.

Credits

QSO645 - Project Management for PMP® Certification

Description

This course is designed to help students gain insights into the process groups and knowledge areas that guide project management professionals as well as help them prepare for the Project Management Professional (PMP)® exam. Students will use process inputs and outputs, as well as tools and techniques, to effectively plan and manage projects. Exploration of the professional and social responsibilities of project management will also be addressed. In partnership with the Project Management Institute (PMI), our instructors completed the Authorized Training Partner (ATP) Train the Trainer - PMP exam prep program and are equipped to deliver PMP exam prep and training content to PMI's quality standards. For students, passing this course will result in satisfactory completion of the 35 hours of project management education required in order to take the PMP exam. However, successfully completing this course does not guarantee success on the PMP exam. (Project Management Professional (PMP) is a registered mark of the Project Management Institute, Inc.)

Credits

3

Graduate

QSO680 - Seminar in Project Management

Description

Project management is a core skill in today's fast-moving business environment. Project managers are required to manage complex, time- pressured projects and programs using advanced tools and techniques for maximum effect. Through this course, the students will learn advanced methods to initiate, plan and control projects. They will gain experience planning complex projects using both manual and PC-based tools.

Credits

3

Requisites

- Complete:
 - QSO640 - Project Management (3)

Academic Level

Graduate

QSO690 - Topics in Operations Management

Description

This course is designed to prepare students to function as high-impact manufacturing and/or service managers. The course theme is Total Quality Management and focuses on manufacturing systems, quality controls and inventory management with the goal of finding constant approaches to productivity improvement through in-depth investigation of JIT and OPT and their adaptability to manufacturing and service systems.

Credits

3

Requisites

- Complete:
 - QSO600 - Operations Management (3)

QS0700 - Project Management and Operations Capstone

Description

This capstone course is the culminating experience for the MS in Project Management and Operations program. The aim of the capstone is to assess students' ability to synthesize and integrate the knowledge and skills they have developed throughout their coursework, rather than introducing new concepts. This course is structured to support student success in fulfilling program requirements.

Credits

3

Requisites

- Complete all of the following
 - 30 credit(s).
 - Complete:
 - QS0680 - Seminar in Project Management (3)
 - QS0690 - Topics in Operations Management (3)

Academic Level

Graduate

QS0710 - Internship in Operations/Project Management

Description

This course will enable the School of Business graduate students to gain valuable work experience within the operations or project environment. The objective is to give the students an opportunity for practical application of operations/project management concepts and techniques learned in the classes and complement the course work.

Credits

3

Academic Level

Graduate

Reading

RDG503NC - Emerging and Early Literacy Development K-4

Description

This course will examine several major theoretical perspectives on literacy development from Kindergarten through 4th grade. Students will explore literacy environments that encourage the development of reading, writing, listening and speaking in the early elementary classroom. Students will also learn a variety of effective strategies for the instruction and assessment of reading and writing in the early elementary classroom. Differentiating instruction to meet the needs of students from diverse backgrounds will be integrated into the course content.

Credits

3

Academic Level

Graduate

RDG504NC - Content Area Literacy Grades 4-8

Description

In this course, students study effective practices that support the development of reading comprehension and writing strategies for content area subjects in grades 4-8. The course focuses on the strategies that enable students read and write about non-fiction. Students will also examine ways to address the particular needs of students with diverse language, cultural and learning requirements.

Credits

3

Academic Level

Graduate

RDG532 - Young Adult Literature

Description

This course is a focus on literature designed for the adolescent reader. Students read examples of adolescent fiction, interview adolescents about their selections, study criteria for selection and evaluation of writing done for or by adolescents, and learn strategies for teaching adolescents.

Credits

3

Academic Level

Graduate

Online Programs

RDG582 - Assessing and Instructing Students with Literacy Difficulty

Description

This course presents methods and materials to assess the needs and plan instructional interventions for students with literacy difficulties. Students will learn to analyze and interpret formal and informal literacy assessments and use instructional techniques to improve literacy in students with a range of literacy difficulties (K-12). This course includes an examination of literacy development among diverse students.

Credits

3

Requisites

- 1 of the following:
 - EDU501 - Methods of Teaching Reading (3)

Academic Level

Graduate

RDG701 - Reading Internship: K-4

Description

Students will complete a one credit reading internship that covers field-based literacy experiences at the elementary level at the conclusion of all course work. This course of study is designed for students to observe, interview, and experience literacy program planning, operation, and management in grades K-4.

Credits

1

Academic Level

Graduate

RDG702 - Reading Internship: 5-8

Description

Students will complete a one credit reading internship that covers field-based literacy experiences at the middle school level at the conclusion of all coursework. This course of study is designed for students to observe, interview, and experience literacy program planning, operation, and management in grades 5-8.

Credits

1

Academic Level

Graduate

RDG703 - Reading Internship: 9-12

Description

Students will complete a one credit reading internship that covers field-based literacy experiences at the high school level at the conclusion of all course work. This course of study is designed for students to observe, interview, and experience literacy program planning, operation, and management in grades 9-12.

Credits

Academic Level

Graduate

Science

SCI100 - Perspectives in the Natural Sciences

Description

This introductory course serves as an entry point into the natural sciences which concentrates on the natural world that both surrounds us and includes us. Students explore the big ideas in natural science as well as the methods that the field employs to solve problems. The course emphasizes and explores empirical modes of study as a way of looking at the world and aims to foster science literate citizens.

Credits

3

Academic Level

Undergraduate

SCI101 - Problem-Solving for Complex Challenges

Description

Draw upon research skills, analytical thinking, and your creativity to devise possible approaches to solving a complex challenge. Use math and logic to generate evidence that will inform your decisions, and integrate a variety of problem-solving methods to prepare thoughtfully researched recommendations. This course is currently available for direct assessment programs only.

Additional Information

The goal name associated with this course is Preparing Recommendations for Complex Challenges

Credits

3

Academic Level

Undergraduate

SCI200 - Applied Natural Sciences

Description

This applied course actively involves students in the process of science and builds upon foundational natural science concepts in introductory survey courses. Students have the opportunity to engage in inquiry based learning which utilizes natural science methodologies and apply these toward problem solving skills in contemporary topics.

Additional Information

The goal name associated with this course is Issues of the Information Age

Credits

3

Requisites

- 3 credit(s) from subject(s): BIO CHM, ENV, GEO, GRA, IHP, IT, MAT, SCI, or PHY

Academic Level

Undergraduate

Online Programs

SCI207 - Atmospheric Science

Description

This course will focus on the fundamental principles of the physics, chemistry, and fluid dynamics underlying weather and climate. Additionally, the continual movement of weather and its associated elements, and the development of climate change will be addressed.

Credits

3

Academic Level

Undergraduate

SCI212 - Principles of Physical Science I

Description

Various concepts within the physical sciences are discussed ranging from the teachings of Aristotle to the theories of Einstein. Topics include the influence of the scientific method in generating knowledge, the contributions of Galileo, Copernicus, Newton, Kepler and others concerning energy, forces, and motion, gravity, the solar system, and cosmology and relativity.

Credits

3

Academic Level

Undergraduate

SCI215 - Contemporary Health

Description

This course exposes students to the three major dimensions of health -- physical, emotional and social. Health, nutrition, substance abuse, infectious diseases and stress management are among the issues that will be discussed. Students will learn to intelligently relate health knowledge to the social issues of our day. For students on program plans/catalogs prior to 2012-13; this course does not satisfy the university core science requirement.

Credits

3

Academic Level

Undergraduate

SCI218 - Natural Resources

Description

This class will introduce the concept of natural resources by studying topics such as land, soil, rangeland, forest, water, atmosphere, minerals, and energy. The management, use, and environmental impacts associated with these resources will also be studied. Emphasis will be placed on the United States within the context of the global environment.

Credits

3

Academic Level

Undergraduate

Online Programs

SCI219 - Environmental Issues

Description

This course covers a variety of environmental topics in a manner specifically designed for the non-science major. It provides a fundamental understanding of the various processes necessary to support life on Earth and examines how human activities and attitudes (individual, traditional, cultural and others) generate environmental issues that threaten these processes. Topics include ecology, populations, agriculture, desertification and deforestation, water and ocean pollution, air pollution including ozone depletion and acid rain, global climate change, natural resource depletion, solid and hazardous wastes, energy including fossil fuels and nuclear power, economics and sustainability.

Credits

3

Academic Level

Undergraduate

SCI220 - Energy and Society

Description

This course surveys the various forms of energy available to our industrial society. The environmental impact and depletion of each energy form is discussed with emphasis on the development of clean and inexhaustible alternative sources for the home and business. Topics include traditional and renewable energy sources, greenhouse effects, transpiration, nuclear power, and economies.

Credits

3

Academic Level

Undergraduate

SCI225 - Spatial Awareness

Description

This course will examine the study, use, and design of map formats and specialized products such as fence-diagrams and cross-sections, as well as symbology, coordinate systems, and how maps record the historical patterns of human behavior. The course will also review maps as a tool to analyze human activity and societal development, and include important aspects of map data collection, processing, the Global Positioning System (GPS), quantitative mapping, and GIS-based mapmaking techniques. Additionally, students will review how humans process the concept of space.

Credits

3

Academic Level

Undergraduate

Online Programs

SCI310 - Geostatistics and Data Analysis

Description

This course will review geostatistical methods for their use in the spatial analysis of geological and environmental data. Students will explore the application of geostatistics for the description of spatial patterns and identification of scales of variability, spatial interpolation, and stochastic modeling of environmental attributes, and the creation of risk maps and their use in geoscientific decision making.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - PHY205 - Principles of Geology (3)
 - 1 of the following:
 - MAT240 - Applied Statistics (3)
 - MAT243 - Applied Statistics for Science, Technology, Engineering, and Mathematics (STEM) (3)

Academic Level

Undergraduate

SCI320 - Geosciences Methodologies

Description

This course will explore the scientific methodology, empirical reasoning, and specific application of research methods in the geosciences. Students will explore key instrumentation and their application in laboratory settings, as well as survey techniques, sample collection, and elementary modeling.

Credits

3

Requisites

- Complete:
 - SCI310 - Geostatistics and Data Analysis (3)

Academic Level

Undergraduate

SCI333 - Waste: Sources, Reduction, & Remediation

Description

Waste is a major issue in nearly all aspects of society and understanding it is essential when considering the environment and sustainability. This class will focus on how waste is produced, how to reduce this pollution and how to clean it up once it is released. In addition to the physical science, we will examine the impact of waste on the economy, society and public health.

Credits

3

Requisites

- 1 of the following:
 - ENV101 - Environmental Science (3)
 - SCI219 - Environmental Issues (3)

Academic Level

Undergraduate

Online Programs

SCI350 - Leadership and Ethics in the Geosciences

Description

As professionals, students will be expected to use their knowledge and skills to enhance understanding of Earth for the well-being of society and the environment. As such, this course will focus on leadership and ethics as it relates to the practice of the geosciences. Topics will include project management techniques related to scheduling and budgeting projects, group dynamics, organizational behavior, and compliance.

Credits

3

Requisites

- Complete:
 - SCI320 - Geosciences Methodologies (3)

Academic Level

Undergraduate

SCI360 - Environmental Science Experiential Learning

Description

Participate in an experiential learning elective course that focuses on professional development, certification preparation or professional practice opportunities. Explore and learn new tools and technologies that help you hone your real-world technical knowledge, skills and abilities. This course requires a minimum of 60 hours in the learning experience and may be taken for credit a maximum of two times.

Credits

3

Academic Level

Undergraduate

SCI425 - Geoscientific Research Methods

Description

This is the pre-capstone course for Geosciences majors. Through the emphasis in this course on the acquisition and integration of geoscientific research, students will learn to synthesize knowledge and skills from prior program coursework to develop a research project in a chosen area of specialization. This course focuses on helping students propose a topic for research, conduct preliminary research, and develop a capstone research proposal. This course prepares students for the formal capstone submission in the following course, Geosciences Capstone.

Credits

3

Undergraduate

Social Science

SCS100 - Perspectives in the Social Sciences

Description

How do social scientists examine issues impacting human behavior This course will focus on the questions social scientists ask in their research of individuals, families, and larger society, as well as how social scientific inquiry has developed over time. This exploration of social science will focus on the ways in which researchers consider behavioral phenomenon and use research to study various concepts. Students will examine the relevance of social science to current issues, develop evidence-based questions about human behavior, and explore basic social scientific research approaches.

Credits

3

Academic Level

Undergraduate

SCS101 - Leadership and Group Dynamics

Description

Apply research about group dynamics to address common challenges within groups and teams. Identify leadership skills for engaging in teamwork in your career, home, and community, and practice interpersonal communication strategies for effectively addressing feedback in collaborative settings. This course is currently available for direct assessment programs only.

Additional Information

The goal name associated with this course is Leadership and Group Dynamics

Credits

3

Academic Level

Undergraduate

Online Programs

SCS200 - Applied Social Sciences

Description

Social scientists consider a number of factors when deciding to invest time and resources into investigating a problem. Students engage in inquiry based learning by selecting a current issue and exploring it from the perspective of social scientists (psychologist, sociologist, anthropologist, etc.). Students use a systematic approach to engage in an evidence-informed investigation pertaining to a current issue.

Credits

3

Requisites

- 3 credit(s) from subject(s): ATH ECO, HSE, POL, PSY, SCS, or SOC

Academic Level

Undergraduate

SCS201 - Global Challenges

Description

Investigate diverse perspectives on global challenges that impact people and the planet. Discover how scientific evidence can help inform decision-making, and examine the ethical considerations of pursuing scientific advancement. This course is currently available for direct assessment programs only.

Additional Information

The goal name associated with this course is Science, Technology, and Society

Credits

3

Academic Level

Undergraduate

SCS224 - Social Science Research Methods

Description

This course offers a broad introduction to research methods in the social sciences, including surveys, case studies, experiments, and quasi-experiments. Students learn to spot design flaws in research intended to generate scientifically sound conclusions about social phenomena, and to evaluate critically the interpretations of social science research results by third-party observers, such as reporters. Students also learn how to draft a research proposal that would satisfy the requirements of peer review within the community of professional social scientists.

Credits

3

Requisites

- 1 of the following:
 - MAT133 - Introduction to Statistical Analysis (3)
 - MAT240 - Applied Statistics (3)

Academic Level

Undergraduate

Online Programs

SCS285 - Research Literacy in Social Sciences

Description

Students will analyze the value of using various kinds of data and credible existing research to address professional problems. Essential research skills and strategies such as research question development, evaluating data sets for practical application, and applications of social science research methods will be covered, enabling students to become effective consumers of research.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - ENG123 - English Composition II (3)
 - 1 of the following:
 - MAT133 - Introduction to Statistical Analysis (3)
 - MAT240 - Applied Statistics (3)

Academic Level

Undergraduate

SCS444 - Capstone Colloquium

Description

This colloquium serves as the capstone course for students in the sociology, law and politics, and environmental management majors. Students learn from their instructor and from each other as they apply the knowledge and skills acquired in their other course work to a directed research project in the appropriate discipline or field. Prerequisite: Senior standing in the sociology, law and politics, or environmental management major.

Credits

3

Requisites

- 111 credit(s).

Undergraduate

SCS490 - Social Science Internship

Credits

0 - 15

Academic Level

Undergraduate

Online Programs

SCS501 - Foundations in Statistics

Description

The focus of this course is to enable students to develop a foundation of basic statistical literacy. Students will be able to assess the role of statistics in quantitative research and mixed methodologies, as well as develop the competency to perform basic statistical calculations. An awareness of the relationship between computation and interpretation will be addressed. Students will focus on the analysis of real-world data and research situations to illustrate the process of interpreting the meaning underlying the data, and how statistics can be utilized to address important questions.

Credits

3

Academic Level

Graduate

SCS502 - Foundations in Research Methods

Description

In this course, students will examine applied aspects of research methods and experimental design at the graduate level, which includes qualitative, quantitative, and mixed methods that are commonly utilized in social science research. Students will investigate procedures used to gather and analyze data and acquire real-world skills required to design and conduct research in future courses.

Sociology

Online Programs

SOC112 - Introduction to Sociology

Description

Is one's identity individually or socially constructed? Are all stereotypes invalid or can there be value in generalizations? Is globalization widening the gaps or homogenizing the world? In this course, students will grapple with these essential questions in examining the world through the lens of a sociologist. Sociology offers an empirically-based methodology for critically evaluating society-from issues of individual agency to the roots of global institutions. Culture, norm stratification, systems, structure, social institutions, social change, the organization of social behavior and its relationship to society and social conditions are emphasized. Students will challenge their own preconceived notions and evaluate these constructs in terms of their relevancy to contemporary issues and problems.

Credits

3

Academic Level

Undergraduate

SOC213 - Sociology of Social Problems

Description

Students in this course analyze contemporary social problems in America and other societies. Issues include economic limitations, class and poverty, race and ethnic relations, sexism, ageism, and environmental and population concerns.

Credits

3

Requisites

- Complete:
 - SOC112 - Introduction to Sociology (3)

Academic Level

Undergraduate

SOC317 - Sociology of the Family

Description

This course is a sociological examination of the family institution in America and other societies. Traditional and nontraditional family patterns are studied to provide students with a structure for understanding sex, marriage, family and kinship systems.

Credits

3

Requisites

- Complete:
 - SOC112 - Introduction to Sociology (3)

Academic Level

Undergraduate

Online Programs

SOC318 - Sustainable Communities

Description

How do we build a society fit for living This course looks to the field of environmentally sustainable community development (ESCD) for answers to this question. Students explore the principles and practices of ESCD using pattern-mapping of community needs, site visits, and other experiential learning tools that turn communities into classrooms, and bring the challenge of building environmentally sustainable communities to life. In the process, students identify assumptions that lead to unsustainable social practices, and develop the skills necessary to help create livable local landscapes and sustainable local futures through individual and community action.

Credits

3

Requisites

- 1 of the following:
 - SCI219 - Environmental Issues (3)
 - SOC112 - Introduction to Sociology (3)

Academic Level

Undergraduate

SOC320 - Sociology of Gender

Description

The examination of gender in society. Students will explore the social construction of gender, gender identity development, sexuality and power, and other aspects concerning the meanings and implications of being 'male', 'female', or 'transgender'.

Credits

3

Requisites

- Complete:
 - SOC112 - Introduction to Sociology (3)

Academic Level

Undergraduate

SOC324 - Sociology of Crime and Violence

Description

The course examines the nature, causes, and consequences of crime and violence to a society. Applying a legal and sociological perspective, the course examines: 1) the structure of the law and the criminal justice system; 2) the nature and causation of criminal behavior; and 3) the various types of crime and criminality.

Credits

3

Requisites

- Complete:
 - SOC112 - Introduction to Sociology (3)

Academic Level

Undergraduate

Online Programs

SOC325 - Sociological Perspectives

Description

Sociology is the study of social life and behavior. Sociologists study societies by researching social groups, patterns, interactions, and institutions. We are interested in how they work, how they change, and their connection to people's lives. This course will build on what students learned in SOC-112 Introduction to Sociology. It will engage students in a discussion of what we know theoretically in the discipline of sociology through the work of key "voices" in the sociological tradition. The course intends to cultivate your ability to see social things with the hope that, as Peter Berger states, "things are not what they seem". In other words, in this class students will learn to rethink assumptions about social facets of society that are commonly taken for granted.

Credits

3

Requisites

- Complete:
 - SOC112 - Introduction to Sociology (3)

Software Engineering - Backend Development

SEBD101 - Introduction to Java 1

Description

This course introduces Kenzie Academy's Software Engineering program. Learners will set up their development environment and learn some fundamental programming concepts and apply them in Java. Fundamental programming concepts learners will address include how to instruct a computer to perform operations using knowledge of programming syntax and logic, how to account for a variety of possible inputs, and how to write programs that use loops to perform repetitive operations. Enrollment in the Software Engineering - Backend Development certificate program required.

Credits

3

Academic Level

Undergraduate

SEBD102 - Introduction to Java 2

Description

This is the second course that builds upon the foundational building blocks learned in Intro to Java 1. This course introduces more complex data by creating and updating dynamic arrays and dynamic strings in order to store and organize data, creating custom classes and associated properties and methods, using data structures like Maps, Collections, and Arrays of Objects, and beginning to understand and apply the four main concepts of object-oriented design, Abstraction, Encapsulation, Inheritance, and Polymorphism. Enrollment in the Software Engineering - Backend Development certificate program required.

Credits

3

Requisites

- Complete:
 - SEBD101 - Introduction to Java 1 (3)

Academic Level

Undergraduate

Online Programs

SEBD103 - Introduction to Java 3

Description

Learners in this course continue to develop skills through the application of the four main concepts of object-oriented design in Intro to Java 3 by designing Java packages modeled after actual projects. Learners will work on real-world tasks and use Java to read and send data to files as well as remote processes on the internet. Learners can expect to read and write data to files on their local computer, understand and process JSON and CSV data formats, and make requests to remote processes using HTTP. Learners will complete a comprehensive real-world capstone project incorporating skills from previous Java coursework. Enrollment in the Software Engineering - Backend Development certificate program required.

Credits

3

Requisites

- Complete:
 - SEBD102 - Introduction to Java 2 (3)

Academic Level

Undergraduate

SEBD121 - Java Concepts 1

Description

This course is the foundation to the second sequence of courses in the Certificate in Software Engineering - Backend Development and builds upon knowledge from the first sequence of courses enabling learners to code at an introductory level at enterprise level companies like Amazon. Learners are taught what to test, how to test, and how to identify the root cause when an issue is found. Learners are introduced to some basics of how programs use memory, which will help in the understanding of key concepts in later courses. Learners will become familiar with their first abstract Java collections interface (List), encapsulation, interfaces, Java wrapper classes, sorting lists, and some design tools. Enrollment in the Software Engineering - Backend Development certificate program required.

Credits

3

Requisites

- Complete:
 - SEBD103 - Introduction to Java 3 (3)

Academic Level

Undergraduate

SEBD122 - Java Concepts 2

Description

In this course, learners begin working with two new Data Structures, Maps and Sets, to provide constant time performance by utilizing hashing. Learners will be introduced to object-oriented design principles of Inheritance and Composition and will be able to integrate with and build upon code provided by others. Learners will also learn more about software design concepts with the goal of designing extendable, flexible systems. Enrollment in the Software Engineering - Backend Development certificate program required.

Credits

3

Requisites

- Complete:
 - SEBD121 - Java Concepts 1 (3)

Academic Level

Undergraduate

Online Programs

SEBD123 - Java Concepts 3

Description

In this course, learners start using DynamoDB to store and retrieve data, begin using RESTful services, and work within a dependency injection framework. Learners will also continue learning data structures and algorithms including Linked Lists, searching algorithms, and recursive algorithms while analyzing the space and time complexity (Big O) of those algorithms. Enrollment in the Software Engineering - Backend Development certificate program required.

Credits

3

Requisites

- Complete:
 - SEBD122 - Java Concepts 2 (3)

Academic Level

Undergraduate

SEBD201 - Java Concepts 4

Description

In this course, learners learn how computers operate and run applications, how developers track what their applications are up to using metrics, and ways to optimize them based on these metrics. This course will continue to build on our understanding of DynamoDB, utilizing more advanced querying techniques and deleting data. Finally, two additional data structures, Stacks and Queues, will be introduced. Enrollment in the Software Engineering - Backend Development certificate program required.

Credits

3

Requisites

- Complete:
 - SEBD123 - Java Concepts 3 (3)

Academic Level

Undergraduate

SEBD202 - Java Concepts 5

Description

In this course, learners review what they've learned throughout the program and begin a group project, Learn and Be Curious. Throughout the Learn and Be Curious open-ended group project, learners practice learning and work through issues with new technologies. Learners will design, scope, and build both the frontend and backend of a system within an Agile environment calling an API Gateway/Lambda service that stores data in DynamoDB. This project spans Java Concepts 5 and 6. Culminating in learners presenting their prototype and reflection of their experiences. Enrollment in the Software Engineering - Backend Development certificate program required.

Credits

Undergraduate

Online Programs

SEBD203 - Java Concepts 6

Description

This is the second course where learners apply their learning by working on the Learn and Be Curious open-ended group project that they started in Java Concepts 5. Throughout the Learn and Be Curious open-ended group project, learners practice learning and work through issues with new technologies. Learners will design, scope, and build both the frontend and backend of a system within an Agile environment calling an API Gateway/Lambda service that stores data in DynamoDB. At the end of Java Concepts 6, learners will present their prototype and reflect upon their experiences. Additionally, learners participate within a midterm workshop consisting of whiteboarding, practicing with CodeWars exercises, and participating within code reviews. Enrollment in the Software Engineering - Backend Development certificate program required.

Credits

3

Requisites

- Complete:
 - SEBD202 - Java Concepts 5 (3)

Academic Level

Undergraduate

SEBD221 - Java Concepts 7

Description

In this course, learners learn about API Design considerations, more advanced DynamoDB features, and new Java fundamentals including developing and implementing functionalities to execute code asynchronously. By the end of the course, learners will be able to use DynamoDB scan to find and filter data, use JSON Serialization to transform Java objects to and from the text-based JSON format, and build a mental model of how Trees and Graphs work and why they're used. Enrollment in the Software Engineering - Backend Development certificate program required.

Online Programs

SEBD222 - Java Concepts 8

Description

In this course, Java Concepts 8, and the subsequent course, Java Concepts 9, learners are prepared for the critical transition from learner to a working Software Engineer by completing a Capstone Project. The Capstone Project prepares learners for this transition through exposure to similar expectations and environments similar to real on-the-job training. Throughout the Capstone Projects, learners will work independently to assist in learning what is needed to deliver results, develop previously-defined functionality, and perform and receive multiple evaluations from peers and instructional staff. The Capstone Project is a group project spreading out the responsibility and provides learners with the opportunity to work collaboratively and hold each other accountable within an Agile environment. Enrollment in the Software Engineering - Backend Development certificate program required.

Credits

3

Requisites

- Complete:
 - SEBD221 - Java Concepts 7 (3)

Academic Level

Undergraduate

SEBD223 - Java Concepts 9

Description

In this course, Java Concepts 9, learners continue building their Capstone Project in groups from Java Concepts 8. The Capstone Project prepares learners for this transition through exposure to similar expectations and environments similar to real on-the-job training. Throughout the Capstone Projects, learners will work independently to assist in learning what is needed to deliver results, develop previously-defined functionality, and perform and receive multiple evaluations from peers and instructional staff. By the end of the Capstone Project, learners will be able to convert a design into code and deliver it using best practices, write secure, testable, and maintained code, create unit tests that thoroughly test functionality, troubleshoot by debugging and reviewing errors, logfiles, and metrics, contribute to planning and design, and communicate effectively across stakeholders and teammates when projects hit roadblocks and risks. Enrollment in the Software Engineering - Backend Development certificate program required.

Special Education

SPED501NC - Students with Exceptionalities

Description

Students will be introduced to the issues related to children with disabilities and the educational implications for participation within the general education classroom will be examined. The course includes the history of Special Education, as well as current trends and research. Federal and state legislation will be reviewed as well as the NH State Standards for Children with Disabilities. Students will review the Individuals with Disabilities Act as it relates to the Elementary Secondary Education Act (ESEA) reauthorized as No Child Left Behind (NCLB), the Americans with Disabilities Act (ADA) including title II of the ADA and section 504 and The Rehabilitation Act Amendments of 1973, as amended.

SPED520 - Assessment of Student Performance

Description

This course is designed to provide an overview of practical performance assessments that can be used to measure student progress in the general education setting. Students will become familiar with a repertoire of authentic assessments and knowledge of progress monitoring tools including but not limited to formative and summative assessments, diagnostic tools, performance tasks, criteria checklists, rubrics, student portfolios and the use of multiple sources of data in measuring student performance. The course will examine a variety of accountability measures including standardized tests, observation, curriculum based measures, utilization of Response to Intervention (RTI) as a system for planning, instruction, progress monitoring and interventions. The role Professional Learning Community Models (PLC's) in targeting both behavioral and academic achievement will be explored. The overall goal of the course is to prepare educators to utilize assessment data in the design of classroom instruction and monitoring of student progress for a broad range of students.

SPED540NC - Classroom and Behavior Management

Description

This course focuses on the principles and approaches that foster a positive learning environment and help to reduce the challenging behaviors that often confront teachers in the classroom. The course will provide both the theoretical foundations of behavior as well as the evidence-based strategies that have proved most effective for classroom management. The concept of positive behavioral interventions and supports will be explored, including the preventive steps that can be used to avert behaviors from escalating. Educators will also become knowledgeable about the federal requirements and guidelines for the discipline of students with disabilities under I.D.E.A. In addition, the course will emphasize the critical connection between student behavior, classroom management and well-designed instructional practices.

Credits

Academic Level

Graduate

SPED610 - Executive Function and Study Skills

Description

Students with language-based learning disabilities often struggle with the cognitive and self-regulating tasks associated with executive function. These tasks range from organizing time, materials, information; preparing for work, managing frustration, accessing memory and self-monitoring one's progress and work. This course introduces educators to research-based strategies that increase and improve executive function through the use of effective study skills. While the course will explore relevant research on language-based learning disabilities and executive function, the emphasis will be placed on the practical teaching skills drawn from Landmark's Six Teaching Principles. These principles, which will be integrated throughout the course, encourage teachers to provide structured opportunities for students to achieve success, use multiple instructional modalities, create skill-based micro unit tasks, ensure student skill automatization through practice and review, provide models, and include the student in the learning process.

SPED624NC - Professional Collaboration

Description

This course has been designed to assist special education teachers in examining their consultative roles and responsibilities when working in inclusive settings. Students will be introduced to, and examine the nature of collaboration, developing relationships between general and special educators, and paraprofessionals. The focus of the course will be on practical application and establishing strong relationships between general and special educators. The course also includes facilitating engagement of parents, and families as well as appropriate community agencies. The purpose of the course is to prepare special educators to interact and collaborate with a variety of stakeholders that are typically associated with students placed in inclusive settings. In order for special education teachers to be successful they must have the skills and ability to support students in the general education setting which means collaborative interaction, decision making, accountability and team work. Knowledge of general education curriculum requirements, related assessments, researched based interventions and use of data are all topics that will be covered as part of this course.

SPED640 - Language-Based Learning Environments

Description

Creating a supportive, effective, and well-structured language-based classroom is a key strategy for supporting students with language-based learning disabilities, though the principles apply to effective instruction for a variety of students. This course will provide an in-depth analysis of teaching principles and academic planning strategies implemented successfully as well as other K-12 language-based environments. Emphasis will be placed on the establishment of proper classroom resources as well as how to arrange them within the physical classroom space.

Credits

3

Academic Level

Graduate

SPED650 - Social-Emotional Competencies and Students with LBLD

Description

Students with language-based learning disabilities often exhibit deficits in social skills, therefore a structured approach to developing proficiency in essential social and emotional competencies becomes an important part of a teachers' skill set. This course focuses on Social and Emotional Learning (SEL) as an essential piece in student development. This course will also provide an overview of the concept of Social and Emotional Learning (SEL) derived from evidenced based instruction and research. Emphasis will be placed on developing individual strategies for students and establishing a classroom culture based on SEL practices.

Academic Level

Undergraduate

SPT425 - Sport Licensing/Strategic Alliances

Description

This course will explore why and how sport licensing is used effectively in the global business of sport. Both theoretical and applied perspectives will be used. The course will examine the strategic rational and different forms of sports licensing and how sport managers can use sport licensing to lead their companies to achieve growth and other key objectives. Course content will include examining US and international sport leagues and how they administer their licensing programs. The course will cover the process of identification of licensing opportunities, selection of business partners, process of establishing a license agreement, international licensing and the management of licensing relationships. In addition, students will be introduced to strategic alliances with an emphasis on why and how domestic and international alliances may be used to achieve sport enterprise objectives.

SPT465 - Global Sport Business

Description

This course develops a basic theoretical and applied understanding of international business principles as applied to the global sport industry. Several key areas of international business, as they relate to sport business, are explored including the scale, scope and organization of global sport, globalization, internationalization, cultural aspects, international marketing, financial/political/economic risk, human rights, ethical dimensions, role of media, technology/products, professional sport leagues and governance. The course will be delivered from an entrepreneurial and business development perspective encouraging students to think and act strategically when considering sport business in a global context. Class discussions and exercises will focus on assisting the student in establishing a conceptual and applied understanding of these major content areas using relevant text, multi-media. The outcomes will be to develop the skills necessary to function as a professional manager in the international sport business market place. In addition, the student will be exposed to a team working environment in order to foster authentic management interaction skills.

SPT501 - Research Methods in Sport Management

Description

This course examines the methods and techniques used in research in sport management and the sport industry. Including the basic aspects of reading, evaluating, and writing research; this course will explore the concepts developed in relevant literature as they apply to sport management. Topics include problem selection, literature review, instrumentation, methodology, statistical issues, and types of research in physical activity.

Credits

3

Academic Level

Graduate

SPT510 - Sport and Society

Description

Students investigate the interrelationships between sport, culture and society in an attempt to better understand the role and function of sport in contemporary society. Students receive a broad overview of selected socio-cultural factors that influence participation in sports. Major ethical issues of sport in society will be explored.

Credits

3

Academic Level

Graduate

SPT512 - Principles in Athletic Administration

Description

This course provides the graduate student with an overview of the role and responsibilities of intercollegiate athletics; human resources; finance; governance; operations and the management, planning, organization and administration of interscholastic and recreational athletics.

Credits

3

Academic Level

Graduate

SPT525 - Sport Licensing and Strategic Alliances

Description

The goal of this course is to develop a deep, working knowledge of sports licensing and strategic alliances and how they relate to the business of sports. We will fully explore the process of identifying and developing a sports licensing and/or strategic alliance strategy so the student will be enabled to apply this knowledge in a real business setting. By doing so a student as a future manager will better recognize opportunities that sports licensing and strategic alliances can potentially offer to their sport business. By developing this in an international context, a student will engender a global view of how sports licensing and strategic alliances are developed and implemented in harmony with overall firm strategy leading to increased shareholder value.

Academic Level

Graduate

SPT600 - Management of Sport Organizations

Description

This course focuses on the application of management concepts and theories to sports organizations and the sports industry. It includes issues of organizational design, public policy, labor relations, collective bargaining, ethical issues in sport and the globalization of the sports industry.

Credits

3

Academic Level

Graduate

SPT601 - Sport Facility Management and Operations

Description

This course is designed to provide students with an understanding of the business of sport facilities and operations. Elements of managing sport facilities, including arenas, stadiums, and athletic complexes will form the content of this course. As well, students will focus on facility management and administration considerations, systematically moving through planning and design, organizational and operational concerns, personnel planning, financial management, program development and scheduling, risk management, and marketing. Also covered will be the operations of specific facility areas including maintenance, crowd control and security, box office management and concessions.

Credits

3

Academic Level

Graduate

SPT608 - Sport Marketing and Media

Description

This course examines the concepts and processes used in marketing and communications of a sport organization, at the college, professional or community level. Students will utilize the case study approach to analyze current marketing problems and techniques to develop an effective sport marketing and communications plan; with special emphasis placed on the unique aspect of sport products, markets, consumers, and media relations.

Credits

3

Academic Level

Graduate

Online Programs

SPT610 - Sport Law

Description

Students learn about the law as it applies to professional and amateur sport organizations. The course includes the analysis of contracts, tort law, antitrust law, labor law and collective bargaining.

Credits

3

Academic Level

Graduate

SPT612 - Advanced Topics/Athletic Administration

Description

This course is designed to examine the current issues facing interscholastic athletic administrators. Information regarding the various components and activities in the organization and administration of athletic programs for prospective athletic administrators will be covered; including: recruitment, governance, compliance, and current research literature and research methods appropriate for administration athletics.

Credits

3

Academic Level

Graduate

SPT620 - Finance and Economics of Sport

Description

This course will provide students with an understanding of financial and economic theories and principles utilized in the sport industry. Topics will include the preparation of financial plans, strategic budgeting, capital and operating budgets, sources of revenue, economic theories, supply and demand concepts in the sport industry; economic impact, and other financial and economic theories pertinent to sport industry professionals.

SPT700 - Sport Management Capstone

Description

This capstone course is the culminating experience for the M.S. in Sport Management program. The aim of the capstone is to assess students' ability to synthesize and integrate the knowledge and skills they have developed throughout their coursework, rather than introducing new concepts. This course is structured to support student success in fulfilling program requirements.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - SPT501 - Research Methods in Sport Management (3)
 - SPT565 - Internationalization of Sport Business (3)
 - SPT600 - Management of Sport Organizations (3)
 - SPT608 - Sport Marketing and Media (3)
 - 30 credit(s).

Academic Level

Graduate

SPT710 - Internship

Description

Internships are available for graduate students to enhance their educational experiences through appropriate, work-oriented activities in selected environments.

Credits

Graduate

Sustainability & Environmental Compliance

SEC510 - Environmental Issues

Description

A fundamental understanding of the various processes necessary to support life on Earth. Examine how human activities and philosophies (individual, business, cultural, and others) generate environmental issues and threaten these processes, and offers sustainable alternatives to these activities. Topics include ecology; populations; agriculture; desertification and deforestation; water and ocean pollution; air pollution, including ozone depletion and acid rain; global warming; natural resource depletion; solid and hazardous wastes; energy, including fossil fuels and nuclear power; economic implications; and sustainability.

SEC610 - Energy and Society

Description

This course surveys the various forms of energy available to our industrial society. The environmental impact and depletion of each energy form is discussed, with emphasis on the development of clean and inexhaustible alternative sources for the home and business. Topics include traditional and renewable energy sources; electricity; the atmosphere, including greenhouse effects; transportation; nuclear power; and economic implications.

Credits

3

Academic Level

Graduate

SEC620 - Environment Compliance/Sustainability

Description

This course introduces students to a broad range of strategies used by both large and small businesses to achieve and maintain compliance with environmental laws and sustainability goals, with an emphasis on companies doing business in the United States. Students learn the importance of environmental due diligence as a tool for minimizing acquired liabilities in business mergers and acquisitions; the value of environmental auditing as a means of identifying compliance and sustainability issues in ongoing business operations; and the power of both environmental management systems and environmental certification programs as strategies for achieving and maintaining environmental compliance and sustainability, and for securing a competitive advantage in a marketplace increasingly populated by sustainability-conscious consumers.

Graduate

Taxation

TAX650 - Federal Taxation of Individuals

Description

This course studies the theory and practice of federal income taxation of individuals.

Credits

3

Academic Level

Graduate

Online Programs

TAX655 - Federal Income Tax of Corporations and Partnerships

Description

This course studies the theories and practices of income taxation of corporations and partnerships and excise tax on estates and gifts.

Credits

3

Requisites

- Complete:
 - TAX650 - Federal Taxation of Individuals (3)

Academic Level

Graduate

TAX660 - Tax Factors in Business Decisions

Description

This course is an introduction to tax factors that are relevant in business and personal financial planning decisions. This includes regular and S corporations, partnerships, fiduciaries, tax shelters and tax research. This course is open only to non-accounting students. Background preparation: 6 credit hours in accounting or the equivalent.

Credits

3

Requisites

- 1 of the following:
 - MBA500 - Building Business Leaders (3)
 - MBA503 - Financial Reporting and Analysis (3)

Academic Level

Graduate

TAX665 - Estate and Gift Taxation

Description

This course deals with the federal taxation of gratuitous transfers during a taxpayer's lifetime and property transfers at death. After gaining knowledge of the relevant statutes, regulations and case law, the student will develop estate and gift planning strategies to address estate and gift planning aspects of business and life events.

Credits

3

Requisites

- Complete:
 - TAX650 - Federal Taxation of Individuals (3)

Academic Level

Graduate

Online Programs

TAX670 - Tax Research Methodology

Description

Explore the methods and techniques of federal tax research. Learn the rules and procedures for representing clients before the Internal Revenue Service.

Credits

3

Academic Level

Graduate

TAX700 - Special Topics in Taxation

Description

This course offers an in-depth study of special topics in federal taxation. Major, contemporary problem areas of taxation are explored.

Credits

UX Design

UXD101 - UX Fundamentals 1

Description

In this course, learners will be introduced to Kenzie Academy's UX Design program certificate and the basics of UX Design including: design tooling to use when identifying, designing, documenting, and generating abstract ideas in applying design thinking to solve a problem. Learners will formulate and articulate underlying research questions based on a user type and be able to sketch or digitally draw iterations of a user interface based upon independent and user research. Enrollment in the UX Design certificate program required.

Credits

1

Academic Level

Undergraduate

Online Programs

UXD102 - UX Fundamentals 2

Description

In this course, learners will expand their independent research abilities by identifying user pain points, generating How Might We statements, and writing non leading interview questions to synthesize data through conducting discovery interviews. Through the gathered feedback, learners will create Happy Path process flow charts adhering to best practices to identify and wireframe the key screens of an application. Enrollment in the UX Design certificate program required.

Credits

2

Requisites

- Complete:
 - UXD101 - UX Fundamentals 1 (1)

Academic Level

Undergraduate

UXD103 - UI Fundamentals 1

Description

In this course, learners use their developed research, synthesizing data, and gathering feedback knowledge to create a simple high-fidelity screen of an onboarding flow for user entry into a system using Figma with meaningful calls to action drawing users attention. Learners design, create, and integrate navigation points and sort lists into their high-fidelity mockups adhering to best practices. Through user interviews, learners think critically about feedback received and classify their findings for future iterations. Enrollment in the UX Design certificate program required.

Credits

2

Requisites

- Complete:
 - UXD102 - UX Fundamentals 2 (2)

Academic Level

Undergraduate

UXD121 - UI Fundamentals 2

Description

This is the first course in the second sequence in the UX Design Certificate program. In this course, learners identify and differentiate between varying degrees of visual hierarchy and continue practicing application design. Application design includes sampling and applying colors, manipulating text properties through applying typography hierarchy, and utilizing white space in order to establish organization and meaning in their design. Enrollment in the UX Design certificate program required.

Credits

2

Requisites

- Complete:
 - UXD103 - UI Fundamentals 1 (2)

Academic Level

Undergraduate

Online Programs

UXD122 - Application Design 1

Description

In this course, learners conduct discovery user interviews to receive feedback on the application designed in the previous course. In discovery user interviews, learners share their work with target users and record feedback by practicing active listening. Learners iterate on their high-fidelity application designs to create a live prototype by implementing user feedback and newly introduced UI Design principles including components and iconography. Enrollment in the UX Design certificate program required.

Credits

1

Requisites

- Complete:
 - UXD121 - UI Fundamentals 2 (2)

Academic Level

Undergraduate

UXD123 - Application Design 2

Description

In this course, learners prepare to work in the industry as a UX Designer by analyzing a design brief, creating a project plan, working with stakeholders to build an application, and synthesizing stakeholder requirements into design features. Learners handoff annotated high-fidelity designs and a created style guide to a developer and answer their questions. Learners gather feedback through conducting A/B testing with users of their designed application and presenting their detailed design process to an audience. Enrollment in the UX Design certificate program required.

Credits

2

Requisites

- Complete:
 - UXD122 - Application Design 1 (1)

Academic Level

Undergraduate

UXD201 - UX Industry Readiness 1

Description

In this course, learners prepare to join the industry as a UX Designer by creating a compelling resume, creating a profile on a freelancing website, identifying a specific area of focus, and polishing their case study to showcase their application designs to include within their portfolio. Learners continue applying practical UI Design principles by designing a mobile responsive application using object pins and constraints to scale at any viewpoint and easily convert into a desktop application. Enrollment in the UX Design certificate program required.

Credits

2

Requisites

- Complete:
 - UXD123 - Application Design 2 (2)

Academic Level

Undergraduate

Online Programs

UXD202 - UX Industry Readiness 2

Description

In this course, learners continue preparing to join the industry as a UX Designer by working on a team and with stakeholders. On a team, learners practice how to give and receive peer reviews while working effectively within an Agile environment by utilizing collaboration workspaces. Teams practice de-escalation and conflict resolution techniques in order to remain productive and work better as a team. With stakeholders, learners take feedback and make appropriate changes to their designs. Learners are introduced to and taught how to read basic HTML and a CSS style sheet. Enrollment in the UX Design certificate program required.

Credits

2

Requisites

- Complete:
 - UXD201 - UX Industry Readiness 1 (2)

Academic Level

Undergraduate

UXD203 - UX Industry Readiness 3

Description

In the capstone course of Kenzie Academy's UX Design Certificate program, learners articulate the necessary artifacts for acquiring a job in the industry and write a compelling cover letter. Learners focus on accessibility by designing in accordance with Web Content Accessibility Guidelines (WCAG). Learners prepare for their upcoming job search by practicing common UX Designer interview questions and whiteboard exercises within a mock interview. Enrollment in the UX Design certificate program required.

Credits

Undergraduate

Workplace Conflict Management

WCM510 - Negotiation/Advocacy in the Workplace

Description

This course introduces the processes and practice of negotiating and advocating effectively in settings where continuation and strengthening of the relationship matter. Course content will include the uses, strengths, and weaknesses of distributive and integrative bargaining; the sources and uses of power in negotiation; and gender and cultural influences on negotiation style and practice.

Credits

3

Academic Level

Graduate

Online Programs

WCM610 - Introduction to Organizational Conflict Management

Description

This survey course introduces the analysis, interpretation, and management of conflict in contemporary organizational settings. Using interdisciplinary lenses, the course explores systemic, interpersonal, and other causes of conflict; conflict's influence on workplace communication and decision-making; and the relationship between conflict, leadership, and career advancement.

Credits

3

Academic Level

Graduate

WCM620 - Managing Difficult Conversations at Work

Description

The art and practice of dialogue building is the act of engaging conflict effectively and transforming difficult conversations into better decisions, healthier work relationships, and stronger organizations. This course examines approaches for de-escalating conflict conversations, choosing if and when to intervene, tapping the creative potential in conflict, and creating workplace environments that foster constructive conflict engagement.
