Annex 1: Organizational structure

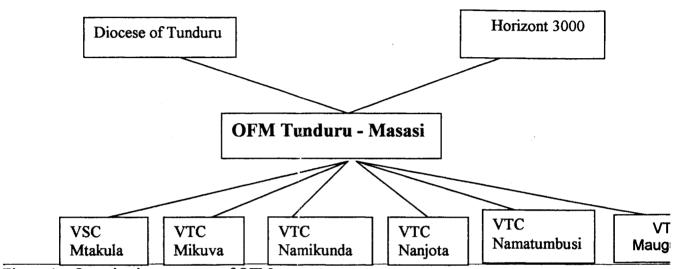

Figure 1a: Organization structure of OFM

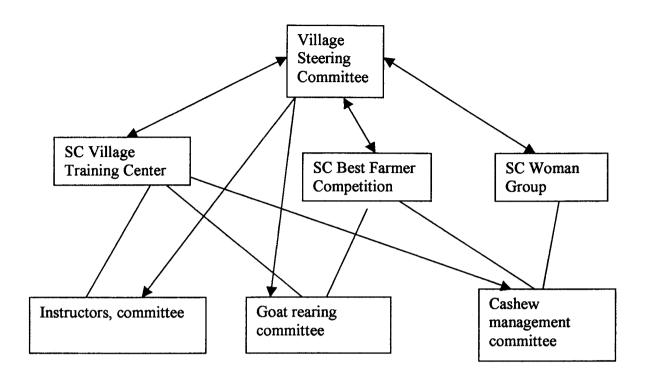

Figure 1b: Organizational structure in villages under organization Development, Food security and production for market

For definition of the abbreviations see text.

Annex II

### Needs identification work sheet:

Present	Desired	What need to be done to bridge
Situation:	Situation	the gap?
1. Lack of technical know	Improved education	- Researchers should train farmers.
how	(25) = 83%	<ul> <li>Group extension agents should be trained.</li> </ul>
2. Low income	Improve income (30) = 100%	Facilitate farmers on accessibility to credit facilities.
3. Not accessible to Credit facilities.	Farmers access to credit facilities (30) = 100%	Facilitate farmers establish their groups.
4. Poor infrastructure	Improved infrastructure	- Village roads rehabilitated
- Poor roads - Poor transport and	(24) = 80%	- Frequent visit of technical staff in order to know farmers problems.
- Transportation.		
5. Poor marketing system (place, price, buyers)	Improved marketing systems. (29) = 96%	CBT – Make sure that cashew prices are improved by involving farmers.
		- Farmer's organization.
6. Poor farmers organizations.	Improved farmers organization (28) = 93%	- Farmers groups share knowledge and experience.
		- Farmer groups join for farmer organization.
7. Poor water facility	Improved water supply (30) = 100%	Water wells with pumps.
8. Diseases	Diseases prevention and control (30) = 100%	Credit provision.
9. Un-improved seeds	Improved seeds (30) =	NARI – Establish seed multiplication
	100%	Blocks in villages.
10. Poor communication	Improved communication (24) = 80%	Farmers need to be well informed of new technologies.
11. Poor cassava post-	Labour saving technologies	Machines to be available
harvest	(27)	Credit to purchase machinery.
12. Weather	Timely farm operations (30)	Extension workers should advice farmers to time operations.

The numbers in brackets show farmer responses to needs assessment.

Annex III Cassava Cultivars grown in project and non-project areas N = 80.

Annex IV.

#### Strength, Weakness, opportunities and Threat (SWOT)

#### Strength:

- Well established groups of farmers
- Existing village training centers
- OFM project planning was a bit gender sensitive

#### Weakness:

- Transport problems to instructors
- Some other planned targets were not
- Sometimes there are delays in fund
  disbursement which leads to delays in
  implementation of activities hence un
  accomplished objectives

#### Opportunities:

- Available donors
- NARI for agricultural research
- MATI for training purposes in agriculture
- VTC members' knowledge can be utilized to educate their fellow farmers in their village training centers.

#### Threat:

- Drought
- Pests and Diseases of crops
- Flood

#### Annex V: An application letter to the NGO

P.O. Box 509 MTWARA. 27<sup>th</sup> October 2003

Vicar General P.O. Box 684 Masasi MTWARA

# Re: REQUEST TO CONDUCT RESEARCH AND PROVIDE FREE CONSULTANCY IN YOUR COMMUNITY BASED ORGANISATION

The heading above is referred.

I would like to request for a chance of working in your organization as a free consultant so as to contribute towards project goals while also doing some research work.

I am an employee of the Ministry of Agriculture and Food security since 1981 to date. I am working in the department of Research and Development. Currently my work station is Naliendele Agricultural research station in the Southern zone of Tanzania. I am working with the Socio-economic unit or Farming systems Research. Currently I am a student of the Southern New Hampshire University at the Open University of Tanzania for the Masters Degree in Community Economic Development Program (CED).

I will be very grateful if I will be permitted or allowed to conduct my research work and provide a free consultancy in your organization with your project of Organized Farm Management and Marketing (OFM). My duties at my work place/station are concerned with monitoring and evaluation of projects in the zone, Project proposal writing and capacity building especially on agricultural related matters and gender issues to farmers and all stakeholders. I am also capable of facilitating farmers to have access to credit facilities. Therefore, being accepted, I would like to work with you along those lines.

Thanks in advance.

Yours sincerely

Halima Kwikwega

Student (CED Programme)

#### WORK PLAN:

October 11<sup>th</sup> 2003 - First contact at the community based organization in Masasi Town where I did a verbal introduction to the organization leadership (Vicar general and development director) Took one hour.

2<sup>nd</sup> Contact was done in October 2003 – I sent my introduction letter to the vicar general. It took about 30 minutes

3<sup>rd</sup> November 2003 contact -Collected my replied letter, collected some reading materials (proposal and progress reports).

4<sup>th</sup> December 2003 contact – Conduct meeting with vicar general director and project leader to see what I can do in the organization by looking at their work plan by using a check list as attached in appendix I.

December 2003 - Helped the project leader to arrange for a training of group of farmers to Ministry of Agricultural Training Institute, Naliendele.

January 2004 - The project leader helped me to arrange for a meeting with a group of farmers.

5<sup>th</sup> January 2004 contact - developed my work plan for my assignment.

First week of February 2004 - Farmer training on cashew production was done.

6<sup>th</sup> February contact 2004 – conducted a discussion meeting with a group of farmers from CBO village by using a prioritization of need.

February 2004 - Held a meeting with the organization for feed back.

February to March 2004 - First progress report writing

April 2004 - First Contact with my day to day supervisor

- Introduced to him about my project ideas.
- Reading literature for background information.
- Developed a concept note of my project proposal.
- Submitted my concept note to my day to day supervisor of Mtwara.
- First discussed my concept note with my day to day supervisor in Mtwara
- contact with my main supervisor by email message.
- 2<sup>nd</sup> contact by email with my main supervisor by email where I sent him a concept note for comments.

May 2004 - Met my main supervisor to discuss about my concept note in Dar es Salaam where we agreed I should look for a source of funding for conducting a survey for data collection.

May – June 2004 - 2<sup>nd</sup> Report writing about the CBO Iam working with and the project.

May - June 2004 - Questionnaire development.

June 2004 - Training field work personnel

June 2004 – Pre – testing a questionnaire (pilot testing)

June – July 2004 Actual data collection in the field.

June – July 2004 – Data processing and analysis.

July – November 2004- Report writing.

December 2004 – Submitted a second progress report

January 2005 – Project presentation in Dar es Salaam

February 2005 Met Instructor and my supervisor in Dar es Salaam

February - March incorporated some comments in my report and submitted to my supervisor

May 2005 resubmission of my report

May – June 2004 - Feed back to the project Organization and other stakeholders.

#### Annex VI

# TITLE: FARMER ASSESSMENT ON CASSAVA BROWN STREAK DISEASE IN MAUGURA AND NAMIKUNDA VILAAGES IN SOUTH EASTERN TANZANIA

District Village name Name of interviewer Date  A. Demographic and socio-economic characteristics, land resources and allocation for the households:  (i) Farmer characteristics  1. Name of respondent  2. Name of head of house hold  3. Sex (1) Male (2) Female (3) Age 4. Years lived in the village 5. Main occupation  6. Marital status: (1) Single (2) Married (3) Others 7. If single reasons: (1) divorced, (2) migrated (3) Death (4) Others  8. Formal education: Years of Schooling 9. Experience in cassava cultivation  10. ## 5.0 B. Institutional support

C. Sources of income/income generation

(1) Access to extension services
12. Do you have access to extension services? Yes/No
If yes, how frequent is it annually?
If no, what are the reasons?
24. What type of skills training exists?
25. Are they accessible? 1Yes 2No To whom is the training accessible?
23. What are types of development activities has this community been involved?
24. Any organization agency (eg. Ngo, CBOs etc) working in the village development activities
If yes, name them what are their roles  If no, what are other sources of information to you?
25. Is there any group of farmers in the village?
Are you involved in any group of farmers in the village Yes/no  What are they doing?
What are the outcome
(ii) Access to credit facilities
26.Do you have access to credit facilities Y/N  If yes, what are the main sources? (a) CRDB bank (b)Saving and credit organization (SACCOS)  (c) Community development (d) Others specify  If no, why?(a) Beauracratic procedures (b) Unaware (c) Lack of required collaterals (d)  Others (specify)

27.	Did	you	earn	some	income	from	sales	of	crop	Y/N

#### 28. From each crop give the following information

Crop	Total Yield (bags)	Quantity consumed	Quantity sold	Price per unit	Where sold	Time of selling	Distance from market
Cashew							
Maize							
Pigeon pea							
Sorghum							
Cassava							
Groundnuts							
Bambaranuts							
Sweet potatoes							
Rice							
Others:							

#### 29. Earning from livestock or livestock products:

Did you earn income from livestock sales? Y/N If yes, what was the average earning?

Type of livestock	Magnitude of income (TSHs).
Cattle	
Sheep	
Goat	
Ducks	
Guinea fowl	
Milk	
Eggs	
Beef	
Others (specify)	

#### 30. Off-farm activities:

Did you earn income outside agriculture and livestock (off-farm sources) Y/N If yes, what kind of main off-farm activities and how much money was generated?

Activity	Income	Exact time (months)
Logging		
Brewing		
Selling out labour		
Carpentry		
Shop keeping		
Mates		
Baskets		
Coconut scrappers		
••		

#### 6.0 D: Resources Benefits:-

31. Access And Control Over Resources

No.	Resources	Access		Control		
1	Land	Male	Female	Male	Female	
2	Labour					
3	Farm implements					
4	Income					
5	Credit					
6						
7	Benefits access to technology					

#### E. Livestock activities and farm mechanization:

32. Do you keep livestock? (Y/N)

If yes, indicate the type/classes of livestock you keep.

Livestock class	Number
Cattle	
Sheep	
Goats	
Pigs	
Chicken	
Pigeon	
Guinea fowl	
Ducks	
Dogs	
Cats	
Others specify	

<ol> <li>Do you use draft power in fa</li> </ol>	ırm operati	ons? Y/N
If yes, mention source: (a) Hire	(b) Own	(c) Other

### F. Farm assets/implements

34. Indicate types and number of farm implements you have

Type of implement	Number
Tractor	
Hand hoe	
Machetes	
Axes	
Knives	
Others (specify)	

	for the land area under cassava, give the following information:
a) L	and preparation:
-	Time of land preparation
	Method of land preparation
-	Equipment used in land preparation
-	The dotter in the property of the control of the co
-	Final form of seed bed (flat or ridges)
	(b) Planting
-	Time of planting
-	
-	Spacing used
-	How much planting material did you use? (Number of bundles)
-	What was the source of planting material?
-	What was the price per bundle?
_	Who does the planting? 1. Males 2. Females
6	C) Cropping pattern
•	What is your common practice?
	. Intercropping
	. Monocropping
	. Mixed cropping
	Other (specify)
	d) Planting material selection
_	Main variety used:
(	1). Mreteta (2). Limbanga (3). Nanchinyaya (4). Supa (5) Sheria
(e	6). Lihumbukwa (7) Namikonga (8) Kigoma red (9) Nanjenjeha (10) Ntukane
-	Sources of planting material:
	1. Own 2. Bought 3. Research 4. Extension 5. Others (specify)
	When is the selection of planting material done?.

	1. July to September 2. July to October 3. Other (specify)
_	How do you select planting materials? (criteria)
	1. Mealy bug free
	2. Mosaic free
	3. Thick stem
	4. Mature and fresh
	5. Performance history of the parent
	6. Others (specify)
_	Who does the selection of planting materials?
	1. Male 2. Female
-	How do you store your planting materials?
	1. Under the shade of the tree
	2. An open environment
	3. Left without harvested in the field
	4. Others (specify)
(e)	Weeding:
-	When did you do the first weeding?
-	Frequency of weeding 1. Once 2. Twice 3. Thrice 4. Others
-	What is the problem weed?
-	Method of weeding
-	Equipment used for weeding
_	Who does the weeding?. 1. Males 2. Females
<b>(f)</b>	Fertilizer and soil fertility management:
-	Type of fertilizer used
-	Rate used
-	Time applied
-	Method of application
-	Source
-	Price per unit
-	Who applies the fertilizer? 1. Males 2. Females
- W	What other ways do you use to maintain soil fertility?
	·
-	
-	

(g). Indicate labor requirement for cassava per acre (mandays).

7.0 Activity	Source o	of labor				Cost	of labor	
	Family	Hired	Exchange	Total	Family	Hired	Exchange	Total
Land prepar,								
Planting								
Weeding 1								
Weeding 2								
Weeding 3								
Fert. Applic								
Harvesting								
Transport								
Select pl. mat								
Postharvest								
Storage								
Marketing								

#### (h) Pests and diseases

- Mention pests and diseases of cassava

Pests	Diseases
1. Mealy bug	1. CBSD
2. Elegant	2.CMD
grasshoppers	3.Soft rot
3. Rodents	4. Others (specify)
4. Wild pigs	
5, Others (specify)	

#### (i)Cassava brown streak disease (CBSD)

<u>-</u>	Are you aware of CBSD? Y/N  Can you identify foliar/stem symptoms of the disease at early st  Y/N	tages of plant growth?
-	If yes, what are the symptoms?	
	Can you identify the disease at late stages? Yes/No	
_	Do you know the root symptoms? Yes/No Mention them	
_	Can you distinguish between soft rot from CBSD? Yes/No	<del></del>

- (j). Control Strategies:
  - 1. Roguing
  - 2. Select disease free planting materials

- 3. Use resistant varieties4. Othaers (specify)

-	Use disease free planting materials? Yes/No Reasons for your answer
	Is rouging of diseased plants practiced? Yes/No Reasons for your answer
-	Do you burn diseased plants after harvesting? Yes/No Reasons for your answer
- - -	Do you use tolerant varieties? Yes/No What are they?
•	What could be the consequences if CBSD will not be controlled? (food security, economy and socially
•	What is the source of this knowledge (disease control strategies)?  [ARI staff tension worker]
	ewspaper
	raflets
. po . Ra	osters
	rmers day (nanenane show)
. see	ed fairs
	rmers field days hers (specify)
	rvesting and transportation
	n did you harvest cassava?
	od used
	esting equipment used
	does the harvesting? 1. Males 2. Females
	is the transportation of crop produce back home?.

- V	Who is responsible for transporting crops 1. Males 2. Females  (I) Post harvest processing and storage:
	- Method used
	- Processing equipment
	<ul> <li>Who is concerned with the processing activity? Males/Females</li> <li>Who is responsible with storage of cassava crop? Males/Females</li> <li>How long does it take to process cassava? (hours/how many days)</li> <li>How is cassava produce stored?</li> </ul>
	(m) Marketing of cassava:
	- How is cassava sold in this village?
	As fresh
	dried cassava chips
	flour
4.	Others (specify)
- V	Where sold? 1. Within the village 2. Neighboring villages 3. Town 4. Others (specify)
- V	What is the distance to the market (km)?
- V	Vhat are the prices per unit?
- V	Who decides to sell? 1. Males 2. Females
37	. How is the decision making carried out in the household?
	By men alone
	Women
	Both
	Other (specify)
38. 1.	What are the problems encountered in the community? Rank them in order of importance
2.	
3.	
4.	
5.	
39.	What are the possible solutions?
H	nank you.

# Annex VIII: Activity planning

Activity	8.0 Who Responsible?	9.0 By When?
Before the Workshop:	-	
Send invitations and workshop agenda to		
participants	NGO staff	first week of july
Arrange ducoments	facilitators	second and therd week of july
Purchase and test training materials	facilitators	july
Test equipment	assistant facilitators	July
Prepare charts	facilitators	July
Photocopy handouts for each participant Visit training site and check suitability of	facilitetors	July last week
location[including places for larger and small group meetings]	NGO staff 6 Facilitetors	First week of August
Test wall space for charts	H	"
check furniture	H	"
Arrange food and beverages	•	**
Arrange transportation	NGO	July -august
Arrange accomodation	NGO	, ,
Actual training	facilitators	August-september
End of workshop;	·	
distribute list of participants'name		
and addresses	Facilitators	August
collect unused materials	**	H
Return equipment	**	11
Read and analyze evaluations	**	n
Mail follow -up material Pay bills	NGO	August-september
collect outstanding money	NGO	September
Study tours	NGO+Facilitators	September

Annex IX: Study area

Annex X: Training programme of CBSD management strategies and cassava processing techniques

TOPIC/SUB-TOPIC	CONTENTS	LEARNING	METHODS	MATERIALS	PRACTICAL	TIME/h	ours
		OBJECTIVES Farmers should be able to:			SKILLS	T	P
1.0 INTRODUCTION	i. Importance ii. Crop ecology iii. Distribution iv. Varieties	(a) Importance of Cassava in the southern Zone and its uses. (b) Outline the ideal ecological requirements (c) Explain the importance and distribution of the crop in Tanzania (d) List the recommended varieties	- Lecture - Discussions - Brainstorm	- Chalkboard - Real materials		1	0
1.0 CULTURAL PRACTICES  1.1 Land preparation	i. Procedures ii. Ridges preparations iii. Merits iv. Types	(a) Describe the land preparation procedure (b) List the merits of ridge cultivation as compared to flat cultivation in the production of cassava	- Lecture - Demonstration - Discussion - Display	- Chalkboard - Farm tools hoes, rakes - Sharp knives	- Make ridge	0:30	1
2.2 Planting	i. Planting materials	(a) Outline the qualities of	- Lecture - Field visits	- Cassava cuttings	- Prepare and select good	1.30	3

TOPIC/SUB-TOPIC	CONTENTS	LEARNING	METHODS	MATERIALS	PRACTICAL	TIME/ho	ours
		OBJECTIVES			SKILLS	T	P
		Farmers should be able					
	pys	to:					
	ii. Types	planting		- Ch	planting		
	iii. Technics	materials			materials
