Wake up, non-smokers: State your objections

Dear Ann Landers;

How many times has someone asked, "Do you mind if I smoke?" — and even though you'd rather not have smoke blown in your face you say, "That's all right, go ahead." New evidence should be called to the attention of the reading public, Ann, and here it is.

Recent experiments at Texas A & M University indicate that 30 minutes in a smoke-filled room significantly increases the non-smoker's heart rate, blood pressure and the amount of carbon monoxide in his blood. A team of researchers at the University of Cincinnati Medical Center reported that smoke drifting from the burning ends of cigarettes, pipes and cigars contains cadmium which could definitely be harmful when inhaled by on-lookers. Another research team at Wayne State University in Detroit found that acute illnesses, mostly respiratory, were twice as

prevalent among young children whose parents smoked at home than among children whose parents did not.

Please, Ann, urge your readers to say, when asked, "Do you mind if I smoke?" — Yes, I do mind. It's bad for my health." — Charles Kjesewetter, executive director, T.B. and Health Society, Wayne-Oakland Counties

Dear C. K.:

Thank you for writing.

For those who are too timid to say, "Yes, I do mind," I suggest that you clip this column and have copies made. When asked the question simply hand it over. That should clear a sinus or two.

ATTENTION HILLEL

There will be a Hillel Club meeting today to discuss Passover. We wish your presence there. Where? S-13.

Remember, these trying times will be somebody's "good ole days".
