DEVELOPMENT OPPORTUNITY
LEASE NOW, DEVELOP, THEN PURCHASE!

In-Town Land and Historic Mill Complex

PROPERTY SPECIFICATIONS

° LOCATION:
South Main St. at Columbus Ave., Rochester, New Hampshire.
Lighted intersection with heavy traffic.
1 Mile from Exit 12 on the Spaulding Turnpike.
30 Minutes to Portsmouth and 90 Minutes to Boston.
° LAND: 6.45 Acres of level land and sandy soils.
° ADDITIONAL LAND: 2± Acres of Abutting Land Available
° ZONING: Industrial - 3
° BUILDINGS*:
  A - 41,440± s.f.  4 Story Brick
  B - 31,900± s.f.  5 Story Brick
  C - 3,200± s.f.  4 Story Wood
  D - 1,600± s.f.  1 Story Wood
  E - 1,000± s.f.  1 Story Wood
  F - 6,200± s.f.  1 Story Brick
Total 85,340± s.f.
° BASEMENT: Full basements in Buildings A, B and F.
° ELEVATORS: Two 1,500 lb elevators in Buildings A & B.
° SPRINKLERS: Yes
° SERVICES: City Water/Sewer, Gas and Electric.
° TERMS: Lease - $7,500 Net per month which includes Land, Building and Development Rights.
Purchase after developed & when cash flows!
° HIGHEST & BEST USE: Lease land and buildings with development rights. Then complete major re-habilitation of property into a mixed-use retail, commercial, office and restaurant. Helpful and aggressive Planning/Economic Development Department. Many individual user requests for space are available to pass on to developer.

Description of View: Three Quarter Facade, South East

Negative File Number: R-80-A5-22

Photographer: Roger Brevoort
ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The Wallace Shoe Factory, is a 4 story Greek Revival style industrial building erected c. 1852. The 34 x 5 bay structure exhibits the narrow, rectangular proportions of mid-nineteenth century industrial architecture.

The top story was a later addition, as evidenced by a change in the brickwork above the third story. A brick string course also indicates the original height.

The building has a low-pitched gable roof which terminates in a plain box cornice. It is also characterized by rectangular granite lintels above each window, a prevalent feature of the Greek Revival style, and 6/6 window sash appropriate to the architectural character of the building. A simple recessed entry is located at the northern end of the west-facing facade.

A 12 bay, 4 story addition with similar features was appended to the rear elevation, a stair tower is situated at the rear corner.

RELATED STRUCTURES AND CONTEXT:

This is the main building of the Rochester shoe Company Complex. Because of its size it dominates the entire surrounding area now characterized mostly by commercial strip development.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This is the original building of the E.G. and B. Wallace Shoe Company funded by the Wallace Brothers in 1854. This building was erected circa 1860, by the Wallaces as their operation expanded and became more mechanized. The company eventually grew to be Rochester's dominant industry and longest employer, reaching its peak in the early twentieth century. The plant was sold to the Maybury Shoe Company, and is now owned and run by the Rochester Shoe Company.

Historically, the main offices of the Wallace Company were on the first floor of the building, at the northern end of the building, where the larger windows are. The remainder of the building was used for initial phases of production including cutting, stitching and trimming.

The building has seen minimal architectural alteration. Of particular interest, the original 6/6 windows have not been changed, a factor which enhances its architectural integrity.

(Indicate North in circle):

PHOTO

Description of View:
Negative File Number: R-81-15-21
Photographer:
Negative on file with: SRRC
ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

The power house is characterized by 6/6 sash windows set in segmental arches, a corb table at the roofline, and canted corners embellished with interlocking sawtooth brickwork. The building is T-shaped and has a hip roof with slate sheathing on portions of the main block.

The walls are slightly taller than is common for a one story structure, apparently to accommodate the interior spatial requirements. Owing to the wall height, each window bay has a small single-sash window beneath the roofline.

The original exterior doors remain, also set within segmental arches.

Relating to the building's initial function as a steam plant, a square smoke stack straddles the roofline. It measures approximately 5' square, and 50 feet tall, and has ornamental corbelling at the top.

RELATED STRUCTURES AND CONTEXT:

This building is set behind the main factory.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This building was built as the main power plant for the Wallace Shoe Company. Power was transferred from this building to the others by a system of overhead belts carried between buildings in belt boxes 20' above the ground.

Description of View: North West elevation

Looking east

Negative File Number: K-80-A5-23

Photographer: Roger Bevoort

Negative on file with: SRRC
ADDITIONAL ARCHITECTURAL AND STRUCTURAL DESCRIPTION:

This is a 4½ story, 8 x 19 bay brick factory building distinguished by brick detailing and gambrel roof, a rare feature for a late nineteenth century industrial structure. The roofline is articulated by a brick corbel table, and all the windows have segmental-arched brick hoods. Each window has 6/6 sash and wooden sills.

The roof is sheathed with slate, the historically correct material, which may be original. Several skylights pierce the main roof slope.

placed with its ridgeline parallel to the road, the building has an east-west orientation. On the southwest corner there is a shed-roofed stair tower with ornamentation identical to the main block. A simple entrance, topped by a bracketed entry hood is located at the northwest corner, on the north wall.

The building is linked to the original Wallace Shoe Factory by a 4 story, wood-sheathed wing or the north elevation.

RELATED STRUCTURES AND CONTEXT:

This is the main structure that visually separates the central business district from an area of commercial strip development to the south.

STATEMENT OF SIGNIFICANCE (Evaluation & Historical Associations):

This building was built c.1880 by the Wallace Shoe Company to house the finishing operation of the manufacturing process.

Architecturally, the structure is interesting. A wing to its gambrel roof which increases the usable space on the 5th story. This roof line, highlighted by an brick corbel table, is the structure's most distinctive feature.

INVESTMENT BRIEF

BOND REALTY LAND AND MILL COMPLEX
100 South Main Street
Rochester, New Hampshire

PROPERTY COMPOSITION:
Three Brick Mill Buildings
Three Wooden Connecting Structures
6.45 Acres of Flat Land

PURCHASE OPTIONS AND TERMS:
Option 1 - 1031 Tax Free Exchange
Fully leased income property
producing minimum net income of
$90,000 annually.

Option 2 - Land Lease
Building Assets, purchased for
$300,000.
Long term land lease starting at
$30,000 per year net.
Right of First Refusal to purchase land.

Option 3 - Cash Sale
$2,250,000 all cash purchase.
No Seller financing available.

TOTAL ACREAGE:
6.45 acres on one irregular shaped parcel.

Regional Data

Southern New Hampshire is one of the fastest growing areas in the country. The south central region (Nashua-Manchester-Concord) grew by 23.5% from 1970 to 1980 (last U.S. Census). The southeastern region (Portsmouth-Dover-Rochester) grew by 31.7% in the same period. Portsmouth's population grew 8.4% from 1980 to 1985, and grew an additional 2.1% from 1985 to 1987. Unemployment in the region has dropped from 5.6% in 1984 to the 2.4% range in 1988.

A recent (7/88) Grant Thornton Study indicates that New Hampshire ranked first in the country for state and local fiscal policies. New Hampshire's business incentives are the third most attractive in the country.

This conclusion is evidenced by the increase in major corporations entering the area. Companies like Digital, Data General, Anheuser-Busch, GTE Sylvania, IBM, Wheelabrator-Frye, Liberty Mutual, Sanders Associates and others have had a positive effect on the economy of the region. Inc. magazine said New Hampshire has the second best climate of the fifty states for starting and staying in business.

The region also exhibits diversification with tourism a factor on the Seacoast and Pease Air Force Base (Portsmouth) and the Portsmouth Naval Shipyard as major government facilities.

Several major malls have opened in the area. The Mall of New Hampshire in Manchester, The Fox Run Mall and Newington Mall in Portsmouth. One additional attractive feature of New Hampshire is its lack of a state sales tax. Many consumers from Massachusetts and Maine shop in New Hampshire to save the 5% tax in those states.

Recent figures released by the U.S. Department of Labor show that New Hampshire posted the largest increase of the New England states in labor force total with a growth rate of 4.2 percent.
COMMUNITY DATA

Rochester is part of the Tri-City area (including Dover and Somersworth) of southern Strafford County, New Hampshire. Rochester's population grew from 17,938 in 1970 to 21,560 in 1980, a 20.2% increase, which was a larger increase than Dover (7.3%) or Somersworth (14.7%) for the same period. This growth matched the Strafford County overall growth rate of 21.3%. Rochester is expected to grow by 16.4% to 25,199 in 1999. However, in the 70s the city was plagued by poor management and by 1979 was nearly bankrupt and faced federal lawsuits over water and sewerage disposal. In 1980 a new city administration took over and has made major changes in the city. There have been several historic rehabilitation and revitalization projects. Currently the city is making major additions to its sewer system and has receive a U.S.A. grant, part of which will go to construct an industrial park at the airport.

There are several major employers in the area: Cabletron, Spaulding Fibre Co. Inc., Lydall Inc. Technical Papers, INC Magnetics Corp. NH Division, and Thompson KW Tool Manufacturing Company. There are two major shopping centers and several smaller centers serving the city. The city is also currently undergoing rapid industrial development.

The Skyhaven Airport is currently being expanded to over 5,000 feet to accommodate small jets. An industrial park is currently being developed. The Frisbie Memorial Hospital recently completed a second phase of expansion and is now a modern health care facility.

Electric Power is supplied by Public Service of New Hampshire. In the urban area water and sewerage is supplied by the city of Rochester. In rural areas private wells and septic tanks are required. Natural gas is available in some areas. Telephone service is provided by New England Telephone (Bell System). Railroad freight service is from the Boston and Maine Railroad. Local bus service is available to connect with Greyhound and Trailways in Portsmouth. UPS serves the area from Dover.

Police and fire protection appear to be adequate. The school system also appears to be adequate.

Residential units in 1980 were primarily single family (4,660 -57%), followed by multifamily (2,633 - 32%), and mobile home (840-10%).
The Tri-City area encompasses the cities of Dover, Somersworth, and Rochester. These communities fall within a 10-20 mile radius of Portsmouth and the Seacoast area, and all are serviced by the Spaulding Turnpike as a connection to I-95. The proposed East-West Corridor (1990) will link the Tri-City area to Concord and I-93.

The 1985 Places Rated Almanac rated the region's economic climate fourth best in the Nation. The industrial market is tabulated as follows:

DOVER, NH

The City of Dover is working on a new Master Plan and rezoning to regain the critical balance between industrial and residential zoning by providing new land zoned for industry. A new waste facility is planned to increase the existing capacity by 50 - 60%.

Population: 25,000+/

Transportation: Spaulding Turnpike N-S Connection with I-95, Routes 3, 4, 16. Easy air access with Logan International Airport, Boston; Portland International Jetport; Manchester Airport; Skyhaven Airport in Rochester (privately chartered).

Bus Service: COAST, Trailways.

Employment: 3% unemployment

Industrial Parks: There are several parks with land parcels available. Crosby Toad Industrial Park (50 acres) is operated by Dover Industrial Development Authority.

SOMERSWORTH, NH

The City of Somersworth is currently working on a rezoning plan which will allow for commercial growth along Route 3, and commercial/industrial growth along Route 16. A sewer extension project has just been completed. The extension will allow property owners to connect to the city sewer lines along High Street and Route 16.

Population: 15,000+/

Transportation: Spaulding Turnpike N-S Connection with I-95, Routes 3, 16. Easy air access with Logan International Airport, Boston; Portland International Jetport; Manchester Airport; Skyhaven Airport in Rochester (privately chartered). Bus Service: COAST, Trailways. Over 20 major motor carriers cover the area, delivering to all points in the northeast and freight transport throughout the U.S.

Employment: Readily available labor supply accustomed to complex assembly and mechanical processes.

ROCHESTER, NH

The city of Rochester has adopted a Master Plan, expanded its road system, upgraded six bridges, and
implemented downtown revitalization. A $12 million water treatment facility went on line in the fall of 1986, and a new sewerage treatment plant began operation in the spring of 1986. Rochester has 55% of the available industrial land in the Tri-City area, including Portsmouth. A 104 acre+- industrial/business park abuts Skyhaven Airport and the Boston & Maine Railroad along Route 16, and Haven Hill Business Center with a 16 professional/medical sites sits across from Skyhaven Airport. Other positive factors include an encouraging economic development and planning office and relatively inexpensive land.

Population: 27,000+-

Transportation: Spaulding Turnpike N-S Connector with I-95; Routes 16, 202, 125, 11. Easy air access with Logan International Airport, Boston; Portland International Jetport; Manchester Airport; Skyhaven Airport in Rochester with newly expanded 4,000 foot runway. Bus Service: COAST.

filed as: U01\BONDRTYC.MKT
The Housing Section of the 1991 Rochester Master Plan addresses the following major elements:

* Quality of the housing stock.
* Quantity of the housing stock.
* Housing as required by the Department of Housing and Urban Development's Comprehensive Housing Affordability Strategy (CHAS).
* Housing requirements of the Fair Housing Act.
* Housing as an industry.
* Housing for industry.

The definition section will address the details of each major element. This plan attempt not to duplicate other local planning approaches but to bring them together under one roof, so to speak: therefore reducing time and expense.

**HOUSING SECTION ORGANIZATIONAL CHART**

```
ROCHESTER'S MASTER PLANS HOUSING SECTION

HOUSING SUBCOMMITTEE

COMPREHENSIVE HOUSING ACTION PLAN

HOUSING FOR INDUSTRY  HOUSING AS AN INDUSTRY  CHAS
```
DEFINITIONS

I. COMPREHENSIVE: The government and the people of Rochester will ensure there is an adequate supply of affordable, supportive, quality housing and shelter for its people and its industry until the 21-century.

II. DETAIL DEFINITIONS.

1. QUALITY: All housing and shelter must meet the existing codes; state and federal legal mandates; observe the elements of health, safety and welfare; and not overcrowded. Housing is not to be considered the structure itself but, also, that environment surrounding the structure.

2. QUANTITY: Sufficient housing to meet the needs of industry, and the people of Rochester, including those populations which require a "affordability strategies".

3. COMPREHENSIVE AFFORDABILITY STRATEGY (CHAS): Required by communities which apply for assistance from HUD and is developed from the National Affordable Housing Act. This comprehensive planning document identifies a jurisdiction's overall needs for affordable and supportive housing.

4. HOUSING FOR INDUSTRY: This is housing that meets the needs of the industrial sector (excluding the "housing industry"). The population addressed here would range from a food store bag person, to a chief executive of industry. The bag person needs might also be addressed under affordable housing.

5. HOUSING AS AN INDUSTRY: The would involve people and businesses both provide housing or shelter, and seller or constructing housing or shelter. A segment of the tourist industry provides shelter for over night guests.

6. AFFORDABILITY GAP: The extent to which gross housing costs, including utility costs, exceeds 30% of the gross income.

DUPLEX  4.4%
OTHER  1.4%

1982 GOALS AND OBJECTIVES

* to develop a well-balanced housing stock with adequate opportunities for all segments of the population.

* to provide housing for the elderly

* to encourage the provision of more apartments

* to impose reasonable limitations upon future mobile home development.

ACHIEVEMENT OF 1982 OBJECTIVES
AMENDMENT TO CHAPTER 42
ZONING
REGARDING: ELDERLY HOUSING

THE CITY OF ROCHESTER ORDAINS:

That in order to provide for the public interest and the general welfare of the citizens of the City of Rochester by encouraging the development of housing for the elderly, Chapter 42 of the General Ordinances of the City of Rochester, as amended, be further amended as follows:

1. That Chapter 42, Section 42.6(a) of the General Ordinances of the City of Rochester be amended by adding the following new definition (to be inserted in proper alphabetical order and appropriately numbered as a subsection):

"Elderly Housing. Elderly housing means dwelling units, excluding mobile homes and/or manufactured housing, which are intended for, and solely occupied by persons 62 years of age or older in accordance with the provisions of 42 U.S.C. §3607(b)(2)(B), or any recodification thereof."

2. That Chapter 42, Section 24.23(c) of the General Ordinances of the City of Rochester be amended by adding the following new subsection "(25)"

"(25) Elderly Housing. In the Agricultural, Residence 2, Business 1 and Business 2 zoning districts, Elderly Housing shall be allowed subject to the following variations and limitations to the zoning requirements:

a. The number of dwelling units per acre shall not exceed fourteen (14).

b. There shall be a minimum of sixty (60) feet of road frontage per lot.

c. Minimum rear yard shall be twenty-five (25) feet.

d. Minimum parking spaces shall be one (1) space per dwelling unit.

e. All dwelling units shall be connected to City water and sewer."
f. All such developments must be within one-half (1/2) mile of some form of existing services and/or amenities such as shopping, public transportation and community facilities.

g. Limited commercial uses may be allowed in a specific project not to exceed three (3) per cent of the total lot area for the following commercial uses: retail stores, grocery or variety stores, offices, service establishments or restaurants.

h. The owner and/or developer of an Elderly Housing project for which a special exception is sought shall be required to enter into a written agreement with the City of Rochester restricting the dwelling units within such project to occupancy by persons 62 years of age or older in accordance with the provisions of 42 U.S.C. §3607(b)(2)(B), or any recodification thereof. Such occupancy restriction shall also be incorporated in and appear on the face of, any subdivision or site review plan approved by the Rochester Planning Board with respect to such Elderly Housing project and shall be a Planning Board condition imposed upon any such subdivision or site review approval. Such written agreement with the City of Rochester shall also bind the owner and/or developer of such Elderly Housing project to incorporate such occupancy restriction in any condominium declaration or similar documents regarding such project."

i. In the Agricultural zone only the following additional limitations shall apply:

1. A maximum of eight (8) dwelling units per building.

2. A minimum three (3) acre lot size per development.

3. A minimum rear, side and front yard of fifty (50) feet each.

4. All buildings shall be limited to two (2) story buildings.
5. All building construction shall be in harmony with the existing character of the neighborhood.

3. That Chapter 42, Section 42.14 of the General Ordinances of the City of Rochester, entitled "Permitted Uses - Table 1" be amended to provide as follows:
