Summary of Findings

During 1997, the total value of shipments of motors and generators including interplant transfers totaled \$10.2 billion, which remains constant with the 1996 value of \$10.3 billion. The 1997 data for individual categories of motors and generators exhibited the following changes: The value of shipments of fractional horsepower motors increased 1 percent from the revised value of \$4.4 billion in 1996, to \$4.4 billion in 1997. The integral horsepower motors and generators decreased 4 percent from \$2.3 billion in 1996, to \$2.2 billion in 1997. The value of land transportation motors and generators was combined with parts for motors and generators to avoid disclosing data for individual companies. The value of shipments of prime mover generator sets increased 16 percent from the revised 1996 value of \$1.5 billion, to \$1.7 billion in 1997. Electric motor generator sets and other rotating equipment, including hermetics and parts, decreased 10 percent from \$2.0 billion in 1996, to \$1.8 billion in 1997.
