Welcome

Message from the President

It gives me great pleasure to present to you the Southern New Hampshire University catalogs. A university catalog offers a comprehensive overview of the variety of programs and classes offered both on campus and online. These catalogs contain information about our history and mission, our services and outreach, our facilities and the many opportunities we provide students for meeting their life and career goals.

It's certainly an exciting time to be a student at SNHU. Since our founding in 1932, the University has transformed from a school of accounting and secretarial science into an institution offering over 200 programs, from certificates to doctoral level degrees including business, education, liberal arts, social sciences and STEM. Recognized by U.S. News and World Report, Forbes and Fast Company, SNHU is committed to providing exceptional student experience and programs that fit the needs of today's students.

SNHU continues to give you more options to complete your degree than almost any other institution. You can blend traditional on campus courses with wholly online courses or take a mix in one of our hybrid courses. With a number of centers besides the main campus, you can access courses in a place most convenient to home or work and at a competitive cost.

We welcome you to explore all that we have to offer. We think that you'll find us to be an exciting institution that is dedicated to helping you make the most of your potential and committed to providing the types of programs that make all of your career aspirations possible. We hope that you will be part of the SNHU Community.

A handwritten signature in black ink that reads "Paul J. LeBlanc". The signature is written in a cursive, flowing style.

Sincerely,
Paul J. LeBlanc
President

The Purpose of a University Catalog

The purpose of a university catalog is to be of use to present or potential students and family members, to serve as a historical document and to let others know the nature and scope of programs available, as well as university policies. Every effort has been made to ensure accuracy at the time of publication.

The online catalog contains the most current information. Sections of the online catalog may be printed as needed. Archived versions of catalogs (PDF format) are also available.

Students have the responsibility to become familiar with catalog content as they pursue their educational goals. The students, administration, faculty and staff have the mutual responsibility of bringing the words to life by making the learning experiences as pleasant and productive as possible. The catalog should be used as a guide in conjunction with the student's program evaluation and academic advisor in ensuring that the necessary requirements are met for graduation.

The university reserves the right to change any part of the catalog and to make any changes retroactive for students currently enrolled.

University Mission

Southern New Hampshire University transforms the lives of learners. Our success is defined by our learners' success. By relentlessly challenging the status quo and providing the best support in higher education, Southern New Hampshire University expands access to education by creating high quality, affordable and innovative pathways to meet the unique needs of each and every learner.

University College Mission

The mission of University College is to graduate students prepared for professional and personal success. We provide rigorous academic programs and essential civic education accessible to all students. Our curricula will inspire students to engage in the cultural, political and economic life of their community.

Thomas Dionisio	Executive Vice President, Technology and Transformation	B.S., Southern New Hampshire University M.S. Brandeis University
Gregory W. Fowler (Dr.)	President, SNHU Global Campus	B.A., Morehouse College M.A., George Mason University M.B.A. Western Governors University Ph.D., State University of New York-Buffalo
Adrian Haugabrook (Dr.)	Senior Vice President and University Chief of Staff	B.S., University of West Georgia M.S. Georgia Southwestern State University Ed.D., University of Massachusetts Boston
Jada Keye Hebra	Senior Vice President and Chief Diversity & Inclusion Officer	B.A., Vassar College M.S., Columbia University
Kirk D. Kolenbrander (Dr.)	Executive Vice President, College of Engineering, Technology and Aeronautics	B.A., Central College Ph.D., University of Illinois at Urbana-Champaign
Kenneth Lee	Executive Vice President, Chief Financial Officer, and Treasurer, Finance and Administration	B.A., Harvard University M.B.A., Harvard University
Patricia A. Lynott (Dr.)	President, University College	B.A., Trinity College M.A., Northern Illinois University Ph.D., Loyola University of Chicago
Amelia Manning	Chief Operating Officer and Executive Vice President, College of Online and Continuing Education	B.A., St. Michael's College M.A., University of New Hampshire
Libby May	Senior Vice President, External Affairs and Communications	B.A., Ohio Wesleyan University Graduate Certificate, University of Virginia
Sarah Normand	Senior Vice President and Executive Director, Workforce Partnerships	B.A., University of New Hampshire M.S. Southern New Hampshire University
Chrystina Russell (Dr.)	Vice President for Global Engagement	B.A., University of Michigan M.S. Mercy College Advanced Certificate, Baruch College Ph.D., City University of New York Graduate Center
Danielle Stanton	Executive Vice President and Chief Human Resources Officer	B.A., Notre Dame College M.S., Villanova University
Connie Yowell (Dr.)	Executive Vice President and CEO of LRNG	B.A., Yale University Ph.D., Stanford University
William Zemp (Dr.)	Executive Vice President and Chief Strategy & Innovation Officer	B.A., The Citadel M.S., Ph.D., American Catholic University

Administration Emeriti		
Name	Title	Organization
Richard A. Gustafson	President Emeritus	Southern New Hampshire University

Campus Programs

Faculty Emeriti			
Name	Title	Credential(s)	Year
Robert Begiebing	Professor emeritus of English	B.A., Norwich University M.A., Boston College Ph.D., University of New Hampshire	1977
Pamela Cohen	Professor emeritus of mathematics	B.A., Boston College, M.A., Teachers College, Columbia University	1984
Robert R. Craven	Professor emeritus of English and humanities	B.A., M.A., City College of New York Ph.D., University of Rhode Island Diploma (Art History), University of New Hampshire	1977
Eleanor Dunfey-Freiburger	University professor emeritus of ethics and engagement	B.A., Emmanuel College M.A., University of San Francisco	1984
Robert H. Fleeson	Professor emeritus of English	B.A., Yale University M.A., University of New Hampshire	1967
James Freiburger	Professor emeritus of organizational leadership	B.S., Loras College M.S., University of Notre Dame C.A.S. University of Vermont Ph.D., University of Connecticut	1988
Betsy Gunzelmann	Professor emeritus of psychology	B.A., M.Ed., Salem State College Ed.D., Boston University	1996
Carolyn Hollman	Professor emeritus of English and education	A.B., University of Michigan M.A., University of New Hampshire Ed.D., Vanderbilt University	
Ernest H.S. Holm	Professor emeritus of government	A.B., Dartmouth College M.A., Boston University M.A.T., University of New Hampshire Ph.D., Tufts University	
Burton S. Kaliski	Professor emeritus of business education	B.B.A., City College of New York, Baruch School M.S., State University of New York at Albany Ed.D., New York University	
G. David Miller	Professor emeritus, community economic development	B.A., Brown University M.S.W., University of Michigan M.A., Northeastern University	
Paul Schneiderman	Professor emeritus of finance	B.B.A., M.B.A., University of Massachusetts M.A., Ph.D., Clark University	1976
Robert Seidman	Professor emeritus of information technology	B.S., Rutgers University M.S., Ph.D., Syracuse University	1981
Don W. Sieker	Professor emeritus of English	A.B., M.A., San Francisco State University Ph.D., University of California	
Christopher Toy	Professor emeritus of mathematics	B.A., M.A., San Francisco State University	1971

Campus Programs

Full-Time Faculty: School of Arts and Sciences			
Name	Title	Credential(s)	Year
Charles Andrews	Associate professor of humanities and fine arts	B.A., Emory University M.A., Ph.D., Indiana University	2013
Andrea Bard	Associate professor of communication	B.S., Northern Michigan University M.A., Emerson College	2008
Paul A. Barresi	Professor of political science and environmental law	B.S., Cornell University J.D., The George Washington University National Law Center M.A.L.D., The Fletcher School of Law and Diplomacy, Tufts University Ph.D., Boston University	2001
Kiki Berk	Associate professor of philosophy	M.A., Ph.D., Vrije University, Amsterdam	2013
Crystal Bickford	Associate professor of English	B.A., M.A., University of Massachusetts, Dartmouth Ph.D., Indiana University, Pennsylvania	2010
Jon Boroshok	Instructor of communication	B.S., Communications, Emerson College M.B.A., Northeastern University	2011
Ed Brilliant	Game artist and instructor	B.F.A., Montserrat College of Art	2013
Christine Caples	Assistant professor of mathematics	B.S., Fairfield University M.S., University of Iowa	2017
David Carrigg	Instructor/Programmer of game	B.S., Clarkson University	2016
Francis N. Catano	Professor of sociology	B.A., St. Anselm College M.A., Northeastern University Ph.D., Walden University	2005
Christina Clamp	Professor of sociology	B.A., St. Anselm College M.A., Northeastern University Ph.D., Walden University	2005
Aaron Collins	Assistant professor of chemistry	B.S., University of Connecticut M.A., Ph.D., Washington University	2015
Richard Cook	Instructor of music	B.A., M.A., University of New Hampshire	2008
Susan E. Cook	Associate professor of English	B.A., M.A., Boston College Ph.D., University of California, Santa Barbara	2011
Joseph F. Corbin, III	Professor of environmental studies	B.A., West Virginia University M.S., Ph.D., Washington State University	2009
Vincent Corbo	Assistant professor of psychology	B.S., Universite du Quebec a Montreal M.S., Ph.D. McGill University	2016
Patrick Cullen	Professor of justice studies	B.S., Cornell University J.D., Boston College Law School	2006
Allison M. Cummings	Professor of English	B.A., Reed College M.A., Ph.D., University of Wisconsin, Madison	2002
Jon Dearborn	Instructor of game programming	B.A., State University of New York, Potsdam M.S., University of New Hampshire	2018
Melanie Dennis	Assistant professor of mathematics	B.A. Middlebury College Phd. AM, Dartmouth College	2019
Bradfield Dittrich	Assistant professor of English	B.A., St. Mary's College M.A., Salisbury University Ph.D., University of New Hampshire	2017
Tracy Dow	Assistant professor of graphic design	B.A., Notre Dame College M.B.A., Plymouth State University	2008

Campus Programs

Katie Duryea	Assistant professor of biology	B.A., Cornell University Ph.D., Dartmouth College	2019
Peter Frost	Professor of psychology	B.A., Framingham State College M.A., Ph.D., Baylor University	2001
Adam Gilbert	Associate professor of mathematics	B.A., Merrimack College M.S., Ph.D., University of Rhode Island	2014
Michele Goldsmith	Professor of science	B.A., State University of New York at Plattsburgh M.S., Bucknell University M.A., Ph.D., State University of New York at Stony Brook	2008
David Gray	Assistant professor of mathematics	B.A., New England College M.Ed., Plymouth State College M.S., Ph.D., University of New Hampshire	2018
Christopher Healow	Assistant professor of philosophy	B.A., The University of Montana M.A., Western Michigan University	2017
Michael Hendery	Assistant professor of psychology	B.A., Ithaca College M.A., St. Michael's College Psy.D., George Washington University	2010
Sarah Howe	Assistant professor of English	B.A., University of Saint Joseph M.A., Trinity College Ph.D., University of Arizona	2013
Jeanne Hughes	Associate professor of English	B.A., M.A.T., University of New Hampshire Ed.D., Rivier University	2014
David Humphreys	Assistant professor of communication	B.A., University of Massachusetts, Amherst M.F.A., Emerson College	2015
William Jamieson	Assistant professor of mathematics	B.A., M.S., Ph.D., University of Rhode Island	2016
Pamela Jordan	Associate professor of politics and global affairs	B.A., Mount Holyoke College M.A., University Michigan Ph.D., University of Toronto	2015
Jay F. Kosegarten	Associate professor of psychology	B.A., Connecticut College M.A., Ph.D., Long Island University	2011
William Kratochvil	Lecturer of mathematics	B.S. University of Wisconsin M.B.A., Indiana University, South Bend	2016
Richard Ludlow	Associate professor of physics	B.A., Ph.D., University of New Hampshire	2017
Robert MacAuslan	Assistant professor of sociology	B.A., Plymouth State University M.A., University of Massachusetts, Lowell Ph.D., Washington State University	2015
Hamed Majidzadeh	Assistant professor of chemistry	B.S., Zanjan University M.S. Tehran Azad University Ph.D., Auburn University	2019
John McCannon	Associate professor of history	B.A., Yale University M.A., Ph.D., University of Chicago	2011
Rita Naughton	Assistant professor of TESOL	B.A., M.A., University of Massachusetts, Lowell Ph.D., Biola University	2012
Kenneth Nivison	Professor of history	B.A., St. Anselm College M.A., Ph.D., The Catholic University of America	2009
Ann Nordmeyer	Assistant professor of psychology	B.A., Smith College Ph.D., Stanford University	2016

Campus Programs

Benjamin Nugent	Associate professor of English	B.A., Reed College M.F.A., Iowa Writers' Workshop	2011
Justina Oliveira	Assistant professor of psychology	B.A., University of Minnesota M.S., Baruch College Ph.D., City University of New York	2015
Rosemary Orlando	Professor of TESOL	B.A., Providence College M.Ed., Rhode Island College Ed.D., Argosy University	1994
Megan Paddack	Associate professor of mathematics	B.A., Plattsburgh State University of New York M.A., Ph.D., University of New Hampshire	2009
Elise N. Pepin	Professor of psychology	B.A., Brandeis University M.A., M.S.T., Ph.D., University of New Hampshire	2007
Diana H. Polley	Professor of English	B.A., Dartmouth College M.A., Ph.D., Graduate Center of the City of New York (CUNY)	2006
Jenna Reis	Assistant professor of mathematics	B.A., Emmanuel College M.S., Ph.D., University of Rhode Island	2018
Vanessa Rocco	Associate professor of art history	B. A. American University M.S., Ph.D., City University of New York	2012
Colin Root	Associate professor of humanities and fine arts	B.A., Ball State University M.F.A., Ph.D., Boston University	2013
Megan Sawyer	Associate professor of mathematics	M.A., Smith College M.S., Ph.D., North Carolina State University	2013
Lleij Schwartz	Assistant professor of TESOL	B.A., M.A.T., University of New Hampshire	2015
Lisa Speropolous	Assistant professor of justice studies	B.A., Ph.D., University of New Hampshire M.S., Northeastern University	2017
Christina Starkey	Assistant professor of mathematics	B.S., Ph.D., Texas State University, San Marcos	2016
David W. Swain	Professor of English	B.A., Eastern Nazarene College M.A., Pennsylvania State University Ph.D., University of Massachusetts	2007
Marlyn Tadros	Associate professor of web design and new media	B.A., M.A., Ph.D., Cairo University, Egypt	2017
Louis Tamarro	Lecturer of game art	B.F.A. Montserrat College of Art	2018
Harry Umen	Professor of communication	B.F.A., Temple University M.F.A., Indiana University, Bloomington	2002
Deborah S. Varat	Professor of art history	B.A., University of Rochester M.A., Ph.D., Boston University	2004
Craig Wggin	Assistant professor of justice studies	A.S., B.S., St. Anselm College M.Ed., Plymouth State University	2016
Kristina Wright	Associate professor of English	B.A., University of North Carolina, Charlotte M.A., Ph.D., Tufts University	2013
Kate York	Associate professor of science	B.S., M.Ed., Ph.D., University of New Hampshire	2010

Campus Programs

Full-Time Faculty: School of Business			
Name	Title	Credential(s)	Year
Innocentus Alhamis	Assistant professor of management science	M.A. International University Ph.D., Southern New Hampshire University	2018
Eklou Amendah	Professor of marketing	B.S., M.S., University of Lome, Togo M.S., Auburn University Ph.D., Purdue University	2008
Micheline G. Anstey	Associate professor of marketing	B.A., St. Anselm College M.B.A., New Hampshire College	2005
C. Bulent Aybar	Professor of international business	B.S., The Middle East Technical University M.A., University of Istanbul M.A., Ph.D., Ohio State University	1998
Michael Baker	Assistant professor of accounting	B.A., University of Oklahoma M.B.A., Southern New Hampshire University Ph.D., Southern New Hampshire University	2014
Shauna Beaudin	Assistant professor of information technology	B.A., M.B.A., Southern New Hampshire University	2014
Christine Blais	Assistant professor of organizational leadership	B.S., Plymouth State University M.S., Southern New Hampshire University D.A., Franklin Pierce University	2015
Doug Blais	Professor of sport management	B.S., M.B.A., New Hampshire College Ph.D., University of Connecticut	1996
Steven O. Booth	Professor of business law	B.S., Franklin Pierce College J.D., Ohio Northern University	2003
Bryan Bouchard	Assistant professor of accounting	B.S., M.B.A., M.S., Southern New Hampshire University	2013
Charlotte Broaden	Professor of international business and organizational leadership	B.A., Marquette University M.S., D.B.A., Southern New Hampshire University	2006
Leslie Campbell	Assistant professor of organizational leadership	B.A., Assumption College M.B.A., Rivier University Ph.D., Franklin Pierce University	2017
Tom S. Chan	Professor of information technology	B.S., M.S., University of Southern California M.A., Hsi Lai University M.B.A., Pepperdine University Ed.D., Texas Tech University	2000
Tej S. Dhakar	Professor of management science	B.S., Indian Institute of Technology M.B.A., University of Delhi Ph.D., University of Alabama	1995
David L. Doyon	Assistant professor of accounting	B.S., University of Southern Maine M.B.A., Southern New Hampshire University	2001
Aysun Ficici	Professor of international business	B.A., University of Massachusetts at Lowell M.A., Harvard University M.B.A., New Hampshire College M.S., M.B.E., Southern New Hampshire University D.B.A., Southern New Hampshire University	2007
Steven Gallaher	Associate professor of finance and economics	B.S., M.B.A., Ph.D., University of Texas at Austin	2008
Megan Gassman	Assistant professor of business	B.S., M.S., Ph.D., Southern New Hampshire University	2017
Lisa Gerrish	Assistant professor of accounting	B.S., University of Massachusetts, Amherst M.B.A., Rollins College	2013

Campus Programs

Jeremy Glines	Instructor of accountancy and taxation	B.S., University of New Hampshire M.S., Southern New Hampshire University	2016
Mahboubul Hassan	Professor of finance and economics	B.A., M.A., M.B.A., University of Dhaka M.A.P.E., Boston University D.B.A., Nova Southeastern University	1985
Mark Hecox	Professor of sport management	B.S., M.B.A., University of Miami D.B.A., Southern New Hampshire University	2004
Elizabeth Henley	Associate professor of information technology	B.A., M.A., Southern New Hampshire University Ed.D., Walden University	2014
Denis Hill	Lecturer in degree-in-three program	B.S., Wayland Baptist University M.S., Southern New Hampshire University	2017
Kostas Karadakis	Associate professor of sport management	B.S., University of Ottawa M.B.A., Liverpool John Moores University Ph.D., University of Florida	2012
Sophia Koustas	Assistant professor of organizational leadership	B.A., University of New Hampshire M.S., Southern New Hampshire University Ph.D. Northcentral University	2016
Lundy Lewis	Professor of information technology	B.A., B.S., University of South Carolina M.S., Rensselaer Polytechnic Institute Ph.D., University of Georgia	2003
Bo Liu	Lecturer of finance and economics	LL.B., Peking University M.S., Southern New Hampshire University M.A., Georgia State University	2017
Susan N. Losapio	Professor of organizational leadership	B.S., Plymouth State College M.S., Antioch University New England Ph.D., Walden University	2003
Lowell C. Matthews	Associate professor of organizational leadership	B.S., University of Delaware M.B.A., Roosevelt University D.B.A., Argosy University	2012
Kimberly Monk	Professor of hospitality business	B.S., Florida International University M.B.A., New Hampshire College C.A.G.S., Plymouth State College, Ed.D., Argosy University CHE	1999
Daniel Murphy	Assistant professor of accountancy and taxation	B.S., Boston College M.B.A., Southern New Hampshire University	2016
Karina H. Pasternak	Instructor of culinary arts	A.A.S., B.A.S., Southern New Hampshire University	2011
Kishore Pochampally	Professor of management science	B.E., National Institute of Technology M.S., Ph.D., Northeastern University	2006
Jonathan Posner	Assistant professor of organizational leadership	B.A., Boston University M.B.A., University of Denver J.D., Suffolk University Law School	2014
Greg Randolph	Associate professor of economics	B.A., Grove City College M.A., Ph.D., West Virginia University	2007
Burt C. Reynolds	Professor of organizational leadership	B.S., M.B.A., Golden Gate University Ed. D., Boston University	2008
Stefan Ryll	Associate professor of culinary arts	A.S., Metha Bohnert Culinary Academy, Germany B.A.S., M.S., Southern New Hampshire University C.E.C.	2008
Leila Samii	Assistant professor of marketing	B.A., M.S., Ph.D., Southern New Hampshire University	2016

Campus Programs

Elizabeth Sheehan	Professor of sport management	B.A., Mount Saint Mary's College M.S., Ph.D., University of Massachusetts, Amherst	2005

Name	Title	Credential(s)	Year
Joshua Becker	Information Literacy and Assessment Librarian, Associate professor	B.A., University of Massachusetts, Amherst M.A., University Illinois, Urbana M.A.T., Boston University	2015
Heather Blicher	E-learning librarian and assistant professor	B.A., Virginia Wesleyan College MLIS, Florida State University	2018
Shana Chartier	Reference and instructional librarian, Assistant professor	B.A., University of New Hampshire M.S., Simmons College	2016
Christopher Cooper	Digital Initiatives librarian, Associate professor	B.A., Bates College M.A., University of Massachusetts, Amherst M.S.L.I.S., Syracuse University	2005
Jefferson Harbin	Access Services librarian and instructor	B.A., Milligan College M.S., The Catholic University of America	2014
Karin Heffernan	Reference and Instruction Librarian, Associate professor	B.A., Middlebury College M.L.I.S., University of Rhode Island	2015
Anaya Jones	Assistant professor and eLearning Librarian	B.A. Drexel University M.S. Mary Baldwin University	2018
Trisha Prevett	Head of reference librarian and associate professor	B.A., Merrimack College M.L.I.S., University of Rhode Island	2014
Brian Ryckman	E-Learning librarian, Assistant professor	B.A., Western Michigan University M.L.I.S., Wayne State University	2015
Sandhya Srivastava	Electronic resources librarian, Assistant professor	B.A., New York University M.S., SUNY, Stonybrook M.L.I.S., Queens College, NY	2015

History of the University

Southern New Hampshire University is a private, nonprofit institution and was founded in 1932 by Harry Alfred Benjamin "H.A.B." Shapiro as the New Hampshire School of Accounting and Secretarial Science. The school remained relatively small until 1961, when it was incorporated and renamed New Hampshire College of Accounting and Commerce.

In 1963, the state of New Hampshire granted the university its charter, which gave it degree-granting authority. The first associate degrees were awarded that year, and the first bachelor's degrees were conferred three years later. The college became a nonprofit institution under a board of trustees in September 1968, and the name was shortened to New Hampshire College in 1969.

The 1970s were a time of growth and change. The college moved from its downtown Manchester site to the now 300-acre campus on the Merrimack River in 1971. In 1974, the college introduced a Master of Business Administration program, and, in the spring of 1981, the university purchased the former Mount Saint Mary College in Hooksett, which served as the "north campus" for many years. Operations have since been reconsolidated on the main campus.

The college continued to expand academic offerings throughout the 1980s and 1990s. New liberal arts and education majors were added in the early 1990s. The one-of-a-kind 3Year Honors Program in Business Administration was launched in 1997 and has since inspired the Degree in Three programs which makes it possible for those entering the School of Business to graduate in just three years with no evening, weekend or summer courses.

SNHU was an early pioneer in online education, launching its first programs in 1995. The idea of having 24-hour-per-day access to course materials and the use of online bulletin boards for discussion enabled more nontraditional learners to pursue education. The online programs were revamped, starting in 2003, and in 2008, SNHU set out to reach a national audience.

Expansion and program development led to a momentous event in the institution's history in 2001, when New Hampshire College became Southern New Hampshire University (SNHU). Several new degrees were added in the 2000s, including specialized M.B.A. degrees, the M.F.A. in fiction and nonfiction writing, game design and development, Master of Education programs and many more.

In 2012 with support from an EDUCAUSE Next Generational Learning Challenge grant, funded by the Bill & Melinda Gates Foundation, SNHU founded its College for America. CfA is a nonprofit, competency-based program built specifically to work for working adults and their employer, and designed to strengthen the American workforce. It offers self-paced, online degrees based on definable skills and measurable results. SNHU also sought and received approval from the U.S. Department of Education under the direct assessment provision of Title IV to offer federal financial aid to eligible students. The AA in General Studies was the first program in the nation to receive approval from the U.S. Department of Education under the direct assessment provision of Title IV to offer federal financial aid to eligible students. The AA in General Studies was the first program in the nation to receive approval under the direct assessment provision.

Named the Most Innovative University in the North since 2014 by U.S. News and World Report, SNHU continues to expand the boundaries of higher education to serve students for whom a college degree often seems out of reach. Since 2012, SNHU has been working in Rwanda to help deliver online, competency-based, U.S.-accredited degrees to Rwandan students and refugees. In 2017, SNHU received a \$20 million grant from a group of anonymous donors to expand its work with refugees and now has a presence in four other locations including South Africa, Kenya, Malawi, and Lebanon. In addition, SNHU was named a partner in the XQ Institute "Super School" prize with RISE and Da Vinci Schools to deliver high quality education and support to homeless and foster youth in Los Angeles, and in 2018 SNHU announced an initiative to provide full scholarships to 1,000 DREAMers in the U.S.

Since 2003, SNHU has grown from 2,500 students to more than 135,000 learners. SNHU serves students in all 50 states and in 137 countries around the world and has a global network of more than 100,000 alumni. SNHU is now the largest nonprofit provider of higher education in the country and was listed by Fast Company as the 12th most innovative organization in the world in 2012. SNHU continues to expand access to education by continuously investigating new pathways to make education more affordable and accessible to those who have faced persistent barriers to higher education.

Financial Aid Eligibility and Enrollment Criteria

Financial Aid Eligibility and Enrollment Criteria

As mandated by the U.S. Department of Education, only courses that are required for completion of a student's program may be included when determining a student's enrollment status for financial aid purposes. In addition, federal student aid regulations permit only one retake of a previously-passed course when determining a student's enrollment status for financial aid purposes.

If you register for a course that does not apply toward your current degree program (i.e. a course that falls into the 'other' category on your program evaluation), the credits associated with it may compromise your ability to receive financial aid, Veteran Affairs (VA) benefits or Tuition Assistance (TA) benefits.

If you are enrolled in less than the average estimates below, then your aid will be adjusted accordingly (including possible cancellation). Non-credit classes are not eligible for financial aid. It is your responsibility to notify Student Financial Services of any change to your enrollment status.

Financial aid is initially awarded based on the following average enrollments:

Online (COCE) Undergraduate Students	Half time per trimester
College for America (CfA) Undergraduate Students (6 month term)	Full time per term
College for America (CfA) Undergraduate Students (16 week trimester)	Half time per trimester
University College (UC) Undergraduate Students	Full time per semester
Advantage Undergraduate Students	Full time per term
Online (COCE) Graduate Students	Half time per term
University College (UC) +1 and School of Business Graduate Students	Full time per trimester
University College (UC) Master of Fine Arts (MFA) Students	Full time per term
University College (UC) M.ED Graduate Students	Half time per semester
University College (UC) ED.D Graduate Students	Full time per term
Other University College (UC) Graduate Students	Full time per trimester

**If your program type is not listed, please contact your advisor for enrollment status criteria*

Campus Programs

College of Engineering, Technology & Aeronautics

Dean: Yan Xiang, PhD
CETA Annex
603.626.9468
fax: 603.626.9020

CETA prepares students to succeed in today's innovative organizations.

The College of Engineering, Technology, and Aeronautics (CETA) provides an environment for students to learn, discover, and explore their disciplines and then apply what they have learned. The hands-on curriculum prepares students for solving complex problems, working in teams, and communicating with various audiences. We expect our graduates to shape not only their own futures but the future of global communities.

Our vitality and strength come from a faculty who have joined us from all over the world to share a wealth of theoretical knowledge, industry experience, and a deep commitment to student success. Faculty are dedicated to teaching and curricular innovation, as well as engaged in research, scholarship, and industry relationships that benefit the students.

CETA offers undergraduate degrees in electrical engineering, mechanical engineering, aeronautical engineering, and electrical and computer engineering; computer science and information technologies; construction management; aviation management, air traffic management, and aviation operations and management. CETA's aviation operations and management program provides students an opportunity to earn their pilot's license and build a career in commercial flight. CETA students can also gain UAS remote pilot certification to fly drones through a program that prepares them for the FAA's Part 107 exam.

Aviation. SNHU offers a range of aviation-related programs, preparing students to become professionals in the aviation business, air traffic control, airport operations, and airspace management, and to become professional pilots. Students learn skills in communications, quantitative reasoning, critical thinking, and industry best practices and gain a solid foundation of knowledge of the aviation field, including hands-on learning in our tower and radar simulators. *SNHU is a partner school in the Federal Aviation Administration's Air Traffic Collegiate Training Initiative (AT-CTI), which provides air traffic management graduates who meet minimum academic, physical, citizenship, security, and other pre-employment requirements favorable consideration when applying for entry-level air traffic control specialist positions.*

Computer Science. Our programs meet the high demand for graduates with technical abilities, business expertise, and practical skills to help any organization leverage new technologies to innovate practices, products, and processes. The Computer Science program is designed around the concept of active learning, using real-world projects to apply basic concepts and theories in computer science. In parallel with traditional computer science and mathematics courses, students begin programming in the very first day of class and finish their first year implementing a major team-based software development project. The Information Technologies program provides students the fundamental information technologies, systems, data management methods, and computational thinking strategies necessary to support organizational decision-making and recommend effective system design and maintenance solutions. Informed by the Association for Computing Machinery (ACM) framework for Computer Science and Information Technologies baccalaureate degree programs, these degrees will prepare students for current IT work and provide the skills and dispositions to ready themselves and their organizations for the rapid evolution of future technologies.

Construction Management. Students learn not only the mathematics, science, and technical disciplines in the construction profession but also study the legal, business, and project management principles necessary for success in the construction industry and related fields. This CETA major provides opportunities for hands-on assignments and projects, so that students can apply their knowledge. Our graduates are well-prepared for careers in supervising construction projects, estimating and cost control, scheduling, and project management.

Engineering. Our ABET-accredited engineering programs provide robust technical content combined with skills training in teamwork, innovative design projects, ethics, and professional reporting and presentations. The curriculum was founded on the CDIO (Conceive, Design, Implement, Operate) philosophy, so students engage in hands-on learning to practice and solve design and development problems. Freshmen students begin coursework right away in the first of a design course series during which they learn all aspects of developing problem statements, conceptualizing solutions, creating detailed designs, fabricating, testing, and integrating their project deliverable, and documenting project steps. Students also have the opportunity to gain in-depth knowledge in multiple concentrations, such as robotics, unmanned aerial systems, materials science, and telecommunications.

Vision

We Learn for Tomorrow

Mission

Our learners will leave the School of Arts and Sciences ready to face a continually changing world to the benefit of their communities, as well as to that of their personal success both in leading creative, generous, and purposeful lives, and in undertaking meaningful work. To this end, we pursue activities that expand and enhance student learning through inquiry, curiosity, creativity, connection, and application. Likewise, we prioritize developmental opportunities that concertedly deepen faculty expertise about learning and pedagogy. Through this work, we aspire to attain a regional reputation for our faculty's expertise in inclusive, campus-based learning, which will ensure that our school, our faculty, and the liberal arts and sciences will continue to thrive while also maintaining alignment with and underpinning the University College and SNHU mission.

School of Arts and Sciences

By connecting the humanities, sciences, fine arts, mathematics, and technology, students engage creative energies and develop problem-solving capacities. Each major requires an additional nine credits, or three courses, in the arts and sciences to be taken outside the disciplinary fields of the major. These are noted as "required SAS courses" for each major. Thus, Arts and Sciences majors are able to explore the relevant disciplines in depth as well as broader implications to prepare students for any number of career choices.

We hope to pique your curiosity and creativity in classes, in projects, through research, and through the many other activities connected with the School of Arts and Sciences. We look forward to helping provide you with a broad and rewarding educational experience at Southern New Hampshire University that prepares you for an enriched life and a successful career.

• Communications & Media Arts

The Department of Communication, Media Arts and Technology offers several majors, including Communication, Graphic Design and Media Arts, Game Art and Development, and Game Programming and Development. All majors emphasize the development of critical-thinking skills necessary for analyzing problems, creating solutions, and making responsible decisions in a professional context. Students are encouraged to participate in project-based learning, experiential learning opportunities, including internships, where many of our students receive hands-on training with real-world clients. The majors all combine theory and practical skills with a thorough grounding in the liberal arts.

• English

The English Department offers two majors, one in English Language and Literature and the other in Creative Writing. Students will find courses offered by the department listed under ENG and LIT.

Course offerings include topical thematic studies (such as Pop Fiction, War Literature, and Crime Fiction), in-depth examinations of major periods and authors, and more specialized upper-level courses such as Literary Theory, Gender and Text, and the Black Literary Tradition. The creative writing major provides students with extensive opportunities to develop and hone writing skills in a variety of genre, even as they engage in general study of literature.

• Humanities

The Humanities Department encompasses art history, music, philosophy, and history, along with the relationship between these disciplines and the humanistic legacy. Courses in the arts and humanities help students develop their powers of reasoning, speaking, writing, and creativity, thus equipping them for the challenges of contemporary life. Ultimately, work in the arts and humanities instills in students a lifelong thirst for learning and capacity for aesthetic growth. Students with a particular interest in Philosophy may declare a minor that underwrites them as deep, logical, and exacting thinkers when paired with any major.

The Humanities Department offers the History Major at Southern New Hampshire University, which is designed to be both comprehensive and flexible when compared to undergraduate programs throughout the country. Students receive a broad

Campus Programs

foundation in United States history and Western Civilization, and they may choose a general course based in United States, European, or world studies, or may organize their degree around a specific theme such as religion, African-American, political, social, intellectual, or economic topics to name a few. All history majors complete required courses in historical methods and a senior colloquium where they write a senior thesis. In addition, the student may pursue a secondary interest in more depth since the major allows for 21 credits in electives.

- **Institute for Language Education/ Intensive English Program**

By declaring a minor in World Languages and Culture, students have the potential to expand career opportunities both in the US and abroad. The minor also enhances participation in study abroad programs and provides students with a deeper understanding of diverse cultures while preparing them for an ever-changing and increasingly interconnected world.

- **Justice Studies**

Southern New Hampshire University's Bachelor of Science in Justice Studies presents a systematic vision of the justice system and exposes its majors to the panoply of careers, theories and applications, agencies and institutions that comprise American justice. The B.S. in Justice Studies consists of a core and a series of tracks which allows students to tailor the program toward their career goals. The core lays out the essential knowledge base for Justice Studies majors and reviews the fundamentals of legal and social science research, provides overview courses on the system at large, and instructs on criminal law and correctional systems. The B.S. in Justice Studies emphasizes the full range of justice functions, from policing to corrections, from law to private sector justice. The B.S. in Justice Studies delivers the "professional" perspective in the educational environment, preparing students for future careers in the justice sector.

- **Mathematics**

Employers seek college graduates with quantitative, analytical and problem-solving skills. The SNHU Mathematics Department offers a Mathematics Major for students interested in pursuing careers in quantitative fields such as finance, economics, computer programming, or statistics, or pursuing graduate studies in mathematics or other quantitative fields. Under the major, students may choose a concentration in either pure mathematics or mathematical modeling. There is also a Middle School Mathematics Education Major for students interested in earning certification to teach mathematics in grades five through eight. For students majoring in fields other than mathematics, Arts & Sciences also offers minors in Applied Mathematics, Mathematical Modeling, Mathematics, Middle School Mathematics Education and Statistical Modeling. These minors often complement or supplement learning in particular majors, such as finance or biology, allowing students deeper learning of concepts, perspectives and applied approaches that strengthen their abilities in their primary field.

- **MS-Teaching English as a Foreign Language**

The MS TEFL degree at SNHU blends instructional theory with practical skills development in a hands-on learning approach to teaching English. Methodologies for all types of teaching situations are integrated into the curriculum, as well as strategies for teaching ESL and EFL to learners of all ages. While studying in the program, students have the opportunity to observe and teach some classes in the year-round Intensive English Program offered by the university's Institute for Language Education as well as in the surrounding Manchester area.

- **Psychology**

The Psychology program at SNHU stands out from those at other four-year institutions of higher education in that we put students in a position to start engaging in professional activities while they learn. Students are encouraged to participate in field experiences at mental health clinics and social service agencies, publish in psychological journals and books, present professional papers, administer psychological tests, simulate therapy sessions and/or lead student organizations. Our program includes faculty who have won state and university teaching awards, written books, and published articles in peer-reviewed journals.

We offer specific concentration areas including child/adolescent development, forensic psychology and mental health. Students also enjoy a variety of extracurricular opportunities. We have a Psychology Student Association and an honors association, Psi Chi. Alumni have attended graduate school or worked directly after graduation in such areas such as mental health clinics, social service agencies, management positions, and human resources.

- **Science**

Science has brought far reaching changes in virtually every aspect of our lives, from how we go about living to how we understand the universe in which we live. A citizenship with a fundamental knowledge and appreciation of science will make the correct decisions when confronting the problems of the future. Consequently, the SNHU Science Department offers the following in an effort to produce such a citizenry: Majors in Biology and in Environmental Science, which has different concentrations to accommodate a diversity of student interests. There are also four minors: a minor in Environmental Studies to accommodate all students who wish to add an important dimension to their major, a minor in Biology for those students with an interest in the life sciences, a minor in Nutrition, and a minor in Public Health and Wellness for those students who want a competitive edge in the job market. Students will also find a variety of elective general education science courses for those wishing to pursue a particular interest or to expand one's science foundation.

- **Social Sciences**

The Social Science Department is home to two majors: Sociology and Law and Politics. The department and majors are interdisciplinary; while each stand alone, they share many courses including the capstone course that all seniors take.

Campus Programs

The department's focus is on experiential learning, including service, internships, and learning projects. Diversity, globalization, and sustainability are timely and practical themes across each major.

Students in these majors can look forward to careers in public policy and service, as teachers, in law and sustainable community development across a host of positions in the public and private sectors.

Master of Fine Arts (MFA)

Mountainview Low-Residency MFA in Fiction and Nonfiction

A two-year, low-residency writing program in fiction and nonfiction, the Mountainview MFA is a highly individualized course of graduate study leading to a terminal degree of 60 credits. With faculty and students working together in a non-hierarchical atmosphere, the program aims to help students produce beautiful and meaningful work.

Our Two-Year Program

Our two-year program includes mentored courses that allow you to write from home and participate in a supportive writing community, both online and during twice-yearly residency programs. Our week long summer and winter residencies take place at the Mountain View Grand Resort in Whitefield, NH. Students study with mentoring faculty, attend lectures, readings and classes with nationally known visiting writers, hone their work, read publicly and meet with agents and editors.

During the two years, students work on their creative thesis, a book-length manuscript of publishable quality. They turn in monthly submissions to their mentors and receive feedback in the form of thorough, detailed editorial letters, marginalia and phone calls.

Each residency, students meet with their individual faculty mentors to develop reading lists and writing plans for the coming semester. Students read approximately two books a month, focusing their attention on craft analysis. Every part of the curriculum is designed to help the writer build his/her skills and better understand the writing craft.

Students complete two winter and two summer residencies, four five-month correspondence semesters, and one brief graduation residency. During the first two semesters, students often experiment with different projects and are assigned brief analytical essays on craft from an individualized reading list. During the third semester, students work to complete a draft of their creative thesis manuscript, and write a roughly 15-page close-reading essay on one particular work. During the fourth semester, students usually concentrate on revision of the creative thesis.

Application Guidelines

Applications for the Mountainview MFA program will be reviewed on a rolling basis. Because we accept only 15 -17 new students per residency, we encourage candidates to apply early. Depending upon availability, we may consider candidates after an application deadline.

How to apply:

1. Submit the [Mountainview MFA Application Form](#) with the \$40 application fee.
2. Submit an official transcript from the college or university that conferred your bachelor's degree.
3. Submit an 800-1000 word personal statement describing your writing experience and the nature of your commitment to writing. Please include your assessment of why you are a good candidate for the program. We are always interested in learning about a candidate's academic, personal and professional experiences.
4. Submit a 20- to 30-page, double-spaced writing sample, using 12 pt. font, in fiction or nonfiction. Your writing sample may consist of a novel excerpt, a story, or multiple stories, if fiction, or a memoir excerpt, a creative essay, or multiple creative essays, if nonfiction.
5. Submit two letters of recommendation from people capable of assessing your ability to work independently and your preparation to succeed in an MFA program.

Submit documents to:

Mission

The school develops and implements high-quality, innovative, leading-edge, competency-based business curricula that meet the changing needs of students, business, government and society. Our faculty brings both theoretical and practical knowledge into the learning environment, engages in scholarly activities and provides service to the community.

The school values its students, faculty and staff by establishing and maintaining a supportive environment that enables creativity, innovation, open communication and mutual respect. The school recognizes that its student populations are diverse and have a wide range of education needs, requiring that it use different delivery mechanisms and locations and that the faculty is responsible for the academic quality, integrity and consistency of all School of Business offerings.

Research Paper Citation Guidelines

The School of Business recognizes the American Psychological Association (APA) citation guidelines as the standard to be used in all business courses.

Core Values, Vision, and Mission

Our Core Values

Integrity.

Maintain honest practices, steadfast partnerships, ethical leadership, & a focus on teaching how to act with sound moral character.

Transformative learning.

Provide opportunities to grow through traditional & non-traditional experiences (and even to see failure as a road to learning).

Experimentation.

Design and deliver programs to quickly adapt to the latest industry practices.

Collaboration.

Actively seek diverse perspectives & share information for the purpose of inclusivity, continuous learning, & process improvement.

Our Vision

Provide students with high quality, transformative learning experiences that enable them to succeed.

Our Mission

Why does the School of Business exist?

- *The School of Business transforms the lives of students.*
- *Our success is defined by our students' success.*

How does the School of Business transform lives?

Campus Programs

- *We provide real-world, integrated, & experiential learning opportunities while mentoring students.*

What does the School of Business accomplish?

- *We develop lasting relationships while nurturing life-long learners.*
- *We foster critical-thinking, resilience, and ethical decision making.*

School of Education

Undergraduate Mission

The School of Education is committed to creating a better tomorrow by preparing students and supporting professional educators today to be knowledgeable, reflective leaders, responsive to the needs of a diverse society.

The School of Education's mission is supported by its conceptual frameworks:

Theory into Practice: The School of Education is committed to preparing students who turn theory into practice through application of learned strategies and innovative technologies. We recognize the complex dynamics of the human experience and will strive to be sensitive and responsive to the social, emotional, physical, and intellectual needs of those we serve.

Reflective Practitioners: The School of Education is committed to developing reflective practitioners who are self-aware, intellectually curious, and dedicated to the improvement of practice through continuous professional growth. We aspire to model respect for diversity, critical thinking, and service to community.

Leadership and Professionalism: The School of Education is committed to developing leadership and professionalism. We serve the community and promote innovative advocacy through collaboration and a shared vision of success.

School of Education graduates possess the breadth and depth of academic knowledge and the dedication to excellence that they need in order to meet the changing needs of children, families, community, students, schools, and educational policy. Our programs provide a foundation for a rewarding career and a lifelong commitment to learning.

Together, the school's students, faculty and staff share a passion for teaching and learning. In partnership with local schools and communities, and in collaboration with colleagues from across the university, we are committed to supporting children and their families. This emphasis on interdisciplinary collaboration and meaningful engagement with local schools and community partners provides rich opportunities for our students on their journey toward becoming professional educators.

Our education faculty believes that successful educators draw on strong values and principles in professional practice, change, and growth. To help each student define a personal philosophy of education, our programs provide theoretical, practical, and research-based foundations along with the opportunity for personal reflection.

The School of Education is committed to developing in its students a depth of academic knowledge that weaves theory into practice. Through a collegial culture of teaching and learning, faculty, staff, and students work collaboratively in the study of content that enables inquiry, critical thinking, and problem solving.

Education students at SNHU choose from one of the following programs. All certification programs meet the requirements for New Hampshire teaching certification.

Student Teaching

Student teaching provides a valuable learning experience for the pre-service teacher through an internship under the

Campus Programs

direct supervision of certified mentors. During two full semesters of student teaching, the student teacher has multiple opportunities to assume the role of the teacher and participate in all facets of teaching. All degrees leading to initial teacher certification culminate in this two full semesters of student teaching. Students apply to the student teaching program one year prior to beginning their placement, generally during their junior year. In this application process, students are again evaluated to confirm that they have maintained the requirements of the Teacher Certification Program and that they have completed all fieldwork and course requirements. Students must pass the PRAXIS II in their subject area prior to being considered for a student teaching placement. Additional testing may be required for specific certification areas.

Graduate Mission

The School of Education is committed to creating a better tomorrow by preparing students and supporting professional educators today to be knowledgeable, reflective leaders, responsive to the needs of a diverse society.

The School of Education's mission is supported by its conceptual frameworks:

Theory into Practice: The School of Education is committed to preparing students who turn theory into practice through application of learned strategies and innovative technologies. We recognize the complex dynamics of the human experience and will strive to be sensitive and responsive to the social, emotional, physical, and intellectual needs of those we serve.

Reflective Practitioners: The School of Education is committed to developing reflective practitioners who are self-aware, intellectually curious, and dedicated to the improvement of practice through continuous professional growth. We aspire to model respect for diversity, critical thinking, and service to community.

Leadership and Professionalism: The School of Education is committed to developing leadership and professionalism. We serve the community and promote innovative advocacy through collaboration and a shared vision of success.

School of Education graduates possess the breadth and depth of academic knowledge and the dedication to excellence necessary to meet the changing needs of children, families, community, students, schools, and educational policy. Our programs provide a foundation for a rewarding career and a lifelong commitment to learning.

Together, the school's students, faculty and staff share a passion for teaching and learning. In partnership with local schools and communities, and in collaboration with colleagues from across the university, we are committed to supporting children and their families. This emphasis on interdisciplinary collaboration and meaningful engagement with local schools and community partners provides rich opportunities for our students on their journey toward becoming professional educators.

Our education faculty believes that successful educators draw on strong values and principles in professional practice, change and growth. To help each student define a personal philosophy of education, our programs provide theoretical, practical, and research-based foundations along with the opportunity for personal reflection.

School of Education Graduate Programs

Graduate programs in the School of Education at Southern New Hampshire University have expanded to meet the diverse challenges of preparing educators for 21st century classrooms with a commitment to provide cradle to career educational opportunities.

The programs provide opportunities for professional growth necessary for teachers, future teachers and educational administrators in today's society. It is our aim to have graduates possess the habits of mind and character that will make them role models and mentors for their students and their profession. We expect our graduates to demonstrate a commitment to excellence by raising standards and by improving practices in educational institutions and environments.

Requirements for NH Teacher Certification

Teacher Certification Program

Campus Programs

The quality of elementary and secondary schools depends on the character and caliber of our teachers, therefore the State of New Hampshire has set requirements for teacher certification. SNHU has designed the Teacher Certification Program (TCP) to ensure that its graduates meet the academic, professional, and personal standards that the state has set for teacher certification. Students usually apply to the Teacher Certification Program in the first semester of their sophomore year, or for transfer students their first semester. Applicants will be considered for acceptance to the TCP program based on the following criteria:

- Achievement and maintenance of a cumulative GPA of 3.0
- Passing Praxis Core Academic Skills scores or approved equivalent
- Faculty recommendations

Only School of Education courses with a grade of "C-" or better may be used toward NH teacher certification requirements. Any School of Education courses with a grade lower than a "C-" may be used for graduation credits, but will need to be repeated with an earned grade of "C-" or higher to be applied toward State of New Hampshire teacher certification.

Education Programming Disclosure Information

Professional licensure, certification, endorsement, and salary benefit requirements for educators vary from state to state and district to district. Southern New Hampshire University (SNHU) cannot guarantee licensure, certification, endorsement, or salary benefits. It is the students' responsibility to understand and comply with requirements in the state where they intend to work as an administrator or teacher. Students seeking licensure in states other than New Hampshire are solely responsible for determining whether they are eligible for licensure, and before beginning the program, confirming the precise requirements that must be satisfied to be licensed in that state. Students specifically seeking a New Hampshire certificate must meet all of the requirements, policies, and protocols included in the program approval(s) granted to Southern New Hampshire University by the State Department of Education under the auspices of School of Education and Certification Officer.

In addition to meeting all degree requirements, students seeking certification must meet all testing requirements for their specific certification area as required by the New Hampshire Department of Education. Students will not be recommended for certification until all requirements are met.

SNHU requires a passing score on the Praxis II Elementary Education: Multiple Subjects Exam for students seeking a recommendation for certification in General Special Education, even if the exam is not otherwise required by the NH Department of Education.

Field Experiences

The School of Education believes that the theories and methods discussed in the college classroom are best understood in concert with practical experiences. The New Hampshire Department of Education requires that students participate in relevant and varied field experiences. Therefore, participation in applied learning situations is a required component of many DEV, EDU and SPED courses.

Southern New Hampshire University, School of Education, has a legal and ethical responsibility to ensure that all candidates in our programs which include placements in preK-12 schools pose no threat to children. Therefore, SNHU School of Education educator candidates must meet the State of New Hampshire and SNHU School of Education criminal background and fingerprint requirements pursuant to RSA 189:13-a and the Adam Walsh Act. Compliance with these policies is required to remain a qualified candidate for educator certification.

All students taking courses offered by the School of Education where a Field Experience is required, must submit to a criminal history records check per NH RSA 189:13-a and the Adam Walsh Act as a prerequisite of participation. This process must be initiated through SNHU's School of Education. If you are a currently licensed teacher in New Hampshire, this requirement still applies if you are participating in a field experience outside of the district in which you are employed. ***A "Field Experience" is considered to occur when a candidate is working with children (whether supervised or not) and is required as part of a course.*** Results of the criminal history records check will be reviewed by the Criminal Records Coordinator and shared with the Certification Officer if prior convictions are reported.

Special Programs

Air Force Reserve Officer Training Corps (ROTC)

Students may enroll in Air Force ROTC courses at the University of Massachusetts-Lowell. The Air Force ROTC program is a leadership program that qualifies men and women for a commission as a Second Lieutenant in the United States Air Force. Air Force ROTC is designed to run concurrent with a student's degree curriculum. Students do not enter active duty until after they graduate from college, with a four year undergraduate degree. Although the environment is somewhat fraternal in order to promote military structure and culture, it is not a club or activity. Rather, it is a bona fide academic program, through which scholarships and stipends are available. It is a four-year program but accelerated one-, two-, and three-year programs are available. Details, including information on how to enroll in Air Force ROTC classes, can be

Campus Programs

obtained by calling Air Force ROTC Detachment 345, UMass Lowell, at 978-934-2252 or via email afrotc345@uml.edu. For general Air Force ROTC information, please visit www.afrotc.com.

The Chandler Center for Community Engaged Learning

The Chandler Center envisions a campus where all students are civically engaged and committed to social action. Our mission is to develop a culture of active citizenship by creating leadership and educational experiences for students focused on civic engagement. Student leadership is at the core of the Center's management with students coordinating the majority of the initiatives with guidance from professional staff.

The Center supports curricular engagement through service-learning. Service-Learning is a teaching pedagogy that combines classroom instruction with meaningful service. Service-learning operates on a continuum with many students engaged in weekly and ongoing service while other students spend much of their time working on projects and initiatives for community partners that take place behind the scenes. Service-learning provides opportunities for students to develop critical thinking and personal reflection while encouraging a heightened sense of community, civic engagement, and personal and social responsibility. The Center is available to assist faculty interested in exploring or further developing service-learning curricula. In addition, the Center provides an infrastructure to support the logistics related to student site placement, reporting, transportation and more.

The Center's co-curricular opportunities vary in commitment and scope. They focus on direct service as well as advocacy and awareness. Weekly "one time" service experiences encourage students to identify a community need and do what they can to meet that need. These are designed as stand-alone service projects offered at varying times to reach a large population of students. Longer term opportunities are available through the Community Service Work Study Program, Alternative Breaks, or by taking on a leadership role in the Center. Awareness and advocacy efforts are part of the planning of each of our initiatives, but are also the driving force behind our two annual awareness weeks: Hunger and Homelessness Week and Human Rights Awareness Week. In an effort to meet community needs and pique student interest, our programs and services are continually evolving.

Thanks to the commitment of students, staff and faculty to the Center's mission, Southern New Hampshire University has been named to The President's Higher Education Community Service Honor Roll and awarded the prestigious Carnegie Classification for Community Engagement.

In November 2019 the Center was dedicated to Laurie Chandler, '89MBA who generously established the Chandler Community Engagement Fund. This fund will provide increased opportunities for student involvement in community engagement work for generations

The University Honors Program

The Honors Program at Southern New Hampshire University is a student-centered program dedicated to creating a first-class educational environment for an exceptional group of students. Driven and self-motivated students are offered an atmosphere where academic excellence is expected, where a challenging curriculum fosters independent thinking in the company of like-minded individuals, and where participants are encouraged to be actively involved in their own education.

The Honors Program curriculum, which is a minimum of 25 percent of the student's course work, consists of eleven courses: honors sections taught in a seminar environment with 15 students, Honors modules that add rigor to regular university courses and build toward the senior thesis project, and five Honors-specific program courses. These courses are Honors First Year Seminar, ENG-120H, [HON 201 - Interdisciplinary Studies I](#) and [HON 202 - Interdisciplinary Studies II](#), and [HON 401 - Independent Honors Thesis](#).

The Honors Program curriculum is adaptable to each student's individual needs and passions, and will work with all full-time undergraduate programs offered at Southern New Hampshire University. They are also offered opportunities for trips, leadership positions within the program, conferences, meetings with visiting speakers, special programs, volunteerism, retreats and other enriching activities. The academic achievement of Honors Program students is also documented on their diploma and transcript. The program further encourages a dynamic peer learning environment by maintaining a comfortable Honors Suite and holding regular honors events. Honors students receive a \$2,000 scholarship renewable each year they remain in the program.

Students usually enter the program at the beginning of their freshman year, but transfer students may also be accepted if they have fewer than 60 transfer credits. Current Southern New Hampshire University freshmen and sophomores will similarly be considered for entrance into the next year's class on a space-available basis.

Once accepted into the program, students must maintain a 3.0 GPA in every semester as well as grades of "B" or better in all Honors courses. Students in the Honors Program will be involved in an active community built on the three pillars of the program: service, social, and academic enrichment, which are provided through events and activities organized by the

Campus Programs

Honors Program staff and student run Honors Council. Honors Program students are also actively involved in running their own program. Students in all majors are eligible. For information and instructions on how to apply, contact the Honors Program Director, Dr. Lowell C. Matthews, at 603.626.9100 x2008 or at l.matthews@snhu.edu.

NHCUC (New Hampshire College & University Council) Exchange

NHCUC offers students the opportunity to earn institutional credits at member institutions within Southern New Hampshire. SNHU's full-time undergraduate day students are eligible to participate in a part-time enrollment or full-time enrollment at NHCUC member institutions during the regular academic year (all online courses, summer courses, and continuing education courses are excluded from the exchange agreement). Students involved in the exchange program are subject to the rules, regulations and restrictions in both the home and visited institutions. Students should, therefore, seek the counsel of the exchange representative in the Office of the University Registrar prior to enrolling in such courses. Courses through the exchange agreement are subject to the add/drop regulations of the host institution of those courses.

NHCUC Participating Colleges and Universities:

- Antioch University
- Colby-Sawyer College
- Franklin Pierce University
- Granite State College
- Hellenic American University
- Keene State College
- New England College
- New Hampshire Institute of Art
- Plymouth State University
- Rivier University
- St. Anselm College
- University of NH - Manchester
- UNH Army ROTC

Students who wish to take courses through NHCUC must meet the following requirements:

- Satisfactory discipline, financial, and academic standing (full time enrollment requires a minimum 2.50 GPA; ROTC students must have a minimum 2.00 GPA)
- Permission of both institutions involved in a particular exchange

Courses must be approved in advance by the Office of the University Registrar and are subject to available space. Courses completed at host institutions under the program are recorded on SNHU transcripts and grades are computed into the SNHU GPA.

Student Costs:

Eligible students will pay normal tuition fees to their home campus, any additional fees such as room and board, parking, or lab fees will be paid to the host campus where the "service" is being provided. Students are encouraged to contact their instructors about any additional lab fees at the host campus.

First Year Seminar

First-Year Seminar (FYS-101) is a three-credit course designed to challenge and support first-year students and transfer students carrying twelve (12) or fewer college credits, as they explore positions and values relevant not only to college, but also to informed citizenship in a diverse society. First-Year Seminar is required of all students as part of the General Education Program's Foundation category.

PCC-201 is designed to help students develop an action plan with specific goals towards a post collegiate life. Students will choose from two tracks – either exploration or validation. Through the use of a variety of communication skills students will conduct industry research, attend career and industry events, and create an individualized career plan for the future.

E-Portfolio

Students utilize Chalk and Wire,™ an e-portfolio tool, to develop an electronic document that demonstrates learning and active participation in the college environment.

The portfolio serves a dual purpose: (1) students develop a document that demonstrates skills, knowledge, and experience required by graduate schools and employers, and (2) faculty assess student academic progress with the use of standard criteria.

Campus Programs

SNHU Study Abroad

The mission of the Southern New Hampshire University Study Abroad Program is to enable students to expand their global perspectives, allowing them to become well-rounded, global citizens. SNHU is dedicated to providing students with an academic program of study that will not merely expand their cultural knowledge, but significantly enhance their learning. Our carefully chosen partner institutions offer SNHU students the opportunity to take courses at all levels and in numerous majors-along with options for experiential education, internships or service learning.

Semester-long study abroad programs are open to all UC Undergraduate Day eligible SNHU students on a full time basis, allowing a full semester overseas. For full-time university college students, a semester abroad won't cost any more than a semester in Manchester. The housing overseas may even be less expensive. Summer programs are also available.

All students in the study abroad program are required to be in good academic and social standing. For more information regarding the SNHU Study Abroad Program contact Stefano Parenti, Director of the Study Abroad Program at 603.645.9725, or s.parenti@snhu.edu. Visit the Web page to learn more at <https://www.snhu.edu/-/media/files/pdfs/study-abroad-brochure.pdf>. It is never too soon to start planning study abroad!

Student Handbook

The Student Handbook is a critical document for SNHU students, as it contains many of the institution's policies, expectations, and student rights and responsibilities, as well as important federal compliance information regarding the use of substances. The handbook includes information on the discipline system, expectations, and university conduct policies.

Students may access the handbook by going to my.snhu.edu, or through searching within the university's website www.snhu.edu. All members of the university community are expected to take the necessary time to review the handbook, familiarize themselves with the content, and seek clarification of information that is not clear to them.

Questions regarding a program or policy can be addressed to the Office of Student Affairs by calling 603.645.9608.

Minimum Technical Hardware Requirements

SNHU students are required to bring a laptop computer with an up-to-date operating system and antivirus software to campus. If you do not have a laptop of your own, you can purchase one at a discounted rate through the [Laptop Program](#) partnership with Dell. Students majoring in select academic programs may have additional hardware or software requirements for their laptop. Please visit the Laptop Program page for more information.

To access the SNHU web network, your operating system (OS) must be up to date. Windows users can visit the Windows/Microsoft Update site to ensure that their OS is updated, while Mac users can simply select the Software Update program from the Apple menu.

Policies

About SNHU

Academic Program Improvement

SNHU builds programs and courses based on real-world competencies that are grounded both in the academic canon of knowledge and the expertise of practitioners in the field. Student achievement in relation to these competencies are measured through outcomes at both the program and course level. Based on the data and feedback obtained regarding student achievement of program outcomes, SNHU modifies and improves programs and courses through an ongoing iterative process.

Accreditations, State Authorization and Program Approvals

Regional Accreditation:

New England Commission of Higher Education

Southern New Hampshire University is accredited by the New England Commission of Higher Education (NECHE). All Programs offered by SNHU are encompassed by this regional accreditation.

Inquiries regarding accreditations should be emailed to accreditation@snhu.edu.

Individuals may also contact:

New England Commission of Higher Education

3 Burlington Woods Drive, Suite 100

Burlington, MA 01803-4514

(781) 425-7785

info@neche.org

The New England Commission of Higher Education is the regional accreditation agency for colleges and universities in the six New England states: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. The New England Commission of Higher Education (NECHE) is recognized by the U.S. Secretary of Education as a reliable authority on the quality of education for the institutions it accredits. The Commission is also recognized by the Council for Higher Education Accreditation (CHEA), affirming that its standards and processes are consistent with the quality, improvement, and accountability expectations that CHEA has established. Recognition by the Department of Education provides access to federal financial aid for U.S. students attending institutions accredited by the Commission.

Degree Granting Approval:

[New Hampshire Department of Education, Division of Higher Education - Higher Education Commission](#)

Southern New Hampshire University maintains degree granting approval from the New Hampshire Department of Education, Division of Higher Education - Higher Education Commission.

Programmatic Accreditations:

In addition to the regional accreditation, certain SNHU undergraduate and graduate programs also carry specialized programmatic accreditations.

Accreditation Council for Business Schools and Programs (ACBSP)

Many of the undergraduate and graduate business programs offered by Southern New Hampshire University are accredited by the Accreditation Council for Business Schools and Programs (ACBSP). Business programs that are currently not listed as ACBSP accredited may become accredited upon eligibility. [View a list of our accredited business programs.](#)

Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM)

The B.S. in Health Information Management program is accredited by the [Commission on Accreditation for Health Informatics and Information Management Education](#) (CAHIIM).

Commission on Collegiate Nursing Education (CCNE)

The baccalaureate degree in nursing program and master's degree in nursing program at Southern New Hampshire University are accredited by the [Commission on Collegiate Nursing Education](#), 655 K Street NW, Suite 750, Washington DC 20001, 202-887-6791.

[Council for the Accreditation of Educator Preparation](#) (CAEP)

The Elementary Education program at Southern New Hampshire University has been awarded [CAEP](#) accreditation by the Inquiry Brief Commission of the Council for the Accreditation of Educator Preparation (CAEP). Campus Programs

Measures

Council on Education for Public Health (CEPH)

Southern New Hampshire University is an applicant for accreditation by the Council on Education for Public Health. The accreditation review will address the Master of Public Health and the Master of Public Health with a concentration in Global Health programs. Other degrees and areas of study offered by this institution will not be included in the unit of accreditation review. Additional information can be found on the [CEPH website](#).

Engineering Accreditation Commission of ABET (Accreditation Board for Engineering and Technology)

The baccalaureate degree in Mechanical Engineering and the baccalaureate degree in Aeronautical Engineering offered by Southern New Hampshire University's College of Engineering, Technology and Aeronautics (CETA) are accredited by the [Engineering Accreditation Commission of ABET](#).

New Hampshire State Department of Education for Teacher Certification

Please review the [list of New Hampshire approved collegiate programs of preparation for the education professions](#).

Professional Science Master's

The following SNHU Master's Degree programs have been approved for affiliation as a PSM degree by the PSM National Office: [Cyber Security](#), [Data Analytics](#), [Information Technology](#).

Assessment:

Southern New Hampshire University programs complete a comprehensive review on a 3-5 year schedule. This review includes analysis of program outcomes and involves multiple constituents across the University, including department chairs, executive directors, assessment committees, and academic leadership. The University continually fosters transparency within program and course creation, assessment and evaluation, and alignment of program outcomes. In addition, all Southern New Hampshire University faculty are either academically or professionally qualified to teach, per the institutions credentialing requirements.

State Authorizations:

As an institution that has students residing across the United States, Southern New Hampshire University (SNHU), is required to obtain state approval to operate (state authorization) based on the activities it conducts in a state.

In some states SNHU is exempt from seeking approval to operate as some state regulations allow for institutions that meet specific criteria to apply for an exemption in lieu of approval to operate.

While in other states SNHU has SARA approval to operate. SARA, the State Authorization Reciprocity Agreement, is an agreement among member states, districts and territories that establishes comparable national standards for interstate offering of postsecondary distance education courses and programs. It is intended to make it easier for students to take online courses offered by postsecondary institutions based in another state. SARA is overseen by a National Council and administered by four regional education compacts: <http://nc-sara.org/content/basic-questions-about-sara#what>.

Academic Program Policies

22 Credit Maximum for Students Enrolled in Business Three Year Programs, Degree in Three

Students in a Degree in Three program may take a maximum of 22 credit hours per semester. The student would be charged an overload fee at the 22.5 or above credit hour, in the semester.

Academic Requirements for Sport Management Programs

Students in Sport Management Programs (Majors, Concentrations, and Minors) must earn a minimum of a "C" grade in all required program courses.

Students in the BS in Sport Management must in addition:

- Achieve a minimum cumulative GPA of 2.5
- Complete an internship of at least 300 hours

There is an application process for any University College undergraduate who wished to change their major to a Bachelor of Science in Sport Management.

Campus Programs

Degree in 5

Whenever they consider it advantageous, prior to matriculation or until the completion of 45 program-applicable credit hours, students may opt for the "Degree in Five" program. Under this program, the student plans to take four courses per semester and graduate in five years.

The fifth year at SNHU is offered tuition-free. Students staying on campus need to pay for room and board.

Students electing to enter the program after their first semester need to understand that depending on the way their courses fell, they might drop down to part-time status for their final semester. Students are expected to work closely with their advisors; responsibility for the successful completion of degree requirements belongs to the student.

English as a Second Language Program

The English as a Second Language (ESL) Program, more formally known as the Intensive English Program (IEP), is a full-time program with eighteen hours of language instruction and guidance per week. Upon entry, students are tested and assigned to one of seven levels of instruction. Typically, completion of one level of instruction requires one semester of instruction that is composed of two 7.5 week terms. At the end of each semester, students are given the TOEFL exam, along with other tests, and are evaluated as to their progress and readiness for movement to a higher level of ESL instruction or for undergraduate/graduate coursework. Mandatory individual student-teacher conferences are scheduled at the end of each 7.5 week term. ESL students can earn three credits per semester (with a maximum of six credits), but for graduate students this credit is added onto the degree requirements.

The goal of the IEP is to equip international students with the linguistic, academic, and cultural skills that will enable them to successfully enter and complete academic programs at Southern New Hampshire University or other colleges and universities in the United States. Specially trained and experienced faculty employ a variety of proven instructional methods to meet individual student needs and curricular goals, which include the development of academic skills and language skills (listening, speaking, reading, writing, grammatical accuracy and cultural awareness). Small class size (limited to twelve students) and placement in appropriate levels ensure individualized learning, and computer-assisted instruction provided in a modern language lab complements classroom instruction.

Field trips and access to community resources address students' academic, career, and personal development needs. The faculty believes that the uniqueness of its program lies in the emphasis on close teacher-student relationships and structured interaction with professionals who live and work in the Manchester, N.H. community.

For more specific information on the skills developed within each level, refer to the ESL heading in the course description section of this catalog.

Requirements for Completion

It is difficult to predict how many semesters a student will need to acquire fluency, to meet the English proficiency requirements of Southern New Hampshire University, or to pass the TOEFL exam. Students at the lowest levels must recognize that they may require up to three full semesters or more before undertaking a full-time degree program.

Admissions Procedures

Admission to the ESL Program is open to anyone 17 years of age or older who has completed secondary school and who has already acquired some English proficiency (approximately 350 on the paper-based TOEFL [PBT], 63 on the computer-based TOEFL [CBT], or 20 on the Internet-based TOEFL [IBT]). Applicants must complete an application and international applicants must also give evidence of financial support. New students apply to the ESL Program through the Office of International Admissions; returning students are registered by the ILE Office. Admission to the ESL Program does not constitute admission to a degree program at Southern New Hampshire University.

Transitional Bridge Program

This program consists of ENG 070, ENG 071, ENG 072, ENG 073. This series of four integrated courses prepares international students for the academic tasks required in American university undergraduate coursework.

- Only students who have applied and been accepted conditionally into undergraduate school may enroll in the ENG 070-73 series.
- The ENG 070-73 series, if required, must be taken during the first term of undergraduate school.

For more specific information on the skills developed within each course, refer to the ENG heading in the courses section of this catalog.

Foreign Languages

Currently, four foreign languages, as well as American Sign Language are offered at Southern New Hampshire University: Arabic, French, Mandarin Chinese, and Spanish. For more information on these courses, refer to the course description section of this catalog (Arabic: LAR; French: LFR; Mandarin: LMN; Spanish: LSP).

Individualized Major/Minor Program

1. Students may elect to create an IMP at any time until they complete 60 credit hours.
2. The student identifies an appropriate full-time faculty member who is willing to oversee and help the student throughout the major or minor; this faculty mentor serves as the point person for the student's academic program.

Campus Programs

The mentor also gives the individualized major/minor an academic home in an appropriate Department and School. It is the student's responsibility to ask the faculty member to serve as mentor. Mentors must be approved by their Department Chairs, who will consider availability, appropriateness of background and expertise, and other factors. If no faculty members are willing and able to serve as the mentor, the IMP cannot be approved.

3. Working with the faculty mentor, representatives from the Career Development Center, the Office of the University Registrar, Career Services, alumni in relevant fields, professors from relevant departments, and others, the student develops the curriculum for the individualized major or minor.

4. The student and the faculty mentor submit the curriculum to the faculty member's Department Chair for consideration. The Department Chair weighs the appropriateness and academic rigor of the curriculum and approves only those proposals that meet SHNU academic expectations.

5. If approved by the Chair, the proposal goes to the Dean for further consideration.

6. Finally, the proposal is submitted to the VPAA, who has the ultimate responsibility for ensuring rigor.

7. Once the proposal is fully approved, the student works closely with the faculty mentor throughout the program's duration to ensure that the curriculum is followed and to make any changes that are needed. Students are strongly encouraged to consult frequently with a professional advisor as well. Changes to the curriculum must be approved by the Mentor, Chair, Dean, and VPAA as well.

8. The curriculum for majors must include the full General Education program, and both majors and minors must include courses in an appropriate range of 100- to 400-level offerings.

9. At least two-thirds of the courses must come from UC's existing course catalog. Beyond that minimum, some independent studies can be crafted to fill gaps. The curriculum may include online courses from COCE, and some courses can also come from other institutions if they offer courses that more fully align with the IMP curriculum.

10. The curriculum for Individualized Majors should break down along these guidelines:

- General Education: 45 credit hours.
- Major: 33 to 45 credits.
- Minor: 15 credits. (These can be standard or individualized minors.)
- Free electives: remainder.

11. Individualized Minors must include at least five courses that cohere into a relevant and meaningful curriculum.

12. The development of the curriculum must also include an Information Resource Plan, developed in collaboration with Library faculty.

13. For prospective students, we can encourage participation in the IMP, but we cannot guarantee availability in advance. The support of a faculty mentor and the Chair, Dean, and VPAA is required. If that can be arranged prior to matriculation, the student can arrive with the IMP in place.

14. Students graduating with an individualized major will be noted in University records as having earned an "IMP major in X."

15. Deans will receive frequent updates regarding the students requesting IMPs.

16. Students are encouraged to work with the Study Abroad office to build study-abroad opportunities into their IMPs.

Academic Standards

Academic Honors

President's List and Dean's List

At the close of each reporting term (fall, winter/spring, summer) at Southern New Hampshire University, the registrar's office publishes two lists of students who have achieved standards of academic excellence during the semester's work. As of June 1, 2013, full-time students who have earned a minimum grade-point average of 3.700 and above for the semesters are named to the President's List. Students who have earned a minimum grade-point average of 3.500 to 3.699 for the semesters are named to the Dean's List. Full-time status is achieved by earning 12 credits; undergraduate day students must earn 12 credits in fall or spring semester, and COCE students must earn 12 credits in either EW1 & EW2, EW3 & EW4, or EW5 & EW6.

Alpha Chi Honor Society

Alpha Chi Epsilon Chapter, is the National Honor Society for liberal arts majors at Southern New Hampshire University. Alpha Chi recognizes high scholastic achievement, service, and character. It emphasizes the needs of students by providing opportunities for academic scholarships, for participation in national and regional conferences and for a higher initial grade in civil service jobs. Membership in Alpha Chi is open to liberal arts majors who have completed at least one half of the work required for a baccalaureate degree, who rank in the top 10 percent of their class and who have earned cumulative grade-point-averages of 3.85 or above.

Campus Programs

Alpha Phi Sigma Honor Society (Nu Iota Chapter)

In the spring of 2012 Southern New Hampshire University chartered a chapter of Alpha Phi Sigma, the National Criminal Justice Honor Society. Alpha Phi Sigma was founded in 1942 and since then has grown to more than three-hundred and sixty campuses across the nation. Alpha Phi Sigma is a certified member of the Association of College Honor Societies and affiliated with The Academy of Criminal Justice Sciences. Alpha Phi Sigma's mission is to promote analytical thinking, rigorous scholarship and lifelong learning; to keep abreast of the advances in scientific research; to elevate the ethical standards of the criminal justice professions and to sustain in the public mind the benefit and necessity of education and professional training.

Southern New Hampshire University's Alpha Phi Sigma Nu Iota chapter grants membership to undergraduate students and professionals of sound scholarship and character who support this mission. SNHU students are required to have a cumulative and major GPA of 3.2 or higher in the following degree areas: AS, JST, BS, JST, BS, JST and the following concentrations: PLE, CCR, THS, LLP. University College students are required to participate in one or more face to face activities as part of their membership. Membership is for life. Students honor and promote academic excellence, service, leadership and unity.

Delta Mu Delta Honor Society

Founded in 1913, Delta Mu Delta is an international business honor society that recognizes and encourages academic excellence of undergraduate and graduate students. The Southern New Hampshire University chapter, Gamma Nu, was installed in 1978. Its purpose is to promote and recognize students for their scholastic achievement in business and is the highest international recognition a student can earn.

Membership is extended to business students of good character, who have completed more than half of their program of study, have achieved a cumulative grade-point average of 3.6 and reside in the top 20 percent of their respective class.

Eta Sigma Delta Honor Society

Eta Sigma Delta is an International Hospitality Management Honor Society for institutions granting diplomas, associate and baccalaureate degrees, graduate degrees, or their equivalent in the field of hospitality, tourism and culinary arts education. The purpose of Eta Sigma Delta is to recognize the scholastic and professional achievement of students in the field of hospitality management, tourism and culinary arts. Eta Sigma Delta, stands for excellence, leadership, creativity, service and ethics.

Undergraduate Student Membership

To be eligible for membership an undergraduate student must:

- have a cumulative GPA of at least a 3.0 in a 4.0 system

Graduate Student Membership

To be eligible for membership a graduate student must:

- have a cumulative GPA of at least a 3.5 in a 4.0 system

Each member of Eta Sigma Delta Southern New Hampshire University Chapter must participate in organized community service activities, attend or present at approved academic conferences or workshops.

Chapter members have the option of completing a 6 credit research oriented paper investigation a topic of critical importance to the hospitality, tourism and culinary industry. The paper should follow accepted manuscript style and results of the research should be of quality to be forwarded to a hospitality and tourism publication.

National Society of Collegiate Scholars

The National Society of Collegiate Scholars (NSCS), a member of the Association of College Societies (ACHS), is a not-profit honor society that was established to encourage and recognize academic achievement. The Society was founded on the principles of Scholarship, Leadership and Service.

Membership is offered to first and second year undergraduate students who rank in the top 20% of their class, achieve a cumulative GPA of at least a 3.4, and attend a college/university with an active chapter of NSCS on campus. Membership is for life and is by invitation only.

Order of Omega

Southern New Hampshire University became a member of Order of Omega in May of 2009, in the fiftieth year of this national organization, joining hundreds of other Universities and colleges around the nation. Order of Omega is an honor society exclusively for Greek Letter Organizations, so to become a member of this group one must be actively involved in a fraternity or sorority. The purpose of this organization is to recognize fraternity men and women who have displayed a strong sense of leadership in their Greek activities and have a strong character and academic standing, to encourage them to continue their success and to inspire others to do the same.

Eligibility:

- Junior or Senior Standing must be a full-time undergraduate student.
- Actively participating and in good standing with one of the following organization: Kappa Delta Phi, Kappa Delta Phi, NAS, Phi Delta Beta, Phi Delta Psi, Phi Delta Theta or Phi Omega Psi
- Maintain a cumulative grade point average (GPA) above the all Greek GPA.

Campus Programs

- Membership will be based on character, leadership in the Greek Community as a whole, philanthropy and brother and sister values.

Those who meet the minimum GPA requirement of a 3.0 will be notified via mail and will be sent an application form. Applicants will be judged by faculty and staff who have a connection to the Greek Community, a maximum of fifteen applicants will be chosen a year. Applicants who are accepted into membership must pay an initiation fee which will include the Order of Omega Pin and Certificate.

Phi Theta Kappa Honor Society

Phi Theta Kappa is an international honor society that recognizes and encourages scholarship for two-year associate degree programs. Phi Theta Kappa attains its goals by developing opportunities for leadership, fellowship and service, as well as providing an intellectual climate for continued academic excellence.

Candidates must have completed at least 30 credits with at least 15 completed at SNHU. The student can have any two year AA or AS major and must have GPA of 3.5 or higher.

Pi Lambda Theta

Founded in 1910, Pi Lambda Theta (PLT) is the most selective honor society for educators. Pi Lambda Theta recognizes the academic achievement and outstanding disposition of graduating education students. The accomplishments of exemplary education students are honored through this induction. Candidates' development of knowledge, skills, professionalism, and leadership are promoted and supported through their membership in Pi Lambda Theta, a member of Phi Delta Kappa International.

At SNHU, there is a direct honors program where PLT extends membership to graduating students who have been identified by School of Education faculty as having satisfied the eligibility requirements. Graduate students must have achieved a GPA of 3.9 or above; undergraduate students must have earned a 3.5 or above. All candidates must have demonstrated exceptional disposition through their education program.

Psi Chi Honor Society

Psi Chi is the International Honor Society in Psychology, founded in 1929. The purpose of Psi Chi is to encourage, stimulate and maintain excellence in scholarship and advance the science of psychology. Membership is open only to undergraduate students who are making the study of psychology a major interest. Psi Chi is a member of the Association of College Honor Societies (ACHS) and is an affiliate of the American Psychological Association (APA) and the American Psychological Society (APS).

All undergraduate psychology majors/minors must:

- be enrolled as a major or minor in a psychology program or a program of psychological nature;
- have completed a total of 45 earned credits (including institutional and transfer);
- have completed at least 9 credits in psychology courses (including institutional and transfer);
- have a minimum cum GPA of 3.2;
- have a minimum 3.2 GPA average for psychology courses.

Sigma Tau Delta Honor Society

Sigma Tau Delta is the International English Honor Society. SNHU established its own chapter, Alpha Pi Psi, in the fall of 2008 for the University College and Alpha Phi Beta, in the spring of 2015 for the College of Online and Continuing Education. The Honor Society provides eligible English Language and Literature and Creative Writing majors and minors with opportunities to attend and present at conferences, publish undergraduate work, participate in field trips, and gain valuable networking opportunities.

Undergraduate inductees have completed at least three semesters at SNHU, have completed more than two (2) literature courses beyond the General Education requirements, and have maintained a minimum 3.3 GPA. Graduate inductees have completed at least six (6) semester hours at SNHU and have maintained a minimum 3.3 GPA.

NBEA Award of Merit

The National Business Education Association Award of Merit is presented to the outstanding graduating senior in business/marketing teacher education. This award is presented at the discretion of the business education program faculty.

Academic Renewal

Undergraduate Level

After an absence of at least one year, an undergraduate student who has been academically unsuccessful in the past may change programs and apply for academic renewal. This will remove the negative impact to their cumulative GPA for grades lower than "C". Additionally the student is required to complete a minimum of 30 credits at Southern New Hampshire University after renewal is granted.

Graduate Level

After changing to another graduate program and successfully completing the first 9 credit hours with a grade of "B-" or above in each course, a graduate student who has been academically unsuccessful in the past may apply for academic renewal. This will remove the negative impact to their cumulative GPA for grades lower than "B-".

Academic Renewal at either the undergraduate or graduate level:

Campus Programs

- will only be granted once per academic level at the undergraduate and/or graduate level at SNHU
- cannot be reversed
- must be approved by the Scholastic Standing Committee
- will impact transcripts, cumulative GPA, and credit toward graduation:
 - undergraduate courses with a final grade below "C" and graduate courses with a final grade below "B-" will have an "R" precede the original grade (for example, an "RC-" will replace a final grade of "C-", "RF" will replace a final grade of "F", etc.). A new grade-point average will be calculated as academic renewal grades are applied;
 - courses so designated will:
 - appear on the transcript in the new format
 - be eliminated from the student's cumulative GPA
 - not earn credit toward graduation
 - undergraduate courses with a final grade of "C" or better and graduate courses with a final grade of "B-" or better will:
 - courses will continue to:
 - appear on the transcript
 - be included in the student's cumulative GPA
 - earn credit toward graduation
- does not apply to courses that were part of a previously conferred degree or certificate
- applies to every program affected by the renewal; the student is no longer eligible to return to the program(s) for which academic renewal was granted:
 - Change in concentration is not considered a program change for academic renewal purposes.
 - Academic renewal does not nullify policies restricting the age of coursework or time limits on program completion

NOTE: Academic Renewal may have a negative impact on the calculations utilized by financial aid to determine Satisfactory Academic Progress for Title IV purposes.

Amendment of Degree Requirements

The courses required for a specific degree are outlined in the university catalog. Any change in program course requirements must be approved by the student's program coordinator/department chair and school/associate dean. A completed and approved [Petition to Amend Degree Requirements](#) form must be received by the Office of the University Registrar before the change will become effective.

Ceremonial and Latin Honors

Academic Honors, Associate and Baccalaureate Degrees

The university acknowledges outstanding academic performance through Ceremonial Honors and Latin Honors. Ceremonial Honors serve as a way of recognizing students' outstanding academic performance during commencement ceremonies for those students who either do not qualify for Latin Honors at the time of commencement or who do not have enough institutional credits to be eligible for Latin Honors upon degree completion. Ceremonial Honors are not recorded on the student's permanent record, transcript or diploma whereas Latin Honors are. Ceremonial and Latin Honors apply only to undergraduate degree recipients.

Students who meet the criteria for either Ceremonial Honors or Latin Honors are recognized as honors recipients as they cross the stage at commencement. They receive honors regalia indicating their achievement. For commencement purposes, honors are assessed as of the first business day after March 15th and are based on GPA and institutional credits completed at that time. Students who are still completing course work as of the first business day after March 15th are eligible for Ceremonial Honors but not Latin Honors. Latin Honors are assessed and awarded only upon completion of all course work for the degree. During commencement students are recognized for either Ceremonial or Latin Honors, not both.

This policy applies only to Associates and Bachelors degrees completed through non-direct assessment programs.

See criteria for Ceremonial and Latin Honors below.

Criteria for Ceremonial Honors

Minimum Institutional Credits Completed	Cumulative GPA	Associate Degree	Baccalaureate Degree
Associate's = 15 Bachelor's = 30	3.500 - 3.699	Honors	Cum Laude
Associate's = 15 Bachelor's = 30	3.700 - 3.849	High Honors	Magna Cum Laude
Associate's = 15 Bachelor's = 30	3.850 - 4.000	Highest Honors	Summa Cum Laude

Criteria for Latin Honors

Campus Programs

Minimum Institutional Credits Completed	Cumulative GPA	Associate Degree	Baccalaureate Degree
Associate's = 30 Bachelor's = 60	3.500 - 3.699	Honors	Cum Laude
Associate's = 30 Bachelor's = 60	3.700 - 3.849	High Honors	Magna Cum Laude
Associate's = 30 Bachelor's = 60	3.850 - 4.000	Highest Honors	Summa Cum Laude

Credit Hour Definition

SNHU has adopted the US Department of Education and the New England Commission of Higher Education guidelines regarding the definition of a credit hour. Federal regulations define a credit hour under Section 600.2 and 600.24(f) of the Higher Education Opportunity Act as: "An amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates not less than:

1. One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit or the equivalent amount of work over a different period of time; or
2. At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution, including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours."

Face-to-Face Lectures/ Seminar/Discussion Courses

Three credit hours will be awarded for fifteen weeks of two 75-minute classes per week (or the equivalent in 50-minute, or 150-minute sessions) with a normal expectation of two hours of outside study for each class session. For courses awarding some other number of credit hours, one credit will be earned for fifteen 50-minute sessions of classroom instruction in a term (or its equivalent) with a normal expectation of two hours of outside study for each class session. For non-traditional delivery, SNHU defines the following equivalencies:

Hybrid Courses

Hybrid courses will meet face-to-face once a week for the equivalent of 1 class period throughout the academic term, and contain weekly asynchronous online components.

Fully Online Courses

Online asynchronous or synchronous courses must mirror the learning outcomes and academic standards of the analogous face-to-face course. Thus, while students may spend no time "in class," they complete the equivalent amount of work. Federal regulations recognize the special nature of "class time" in the online environment.

Individual Activity Courses (independent study, course by arrangement)

Such courses have generally been three credit hours at SNHU. Faculties are expected to assess the level and amount of student learning, and award credit only when the work is of sufficient challenge and quality. While faculty guidance is expected, much or most of this activity is done independently by the student on his/her own time.

Internships

SNHU awards credit hours for learning acquired outside the institution if it is an integral part of a program of study. We particularly encourage internships which are supervised by disciplinary faculty. When work experience receives academic credit, it should both be suitably supervised and of sufficient length to be meaningful. Historically this has been achieved by awarding three semester credits for fifteen weeks of ten clock-hours per week or 150 internship hours for a 3-credit course.

Credit by Examination and Prior Learning Assessment (PLA)

At its discretion, SNHU may award academic credit for mastery demonstrated through credit-by-examination and PLA. Approved credit may be used to satisfy degree requirements or to reduce the total number of remaining hours required for a degree.

Other Special Arrangements (study abroad, etc.)

Credit hours to be earned in approved overseas academic programs will be considered on an individual basis following established procedures in the specific Schools. All other special arrangements must be submitted to, and approved, by the Provost / Sr. VP of Academic Affairs.

College for America Program

One credit equivalency is earned with the mastery of each competency, and these are mapped to course equivalencies. This includes up to 30 credits for the certificate, 60 credits for the AA degree and up to 60 additional credits leading to the BA degree.

Unit of Credit

Campus Programs

The unit of credit at Southern New Hampshire University is the semester hour.

Scholastic Standing

Undergraduate Scholastic Standing:

Undergraduate students must maintain a cumulative grade point average (GPA) of 2.0 or higher to be in good academic standing. At the end of each semester and at any other time deemed appropriate, the Undergraduate Scholastic Standing Committee will review the records of all students whose cumulative or term GPA is below 2.0.

Students with a cumulative GPA that falls below the minimum cumulative GPA of 2.0 are either placed on Scholastic Warning or Academic Suspension at the committee's discretion.

- **Scholastic Warning:**
 - If a student on Scholastic Warning is unable to achieve the minimum 2.0 term GPA the following semester, they are placed on Academic Suspension.
 - If a student on Scholastic Warning is able to achieve the minimum 2.0 term GPA the following semester, but their cumulative GPA is still below a 2.0, they are placed on Continued Scholastic Warning to allow them the opportunity to improve their cumulative GPA.
 - If a student on Continued Scholastic Warning is unable to achieve the minimum 2.0 term GPA by the end of the next semester, they are placed on Academic Suspension.
- **Academic Suspension:**
 - If a student is placed on Academic Suspension, they may appeal the decision to the committee.
 - If a student's appeal is accepted, but they are unable to achieve the minimum 2.0 term GPA by the end of the next semester, they are dismissed from undergraduate programs at the university.
 - Students who do not meet the standards due to extenuating circumstances will be reviewed on a case-by-case basis.
- **Academic Dismissal:**
 - Students who are readmitted following an Academic Suspension but do not maintain a minimum term GPA of a 2.0 will be dismissed from undergraduate programs at the university. Academic dismissal is considered final and no appeals are accepted.
- **Good Academic Standing:** Students who meet the required cumulative GPA of 2.0 or above are returned to good scholastic standing.

The committee will review students with extenuating circumstances on a case-by-case basis. VA benefits will be terminated when a student is placed on Academic Suspension or Academic Dismissal.

Graduate Scholastic Standing:

Graduate students must maintain a cumulative GPA of 3.0 or higher to be in good academic standing.

- **Scholastic Warning:** Students with a cumulative GPA that falls below the minimum cumulative GPA of 3.0 are placed on Scholastic Warning.
- **Continued Scholastic Warning:** Students on Scholastic Warning who do not achieve a cumulative GPA of 3.0 the following semester are placed on Continued Scholastic Warning. Students on Continued Scholastic Warning from a previous semester who achieve at least a 3.0 term GPA for the current semester but do not achieve a cumulative GPA of 3.0 remain on Continued Scholastic Warning to allow them the opportunity to improve their cumulative GPA. As long as students continue to achieve at least a 3.0 term GPA they remain on Continued Scholastic Warning until they achieve a cumulative GPA of at least 3.0.
- **Academic Suspension:** Students on Continued Scholastic Warning from a previous semester who do not meet a minimum term GPA of 3.0 for the current semester are placed on Academic Suspension. Students who do not meet these standards due to extenuating circumstances but who are making substantial progress towards the demonstration of the standard will be reviewed on a case-by-case basis.
- **Academic Dismissal:** Students who are readmitted following an Academic Suspension but do not maintain a minimum term GPA of 3.0 will be dismissed from graduate programs at the university. Academic dismissal is considered final and no appeals will be accepted.
- **Academic Program Dismissal:**
 - MFA students who earn two Unsatisfactory (U) grades in the program, or are enrolled in the MFA program for more than three years, are dismissed from the MFA program
 - Doctoral students who earn 2 Unsatisfactory (U) grades are dismissed from the program
- **Good Academic Standing:** Students who meet the required cumulative GPA of 3.0 or above are returned to good scholastic standing.

Scholastic Standing Committee:

The Scholastic Standing Committee is responsible for considering student appeals for readmission after academic suspension and requests for academic renewal.

The Committee has the authority to:

Campus Programs

- Readmit a student who was academically suspended if the student's academic performance and appeal provide a compelling case to the committee.
- Uphold the academic suspension or dismiss a student from graduate programs at the university.
- Grant or deny academic renewal.

Readmission after Academic Suspension:

- Students who have been academically suspended may appeal, in writing, to the appropriate Scholastic Standing Committee; students must wait a period of one semester before returning to the university and may appeal during that semester off. Students who have been suspended and successfully appeal are readmitted on continued scholastic warning and must meet all scholastic standing requirements. This means that students who do not maintain a 2.0 term GPA for undergraduate programs or 3.0 term GPA for graduate programs will be dismissed from undergraduate or graduate programs at the university as applicable and will not be considered for readmission. Academic Dismissal is considered final and appeals are not accepted.
- Students who are readmitted may have registration restrictions and will need to meet regularly with the advisor to discuss resources and review progress toward achieving the cumulative GPA required for good standing. All students must meet cumulative GPA requirements (2.0 or above for undergraduate; 3.0 or above for graduate) for good standing prior to graduation.

Admissions

Academic Articulation Agreements

The Office of Academic Quality, Accreditation & Support at Southern New Hampshire University maintains a list of schools and organizations with which we have articulation agreements. Please email accreditation@snhu.edu with any questions.

Admission Requirements, Graduate

General Information

Applicants who have earned a bachelor's degree or a graduate degree at an accredited institution in the United States or an equivalent degree from a comparable international post-secondary institution are eligible to apply to the university. The decision to admit an applicant to a program is based on a combination of criteria according to the requirements of the specific graduate program.

While many of our students have work experience in business or professional settings, we also encourage applications from students who are completing their undergraduate studies. Prospective students may apply for admission to the university during or after their final year of undergraduate study, but must supply proof of graduation before the end of the first term at Southern New Hampshire University.

Application

ALL graduate programs require the following:

- Completed application: Students are encouraged to apply online at www.snhu.edu.
- Completed bachelor's degree (admission to a master's program) or a completed master's degree (admission to a doctoral program) from an accredited institution.
- Application fee: \$40 (\$100 for the EdD in Educational Leadership). All application fees are non-refundable.
- Resume/Curriculum Vitae (Doctoral programs only).
- Official transcripts for a conferred degree (bachelor's degree for master's programs; master's degree for doctoral programs). All transcripts are to be submitted from the original institutions.
- International Students must meet the Admissions Requirements for International Students.

Applications are reviewed on a rolling basis unless otherwise noted.

The following programs require application materials in addition to those listed for all graduate programs (above):

Business Administration (MBA)/ MS Business Disciplines

(excluding Professional Accountancy - Plus One (MS) and Business Management - Plus One (MS)).

1. Application Deadline: Three (3) months prior to program start (and beyond that on a case-by-case basis).
2. Minimum GPA: 2.75.
3. Completed Bachelor's degree.

Business Management - Plus One (MS)**

1. Application Deadline: Three (3) months prior to program start (and beyond that on a case-by-case basis).
2. Minimum GPA: 2.75.
3. Completed Bachelor's degree in Business.

Educational Leadership (EdD)*

1. Interview
2. Two (2) Letter of Recommendation.
3. Minimum GPA: 2.75.
4. Personal Statement/Statement of Purpose.
5. Completed Master's degree.

Campus Programs

Educational Studies (MEd)*

1. Minimum GPA: 2.75
2. Completed bachelor's degree.

Fiction/Non-Fiction (MFA)* (Requires face-to-face learning component).

1. Application Deadline: April 15th, October 15th.
2. Minimum GPA: 3.0
3. Two (2) Letters of Recommendation. The letters of recommendation should be from those capable of assessing the applicant's preparation to succeed in a low-residency MFA program in writing.
4. Personal statement (800-1,000 words) describing writing experience and commitment to writing. The applicant should include an assessment of why they are a good candidate for the MFA program at SNHU.
5. Twenty (20) pages of manuscript double-spaced and numbered in the genre (fiction/nonfiction) the applicant plans to study.

Field Based Education (MEd) or Advanced Graduate Study (Graduate Certificate)*

1. Minimum GPA 2.75
2. All applicants must have a teaching certificate, evidence of teaching experience, or access to a teaching situation.
3. External Critique of Professional Educational Activities.
4. Successful completion of ProFile Seminar (first credit of 36 credits required for MEd or 31 credits required for CAGS).

International Business (PhD)

1. Application Deadline: April 1st.
2. Interview required.
3. Three (3) letters of recommendation.
4. Minimum GPA: 3.5
5. Personal Statement/Statement of Purpose.
6. Completed master's degree (preferably in business or international business).
7. Graduate Management Admission Test (GRE or GMAT) scores are recommended for scholarship consideration.

Master of Education (MEd) (excluding Educational Studies (MEd))*

1. Minimum GPA 2.75
2. Students who are accepted to one of the Master of Education programs leading to initial NH certification will subsequently apply to the School of Education Teacher Certification Program (TCP) sometime during their first four classes. At that time they will be required to submit passing Praxis I scores, recommendations from SNHU instructors, and a writing sample. Once accepted into TCP, students will complete the student teaching application process which then leads to the placement of students in their student teaching assignments.
3. Students seeking initial licensure will be required to complete an Acknowledgment form and General Education Assessment (Gen Ed 609) form.
4. Students seeking endorsement will be required to complete an Acknowledgement form and submit a copy of their current Teaching Certificate.

Professional Accountancy - Plus One (MS)

1. Application Deadline: Three (3) months prior to program start (and beyond that on a case-by-case basis). September only start.
2. Interview with Accounting department.
3. Minimum GPA: 3.0
4. Completed Bachelor's degree in Accounting.

Teaching English as a Foreign Language (MS)

1. Application Deadline: Three (3) months prior to program start (and beyond that on a case-by-case basis).
2. Minimum GPA: 2.75
3. Completed bachelor's degree.

*Indicates program is NOT available for international students. Please see [Admission Requirements, International Students](#) policy for additional admission requirements.

**Open only to students who completed their Undergraduate degree at SNHU (with the exception of the Marketing concentration, which is open to graduates from other institutions).

Non-Degree Students

Students who have earned baccalaureate degrees are permitted to undertake 3-5 graduate courses (9-15 credits) at Southern New Hampshire University. Non-degree seeking students must file an application with the Graduate Admission office or International Programs (international students) and supply transcripts and other pertinent information in accordance with general graduate admission policies. Non-degree seeking students must declare a program if wishing to continue graduate studies after completing their graduate credits.

Time Limitation

All graduate and doctoral programs offered at Southern New Hampshire University must be completed within eight years, with the exception of the Manchester-based M.Ed. programs, which have a five-year time limit. M.Ed. students

Campus Programs

who require longer than five years to complete their degrees or combined program requirements will be required to accept the program plans in the graduate catalog in place at such time. Leaves of absence or requests for program changes do not extend the time limit. Students who require additional time to complete their degrees or combined program requirements will have their programs updated to the graduate catalog in place at the time of the extension.

Initial Enrollment

An accepted student must enroll within one year of the date of acceptance. Those who fail to do so will be required to resubmit application materials and be readmitted. Readmission would require the student to satisfy program and degree requirements implemented after the original acceptance date.

Internships

Internships for graduate credit are available in selected programs to full-time and part-time graduate students who have completed at least 18 graduate credits. Internships must be started and completed within a single academic term. Each candidate looking to undertake an internship should consult their Academic Advisor.

Student Teaching

Master of Education programs leading to initial certification culminate in a 16-week student teaching practicum and corresponding seminar. During the 16 weeks, the student-teacher receives close and continuous supervision and guidance from the teaching personnel at the participating school and by the Southern New Hampshire University faculty.

Practicum

Students enrolled in non-certification Master of Education programs complete an action research practicum as a capstone experience. During the practicum students develop two educational products related to their field of study as a culminating application of the theories examined during the program.

Admission Requirements, International Students

Application for an International Student

An on campus international student is defined as any applicant requiring a visa to study in the United States. Permanent residents and DACA students are processed by Domestic Admission. International applicants should contact the [Office of International Programs](#) for a current list of available programs (intladm@snhu.edu). Some programs may have specific additional requirements. A complete application file for an international student requires the following:

- **An International Student Application**, submitted online at www.snhu.edu. Or, students may submit the [Common Application](#).
- Payment of international student nonrefundable **application fee**, which can be waived at the discretion of the International Admissions Office.
- **Documentation Submission Format**. Official academic records from an accredited institution (degrees, diplomas, transcripts, certificates and diploma supplements) must be submitted. English translations must accompany records not issued in English. Translations can be obtained from your school or a certified translation service.
- Original documents should not be sent as we are unable to return these to the student. Students should obtain attested official copies of their single issue original academic documents.
- Official documents should be issued by the institution and sealed in an envelope that is signed or stamped across the back flap. Student may also request a professional evaluation based on official transcripts sent directly by organizations recognized and accredited by AICE (Association of International Credential Evaluators) or NACES (National Association of Credential Evaluation Services) or SNHU overseas representative.
- Additional academic documents or verifications may be required at the discretion of the international programs office.
- An admissions decision is considered official upon receipt of an acceptance letter on SNHU letterhead. The Director can rescind an admission decision if any of the information submitted in the application process is found to be inaccurate or fraudulent, or if the students qualifications change significantly (for example if a student's academic, disciplinary or criminal background changes).
- Equivalence of foreign documents is determined by the International Admissions Office. The International Admissions Office reserves the right to request that students obtain document evaluation and/or translation from an independent credentialing agency accredited by AICE (Association of International Credential Evaluators) or NACES (National Association of Credential Evaluation Services).

Undergraduate Admission Requirements:

- Official diploma or document showing proof of graduation from high school (secondary school) or a college transcript showing at least 12 transferrable university level credits from an accredited institution along with a high school graduation attestation form. Transfer students may be required to submit an official high school transcript with proof of graduation upon request.
- Official Transcripts or mark sheets for all course work taken (must include at least 1st quarter, semester or trimester grades of final year of secondary school with proof of graduation. Student must submit their final official transcripts after graduating. The final official transcript must be processed by SNHU no later than the end of the first term of enrollment to continue in the program.

Campus Programs

- Students who have some university level academic work may be eligible for transfer credits or exemptions. See Transfer Credit policy for documentation that is required to receive transfer credit consideration.
- English Proficiency - Proof of qualifying English proficiency score as outlined below or agreement to enter our full-time, intensive English as a Second Language (ESL) program. Southern New Hampshire University provides conditional admission for students needing ESL prior to entering a degree program.
- SAT and ACT scores are not required.
- SNHU uses a number of factors and criteria when evaluating an applicant. At a minimum, transcripts must indicate student is prepared for the rigors of college coursework. Some programs have additional minimum criteria. The decision to offer admission is at the general discretion of the international admissions office after a careful and holistic review of all materials required for submission.

Graduate Admission Requirements:

- Official diploma or document showing proof of graduation and completed bachelor's degree (equivalent of a US bachelor degree as determined by SNHU policy.)
- Official transcripts or mark sheets for all course work taken including most recent degree earned. Undergraduate transcripts are required for graduate program course waiver consideration.
- Students may be considered for admission during their final term of their undergraduate degree program. Degree must be awarded prior to enrollment in the master's program. Proof of degree and official final transcript must be processed by SNHU no later than the end of the first term of enrollment to continue in the program.
- SNHU recognizes 3-year 180 ECTS credit Bologna Process bachelor's degrees (conferred after 2003), or year of Bologna Process adherence from institutions in member countries. SNHU must receive official transcripts and the Diploma Supplement, both in English.
- English Proficiency - Proof of qualifying English proficiency score as outlined below or agreement to enter our full-time, intensive English as a Second Language (ESL) program. Southern New Hampshire University provides conditional admission for students needing ESL prior to entering a degree program.
- GRE and GMAT scores are not required.
- SNHU uses a number of factors and criteria when evaluating an applicant. At a minimum, transcripts must indicate student is prepared for the rigors of graduate-level college coursework. Some programs have additional minimum criteria. The decision to offer admission is at the general discretion of the international admissions office after a careful and holistic review of all materials required for submission.

Doctorate Admission Requirements:

- Official diploma and transcripts showing proof of graduation and completed bachelor and master degrees. Degrees earned outside of the US must be evaluated by a NACES approved evaluator.
- For requirements or additional information on doctoral admission, please see the PhD Admission section. Admission decisions for the PhD program are at the discretion of the Doctoral Admission Committee.

English as a Second Language Admission Requirements for non-degree seeking applicants:

- No academic documents are required for ESL-only admission.
- SNHU uses a number of factors and criteria when evaluating an applicant for admissions to the ESL program. The decision to offer admission is at the general discretion of the International Admissions Office after a careful and holistic review of all materials required for submission.

Academic Program English Proficiency Requirements:

Accepted Tests: The following tests are currently accepted: TOEFL (The SNHU TOEFL code number is 3649), IELTS, PTE, Cambridge, Duolingo. Other language tests may be considered based on equivalent scores to those mentioned below. Students from partner institutions may be considered for exemption from language tests based upon written agreement of language proficiency with partner language school officials. The TOIEC examination is not accepted.

Students who have completed a degree in the US or have a degree fully taught in English may have the English proficiency score requirement waived. Countries where SNHU campus admissions will waive the proficiency score requirements for Undergraduate and Graduate Admission include: American Samoa, Anguilla, Antigua and Barbuda, Austria, Australia, Bahamas, Barbados, Belize, Bermuda, Botswana, Cameroon, Canada (except Quebec), Cayman Islands, Denmark, Dominica, Fiji, Finland, Gambia, Ghana, Gibraltar, Grenada, Guam, Guyana, Ireland, Isle of Man, Israel, Jamaica, Kenya, Lesotho, Liberia, Malawi, Malta, Marshall Islands, Mauritius, Montserrat, Namibia, Nauru, Netherlands, New Zealand, Nigeria, Northern Mariana Islands, Norway, Palau, Papua New Guinea, Puerto Rico, Scotland, Seychelles, Sierra Leone, Singapore, Solomon Islands, South Africa, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname, Swaziland, Sweden, Tanzania, Tonga, Trinidad and Tobago, Turks and Caicos Islands, Uganda, United Kingdom, Vanuatu, Virgin Islands, Wales, Zambia, Zimbabwe. Applicants may be considered for an English proficiency test waiver on a case by case basis at the discretion of SNHU International Admissions.

- **Undergraduate Applicants.** Undergraduate degree applicants must demonstrate proficiency as evidenced by:

Direct to program placement into ENG 120 (unless ENG 120 is satisfied)

- TOEFL score of 79 and greater
- IELTS score of 6.5 and greater
- PTE score of 58 or greater
- Duolingo score of 61 or higher

Campus Programs

Direct to program, placement into ENG 099i followed by ENG 120

- TOEFL score of 71 to 78
- IELTS score of 6.0 (subscores ≥ 5.5)
- PTE score 54 to 57
- Duolingo score of 50 to 60
- Successful completion of SNHU's English bridge program

English Bridge (Undergraduate Language Studies)

Students with the following scores will be assigned to the undergraduate bridge program (ULS) with some English and some academic course work:

- TOEFL 61-70
- IELTS 6 (sub-scores ≤ 5.0)
- PTE 49-53
- Duolingo 39-49
- Successful completion of SNHU's ESL program

English as a Second Language

Students with the scores that do not meet SNHU's current English requirements may apply for consideration for admittance into the [English as a Second Language \(ESL\) program](#).

- **Graduate Applicants.** Graduate applicants must demonstrate proficiency as evidenced by:
 - TOEFL score of 71 or greater
 - IELTS score of 6.0 or greater
 - PTE score of 54 or greater
 - Duolingo of 50 or greater
 - Successful completion of SNHU's ESL program

English as a Second Language

Students with the scores that do not meet SNHU's current English requirements may apply for consideration for admittance into the [English as a Second Language \(ESL\) program](#).

- **Immigration Documentation**

Once it has been determined that an applicant is academically qualified and accepted, an i20 can be issued after the necessary documentation is received. SNHU only issues i20 forms for eligible students studying on SNHU's Manchester NH Campus.

Required immigration documents:

- Financial documents - Applicants must submit documentation that funds are available, i.e. official bank letter. A demonstrated level of support not only for tuition and room and board, but also for living expenses, pocket money, books, etc., is necessary.
- Affidavit of support - required if funds are not in applicant's name.
- A copy of applicant's passport ID page.
- A transfer i20 form (for applicants transferring from other institutions within the US.)

Initial Enrollment

An accepted student must enroll within one year of term indicated on the original acceptance offer. Those who fail to do so will be required to resubmit an application and may be required to resubmit materials and be reconsidered for admission. The student would be required to satisfy program and degree requirements implemented after the original acceptance date.

Admission Requirements, Undergraduate

Freshman Admission

Candidates for admission to Southern New Hampshire University are evaluated individually on the basis of academic credentials and personal characteristics. Students may apply online via the Common Application at commonapp.org.

The following items are required to be submitted for consideration:

- A completed application, essay and \$40 application fee.
- Official high school transcript (or alternative credential, see list below) including at least first quarter senior year grades, unless the student has applied Early Action, in which case senior grades are not required. A copy of the final transcript must be submitted following high school graduation.
- One letter of recommendation from a school counselor or teacher.

Students applying to Southern New Hampshire University may submit one of the following credentials as proof of high school completion:

Campus Programs

- High School Diploma
- General Education Development (GED)
- A state authorized high school equivalent certificate such as the High School Equivalency Test (HiSET) or the Test Assessing Secondary Completion (TASC)
- Home-schooled documentation (Check Home-school Admission Policy)

Additional admission criteria may apply. Students should check www.snhu.edu for any specific requirement for their program of interest.

Freshman Admission Criteria

When reviewing applicants, primary emphasis is placed on a student's academic record as demonstrated by the quality and level of college preparatory course work and achievement attained. Most successful candidates admitted to SNHU present a program of study consisting of 16 college preparatory courses, including:

- four years of English
- three or more years of mathematics including Algebra I, Geometry, and Algebra II
- two or more years of laboratory sciences
- two or more years of social sciences

Test Optional

Students are not required to submit copies of their SAT or ACT scores to be considered for general admission to the university. The admission committee continues to place the strongest emphasis on a student's academic preparation in high school as the best predictor of success at the college level; however, please note that home-schooled students and students completing their high school diploma through an unrecognized, unaccredited program are required to submit copies of their SAT or ACT scores to complete their applications.

Early Action

The early action option is for undergraduate day freshman applicants who wish to receive the earliest possible response regarding their admission to Southern New Hampshire University. Evaluation of early action applicants is based on academic work through the junior year of high school. To be considered for early action, a student's completed application file must be received prior to the November 15 deadline. Early action applicants will be notified of our admission decision within 30 days or will be requested to submit additional information before a decision is reached. Early action, unlike "early decision," does not require an early commitment to enroll or restrict the student from applying to other colleges or universities.

Rolling Admission

Many students apply under the rolling admission plan, in which applications are reviewed throughout the year. The priority deadline for the rolling admission plan for freshman applicants is February 1. Candidates for freshman admission should apply no later than May 15 for the fall term and Nov. 15 for the spring term. Transfer applicants are encouraged to apply by Feb. 15 for the fall term and by Nov. 15 for the spring term. Applicants can usually expect to receive an admission decision within 30 days from receipt of their completed application.

Admission of Home-schooled Students

The following admission criteria apply specifically to home-schooled students. A complete application for a home-schooled student requires the following:

- SAT or ACT scores (These may be reported directly by the College Board. Our College Board Code is #3649.)
- One recommendation from the primary educator
- One recommendation from a coach, community leader, or supervisor

If the home school program is not accredited, the student must meet all state regulations put forth by their home state and the state of New Hampshire, and should submit a portfolio including course descriptions, an annotated reading list, and graded work for review. These same requirements may be applied to a student from an unrecognized, unaccredited high school program.

Veteran Admission (Undergraduate)

U.S. Military Veteran students, including family members utilizing military benefits, are encouraged to apply to the University College at Southern New Hampshire University (SNHU). SNHU is proud to participate in the Yellow Ribbon Program, a provision of the new Post-9/11 that is meant to bridge the gap between these benefits and SNHU's on-campus tuition and fees. Veteran students in University College have access to the DeColfmacke Veterans Lounge and other veteran-specific resources on campus.

Campus Programs

Students utilizing a family member's military benefits should follow the traditional admission process according to their student type as defined by the University (freshman or transfer). When veterans apply to the traditional undergraduate day program at SNHU, they should apply through the Office of Transfer Admission and will be assigned to an admission specialist who is trained to meet the specific needs of military veterans, as well as a military benefits manager who will reach out promptly upon acceptance to the University to review the benefits process with the student. Military experience is actively considered in the admission process – veterans are not reviewed for admission based solely on previous academic records.

Items required to be submitted for consideration as a veteran student:

- A completed University College transfer application www.snhu.edu/apply
- Official college transcripts from every institution attended
 - A list of your current college courses in progress (if applicable)
- Official high school transcript or high school attestation form (if twelve or more college credits have been completed after high school)
- The Joint Services Transcript (available online at <https://jst.doded.mil/official.html>)
- VA application for benefits (available online at www.va.gov)

The Yellow Ribbon program is designed to fully cover direct costs of tuition and fees; therefore, veteran students utilizing Yellow Ribbon benefits or any similar benefits that cover the cost of tuition and fees are not eligible for SNHU academic merit scholarships and grants.

Personal Interviews and Campus Visits (Undergraduate)

A campus visit will help any student become familiar with the university and will assist students through the admission process. Personal interviews and campus tours are strongly recommended. Opportunities to visit SNHU include: guided tours, personal interviews, open house programs and information sessions. The Office of Admission is open year-round. For specific dates and times for visits, please contact us at 603.645.9611 or you can arrange your visit online at: www.snhu.edu/campusvisit.

Special Academic Programs Admission (Undergraduate)

Engineering and Computer Science Majors

Undergraduate day students applying for admission to any of the three Engineering programs or the Computer Science program are required to complete four years of mathematics through Algebra II. Students are encouraged to have also completed Pre-calculus in preparation for the rigor of these majors. If a student has not completed Pre-calculus, they are encouraged to have a conversation with academic advising about the timeline for completion of their program.

Creative Writing Majors

Undergraduate day students applying for admission to the Creative Writing Program at Southern New Hampshire University must submit a 10 page writing sample prior to enrolling at the university. The coordinator of the Creative Writing program will review all writing samples for students entering the major either before or after admission to the university. For more information, contact the School of Arts and Sciences.

Music Education Majors

Undergraduate day students applying for admission to the Music Education Program at Southern New Hampshire University must complete an audition prior to enrolling at the university. The coordinator of the Music Education program will conduct and evaluate all auditions for students entering the major either before or after admission to the university. For more information or to schedule an audition, contact the School of Education.

The University Honors Program Applicants

Undergraduate day students applying for admission to The University Honors Program need to submit all of the items required for freshman admission. In order to be considered for The University Honors Program, an additional application form and essay are required (see application for topic). The director of The University Honors Program will review the applicant's credentials for admission into the program. For more information on the University Honors Program, contact the Office of Freshman Admission.

Bradley Honors Program in Business Administration

Undergraduate day students applying for admission to the Southern New Hampshire University Bradley Honors Program need to submit all of the items required for freshman admission and for The University Honors Program. Successful candidates generally have at least a "B" average in a challenging college-preparatory high school curriculum. An interview with the program director is required.

Campus Programs

Applicants must first be accepted into a traditional four or three-year degree program prior to applying for the Bradley Honors Program in Business Administration.*

For more information on the undergraduate day Bradley Honors Program in Business Administration, contact the School of Business.

Transfer Admission (Undergraduate)

An applicant is considered a transfer student after completing a minimum of 12 college credits after high school graduation. Transfer students can apply to Southern New Hampshire University for the fall or spring semesters of each academic year. Southern New Hampshire University recognizes most work completed at other accredited institutions and welcomes transfer applications. In reviewing applications for transfer admission, emphasis is placed on postsecondary academic work completed. Most successful applicants have a cumulative college G.P.A. of a 2.5 or higher (4.0 scale). Southern New Hampshire University reserves the right to not accept as transfer credit capstones, co-ops, internships and student teaching taken at other institutions.

Items required to be submitted for consideration as a transfer student:

- A completed application (available online at <http://www.snhu.edu/admission/campus-undergraduate-admission/transfer-and-readmits>)
- Official transcripts from all colleges or universities previously attended
 - A list of your current college courses in progress (if applicable)
- High School Attestation Form
- An official, final high school transcript will be required of some applicants, including but not limited to all applicants with less than 12 completed college credits at the time of application

Transfer Credit Evaluation Process

Official transfer credit evaluations are mailed with a transfer student's letter of acceptance. The credit evaluation lists all courses that transfer into the student's degree program so that the student knows exactly the courses needed to complete his or her associate/ bachelor's degree.

International Transfer Credit Evaluation for Domestic Day Students

Students who wish to receive transfer credit for college-level coursework from an international institution outside of the United States or Canada may submit an official transcript to the Office of Transfer Admission for evaluation. Once the transcript is reviewed, the Office of Transfer Admission will determine if it is necessary to use a credential evaluation service. Some students may be required to have their transcripts evaluated by an educational credential evaluation service that is recognized by the National Association of Credential Evaluation Services (NACES) or the Association of International Credentials Evaluators (AICES). Students may also use the services of the American Association of Collegiate Registrars and Admissions Officers International Education Services (AACRAO), or the Credentials Evaluation Service of the Commission on Graduates of Foreign Nursing Schools (CGFNS). Students may use only one evaluation service. Multiple evaluations for transfer credit will not be accepted. Students must have official copies of the evaluations sent directly to the Office of Transfer Admission from the credential evaluation service.

Internal Transfer (Undergraduate)

Students currently enrolled in any of the Southern New Hampshire University College of Online and Continuing Education and/or College for America programs who wish to enroll in University College must file an [Internal Transfer Application](#) with the Office of Transfer Admission. The Internal Transfer Application form is available at each Center, or can be requested by contacting the Office of Transfer Admission at 603.645.9687 or transfer@snhu.edu. Students will be evaluated on their academic performance in their current programs. Being admitted to the College of Online and Continuing Education and/or College for America at Southern New Hampshire University does not guarantee acceptance to an undergraduate day program on campus.

Current undergraduate day students on-campus who wish to transfer to the Southern New Hampshire University College of Online and Continuing Education and/or College for America program must file an [internal transfer form](#) from the Academic Advising Office.

Admission Statuses

Admission

An admission decision is considered official upon delivery of an acceptance letter on SNHU admission letterhead. The director can rescind an admission decision if any of the information submitted in the application process is found to be inaccurate, without submission of an official, final transcript from any previous institution attended, including from high school (if required) and four-year institutions, or if the student's qualifications change significantly (for example, if a student's disciplinary or criminal background changes after admission is offered).

Unconditional Acceptance

Campus Programs

A student who is accepted unconditionally to University College has been admitted to enroll at the university with no additional conditions other than academic expectations of University College students.

Acceptance, Evaluation Pending (UG)

An undergraduate student whose status is accepted with evaluation pending (AEP) may submit transfer credits for review and approval through the end of the second semester at SNHU. At the end of the second semester, the student is automatically transitioned from AEP status to ACCEPTED status with all transfer credit that has been approved at that time.

Acceptance, Evaluation Pending (GR)

A graduate student whose status is accepted with evaluation pending (AEP) must provide official transcripts showing a conferred bachelor's degree by the end of their second term at SNHU. At the end of the second term, students remaining AEP will be reviewed and automatically transitioned from AEP status to ACCEPTED status when SNHU has received official transcripts showing a conferred bachelor's degree and any other outstanding transcript will be waived. If SNHU does not have official transcripts showing a conferred bachelor's degree the student will not be eligible to enroll in a third term.

Provisional Acceptance, Graduate

A student whose undergraduate GPA is below the GPA required for full acceptance and who does not hold a post-graduate degree may be provisionally accepted in certain programs.

Refer to the [Provisional Acceptance](#) policy for details.

Academic Success Coaching (ASC) Acceptance

Select students demonstrating the need for additional academic support, at the discretion of the Office of Admission or the Wolak Learning Center, may be automatically admitted into the Academic Success Coaching program at SNHU. The ASC program provides students with a full year of personalized academic support tailored to fit their academic needs. Students admitted under the ASC Acceptance pathway are still unconditionally admitted to the university, but under the caveat they will participate in ASC their first year. Success or failure within the ASC program does not impact the student's standing, nor is successfully completing the program a requirement to remain enrolled.

Conditional Acceptance

A domestic student who is accepted conditionally is approved for enrollment for the first semester only. The student may have a limit set on the number of credits they may enroll in in the first semester, and most conditionally admitted students are required to enroll in Learning Strategies Seminar (LSS 100), an SNHU course designed to support a successful transition to the university. All conditionally admitted students must achieve a minimum GPA of 2.0 in the first semester to remain at the institution and to be considered unconditionally admitted to the university.

International Provisional Acceptance

An international student who is accepted provisionally to University College has been admitted to enroll at the university and participate in Academic Success Coaching.

Conditional Acceptance

An international student who is accepted into ESL and an academic program will receive a conditional acceptance to the academic program until the English proficiency requirement is satisfied. The student's status will change to unconditional acceptance when the requirement is met.

Denial

A denied student is not accepted to the University. A denial decision is only made for the term for which a student applies, and a student who is denied may reapply for a future semester, provided that circumstances for the student have changed (for example, a semester of coursework elsewhere). Denial decisions can be appealed by sending a letter to the director of the admission office making the decision.

Non-matriculated

University College at SNHU allows students who have not previously taken any courses at SNHU, to explore our daytime course offerings without matriculating. Such students enroll on a part-time basis in undergraduate day classes. As non-matriculated students, they may enroll for up to six credit hours (2 classes) in a semester, not to exceed nine credit hours (3 classes) per academic year or more than twelve credit hours (4 classes) in total. Enrollment is on a space-available basis. International study abroad students may take up to a year of full time studies as outlined in the exchange agreement and are not limited to the six credit hour policy.

Provisional Acceptance

Provisional Acceptance to Graduate Programs

Students who do not meet requirements for full acceptance into a graduate program may be eligible for provisional acceptance. Provisional acceptance may be extended to students with a conferred bachelor's degree with a GPA below 2.75 but 2.0 or above. Not all programs permit provisional acceptance.

Campus Programs

- Provisionally accepted UC graduate students who earn a 3.0 cumulative GPA at the end of their second semester will be removed from provisional status.
- Provisionally accepted UC graduate students with a cumulative GPA less than 3.0 at the end of their second semester with a term GPA of 3.0 or above, may remain enrolled for additional term(s) until their cumulative GPA reaches a minimum of 3.0, at which point they will be removed from provisional status.
- Provisionally accepted UC graduate students who do not earn a 3.0 cumulative OR term GPA at the end of their second semester will be denied full acceptance in their program, withdrawn from the university, and will not be allowed to request enrollment in another graduate program.

Readmission

Students who previously took courses as a University College student at Southern New Hampshire University and who wish to enroll for a future term must complete the [Readmission/Reactivation Form](#) with the Office of Transfer Admission. The form can be requested by contacting the Office of Transfer Admission at 603.645.9687. If a student has completed college courses after leaving SNHU, final, official transcripts must be submitted along with the Readmission Form. Please note: a prior acceptance does not guarantee reactivation or readmission into University College. If a student left the university and was not in "Good Academic Standing" or "Good Disciplinary Standing", the student must also meet all other requirements given at the time of suspension before an admission decision will be determined.

Course and Program Enrollment

Absence and Withdrawal Due to Military Service

Attendance

If a student needs to miss more than 20% of a course due to military-related absences, that student must withdraw from the course in question. If a student's military-related absences amount to 20% or less of the class, the student may ask the School's Dean's office for a special accommodation which may allow them to remain in the course. The School's Dean's office will collaborate with the instructor to establish makeup work expectations and deadlines. The student, the Department Chair or Equivalent, the School's Dean's office, and the instructor must all agree and adhere to the established arrangement in order to be exempt from associated class attendance requirements as outlined in the syllabus. Said arrangement must adhere to the [UC Incomplete Grade policy](#). All work must be completed within 30 days of the semester's end-date.

Withdrawal

Enrolled active-duty personnel, Guardsmen, or Reservists may withdraw from a class (es) if military duties preclude his/her ability to satisfactorily complete required coursework or participate in class by completing the Student Initiated Course Withdrawal Form. Similarly, students may request a leave of absence from the University by completing a Withdrawal-Internal Transfer-Leave of Absence Form. To receive a full tuition refund (sent to the original payer), and have the course registration deleted from the transcript (not issued a final grade of "W"), students must attach a copy of their military orders to the appropriate form listed above. Students will also be entitled to return, up to a year after the conclusion of their military service, for reinstatement into their academic program.

If a student surpasses the year timeframe, he/she would need to work with the Office of Transfer Admission to apply for readmission to the University.

Academic Year

An academic year extends from September 1st through August 31st of the following year.

Attendance, Graduate

It is the responsibility of each student to attend all of the scheduled class meetings in a given course. Documented absences resulting from legitimate circumstances, such as personal illness, involvement in sanctioned university events, a death in the immediate family, etc. should not negatively impact a student's grade or academic standing. Notwithstanding the previous statement, once a student has missed enough classes that the instructor believes the student cannot meet the goals of the course within the remaining time frame, the student may be given a failing grade or be considered for an Incomplete (I) and given a defined period to complete remaining course work.

Attendance, Intensive English Program

As an academic unit within the School of Arts and Sciences, University College, the Intensive English Program subscribes to the [Undergraduate Attendance](#) policy.

As the UC attendance policy defines "excessive absence" as not attending at least 10% scheduled classes of a particular course, **for students enrolled in the Intensive English Program, this means missing 9 or more**

Campus Programs

classes during the period of one 7.5 week term will be considered excessive. As enrollment in the Intensive English Program consists of 3 courses per day, this equals a total of 3 full days of absence during one term. Upon accruing 9 absences (3 full days of class), the student shall receive a warning letter from the department. This letter shall inform the student of the consequences of further absenteeism. If a student accumulates 12 absences, he or she will be required to meet with the Chair of the Intensive English Program. After 12 absences, if a student continues to not attend class, International Student Services will be notified of the student's absenteeism, and the student will be required to stand before the ILE Scholastic Standing Committee.

Students are expected to attend all classes, arrive on time, remain for the entire class period, and to report to class fully prepared with textbooks, assignments, and other required materials. Arriving late for class is not tolerated. Being late for class 3 times will equal 1 absence. When absent, a student is responsible for the work covered in class that day and assignments for the next class. At the discretion of the course instructor, being absent on the day of a scheduled test or presentation will result in a score of zero (0). Absence due to religious observance shall be handled under the University's [Religious Observance](#) policy.

Again, it is reiterated that religious observance does not necessarily excuse a student from the assigned work for that day.

If an individual student's absences negatively impacts his or her language development to the point where he or she receives failing grades in all of his or her courses, that student will not advance to the next level of the program at the end of the semester. Furthermore, if a student accumulates more than 18 absences within one semester, the Intensive English Program Coordinator may elect to have the student administratively withdrawn from the program. Additionally, if a student accumulates more than 18 absences in one semester, he or she will be ineligible to receive the department's recommendation to leave the Intensive English program. Finally, if within the period of 2 semesters, a student has failed their classes and remained in the same level of the program due to excessive absences, they will be asked to leave the University.

If a student is experiencing extenuating circumstances that prevent regular class attendance, defined by the University as "the death of an immediate family member, military deployment, serious documented medical issues, and other such extraordinary situations," he or she is encouraged to contact International Student Services, as soon as possible, to request an administrative leave of absence.

Attendance, Undergraduate

Southern New Hampshire University subscribes to the belief that an assumption of responsibility is at the center of learning and accomplishment. Each student is expected to arrange a class schedule that minimizes conflicts with other commitments. This includes personal obligations, participation in athletics or other university sanctioned events, and the like. Therefore, the responsibility of attendance belongs to the student.

Attendance is required in all courses. Being absent and/or late for class may impact a student's grade, and in the case of excessive absences, may result in failure or the instructor withdrawing the student from the course. Missing more than 10 percent of the scheduled class time may be considered excessive. Students are responsible for all missed work, assignments, etc. The instructor's policies on attendance and making up work must be included in the syllabus.

Documented absences resulting from legitimate circumstances, such as personal illness, involvement in sanctioned university events, a death in the immediate family, etc. should not negatively impact a student's grade or academic standing. Notwithstanding the previous statement, once a student has missed enough classes that the instructor believes that the student cannot meet the goals of the course within the remaining time frame, the student may be given a failing grade, withdrawn from the class, or be considered for an Incomplete (I) and given a defined period to complete remaining course work.

Change of Program or Major and Second Major

Change of Program between COCE, UC, and CfA

Students may not concurrently enroll in courses that overlap term dates between University College (UC) and College of Online and Continuing Education (COCE), unless the class (term) start and end dates fall entirely within the UC semester start and end date. Students enrolled in College for America (CfA) programs are not permitted to be concurrently enrolled in either UC or COCE courses and vice versa. For more information, please consult with your academic advisor.

Change of Degree- Associate to Bachelor

When students change from an Associate degree program to a Bachelor degree program, the courses completed as part of the Associate degree will be counted toward the Bachelor degree program.

Change of Program (GR) or Major (UG)

Students who wish to change their major or program must submit a [Program Modification \(COCE\) or Program Change Request \(UC\) Form](#) to their academic advisor. The advisor will work with students to explain the impact of changing

Campus Programs

majors. All changes will take effect at the end of the current term.

Adding a Second Major

An undergraduate student may elect to earn a second major by completing the degree requirements of both majors. No more than 2 courses in the secondary major may overlap with the primary major. The student's diploma will show the primary major as the conferred degree; the transcript will reflect both majors.

Financial Aid Enrollment Status Criteria

As mandated by the U.S. Department of Education policy, only courses required for a student's degree can be used in determining enrollment status for financial aid purposes. In addition, federal student aid regulations permit only one repetition of a previously passed course in determining enrollment status for financial aid purposes.

Concurrent Program Enrollments

Enrollment in Multiple Programs Simultaneously

An undergraduate or graduate student, with the exception of those enrolled in a CfA program, may choose to be enrolled in multiple programs at the same time. SNHU's institutional credit minimums apply separately, however, to each degree or certificate awarded. Students should be aware that enrollment in multiple programs may increase the number of courses they are required to take to complete their programs, above and beyond the minimums within the programs themselves.

Special Academic Options

Double Degrees

A student with a SNHU undergraduate degree seeking to earn an additional degree of the same level must complete at least 30 additional credits in residence, while satisfying all other requirements of the new degree. No more than 2 courses in the new major may overlap with the major(s) of the previous degree(s). Double degrees may be pursued concurrently; however, the courses satisfying institutional credit requirements cannot be shared between the two credentials.

Second Degrees

A student who wishes to earn a second master's degree through Southern New Hampshire University is required to take a minimum of 7 graduate courses beyond the first degree. All other requirements in the second degree program also must be satisfied. Students considering this option should meet with an advisor to determine specific additional requirements.

International students seeking a second degree also must obtain a new visa eligibility certificate (I-20 or DS-2019). This requires a new statement of financial responsibility and admission into the second degree. Students should contact International Admissions for more details and specific requirements.

Course Add and Drop

Students who wish to change their schedules must do so during add/drop period beginning with registration and ending at the end of the fifth class day. Students who miss the first two sessions of a class may be dropped by that instructor without prior notice. The Office of the University Registrar is notified of students dropped by an instructor. Nonattendance in class does not constitute a drop or a withdrawal.

Exception: No student is allowed to drop or withdraw from FYS-101 except in the case of extenuating circumstances supported by documentation. Students missing the first two sessions of FYS-101 will not be dropped by the instructor. Students seeking to withdraw from FYS-101 must complete a Student-Initiated Course Withdrawal form that contains the signatures of their advisor and the Director of First-Year Seminar.

Unless students are dropped by an instructor or officially drop or withdraw from a class, they must receive a grade; nonattendance results in a failing grade.

Financial Aid Enrollment Status Criteria

As mandated by the U.S. Department of Education policy, only courses required for a student's degree can be used in determining undergraduate enrollment status for financial aid purposes. In addition, federal student aid regulations permit only one repetition of a previously passed course in determining enrollment status for financial aid purposes.

Course-by-Arrangement

Course-by-arrangement is a Southern New Hampshire University course appearing in the university catalog and required in the student's academic program of study, yet extraordinary circumstances prevent the student from enrolling in the course when it is normally offered. As such, all other possible alternatives should be exhausted.

Course-by-arrangement is available to Southern New Hampshire University students. Completed forms including the signatures of the advisor and supervising faculty member must be submitted through the SNHU Service Portal for approval by the Office of the University Registrar no later than the end of the add/drop period or the fifth (5th) day of the semester. Forms received after that timeframe are not guaranteed to be processed.

Students must identify a Southern New Hampshire University full-time or adjunct faculty member consenting to teach

Campus Programs

and grade the work. The faculty member must be approved to teach the requested course. Please note, identification of a supervising faculty member does not guarantee automatic approval of a course-by-arrangement.

Course-by-arrangement applications require:

- a description of the extenuating circumstances justifying the offering of a course-by-arrangement
- a regular, weekly meeting schedule be established to ensure proper supervision of the student's progress in the course
- a syllabus stating course objectives and evaluation process
- a defined time frame (semester, terms)
- the course and credits the student is wishing to earn

In a situation where a course is low-enrolled and students are already registered, the course will be converted from a lecture with no additional paperwork needed on the students' behalf (see low enrolled policy.) Please note: If offered as a low enrolled section the instructor can choose to keep the room. If offered as a Course-by-arrangement the instructor will lose the room and is responsible for booking an alternative meeting time and space.

Low Enrolled Sections- UC

A low enrolled section is a traditional Southern New Hampshire University course which has 8 to 10 enrollments in any given term. In an effort to not disrupt our current students nor hinder their degree progression the course can continue to run as is, but as a low enrolled section versus a traditional lecture with approval from the VPAA office. Students will be notified when occurrences like these happen, but no additional paperwork or material will be needed. Students should also work closely with the assigned faculty member as meeting days and times of course could vary. If sections fall at or below 7 enrollments, a Course-by-arrangement may be offered if all other possible alternatives are exhausted. (See Course-by-arrangement policy)

Course Load and Restrictions, International Students

International students in F-1 and J-1 student status must be enrolled full time to maintain lawful presence in the U.S. Online classes are limited to one class per term counting toward your minimum full-time course load. Any classes taken over the minimum full-time course load may be in-class or online format. NOTE: All reductions in a full course load for academic or medical reasons, as well as terms off, must be approved by the Office of International Student Services prior to the start of the term or class load reduction. In a final term, if only one course is remaining, it must be taken in-class to maintain F-1 or J-1 student status.

Credit Load

Credit Load

Credit load is determined by total semester credits.

Graduate students in residency or in dissertation status are considered full-time.

Based on either full-time, three-quarter time, or half-time course load status, student loans will automatically go into deferment. Based on less than half-time academic load status, student loans will not go into deferment.

UC undergraduates can take a Global Campus class only if the student is registered full-time (twelve credits) in UC DAY courses that count toward the student's degree AND the Global Campus class (term) start and end dates fall entirely within the UC semester start and end dates.

Undergraduates & Master of Fine Arts program

*Full Time	12 credits
Three-Quarter Time	9 - 11.99 credits
Half-Time	6 - 8.99 credits
Less than Half-Time	Under 6 credits

*NOTE: Undergraduate students are considered full-time with any combination of UG and approved Graduate courses provided they have met all eligibility requirements as outlined within the [Undergraduates Taking Graduate Courses](#) policy.

School of Business residential graduate & School of Education on-campus programs

Full Time	9 credits
Three-Quarter Time	7 - 8.99 credits
Half-Time	5 - 6.99 credits
Less than Half-Time	Under 5 credits

Campus Programs

Field-Based Education, Master of Science in English as a Foreign Language, & Doctoral programs

Full Time	6 credits
Three-Quarter Time	4.5 – 5.99 credits
Half-Time	3 – 4.49 credits
Less than Half-Time	Under 3 credits

Financial Aid Enrollment Status Criteria

As mandated by the U.S. Department of Education policy, only courses required for a student's degree can be used in determining the student's enrollment status for financial aid purposes. In addition, federal student aid regulations permit only one repetition of a previously passed course in determining undergraduate enrollment status for financial aid purposes.

Refer to the [Financial Aid Enrollment Status Criteria](#) policy for additional information.

Credit Overload

A student who wants to take more than 19 credit hours in a single term (fall or spring) must receive permission to take these extra credit hours from the appropriate school dean. Credit hours for courses from which the student withdraws are included in his or her total number of credit hours.

A student will be required to pay for each credit hour he or she takes in excess of 19 credit hours in one term (fall or spring). Undergraduate Day Credit Overload costs per credit will vary. Please contact Student Financial Services for any questions related to cost of overload.

Summer enrollment is limited to **7 credits** at any point in time (excluding students enrolled in the BS Aviation Operations and Management program and graduate students). Note: If a student opts to take EW and DY/SU courses simultaneously, this 7 credit limit still applies. A student who wants to take more than 7 credits at a time in the summer term must receive permission to take these extra credit hours from the appropriate school dean.

Criminal Background Check

All students taking courses offered by the School of Education where a Field Experience is required, must submit to a criminal history records check per NH RSA 189:13-a and the Adam Walsh Act as a prerequisite of participation. This process must be initiated through SNHU's School of Education. If you are a currently licensed teacher in New Hampshire, this requirement still applies if you are participating in a field experience outside of the district in which you are employed. ***A "Field Experience" is considered to occur when a student is working with children (whether supervised or not) and is required as part of a course.*** Results of the criminal history records check will be reviewed by the Criminal Records Coordinator and shared with the Certification Officer if prior convictions are reported.

Dissertation Status

Doctoral candidates registered for INT-890, INT-889, DOC-950, EDU-943, EDU-944, EDU-945, or EDU-950 (for a minimum of 1 credit) are considered to be full-time for purposes of enrollment reporting and financial aid eligibility.

Enrollment Statuses

Matriculated

Students are considered enrolled full time in University College who were conditionally or unconditionally admitted, and then enrolled in an academic program (a standard major or Exploratory Studies).

Part-time matriculated

Students are considered enrolled part time in University College who were conditionally or unconditionally admitted, and then enrolled in an academic program (a standard major or Exploratory Studies) and in a maximum of 11 credits per semester (fall/spring). These students are charged the rate of 25% of the full-time semester rate per course.

Freshman Course Requirements

Students with 63 or more credits who have not completed the **Foundations English and Math requirements** will not be allowed to register without completing the required freshman courses.

Transfer students must complete missing freshman and prerequisite courses within their first 30 credit hours at Southern New Hampshire University.

SNHU expects every graduate to be proficient in writing correct, coherent English. All entering freshmen are encouraged to participate in self-guided activities and self-place into either **ENG 099** or **ENG 120/ENG 122**. Students who do not participate in self-placement will be placed into either **ENG 099** or **ENG 120/ENG 122** at the discretion of the writing program. Students taking ENG 099 must pass a Basic Writing Competency Examination given at the end of

Campus Programs

the course.

SNHU expects every graduate to develop the skills necessary to work with quantitative information. All entering freshmen are encouraged to participate in self-guided activities and self-place into either MAT 050 (for students with weak algebra skills) or a 100-200 level Mathematics course.

The three credits received for ENG 099 or MAT 050 count towards a student's GPA, but they **do not count towards the 120 credits required for graduation**. Students who take these courses will have to take additional courses to complete their degrees.

University College students may enroll in COCE sections of ENG 099, ENG 120, ENG 121, or ENG 200 only with the permission of the Dean of the School of Arts and Sciences. University College students are not permitted to enroll in ENG 122 or ENG 123, which are restricted to COCE students.

Independent Study, Graduate

A Southern New Hampshire University graduate student may take an independent study course in any subject area in which the course content is not offered in any regularly scheduled Southern New Hampshire University course.

Graduate students must identify a qualified Southern New Hampshire University full-time or adjunct faculty member consenting to teach and grade the work. The faculty member must be approved by the appropriate department chair and school dean. Please note, identification of a supervising faculty member does not guarantee automatic approval of an independent study.

Completed forms including the signatures of the advisor and supervising faculty member must be submitted through the SNHU Service Portal for approval by the Office of the University Registrar no later than the end of the add/drop period or the fifth (5th) day of the semester. Forms received after that timeframe are not guaranteed to be processed. Graduate independent studies will only apply to University College Graduate Programs.

All graduate independent study courses will be at the 500 level or higher for no more than 6 credits. Students should work with their advisors to make sure there is room in their academic program for this course. Please note, independent studies will only fulfill a student's free electives unless a petition to amend degree requirements is submitted.

Students must be enrolled in an academic program to participate in an Independent Study. Independent studies are not available to non-matriculated or coursework only students.

Independent Study, Undergraduate

A Southern New Hampshire University student may take an independent study course in any subject area in which the course content is not offered in any regularly scheduled Southern New Hampshire University course.

Students must identify a qualified Southern New Hampshire University full-time or adjunct faculty member consenting to teach and grade the work. The faculty member must be approved by the appropriate department chair and school dean. Please note, identification of a supervising faculty member does not guarantee automatic approval of an independent study.

Independent study applications require:

- a letter expressing interest in the course material justifying the offering of an independent study
- regular, weekly meeting schedule be established to ensure proper supervision of the student's progress in the course
- a syllabus stating course objectives and evaluation process
- a defined time frame (semester, terms)
- the subject prefix and credits the student is wishing to earn

Completed forms including the signatures of the advisor and supervising faculty member must be submitted through the SNHU Service Portal for approval by the Office of the University Registrar no later than the end of the add/drop period or the fifth (5th) day of the semester. Forms received after that timeframe are not guaranteed to be processed.

All undergraduate independent study courses will be at the 400 level for no more than 6 credits. Students should work with their advisors to make sure there is room in their academic program for this course. Please note, independent studies will only fulfill a student's free electives unless a petition to amend degree requirements is submitted.

Students must be enrolled in an academic program to participate in an Independent Study. Independent studies are not available to non-matriculated or coursework only students.

Leave of Absence

Undergraduate day students may request an administrative leave of absence for the following semester in writing by obtaining the appropriate form via mySNHU or from the Academic Advising Office. If a student is below the age of 18, written parental consent must be received.

Normally, an administrative leave of absence is granted for no more than one semester. Students who do not return as scheduled to the university following their one-semester leave of absence will be considered withdrawn from the university. Note: A student completing coursework elsewhere in their absence from SNHU does not qualify for a leave of absence and must instead withdraw from the institution and re-apply when they are ready to return. Appeals for

Campus Programs

exemption from this rule should be sent to the Dean of Student Success.

Under extenuating circumstances only, an undergraduate day student may apply for an administrative leave of absence from the university during the current semester; if granted, the student would be withdrawn from all current courses. The student must be in good academic/disciplinary standing. "Extenuating circumstances" include the death of an immediate family member, military deployment, serious documented medical issues, and other such extraordinary situations. Depending on the reason for the leave of absence, supporting documentation may be required.

Merely ceasing to attend classes does not constitute an official leave of absence, academically or financially. Failure to obtain an approved leave of absence will result in the automatic recording of "F" grades for all courses being taken by the student. Students who take a leave of absence from the university after the eighth week of the semester will receive either a "WP" or "WF" from each of their instructors. Leaves of absence will not be granted after the 13th week of the semester. Students intending to return to the university after withdrawing must reapply through the Office of Admissions.

The official date of the leave of absence is the last date of class attendance. This date will be used in determining any refund. A leave of absence may have an impact on financial aid and/or billing charges, especially for students who have received federal Title IV loans.

It is recommended that students considering an administrative leave of absence meet with Campus Student Financial Services (if medically able) to ensure that they understand the responsibilities associated with their federal loans while on an administrative leave of absence. **Leave of absence disputes will not be considered after 30 days from the end of the semester during which the student withdrew.**

All International Students must obtain forms and begin the process in International Student Services (ISS).

Religious Observance

Southern New Hampshire University recognizes the important role that religious holy days can play in the lives of its students. Observance of religious holy days may cause students to be unable to participate whether the class meets face to face or online. Such non-participation, when preceded by proper notification of teachers, will not carry any penalty or sanction. Students are expected to make alternate arrangements with their instructors regarding scheduled tests, assignments due or other course work and activity. Teachers are expected to be supportive of and sensitive to individual religious practices by being willing to work out alternatives to scheduled course work. In all instances, however, excused non-participation does not mean excused from meeting course standards and expectations. Should a dispute occur the usual appeal process will be followed: the program coordinator/department chair, the school dean and finally, the Provost, Senior Vice President of Academic Affairs.

Transfer Among SNHU Colleges

Students in any of Southern New Hampshire University's programs may wish to transfer to the same program, or different, at another one of SNHU's units: COCE – College of Online and Continuing Education (including College for America programs) or UC – University College. Transfer procedures are described in a basic way here, but students are advised to work with their respective academic advising and admissions offices to confirm relevant details. Students may be enrolled only in one SNHU college at a time. Additionally, students must be in "good academic standing," as defined by the Scholastic Standing Policy.

COCE or CfA Student Transferring to the UC

Students currently enrolled in any of the Southern New Hampshire University College of Online and Continuing Education (COCE) or College for America (CfA) programs who wish to enroll in University College must file an Internal Transfer Application with the office of Transfer Admissions. Students will be evaluated on their academic performance in their current programs. Enrollment in a SNHU COCE or CfA program does not guarantee acceptance to a University College program.

UC Student Transferring to COCE

Students currently enrolled in University College undergraduate program who wish to transfer to a COCE program must file an Internal Transfer Application, and it must be filed with the Academic Advising Office on the Manchester Campus.

UC or COCE Student Transferring to CFA Program

Students currently enrolled in a University College (UC), or College of Online and Continuing Education (COCE) undergraduate program, who wish to transfer to a CFA program, must file an Internal Transfer Application with their respective academic advising office. For more details on CfA program eligibility, please review the Admission Requirements, Undergraduate policy.

International Student Transferring to COCE or UC

All international students who wish to begin or change programs must obtain appropriate forms and begin the process in the Office of International Student Services (ISS).

Failure to file an Internal Transfer form with the appropriate office may prevent the student from registering for classes, being billed correctly for tuition and fees, or graduating in a timely manner.

Campus Programs

Undergraduate Internships

SNHU coordinates an extensive internship program that helps students experience a practical work environment related to their academic career interests, while developing highly marketable career skills. Internships are a valuable part of career exploration through which students can receive invaluable training, gain professional experience, and have a better understanding of what is needed to prepare for and succeed in a particular profession.

SNHU encourages students to intern locally, nationally or internationally. Experiential learning activities, such as internships, are the vehicle in which students complement their rigorous academics. SNHU awards credit hours for learning acquired outside the institution if it is an integral part of a program of study. SNHU for-credit internships are supervised by disciplinary faculty. When work experience receives academic credit, it must both be suitably supervised and of sufficient length to be meaningful. The Career & Professional Development Center provides support to students to secure internships and manage the administration of for-credit experiences.

Internships in University College can be scheduled in the following terms: fall, spring and summer. Registrations for internships are to follow the traditional SNHU enrollment policies. Students cannot enroll in for-credit internships after the drop/add period. International students are encouraged to contact the International Student Services department to determine eligibility. Exceptions to the policy are: Culinary Program, MS TEFL and MFA.

For-credit internships are approved by the schools. Students are referred to their faculty advisors to discuss the internship opportunity and make a determination as to whether the experience aligns with their academic program and warrants credit. If the experience is approved, then the Career & Professional Development Center will collect the necessary documentation from the student and employer to finalize the credit request and register the student for the internship course.

Students can achieve completion of an internship ranging from zero (0) to fifteen (15) credits. Traditionally 50 hours of work is tied to one (1) credit; for example, internship hours are awarded as follows: 150 hours for 3 credits, 300 hours for 6 credits, etc. With regard to zero (0) credit internships, students need to be made aware that this would not bring them to full-time status should the student be seeking financial aid.

Student internships will be built by sections with faculty oversight. Internship sections are to be held to a maximum of 20 students per section. Should the section exceed 20 students another section will be built.

Undergraduates Taking Graduate Courses

Students who have completed between 60-90 undergraduate credits and have a 3.0 or higher GPA must apply through their academic advisor to enroll in a 500/600-level graduate course. The student may enroll in the course, provided:

- there is space available in the course.
- the student's academic advisor and dean of the appropriate school agree.
- that the student has met the prerequisites of the course.
- the student would receive undergraduate credits for their academic program for completed graduate work that has been approved as a substitute course in said program.

If the student goes on to enroll in a graduate program at Southern New Hampshire University, graduate credit only will be granted if the student earns grades of "B"/satisfactory or better in the 500/600-level courses; grades will not count again at the graduate level. Approval is limited to a maximum of 12 credits (four three-credit graduate courses).

All graduate courses must be above full-time load in the student's term structure to count for full-time status and financial aid. The graduate course term dates must fall within the student's undergraduate term start and end dates.

Undergraduates Taking Graduate Courses

Undergraduate students who have completed a minimum of 90 program credits* and have earned a minimum cumulative GPA of 3.0 may apply to take graduate courses through their academic advisor. Students may only enroll in a 500 or 600-level graduate course provided following eligibility requirements have been met:

- There is space available in the course.
- The student has met the prerequisites of the course.
- The course has been approved to fulfill program requirements.
- The graduate term dates fall within the undergraduate trimester/semester start and end dates
 - Note: Campus students must maintain a full-time undergraduate course load (12 credits) and will be charged the prevailing graduate level tuition rates when exceeding semester credit limitations.
- The student has submitted a completed copy of the Undergraduate Student Request to Take Graduate Courses form for each course including all necessary approvals. Students may enroll in more than one graduate course per term/semester.

Approval is limited to a maximum of twelve (12) credits. Undergraduate credits will be awarded upon successful completion of the course. If the student goes on to enroll in a graduate program at Southern New Hampshire University graduate credit will only be awarded if the student earned a grade of "B" or better; the course grade earned at the undergraduate level will not apply to the graduate program or appear on the graduate transcript. Students with courses that do not meet the minimum grade requirement will be required to repeat the course upon enrollment in the graduate program.

Online undergraduate Nursing students seeking to enroll in a graduate level course as an undergraduate student must follow the Accelerated Pathway for MSN. Please refer to [RN to BSN Nursing Admission and Academic Requirements](#) policy.

Campus Programs

*Campus students enrolled in Degree in Three programs may apply after having completed a minimum of 60 program credits.

Unearned F

Unearned F Policy (Financial Aid and Military Students)

While Southern New Hampshire University does not measure student participation in courses past day 7 of the term, participation in courses and completion of assignments are two critical components to student success. Students who use financial aid or any type of military benefits and fail all courses in a term will be reviewed for participation. Students who cease participation in graded activities before the midpoint of the term will be classified as receiving an "unearned F" and a recalculation of their Financial Aid and military benefits eligibility will be conducted based on their last date of attendance. The last date of attendance is defined as the last time the student participated in a graded activity within the course. This recalculation may result in a balance owing and could place future financial aid, military benefits funding and registration at risk.

Withdrawal from Class

Students may withdraw from courses at any time during the first 60 percent of the semester with the course grade of "W." The completed withdrawal from class form must contain the signatures of the instructor, the student and the student's advisor. Merely ceasing to attend classes does not constitute an official withdrawal either academically or financially. Withdrawal from class forms may be obtained from Campus Student Financial Services.

Withdrawals after 60 percent of the semester will only be allowed when:

- Withdrawal is student-initiated for conditions beyond the students' control (e.g., illness documented by a physician's letter). The course grade under these conditions will be "W." Documentation must be provided by the student and approved by the appropriate advisor and school dean.
- Instructor-initiated withdrawals are only available for undergraduate day courses. An instructor may initiate a course withdrawal in unusual or extraordinary circumstances, not as a means to prevent low grades. The instructor initiating the withdrawal must assign a course grade of "WP" (withdraw passing) or "WF" (grades failing). Instructor-initiated withdrawals must be approved by the school dean. VPAA/Provost Office approval must be obtained for withdrawals that are initiated on or after the 13th week of the undergraduate day school semester.

In all cases, the date of withdrawal is the date the completed form is received by the Office of the University Registrar. Withdrawal from class does not reduce account charges. Credit hours for courses from which a student withdraws are included in his or her total number of credit hours. Withdrawal from a class may have an impact on financial aid and/or billing charges, especially for students who have received federal Title IV loans. Withdrawal disputes must be submitted in writing within 30 days after the end of the semester during which the student withdrew.

The exception to this policy is in the case of enrollment in SNHU-101 and SNHU-202. No student is allowed to drop or withdraw from SNHU-101 or SNHU-202 except in the case of extenuating circumstances supported by documentation. Students missing the first two sessions of SNHU-101 or SNHU-202 will not be dropped by the instructor. Students seeking to withdraw from either SNHU-101 or SNHU-202 must complete a Student-Initiated Course Withdrawal from SNHU-101/202 form that contains the signatures of their advisor and the coordinator of general education.

Withdrawal from SNHU

University Wide Withdrawal Policy:

Students wishing to withdraw from the institution can do so by completing the [Withdrawal from SNHU form](#), located by logging into the student portal. Students should communicate and work with their academic advisor when completing this process. A course withdrawal form for each class is not required. For students under the age of 18 years, a written parental consent is required.

If the form is inaccessible, due to extenuating circumstances, the academic advisor must be notified in order to begin the withdrawal process. The University reserves the right to withdraw students who fail to meet academic requirements or who, because of misconduct, disrupt the academic process.

If a student fails to submit an official withdrawal form the student will automatically receive a grade of "F" for all courses in which the student is currently enrolled. Students who fail to file an official withdrawal form are responsible for paying the full tuition amount and any associated fees.

For campus students:

- International students wishing to withdraw from the University should begin the process with [International Student Services](#).
- The completed withdrawal form will be processed using the last date of class attendance (as verified by an instructor) as the official withdrawal date, unless students choose to complete the current term, in which case their withdrawal from the university will be processed after final grades have been entered. Withdrawals initiated on or after the 13th week of the undergraduate day school semester will be processed using a last date of attendance as the last day of the current term (unless approved by the Dean of Student Success/VPAA's Office). The determined withdrawal date is used to process a refund per the University [refund policy](#).
- The withdrawal date may impact financial aid and/or billing charges. Undergraduate students who withdraw after the eighth week, but before the thirteenth week of the semester will receive either a "WP" or "WF" from

Campus Programs

each of their instructors.

- **No adjustments to account balances or withdrawal disputes can be considered after 30 days from the end of the semester during which the student has withdrawn.**

For online students:

- The official withdrawal date is the date the form is submitted, unless students choose to complete the current term, in which case their withdrawal from the University will be processed after final grades have been entered. The withdrawal date will be used to determine any tuition refund.
- The withdrawal date may also impact any financial aid and/or billing charges. Students may request to be withdrawn immediately at any point prior to the final week of the current term.
- Withdrawals are not permitted in the final week of the term; any request submitted at this point will be delayed until final grades have been entered.

Financial Aid and Resources

Applying for Financial Aid

Eligibility Requirements:

To be eligible for federal financial aid, including grants, loans, and work-study funds, a student must meet certain requirements:

- Enroll as a degree-seeking student
- A U.S. citizen or an eligible non-citizen
- Not be in default on a federal student loan
- Not owe a refund on a federal student grant or loan
- Register with Selective Service (if you are a male born on or after January 1, 1960, are between the ages of 18 and 26, and not currently in the armed forces)
- Have a high school diploma or equivalent
- Maintain satisfactory academic progress

Dependency Status Criteria

The U.S. Department of Education considers the following students to be independent of their parents for purposes of awarding federal financial aid for the 2020-2021 school year (July 1, 2020 through June 30, 2021):

- Students who were born before January 1, 1997
- Students who are married
- Students who are veterans of the U.S. Armed Forces*
- Students who have children, or will have, if they provide, or will provide, more than half of the support for the child
- Students who have dependents (other than a child or spouse) living with them, if they provide more than half of the support for the dependent
- Students who will be a graduate/professional student in 2020-2021
- Students who are serving on active duty in the armed forces for purposes other than training
- Students who are or were emancipated minors as determined by a court
- Students who are orphans or wards of the court, or were wards of the court as of age 13
- Students who are or were in a legal guardianship as determined by a court
- Students who are or were considered an unaccompanied youth who was homeless on or after May 1, 2019

**Please answer "no" to the dependency status question for veteran status if you (1) have never engaged in active duty in the U.S. armed forces, (2) are currently a Reserve Officers' Training Corps (ROTC) student, cadet, or midshipman at a service academy, (3) are a National Guard or Reserves enlistee activated only for state or training purposes, or (4) were engaged in active duty in the U.S. armed forces but were released under dishonorable conditions.*

As the questions above illustrate, financial independence is not one of the criteria used in determining whether a student is considered dependent or independent. Parental data must be provided on the Free Application for Federal Student Aid (FAFSA) for students who are unable to answer "yes" to one of the listed criteria. Southern New Hampshire University (SNHU) uses the U.S. Department of Education's definition of dependency status for all federal, state, institution, and private financial aid programs. Students should refer to the FAFSA for specific details on each of the above criteria or contact SNHU Student Finance Service's for assistance in determining dependency status.

Prior Bachelor's Degree

Students who possess a bachelor's degree prior to enrollment at the University are not eligible for certain grant programs, including the Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, and state scholarship/grant programs.

Federal Financial Aid Penalties for Drug Convictions

The Higher Education Opportunity Act (HEOA) states that a federal or state drug conviction can disqualify a student for federal financial aid. In accordance with a HEOA provision, a student whose eligibility has been suspended may regain eligibility if the student satisfactorily completes a drug rehabilitation program that is approved by the U.S. Secretary of Education.

Campus Programs

Federal Financial Aid Application

Free Application for Federal Student Aid

All students who would like to be considered for federal financial aid must complete the Free Application for Federal Student Aid (FAFSA) for the appropriate award year. The FAFSA will determine eligibility for need-based aid, such as Pell Grant and Direct Subsidized Loans. In addition, completion of the FAFSA will determine eligibility for non-need based aid, such as Direct Unsubsidized Loans, as well as being necessary to apply for a Federal PLUS Loan. The FAFSA can be completed at fafsa.ed.gov, with the SNHU federal school code of 002580.

FAFSA Follow-Up

C-Flags, Verification, Unusual Enrollment History

In some instances, SNHU is required by federal and state regulations to review the student's FAFSA and confirm the accuracy of the information provided. SNHU reserves the right to verify any data submitted by applicants or the parents of applicants.

After the FAFSA has been signed, the application is run through a series database matches, including but not limited to, Social Security Administration, Selective Service, National Student Loan Data System, and Department of Homeland Security. If the student and/or parent does not successfully pass one of the matches, the student and/or parent may be required to submit additional documentation to the university to verify the accuracy of the data provided on the FAFSA. If additional documentation is required the student will be notified via e-mail of the documentation requirements.

Failure to submit requested documents within thirty (30) days may result in a delay or cancellation of a financial aid award. If during the process, data is found to be incorrect, the data may be corrected and the award revised.

If a student is found to have knowingly submitted falsified or intentionally misleading information, Southern New Hampshire University shall reserve the right to (1) refuse to award financial aid or (2) to cancel all aid that has previously been awarded, with all fraudulent information forwarded to the Office of Inspector General for further investigation.

FAFSA Corrections

Any corrections to a student's FAFSA information will be reported electronically by Southern New Hampshire University to the Central Processing System (the CPS) for processing. When electronic corrections are made, the school will receive a corrected Institutional Student Information Report (ISIR) and the CPS will notify the student of the corrections electronically via a Student Aid Report (SAR).

Duration & Renewal of Aid

The FAFSA becomes available for the new aid year on October 1st. It is the student's responsibility to complete this application each year to meet any applicable deadlines. Students intending to use financial aid in future terms will need to file a FAFSA that corresponds with the appropriate award year.

Awarding Financial Aid

Cost of Attendance

The cost of attendance (COA) is an estimate of the student's educational expenses for the period of enrollment. For the purposes of Southern New Hampshire University (SNHU), the period of enrollment will be one academic year. The COA at SNHU follows along with federal guidelines of what are considered allowable costs and exceptions to the rules. The components of the COA are: tuition, fees, books, miscellaneous expenses, transportation, and room & board. Currently at SNHU, the COA will be based on on-campus enrollment, off campus enrollment, as well as with parent enrollment.

For student's attending less than half-time, the COA cannot include allowances for miscellaneous expenses. In addition, the financial award may not exceed the COA for the academic year.

Expected Family Contribution (EFC)

The Expected Family Contribution (EFC) is a measure of a family's financial strength and is calculated according to a formula established by law. It is an index number that the staff at SNHU will use to determine how much financial aid the student would be eligible for, it is not the amount the student's family are required to pay. The student's taxed and untaxed income, assets, and benefits (such as unemployment or Social Security) are all considered in the formula. Also considered, are family size and the number of family members who will attend college during the year.

Determining Financial Need

The financial need for the student is determined by a simple formula: COA minus EFC equals the student's financial aid. This number is then used by SNHU to determine the amount of need-based financial aid the student is eligible to receive. Need-based financial aid includes Federal Direct Subsidized Loans and Federal Pell Grant, as well as Federal Supplemental Educational Opportunity Grant. As the COA cannot be exceeded for the academic year, the Financial Need also cannot be exceeded within the academic year.

Campus Programs

Financial Aid Award Package

Once the COA, EFC, and Financial Need is determined, the student will receive the notification of a financial aid award package electronically. After the student reviews the package, the award may be reduced or canceled according to request. To complete a request, the student may contact Student Financial Services at Southern New Hampshire University.

Outside Resources

In addition to federal funds in the initial financial aid package, the student may receive additional outside resources to assist with educational expenses. This additional assistance may include, but is not limited to, employer reimbursement, tuition waivers, private scholarships, fellowships, veteran's benefits, or vocational rehabilitation benefits. Any outside resource that is used by the student will need to be reported to the financial aid office and be included in the student's financial aid package. If the student fails to inform the school of the additional funds, the student may be required to repay the school or the government all or part of the need-based financial aid package.

If the student's award with the outside resources exceeds either the COA or need, the student's financial aid package will be adjusted, even if the financial aid has already been disbursed. Should the additional funds result in a change to a student's financial aid status or eligibility, he/she will receive notification of the change.

Use of Aid

Funds listed on financial aid award letters may only be used for educationally related expenses incurred at SNHU for the respective academic year.

Awarding Financial Aid

Cost of Attendance

The cost of attendance (COA) is an estimate of the student's educational expenses for the period of enrollment. For the purposes of Southern New Hampshire University (SNHU), the period of enrollment will be one academic year. The COA at SNHU follows along with federal guidelines of what are considered allowable costs and exceptions to the rules. The components of the COA are: tuition, fees, books, miscellaneous expenses, transportation, and room & board. Currently at SNHU, the COA will be based on on-campus enrollment, off campus enrollment, as well as with parent enrollment.

For student's attending less than half-time, the COA cannot include allowances for miscellaneous expenses. In addition, the financial award may not exceed the COA for the academic year.

Expected Family Contribution (EFC)

The Expected Family Contribution (EFC) is a measure of a family's financial strength and is calculated according to a formula established by law. It is an index number that the staff at SNHU will use to determine how much financial aid the student would be eligible for, it is not the amount the student's family are required to pay. The student's taxed and untaxed income, assets, and benefits (such as unemployment or Social Security) are all considered in the formula. Also considered, are family size and the number of family members who will attend college during the year.

Determining Financial Need

The financial need for the student is determined by a simple formula: COA minus EFC equals the student's financial aid. This number is then used by SNHU to determine the amount of need-based financial aid the student is eligible to receive. Need-based financial aid includes Federal Direct Subsidized Loans and Federal Pell Grant, as well as Federal Supplemental Educational Opportunity Grant. As the COA cannot be exceeded for the academic year, the Financial Need also cannot be exceeded within the academic year.

Financial Aid Award Package

To complete a request, the student may contact Student Financial Services at Southern New Hampshire University.

Outside Resources

In addition to federal funds in the initial financial aid package, the student may receive additional outside resources to assist with educational expenses. This additional assistance may include, but is not limited to, employer

Campus Programs

reimbursement, tuition waivers, private scholarships, fellowships, veteran's benefits, or vocational rehabilitation benefits. Any outside resource that is used by the student will need to be reported to the financial aid office and be included in the student's financial aid package. If the student fails to inform the school of the additional funds, the student may be required to repay the school or the government all or part of the need-based financial aid package.

If the student's award with the outside resources exceeds either the COA or need, the student's financial aid package will be adjusted, even if the financial aid has already been disbursed. Should the additional funds result in a change to a student's financial aid status or eligibility, he/she will receive notification of the change.

Use of Aid

Funds listed on financial aid award letters may only be used for educationally related expenses incurred at SNHU for the respective academic year.

Disbursement of Financial Aid Funds

After confirming enrollment and attendance, SNHU credits all available financial aid funds (excluding Federal Work-Study) to the eligible charges on a student's account. Eligible charges will include: tuition, book voucher (if used), room & board (if on-campus) and fees (if applicable). Once the charges are covered, any remaining financial aid funds will be released to the student in the form of a refund. If subsequent charges occur on the student's account after a refund is processed in a given term, the student will be responsible for these new charges.

Credit Balances and Refund

When financial aid is disbursed and/or payments are made, the funds will be applied to the student's allowable costs. If the amount credited to the account totals more than the billed amount, the additional funds will be refunded to the student.

The university processes refunds to students based on a published refund processing schedule and in a manner that complies with Department of Education requirements for refunding federal financial aid funds. All refunds will be processed through a student's refund preference with BankMobile. Any refunds occurring as a result of fees paid with a credit card will be credited back to the same credit card account.

In the event that non-eligible financial aid funds are disbursed in error, the student agrees to repay the full amount to SNHU. If a mistake was made, whether by the student, SNHU, or another agency, federal regulations require that the mistake be corrected and funds be returned.

Educational Loans

Federal Direct Loans

Federal Direct Loans are fixed-rate student loans for undergraduate and graduate students to help pay for the cost of their education. The lender of the loan will be the U.S. Department of Education.

The Direct Student Loan program offers the following types of loans for students in eligible programs:

- **Direct Subsidized Loan:** Available to eligible undergraduate students who demonstrate financial need. The U.S. Department of Education pays the interest on a Direct Subsidized Loan while the student is in school at least half-time, for the first six months after the student leaves school (referred to as a grace period*), and during a period of deferment (a postponement of loan payments).
- **Direct Unsubsidized Loan:** Available to eligible undergraduate and graduate students. In order to be eligible, the students does not need to demonstrate financial need. Unlike the Direct Subsidized loan, the interest begins accruing once the loan disburses on the student's account. Repayment of the loans begin 6 months after a student is no longer maintaining a minimum enrollment status of half-time.
- **Direct PLUS Loan:** Available to eligible graduate or professional students and parents of undergraduate students to help pay for educational expenses not covered by other financial aid. To be eligible, the student must be enrolled at least half time in an eligible program of study. During the application process, the borrower may request any amount of PLUS funds, but to COA. There currently are not aggregate limits for PLUS loans. A credit check is required for PLUS Loan approvals which reviews credit history. If the potential borrower has an adverse credit history, an endorser option is available. If approved, the borrower(s) must complete PLUS loan counseling prior to receiving the PLUS loan. PLUS loans must be repaid with interest. Repayment of principal and interest begins 30-60 days after the loan is fully disbursed.

**Grace Period: For Direct Subsidized and Unsubsidized loans, the grace period is the period of time after the student graduates, leaves school, or drops below half-time enrollment. During this time, the student is not required to make payments.*

Federal 150% Direct Subsidized Loan Limit

Beginning on July 1, 2013, a new provision was added to the Direct Loan statutory requirements (see HEA section

Campus Programs

455(q)). The provision put in place limits the period of eligibility for a first-time borrower* to receive Direct Subsidized loans only up to 150 percent of the length of the borrower's published educational program. Once the student reaches 150 percent used, the provision also causes the student to lose the interest subsidy on the disbursed Direct Subsidized loans.

Borrowers with existing balances at the time the provision was put in place will not be effected by this provision, only first-time borrowers on or after July 1, 2013 are subject.

**A first time borrower for the purposes of the Subsidized Loan Limit (SULA) is defined as a student who either (1) never received Federal Direct Loans and receives a disbursement after July 1, 2013, or (2) does not have a balance with any Direct Loan holders, returns to school and receives federal funding after July 1, 2013.*

Federal Direct Loan Lifetime Limit

All student types are subject to aggregate lifetime borrowing limits. Please see the chart below:

Academic Career	Maximum Subsidized	Additional Unsubsidized	Combined Subsidized and Unsubsidized
Dependent Undergraduate	\$23,000	\$8,000	\$31,000
Independent Undergraduate	\$23,000	\$34,500	\$57,500
Graduate (Includes UG)	\$65,500*	\$73,000	\$138,500

*As of the 2013-2014 award year, graduate students are no longer eligible to borrow Subsidized Direct Loans.

Private Student Loans

A private student loan is from a private lender that may be used to pay up to COA, less any federal financial aid received. Private loans usually require the applicant to be credit worthy or have a co-signer. Private loans have varying interest rates, fees and repayment options. Repayment of interest (and often principal) generally begins immediately, with some lenders offering deferment options for in-school periods.

Educational Loans

Federal Direct Loans

Federal Direct Loans are fixed-rate student loans for undergraduate and graduate students to help pay for the cost of their education. The lender of the loan will be the U.S. Department of Education.

The Direct Student Loan program offers the following types of loans for students in eligible programs:

Direct Subsidized Loan: Available to eligible undergraduate students who demonstrate financial need. The U.S. Department of Education pays the interest on a Direct Subsidized Loan while the student is in school at least half-time, for the first six months after the student leaves school (referred to as a grace period*), and during a period of deferment (a postponement of loan payments).

Direct Unsubsidized Loan: Available to eligible undergraduate and graduate students. In order to be eligible, the students does not need to demonstrate financial need. Unlike the Direct Subsidized loan, the interest begins accruing once the loan disburses on the student's account. Repayment of the loans begin 6 months after a student is no longer maintaining a minimum enrollment status of half-time.

Direct PLUS Loan: Available to eligible graduate or professional students and parents of undergraduate students to help pay for educational expenses not covered by other financial aid. To be eligible, the student must be enrolled at least half time in an eligible program of study. During the application process, the borrower may request any amount of PLUS funds, but to COA. There currently are not aggregate limits for PLUS loans.

A credit check is required for PLUS Loan approvals which reviews credit history. If the potential borrower has an adverse credit history, an endorser option is available. If approved, the borrower(s) must complete PLUS loan counseling prior to receiving the PLUS loan.

PLUS loans must be repaid with interest. Repayment of principal and interest begins 30-60 days after the loan is fully disbursed.

*Grace Period: For Direct Subsidized and Unsubsidized loans, the grace period is the period of time after the student graduates, leaves school, or drops below half-time enrollment. During this time, the student is not required to make payments.

Federal 150% Direct Subsidized Loan Limit

Beginning on July 1, 2013, a new provision was added to the Direct Loan statutory requirements (see HEA section 455(q)). The provision put in place limits the period of eligibility for a first-time borrower* to receive Direct Subsidized loans only up to 150 percent of the length of the borrower's published educational program. Once the student reaches 150 percent used, the provision also causes the student to lose the interest subsidy on the disbursed Direct

Campus Programs

Subsidized loans.

Borrowers with existing balances at the time the provision was put in place will not be effected by this provision, only first-time borrowers on or after July 1, 2013 are subject.

*A first time borrower for the purposes of the Subsidized Loan Limit (SULA) is defined as a student who either (1) never received Federal Direct Loans and receives a disbursement after July 1, 2013, or (2) does not have a balance with any Direct Loan holders, returns to school and receives federal funding after July 1, 2013.

Federal Direct Loan Lifetime Limit

All student types are subject to aggregate lifetime borrowing limits. Please see the chart below:

Academic Career	Maximum Subsidized	Additional Unsubsidized	Combined Subsidized and Unsubsidized
Dependent Undergraduate	\$23,000	\$8,000	\$31,000
Independent Undergraduate	\$23,000	\$34,500	\$57,500
Graduate (Includes UG	\$65,500*	\$73,000	\$138,500

*As of the 2013-2014 award year, graduate students are no longer eligible to borrow Subsidized Direct Loans.

Private Student Loans

A private student loan is from a private lender that may be used to pay up to COA, less any federal financial aid received. Private loans usually require the applicant to be credit worthy or have a co-signer. Private loans have varying interest rates, fees and repayment options. Repayment of interest (and often principal) generally begins immediately, with some lenders offering deferment options for in-school periods.

Federal Work-Study (FWS)

The Federal Work-Study Program is an employment program funded by the federal government and the University. This program allows students with financial need to receive an hourly wage by working on or off-campus. Work-Study funds are available to students who demonstrate financial need through the completion of the Free Application for Federal Student Aid (FAFSA) and are enrolled in a degree program.

Each fall, Southern New Hampshire University will sponsor a job fair prior to the start of classes in order to help assist students in locating employment through the Work-Study program. It is the responsibility of the student to locate the employment as well as earning funds. The amount of funds earned may vary depending on the position offered.

Typical Federal Work-Study positions on campus are in the library, in department offices, the recreation center and in postal services. Students may also work off campus in community service positions such as the YMCA, Easter Seals, and the Salvation Army.

Federal Work-Study positions and other student employment opportunities are available throughout the year online at www.snhu.edu/jobs.

For further information, please email workstudy@snhu.edu

Financial Aid Enrollment Status Criteria

As mandated by the U.S. Department of Education, for financial aid purposes, only courses that are considered a requirement to complete the program can be included when the financial aid office determines the student's enrollment status. In addition, per regulations, a student may only retake a course one time after previously passing the course, when determining the student's enrollment status.

Students' financial aid eligibility is based on two parts: enrollment status and participation. The student's enrollment status is reviewed at time of disbursement and throughout the given term of enrollment. The student's participation is defined as the submission of a project or discussion, for online forums. The student must participate in any given class in order to receive disbursement. This will be reviewed on a weekly basis up to the end of a term.

College for America Students

As required by federal student aid rules, only competencies required for a student's degree can be used in determining undergraduate enrollment status for financial aid purposes. In addition, a repetition of a previously passed competency may only be considered once when determining enrollment status for financial aid purposes.

Grants

Grants

Need Based Grants

Campus Programs

Southern New Hampshire University grants are based on demonstrated financial need and are available for full-time undergraduate day students. Awards range from \$400 to \$14,400 annually.

Sibling Grant

The Southern New Hampshire University Sibling Grant consists of \$2,500 per academic year when two undergraduate day students attend Southern New Hampshire University concurrently on a full-time basis from one family. The \$2,500 is disbursed evenly between both students, equaling \$1,250 per year. The Sibling Grant is only available for undergraduate day students at SNHU.

Federal Grants

Pell Grants

Federal Pell Grants are awarded on a sliding scale up to \$6,345 per year to students with exceptional financial need. Applicants must be enrolled in a degree program and have not already have obtained a bachelor's degree. Student eligibility and grant amounts are determined by the U.S. Department of Education but vary with enrollment status and program of study.

Federal Pell Grant Lifetime limit: An eligible Federal Pell Grant recipient has a lifetime limit of 12 full-time semesters or six full years of eligibility. This federal policy is retroactive to whenever a student first received a Federal Pell grant and includes payments received at colleges or universities that the student attended prior to SNHU.

Federal Supplemental Educational Opportunity Grant (FSEOG)

The FSEOG is a campus-based federal grant program with awards ranging from \$100 to \$1,000 per year, depending on demonstrated need and availability of funds. Grants are awarded to students with exceptional financial need, and typically to students receiving Federal Pell Grants.

Iraq and Afghanistan Service Grant

A student may be eligible to receive the Iraq and Afghanistan Service Grant if: they are not eligible for a Pell Grant, their parent or guardian was a member of the U.S. Armed Forces and died as a result of service performed in Iraq or Afghanistan after September 11, 2001. Additional, eligibility requires the student to be under 24 years old, or enrolled in college at least half-time at the time of the parent or guardian's death.

Children of Fallen Heroes Scholarship

A student may be eligible to receive the Children of Fallen Heroes Scholarship if the following terms are met: the student is eligible for Pell Grant and the student must have been less than 24 years of age or enrolled at an institute of higher education at the time of his or her parent's or guardian's death. The student becomes eligible if the parent or guardian died in the line of duty as a result of service while performing as a public safety officer or military service person. Unlike the Iraq and Afghanistan Service Grant, a student is not eligible for this scholarship if the student is not Pell Grant eligible.

State Grants and UNIQUE

State grant funding is received by SNHU from various states to assist students with the cost of education. Students should contact their home state agencies to see if they qualify for state assistance at Southern New Hampshire University.

NH Residents: The state of New Hampshire does not have a state grant program. However, students may qualify for the UNIQUE program. Eligible New Hampshire students will be automatically notified on their award letter if they qualify.

Loan Counseling and Federal Student Loan Repayment Options

Entrance Loan Counseling

Federal law requires that for any students who have not previously received a subsidized or unsubsidized loan (or PLUS Loan) to complete Entrance Loan Counseling. The purpose of completing this process is to gain a greater understanding of your rights and responsibilities in borrowing loans through the Direct Loan program. While completing entrance counseling, the student will learn about what a Direct Loan is, as well as how the loan process works, as well as how to manage educational expenses, other financial resources, and what repayment programs are available. Entrance Loan Counseling can be completed online at studentloans.gov.

Financial Awareness Counseling

Unlike Entrance Loan Counseling, Financial Awareness Counseling is not a requirement by federal law, however SNHU encourages all students to complete Awareness Counseling routinely in order to stay up to date with Direct Loan information. This counseling includes topics such as understanding your loans, managing spending, repayment plans, avoiding default, and how to make finances a priority. Financial Awareness Counseling can be completed online at studentloans.gov.

Exit Loan Counseling Requirements

Similar to Entrance Loan Counseling, Exit Loan Counseling is a federal requirement of all students who received

Campus Programs

subsidized, unsubsidized or PLUS loans under the Direct Loan Program or the Federal Family Education Loan (FFEL) Program to complete once the student graduates, leaves school, or drops below half-time enrollment. As part of the Exit Loan requirements, student will be reminded of their obligations to repay, along with other information on deferment, forbearance, avoiding default, as well as how to make finances a priority.

Direct Loan Exit Counseling:

Borrowers of Federal Direct or Graduate PLUS loan can complete the online Exit Loan Counseling requirement at studentloans.gov.

Perkins Loan Exit Counseling:

Borrowers of Federal Perkins Loan will be contacted by their Perkins Loan Servicer, ECSI, with additional directions on how to complete Exit Loan Counseling.

Federal Direct Student Loan Repayment Options

Loan Repayment Responsibility

It is the responsibility of the student borrower to repay student loans. This includes if financial circumstances become difficult, if the student did not receive the education or job expected, or if the education was not completed. At SNHU, there are many comprehensive resources available to help students learn about repayment options as well as how to manage your finances with the student's respective economic condition.

Campus Programs

Prepayment of Student Loans

There are no penalties to paying on student loans prior to repayment or making larger monthly payments than is required. By doing this, the student will reduce the total interest applied to the loans and will pay less over the repayment time period.

National Student Loan Data System (NSLDS)

The National Student Loan Data System (NSLDS) is the U.S. Department of Education's (ED's) central database for student aid. NSLDS receives data from schools, guaranty agencies, the Direct Loan program, and other Department of ED programs. The student access section of NSLDS will offer the student a centralized and integrated view of Direct Student Loans and grants. This will allow the students to access and inquire information regarding their loans and/or grant data. Students may access their financial aid history at nslds.ed.gov. It will be necessary to have your FSA ID in order to access the site.

Loan Servicer

A loan servicer is a company that handles the billing and other services on a student's loan(s). Loans are assigned to a loan servicer by the U.S. Department of Education after the entire loan amount has disbursed (paid out). Once a loan servicer has been assigned, the company will work with the student to find appropriate repayment plans and to review the loan consolidation if necessary. This servicer will serve as a main contact point for the student when questions arise regarding student loan accounts. It is also the responsibility of the student to update the loan servicer at any time during the repayment period if circumstances change. Some circumstances may be: financial difficulty, address updates, and name update. Students can view their loan servicer on the National Student Loan Data System (NSLDS) at [NSLDS.ed.gov](https://nslds.ed.gov).

Federal Student Aid Repayment Estimator

In order to help students review and compare loan repayment options, SNHU encourages all students to use the Federal Student Aid Repayment Estimator in order to see what options will fit for their financial circumstances. The Federal Student Aid Repayment Estimator will allow students to make use of an interactive online tool to look through the above repayment options. It can be found online at: www.studentaid.gov/repayment-estimator.

Deferment

A deferment is a period during which payments of principal are postponed. No interest accrues on either Direct Subsidized or Perkins loans. Interest is charged on Direct Unsubsidized loans and may be paid or allowed to accrue and capitalize. Borrowers must meet specific eligibility criteria and request the deferment from their lender(s).

Forbearance

Forbearance is defined as a period in which your monthly loan payments are temporarily suspended or reduced. It is important that the student works hand in hand with their lender in order to be granted if the student is unable to make loan payments due to certain types of financial hardships. During the time of forbearance, principal payments are postponed but interest will still continue to accrue.

Visit <https://studentaid.ed.gov/sa/repay-loans> to learn more about the payment plans, payment deferment, and payment forbearance options that are available to you.

Military Benefits

Active Duty Military

First time students using tuition assistance must present a tuition assistance form prior to registration from the military branch in which they are enlisted.

Continuing students may enroll in successive terms without making initial payments but must submit tuition assistance forms prior to the term start to allow direct billing and payment from the military. Any portion of the tuition cost not covered must be paid prior to term start. If a tuition assistance form is not provided, your account will be placed on financial hold. This will prevent future registration and you will be responsible for the unpaid balance.

Veterans' Benefits

Southern New Hampshire University is approved for the education of veterans and the dependents of veterans. Questions regarding benefits for veterans should be directed to the Military Financial and Benefits Services Office.

Campus Programs

Each new veteran should submit:

1. an application for admission
2. a registration form for the next term
3. an official high school transcript or an official copy of GED test scores
4. all copies of official university transcripts, if any
5. a copy of their certificate of eligibility and any service school data
6. the necessary Veterans Administration paperwork

Veterans enrolling under the G.I. Bill® for the first time may experience a delay of up to two months before they receive their first checks. Veterans should contact the Veterans Affairs Office at 1.888.442.4551 if no payment has been received by the seventh week of a term.

If a veteran student is transferring directly from another school where he or she had been using VA benefits, the student should ensure that the other school promptly notifies the VA of his or her effective date of termination. The student is also required to file Form 22-1995 with the Veteran Affairs Office.

Students requesting Veterans' Educational Assistance are required to have all previous postsecondary educational experience evaluated for possible transfer credits in order to be eligible for benefits. Students must notify the registrar of any past university credits that are transferable to Southern New Hampshire University.

New veteran students should matriculate immediately and select their degree programs. Because of VA regulations pertaining to certifications, a non-matriculated student will not be certified for educational benefits after two terms of attendance. Veteran students who take courses that are not applicable to or not required for their chosen degrees will not be certified by the VA for those courses. In order to maintain full-time status, veterans may take courses outside their majors only in the last term before graduating.

The VA requires strict compliance with a number of other regulations, including maintenance of satisfactory academic progress and notification of any status changes, such as withdrawal from a course. It is the ~~veteran's~~ VA benefit recipient's responsibility to be aware of all VA regulations that affect his or her educational program.

Veteran Benefits Transition Act of 2018

Title 38 United States Code Section 3679(e) School Compliance

NOTE: A ***Covered Individual*** is any individual who is entitled to educational assistance under Chapter 31, Vocational Rehabilitation and Employment, or Chapter 33, Post-9/11 GI Bill® benefits.

Any covered individual may attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility for entitlement to educational assistance under Chapter 31 or 33 (a "certificate of eligibility" can also include a "Statement of Benefits" obtained from the Department of Veterans Affairs' (VA) website - eBenefits, or a VA 28-1905 form for Chapter 31 authorization purposes) and ending on the earlier of the following dates:

1. The date on which payment from VA is made to the institution.
2. 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility.

Southern New Hampshire University will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual's inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from VA under Chapter 31 or 33.

In addition any covered individual will be required to provide the following:

- A certificate of eligibility for entitlement to Chapter 33 educational assistance as soon as it is available but no later than the last day of the second term of enrollment.
- Any additional information necessary to the proper certification of enrollment by Southern New Hampshire University.
- Any covered individual will be responsible for the amount that is the difference between the amount of the student's financial obligation and the amount of the VA education benefit disbursement.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by the VA is available at the official U.S. government website at <http://www.benefits.va.gov/gibill>

Return of Title IV Funds

Return of Title IV funds requirements apply to a Title IV grant and/or loan recipient or eligible recipient who withdraws or ceases attendance from Southern New Hampshire University (SNHU) before completing the payment period.

The payment period is the academic period established for which financial aid is awarded and disbursed. This may not always align with the registration and billing period for a program. Students are encourage to learn and understand their program's payment period definition.

- SNHU will perform a Return to Title IV calculation and notify the student of any Federal Student Aid (FSA) fund

Campus Programs

return within 30 days of the date of withdrawal or the last date of attendance.

- SNHU has 45 days from the date of determination that the student withdrew to return all unearned FSA funds for which we are responsible for.

SNHU divides the number of days attended by the number of days in the period, excluding breaks of five days or more, and days on an approved leave of absence (applicable to College for America only). Once this calculation is completed, it will show the percent of earned aid. However, if the student has earned greater than 60% of the payment period, they are considered to be 100% earned.

The percent earned multiplied by the total FSA for the payment period is the amount the student earned based upon his or her withdrawal date or last date of attendance. If this amount is greater than what was actually disbursed, then SNHU will offer the student a post-withdrawal disbursement, provided the funds meet the conditions for a late disbursement. If the amount that was actually disbursed is greater than the amount earned, the excess is considered unearned FSA.

SNHU will return a portion of any unearned FSA based upon the student's institutional charges for the payment period. Institutional charges may include tuition, book vouchers, and institutional housing and meal plans. The total amount of institutional charges is multiplied by the percent earned (100% minus the percent earned) to determine the unearned amount of institutional charges. SNHU will return the lesser of the unearned institutional charges or the total amount unearned.

Return of Funds

SNHU will return FSA to the programs from which the student received aid during the payment period in the following order, up to the net amount disbursed from each source:

1. Direct Unsubsidized Loan
2. Direct Subsidized Loan
3. Direct PLUS Loan
4. Federal Pell Grant *
5. Federal Supplemental Education Opportunity Grant (FSEOG)*
6. Iraq and Afghanistan Service Grant*
7. Federal Work Studies (FWS) funds are not included in the calculation.

*There is a 50% grant protection allowance for the student built into the Return to Title IV calculation. Students are also not required to return unearned funds of \$50 or less for Title IV grant programs.

Students are responsible for immediate payment on account balances that are a result of a Return to Title IV calculation.

Within the Return to Title IV calculation, there is also an amount of unearned Title IV aid due from the student.

- Title IV grant funds are typically repaid by SNHU and the student is responsible for payment to the University. However, SNHU can report a grant amount due from the student as an overpayment to the Department of Education. SNHU will waive any grant repayment and will not report an overpayment for any affected individual covered by the HEROES Act.
- Direct Loans are to be repaid in accordance with the terms and conditions outlined in the student's signed Master Promissory Note (MPN).

Post-Withdrawal Disbursement

There may be an instance of a student who has aid returned due to the result of a Return to Title IV calculation but may have undisbursed aid. In this case, the student must decide if they would like the post-withdrawal disbursement of aid applied to their account. Post Withdrawal Disbursements fall into two categories when it comes to authorization: grants do not require authorization, while Direct Loan funds require authorization.

Student Financial Services will notify student in writing if the student is eligible for any Direct Loan post-withdrawal disbursement eligibility. In order to receive the post-withdrawal disbursement, the student must sign and return the authorization letter within fourteen (14) days of the date of the notice. The Direct Loans are to be repaid in accordance with the terms and conditions outlined in the student's signed Master Promissory Note (MPN).

Programs Offered in Modules

Campus Programs

At SNHU, there are some programs that are 'offered in modules.' According to the Department of Education, if a program is 'offered in modules,' it means that the course(s) do not span the entire length of the payment period or period of enrollment. For programs that are offered within modules, the payment period would be considered two modules within one trimester. A student is considered to have withdrawn for Title IV purposes if the student ceases attendance at any point prior to completing the payment period.

A student will have their Return to Title IV calculation 'undone' if the student ceases attendance or graduates during a payment period, then returns during the same payment period. This process will restore the FSA funds to the amount that the student was originally scheduled to receive. This process is only applicable to programs that are offered by the University where the student has the ability to stop attendance or graduate during a payment period.

Return to Title IV Calculation Example

A term start date is September 7 and the end date is December 23. There is a 5 day break for Thanksgiving. The total days for the term is 103 days. The student withdraws on October 2 which is day 26 of the term. The percentage of earned aid would be 25.2% (26 days/103 days) and the unearned aid percentage is 74.8%.

- If the student received \$5,500 in Title IV aid, then the student earned \$1,386 in Title IV aid and \$4,114 is the unearned amount.
- If institutional charges are \$6,000, then the amount of earned charges would be \$1,512 and the unearned charges would be \$4,488.
- SNHU is responsible for returning the lesser of the unearned institutional charges or the total amount of unearned Title IV aid, so SNHU would return \$4,114 in this example. The student is responsible for the immediate payment of the balance on the account.

Return of Title IV Fund Requirements

Return of Title IV funds requirements do apply to a student who:

- Officially withdraws during a payment period; or
- Unofficially withdraws during a payment period (student stops attending without providing notification to the university); or
- Ceases attendance during a payment period; or
- Graduates during a payment period.

Return of Title IV funds requirements do not apply to a student who:

- Withdraws from some classes but remains enrolled in other courses during the same payment period at Southern New Hampshire University; or
- Never attended any classes, or for whom SNHU cannot document attendance in at least one class for the payment period or period of enrollment. If the student never attended any classes or SNHU cannot document the student's attendance in at least one class, the student did not establish eligibility for Title IV aid for the period and all funds must be returned.

Scholarship Opportunities

Academic Scholarships

Presidential Scholarship

Students selected for a Presidential Scholarship will be notified at the time of admission and may receive additional types of financial assistance based on financial need. Individual scholarship amounts vary and are awarded based on a cumulative grade point average (GPA) of a 3.5 or higher (on a 4.0 scale). The Presidential Scholarship is renewable based on the maintenance of a minimum 3.0 cumulative grade point average. Failure to maintain the required GPA will result in the loss of scholarship funds.

Quill Scholarship

Students selected for a Quill Scholarship will be notified at the time admission and may receive additional types of financial assistance based on financial need. Individual scholarship amounts vary and are awarded based on a cumulative grade point average between 3.0-3.49 (on a 4.0 scale). These scholarships are renewable each year based on the maintenance of a 2.5 cumulative grade- point average (GPA). Failure to maintain the required GPA will result in the loss of scholarship funds.

Penmen Scholarship

Students selected for a Penmen Scholarship will be notified at the time of admission and may receive additional types of financial assistance based on financial need. Scholarship amounts vary and are awarded based on a cumulative grade-point average (GPA) between 2.5-2.99 (on a 4.0 scale). These scholarships are renewable each year based on the maintenance of a 2.0 college grade-point average (GPA). Failure to maintain the required GPA will result in the loss of scholarship funds.

Campus Programs

Additional Scholarships

Academy of Finance Scholarship

The University awards annual \$1,000 scholarships to students who submit a certificate of completion from the Academy of Finance as a part of their application.

Alumni Family Scholarship

The Alumni Family Scholarship, in the amount of \$1,000 per year, is awarded to students whose parent (biological or step), sibling or grandparent graduated from the university with any associate, bachelor's or master's degree program. The student must be enrolled in the full-time undergraduate day program.

DECA Scholarship

The Office of Admission will award a limited number of \$1,000 scholarships to DECA participants. The DECA advisor must submit a letter of recommendation to demonstrate proof of participation. Students must be enrolled in the full-time undergraduate day program to be eligible. Additionally, SNHU sponsors several scholarships at the state leadership conference each spring. SNHU honors the highest single scholarship amount that a student has received through participation in DECA. Students must provide a copy of their scholarship certificate to the Office of Student Financial Services.

Freshman Articulation Scholarship

SNHU continues to establish and renew articulation scholarship agreements with select New Hampshire high schools. Qualified seniors with a minimum cumulative grade point average of a 2.5 (on a 4.0 scale) from partner high schools may receive an additional \$3,000 admission articulation scholarship. Seniors must also submit a completed application prior to the Feb. 1 deadline for this scholarship program. Information regarding the specifics of this program can be obtained by contacting the Office of Admission at 603-645-9611.

Future Business Leaders of America (FBLA) Scholarship

The Office of Admission will award a limited number of \$1,000 scholarships to FBLA participants. The FBLA advisor must submit a letter of recommendation to demonstrate proof of participation. Students must be enrolled in the full-time undergraduate day program to be eligible. Additionally, SNHU sponsors several scholarships at the state leadership conference each spring. SNHU honors the highest single scholarship amount that a student has received through participation in FBLA. Students must provide a copy of their scholarship certificate to Student Financial Services.

Phi Theta Kappa Transfer Scholarship

An unlimited number of \$2,000 scholarships for full-time undergraduate day students are awarded to Phi Theta Kappa members. Online students are eligible for a 10% discount on tuition rates. A 3.0 cumulative grade point average of all college work is required for the scholarship to be renewed. Failure to maintain the required GPA will result in the permanent loss of scholarship funds. This scholarship may be combined with other academic scholarships that a student may receive from SNHU. The PTK Scholarship cannot be combined with other college honor program scholarships.

Kappa Beta Delta Transfer Scholarship

An unlimited number of \$2,000 scholarships for full-time undergraduate day students are awarded to Kappa Beta Delta Business Honors Society members. A 3.0 cumulative grade point average of all college work is required for the scholarship to be renewed. Failure to maintain the required GPA will result in the permanent loss of scholarship funds. This scholarship may be combined with other academic scholarships that a student may receive from SNHU. The KBD Scholarship cannot be combined with other college honors program scholarships.

Honors Program Scholarship

SNHU awards a \$2,000 scholarship to students accepted into either the University Honors Program or the Bradley Honors Program in Business Administration. The scholarship renews annually provided the student stays enrolled in the program.

Campus Programs

Housing Scholarship

The Housing Scholarship is awarded to new full-time undergraduate day students who qualify with strong academics and choose to reside on campus. This scholarship is renewable based on the maintenance of resident status and a 2.0 cumulative grade point average.

Sibling Grant

The SNHU Sibling Grant consists of a total of \$2,500 annually for a family with two or more dependent undergraduate siblings concurrently attending for the full academic year in any of the full-time day programs. The amount of the scholarship will be split between each sibling.

Women's Faculty Scholarship

The Southern New Hampshire University (SNHU) Women's Faculty Scholarship was created in 1990 by the women faculty of SNHU (then New Hampshire College). The scholarship acknowledges and supports students who demonstrate an ongoing commitment to human and environmental rights, economic justice, gender equity and community service. Each year SNHU Women's Faculty Scholarships will be awarded to those University College (on-campus) and COCE Manchester Center applicants who best represent those values.

Named and Endowed Scholarships

John P. Fleming Memorial Scholarship

Established in memory of John P. Fleming, a former SNHU faculty member, this scholarship supports undergraduate students majoring in the programs traditionally identifies as the Liberal Arts.

Liberal Arts Scholarship

Awards will be made to undergraduate students majoring in the programs traditionally identified as the Liberal Arts who have maintained a GPA of 3.3 or higher, using standard need and academic criteria.

James D. Walter Memorial Scholarship

Established in memory of James D. Walter, a long time professor of Sociology at SNHU, this scholarship supports full-time undergraduate students majoring in a liberal arts discipline, with preference given to sociology majors.

Kimon and Anne Zachos Scholarship

Awards will be made to full-time undergraduate day students majoring in a liberal arts discipline. The scholarship will primarily be based on financial need.

Dr. Marty J. Bradley 3 Year Business Honors Scholarship

This scholarship was created in memory of Marty J. Bradley, a former SNHU professor and the first 3 Year Business Honors Program Director. This scholarship will be awarded to full-time students entering their second or third year in the 3 Year Business Honors program. To be eligible, students must have a minimum GPA of 3.0, and be highly involved in university life and activities. Priority is given to students who are making significant contributions to the 3 Year Honors Program, and who demonstrate financial need.

Hawaux Foundation Scholarship

This scholarship supports students enrolled in the traditional full-time undergraduate day program. It will be awarded to rising seniors in the Sports Management Program with a minimum GPA of 2.7. The recipient must demonstrate financial need.

Economic/Finance Scholarship Fund

This scholarship supports students enrolled in the Economics/Finance or related programs. Applicants must have a minimum GPA of 3.0

Campus Programs

Frank & Eleanor Barnes Alumni Scholarship

Established in 1979 in honor of Frank and Eleanor Barnes, former Southern New Hampshire University information technology professors, this scholarship is available to assist students majoring in information technology or accounting/information systems and is based on need and academic criteria.

George Teloian Scholarship

George Teloian, professor emeritus of accounting, has made provisions for an endowment fund in his name. Scholarships are awarded to juniors or seniors majoring in accounting. Awards are based on academic achievement in the accounting major, overall record, excellence in involvement in university life and activities and financial need.

Henry W. Bloch Scholarship

This scholarship is awarded to full time undergraduate students who are enrolled in their junior or senior year at Southern New Hampshire University, are academically qualified students in a business major and have demonstrated financial need. Priority is given to students who are highly involved in college life and activities.

Ronald L. Woodward Memorial Scholarship

The Ronald L. Woodward Memorial Scholarship was created in honor of a former Southern New Hampshire University student and Rochester, N.Y. native by the Southern New Hampshire University Alumni Association. Students whose homes are located in Upstate New York shall be given first priority. Preference will be given to students majoring in accounting, accounting/information systems, information technology and business administration, based on need.

Scott Caswell Memorial Scholarship

After his death in 1987, this fund was created by friends of Scott Caswell to benefit juniors or seniors who are enrolled in computer-related majors. Recipients must be residents of New Hampshire and have a minimum grade point average of 3.0

Tony Lambert Scholarship Fund

The Tony Lambert Memorial Fund was established by the Lambert family to support retailing and management majors. Awarded to juniors based on need and academic criteria.

William Trueheart Scholarship

Established in honor of former SNHU professor, William Trueheart, this scholarship fund is offered to support information technology majors with financial need. Preference is given to juniors or seniors with a GPA of 3.3 or better.

Hospitality Scholarship Fund

Scholarships are awarded to students majoring in Culinary Arts or Hospitality Management who show financial need.

Ernest Lamundo/Labatt USA Scholarship

This scholarship was established by Labatt USA in honor of longtime employee, Ernest Lamundo. It supports students studying in a Hospitality program with a minimum of a 3.0 GPA and financial need. Preference is given to juniors and seniors in the food and beverage program, or with an interest in pursuing a career in the food and beverage industry.

Hector Boiardi Scholarship

This fund was established in memory of Hector Boiardi to provide scholarships to students with financial need who have shown a real interest in culinary studies.

Christine Zimmermann Memorial Scholarship Fund

Established in memory of a former Southern New Hampshire University employee, Christine Zimmermann, this scholarship supports students who possess a disability as determined by the Office of Disability Services, be enrolled

Campus Programs

full-time in the undergraduate program and have a GPA of 2.5 or higher.

Dow Scholarship

This fund was established from the Franconia College Endowment to provide scholarships with preference first to students who reside in the towns of Franconia, Sugar Hill Easton, Bethlehem, Littleton, or Lisbon and second to students who reside in Grafton and Coos Counties.

Educational Continuum Scholarship

This fund was established by the Southern New Hampshire University Educational Continuum. This scholarship is awarded to qualified students from Manchester and the surrounding area based on financial need and academic merit.

Fisher Family Scholarship

The Fisher family established this scholarship fund to be awarded to students who have shown a commitment to the academic support services of the University. Awards are based on a student's commitment to the improvement of the skills, knowledge and competencies needed to successfully complete their collegiate education as demonstrated by continuous improvement of their academic performance over several semesters. Priority is given to tutors and mentors.

Gertrude C. Shapiro Scholarship

Established as a gift to the university by former New Hampshire College President, Gertrude C. Shapiro, this scholarship assists women from the state of Maine as they pursue full-time undergraduate day studies at Southern New Hampshire University. It is based on financial need and academic criteria.

John & Betty Miles Scholarship

The principal requirement for candidates to be eligible for the scholarships will be the inability to afford the total tuition after available financial aid. An additional requirement will be a history of a serious learning attitude and achievement (grades, projects, etc.). Students eligible for scholarships will be U.S. citizens enrolled in the undergraduate school. Preference of consideration will be given to students who have graduated from a Christian High School or were active in a Christian Church as evidenced by a letter of recommendation from his/her minister of the church. In a year when there are no deserving needy students fitting these specific guidelines the awards may be presented to other U.S. students enrolled in the undergraduate program.

Kappa Chi Scholarship

The Southern New Hampshire University Alumni Association and the Kappa Delta Phi National Affiliated Sorority, Kappa Chi Chapter have raised money to support this scholarship.

Kappa Delta Phi Scholarship

The scholarship supports needy and deserving students at Southern New Hampshire University.

Kappa Sigma Scholarship

This scholarship supports needy and deserving students at Southern New Hampshire University.

Michael DeBlasi Scholarship Fund

This scholarship supports full-time undergraduate day students with a minimum GPA of 3.0 and necessary financial need.

Phi Delta Psi Scholarship

The scholarship supports needy and deserving students at Southern New Hampshire University.

Campus Programs

The Richard and Joanne Gustafson Scholarship Fund

This scholarship will be awarded to a student who has demonstrated an active engagement in campus life, combined with practical application of their degree program. The scholarship will be a balance of need and academic performance. Preference will be given to a student who is a legal resident of New Hampshire.

Student Ambassador Scholarship

This fund, created by the Student Ambassadors at SNHU, is selected by a committee of the Student Ambassadors to deserving students who possess a cumulative grade point average of 3.0 or better, have demonstrated financial need, and have shown outstanding service to the University community.

The Athletic Scholarship Fund

This scholarship supports student-athletes who have sophomore, junior, or senior standing. Students must possess the appropriate athletic skills and meet the current NCAA and institutional eligibility standards.

Tremblay/Eldridge Scholarship Fund

This scholarship fund supports students and student athletes enrolled in full-time undergraduate or graduate programs.

William S. Green Scholarship

This fund was established in honor of William S. Green, charter member of the Southern New Hampshire University Board of Trustees and Chancellor Emeritus. Scholarships from this fund are designated for juniors or seniors who have maintained cumulative grade-point averages of 3.0 or higher and have conducted themselves in a manner that has both served and brought credit to the university. Financial need is also a factor in determining recipients of this scholarship.

Women Associates Scholarship

This scholarship is awarded to female undergraduate students who are enrolled in their junior or senior year at Southern New Hampshire University and have demonstrated financial need. Awards are made based on academic achievement and excellence in involvement in university life and activities.

Timothy Russell Travel/Study Scholarship

This scholarship supports students who to travel to and from their internship location. Students must have a minimum of 3.0 GPA majoring in Hospitality Administration, Hotel Management, Travel and Tourism, Restaurant Management, or the Culinary Arts, and must qualify for credit bearing internships outside of New England, either nationally or internationally.

The Edward S. Wolak Scholarship

This fund is established in honor of Edward S. Wolak, SNHU Trustee. Scholarships from this fund are designated for students who are enrolled fulltime in the University College division and at least in their second year of study with a minimum GPA of 2.0. Preferences will be given to students who are present or former members of the Boys and Girls Club or have worked at least one year in a quick service restaurant.

Charles and Barbara Bickford International Scholarship

The scholarship shall be awarded to graduate or undergraduate international student(s) studying on the Manchester campus.

Preference will be given to students with demonstrated financial need in the following order: students from Vietnam or Cambodia, students from Southeast Asia or China, then lastly from other foreign countries.

Veterans Scholarship

Campus Programs

This scholarship, founded by alumni who are veterans of the Vietnam War, supports current students who are veterans, the dependents of veterans, or actively serving in the military. Awards are based on need and academic criteria.

Edward Nassar Veterans Memorial Scholarship

In memory of Edward Nassar, a former student at Southern New Hampshire University, the Southern New Hampshire University Alumni Association has created a scholarship fund designed to provide assistance to deserving, needy Southern New Hampshire University students. Preference is given to veterans of the armed forces and/or their dependents. Candidates are required to submit a letter of consideration. A GPA of 2.8 or higher is required, awarded based on financial need and academic standing.

Li Xu Scholarship Fund

This fund was established in memory of SNHU student Li Xu (aka Oscar). This scholarship is awarded to International and U.S. undergraduate or graduate students who demonstrate the strong giving and sharing spirit of Li Xu by showing their commitment to the needs of new students. Scholarship applicants should demonstrate interest in helping new students understand the academic culture of the University and social culture of New Hampshire in an effort to assist them in adjusting to the University.

School of Business Scholarship Fund

The Southern New Hampshire University Alumni Association and the School of Business have raised money to support this scholarship program. It provides scholarships to School of Business.

School of Business Faculty Scholarship

This scholarship was created by the School of Business Faculty and is intended for full time undergraduate or graduate business major students on the Manchester Campus. Undergraduate students must have completed eight courses with a minimum GPA of 3.0. Graduate students must have completed two academic terms and two courses with a minimum GPA of 3.5. The objective of the scholarship is to provide financial assistance to students who are projected to have a positive influence in their communities and on the School of Business after graduation.

Finlay Family Scholarship

Established by Southern New Hampshire University alumnus, Robert J. Finlay, this scholarship supports New Hampshire residents enrolled in a graduate or undergraduate School of Business major. Preference will be given to full-time students who display an entrepreneurial spirit and can show financial need.

Alumni Leadership Scholarship

Created by the Alumni Board of Directors, this scholarship supports students who have completed at least two terms with a minimum GPA of 3.0. Recipients will have demonstrated leadership skills in the SNHU community and be actively engaged in student life.

The Walter Zimmermann Scholarship

Established by former Southern New Hampshire University faculty, Walter Zimmermann. This scholarship supports students who are enrolled full-time in the University College division with a declared major of Psychology. Students must be of junior or senior status and in good academic standing. Preferences will be given to students who are making positive contributions to the psychology department and have demonstrated financial need.

Standards for Satisfactory Academic Progress (SAP)

In order to remain eligible for FSA funds, students must make Satisfactory Academic Progress (SAP) by meeting both a qualitative and quantitative standard as defined by this policy.

Qualitative Standard:

Cumulative GPA is the qualitative measure of SAP, meaning that it looks at the quality of the grades that each student earns in their courses.

- Students enrolled in undergraduate degree programs must maintain a minimum cumulative grade point

Campus Programs

average (GPA) of 2.0 on a 4.0 scale.

- Students enrolled in graduate degree programs must maintain a minimum cumulative GPA of 3.0 on a 4.0 scale.

Quantitative Standard:

A student must have successfully completed at least 67% of all the credits he or she has attempted at Southern New Hampshire University during the entire period of enrollment.

- Total credits earned divided by total credits attempted equals the percentage.

Credit Hour Completion (PACE):

As a credit hour school, each academic program is defined by a set number of credits required for completion. In order to complete the program within the maximum timeframe, the student must complete the program within 150% of the published credits.

- Associate degree candidates may attempt a maximum of 90 credits.
- Bachelor degree candidates may attempt a maximum of 180 credits.
- Graduate degree candidates may attempt a maximum of eight years of study in a specific graduate program.
- With the exception of remedial and non-degree courses, all grades earned will count toward cumulative Grade Point Average (GPA).
- The number of credit hours a student may attempt cannot exceed the maximum number of credit hours allowed in his/her program of study, less the number of applicable transfer credits accepted from other institutions.
- All credits attempted will count toward the maximum qualitative timeframe except for remedial and non-degree courses.
- SNHU will perform continual reviews of the student's progress toward successful program** completion. For example, if a SAP review shows that the student who is at 110% of max timeframe and cannot complete his/her program within 180 credits, all federal financial aid must stop.

*For the purposes of determining SAP, calculating Grade Point Average (GPA) will follow the method used by SNHU to calculate academic GPA, specifically with reference to repeating of the same course to improve a grade. The first course grade will not be computed into the total grade-point average. Instead, the most recent grade will be used. Multiple course attempts do, however, count towards the number of credits attempted used to calculate a student's completion rate.

**Successful completion is defined as the assignment of a passing grade to the courses attempted and equates to the number of credits earned. Failure, withdrawal, incomplete, or other designations to the courses attempted are not considered successful completion.

Repeated coursework:

For the purposes of determining SAP, GPA calculations will follow the method used by SNHU when calculating academic GPA. Specifically, in reference to student's repeating the same course to improve a grade. The first course grade will not be computed into the total GPA. Instead, the most recent grade will be used. Multiple course attempts do, however, count towards the number of credits attempted, which is used to calculate a student's completion rate.

Withdrawals:

For the purposes of SAP calculation, withdrawals are considered to be credits attempted but not earned.

Incompletes:

For the purposes of SAP calculation, incomplete credits are considered to be credits attempted but not earned. With an incomplete grade, when the grade is updated with an actual grade, the student will not have SAP re-run, the actual grade will be picked up with the student's next run. However, if the student would like to request a re-evaluation, the student can send in a written request asking for a new SAP evaluation.

Transfer credits from other schools:

For the purposes of SAP calculation, transfer credits are considered to be credits attempted and completed toward the completion of the student's program and counted toward the max time frame.

Campus Programs

Review of Satisfactory Academic Progress:

Due to compliance rules, individual student records must be reviewed within one (1) year of the last run. For University day programs, the student is usually reviewed at the end of each academic year. However, this may not always be the case as some students are able to start in certain programs at different starts during the year.

The review that is completed is for programs of study that are longer than one academic year and must include all terms of the student's attendance, including summer terms if applicable.

- For Undergraduate day programs where the student started the program in the Fall semester, students are reviewed at the end of the Spring semester
- For Undergraduate day programs where the student started the program in the Spring semester, students are reviewed at the end of the Fall semester
- For University day students who switch from an online program, there may be schedules that do not align with the end of the Spring semester, when the SAP run would have occurred. In this case, the student would have SAP run after whatever University day semester was closest to the annual run, without going over the one year mark.
- Graduate programs are reviewed at the end of the Summer term; except for:
 - Doctorate in Educational Leadership (EdD) is reviewed at the end of the EL3 term; and
 - Master of Fine Arts (MFA) is reviewed at the end of the SIX02 term.

Enforcement:

Financial Aid Suspension: Failure to meet either the qualitative or quantitative standard will result in the student being placed on financial aid suspension until the next evaluation period. Students on SAP suspension will not be allowed to receive financial aid.

Financial Aid SAP Appeal:

Students who have been placed on Financial Aid suspension will be allowed to appeal their suspension. To be considered, a SAP appeal must include the following elements:

- Reason(s) why the student failed to maintain SAP.
- What has/will change that will allow the student to make SAP at the next evaluation period?
- As appropriate, an academic plan agreed to by the student, developed by, and in place with their academic advisor. The plan must ensure that the student is able to meet SAP standards by a specific point in time.

Financial Aid SAP Probation:

Students who have been initially placed on Financial Aid suspension, and who have an approved appeal, are placed on SAP probation. The student's eligibility for aid is considered to be reinstated.

Financial Aid Appeal Approval:

Students with an approved appeal who are placed on SAP probation will have their status reviewed after the each payment period following their successful appeal. Students who are not meeting the requirements will be returned to suspension and all aid current and future terms must be canceled immediately, regardless of current enrollment. Students meeting SAP requirements after successful completion of an academic plan will not be reviewed again until the next annual SAP review. Students who are suspended as part of this process may appeal this decision.

Student Rights and Responsibilities

Each year, Southern New Hampshire University students request student financial assistance to help defray the cost of education. Federal, state, and institutional resources form a partnership with your (and your family's) own commitment to meet your educational costs. Federal, state, and institutional student financial aid is a privilege, which creates both rights and responsibilities.

Responsibilities

- Complete and submit application materials to the appropriate agencies within required or recommended time frames.
- Read all materials sent to you from Southern New Hampshire University and other agencies awarding you aid. Read, understand, and keep copies of all forms you sign.
- Know and comply with the rules governing the aid you receive. These rules include but are not limited to: you must not be in default on any prior educational loan, and you must not owe a refund on a Federal Pell Grant or a Federal Supplemental Educational Opportunity Grant due to repayment.
- Provide additional documentation, federal tax returns, W-2's, and any additional information if requested to by Southern New Hampshire University.
- Comply with the provisions of any promissory note and all other agreements you sign including repaying your student loans.

Campus Programs

- Complete the registration process each term by the end of the drop/add period in order to ensure availability of all student aid funds you have been awarded.
- Use student financial aid proceeds solely for direct educational costs and related living expenses.
- Maintain satisfactory academic progress.
- Report private sources of student financial aid to Southern New Hampshire University.
- Report any changes in your status: marital, academic, enrollment, residential, or name changes.
- Keep your local and permanent addresses current with the University Registrar and loan servicers.
- Understand SNHU's withdrawal policy and how it affects return of financial aid.
- Complete mandatory loan exit counseling upon ceasing to be enrolled at least half-time or more if you have borrowed from the Federal Direct Loan program.
- Perform and complete satisfactory work assignments accepted through the Federal Work Study program (if applicable).

Rights

- Have all records and data submitted with your application for financial aid treated as confidential information, as prescribed by the Family Education Rights and Privacy Act (FERPA).
- Have an explanation of the award process including the understanding the financial aid programs offered, the cost of attending, the criteria used in the awarding process, and how financial need is determined.
- Understand the method by which disbursements will be made and the frequency of those disbursements.
- Understand the criteria for satisfactory academic progress.
- Be notified of changes in your financial aid status and the reasons for those changes.
- Know the conditions (interest rate, when repayment begins, and repayment programs) of any accepted loan.
- Know the terms, conditions, and pay rate for any student job you accept.

Grades and Credits

Audit a Course

An undergraduate day student wishing to audit a course must sign up for that course as an audit prior to the end of the add/drop period. Once the add/drop period has passed, no student may change any of his or her courses to an audit status. Additionally, a student may not convert back to graded status after registering to audit. Tuition is charged at the prevailing rate.

Awarding of Credit by Examination

Southern New Hampshire University accepts the results of nationally accredited testing programs or institutionally developed examinations to satisfy the prerequisites of certain courses or degree requirements. Before deciding on a testing program, the student should review his or her program evaluation with an advisor to determine if testing is a practical alternative.

General Education Transfer Policy

Students who have a conferred Associate's degree (AA or AS) in Liberal Arts, Liberal Studies, or other similarly named degree from an accredited institution are considered to have met their general education requirements including the general education integration course with the following exceptions:

- Students must complete the equivalent of SNHU's general education foundation course requirements to include one Math 100 or higher level mathematics course and English Composition I and English Composition II either via transfer courses or through taking the courses at SNHU.
- Students must complete any general education requirements that are required within their program degree requirements.

This policy complies with the University [Transfer Credit policy](#).

Grade Change

An instructor may make a grade change within fourteen (14) business days after the semester grade due date under the following circumstances:

- The instructor has made an error in calculating the grade;
- The instructor is replacing an Incomplete grade with a letter grade;
- The instructor inadvertently did not post (or miss-posted) a grade in the Grade Center; or
- The result of a successful grade dispute.

Once final grades are posted, the instructor may not make grade changes in cases of students handing in late work, unless a request for an Incomplete grade was filed before the grade due date, in accordance with the Incomplete Grade Policy. No grade changes will be accepted after the student's degree has been conferred.

Instructor Grade Change Process

To make a grade change, the instructor must complete the Grade Change Request through the Service Portal on mySNHU. The request will be automatically routed to the Office of the University Registrar.

Any grade changes made after the fourteen (14) business day deadline will be denied by the Office of the University Registrar. In the case of extenuating circumstances, the VPAA may approve a late grade change.

Grade Dispute

Purpose of Policy

The purpose of this policy is to provide students protection against receiving an unfair final grade, while at the same time respecting the academic responsibility of instructors. Instructors are responsible for all grade changes. Concerns about incompletes, make-ups and grades should be directed to them. A grade dispute shall be confined to charges of unfair action toward an individual student and may not involve challenging an instructor's judgement in assessing the quality of a student's work.

Grounds for Dispute

In a grade dispute, only the following will be considered legitimate grounds for dispute:

- The instructor made an error in calculating the grade;
- The instructor assigned the grade based on factors other than the student's performance in the course;
- The instructor failed to notify the student in a clear manner as to the basis of the grade determination;
- The grade awarded departed substantially from the instructor's previously announced standards.

The grade dispute process does not cover instances in which students have been assigned grades based on academic dishonesty. Those instances are covered by the University College Academic Honesty Policy.

A University College student has 7 business days after grades are due to contact an instructor regarding a disputed grade. The expectation is that the student and instructor resolve the grade disagreement informally in a collegial manner, but the instructors are under no obligation to change grades they consider accurate. Instructors have 7 business days after being contacted by a student to submit a grade-change request if warranted.

If the grade dispute cannot be resolved informally with the instructor, then the student may choose to submit a Grade Dispute Form to the appropriate Dean's Office. This form must identify the grounds for the dispute. The Dean's Office must notify the Registrar's Office immediately that a grade is being disputed. This notice would place any potential graduate into pending status and potentially delay degree conferral.

Any grade change requests made after 14 business days following the posting of grades will not be accepted by the Office of the University Registrar. In the case of extenuating circumstances, instructors may request a late grade change by contacting the CAO/VPAA.

Grade Scale and GPA

Grading System - Undergraduate

In determining grades at the university, the following grade system is used:

Grade	Numerical Equivalent	Points
A	93-100	4.00
A-	90-92	3.67
B+	87-89	3.33
B	83-86	3.00
B-	80-82	2.67
C+	77-79	2.33
C	73-76	2.00
C-	70-72	1.67
D+	67-69	1.33
D	60-66	1.00
F	0-59	0.00

Grading System - Graduate

In determining grades at the university, the following grade system is used:

Campus Programs

Grade	Numerical Equivalent	Points
A	93-100	4.00
A-	90-92	3.67
B+	87-89	3.33
B	83-86	3.00
B-	80-82	2.67
C+	77-79	2.33
C	73-76	2.00
F	0-72	0.00

- Academic Renewal - Grades prefaced by "R" denote academic renewal
- Audit - AU
- Course Waived - WW
- Credit - CR
- Incomplete - I
- Incomplete/Fail - IF
- In Progress Passing - IP
- In Progress Transfer - IPT
- Mastery - MA*
- Non-course work - NC
- Non-graded - NG
- Passing - P (equivalent to C or better at the undergraduate level, B or better at the graduate level)
- Satisfactory - S (equivalent to C or better at the undergraduate level, B or better at the graduate level)
- Transfer Credit - T
- Unearned F - UF
- Unsatisfactory - U
- Withdrawal - W
- Withdrawal Pass - WP
- Withdrawal Fail - WF

*Note: "MA" grades are issued for College for America competency-based programs once individual competencies and equivalencies are mastered. "MA" is equivalent to an "A" grade on a traditional grade scale. There are no quality points associated with MA grades, therefore there is no GPA for students in College for America programs.

Grade Point Average

The grade-point average (GPA) is determined by dividing the sum of the quality points (QP) by the sum of the attempted credit hours (CR). An example of a student's grades and grade-point average is as follows:

ENG-120	3 Credits x A(4)=	12 QP
MAT-240	3 Credits x B(3)=	9 QP
MKT-113	3 Credits x C(2)=	6 QP
PSY-108	3 Credits x D(1)=	3 QP
IT-145	3 Credits x F(0)=	0 QP
	15 Credits	30 QP

30 QP divided by 15 CR = 2.00 GPA

Incomplete Grades

Purpose of Policy

In the case of extenuating circumstances the instructor may agree to give a student a final grade of *Incomplete*, if the instructor determines the student may reasonably complete the work required within the 30 day incomplete grade completion time limit. Allowing a student an *Incomplete* grade is left to the instructor's discretion, and students should not assume that they will be allowed to complete work after the term has ended.

Guidelines

In allowing a grade of *Incomplete* the instructor should observe the following guidelines:

- The circumstances that have compelled the student to request the *Incomplete* must be exceptional, such as illness, natural disaster or some other emergency, beyond the student's control.
- The student requesting the *Incomplete* must have successfully completed the majority of his or her course work

Campus Programs

in the course.

- The student must submit the outstanding course work to the instructor within 30 days of the end of the term.

Incomplete Grade Process

If the instructor agrees to assign the student a grade of Incomplete, the instructor must take the following steps:

1. Prior to the grade due date, the instructor must complete the Incomplete Grade Request through the Service Portal on mySNHU which automatically routes to the registrar's office for processing.
2. On the Incomplete Grade Request, the instructor indicates an expiration date for the student to submit outstanding course work that is no more than 30 days from the last day of the end of term. The instructor will have an additional seven calendar days after the student expiration date to grade and submit the Grade Change Request.
3. Provided that the instructor receives the student's completed course work on or before the expiration date, the instructor submits the Grade Change Request that automatically routes to registrar's office authorizing the student's grade be changed from "I" to the alpha grade earned.
4. Extensions beyond 30 days must receive VPAA approval.

If the student fails to submit the outstanding course work by the expiration date or if the instructor has not submitted a Grade Change Request by the expiration date, the grade will automatically change from "I" to "IF." A grade of "IF" is calculated as an "F."

IP Grade

For courses that span more than one academic term, IP/F grades will be used to indicate each student's academic progress at the end of each associated term. IP grades indicate In-Progress Passing.

For internship/practicum courses, students will be enrolled in a credit-bearing section in their first term. At the end of that term, the Office of the University Registrar (OUR) will email each instructor to confirm a final grade of "IP" if the student is passing, or "F" if the student is failing, along with the associated expiration date that will be set for 2 weeks from the end of the internship contract date, which will allow for submission of the final project as well as instructor grading. The student will then be enrolled in a 0-credit section for each subsequent term until the internship is completed. In each succeeding term, including the final term, the "IP"/"F" grading process will continue. After the last term ends, and prior to the expiration date, the instructor will submit a grade change form to the OUR with the final alpha grade. The OUR will then change all IP grades for all sections of the internship to that final alpha grade. IP grades for internships may never extend beyond 1 year.

For all other courses the OUR will email a course roster to each instructor to ask him/her to identify any students who are failing, and then enter the appropriate "IP" or "F" along with the expiration date. At the end of the final term, the OUR will email a course roster to each instructor to request final grades, and then the OUR will then change all IP grades for all sections of the course to that final alpha grade.

Repeating Courses

Students may repeat courses for credit. The last grade, whether it is higher than, the same as, or lower than the first grade is included in the cumulative GPA; the first grade is excluded. In instances where both grades are passing, credit is only earned once. All prior grades will appear on the students' transcripts. While there is no limit on the number of times a student can attempt most courses, there may be financial aid implications.

Transfer Classification-Credit Hours

Transfer students with 15 or more transfer credit hours will be placed on the UT (University Transfer) catalog year.

Transfer Credit

Transfer Credit

Purpose of Policy

The purpose of this policy is to describe transfer and external credit policies and procedures for undergraduate and graduate students.

General Information

Only official transcripts are considered for transfer credit. Official transcripts must be sent directly from the issuing institution. SNHU accepts secure electronic transcripts from issuing institutions or scanned documents sent directly from our international articulation partners. Credit considered for transfer must be from the issuing institution; transfer credit posted on another institution's transcript will not be accepted.

The grades for transfer courses are not factored into the student's grade point average (GPA) at SNHU. Developmental or remedial coursework is not accepted for transfer credit. In the event that the program from which the student wishes to transfer credit awards grades using a Pass/Fail or Satisfactory/Unsatisfactory system, rather than a letter-grade system, the credit may be transferred only if a grade of "Pass" or "Satisfactory" is described on the official transcript issued by the program as the equivalent of a "C-" or higher for undergraduate transfer credit or "B" or higher for graduate transfer credit.

Students cannot receive duplicate transfer credit. Duplicate transfer credit occurs when the content of two external

Campus Programs

courses has been equated to one SNHU course. In this instance, credit will only be awarded for one of the two external courses.

Collegiate Transfer Credit Sources

Courses accepted for transfer credit must be at college level from a regionally or nationally accredited institution listed by the Council for Higher Education Accreditation (CHEA). The COCE Department of Nursing requires in most instances that a nursing course submitted for transfer credit evaluation is completed at an accredited school of nursing and that the course be an equivalent of the COCE Department of Nursing course requirement.

Other Transfer Credit Sources

Students may be awarded credit for non-traditional learning through the following services (for more information on any of these services, students are encouraged to speak with their Academic Advisor or Admission Counselor):

1. Credit by Examination. Students may be awarded credit by passing examinations offered by College Level Examination Program (CLEP), the Defense Activity for Non-Traditional Education Support (DANTES) Examination Program, the College Board Advanced Placement Examination (AP), the International Baccalaureate Diploma Programme (IBDP), ServSafe Certification exam, Series 7 – General Securities Representative Examination, NLN Nutrition Exam, New Hampshire Certified Management Program (CPMP), or Cambridge International Advanced-Level Examinations (A Level). For a complete list of the CLEP, AP, and DANTES exams that SNHU accepts, visit <https://www.snhu.edu/admission/transferring-credits/work-life-experience/testing-out>.
2. Prior Learning. Prior Learning Assessment (PLA) comprises the processes and practices of determining if knowledge gained in a variety of settings, and through formal and non-formal means, may warrant consideration of college credit and/or requirements (i.e. award of credit or a waiver of program requirement). To be eligible for prior learning credit students must be enrolled in an undergraduate program at SNHU. Students may earn up to 15 undergraduate credits for a bachelor's degree (9 undergraduate credits for an associate degree) through prior learning assessment via portfolio submission. Students work with an advisor to determine the most appropriate path to assess prior learning: SNHU portfolio process or assessment through Learning Counts through Council for Adult Education and Experiential Learning (CAEL). The Learning Counts course will help students identify areas of learning they may want to have evaluated for college-level equivalency. This course will also guide students through the preparation and compilation of all components required for the evaluation of a portfolio or prior learning through [LearningCounts.org](https://www.learningcounts.org). Students will learn critical reflection skills to rethink the value of their learning and its implications for future learning. Adult learning theory, models, and concepts will be discussed and applied to case studies. This course is facilitated by an instructor who provides guidance for the student in preparing his or her portfolio-based request for credit. Successful completion of this course will result in a credit recommendation of three lower-level credits.
3. Evaluation of Non-Traditional Learning Experiences. For evaluating non-traditional learning experience, SNHU recognizes the services of American Council on Education (ACE) and National College Credit Recommendation Service (NCCRS).
4. Industry-Recognized Certification. SNHU may also award credit for industry-recognized certification(s) that are not currently assessed for college credit by ACE/NCCRS and/or listed above upon departmental approval.
5. Credit for Courses in Other Postsecondary Settings. SNHU awards credit for some formal course work taken in non-accredited, postsecondary educational settings. These settings include postsecondary vocational and technical training, in-service training courses in the workplace, military service training programs and career-related workshops and seminars. In many cases, this type of training has been evaluated by ACE and criteria for awarding university credit is available in the various ACE guides in the Office of the University Registrar. Where there is no ACE criterion, SNHU may have to conduct an independent review of the training for the purpose of granting transfer credit. Students wishing to have their non-accredited, postsecondary course work evaluated should submit a letter requesting this evaluation, along with official transcripts or some original form of verification of successful completion of these courses, to the Office of the University Registrar. Students will be notified by the Office of the University Registrar if the experience warrants credit and, if so, the number of credits awarded and the requirements they satisfy.

Transfer Credit for Engineering Courses

Transfer students will have their previous credit and coursework evaluated by the appropriate Admission Office or the Office of the University Registrar in conjunction with the appropriate academic department. Engineering transfer courses must be from an ABET-accredited program or a program that is recognized by one of the following ABET's mutual recognition agreements (MRAs): The bilateral agreement between Engineers Canada and ABET or the multilateral Washington Accord. Students looking to transfer an Engineering course from a non-ABET-accredited program may be required to provide additional documentation to determine course equivalence. Accordingly, Engineering courses will transfer in as follows:

- ABET Accredited Program (United States & International)
 - Engineering courses will receive SNHU Credit if they match an established equivalency. Otherwise, courses will receive Free Elective Credit.
- Non-ABET Accredited Program (United States & International)
 - Engineering courses will receive Free Elective Credit unless determined to be equivalent to an existing course offering by the academic department through a Petition to Amend Degree Requirements form.

International Transfer Credit

Campus Programs

Students who wish to receive transfer credit for college-level coursework from an international institution outside of the United States or Canada must have their transcript(s) evaluated by an educational credential evaluation service that is recognized by the National Association of Credential Evaluation Services (NACES) or the Association of International Credentials Evaluators (AICES). Students may also use the services of the American Association of Collegiate Registrars and Admissions Officers International Education Services (AACRAO) or the Credentials Evaluation Service of the Commission on Graduates of Foreign Nursing Schools (CGFNS). The Office of the University Registrar holds the right to waive this stipulation for English-issued transcripts received from recognized foreign institutions the Office of the University Registrar deems appropriate to evaluate in-house.

NOTE: SNHU recognizes 3-year 180 ECTS credit bachelor's degrees (conferred after 2003, or year of [Bologna Process](#) adherence) from institutions in member countries that adhere to the Bologna Process as the equivalent of a 4-year 120 semester credit bachelor's degree from the United States. In order to validate equivalency, SNHU must receive official transcripts of the conferred degree along with a European Commission recognized [Diploma Supplement](#), both in English. *These international transcripts are excluded from the requirement of being evaluated by a recognized NACES or AICE international transcript evaluation agency.*

NOTE: Evaluations for on-campus international students are often conducted in-house by the International Admission Office staff.

Students may use only one evaluation service. Multiple evaluations for transfer credit will not be accepted. The official transcript evaluation must be sent directly from the credential evaluation service.

Undergraduate Transfer Credit Requirements

Undergraduate courses accepted for transfer credit require a grade of "C-" or higher. Most credits taken externally will be considered for transfer credit regardless of when they were completed. However, time limits exist in some academic programs, such as in Information Technology or Accounting, to ensure that transfer credits meet present-day academic standards. Students should consult with their Admission Counselor or Academic Advisor regarding these time limits. Time limits are set and approved by academic program leadership. Regardless of the total number of transfer credits awarded, students must meet minimum institutional and program credit requirements and institutional residency credit requirements as appropriate. See the [Institutional Credit Requirement Policy](#).

College for America (CfA)-Transfer Credit Requirements

• AA Programs

Students who completed a minimum of 30 credit hours through one of SNHU pre-approved Partner Programs are allowed to transfer in these credits as a block. The transfer block must demonstrate student command of General Education content areas.

The remaining 30 credit hours must be completed at CfA following the direct assessment approach as outlined in the AA program requirements.

• BA Programs

Students enrolled in a CfA BA program with a completed Associate Degree (or the equivalent of 60 credit hours) are awarded a transfer block to fulfill the associate's degree portion of the BA program. The transfer block must demonstrate student command of General Education content areas. This allows the student to enroll directly into the BA program of their choice to complete the additional 60 credit hours that are needed.

NOTE: The transfer block portion of CfA programs may be accepted in any combination of courses and/or prior learning assessment (PLA) credit, in alignment with this policy. PLA credit is not permitted in CfA direct assessment portion of programs.

Graduate Transfer Credit Requirements

Graduate courses accepted for transfer credit require a grade of "B" or higher and must have been completed within the last five (5) years. Some courses in certain subject areas, such as Accounting, may have a shorter expiration date to ensure that transfer credits meet present-day academic standards. Students should consult with their Admissions Counselor or Academic Advisor regarding these time limits. Time limits are set and approved by academic program leadership. A graduate course may be used only once to fulfill a requirement.

Graduate students may be awarded a maximum of credit hours, as follows:

- Master's degree: a maximum of four graduate-level courses not to exceed twelve (12)* graduate-level credits;
- Graduate certificate program or specialization: three (3) graduate-level credits;
- Low-Residency MFA students may transfer up to one (1) full semester of credit from another low-residency or full-residency MFA program in creative writing. A successfully completed semester at another low-residency or full-residency MFA program may be counted as one fifteen (15) credit semester in the Low-Residency MFA, which includes both residency and semester coursework.

*Students that are seeking transfer of nursing courses should review the [RN to BSN Nursing Admission and Academic Requirements](#) and [Graduate Nursing Admission and Academic Requirements](#) policies.

NOTE: Students must complete the minimum Institutional Credit Requirements for each credential.

Transfer Evaluation Process

Campus Programs

When a student applies to SNHU and official transcripts are received, the Admissions team compares and evaluates the SNHU course and the transfer course. The student then is sent a letter of acceptance along with transfer credit evaluation, listing all transfer credits accepted by the University and all courses remaining to be completed for a degree.

Request to Take Courses at Another Institution

Students who are enrolled at SNHU and wish to take a course elsewhere, must submit a request by filling out the Request to Take Courses at Another Institution form to ensure that the course fulfills the desired requirement. Failure to obtain prior approval to take a course at another institution may lead to SNHU's not granting transfer credit for that course. The following information is required by the Office of the University Registrar:

- Name of the institution;
- name and number of the course;
- anticipated completion date;
- course description; and
- student's reason for taking the course elsewhere.

Upon approval and once the course is completed, the student must arrange to have an official transcript sent to the Office of the University Registrar so that credit for the course may be applied toward degree completion.

NOTE: Nursing students may not transfer credit for nursing courses once they have enrolled at SNHU.

Quarter Hour to Semester Hour Conversion

One (1) quarter hour is equivalent to .67 semester hours. Two (2) semester hours of transfer credit for a transfer course that aligns to a corresponding SNHU course meets the required SNHU course equivalency. Students still must meet overall program and degree credit hour requirements.

Waiver Eligibility for SNHU-303

Students with extensive, up-to-date, professional experience may be waived from SNHU 303. Students seeking to be waived from SNHU 303 should contact the Assistant Dean of General Education at least 10 days prior to the registration period when the student would be expected to register for SNHU 303. If a student is waived by the Assistant Dean of General Education from SNHU 303, one credit will be added to her/his FRE ELE requirement.

Graduation and Commencement

Academic Record and Degree Revocation

Southern New Hampshire University's awards of academic credit and Degrees constitute its certification of student achievement. However, a student's academic record, admissions and/or a conferred degree may be awarded in error or as a result of fraud, misrepresentation, or other intentional or unintentional actions. To preserve the integrity of Southern New Hampshire University's academic standards and the Degrees granted by the University, the University may exercise its right to revoke a previously conferred Degree or academic credit as outlined in this procedure. The authority to revoke a Degree rests with the President. The President at this moment delegates that authority to the University Chief Academic Officer.

Definitions/General Provisions:

1. Clear and convincing evidence: Clear and convincing evidence is defined as evidence of such convincing force that it demonstrates, in contrast to the opposing evidence, a high probability of the truth of fact(s) for which it is offered as proof. Such evidence requires a higher standard of proof than proof "by a preponderance of the evidence" but a lower standard than required for proof "beyond a reasonable doubt."
2. Academic record: An academic record is defined as any academic activity attempted that becomes part of the student's permanent record.
3. Degree: A Degree is defined as any form of Degree, academic credential, certificate, professional designation, or another award (e.g., Honors designation) conferred by the University or any of its colleges, departments, or units.
4. Registrar: Registrar is defined as the management personnel in the Office of the Registrar at the University.
5. Notice of Intent to Revoke: Notice of Intent to Revoke is defined as the written notice issued to a Student whose academic record, admissions and a conferred degree the University intends to revoke under the terms of this policy.
6. University Academic Record and Degree Revocation Committee: The University Academic Record and Degree Revocation Committee shall consist of members of each business unit.
7. Timelines: The University may, but is not required to, extend timelines set forth herein. The University Chief Academic Officer shall determine extensions. The UCAO or designee shall promptly and in writing notify the Student and any University administrators involved of any revised timeline.

Basis for Revocation:

An academic record, admissions and/or a conferred degree may be revoked by the University if 1) upon examination of a Student's record, it is determined that the requirements for the admissions and/or a conferred degree as established by Southern New Hampshire University at the time of admission or Degree conferral were not met or 2)

Campus Programs

information comes to light which, if known at the time of admission or the awarding of the Degree, would have resulted in a determination that the admission or the Degree should not have occurred. The basis for an academic record, admissions and/or a conferred degree revocation include, but are not limited to, the following:

1. Intentional misconduct by administrators, faculty, staff, or Students, including fraud, dishonesty, or falsification or unauthorized altering of information of a Student record (including in an Official University student information system).
2. Error(s) by administrators, faculty, staff, or Students which resulted in the granting of the Degree when the Degree otherwise would not have been awarded.
3. Other violations of the University's Student Conduct Code that are of such a nature that had they been discovered before the issuance of the Degree, they would have resulted in the suspension or expulsion of the Student from the University.

Investigation:

1. When information comes to light that places into question the validity of an academic record, admissions and/or a conferred degree, it shall be referred to the Vice President/University Registrar or Assistant Vice President of Academic Operations & Strategy.
2. Upon receipt of such information, the Vice President/University Registrar or Assistant Vice President of Academic Operations & Strategy shall conduct an initial review of the information and determine whether such information is credible and whether, if established as true, the evidence would justify the revocation of an academic record, admissions and/or a conferred degree.
3. The Vice President/University Registrar or Assistant Vice President of Academic Operations & Strategy will contact the University Academic Record and Degree Revocation Committee to complete a further investigation, which will be completed within five calendar days. After such investigation, a report of the findings and recommendation will be sent to the University Chief Academic Officer.
4. The University Chief Academic Officer will determine if there is sufficient information to determine to revoke an academic record, admissions and/or a conferred degree and if so, he/she will issue a Notice of Intent to Revoke to the Student. If the University Chief Academic Officer determines that there is insufficient evidence to justify a revocation, no further action shall be taken.
5. The University Chief Academic Officer may direct the Vice President/University Registrar or Assistant Vice President of Academic Operations & Strategy to place an administrative hold on the issuance of any official transcript for a student to whom a Notice of Intent to Revoke has been sent.

Process, when Notice of Intent to Revoke, is issued:

1. The Notice shall be a written notice sent to the Student informing the Student that the University has clear and convincing evidence that justifies the revocation of the Student's an academic record, admissions and a conferred degree under this policy. The Notice shall describe the evidence based on sufficient detail to allow the Student to respond to the Notice. A copy of this policy shall also accompany the Notice. The Notice shall state that if the Student decides to contest the revocation, the Student shall, within thirty calendar days of confirmed receipt of the Notice, make a written request to the University Chief Academic Officer for a hearing. The confirmed receipt can be a document signed by the person who delivered the Notice indicating that the Student was given the Notice; a receipt signed by the Student acknowledging receipt of the Notice by certified mail; a signed acknowledgement by the Student of receipt of the overnight mail containing the Notice; or other proof of actual receipt by the Student, such as email delivery confirmation. The Notice shall also state that if the Student requests a hearing, the Student shall prepare a written response to the Notice stating whether the Student disputes the information set forth in the Notice and/or the University's conclusion that the academic record, admissions and/or a conferred degree should be revoked as well as the specific evidence and reasons upon which the Student bases such dispute or conclusion.
2. The Notice shall be sent by certified mail, personal or overnight delivery, to the last known mailing or contact address for the Student. If possible, the request for a hearing shall be sent to the University Chief Academic Officer via certified mail.
3. If the Student does not request a hearing within thirty calendar days of confirmed receipt of the Notice, the University may revoke the academic record, admissions and/or a conferred degree without further proceedings.
4. If the Student requests a hearing, the University Chief Academic Officer shall use reasonable efforts to schedule such hearing no sooner than thirty and no later than sixty calendar days after the Student notifies the University of the request for a hearing. The Student shall be provided with written notice of the scheduled hearing date and location no later than fourteen days before the hearing.
5. The Student shall be entitled to review the evidence that supports the University's Notice and may request a copy of such evidence at cost.
6. The Student and the University may be accompanied at the hearing by an Advisor, who may neither speak for nor on behalf of, the Student or University.
7. The Student and the University shall be allowed to introduce evidence and call witnesses to testify at the hearing. The formal rules of evidence applied in courtroom proceedings do not apply in the hearing.
8. If, after requesting the hearing, the Student fails to appear at the hearing without good cause, the hearing shall proceed, and the University Chief Academic Officer shall render a decision based on the evidence submitted. The University Chief Academic Officer shall weigh the evidence presented and shall draw no inferences from the Student's absence from the hearing.
9. If despite its due diligence, the University received no confirmation that the Student received the Notice or is unable to locate the Student to provide the Notice, the University may nonetheless seek revocation of the academic record, admissions and/or a conferred degree. The University shall schedule a hearing within sixty calendar days of the date of the Notice that shall proceed in the absence of the Student. The University Chief Academic Officer shall consider the evidence presented at the hearing by the University and shall determine whether there is sufficient evidence to revoke the Student's academic record, admissions and/or a conferred degree under this policy.

Campus Programs

10. The University Chief Academic Officer shall consider and weigh the evidence and shall prepare written findings concerning whether there is clear and convincing evidence to revoke the academic record, admissions and/or a conferred degree. If the University Chief Academic Officer finds that the evidence establishes that the academic record, admissions and/or a conferred degree should be revoked, s/he shall also consider whether the Student should be permitted to complete the requirements for his or her academic program after some sanction is applied. Sanctions may include but are not limited to, a ban from enrollment for some period or a loss of catalog year rights.
11. The University Chief Academic Officer shall prepare a letter that explains the reasons for the decision. The decision letter shall be issued within ten calendar days of the hearing.
12. Nothing in this policy shall be construed to prevent the University Chief Academic Officer from agreeing to an informal resolution of the matter with a Student instead of, or after, a hearing.
13. The University shall allow any affected Student to petition the University to reopen the revocation decision, provided the Student establish that he/she received notice after the 60-day timeframe discussed in Section 1 above or, for a good cause shown, was unable to contact the University or to respond within the period specified. Any Student who meets the above-noted requirements shall be provided an opportunity to respond and a hearing in the manner described in this policy.

Post-Revocation Steps-If an academic record, admissions and/or a conferred degree is revoked:

1. Ensure that all relevant records of the University relating to the Student are promptly amended to reflect the revocation.
2. Note the effective date of the revocation on the Student's transcript and use reasonable efforts to transmit a copy of the official (revised) transcript to the Student.
3. The Student should take appropriate steps to notify all former and current employers, relevant educational institutions, professional registration bodies or associations, or others as applicable to the revocation. If despite its due diligence, the University is unable to provide this notice to the Student due to an inability to contact or locate the Student, the University shall place a hold on the Student's records until it can provide such notice.
4. If at the time of the revocation the Student is enrolled at the University, the University Chief Academic Officer shall promptly notify the University Student Conduct Officer of the revocation so that the Student Conduct Officer can consider whether to take any further steps.
5. The student is not relieved of any financial obligation unless it is determined that fees shall be reversed after a comprehensive review completed by Student Financial Services.

Commencement Participation

Petition to Graduate

In order to graduate, students must Petition to Graduate. The Petition to Graduate link can be found under the Self Service section on the homepage of mySNHU.

Undergraduate Day Students

The deadlines to petition to graduate and degree conferral dates for undergraduate day students are:

For a conferral date of:	January 1, 2020	May 2020 Commencement Ceremony
Petitions to Graduate are due no later than:	September 1, 2019	January 1, 2020
Program requirements must be complete and grades must be received and verified by the University Registrar by:	December 30, 2019	May 6, 2020
Diploma Mailing Date:	January 15, 2020	10 business days after May 2020 Commencement Ceremony

Graduate and College of Online and Continuing Education Students

The deadlines to petition to graduate and degree conferral dates for graduate and COCE students are:

Campus Programs

Petition by	Conferral Date
November 1st	January 1st
December 1st	February 1st
January 1st	March 1st
February 1st	April 1st
March 1st	May 1st
April 1st	June 1st
May 1st	July 1st
June 1st	August 1st
July 1st	September 1st
August 1st	October 1st
September 1st	November 1st
October 1st	December 1st

College for America Students

In order to graduate, College for America (CfA) students must complete the Petition to Graduate process no later than the 15th of the current month to qualify for conferral on the 1st of the next calendar month. They may do so by either utilizing the link provided to them within their congratulatory graduation email sent by Student Affairs upon completion of their program, or through the Petition to Graduate link under the Self Service section on the mySNHU/CfA homepage. College for America students will need to petition both eligible programs:

- UG - Student's Undergraduate Degree Program (ex. AA.GST)
- CFA - Student's Competency Program (ex. AA.GST.CFA)

Failure to petition for both programs may result in a delay to the graduation process. Students may contact Student Affairs with questions related to the Petition to Graduate link.

Participation in Commencement

Students are permitted to participate in only one commencement ceremony per degree. Participation in the ceremony does not indicate degree completion. Degree conferral is only confirmed when recorded on the official transcript. Certificate students are not eligible to participate in the ceremony.

Eligibility to Participate in the May Commencement Ceremony: March 15th Deadline

Students must anticipate completing all program requirements by October 31st.

Students who have up to 12 credit hours remaining to complete all program requirements as of the date of commencement will be allowed to participate.

Students with more than 12 credit hours to complete all program requirements are not eligible to participate in the current year's commencement ceremony, unless an appeal has been granted, based on the criteria described below (see Appeals to Participate).

Students must be in good academic standing with at least a 2.0 cumulative GPA (undergraduate) and a 3.0 cumulative GPA (graduate).

Appeals to Participate

In rare circumstances, a student who is within 18 credit hours of completion may be allowed to participate in the commencement ceremony. To be considered, the student must be able to complete remaining requirements by October 31st. They also must have a strong GPA and have demonstrated the ability in the past to complete three courses in one term. Students who believe they meet these criteria and who wish to appeal should work with their academic advisors and forward the appeals to the Office of the University Registrar, who will make the final determination.

Late Petitions to Participate

Students who petition to participate after the March 15th deadline may be approved to participate in the ceremony. However, they will not be included in the commencement booklet, will not be eligible for ceremonial honors (including cords and tassels), and may not receive the standard amount of ceremony tickets.

Doctoral Students

All graduate requirements must be completed including dissertation defense no later than March 15th. Exceptions may be requested by dean for students who are expected to meet all requirements including defense after March 15th if approved by the VPAA's office after consulting with the commencement office to see if commencement materials can be ordered. There is no guarantee that materials will be able to be ordered after the March 15th date.

Campus Programs

Degree and Certificate Conferral

Undergraduate Day School Students

Students must submit a petition to graduate to the Office of the University Registrar in accordance with the following deadlines:

For a conferral date of:	January 1, 2020	May 2020 Commencement Ceremony
Petitions to Graduate are due no later than:	September 1, 2019	January 1, 2020
Program requirements must be complete and grades must be received and verified by the University Registrar by:	December 30, 2019	May 6, 2020
Conferral Posted Date:	January 15, 2020	10 business days after May 2020 Commencement Ceremony

Graduate Students and College of Online and Continuing Education Undergraduate Students

Must submit a petition to graduate to the Office of the University Registrar no later than two months prior to their planned conferral date. For example, a student planning to graduate as of March 1st must submit their petition by January 1st. Students may petition to graduate online via mySNHU.

Upon petition submission, a non-refundable Petition to Graduate fee will be applied to the student's account. Certificate students are not eligible to participate in the ceremony and therefore will not be assessed a fee.

Degrees are conferred 15 times per year, the first of every month and the days of the May and MFA commencement ceremonies.

A credential will be conferred only when all program requirements are complete and all grades are received and verified by the Office of the University Registrar within the University's information system prior to or on the last business day of the month.

A period of ten business days following the conferral date is required to post the conferral information to the record.

Diplomas and Certificates

Only the degree, primary major, honors (if earned), and the University Honors program graduate indication will appear on the diploma.

The name on the diploma must be the legal name of the graduate, or within reason. For example, a student can request their middle initial rather than their full middle name.

All credentials will be issued within 20 business days of the degree conferral date provided the student has met all financial obligations. If the student has an outstanding financial obligation, he or she will need to contact the Office of Credit and Collections to settle the balance. The Office of Credit and Collections will then notify the Office of the University Registrar. The student needs to verify their mailing address prior to the diploma being sent out.

If the student does not receive their diploma within 30 days of it being mailed at the address specified through the petition to graduate process, the student should contact the Office of the University Registrar. We will send the student another diploma. However, if the diploma mailing address was not updated, the student will need to provide the updated address and pay the cost of a replacement diploma (\$30).

Degree and Certificate Requirements

Undergraduate Students

Students must fulfill the following university requirements to be eligible for an undergraduate degree or certificate:

Undergraduate Degree

1. General education requirements.
2. All prescribed courses and program requirements.
3. A minimum of 120 credits of work in a bachelor's degree program (more than 120 credits may be required depending on the program of study) or 60 credits in a program leading to an associate degree (more than 60 credits may be required depending on the program of study). A minimum of 30 credit hours of institutional

Campus Programs

credit taken at SNHU, excluding developmental courses. *Note: Credit earned for **ENG 099** (formerly ENG 101) and/or **MAT 050** does not count towards graduation or institutional (30 credit) requirements. Southern New Hampshire University will limit academic residency to twenty-five percent of the degree requirement for all degrees for active-duty servicemembers and their adult family members (spouse and college-age children). In addition, there are no "final year" or "final semester" residency requirements for active-duty servicemembers and their family members. Academic residency can be completed at any time while active-duty servicemembers and their family members are enrolled. Reservist and National Guardsmen on active-duty are covered in the same manner.*

4. An overall undergraduate level GPA of 2.0 or higher; some programs require a higher GPA.

Undergraduate Certificate

1. All prescribed courses and program requirements.
2. A minimum of 12 credit hours of institutional work taken at SNHU.
3. An overall undergraduate level GPA of 2.0 or higher.

NOTE: It is the responsibility of the student to be familiar with his/her program-specific requirements as these may supersede the university's minimum standards.

Graduate Students

Students must fulfill the following university requirements to be eligible for a graduate degree or certificate:

Ph.D. in International Business (on campus only)

1. Complete a minimum of 39 credit hours of required doctoral level courses, and possibly up to 15 credit hours of master's level international business courses as prerequisites for the doctoral level courses.
2. Complete and satisfactorily pass all written/oral comprehensive examinations.
3. Submit and receive approval of dissertation topic.
4. Finalize and receive approval of dissertation research.
5. Complete with a GPA of 3.0 or higher.
6. Complete the program within 8 years of their first day of their first term.

Ed.D. in Educational Leadership (on campus only)

1. Complete a minimum of 48 credit hours of required doctoral level courses with a GPA of 3.0 or higher.
2. Complete and satisfactorily pass all written/oral comprehensive examinations.
3. Complete Human Subjects Research training and submit certificate of completion.
4. Submit and receive approval of dissertation topic.
5. Complete dissertation research.
6. Successfully defend the dissertation proposal.
7. Submit the dissertation proposal and relevant documents to the University Institutional Review Board (IRB).
8. Successfully defend dissertation research.
9. Submit a final copy of the dissertation one month prior to graduation.

Master's Degree

1. All prescribed courses and program requirements.
2. A minimum of 24 credit hours of institutional credits taken at SNHU, with no more than four transfer courses, a maximum of 12 transfer credit hours.
Southern New Hampshire University will limit academic residency to twenty-five percent of the degree requirement for all degrees for active-duty servicemembers and their adult family members (spouse and college-age children). In addition, there are no "final year" or "final semester" residency requirements for active-duty servicemembers and their family members. Academic residency can be completed at any time while active-duty servicemembers and their family members are enrolled. Reservist and National Guardsmen on active-duty are covered in the same manner.
3. An overall graduate level GPA of 3.0 or higher.
4. No more than two grades of "C" or "C+" within the program's prescribed courses.
5. Completion within 8 years of the first day of the first term.

Graduate Certificate

1. All prescribed courses and program requirements.
2. A minimum of 12 credit hours in residence.
3. An overall graduate level GPA of 3.0 or higher.
4. No more than one grade of "C" or "C+" within the certificate's prescribed courses.
5. Completion within 8 years of the first day of the first term.

NOTE: It is the responsibility of the student to be familiar with his/her program-specific requirements as these may supersede the university's minimum standards.

College for America Students

Students must fulfill the following requirements to be eligible for a certificate or an undergraduate degree:

Certificate:

- Mastery of 60 Competencies through the CFA program

Campus Programs

Associates:

- Mastery of 120 Core Competencies through the CFA program

Bachelors:

- Satisfactory completion of all requirements for the CFA AA in General Studies degree OR approval to begin the BA program with the 120 Advanced Competencies
- Mastery of the 120 Advanced Competencies required by each degree through the CFA program

NOTE: It is the responsibility of the student to be familiar with his/her program-specific requirements as these may supersede the university's minimum standards.

Institutional Credit Requirements

Associate degree-seeking students must complete a minimum of 15 institutional credit hours with SNHU. Bachelor's degree-seeking students must complete 30 institutional credit hours from SNHU. Graduate degree-seeking students must complete a minimum of 24 institutional credit hours from SNHU. Institutional credit requirements cannot be fulfilled by developmental courses. Bachelor's degree candidates must complete a minimum of 12 institutional credit hours within the major beyond required school core courses. Associate degree candidates must complete a minimum of 9 institutional credit hours within the major. For a minor, an optional bachelor's degree component, students must complete a minimum of 9 credit hours of institutional credit, and for a certificate students must complete a minimum of 12 credits. Approved international study and consortium courses are considered to be institutional credit.

Students may use the same institutional credit to fulfill requirements for their first certificate and degree of the same level. For additional certificates, students must complete a minimum of 12 additional institutional credits. For additional associate degrees, students must complete a minimum of 15 additional institutional credits. For additional bachelor degrees, students must complete a minimum of 30 additional institutional credits. For additional graduate degrees, students must complete a minimum of 21 additional institutional credits.

Last Hours of Institutional Credit

Students are required to complete their last credit hours at SNHU; for students working toward their bachelor's degree that requirement is the last 12 credit hours and for students working toward their associate degree that requirement is the last 9 credit hours. In extenuating circumstances, students may request that a course or a test score be transferred in during their last credit hours. Students must submit both the "Request to Take Courses at Another Institution" as well as the "Petition for Waiver of Policy" forms prior to their last credit hour requirement as defined above. Forms submitted after these credit hours will be denied. The request will be reviewed by the Office of the University Registrar and must be approved by the Chief Academic Officer of the student's respective unit. This policy will not exempt students from completing the total institutional credits as in the first paragraph.

NOTE: Southern New Hampshire University will limit academic residency to twenty-five percent of the degree requirement for all degrees for active-duty servicemembers and their adult family members (spouse and college-age children). In addition, there are no "final year" or "final semester" residency requirements for active-duty servicemembers and their family members. Academic residency can be completed at any time while active-duty servicemembers and their family members are enrolled. Reservist and National Guardsmen on active-duty are covered in the same manner.

Non-Conferred Completer (NCC)

A "non-conferred completer" is a student that has completed all program requirements or is enrolled in courses that will complete their program requirements.

The Office of the University Registrar will notify students via SNHU email if they fall into one of these categories. Students intending to increase their remaining requirements to graduate (for example, adding a minor) must file a [Program Modification form](#) within 5 business days of the notification email*. If the student does not respond within 5 business days, a registration hold will be placed on the student's account on the 6th business day. The student will be removed from any courses they are registered for in future terms and will not be able to register for any future courses. The Office of the University Registrar will officially confer the student's credential in accordance with normal [petition to graduate](#) deadlines. The graduation fee will be applied to the student's account. The student will not be able to obtain an official transcript or diploma until the account is settled.

If the student does not intend to increase their program requirements they should [Petition to Graduate](#) via [mySNHU](#) in accordance with official [Petition to Graduate](#) Deadlines.

*NOTE: The costs of courses taken above and beyond program requirements are not eligible for financial aid. If the student intends to take additional courses simply to raise their GPA, they must pay for the course (or courses) out-of-pocket. The registration hold will remain in place on the student's account, so registration for these courses must be processed internally. Once the credential in question is officially conferred, the registration hold will be removed.

Posthumous Degree

An academic degree or certificate may be awarded posthumously or to a student who is permanently incapacitated if at least 75 percent of the program institutional credit requirements have been completed (and in the case of thesis-based graduate degrees, the student had achieved significant progress on a thesis or dissertation, according to the opinion of the faculty advisor), the student is in good standing, and meeting the minimum GPA of 2.0 for Undergraduate Students and 3.0 GPA for Graduate and Doctoral Students at the time of death or permanent

incapacitation.

Miscellaneous

Class Cancellations

Class cancellations will be announced in person at the classroom by either a faculty or staff member of the university or posted on official forms issued by the school's dean's office. When in doubt as to whether a class has been cancelled, students should check with the school administrative staff. Unofficial cancellation notices attached to doors or information posted on blackboards should be disregarded.

Class Cancellations due to Weather/Emergency

SNHU Alerts is an optional emergency alert text messaging service for students, faculty and staff. SNHU Alerts is just one method the university will use to communicate emergency information. We will continue to use a variety of methods as appropriate, including e-mail, telephone and the web.

SNHU uses this notification system to send alerts about:

- Crisis situations affecting the SNHU community
- Closings, cancellations, or delays of office hours or classes

To register for SNHU Alerts, please go to <https://snhuweb.snhu.edu/snhu-alerts/>.

Definition of Terms

Definition of Terms

Program Offering

A program offering is any credit or non-credit course of study offered at SNHU by any of its divisions. Examples of program offerings include a concentration, certificate, minor, undergraduate program and graduate program.

Program of Study

A program of study is a coherent, logically-sequenced learning path that progressively leads to the mastery of a predefined set of program outcomes. A program of study is a general term used to describe awarded credentials including an undergraduate or graduate level degree or certificate.

Degree Program

A degree program is any program of study that results in the awarding of a formal, post-secondary degree. It is generally defined as the combination of the degree type (associate, bachelor's, master's, or doctorate) and the major/discipline of study (accounting, business administration, history, etc.).

- **Associate's Degree.** A degree granted for the successful completion of a pre-baccalaureate program of study equivalent to two years of full-time study. An associate's degree includes the equivalent of a minimum of 60 credit hours drawn from general education courses, electives, and courses required for a specific major. At least 15 credit hours must be institutional credits completed at SNHU. Associate Degree programs may not have any program additions (majors, minors, concentrations) added to the base program.
- **Bachelor's Degree.** A degree granted for the successful completion of a baccalaureate program of study equivalent to four years of full-time study. A bachelor's degree includes the equivalent of a minimum of 120 credit hours drawn from general education course requirements, major course requirements, and elective courses. At least 30 credit hours must be institutional credits completed at SNHU.
- **Master's Degree.** A degree awarded for successful completion of a post-baccalaureate program of study. A master's degree includes the equivalent of a minimum of 30 credit hours, with most requiring 36 or more credit hours. All coursework must be at the post-baccalaureate level. At least 24 credit hours must be institutional credits completed at SNHU.
- **Doctorate Degree.** A degree awarded for successful completion of a program of advanced study and scholarly work equivalent to at least 3-years of full-time study beyond the master's degree level. A doctoral degree includes at least 39 credit hours (but may require substantially more) and commonly requires a dissertation, comprehensive exam(s), or a comparable exit option. Required credit hours vary according to discipline and the speed at which the student candidate can complete the work.
- **Undergraduate Certificate.** A formal award that requires completion of an organized program of study to include the equivalent of at least 12 credit hours certifying the satisfactory completion of a postsecondary education program. Undergraduate certificates are comprised of discipline-specific (or interdisciplinary) coursework. At least 12 credit hours must be institutional credits completed at SNHU.
- **Graduate Certificate.** A formal award signifying the completion of an organized program of study to include the equivalent of at least 12 credit hours beyond the bachelor's degree, but not meeting the requirements of a master's degree. All graduate certificate coursework must be at the post-baccalaureate level. At least 12 credit hours must be institutional credits completed at SNHU.

Successful completion of a competency-based program of study fulfills graduation requirements.

Grade Point Average (GPA) Requirements

Campus Programs

A grade point average (GPA) is a measure of scholastic achievement, calculated by dividing the number of quality points earned by the number of credits attempted. A detailed description of how SNHU calculates GPA is included in the current catalog. To meet program of study completion requirements, students must meet certain GPA requirements:*

- Associate's degree requires a cumulative GPA of at least 2.0.
- Bachelor's degree requires a cumulative GPA of at least 2.0, but certain bachelor's degree programs require a higher GPA.
- Master's degree requires a cumulative GPA of at least 3.0.
- The doctoral degree requires a cumulative GPA of at least 3.0.
- Majors may have GPA or minimum grade requirements.**
- Minors may have GPA or minimum grade requirements.**
- Certificates, Undergraduate require a minimum of 2.0 GPA.
- Certificates, Graduate require a minimum of 3.0 GPA.

*The successful completion of competency-based programs of study fulfills GPA requirements.

**See the current academic catalog for GPA and minimum grade requirements for majors and minors, if any.

General Education Requirements

General education requirements strive to provide undergraduate students with an educational foundation of knowledge, skills and cultural awareness.

Students pursuing an associate's degree must complete the equivalent of a minimum of 20* credit hours of general education coursework to include one composition course, one science or mathematics course, and one social and behavioral science course.

Students pursuing a bachelor's degree must complete the equivalent of a minimum of 42 credit hours of general education.

*Per New England Commission of Higher Education requirements.

Major

A major is the disciplinary (or interdisciplinary) area of emphasis for an undergraduate degree program that includes coursework focused on a specific professional or academic area. The total number of credit hours required by a baccalaureate major is at least 42 credits (including school core) with most majors requiring more. Students pursuing a bachelor's degree must complete at least 12 credit hours of institutional credit at SNHU within the major that are in addition to school core courses within the major. Students pursuing an associate's degree must complete at least nine credit hours of institutional credits at SNHU within the major.

No major courses may be used to meet general education requirements.

Minor

A minor is an optional secondary area of emphasis for a Bachelor's degree program intended to enhance or broaden students' knowledge, skills, and abilities.

A minor consists of at least 15 credit hours. Of these, at least nine credit hours must be institutional credits completed at SNHU.

No more than fifty percent of the courses that fulfill a student's minor requirements can also be applied to a student's major requirements. Students cannot minor in the same area of the major or concentration.

Courses taken to complete a student's minor can also be used to fulfill general education, school core, and free elective requirements.

School Core

The School of Business and the School of Arts and Sciences have core requirements as part of their programs. The School of Business Core is comprised of 10 courses designed to meet program accreditation standards. The School of Arts and Sciences Required Courses are three courses from arts and sciences disciplines that complement each major.

Specialization

Used interchangeably with concentration or track. This term is being phased out in favor of the term concentration.

Concentration

A concentration is a sequence of inter-related coursework that a student chooses to pursue within a major or discipline. A concentration generally replaces elective coursework in the major or discipline, allowing students to focus their studies on an area of interest. A concentration is not an official credential, nor is it noted on the diploma. It is, however, acknowledged on student transcripts. A concentration is typically an optional component within a program of study. A concentration consists of at least nine credit hours.

The concentration is part of the major. Beginning with the 2013-2014 academic year, concentration courses will be combined with the major courses on the degree audit so that they will automatically be considered to meet residency requirements.

Campus Programs

Capstone

A capstone is a culminating experience in which students apply the knowledge, skills, and abilities of their degree program to a project or similar demonstration of competency. A capstone generally does not introduce new content for students to learn, but rather asks them to demonstrate that they can integrate their learning into a cohesive body of work.

Elective Courses

An elective is a course that students choose from among various optional courses in a curriculum. Two types of electives exist. One is electives within a specific subject area, which fulfill the requirements of a major or program of study. The second type of electives is free electives, used to complete the number of credits required for a degree (commonly 60 for an associate's, and 120 for a bachelor's). Students may choose any courses they wish to broaden their educational experience while completing their degree requirements.

Foundation Courses, Graduate

Students who are admitted to certain master's degree programs may be required to complete foundational coursework as a prerequisite to advanced coursework. Students should work with their advisor to identify any required foundation courses and applicability to their program.

Course Numbering

001-099	Developmental coursework; does not count toward total hours needed for degree completion.
100-299	Lower division coursework; introductory level.
300-499	Upper division course work.
500-799	Graduate level course work.
800-999	Doctorate level coursework.

Institutional Credit Requirement

Students may use the same institutional credit to fulfill requirements for their first certificate and degree of the same level. For additional certificates, students must complete a minimum of 12 additional institutional credits. For additional associate degrees, students must complete a minimum of 15 additional institutional credits. For additional bachelor degrees, students must complete a minimum of 30 additional institutional credits. For additional graduate degrees, students must complete a minimum of 21 additional institutional credits.

Associate degree-seeking students must complete a minimum of 15 institutional credit hours with SNHU. Bachelor's students must complete 30 institutional credit hours from SNHU. Graduate degree-seeking students must complete 24 institutional credit hours from SNHU. Institutional credit requirements cannot be fulfilled by, developmental courses. Bachelor's degree candidates must complete a minimum of 12 institutional credit hours within the major beyond required school core courses. Associate degree candidates must complete a minimum of 9 institutional credit hours within the major. For a minor, an optional bachelor's degree component, students must complete a minimum of 9 credit hours of institutional credit, and for a certificate, students must complete a minimum of 12 credits. Approved international study and consortium courses are considered to be institutional credit.

Last Hours of Institutional Credit

Students are required to complete their last credit hours at SNHU; for students working toward their bachelor's degree that requirement is the last 24 credit hours and for students working toward their associate degree that requirement is the last 15 credit hours. Occasionally students have a legitimate reason to request that a course or CLEP exam be transferred in during their last credit hours. Students must submit both the "Request to Take Courses at Another Institution" as well as the "Petition to Amend" forms during their last credit hour requirement as defined above. The request will be approved as long as the student completes the external credit before the last 12 credit hours for a bachelor's degree program and nine credit hours for an associate degree program. Forms submitted during or after these credit hours will be denied. This policy will not exempt students from completing the total institutional credits as in the first paragraph.

NOTE: Southern New Hampshire University will limit academic residency to twenty-five percent of the degree requirement for all degrees for active-duty service members and their adult family members (spouse and college-age children). Also, there are no "final year" or "final semester" residency requirements for active-duty service members and their family members. Academic residency can be completed at any time while active-duty service members and their family members are enrolled. Reservist and National Guardsmen on active-duty are covered in the same manner.

Seminar

A seminar is a course offered to a small group of students engaged in intensive study.

Internship

An internship is a course of supervised practical training, frequently in an off-campus workplace, where the student is guided in his or her learning by a site supervisor and a faculty sponsor. Internships may be paid or unpaid, depending on the specific location and duties involved.

Campus Programs

Double Degrees

A student seeking to earn an additional degree of the same level must complete additional institutional credits and complete all other requirements of the new degree. Double degrees may be pursued concurrently.

Students seeking another associate degree must complete at least 15 additional institutional credit hours. Students seeking another bachelor's degree must complete at least 30 additional institutional credits; no more than two courses in the new major may overlap with the major(s) of the previous degree(s). Students seeking another master's degree must complete at least 21 additional institutional credits.

Students will receive individual diplomas for each degree that they earn.

Second Major

A student may elect to earn a second major by completing both the degree requirements associated with a primary major and the requirements of a second major excluding associated school core courses. No more than two courses in the second major may overlap with the primary major. The student's diploma lists the primary major; the transcript reflects both majors.

Second Minor

A student may elect to earn a second minor by completing both the program requirements associated with a primary minor and the requirements of a second minor.

No more than fifty percent of the courses that fulfill a student's secondary minor requirements can also be applied to a student's primary major or primary minor requirements.

Courses taken to complete a student's secondary minor can also be used to fulfill general education, school core, and free elective requirements.

Second Concentration

Multiple concentrations are allowed at the undergraduate level in any program as long as both concentrations provide a more in-depth focus related to the major and each concentration has at least nine credits separate from the major and the other concentration. Requests to add additional concentrations must be reviewed and approved by the students' advisor and appropriate faculty member.

Multiple concentrations are not permitted at the graduate level.

College for America Programs Key Terms

Below are some key terms that you will encounter during the course of your degree program. If you have any questions, please talk to your Advisor.

A **Competency** is a "can do" statement, such as "can define and use marketing terminology and concepts" or "can generate a variety of approaches to addressing a problem." At CfA you master Competencies by completing Projects.

A **Goal** is an achievable amount of work containing 6 Competencies and organized into Projects.

Projects are workplace relevant activities that enable you to demonstrate mastery of Competencies. Some Goals provide alternative paths allowing choice in the complexity of the Projects you complete in that Goal.

Mastery lies at the heart of the College for America program. At CfA, you work on Projects that enable you to demonstrate what you know and can do. You either complete a Project by mastering a given set of Competencies, or you receive a 'Not Yet.'

Not Yet: If you receive a 'Not Yet' from a Reviewer . . . Congratulations! A 'Not Yet' indicates that you are on your way to mastering the Competencies inside the Project. When you receive a 'Not Yet,' you also receive detailed and targeted feedback from the Reviewer, so you know what you need to do to master the Competencies in that Project.

The Reviewer may recommend resources for you to review or offer encouraging and specific suggestions to help you move toward mastery. You can continue to submit the Project until you achieve mastery of all the Competencies. Feel free to ask the Reviewer for clarification on the feedback, the Rubric criteria, or talk to your Advisor if you have questions.

Kudos: Each week you should complete academic activities and earn Kudos. Kudos are participation points that help keep you on track to reaching your goals. You earn Kudos for completing academic activities. See the student handbook for more details.

General Key Terms

Degree Program: A degree program is any program of study that results in the awarding of a formal, post-secondary degree. It is generally defined as the combination of the degree type (associates, bachelor's) and the major/discipline of study (General Studies, Communication, Healthcare, etc.).

Associate's Degree: A degree granted for the successful completion of a pre-baccalaureate program of study equivalent to two years of full-time study. An associate's degree includes the equivalent of a minimum of 60 credit hours.

Campus Programs

Bachelor's Degree: A degree granted for the successful completion of a baccalaureate program of study equivalent to four years of full-time study. A bachelor's degree includes the equivalent of a minimum of 120 credit hours.

Capstone: A capstone is a culminating experience in which students apply the knowledge, skills, and abilities of their degree program to a project or similar demonstration of competency. A capstone allows students to demonstrate that they can integrate their learning into a cohesive body of work.

Final Exam

If a student has three or more finals scheduled for the same day he/she may work with their respective faculty member(s) to reschedule one of the exams. Rescheduling arrangements should be made as early as possible, but no later than one week after midterm grades are submitted. The exam will be moved to a time which is agreed upon and documented on the Final Exam Conflict Form.

For documentation purposes the Final Exam Conflict Form should be completed and placed on record in the School Dean's Office where the student's major resides.

If a student is unable to reschedule with faculty members, the School Dean's Office will arrange for the rescheduling of the exam(s).

General Education, Anti-Encroachment

Schools or Programs can dictate the MAT course in the Foundation section of the General Education program and any two (2) additional courses in the Exploration section of the General Education Program.

Institutional Research Review Board Summary

The UC IRB shall protect the rights and welfare of human subjects recruited to participate in research activities conducted on or by UC stakeholders. The UC IRB shall have the primary responsibility to review and monitor all human subject research in compliance with all local, state, and federal laws; SNHU policies and procedures; and the highest standards of ethical conduct and practice. The UC IRB follows SNHU's [Institutional Research Review Board Policies and Procedures Manual](#).

The members are charged to:

- Review all proposals involving human subject research conducted at SNHU and/or in collaboration with other institutions. This includes all human subject research conducted under the direction of any employee or agent in connection with his or her institutional responsibilities or use of SNHU's name or academic or nonacademic titles.
- Approve, require modifications to, or disapprove the aspects of research activities that involve human subjects.
- Notify applicants of decisions made by the board concerning their proposed research.
- Conduct periodic reviews of ongoing research projects that involve human subjects and maintain records of review proceedings, decisions, and activities, in accordance with federal and SNHU guidelines, for at least three (3) years following completion of the projects.
- Develop policies, procedures, and instruments needed to align SNHU policies with the scope and purpose of the UC IRB and disseminate those policies, procedures, and instruments to the UC community.

Membership:

Federal regulations dictate that IRB membership will include:

- at least five members that come from varied demographic backgrounds and professions,
- at least one member whose primary concerns are in nonscientific areas,
- at least one member whose primary concerns are in a scientific area, and
- at least one member who is not otherwise affiliated with the institution.

Voting Members:

- Chaired by an academic staff member with considerable experience with IRBs and/or research compliance, appointed by UC CAO or designee,
- vice chaired by an academic staff member with considerable experience with IRBs and/or research compliance, appointed by UC CAO or designee,
- one outside community member that is a person who is not otherwise affiliated with SNHU and appointed by the CAO or designee.

Non-Voting Members:

- CAO or designee, and
- a Secretary (Project Analyst/IRB Administrator) selected by the Chair.

Officer Duties:

The Officers of the UC IRB shall be a Chair, a Vice Chair, and Secretary (Project Analyst/IRB Administrator). In addition to the standard duties, the Chair shall invite researchers to meetings as appropriate, ensure that each element of review is covered in meetings, and serve as a liaison between researchers and the IRB.

Campus Programs

Term of Office:

The UC IRB Chair and Vice Chair serve for a three (3) year term. Other members serve for a one (1) year term.

Meetings:

The UC IRB does not have scheduled meetings and will meet as required.

Records and Right to Privacy

Academic Record Retention

Introduction

Southern New Hampshire University (the "University") requires that University student academic and course records be retained for specific periods of time. These academic records must be managed according to the guidelines outlined in this policy.

This policy establishes guidelines that set forth the minimum length of time that records should be retained. This will allow the University to:

- Meet its business and legal needs
- Optimize the use of space and minimize the cost of academic records retention

Ensure that outdated or useless records are deleted/destroyed

Record retention periods for selected academic records may be increased for various reasons including government regulation, judicial or administrative orders, contracts, pending or threatened litigation, or audit requirements. Such changes in the records retention schedule supersede the requirements listed in this schedule and will be so noted on the appropriate document. When needed, the Dean of the University Library, or designee, provides advice as to what non-current records of enduring value should be transferred to the University Archives at the Shapiro Library.

Definitions

Academic Record

An academic record is anything containing academic or course related information regardless of format (paper, digital, photographic, recordings, etc.). Typical academic records include transcripts, admission documents, waivers, and other items found in student files, as well as instructor grade books, final exams, etc. Records will be retained, archived, and/or destroyed based on the retention periods defined in this policy.

Retention Schedules

A descriptive schedule that provides a guideline for the minimum length of time that selected records should be retained before they are deleted/destroyed or placed in archival preservation.

Retention Period

Minimum required length of time for maintaining records. Records may be held longer than the retention period, but should not be disposed of prior to that date.

Records Destruction

The physical or electronic destruction of a record after it has become obsolete or otherwise in accordance with this policy.

Litigation Hold

A communication issued as the result of current or anticipated litigation, audit, and government investigation or other similar matter that suspends the normal process regarding the retention and disposition of University records.

Associate

An employee, faculty member, or staff member of the University.

Policy

Purpose

The purpose of this policy is to allow the University to make sensible decisions about what information to keep and what information to discard, and to establish procedures for the maintenance, retention, preservation, and disposal of academic records.

Campus Programs

Roles and Responsibilities

All employees, faculty members, or staff members of the University are responsible for being aware of, and adhering to, the provisions outlined within this Policy.

Procedure

Records for which there is a retention requirement in the retention schedule are recommended to be deleted/destroyed when they have reached the conclusion of their retention period. Academic records not specifically identified in this document should be retained a minimum of five (5) years if there is a legitimate business reason to do so, and deleted/destroyed if there is not.

Academic records should be deleted/destroyed in ways commensurate with their confidentiality and with methods which do not permit recovery, reconstruction or future use of confidential information. For example, paper records should be cross-shredded and not placed in recycle bins, electronic or machine readable records should undergo multiple overwrites, physical destruction, or degaussing. E-mails should be handled as any other record in terms of retention and disposal.

Campus Programs

Academic Record Retention/Purge Schedule

Admission records for applicants who do not enroll

Retention Period: 2 years after application term

Record Type	Description
Acceptance Letters/Admission Letters/Decision Letters	Notices of admission, denial, or waitlist
Alien Registration Receipt Card (international students)	Evidence of admissibility as a permanent resident
Application for admission or readmission	Admission applications such as undergraduate, graduate, international, or non-degree/special admittance
Attestation Form	Student document certifying completion of high school program
Credit by examination	Reports/scores on AP, CLEP, etc.
Diploma	
Disciplinary Action	Documentation of violation and Disciplinary Action, including plagiarism
Dual Enrollment forms	
Entrance examination reports/test scores	Standardized test scores, such as ACT/SAT, LSAT, MCAT, GRE, TOEFL
Honors Application/Honors Essay	
1-20 (international students)	Certificate of eligibility for F-1 visa status
Letter of intent	
Manuscript (admission)	
Military documents	including Certificate of Eligibility, DD214, etc.
Personal Statement	
Request for final transcript letters	
Resume	
School Report	Common Application: includes senior grades, recommendation and transcript
Transcript - high school	
Transcript - other colleges	Including college courses in progress
Preliminary Transfer Credit Evaluation	
Statement of Educational Costs (international students)	Estimate of total school year costs
Statement of Financial Responsibility (international students)	Evidence of adequate financial resources
Waivers of rights of access	Waiving right of access to admission letters of recommendation
Waiver requests	Forms to waive: transfer credit evaluation from another institution, application fee, deposit fee

Admission records for applicants who do not enroll and Student Academic Records

Retention Period: 4 years after application term

Record Type	Description
Text Opt In	

Student Academic Records

Retention Period: 5 years from receipt

Record Type	Description

Campus Programs

Academic Advising Records	Including, but not limited to, electronic and non-electronic documents, forms and records
Acceptance Letters/Admission Letters/Decision Letters	Notices of admission, denial, or waitlist
Add/Drop Course Withdrawal Form	(non-electronic)
Alien Registration Receipt Card (international students)	Evidence of admissibility as a permanent resident
Application for admission or readmission	Admission applications such as undergraduate, graduate, international, or non-degree/special admittance, MFA Manuscript
Athletic Eligibility Reports	
Attestation Form	Student document certifying completion of high school program
Class Schedules (students)	Student schedules for each term
Enrollment Verifications	Verifications of enrollment, graduation, GPA, and other related academics
Entrance examination reports/test scores	Standardized test scores, such as ACT/SAT, LSAT, MCAT, GRE, TOEFL
Degree Audit records	Degree audits in support of graduation clearing
Grade Change Forms	Non-electronic record of authorization to change grade
Grade Dispute Documents	Student final grade disputes
Honors Application/Honors Essay	
1-20 (international students)	Certificate of eligibility for F-1 visa status
Leave of Absence Forms	
Major/Minor Add/Drop Forms	
MFA Manuscript	
Military documents	
Personal Data Information Forms	Including Certificate of Eligibility, DD214, etc.
Personal Statement	Non-electronic change of address and other demographic data (excluding name changes)
Petitions to Graduate	
Preliminary Transfer Credit Evaluation	Degree application, record of degree name, etc.
Registration/Enrollment Records	
Release from high school or Dual Enrollment forms	(non-electronic)
Resume	
Returned Diplomas	
Scholastic Standing Documentation	Notice of academic scholastic standing related to academic nonperformance/deficiency (except academic dismissal, which is permanent)
Statement of Educational Costs (international students)	Estimate of total school year costs
Statement of Financial Responsibility	Evidence of adequate financial resources (international students)
Student Inquiries Relating to Academic Records	

Campus Programs

Teacher Certifications	
Transcript Request Forms	Official transcript requests by student
Transfer Credit Evaluations	
VA certification records	Certifying documents for federal VA benefits
Waiver requests	Forms to waive: transfer credit evaluation from another institution, application fee, deposit fee
Withdrawal from the University Forms	(non-electronic)

Course Records

Retention Period: 1 year after course completion

Record Type	Description
Final Exams	If not returned to the student
Graded Coursework	If not returned to the student

Course Records

Retention Period: 2 years after course completion

Record Type	Description
Faculty grade book	Record of students in course and work completed

Student Academic Records

Retention Period: 7 years after course completion

Record Type	Description
Field Trip permission slips	

Student Academic Records

Retention Period: 10 years after graduation or non-attendance

Record Type	Description
Athletic Records	Initial and continuing eligibility information, academic information, documentation of participation, tutor evaluation and assessment
Data Change Logs	Electronic log of changes to enrollment and other data, including date/time stamp information and use that changed data if that data is maintained separately in the system
Email data/information	Emails and other electronic communications that authorize academic/enrollment actions and/or provide directory/non-directory information about a student
Enrollment Data	Electronic record of enrollment in classes, including records of drop, add and enrollment change activity
Letter of Intent	

Student Academic Records

Retention Period: 50 years after graduation or non-attendance

Record Type	Description
Student Demographic Information	Electronic student data including student characteristics, date of birth, former names, address information, photo ID and ethnic information, etc.

Student Academic Records

Retention Period: Permanent

Record Type	Description
Academic Dismissal	Notice of academic action related to academic non-performance/deficiency
Academic Integrity Code Violations (with sanctions)	Documentation of violation and Disciplinary Action, including plagiarism
Approvals for:	

Campus Programs

Course Audit	
Course Repeat	
Credit/no Credit	Authorization for various enrollment options
Exceptions	Exceptions to academic rules
Overrides	Exceptions to academic rules
Petitions to Amend	Exceptions to academic rules
Waivers	Approvals to meet program requirements with administrative action
Catalogs	Published annually or bi-annually, record of courses, degrees, and programs of study offered
Class Lists/Rosters	Record of class rosters for each term
Commencement programs	Published annually or bi-annually, record of courses, degrees, and programs of study offered
Comprehensive Exams	
Credit by examination	Reports/scores on AP, CLEP, etc.
Degree statistics	Record of degrees granted by institution per graduation term and/or annually
Diploma	
Enrollment Statistics	Per term report of enrolled students, eg. by class, by course, totals, headcount, and FTE
FERPA:	(unless terminated by student)
Requests for formal hearings	Student-initiated request for formal hearing regarding amendment of education record
Authorization to disclose non- directory information	Necessary for compliance with record keeping requirements in FERPA
Authorization to prevent or resume directory information	Student request to opt-out of directory information disclosure
Statements on content of records regarding hearing panel decision	Documentation when student request for amendment of a record is not granted
Written decision of hearing panels	Decisions resulting from hearings regarding amendment of education records
Grade Data	Electronic record of submitted grades and grade changes, including date/time stamp and user data
Grade distribution and other grade statistics	Report of grades, given, including summary grade point statistics by class
Grade submission sheets	Non-electronic original record of grades submitted at end of term
Graduation lists	Lists of graduates for graduating class
Narrative Evaluations and Competency Assessments	
Race/ethnicity reporting	Report of student enrollment, graduation, and other metrics by race and ethnic origin
School Report	Common Application: includes senior grades, recommendation and transcript
Transcripts - high school	Including request for final transcript letters
Transcripts - other colleges	Including college courses in progress documents and request for final transcript letters
Thesis/Dissertation	

Change of Student Name, SSN or DOB

To request a change of legal name, diploma name, social security number, or date of birth from the one that is currently on record at SNHU, a student must submit appropriate documentation using the Change to Biographical Record form through the Service Portal on mySNHU. **This must be completed by the student requesting the change.**

The student must provide official supporting documentation. Acceptable documentation is limited to one of the following:

Campus Programs

- Driver's license
- Marriage certificate
- Divorce decree
- Social Security card
- Court order verifying name change
- Government-issued non-driver ID card
- Government-issued passport

NOTE: Students who have submitted a Petition to Graduate, and wish to have their name updated on their diploma, should indicate that in their request.

FERPA Student Right to Privacy

Student Rights Under FERPA

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

(1) The right to inspect and review the student's education records within 45 days of the day the University receives a request for access.

A student should submit to the university registrar, dean, head of the academic department, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

(2) The right to request the amendment of the student's education records that the student believes are inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA.

A student who wishes to ask the University to amend a record should write the University official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed. If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

(3) The right to provide written consent before the University discloses personally identifiable information from the student's education records, except to the extent that FERPA authorizes disclosure without consent.

The University discloses education records without a student's prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted as its agent to provide a service instead of using University employees or officials (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

The University forwards education records to other agencies or institutions that have requested the records and in which the student seeks or intends to enroll or is already enrolled as long as the disclosure is for purposes related to the students' enrollment or transfer.

A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University.

(4) The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

The name and address of the Office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5901.

SNHU Directory Information

In compliance with FERPA, Southern New Hampshire University (SNHU) does not disclose personally identifiable information contained in student education records, except as authorized by law. SNHU may disclose appropriately designated Directory Information without a student's consent, unless the student has advised SNHU to the contrary in accordance with established procedures.

SNHU has designated the following information as directory information:

- Student's name
- Address(es)
- Telephone listing(s)
- Electronic mail address
- Photograph(s)
- Fields of study (major(s), minor(s), etc.)

Campus Programs

- Dates of attendance/Enrollment status
- Anticipated program completion date
- Class level
- Degrees, honors, and awards received
- Weight and height of members of athletic teams
- Participation in officially recognized activities and sports
- The most recent educational agency or institution attended

If you do not want SNHU to disclose directory information from your education records without your prior written consent, you must notify the University in writing. This may be done at any time by submitting an [Authorization to Prevent or Resume Disclosure of Directory Information](#) to the Office of the University Registrar by fax 603-629-4647 or by email to registrar@snhu.edu. The primary purpose of Directory Information is to allow the University to confirm attendance to prospective employers and other third parties, and to include this type of information from your education records in certain University publications. Examples include: a playbill, showing your role in a drama production, the annual yearbook, Dean's List, President's List, recognition lists, Commencement Ceremony Program, and sports activity sheets/team rosters, showing weight and height of team members.

Directory information, which is information that is generally not considered harmful or an invasion of privacy if released, can also be disclosed to outside organizations without prior written consent. Outside organizations include, but are not limited to, companies that manufacture class rings or publish yearbooks. Disclosures of directory information will be limited to specific parties for specific purposes or both.

Solomon Amendment & FERPA

Solomon Amendment is a federal law that allows military recruiters to access the following "student recruiting" information on students age 17 and older at the time of the request:

- First Name
- Last Name
- Student Class Level (e.g. Freshman, Sophomore)
- Academic Program (e.g. BS in Accounting)
- Age
- Phone – Cell
- Phone – Home
- SNHU Email Address
- Preferred Address

Under the Solomon Amendment, information will be released for military recruitment purposes only. The military recruiters must be from one of the 12 eligible units within the five branches of the service:

1. **Army:** Army, Army Reserve, Army National Guard
2. **Navy:** Navy, Navy Reserve
3. **Marine Corps:** Marine Corps, Marine Corps Reserve
4. **Air Force:** Air Force, Air Force Reserve, Air Force National Guard
5. **Coast Guard:** Coast Guard, Coast Guard Reserve

The Department of Education has determined that the Solomon Amendment supersedes most elements of FERPA. An institution is therefore obligated to release data included in the list, which may or may not match FERPA directory information list. However, if a student has submitted an [Authorization to Prevent Disclosure of Directory Information](#) to the Office of the University of Registrar to prevent the release of his/her directory information, then no information from the student's education record will be released under the Solomon Amendment.

Releasing Academic Records of Deceased Students

Southern New Hampshire University treats academic records of a deceased student with the same level of privacy it afforded prior to death. If there is an active, signed Authorization for Disclosure of Non-Directory Information on file then SNHU will honor that document; if no such authorization is on file then SNHU will not release non-directory information.

Request for Transcript

Except as provided by the Federal Family Education Rights and Privacy Act and in instances in which a student consents to release his or her transcript to another party, the Office of the University Registrar will not release a transcript to any person other than to the person identified by name on the transcript. Transcripts will not be furnished to students or former students whose financial obligations to the university have not been satisfied. To request an official copy, please visit the [Credential Solutions](#) website.

Students Forwarding SNHU Email to Personal Email

All students are expected to access their official SNHU email accounts regularly to check for official University communication and to respond as necessary to such communications. Students who choose to forward email from their official university email address to a non-university email system are solely responsible for all consequences arising from such forwarding arrangements. These may include, but are not limited to, any failure by the non-university system to deliver or retain official University communications, lost or misdirected communications, including those that result in violation of FERPA privacy regulations. Students communicating from a non-university email address may be asked to resend from their SNHU email in order to receive a response or action.

Campus Programs

Transcripts from Other Institutions

Student transcripts from previously-attended institutions that were provided to the university for any reason become the property of SNHU and are considered official only at the time of receipt. SNHU does not provide copies of transcripts from other institutions that are part of a student's education record to the student or any other third party. In order to obtain accurate up-to-date information and assure that no protocol of the issuing institution is circumvented, a student must contact the originating school for a copy of that transcript.

Rights and Responsibilities

Disability Access Statement

Individuals with disabilities requiring accommodations may contact the Campus Accessibility Center at 603.644.3118 or cac@snhu.edu.

Non-Discrimination, Equal Access & Equal Opportunity

Non-Discrimination, Equal Access & Equal Opportunity Statement

Consistent with all applicable federal and state laws, rules, regulations and ordinances (e.g. Title III, Title VI, Title VII, Title IX, Section 504 of the Rehabilitation Act, and the Americans with Disabilities Act as amended), and in recognition of its responsibilities to its faculty, staff, and students as well as to the communities in which it operates, Southern New Hampshire University reaffirms its continuing commitment to afford qualified or qualifiable individuals equal access and equal opportunity within the University. To ensure equal access and equal opportunity, Southern New Hampshire University shall not discriminate against any individual or group because of race, color, creed, ethnicity, sex, religion, national origin, citizenship, marital or parental status, disability (including intellectual disability), age, gender, gender identity or expression, sexual orientation, pregnancy, veteran/military status, genetic information, or on any other legally prohibited basis.

Discrimination Complaint Process

The University will respond swiftly to concerns raised about behavior that is considered discriminatory, harassing or hateful. Complainants can expect a thorough investigative process which is outlined in the [Discrimination Complaint Protocol](#).

- **University College - Campus Students** may file a report in one of two ways. First by filing a report in person with the Office of Public Safety or by filing an online [Incident Form](#). A staff member from the Office of Community Standards or Title IX Coordinator and Equity Officer will be in touch once a report is filed.

Sexual Misconduct

1. Introduction

Southern New Hampshire University ("the University"), in compliance with the spirit of various federal and state laws (e.g., Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, title VII of the Civil Rights Act of 1964, the Violence Against Women Reauthorization Act of 2013 ("VAWA"), and other similar state and federal statutes and regulations), adopts the policy and fosters an environment where no individual may threaten the health, safety and welfare of a member of the University community; or any person on University property; or at a University sponsored or supervised activity, through the commission of a sexual assault, engaging in sexual harassment, discrimination, battery, and/or misconduct, including acquaintance rape.

The University does not condone and will not tolerate sexual misconduct, sexual harassment or sexual violence of any kind. The University prohibits rape, domestic violence, dating violence, sexual assault, stalking, and cyber-stalking, as well as discrimination or harassment based on sex.

The University encourages the reporting of sexual misconduct that is prompt and accurate. This allows the University community to quickly respond to allegations and offer immediate support to the victim. The University is committed to protecting the confidentiality of victims as permitted under law and will work closely with students who wish to obtain confidential assistance regarding an incident of sexual misconduct. Certain professionals at the University are permitted by law to offer confidentiality. Those who do not maintain the privilege to offer confidentiality are expected to keep reports private to the extent permitted under the law and University policy. This means that they may have to report to University officials, but will not broadcast the information beyond what is required by law and policy. All allegations will be thoroughly reviewed and appropriately investigated in a prompt manner, and both the complainant and the accused will be afforded equitable rights during the process.

The University does not discriminate on the basis of sex in its educational programs and in other activities operated by the University and is required by Title IX, and specifically 34 C.F.R. Part 106.9, not to discriminate in such a manner. This extends to Associates of and applicants for admission to the University. Inquiries concerning the application of Title IX may be directed to the University's Title IX Coordinator.

In an effort to promote a safe and secure campus environment and prevent acts of sexual misconduct from occurring, the University engages in ongoing prevention and awareness education programs. All incoming students and employees are required to participate in these programs, and all members of the University/university community are encouraged to participate throughout the year in ongoing campaigns and trainings focused on the prevention of sexual misconduct on campus.

2. Definitions

Acquaintance Rape - Forced, manipulated or coerced sexual contact committed by someone who knows the victim

Associate - A faculty member, staff member, or University personnel

Consent - Consent is the equal approval, given freely, willingly, and knowingly of each participant to desired sexual involvement. Consent is an affirmative, conscious decision -indicated clearly by words or actions-to engage in mutually accepted sexual contact. A person forced to engage in sexual contact by force, threat of force, or coercion has not consented to contact. Coercion includes unreasonably pressuring another to engage in sexual activity. Lack of mutual consent is the crucial factor in any sexual misconduct. Consent to some form of sexual activity does not necessarily constitute consent to another form of sexual activity. Silence without demonstrating permission does not constitute consent.

Consent is not valid when a person is incapacitated, or when an intellectual or other disability prevents a person from having the capacity to give consent. A person is incapacitated if they lack the capacity to consent to sexual activity because the person is asleep, unconscious, mentally and/or physically helpless, or otherwise unaware that sexual activity is occurring.

Incapacitation is not necessarily the same as legal intoxication. Where alcohol or other drugs are involved, evaluating Incapacitation requires an assessment of how the consumption of alcohol and/or drugs affects a person's: decision-making ability; awareness of consequences; ability to make informed, rational judgments; capacity to appreciate the nature and quality of the act; or level of consciousness. The assessment is based on objectively and reasonably apparent indications of incapacitation when viewed from the perspective of a sober, reasonable person. Under New Hampshire State Law, a person under sixteen years of age cannot consent to sexual contact.

Campus Programs

Dating Violence - "Dating Violence" includes violence committed by a person:

- (1) who is or has been in a social relationship of a romantic or intimate nature with the victim; and
- (2) where the existence of such a relationship shall be determined based on a consideration of the following factors:
 - a. the length of the relationship
 - b. the type of relationship.
 - c. the frequency of interaction between the persons involved in the relationship.

Discrimination - Treating an individual differently in the terms or conditions of his or her employment or education on the basis of his or her race, color, religion, sex, ethnicity, national origin or ancestry, age, physical or mental disability, sexual orientation, gender identity, gender expression, genetic information, veteran or military status, and all other categories protected by applicable state and federal laws.

Domestic Violence - The State of New Hampshire defines domestic violence as the commission or attempted commission of one of the following offenses against a victim who is a family or household member or a current or former sexual or intimate partner of the offender:

- assault or reckless conduct
- criminal threatening
- sexual assault
- interference with freedom
- destruction of property
- unauthorized entry,
- harassment, and
- cruelty to animals.

The offense or attempted offense must represent a credible threat to the safety of the victim. This may require consideration of all acts by the perpetrator that reflect an ongoing pattern of behavior which reasonably causes or has caused the victim to fear for his or her safety or well-being.

Gender-Based Harassment - "Gender-based harassment" is unwelcome conduct of a nonsexual nature based on a student's actual or perceived sex, including conduct based on gender identity, gender expression, and nonconformity with gender stereotypes.

Hostile Environment - A "hostile environment" exists when sex-based harassment is sufficiently serious to deny or limit the student's ability to participate in or benefit from the University's programs or activities.

A hostile environment can be created by anyone involved in a University's program or activity (e.g., administrators, faculty members, students, and campus visitors).

In determining whether sex-based harassment has created a hostile environment, the University considers the conduct in question from both a subjective and objective perspective. It will be necessary, but not enough, that the conduct was unwelcome to the student who was harassed. But the University will also need to find that a reasonable person in the student's position would have perceived the conduct as undesirable or offensive in order for that conduct to create or contribute to a hostile environment.

To make the ultimate determination of whether a hostile environment exists for a student or students, the University considers a variety of factors related to the severity, persistence, or pervasiveness of the sex-based harassment, including: (1) the type, frequency, and duration of the conduct; (2) the identity and relationships of persons involved; (3) the number of individuals involved; (4) the location of the conduct and the context in which it occurred; and, (5) the degree to which the conduct affected one or more student's education.

The more severe the sex-based harassment, the less need there is to show a repetitive series of incidents to find a hostile environment. Indeed, a single instance of sexual assault may be sufficient to create a hostile environment. Likewise, a series of incidents may be sufficient even if the sex-based harassment is not particularly severe.

First Amendment Considerations This policy does not impair the exercise of rights protected under the First Amendment. Nor does it create First Amendment rights that do not currently exist within a private post-secondary institution. The University's sexual misconduct policy prohibits only sex-based harassment that creates a hostile environment. In this and other ways, the University applies and enforces this policy in a manner that respects the First Amendment rights of students, faculty, and others.

Sex-Based Harassment - "Sex-based harassment" includes sexual harassment and gender-based harassment.

Sexual Assault - New Hampshire law defines three levels of Sexual Assault: Sexual Assault, Felonious Sexual Assault, and Aggravated Felonious Sexual Assault.

Sexual Assault (RSA 632-A:4) means unwanted or unwelcome touching of a sexual nature, including: fondling; penetration of the mouth, anus, or vagina, however slight, with a body part or object; or other sexual activity that occurs without valid Consent.

Felonious Sexual Assault (RSA 632-A:3) includes the offense often referred to as the "statutory rape law," which involves sexual penetration of a person between the ages of 13 and 16 when the age difference between the actor and the other person is 4 years or more. It also applies when a person is in a position of authority over another and coerces that other person to engage in sexual contact with the actor or with him/herself in the actor's presence.

Campus Programs

Aggravated Felonious Sexual Assault (RSA 632-A:2) is defined as a Sexual Assault under certain circumstances, including but not limited to: use or threat of physical violence or superior physical strength on the victim, coercion by threatened retaliation against the victim or another person, submission under false imprisonment, kidnapping or extortion, or sexual assault after the administration without prior consent of an intoxicating substance which incapacitates the victim.

Sexual Battery - Sexual contact that occurs without consent.

Sexual Exploitation - "Sexual exploitation" occurs when a person takes sexual advantage of another person for the benefit of anyone other than that person without that person's consent. Examples of behavior that could rise to the level of sexual exploitation include:

- Prostituting another person;
- Recording images (e.g., video, photograph) or audio of another person's sexual activity, intimate body parts, or nakedness without that person's consent;
- Distributing images (e.g., video, photograph) or audio of another person's sexual activity, intimate body parts, or nakedness, if the individual distributing the images or audio knows or should have known that the person depicted in the images or audio did not consent to such disclosure and objects to such disclosure; and,
- Viewing another person's sexual activity, intimate body parts, or nakedness in a place where that person would have a reasonable expectation of privacy, without that person's consent, and for the purpose of arousing or gratifying sexual desire.

Sexual Harassment - As defined in the 1980 Equal Employment Opportunity Commission's Guidelines On Sexual Harassment, sexual harassment encompasses "unwelcome sexual advances, requests for sexual favors and other verbal or physical conduct of a sexual nature" such as intentional patting, pinching, touching or other sexually suggestive behavior that is sufficiently serious to deny or limit a student's ability to participate in or benefit from the education program. Sexual harassment occurs when:

1. Such conduct has the purpose or effect of unreasonably interfering with an individual's work performance or educational experience, creating an intimidating or hostile employment, educational or living environment for an individual; or
2. Such conduct has the purpose or effect of abusing, threatening, or intimidating an Associate or student through insulting or degrading sexual remarks or conduct; or
3. Submission to such conduct is made, either explicitly or implicitly, a term or condition of an individual's employment or of a student's status in a course, program or activity; or
4. Submission to or rejection of such conduct is the basis for academic or employment decisions affecting an individual; or
5. Such conduct is directed against an individual persists despite requests for its cessation and/or when a claim of sexual harassment has resulted in retaliation against Associates/students for complaining about such behavior.

Sexual Misconduct - Any sex discrimination that can include discrimination, sex-based harassment, sexual battery, gender-based harassment, sexual harassment, sexual violence or assault, rape, sexual coercion or exploitation, sexual threats or intimidation, domestic violence, dating violence, stalking, and cyber-stalking.

Stalking - Under New Hampshire state law (RSA 633.3), Stalking occurs when a person:

1. engages in a course of conduct or repeatedly commits acts toward another person, under circumstances that would place the person in reasonable fear for safety, or of harm or bodily injury to self or others; or
2. engages in a course of conduct that the person knows will place that individual in fear for his or her personal safety or the safety of that individual's immediate family; or
3. after being served with a protective order prohibiting contact with an individual, purposely, knowingly, or recklessly engages in a single act of conduct that is included in the "Course of Conduct" definition below.

A course of conduct refers to a pattern of behavior of two or more acts over a period of time that include any of the following acts:

1. Threatening the safety of the targeted person or an immediate family member.
2. Following, approaching, or confronting that person, or a member of that person's immediate family.
3. Appearing in close proximity to, or entering the person's residence, place of employment, school, or other place where the person can be found, or the residence, place of employment or school of a member of that person's immediate family.
4. Causing damage to the person's residence or property or that of a member of the person's immediate family.
5. Placing an object on the person's property, either directly or through a third person, or that of an immediate family member.
6. Causing injury to that person's pet, or to a pet belonging to a member of that person's immediate family.

Any unwelcome act of communication as defined in N.H. RSA 644:4, II, including through email, text, phone, mail, etc.

Unwelcome Conduct - Conduct is considered "unwelcome" if the individual did not request or invite it and considered the conduct to be undesirable or offensive.

Unwelcome conduct may take various forms, including, name-calling, graphic or written statements (including the use of cell phones or the Internet), or other conduct that may be physically threatening, harmful, or humiliating. Unwelcome conduct does not have to include intent to harm, be directed at a specific target, or involve repeated incidents. Unwelcome conduct can involve persons of the same or opposite sex.

Campus Programs

Participation in the conduct or the failure to complain does not always mean that the conduct was welcome. The fact that an individual may have welcomed some conduct does not necessarily mean that they welcomed other conduct. Also, the fact that a person requested or invited conduct on one occasion does not mean that the conduct is welcome on a subsequent occasion.

3. Policy Scope

This policy applies to all members of the University Community including all students, faculty, staff, and other university officials, whether full or part-time and guest lecturers, as well as to conduct by third parties (i.e., individuals who are neither students nor employees, including but not limited to guests and consultants) directed toward, University students, faculty, or staff members. The policy applies to these parties regardless of sexual orientation or gender identity or expression. The policy governs the conduct of all faculty, staff, administration, Associates, students, volunteers and visitors at off-campus University sponsored events, including, but not limited to academic and educational programming, internships, study abroad programs, athletic events, and all other University programming, as well as to the conduct of all faculty, staff, administration, Associates, students, volunteers and visitors occurring off-campus but having an effect on the University's educational environment or a victim's educational experience.

Purpose

To define, prevent, and respond to Sexual Misconduct.

Prohibited Conduct

The University strictly prohibits all forms of Sexual Misconduct. As defined above, this includes discrimination, sex-based harassment, sexual battery, gender-based harassment, sexual harassment, sexual violence or assault, rape, sexual coercion or exploitation, sexual threats or intimidation, domestic violence, dating violence, stalking, and cyberstalking. Sexual Misconduct is prohibited whether occurring on or off campus and whether directed against a member of the University community or outside the University. Allegations of sexual misconduct are investigated and processed in accordance with the discipline process outlined herein and in the Student Handbook, Employee Handbook, and/or SNHUPEA Agreement.

Reporting Policy

The University encourages community members to report incidents of sexual harassment, sexual assault or any other sexual misconduct immediately to the University and the police. A report may be made by the victim of a violation of this Policy or by any other person having knowledge of the violation. Confidentiality concerns are addressed below.

Employee Reporting

The University takes the position that all employees not having a legal duty of confidentiality (e.g. a licensed counselor, doctor, or nurse) are "Responsible Employees". A Responsible Employee is a University employee who has the duty to report incidents of sexual misconduct. With respect to students who are also employed by the University, only Resident Assistants (RAs) and those student employees with similar significant responsibility for student welfare are Responsible Employees under this policy.

A Responsible Employee who witnesses or has knowledge of sexual misconduct against a student must immediately contact the Title IX Coordinator, Human Resources, or anyone in a managerial position e.g., Chair, Division Director, Deans, Supervisor, Manager, Department Head, Director, or Vice President for advice and assistance and to ensure the University responds appropriately. A failure by a Responsible Employee to report a violation of this policy perpetrated against a student may warrant disciplinary action, and may in some circumstances also result in civil or criminal liability.

Any employee who has themselves been a victim of sexual misconduct should contact the Title IX Coordinator, Human Resources, or anyone in a managerial position e.g., Chair, Division Director, Deans, Supervisor, Manager, Department Head, Director, or Vice President.

Bystander Policy

The University encourages all community members to take reasonable and prudent actions to prevent or stop an act of sexual misconduct. Taking action may include direct intervention where it is safe to do so, creating a distraction, calling law enforcement, or seeking assistance from a person in authority.

Connection Between the Sexual Misconduct Policy and the Drug and Alcohol Policy

Victims, bystanders, or other parties may have concerns about reporting sexual misconduct because of the University's drug or alcohol policy. The University's primary concern is student safety, and any drug or alcohol rules violations will be addressed separately from the sexual misconduct allegation. In addition, the University personnel involved in investigating violations of this Policy have discretion to grant amnesty from violations of the University's drug and alcohol policy on a case by case basis. The use of alcohol or drugs never makes a victim at fault for sexual violence.

4. Role of the Title IX Coordinator

Pursuant to Title IX of the Education Amendments of 1972 and the U.S. Department of Education's implementing regulations at 34 C.F.R. Part 106, the University's Title IX Coordinator has primary responsibility for coordinating the University's efforts to comply with and carry out its responsibilities under Title IX, which prohibits sex discrimination in all the operations of this University, as well as retaliation for the purpose of interfering with any right or privilege secured by Title IX.

Campus Programs

Sexual Misconduct against students, including sexual harassment, sexual assault, rape, and sexual exploitation, can be a form of sex discrimination under Title IX. The Title IX coordinator oversees the University's response to reports and complaints that involve possible sex discrimination affecting students to monitor outcomes, identify and address any patterns, and assess effects on the campus climate, so the University can address issues that affect the wider school community.

A student or employee should contact the Title IX Coordinator or Deputy Title IX Coordinator(s) in order to:

- seek information or training about victim's rights and courses of action available to resolve reports or complaints that involve potential sex discrimination, including sexual misconduct,
- file a complaint or make a report of sex discrimination, including sexual misconduct,
- notify the University of an incident or policy or procedure that may raise potential Title IX concerns,
- get information about available resources (including confidential resources) and support services relating to sex discrimination, including sexual misconduct, and
- ask questions about the University's policies and procedures related to sex discrimination, including Sexual Misconduct.

Functions and Responsibilities of the Title IX Coordinator

The Title IX Coordinator's functions and responsibilities include the following:

(1) Training for Students, Faculty, and Staff

The Title IX Coordinator provides or facilitates ongoing training, consultation, and technical assistance on Title IX for all students, faculty and staff, including:

- regular training for faculty and staff outlining their rights and obligations under Title IX, including the appropriate response to reports of sexual misconduct, the obligation to report sexual misconduct to appropriate University officials, and the extent to which counselors and advocates may keep a report confidential, and
- regular training for students outlining their rights under Title IX; with regard to sexual misconduct, this training will include what constitutes sexual misconduct and when it creates a hostile environment, the definition of consent, reporting options (including reports to Responsible Employees, campus and local law enforcement, and confidential reporting to counselors or advocates), the procedures used to process complaints, applicable disciplinary code provisions relating to sexual misconduct and the consequences of violating those provisions, the role of alcohol and drugs in sexual misconduct, the effects of trauma, strategies and skills for bystander intervention, the offices or individuals with whom students can speak confidentially, the offices or individuals who can provide support services, the employees who must report incidents to the Title IX coordinator, and Title IX's protections against retaliation.

(2) Investigations

The University is responsible for conducting adequate, reliable, and impartial investigations of reports and complaints of Sexual Misconduct. The Title IX Coordinator oversees many aspects of this response, including:

- determining whether the report or complaint alleges conduct that may, upon investigation, constitute prohibited sexual misconduct,
- reviewing the intake information to assess whether there is sufficient information upon which an investigation may proceed,
- appointing an investigative team upon such determination,
- making certain that individual reports and complaints are handled properly and in a prompt and timely manner,
- informing all parties regarding the disciplinary process,
- confirming that all parties have been notified of disciplinary decisions and of the right to, and procedures for, appeal, if applicable,
- maintaining information and documentation related to the investigation in a secure manner, and
- monitoring compliance with timeframes specified in the discipline procedures.

The Title IX Coordinator evaluates requests for confidentiality, as outlined below, by those who report or complain about sexual misconduct in the context of the University's responsibility to provide a safe and non-discriminatory environment for all students.

5. Reporting Sexual Assault or Other Violations of the Sexual Misconduct Policy Timing of Complaints

If the respondent is a current Southern New Hampshire University student (undergraduate or graduate, full-time or part-time), there is no time limit for filing a complaint to initiate these Procedures. However, students are strongly encouraged to report sexual misconduct in a timely manner to maximize the University's ability to gather evidence, and conduct a thorough, impartial, and reliable investigation. If the respondent is a second semester senior (or in the final semester of a graduate program), the University may withhold that student's Southern New Hampshire University degree pending conclusion of the complaint resolution procedures.

After Graduation Complaints of Pre-Graduation Incident

This Policy does not include adjudicating incidents that occurred before the accused was matriculated or after the student has graduated. The college can hear complaints against students who have graduated if the alleged incident took place before the accused student graduated and the complainant files a written complaint within the twelve months of the accused's date of graduation. If found to be responsible for a violation of sexual misconduct policy, the former student charged could face revocation of his/her diploma.

Campus Programs

Contact Information for Reporting:

All reports of sexual misconduct under this policy can be made to the Title IX Coordinator, or any other member of the Title IX compliance team. The University's Title IX compliance team includes Rebecca Lawrence, Title IX Coordinator; Danielle Stanton, Michael Graskemper, and Jim Winn, Deputy Title IX Coordinators:

- Rebecca Lawrence is the University's Title IX Coordinator and can be reached in person at The Green Center on the University's main campus at 2500 North River Road, Manchester NH, by telephone at 603-644-3188, or by email at r.lawrence2@snhu.edu. Ms. Lawrence, as Title IX Coordinator, is responsible for overseeing the University's response to all Title IX complaints.
- Danielle Stanton is the VP for Human Resources and can be reached in person at 1230 Elm Street, 5th Floor, Manchester NH, by telephone at 603-629-7820, and by email at d.stanton3@snhu.edu.
- Michael Graskemper is the Director of Dispute Resolution for the College of Continuing and Online Education (COCE) and is also the Deputy Title IX Coordinator for COCE. He can be reached at 603-314-7647, or at M.Graskemper@snhu.edu.
- Jim Winn is the Director of Public Safety, in addition to being a Deputy Title IX Coordinator for University College, and can be reached in person at Morrissey House, 2503 North River Road, Manchester NH 03106, by telephone at 603-645-9700, or by email at safety@snhu.edu.

Students:

Any student who believes that he or she has been subject to sexual misconduct and wishes to report it should immediately contact the Title IX Coordinator or any member of the Title IX Compliance team using the contact information above. Violations may also be reported to Public Safety at 603-645-9785, the office of Residential Life at 603-645-9758, coaches, Athletic Director, or any member of the Division of Student Affairs. and Academic Development staff, or any other Responsible Employee. Confidentiality and the opportunity for confidential reporting are addressed below.

Employees:

Any manager or Responsible Employee who wishes to report a complaint of sexual misconduct should immediately contact a member of the Title IX Compliance Team or the office of Human Resources at 603-644-3125.

Reporting to the Police

Students are also encouraged to report sexual assault and relationship violence not only to the Public Safety or a Title IX Coordinator, but also to law enforcement authorities. However, students have a right to choose not to file a report with law enforcement. The decision to file a criminal complaint is a deeply personal choice. Students often make this decision based on the circumstances surrounding the incident and the circumstances in their life at the time of the incident. Some students discover that participating in a proceeding to hold the accused accountable helps them to regain some measure of control lost by virtue of the assault, and to protect themselves and others from future harm. Students must also understand that SNHU Public Safety is not a police force, and a report to Public Safety is not equivalent to filing a police report.

Upon reporting an incident, students will be given the opportunity and assistance to speak with appropriate local law enforcement personnel to make the report. Public Safety and/or the Title IX coordinator will assist students wishing to file a criminal complaint. Students do not need to file a criminal complaint in order to initiate disciplinary proceedings with the University, and the University may find an accused student responsible for violating the student disciplinary policy regardless of the status or outcome of the criminal proceedings, if any. Absent extenuating circumstances, the University will not unduly delay its Response Procedure to await the completion of any criminal proceeding or investigation, unless required to do so by valid court order.

Students may also wish to pursue a criminal or civil restraining order from a local court, and the University can offer a victim resources with information about how to obtain such an order.

Students in an ongoing emergency should dial 911. Contact information for local police in the Manchester area for non-emergency reporting is as follows:

Hooksett Police Department

15 Legends Dr.
Hooksett, NH 03106
(603) 624-1560

Manchester Police Department

405 Valley Street
Manchester, NH 03106
(603) 668-8711

Health Care Resources in the Manchester Area

Every victim has the option to seek treatment for injuries sustained during an incident of sexual misconduct, preventative treatment for sexually transmitted diseases, and other health services. A medical exam is also an important way for a health provider to properly collect and preserve evidence, which could later be used in a civil or criminal case. In cases where necessary, rape kits are also available at local emergency rooms.

In the case of an ongoing emergency, dial 911.

On-Campus

Medical treatment and counseling for on-campus students are also available at the Campus Wellness Center, located in the Robert A. Freese Student Center. Students can access health services during normal business hours by walk-in and may reach the Wellness Center Counselors at 603-645-9679. Emergency counseling services are also available twenty-four hours a day. During regular business hours, a student can speak with a counselor by contacting the Wellness Center staff. During nights, weekends and holidays, a student seeking emergency counseling can access services by contacting Public Safety or Residence Life who will notify a counselor on call.

Resources for Online Students

In addition, a list of counseling, health, mental health, victim advocacy, legal assistance, and other services available including crisis help lines can also be found on the COCE Wellness Center's webpage at <https://my.snhu.edu/Offices/COCE/Wellness>. Students located outside of New Hampshire can click the "Locate Resources in Your Area" link to be directed to crisis resources based on their location.

6. Confidentiality

Cases involving alleged discrimination, harassment or violence based on sex demand special attention to issues of confidentiality. Dissemination of information relating to these cases is limited so as to ensure, as fully as possible, the privacy of the individuals involved. Additionally if the complainant wishes to remain anonymous, or not pursue a formal complaint, the complainant should be advised that the University's response may be limited. Furthermore, because of the University's obligation to maintain a safe environment for all members of the University community, the University may have an obligation to pursue an investigation without the complainant's cooperation. In such cases, the University will take preventative measures to preserve confidentiality to the extent practicable and permissible by applicable law.

The University encourages victims of sexual violence to talk to somebody about what happened – so victims can get the support they need, and so the University can respond appropriately.

Different employees on campus have different abilities to maintain a victim's confidentiality.

- Some, including professional counselors, doctors, or nurses, are required to maintain near complete confidentiality (*See "Exceptions to Confidentiality" below for an explanation of when this duty of confidentiality may not apply*).
- All other employees are required to report all the details of an incident (including the identities of both the victim and alleged perpetrator) to the Title IX coordinator. A report to these employees (called "Responsible Employees") constitutes a report to the University—and generally obligates the University to thoroughly review and, if deemed necessary, appropriately investigate the incident and take appropriate steps to address the situation.

This policy is intended to make students aware of the various reporting and confidential disclosure options available to them – so they can make informed choices about where to turn should they become a victim of sexual violence. The University encourages victims to talk to someone identified in one or more of these groups.

Reporting Options: A. Privileged and Confidential Communications

• Professional and Pastoral Counselors

SNHU can provide members of its campus community with professional, licensed counselors who provide mental-health counseling to members of the school community (and including those who act in that role under the supervision of a licensed counselor). SNHU Wellness counselors can be reached at 603-645-9679. Pastoral counselors may also be available to speak to students through Campus Ministry, which can be reached at 603-645-9608 or by referral at the Wellness Center.

These counselors are not required to report any identifying information about an incident to the Title IX coordinator without a victim's permission. A counselor may collect and eventually report some general, non-identifying data that will not lead to an investigation, such as the date of the report, date of the crime, and general location as part of the University's crime data reporting responsibility. A member of the community wishing to speak with a professional, licensed counselor can request to do so through the on-campus Wellness Center.

Campus Programs

Emergency services are available 24 hours a day. Students can access services during normal business hours by calling 603-645-9679. During nights, weekends and holidays, a student can access services by contacting Public Safety at 603-645-9700 who will notify a counselor on call.

Students in the College of Online and Continuing Education (COCE) can also log on to <https://my.snhu.edu/Offices/COCE/Wellness> and find a list of available professional counseling resources in their state.

• Registered Nurses

In addition to counseling services, the campus Wellness Center is staffed by two full-time Advanced Practice Registered Nurses (APRN) and one licensed registered nurse. New Hampshire law (RSA 326-B) provides that confidential communications made to a nurse by a patient are entitled to the same privilege as those between a physician and a patient. As a result, a nurse in the Wellness Center is not required to reveal any details of an incident to the Title IX coordinator. As with a professional counselor, a nurse may collect and eventually report some general, non-identifying data that will not lead to an investigation, such as the date of the report, date of the crime, and general location as part of the University's crime data reporting responsibility.

Both professional counselors and licensed nurses may be required to break confidentiality in certain circumstances, as more fully described in "Exceptions to Confidentiality," below.

A victim who speaks to a professional counselor or nurse must understand that, if the victim wants to maintain confidentiality, the University will be unable to conduct an investigation into the particular incident or pursue disciplinary action against the alleged perpetrator.

Even so, these counselors and advocates will still assist the victim in receiving other necessary protection and support, such as victim advocacy, academic support or accommodations, disability, health or mental health services, and changes to living, working or course schedules. Again, as a practical matter, the full availability of some of these services may be limited in certain circumstances by a victim's desire for confidentiality and level of cooperation. A victim who at first requests confidentiality may later decide to file a complaint with the school or report the incident to local law enforcement, and thus have the incident fully investigated. These counselors will provide the victim with assistance if the victim wishes to do so.

Exceptions to Confidentiality:

While these professional counselors and nurses may maintain a victim's confidentiality vis-à-vis the University, they may have mandatory reporting or other obligations under state law. For example, New Hampshire has a mandated reporter law for when a person "has reasons to suspect that a child has been abused or neglected" (R.S.A. §169-C:29), which requires timely disclosure to the N.H. Department of Health and Human Services if the victim is under eighteen years of age. A similar reporting law applies to incapacitated and elderly adults. (RSA 161-F:46). New Hampshire also has an anti-hazing statute that requires that any person who is present or otherwise has direct knowledge of any student hazing must report the hazing to law enforcement or educational institution authorities. (RSA 631:7).

Likewise, behavior that poses a serious threat of harm to self or others, or receipt of a court order or a subpoena under certain circumstances can trigger a duty to timely disclose confidential information, irrespective of the categories above.

Also, if the University determines that the alleged perpetrator(s) poses a serious and immediate threat to the University community, Campus Safety may be called upon to issue a timely warning to the community. Any such warning should not include any information that identifies the victim.

B. Reporting to "Responsible Employees."

A "Responsible Employee" is a University employee who has the authority to redress sexual violence, who has the duty to report incidents of sexual violence or other student misconduct, or who a student could reasonably believe has this authority or duty.

When a victim tells a Responsible Employee about an incident of sexual violence, the victim has the right to expect the University to take immediate and appropriate steps to review thoroughly and appropriately investigate what happened and to resolve the matter promptly and equitably.

A Responsible Employee must report to the Title IX coordinator all relevant details about the alleged sexual violence shared by the victim and that the University will need to determine what happened – including the names of the victim and alleged perpetrator(s), any witnesses, and any other relevant facts, including the date, time and specific location of the alleged incident.

To the extent possible, information reported to a responsible employee will be shared only with people responsible for handling the University's response to the report. A Responsible Employee should not share information with law enforcement without the victim's consent or unless the victim has also reported the incident to law enforcement.

All University employees other than licensed counselors or medical professionals are deemed to be Responsible Employees. This includes, but is not limited to: University administrators, Campus Safety Officers, student affairs personnel, residence life employees, and all faculty, adjuncts, and instructors. The only Student Employees who are Responsible Employees are Resident Assistants (RAs) and those student employees with similar significant responsibility for student welfare.

To the extent possible and practicable, a Responsible Employee should try to ensure that the victim understands the employee's reporting obligations before a victim reveals any information to a responsible employee, – and, if the

Campus Programs

victim wants to maintain confidentiality, direct the victim to confidential resources.

If the victim wants to tell the Responsible Employee what happened but also maintain confidentiality, the employee should tell the victim that the University will consider the request, but cannot guarantee that the University will be able to honor it. In reporting the details of the incident to the Title IX Coordinator, the Responsible Employee will also inform the Coordinator of the victim's request for confidentiality.

Responsible Employees will not pressure a victim to request confidentiality, but will honor and support the victim's wishes, including for the University to fully investigate an incident. By the same token, Responsible Employees will not pressure a victim to make a full report if the victim is not ready to do so.

Requesting Confidentiality: How the University Will Weigh Request and Respond

If a victim discloses an incident to a Responsible Employee but wishes to maintain confidentiality or requests that no investigation into a particular incident be conducted or disciplinary action taken, the University must weigh that request against the University's obligation to provide a safe, non-discriminatory environment for all students, including the victim.

If the University honors the request for confidentiality, a victim must understand that the University's ability to meaningfully investigate the incident and pursue disciplinary action against the alleged perpetrator(s) may be limited.

There are times when the University may not be able to honor a victim's request in order to provide a safe, non-discriminatory environment for all members of the university community.

The University has designated the Title IX Coordinator to evaluate requests for confidentiality once a Responsible Employee is on notice of alleged sexual misconduct. The Title IX Coordinator may consult other appropriate University stakeholders in his or her assessment of such a request and consideration of the factors identified below.

When weighing a victim's request for confidentiality or that no investigation or discipline be pursued, the University will consider a range of factors, including the following:

- The increased risk that the alleged perpetrator will commit additional acts of sexual or other violence, such as:
 - whether there have been other sexual violence complaints about the same alleged perpetrator;
 - whether the alleged perpetrator has a history of arrests or records from a prior school indicating a history of violence;
 - whether the alleged perpetrator threatened further sexual violence or other violence against the victim or others;
 - whether the sexual violence was committed by multiple perpetrators;
- whether the sexual violence was perpetrated with a weapon;
- whether the victim is a minor;
- whether the University possesses other means to obtain relevant evidence of the sexual violence (e.g., security cameras or personnel, physical evidence);
- whether the victim's report reveals a pattern of perpetration (e.g., via illicit use of drugs or alcohol) at a given location or by a particular

The presence of one or more of these factors could lead the University to investigate and, if appropriate, pursue disciplinary action. If none of these factors is present, the University will likely respect the victim's request for confidentiality.

If the University determines that it cannot maintain a victim's confidentiality, the University will inform the victim prior to starting an investigation and will, to the extent possible, only share information with people responsible for handling the University's response.

The University will remain ever mindful of the victim's well-being, and will take ongoing steps to protect the victim from retaliation or harm and work with the victim to create a safety plan.

Retaliation against the victim, whether by students or University employees, will not be tolerated. The University will also:

- assist the victim in accessing other available victim advocacy, academic support, counseling, disability, health or mental health services, and legal assistance both on and off campus (see portion of policy identifying these);
- provide other security and support, which in some circumstances could include issuing a no-contact order, helping arrange a change of living or working arrangements or course schedules (including for the alleged perpetrator pending the outcome of an investigation) or adjustments for assignments or tests; and
- inform the victim of the right to report a crime to campus or local law enforcement – and provide the victim with assistance if the victim wishes to do

The University may not require a victim to participate in any investigation or disciplinary proceeding.

If the University determines that it can respect a victim's request for confidentiality, the University will also take immediate action as necessary to protect and assist the victim.

7. The University's Response Procedure

Upon the University receiving notice of an incident of Sexual Misconduct, the University will provide the complainant with additional resources and a written notification outlining a number of choices including but not limited to:

- speaking with a counselor

Campus Programs

- seeking medical assistance
- reporting the incident to local police
- filing formal conduct charges
- requesting reasonable accommodations

Timeframe for Response Process

Unless otherwise stated, all timeframes under this policy are listed in calendar days, not business days.

The University will conduct a timely review of all complaints of sexual misconduct. Absent extenuating circumstances, review and resolution is expected to take place within sixty (60) calendar days from receipt of the complaint, or a maximum of ninety (90) calendar days in the event of a subsequent appeal.

An appeal of the results, whether by the complainant or the accused, must be submitted within five (5) business days of receipt of the written result. Absent extenuating circumstances, decisions on appeals are typically issued within thirty (30) days of the date of the original decision.

Extensions

All deadlines and time requirements in the Code may be extended for good cause as determined by the Title IX officer or his or her designee. Both the respondent and the complainant will be notified in writing of the delay, the reason for delay, and provided the date of the new deadline or event. Extensions requested by one party will not be longer than 5 business/school days.

Extenuating Circumstances

Notwithstanding the above, Extenuating Circumstances may require that this timeline be extended. For example, a complainant who seeks confidentiality and chooses not to name an accused at the time of intake may cause an investigation to be paused. If that complainant later identifies an accused, the Response Process may be re-initiated, and the time from the receipt of the initial incident report to sanctions, if imposed, may extend beyond sixty (60) days.

Hearing Procedures

Please refer to the Southern New Hampshire University Student Handbook, Employee Handbook and/or SNHUPEA Agreement for a further description of investigation, grievance, and adjudication procedures. With respect to incidents of alleged Sexual Misconduct, any conflict between the procedures described in this Policy and either Handbook, the terms of this Policy shall control.

Intake

Upon receiving a complaint, the University will conduct an Intake. At the Intake stage, the University will take steps to make a safety plan, prevent or address any retaliatory conduct, address any immediate physical or emotional safety concerns for anyone involved, offer support to the complainant with any law enforcement reporting decision, address any threat to the safety of the University community, and enter any non-identifying information into the University's crime log.

Prior to initiating its investigation, the University will inform the complainant of their intention to investigate, and request his or her consent to do so. The University will assess any requests for confidentiality or requests not to investigate further at that time, consistent with the Confidentiality policy outlined above. If the University cannot honor such a request, the complainant will be informed at that time.

Informal Resolution Options

The University may present an opportunity for informal remedies or resolution at any time during the response process. A complainant will never be expected to work out a resolution directly with the accused. Likewise, in incidents of sexual assault or sexual violence, mediation is never an option. Informal resolutions are voluntary.

Interim Measures

If necessary, the University will take immediate steps to protect complainants pending the final outcome of an investigation with interim measures. If it is determined by a staff member that contact between specific persons may pose a threat to the safety or emotional well-being of an individual, a No-Contact order can be issued by the University. Other interim measures available to the University include but are not limited to: temporary administrative suspension, restrictions on participation in a team or organization, or student accommodations as described below.

Student Accommodations

A student who has been a victim of sexual misconduct may request an academic accommodation or change in residence after a report of sexual misconduct. Any individual who makes a request will receive an appropriate and reasonable accommodation. Possible requests include the ability to change academic schedules or work schedules, withdraw from or retake a class without penalty, access academic support such as tutoring services, and change residence hall assignments. Pursuant to Title IX, in most cases of sexual violence or sex discrimination, the University will endeavor, to the extent practicable, to change the schedule or accommodations of the accused student prior to changing the schedule or accommodations of the complainant.

After any necessary Interim Measures or Accommodations have been made, the scope of any further investigation or disciplinary action will depend upon factors including but not limited to: whether the complainant wishes to pursue a complaint to the University Conduct Board and whether the University has an obligation to pursue a University Conduct

Campus Programs

Board hearing regardless of the wishes of the complainant to preserve the safety of the University community.

Investigation and University Conduct Board Discipline Process

After the Intake, the Title IX Coordinator or an assigned Deputy Coordinator will determine if the allegations contained in the complaint would, if proven, constitute a violation of this Policy. If a determination is made that the allegations would constitute a violation, an Investigation will be initiated by the Title IX coordinator or his or her deputy or designee.

If the Title IX coordinator determines that the allegations, if true, would not constitute a violation of the Policy, the complainant will be provided with other support options as appropriate, but the Title IX coordinator will not pursue any further investigation or discipline under this Policy at that time.

If, however, the complainant presents new evidence, reveals new information, or presents a violation of another SNHU Policy, this decision can be reevaluated by the Title IX Coordinator in his or her discretion.

Investigation Process

If the Title IX Coordinator determines that an investigation is appropriate under the standard described above, the Title IX Coordinator or an assigned deputy Title IX coordinator will conduct a prompt, fair, and impartial investigation that involves interviewing parties and witnesses as appropriate, and reviewing evidence including available police reports. All investigations will be conducted by officials who receive annual training on the issues related to domestic violence, dating violence, sexual assault, and stalking, and how to conduct a hearing process that protects the safety of victims and promotes accountability. Any member of the university community who knowingly makes a false statement to the investigator during the course of the investigation may be subject to disciplinary action.

The Investigator will complete an investigation report within a reasonable time period after initiating the investigation. The Title IX Coordinator will then, based upon the findings in that report, determine whether the conduct in question should be referred to the University Conduct Board for a hearing. If so, written charges will be prepared by the Title IX Coordinator or his or her designee, provided to the complaining party and the accused simultaneously by email, and filed with the University Conduct Board. An investigative report completed as part of this process is a fact-finding report that will not include a recommendation of sanctions to the University Conduct Board, which will determine what sanctions, if any, are to be imposed. The report shall be mandatory evidence for the University Conduct Board hearing, and will be presented to the Board by the Title IX Coordinator or the Investigator.

If the Title IX Coordinator determines that the information presented does not merit a referral for a University Conduct Board hearing, he or she will inform both the complainant and the accused simultaneously by email to their SNHU email accounts of the decision. That email will include Notice that the investigation may be re-opened at the discretion of the Title IX Coordinator if new evidence is presented, new information comes to light, or a violation of another SNHU Policy or another section of this Policy are discovered.

Option to File Independent Charges:

Under extenuating or unusual circumstances, at the sole discretion of the Dean of Students, the complainant may be permitted, despite a decision by the Title IX Coordinator not to refer the matter to the University Conduct Board, to file independent charges with the University Conduct Board on his or her own behalf. In such cases, the Investigator's report shall be considered as evidence by the Conduct Board, and the Investigator shall be called by the Board as a necessary witness. A complainant wishing to file independent charges must seek permission of the Dean of Students, no later than 180 days of the alleged incident, unless extended for good cause by the Dean of Students in his or her sole discretion.

University Conduct Board Hearing for Students

If the matter is referred to the University Conduct Board, or if a complainant files independent charges with the Student Conduct Board, a hearing will be conducted consistent with the process outlined in the Student Handbook and herein. All hearings conducted involving allegations of Sexual Misconduct will be conducted by officials with annual training related to domestic violence, sexual assault, and stalking, and on processes that protect the safety of victims and promote accountability. In the event of any discrepancy between the procedures described in the Student Handbook and this Policy, this Policy shall control.

Applicable Procedures for Employees

The adjudication of complaints lodged against Southern New Hampshire University employees will be handled consistent with the Southern New Hampshire University Professional Employees Association Agreement and the Employee Handbook.

Parties' Rights to Advisors

The accused and the complainant may be assisted during disciplinary hearings, any mediation, and related meetings, by an advisor of their choice, including an attorney. The respondent and complainant may propose witnesses and may produce other evidence for consideration by the University Conduct Board. The respondent and complainant are responsible for presenting evidence on their own behalf. Either party may request a brief recess to consult with their advisor which will be granted at the discretion of the hearing officer or his or her designee. Advisors may speak privately to their advisee, during the proceeding, but may not present evidence, question witnesses, raise objections, or address the student conduct body.

Student Sanctions

Campus Programs

The University considers Sexual Misconduct violations as extremely serious and subject to sanctions including expulsion, suspension, disciplinary probation, recommended counseling, and/or other educational sanctions.

Evidentiary Standard in Sexual Misconduct Complaints:

The burden of proof in all cases of Sexual Misconduct to be adjudicated by the conduct board is “the preponderance of the evidence” standard – whether it is “more likely than not” that the sex discrimination, dating violence, domestic violence, sexual assault, or stalking occurred. If the evidence presented meets this standard, then the respondent must be found responsible.

Conflict of Interest

If there is a real or reasonably perceived conflict of interest involving the actions of the designated University official or University office typically responsible for handling matters of concern for a student, employee or faculty member, an alternative University representative or University office can be contacted instead. Alternate representatives may include the Office of Academic Affairs, Provost’s Office, or Office of Human Resources. The alternate University representative or office may then designate an impartial and appropriate University official to resolve the matter following applicable University policy.

Evidence and Witnesses

Evidence to be presented by complainant(s) and respondent(s) during any hearing on the charges must be presented to members of the University Conduct Board presiding over the hearing at least 24 hours prior to the hearing, who will then share it with the opposing party in advance of the scheduled hearing. The Conduct Board members presiding at and/or hearing the case may exclude evidence that has not been shared or adjourn the hearing to afford all parties the opportunity to review evidence to be presented during the hearing.

If a party intends to present witnesses, a list of proposed witnesses and a written witness statement for each witness must be presented to the hearing officer at least 24 hours prior to the hearing. Written witness statements will be shared with the opposing party as documentary evidence. Witnesses are defined as someone who perceived the actual incident as it occurred. The Conduct Board will have discretion to call or choose not to call proposed witnesses during the hearing. The parties may not question witnesses directly during the hearing, but may submit questions to the Conduct Board, which the conduct board may, in their discretion, ask directly to the witness. Any attempt to coerce or intimidate a proposed witness by any person will constitute Retaliation under this policy subject to appropriate disciplinary action.

Members of the University Conduct Board presiding at and/or hearing the case will have broad discretion and make the final decision relating to the admissibility of all evidence and the presentation of witnesses. When the circumstances warrant, Conduct Board members may, in their sole discretion, consider evidence or admit witnesses submitted with less than 24-hours’ notice. Where required by applicable law, witness statements or evidence may be reasonably redacted to protect recognized privacy rights.

Documentation or Recording of Proceedings

The University will seek to maintain a record of all hearings, including findings of fact. The record of the University Conduct Board Hearing will generally be made by audio recording, though alternative methods of recording or documentation may be employed at the University Conduct Board’s discretion or as needed.

Notice to Parties

Both the complainant and the accused will be informed, simultaneously, by email to their Southern New Hampshire University email accounts, of (1) the outcome of any disciplinary proceeding involving and allegation of sexual misconduct, (2) the University’s appeal process and the rights of both the complainant and the accused to appeal the results (3) any change to the results that occurs prior to the results becoming final, and (4) when such results become final.

Rights of Appeal

Both parties shall have the opportunity to appeal a decision by the University Conduct Board using the procedure described in the Student Handbook. Appeals must be submitted within five (5) business days of the decision, and are only to be allowed on the limited grounds defined in the Student Handbook.

Additional Reporting Resources

A student or applicant who believes that he or she has been discriminated against can file a Charge of Discrimination at their regional U.S. Department of Education Office for Civil Rights.

The New Hampshire Regional Office can be contacted at:

U.S. Department of Education
8th Floor
5 Post Office Square
Boston, MA 02109-3921
Telephone: (617) 289-0111
Facsimile: (617) 289-0150
[Email: OCR.Boston@ed.gov](mailto:OCR.Boston@ed.gov)

Campus Programs

A student or applicant may also file a Charge of Discrimination at their state Fair Employment Practices agency, such as the New Hampshire Human Rights Commission, which can be contacted at:

New Hampshire Human Rights Commission

2 Chenell Drive Unit 2

Concord, NH 03301-8501

Telephone: (603) 271-2767

Fax: (603) 271-6339

Email: humanrights@nhsa.state.nh.us

Retaliation

Retaliation against any individual who files a complaint or participates in a harassment inquiry is prohibited. Anyone who reports an actual or suspected incident of harassment, discrimination or violence based on sex, or who participates in an investigation, will not be subjected to retaliation. If a Complainant or witness believes s/he has been subjected to retaliation s/he should contact the Association Vice President for Human Resources, Title IX Coordinator or the Dean of Students, Deputy Title IX Coordinator. Anyone found to be in violation of this retaliation provision will be subject to disciplinary action.

Student Academic Complaint

If a student in University College has a complaint about an instructor or course, then they should speak first to the instructor. If the student is not satisfied or cannot resolve the issue at that level, then they should speak to the Program Coordinator/Department Chair. If the student is still not satisfied, then they should speak to the school Dean or Program Director. If the student wishes to pursue the matter further, then they should speak to the Provost, who will review the matter and make a final decision.

Student Account and Fees

Course Withdrawal Refund, Graduate

Withdrawal and Proration of Fees Policy (Graduate)

Graduate students may drop a course during the first week of a term, and the dropped course will not appear on the student's academic transcript. Graduate students may withdraw from courses at any time during the second through sixth week of the graduate term with the course grade of "W". Any withdrawals after the sixth week may only be allowed for significant conditions beyond the student's control (e.g. serious illness documented by a physician's letter) and will be processed at no refund. Withdrawals are not permitted in the last week of class.

The following policies apply to ALL students taking online or center-based face-to-face and hybrid courses.

1. Submission of Withdrawals

Requests to withdraw must be submitted via this form in mySNHU. In all cases, the date of withdrawal is the date the completed form is received. No paper withdrawal forms or emails will be accepted.

2. Tuition Fee & Refunds

Withdrawals from courses (all types, including online, hybrid, and face-to-face courses):

1. **During Week 1 (Drop Period):** No tuition fee charged or 100% refund if full payment is submitted
2. **During Week 2:** 50% tuition fee charged or 50% refund if full payment is submitted
3. **After Week 2:** 100% tuition fee charged or no refund if full payment is submitted

For the purpose of withdrawals, all term weeks start on Monday and end on Sunday 11:59 pm EST. Holidays during the week do not impact the Sunday 11:59PM deadline.

3. Financial Aid Disbursements and return of Title IV (Financial Aid Funds)

All tuition charges and withdrawal requests are subject to review, and students who withdraw may be responsible for paying back part or all of their financial aid disbursement for that term. In addition, withdrawals may have an impact on a student's eligibility for future financial aid.

Please contact the Campus Student Financial Services office at 877.455.7648 or via email at sfscampus@snhu.edu for details.

QUESTIONS?

Students should contact an academic advisor for further clarification.

Non-Matriculated, Part-Time Students

Campus Programs

Southern New Hampshire University provides limited opportunities for residents of the Greater Manchester area to enroll as special students on a part-time basis in its undergraduate day programs.

Non-matriculated part-time students may enroll for up to six credit hours in a semester, not to exceed nine credit hours per academic year or more than 12 credit hours in total. Enrollment is on a space-available basis. Contact the Office of Undergraduate Admission for more information. The tuition rate is shown on the tuition and expenses table. There are no refunds for withdrawals due to the reduced cost of these classes.

Payment Information

Campus Student Financial Services

Campus Student Financial Services combines financial aid, billing, and student account services into one centralized location. You can visit Campus Student Financial Services online at <https://my.snhu.edu/Offices/SFS/Pages/default.aspx>, email questions to sfscampus@snhu.edu or call 1.877.455.SNHU to speak with a Student Finance Counselor.

Deposits

Deposit Policy

Following acceptance to Southern New Hampshire University, undergraduate day students need to confirm their intention to enroll by submitting a deposit. Deposits for new and readmitted students are requested by and sent to the attention of the Office of Admission.

Housing Security Deposit

A housing security deposit is required of all students residing in university housing. The deposit is refunded when the student no longer resides on campus. The student's account is charged for any damages as they occur and the student is required to pay for the damages in order to maintain the deposit at \$100. All residential damages are assessed by the Office of Residence Life. Students seeking explanation of any residential damage fees should contact Residence Life.

New Student Admission Deposit Refund Policy

Fall admission: The deposit is fully refundable up to May 1. After May 1, deposits are not refundable. Requests for refunds must be submitted in writing to the Director of Admission at admission@snhu.edu.

Spring admission: Deposits are not refundable.

Student Account Payment

Full payment of tuition and fees is required by the semester's payment due date. Fall semester charges are due by August 1. Spring semester charges are due by January 1. Tuition for graduate and doctoral students must be paid prior to the start of the term. Any student not paid in full by the semester's payment due date will be assessed a late payment fee and the student's class schedule may be dropped. Unresolved balances may be subject to collection fees, late fees, and/or finance charges. Textbooks and supplies are sold separately.

Student financial accounts must be settled in one of the following ways:

Payment in Full

1. Students may make payments online at my.snhu.edu
2. Students may make payments through Campus Student Financial Services in person (cash, check, money order, debit/credit cards and wires accepted)
3. Students may make payments through the mail by sending payments to;
Southern New Hampshire University
Client 800100
PO Box 55008
Boston, MA 02205-5008

Enrollment in Payment Plan:

- Students may enroll in a payment plan through Tuition Management Services (TMS). Participation is defined as TMS having received the enrollment fee before the semester's payment due date.

Payment Plan

The university has partnered with Tuition Management Services (TMS) to offer a payment plan option to full-time day students. TMS is an independent payment plan company that is authorized by Southern New Hampshire University to make payment contracts and accept/process payments on the university's behalf. There is an enrollment fee to open a contract (see tuition and fee schedule). Please contact TMS directly to open a contract at 800.722.4867 or www.afford.com. Students will be responsible for making any necessary adjustments to the payment contract in order to settle the account in full with SNHU. Any account balance not contracted with TMS is due and payable immediately to SNHU.

Credit and Collections Policy

Campus Programs

All outstanding balances, are the student's responsibility to pay. Unpaid balances will be subject to finance charges, fees, and further collection efforts as detailed below.

Finance Charges

Tuition payment is due in full before the official start date of the term. Any outstanding balance as of the term's official start date may be subject to a finance charge of 18% annual rate, assessed monthly at 1.5%

Other Information

- All students with unresolved balances as of the term start must contact the Credit Department for resolution. The Credit Department can be reached at:
Email: Credit@SNHU.edu
Phone: (888) 867-7376
Fax: (603) 668-0259
- Transcripts, diplomas, enrollment verifications, along with registration for future classes will be withheld if the student owes any type of balance.
- Students with unresolved balances will be placed on financial hold; finance charges and late fees may be assessed at the discretion of the university.
- All student accounts sent to a third-party collection agency will be subject to an additional collection fee of up to 40% of the outstanding balance, legal fees and the account will be reported to the credit bureaus.
- All former collection accounts and bankruptcies must pay up front for any future classes.
- The Credit Policy is at the discretion of the Credit Department and subject to change without notice.
- Students acknowledge and authorize SNHU and/or its agents, including attorneys and/or collection agencies to allow contact via cellular telephone and/or all forms of electronic technology, unless such party is notified in writing to cease such communication.

Industry Sponsors

The university cooperates with many company tuition sponsorships and reimbursement plans. Students attending under these plans should give their center office or Campus Student Financial Services the necessary authorization and inform the office how the tuition payment will be handled.

Active Duty Military

First time students using tuition assistance must present a tuition assistance form from their military branch in which they are enlisted.

Continuing students may enroll in successive terms without making initial payments but must submit tuition assistance forms to allow direct billing and payment from the military. If a tuition assistance form is not provided, your account will be placed on financial hold, which will prevent future registration, and you will be responsible for the unpaid balance.

Third Party Direct Billing

Students may authorize direct billing from the university to a third party. Students must first submit a voucher/letter or military tuition assistance form to Campus Student Financial Services or appropriate center. The voucher must include beginning and end dates of the academic term, courses covered, books, and other fees covered (if any) and maximum dollar value. Paperwork is due before the term start date. The third party will be billed at the beginning of the term covered by the voucher. Payment is due within 30 days of the billing. Finance charges are waived upon confirmation of the approved authorization, for only those students 100% covered by his/her sponsor. Student reimbursement based upon satisfactory completion of the course and grades are not subject to third party billing.

EdLink (formerly known as CAEL)

EdLink has partnered with Southern New Hampshire University to offer tuition discounts to eligible students. Employees of an EdLink partner company will receive a 10% tuition discount off the regular Southern New Hampshire University tuition on courses approved by your employer's tuition assistance policy.

Please contact your place of employment for additional information on the EdLink tuition assistance program.

For tuition assistance: Students must obtain a letter of credit from the EdLink website to present at the time of registration. Each discount-eligible course must be accompanied by a letter of credit.

Tuition reimbursement: This is entirely outside of SNHU and is between the student, EdLink, and the employer. Students need to obtain an approval notification from the EdLink website to present at the time of registration.

Please note: Students who register for courses without evidence of EdLink authorization are not guaranteed a discount.

Printing on Campus (PenmenPrint)

Students who use on campus printing are provided with an allotment for printing. This service is called PenmenPrint. All active student accounts will receive two printing allotments a year of \$50 each, which will be distributed on January 1st and July 1st of each year. PenmenPrint accounts will stay active the same length of time that a student's email remains active.

Refund Policy

Campus Programs

University College

Students who withdraw from the university may be eligible to receive a refund according to the policy listed below that applies to their situations. This policy is also applicable to part-time undergraduate day school students.

Student accounts will be adjusted within 30 days of the notification of withdrawal.

Tuition, on-campus room and meal plans are canceled/reduced based on the following schedule for standard day school students and is the same schedule for institutional merit and need awards:

- 100 percent refund before the first day of the term (includes fees).
- 90 percent refund from day 1 to day 10 of the term.
- 50 percent refund from day 11 to day 25 of the term.
- 25 percent refund from day 26 to day 52 of the term.
- No refund after day 52 of the term.

Note: The refund calculation is based on calendar days.

Fees: No refund after the first day of class.

Meal plan refunds are based on the remaining balance the student has at the time of the withdrawal date.

Example: If a withdrawal occurs on day 5 of a semester, then tuition, on-campus room and meal plan (if applicable) would be refunded by 90%. Each SNHU merit and need award would be reduced by 90% as well. A revised award letter is provided for notification of award reductions.

College of Online and Continuing Education (COCE)

Undergraduate students may drop a course during the first week of a term, and the dropped course will not appear on the student's academic transcript. Undergraduate students may withdraw from courses at any time during the second through fourth week of the undergraduate term with the course grade of "W". Any withdrawals after the fourth week may only be allowed for significant conditions beyond the student's control (e.g. serious illness documented by a physician's letter), as determined and approved by COCE administration, and will be processed at no refund. Withdrawals are not permitted in the last week of class. This policy also applies to an undergraduate student taking a 16-week course.

The following policies apply to ALL students taking online or center-based face-to-face and hybrid courses.

Undergraduate Students:

Withdrawals from courses (all types, including online, hybrid, and face-to-face courses):

- During Week 1 (Drop period): No tuition fee charged or 100% refund if full payment is submitted
- During Week 2: 50% tuition fee charged or 50% refund if full payment is submitted
- After Week 2: 100% tuition fee charged or no refund if full payment is submitted.

For the purpose of withdrawals, all term weeks start on Monday and end on Sunday 11:59pm EST. Holidays during the week do not impact the Sunday 11:59PM deadline.

Graduate Students:

Withdrawals from courses (all types, including online, hybrid, and face-to-face courses):

- During Week 1 (Drop Period): No tuition fee charged or 100% refund if full payment is submitted
- During Week 2: 50% tuition fee charged or 50% refund if full payment is submitted
- After Week 2: 100% tuition fee charged or no refund if full payment is submitted

For the purpose of withdrawals, all term weeks start on Monday and end on Sunday 11:59 pm EST. Holidays during the week do not impact the Sunday 11:59PM deadline.

College for America Program

Cancellation and Refund Policy

Students have 14 days from the start of the trimester to cancel enrollment and receive a full refund of any tuition paid for that trimester. If the student withdraws after the 14-day period, the student will be responsible for the full tuition amount. If the student withdraws or is dismissed from CFA, the University and/or the student may be required to return a portion of any Federal Title IV financial aid received. A Return of Title IV calculation will be performed for any student who has received Federal Title IV financial aid to determine the amount of federal aid that must be returned to the federal government by the University and the student.

Return of Military Tuition Assistance

Military Tuition Assistance (TA) is awarded to a student under the assumption that the student will attend for the entire period for which the assistance is awarded. When a student withdraws or stops attending, the student may no longer be eligible for the full amount of TA funds originally awarded.

Campus Programs

SNHU will return any unearned TA funds on a proportional basis through the 60% portion of the period for which the funds were provided to comply with Department of Defense policy. TA funds are earned proportionally, during an enrollment period, with unearned funds returned based upon when a student stops attending. Any SNHU balance due to a TA return is the responsibility of the student.

In instances when a service member stops attending due to a military service obligation during the term, SNHU will remove the student from the coursework and will scholarship the amount owed to SNHU due to a return of unearned TA funds so no debt is incurred by the student. Please note – prior-existing service obligation will not warrant the reversal of charges. The service member will be required to provide documentation in the form of current military orders, signed letter from the command, or a similar form of documentation.

Tuition and Fees

Withdrawal and Proration of Fees

Withdrawal and Proration of Fees Policy (University College - Undergraduate and Graduate Students)

Students who withdraw from the university (see [Withdrawal from SNHU](#)) may be eligible to receive a refund according to the policy listed below that applies to their situations. This policy is applicable to both full-time and part-time day school students.

Students receiving Federal Title IV Financial Aid (Direct Loans, Plus, Federal Pell or FSEOG grants):

Students who withdraw before they have attended 60 percent of any particular academic term may need to have a portion of the federal financial aid canceled. These funds, if already disbursed would then be returned to the U.S. Department of Education. The percentage of federal financial aid "earned" is based on the amount of time a student attends in that term and is calculated using the Federal Return to Title IV funds formula provided by the U.S. Department of Education. If the student has taken a credit refund from financial aid funds and then withdraws, these funds may need to be paid back to federal aid sources, or Southern New Hampshire University depending on the circumstances. If a student withdraws after they have attended 60 percent of an academic term, they have earned 100 percent of the aid awarded for that term and there is no cancellation of aid.

Institutional financial aid may also be canceled during the withdrawal process based on adjustments to charges and federal financial aid.

Student accounts will be adjusted within 30 days of the notification of withdrawal.

Tuition, fees, room and board are cancelled/reduced based on calendar days, according to the following schedule for day school students:

Tuition, room and board charges:

- 100 percent refund before the first day of the term (includes fees)*.
- 90 percent refund from day 1 to day 10 of the term.
- 50 percent refund from day 11 to day 25 of the term.
- 25 percent refund from day 26 to day 52 of the term.
- No refund after day 52 of the term.

Note: The refund calculation is based on calendar days.

*Fees: No refund after the first day of class.

Tuition & Refunds (University College Undergraduate Summer Terms only)

Withdrawals from 8-week or 16-week course (all types, including face-to-face, hybrid, and online courses):

- During Week 1 (Drop period): No tuition is charged and 100% refund of any payment submitted
- During Week 2: 50% tuition is charged and 50% refund if full payment is submitted
- After Week 2: 100% tuition is charged and no refund of any payment submitted

For the purpose of withdrawals, all term weeks start on Monday and end on Sunday 11:59pm EST. Holidays during the week do not impact the Sunday 11:59PM deadline.

Student Affairs

Vaccination Policy

All residential students, all full time undergraduate students, all international students and all full time graduate day students taking classes on the Manchester campus must provide complete and accurate immunization records. Students are required to provide proof of immunization against measles, mumps, rubella, tetanus, diphtheria, pertussis, hepatitis b, meningitis, and varicella. Students are required to provide this information prior to the start of their first semester. Failure to fulfill this requirement will prevent registration in future academic terms.

Student Code of Conduct

Academic Honesty Policy

Standards of Academic Honesty Policy

As an academic community committed to fostering an ethical and intellectual environment, University College at Southern New Hampshire University holds its students to these standards of academic honesty; the University expects that all aspects of a student's educational path are conducted with the highest degree of honesty, accountability for one's own work, and respect for the intellectual property of others. Violations of these academic standards, such as cheating and plagiarism, will result in sanctions. This policy identifies the behaviors and sets the guidelines that members of the SNHU academic community are expected to follow. In addition, this policy describes procedures for

Campus Programs

handling allegations of misconduct, the sanctions, and the means by which a student can restore his/her academic standing.

Orientation Honesty Policy Discussion

During the first month of each term, the Division of Student Success introduces new students to the academic honesty policy in University College. An email will be distributed via DocuSign to all new students asking them to review and sign, formally acknowledging that they have received information about the University's academic honesty policy.

This receipt and acknowledgement are designed to reinforce the importance of academic honesty. All students (degree seeking and course work only) must adhere to the University's academic honesty policy, even if they do not sign the acknowledgement form.

A student remains responsible for the academic honesty of work submitted in University College courses at Southern New Hampshire University even if the student has received a final grade. Ignorance of these standards will not be considered a valid excuse or defense.

Academic Honesty Definitions

Violating the University's standards of academic honesty constitutes a serious offense. Violations include, but are not limited to, the major behaviors of academic honesty, as defined below:

Cheating: The act of deceiving, which includes such acts as, but is not limited to:

- Using unauthorized notes or other study aids during an examination;
- Using unauthorized technology during an examination;
- Improper storage of prohibited notes, course materials and study aids during an exam such that they are accessible or possible to view;
- Looking at other students' work or allowing one's own work to be looked at during an exam or in an assignment for which collaboration is not allowed;
- Attempting to communicate with other students to get or provide help during an exam or in an assignment for which collaboration is not allowed;
- Obtaining or providing an examination prior to its administration;
- Altering graded work and submitting it for regrading;
- Allowing another person to do one's work and submitting it as one's own;
- Doing work for another person for them to submit as their own;
- Submitting work done in one class for credit in another without both instructors' permission;
- Obstructing or interfering with another student's academic work;
- Undertaking any activity intended to obtain an unfair advantage over other students.

Plagiarism: The use, whether by paraphrase or direct quotation, of the published or unpublished work of another without full and clear acknowledgment through proper citation. Examples include:

- Misrepresentation of sources used in a work for which the student claims authorship;
- Improper use of course materials in a work for which the student claims authorship;
- Use of papers purchased online and turned in as one's own work;
- Submission of written work such as laboratory reports, computer programs, or papers that have been copied from the work of other students, with or without their knowledge or consent.

A student can avoid the risk of plagiarism in written work or oral presentations by clearly identifying and indicating, either in citations or in the paper or presentation itself, the source of the idea or wording that he/she did not produce. Sources must be given regardless of whether the idea, phrase, or material is quoted directly, paraphrased, or summarized in the student's own words.

Misrepresentation: The substitution of another student/individual during the taking of a quiz/examination or for the completion of a course. Submitting a duplicate assignment with the student's name changed.

Conspiracy: Agreeing with any other person to commit or attempt to commit academic dishonesty.

Alteration or Fabrication of Data: The submission of data not obtained or generated by the student during the course of research. The deceitful alteration of data obtained by the student during the course of research.

Multiple Submissions: The use of work previously submitted at this or any other institution to fulfill academic requirements in another class. Slightly altered work that has been resubmitted is also considered to be fraudulent, although with prior permission, some professors may allow students to complete one assignment for two classes. In this case, prior permission from both instructors is absolutely necessary. Students must properly cite any use of their previously submitted work.

Academic Misconduct: The intentional violation of college policies by tampering with grades or taking part in obtaining or distributing any part of a test, quiz, or graded assignment. Examples include:

- Stealing, buying, downloading, or otherwise obtaining all or part of a test and/or test answers;
- Selling or giving away all or part of a test and/or test answers;
- Asking or bribing any other person to obtain a test or any information about a test;
- Misrepresenting the truth; lying to an instructor to increase a grade; and lying or misrepresenting facts when confronted with an allegation of academic dishonesty;
- Changing, altering, or being an accessory to changing and/or altering of a grade in a grade book, on a computer, on a test, on a "change of grade" form, or on other official academic records of the college that

Campus Programs

relate to grades.

Electronic Devices: Examples of the improper use of electronic devices (such as personal computer, tablet, cell phone, and other devices) include but are not limited to:

- Unauthorized access, modification, use, creation or destruction of data stored on electronic devices;
- Selling or giving away all or part of the information on electronic devices that will be used as graded material;
- Sharing an electronic device while leaving answers on display or in memory.

Unauthorized Collaboration: The sharing of quiz/exam questions or answers with another student without the instructor's permission. The copying of another student's homework without the instructor's permission. Allowing another student to copy work. Group collaboration on individual assignments without the instructor's permission. Using a writing service or having someone else write a paper on the student's behalf.

Attempts to engage in any of the academic conduct described above or the facilitation of any of this academic conduct by another individual will be treated as academic conduct constituting academic dishonesty for purposes of this policy.

The preceding forms of academic dishonesty are stated in general terms. The individual schools may deem it appropriate to supplement the present statement of policy with specific interpretations that relate its terms and provisions to the individual programs of the schools. In addition, the individual schools are responsible for implementing programs to educate faculty, staff, and students in the requirements of this policy and to answer any questions that may arise regarding specific interpretations of this policy.

Academic Honesty Policy Awareness

Faculty and appropriate staff are asked to join in educating students about academic honesty, while students are expected to acquaint themselves with the policy.

Faculty: Faculty should familiarize themselves with the policy on academic integrity; make clear in their syllabi the University's stance on academic integrity; discuss in their classes their own expectations regarding academic integrity as it applies to specific features of courses; incorporate into their course assignments and/or courses conditions that minimize the chance for violation of the policy; make clear to students in their courses the distinction between group and individual assignments, the method of citation required, and other policies relevant to helping students maintain academic integrity; be willing to clarify misperceptions or confusion, should students have questions about what constitutes academic dishonesty; and to investigate and report any violation of the policy that comes to their attention.

Students: Students are expected to acquaint themselves with the academic integrity policy; familiarize themselves with the syllabi of individual courses, which may contain more specific guidelines for citing material, working in groups, etc.; seek timely clarification from instructors on any aspect of a course or the policy about which they have questions or confusion; and to encourage their peers to uphold the standards of academic honesty.

Administrators: Administrators should endorse the policy actively by incorporating awareness of it in orientation meetings, promotional literature, educational programs, etc., and support faculty and students who attempt to carry out the provisions of the policy.

Academic Honesty and Process for Violation

General Provisions

This policy applies to all students enrolled in University College. This policy applies to all academic conduct in the broadest sense, including submitted drafts, final coursework, research, comprehensive examinations, and the preparation of theses or dissertations. The faculty member is responsible for initiating the procedures in this policy. The term "faculty member" includes any individual or board with responsibility for a class, project, or activity. Other University employees, such as graduate or teaching assistants, are expected to bring any suspected cases of academic dishonesty to the attention of the responsible faculty member, who will proceed with this policy's procedures.

Process for Violation of Policy

The process, including the resolution of any violation of academic honesty, initially rests within the school in which the course in question resides. For **first-time, less egregious violations**, the process primarily involves a discussion between the faculty member and student.

1. When a faculty member learns of a possible violation of academic honesty, the instructor must file an incident report via the SNHU CARE homepage. Submitting this incident report serves as a record in the student's file and provides a means for tracking any repeat violations.
2. The faculty member must discuss the issue with the appropriate department chair or equivalent and associate dean. The dean's office may elevate the matter to the academic conduct board based on the complexity or seriousness of the allegation.
3. When the matter is understood to be a first-time, less egregious violation, the associate dean sends notification to the student (no later than five business days after the faculty member became aware of the suspected occurrence), notifying the student of the academic dishonesty violation and scheduling an appointment between the student and reporting faculty member to discuss responsibility for the charges. The email provides the student with the academic honesty policy and serves as a reminder of the student's rights and responsibilities.
4. During the instructor's discussion with the student,
 1. If the faculty member determines that the violation was an unintentional mistake rather than a purposeful act of dishonesty, the instructor may use the occasion to educate the student about

Campus Programs

standards of academic honesty. For example, the faculty member may require the student to correct the original assignment or submit a substitute assignment.

2. If the faculty member determines that the violation was an intentional act of dishonesty, the instructor may decide to assign a lower or failing grade for the assignment, assign a failing grade for the course, etc. (See sanctioning guide in this policy.)
3. In both circumstances, the faculty member must inform the associate dean of the meeting's outcome. In a follow-up email to the student, the associate dean shares the responsibility of any assigned sanctions, and the student's right to appeal. If the student does not appeal the charge within five business days, the faculty member's decision is deemed final.
5. If the student initiates an appeal, the associate dean will review the appeal within 10 business days. An appeal must demonstrate one or more of the following bases for appeal and explain in detail the support for each basis:
 1. New Information is now available that was not available at the time of the violation. This information may have been sufficient to alter the original decision. This new evidence will be considered only if it is clear that the evidence could not have been known at the time of the original violation.
 2. A procedural error occurred on the faculty member's part and was not addressed in accordance with procedures prescribed by the disciplinary process. This procedural error impaired a student's right to a fair opportunity to be heard.
 3. The severity of the sanction is not appropriate for the violation(s) committed, given the past disciplinary history of the student.
6. The associate dean may uphold the original decision, modify the outcome, or overturn the decision entirely. Once the associate dean has made a decision, the student will not be able to appeal again.

For **first-time, more egregious violations, or for repeated cases of academic dishonesty**, the process primarily involves the academic conduct board, which reviews the reports of academic dishonesty, determines responsibility for any charges, and decides appropriate sanctions.

1. When a faculty member learns of a possible violation of academic honesty, the instructor must file an incident report via the SNHU CARE homepage. Submitting this incident report serves as a record in the student's file and provides a means for tracking any repeat violations.
2. The faculty member must discuss the issue with the appropriate department chair or equivalent and associate dean. The dean's office has the discretion to elevate the matter to the academic conduct board based on the complexity or seriousness of the allegation.
3. When the matter is understood to be a first-time, more egregious violation or a repeated case of academic dishonesty, the associate dean notifies the director of community standards, who convenes a hearing with the academic conduct board. The director of community standards notifies the student of the alleged violations no later than five business days after the faculty member becomes aware of the suspected occurrence. The email also provides the student with the academic honesty policy and serves as a reminder of the student's rights and responsibilities.
4. The academic conduct board may be comprised of three-six disinterested voting members, representing the University community and always including faculty, staff, and students. The director of community standards serves as a non-voting facilitator of the hearing process, recording the proceedings, and maintaining the case's private records.
5. The student is invited to attend the hearing to provide an explanation or response to the charge of academic dishonesty. If the student does not attend, the board makes a decision in the student's absence.
6. The board reviews the documentation of academic dishonesty supplied by the charging faculty member, questions both the faculty member and student, and decides student responsibility based upon a preponderance of evidence.
7. If the board finds the student responsible for the violation, the board changes the student's disciplinary standing and imposes academic conduct sanctions where appropriate. While the board may recommend academic sanctions to the faculty member, the board may not assign the student's academic sanction, as that is solely done by the charging faculty member. In all cases, a student's prior disciplinary history (both academic and behavioral) and the length of time between violations are taken into consideration when selecting appropriate sanctions. Students are no longer in good standing at the level of University probation. All violations are cumulative and a student's disciplinary standing rarely goes backwards in severity.
8. After the hearing concludes, the faculty member may choose to assign an academic sanction, either accepting the academic conduct board's recommendation or deciding his/her own. If the faculty member assigns an academic sanction, he/she requests a meeting with the student to discuss the rationale for the sanction. The faculty member may not change the student's already-assigned conduct sanction and disciplinary standing.
9. The director of community standards shares the hearing's outcome with the student, including any responsibility findings, assigned sanctions from the board and faculty member (if applicable), and the student's right to appeal. If the student does not appeal the outcome within five business days, the board and/or faculty member's decisions are deemed final.
10. If the student initiates an appeal, the appeal board (for appeals relating to process, new information, and/or severity of sanctions involving disciplinary standing and conduct sanctions) and/or associate dean (for appeals relating to academic sanctions) review the appeal within 10 business days. An appeal must demonstrate one or more of the following bases for appeal and explain in detail the support for each basis:
 1. New Information is now available that was not available at the time of the violation. This information may have been sufficient to alter the original decision. This new evidence will be considered only if it is clear that the evidence could not have been known at the time of the original violation.
 2. A procedural error occurred on the faculty member's part and was not addressed in accordance with procedures prescribed by the disciplinary process. This procedural error impaired a student's right to a fair opportunity to be heard.
 3. The severity of the sanction is not appropriate for the violation(s) committed, given the past disciplinary history of the student.

Campus Programs

11. The appeal board and/or associate dean may uphold the original decision, modify the outcome, or overturn the decision entirely. Once a decision has been made, the student will not be able to appeal again.

Sanctions for Academic Misconduct

The University response represents a progression in which punitive measures increase as the severity or frequency of a behavior increases. A student's disciplinary standing is active for a length of time (a semester, year, or more) depending on the nature of the incident.

For violations that relate to academic courses or documentation related to academic work, the following levels guide the conduct process. The faculty member, associate dean, and director of community standards tentatively determine levels prior to the hearing and then affirm them prior to sanctioning, if the student is found responsible. The tentatively determined level may change based on the information presented.

More than one of the sanctions listed may be imposed for any violation.

When assigning probation or suspension, the summer semester does not count toward the number of semesters assigned. Students remain on probation or suspension during any University breaks (e.g., summer, winter, spring break) that fall during an assigned sanction.

Academic Hearing Levels and Sanctions:

Level 1

Prohibited academic conduct that occurs because of a student's inexperience or lack of knowledge regarding the principles of academic integrity. These involve a small proportion (e.g., < 20%) of the total course work, are not extensive, and/or occur on a minor assignment

- Academic Sanction (academic conduct board will recommend faculty assign one of the following):
 - "0" on the assignment
 - Make-up assignment (with student receiving only 50% of the earned credit)
- Conduct Sanction (academic conduct board will assign one or more of the following):
 - Community service
 - Other sanctions to make amends for the academic misconduct (e.g., stress management seminar, skills development seminar, alternative research paper)
- Disciplinary Standing (academic conduct board will assign one of the following):
 - One semester of University probation

Level 2

Prohibited academic conduct characterized by dishonesty of a more serious nature or that affects a more significant proportion (e.g., 20<50%) of the course work

- Academic Sanction (academic conduct board will recommend faculty assign one of the following):
 - "0" on the assignment or examination (grade must be used in calculation of final grade [i.e., this grade cannot be dropped, if applicable])
 - One letter-grade reduction in the final grade (e.g., B+ to C+, B to C, B- to C-)
- Conduct Sanction (academic conduct board will assign one or more of the following):
 - Community service
 - Other sanctions to make amends for the academic misconduct (e.g., stress management seminar, skills development seminar, alternative research paper)
- Disciplinary Standing (academic conduct board will assign one of the following):
 - One semester or more of University probation

Level 3

Prohibited academic conduct includes dishonesty that affects a major (e.g., > or = 50%) or essential portion of work done to meet course or program requirements and/or involves premeditation, OR those where the respondent has previously been found responsible for a Level 1 or Level 2 violation (i.e., second offense). Such cases will automatically go to an academic conduct hearing.

- Academic Sanction (academic conduct board will recommend faculty assign one of the following):
 - D in the course (this would be the highest grade that the student can achieve in the course); or an F, if the course is a pass/fail course
 - F in the course
 - Failure of program requirement
- Conduct Sanction (academic conduct board will assign one or more of the following):
 - Community service
 - Other sanctions to make amends for the misconduct (e.g., stress management seminar, skills development seminar, alternative research paper)
- Disciplinary Standing (academic conduct board will assign one of the following):
 - One semester or more of University suspension
 - University probation until 30 days prior to graduation from the University or until the student separates from the University

Level 4

Prohibited academic conduct represents the most serious breaches of academic integrity and will automatically go to

Campus Programs

an academic conduct hearing.

- Academic Sanction (academic conduct board will recommend faculty assign one of the following):
- F in the course
- Failure of program requirement
- Disciplinary Standing (academic conduct board will assign the following):
- Dismissal from the University

Acceptable Use Policy

1 Introduction

Southern New Hampshire University (the University) supports the lawful use of information technologies and data (technology assets). Technology assets must be used for their intended purpose in serving the interests of the University's educational, instructional, research, and administrative business while respecting the rights of other technology users and the integrity of the workplace.

The University community includes faculty, adjunct faculty, staff, students, learners, senior leadership, members of the Board of Trustees (the Board), vendors, consultants, contractors, outside agencies and other external groups with which the University has relationships.

If an individual is in violation of the Acceptable Use Policy, the University may take the following action:

- Restriction of and possible loss of access or privileges
- Disciplinary action
- Termination of employment
- Termination of contract or other business agreement
- Expulsion from the University
- Requirement to repay costs incurred by the University
- Referral to law enforcement for legal action

2 Definitions

[Link to Master Definitions & Roles List Here](#)

3 Policy

The University requires users to adhere to the Acceptable Use Policy.

Users of technology assets have access to valuable University resources and legally controlled and Confidential Information.

Technology assets issued by the University remain the property of the University. Members of the University community are individually responsible for appropriate use of all resources assigned to them. Members of the University community must have a valid business or educational need and authorization to access University technology assets.

Data created and/or stored on University assets remains the property of the University unless a policy exception applies. Users should have no expectation of privacy when using University systems unless otherwise required by University policy or applicable law. The University reserves the right to monitor all activity for security purposes (see the Security Monitoring Policy). When in doubt as to whether an action is authorized, please contact your direct supervisor or the University's Information Security Management Office (ISMO).

3.1 Scope

This policy applies to all users and technology assets owned, provisioned, entrusted to, or managed by the University. It includes but is not limited to computer equipment, hardware, storage media, software, business applications, data files, business licenses, operating systems, networks, as well as use of services such as internet, voice communication, computer accounts, electronic mail, collaboration tools, and data in use or entrusted to the University or any portion or subsidiary. It also extends to:

- The use of personally-owned devices for University business
- The use of University assets for personal business

Campus Programs

3.2 Purpose

Members of the University community are expected to follow a standard of conduct in the use of computing resources. Use of technology assets must be ethical, comply with all laws and University policies, and be used for the purpose of achieving the University mission. Members of the University community must refrain from activity known to put the well-being of the University and its members at risk.

3.3 Roles and Responsibilities

All users are responsible for knowing and complying with University policies that apply to appropriate use of its technologies and resources to include this Acceptable Use Policy (see the Employee Handbook, Student Handbook, Faculty Handbook or other agreements in place). Members of the University community are required to use assets lawfully and are individually responsible for knowing the law.

4 Procedure

4.1 Acceptable Use

This section of the policy identifies the acceptable use of technology assets at Southern New Hampshire University to protect the user and the University community.

In making acceptable use of resources, individuals covered by this policy must:

- Use resources for authorized purposes and adhere to local, state, federal, and international laws governing the use of technology assets issued by the University.
- Protect user credentials and systems from unauthorized use. Each individual is responsible for all access to University technology assets by their credentials and/or any activity originating from their system.
- Access only the information to which you have been authorized or that is publically available using the appropriate account.
- Protect Confidential Information in accordance with the Data Protection and Data Classification Policies and Standards. Examples of Confidential Information include but are not limited to personally identifiable information (PII), protected health information (PHI), student data, financial aid data, bank account information, payment card data and other data such as intellectual property, confidential, and competition-sensitive information.
- Protect data that resides on or is transmitted to and from University systems in all forms to include but not limited to electronic data and hardcopy data.
- Use only legal versions of copyrighted software in compliance with vendor license requirements and comply with third-party agreements.
- Report immediately any suspicious or unusual activity, unexplained service interruption or degradation, suspected theft, loss, or compromise of technology assets to your supervisor or University point of contact.
- Limit personal use of University technology assets to incidental, intermittent and minor use that is consistent with applicable law and University policy. Personal use must never put the University at risk and must not interfere with University business or productivity. The University is not responsible for the confidentiality, integrity, or availability of personal content on University-issued assets. Examples include but are not limited to personal files, pictures, videos, sound files, personal software or software licenses, personal emails, eBooks, user credentials that access personal accounts, and other personal electronic files residing on a University-issued asset.
- Return University assets when separating from the University.

4.2 Prohibited Use

In making acceptable use of resources, individuals covered by this policy must not:

- Use technology assets unlawfully or in violation of University policy.
- Install unauthorized software or hardware on a University-issued asset.
- Allow access to University technology assets to an unauthorized individual (individuals who do not have a user account, or business relationship with the University).
- Leave your endpoint without initiating screen lock or logging out of the system or positioning screen away from public view when accessing Confidential Information.
- Speak confidential information publicly or to unauthorized individuals.
- Access, process or store Confidential Information if not authorized.
- Fail to provide reasonable physical protection to University-issued assets to avoid theft (ways of preventing theft include storing assets out of view, locking them up, and keeping them on your person).
- Attempt to circumvent security controls.
- Change or remove any computer settings, software or controls that provide confidentiality, integrity or availability to data or systems such as antivirus software, group/active directory policies, system folder permissions, user permissions, screen lock settings, audit settings, system services.
- Deliberately introduce to a University-issued asset unauthorized software such as malware, hacking/cracking tools, anti-forensic or network tunnelling software especially through the use of a personal (non-SNHU issued) email account (be cautious when accessing these email accounts from a University-issued device).
- Share University-issued passwords.
- Physically connect personally owned devices to University assets without prior authorization.
- Disclose confidential University information to an unauthorized entity or person.

Campus Programs

- Attempt to gain unauthorized access to any University information system.
- Use of a University technology asset that conflicts with the Employee, Faculty or Student Handbook or University policy (including but not restricted to abusive, harassing, defamatory, profane, racist, or illegal behavior).
- Use of Cloud services not specifically approved via the Security Review risk management process (see the WSP).

4.3 Use of Personally-Owned Computing Devices

Users are required to adhere to local, state, federal and international laws governing the use of personally owned devices while on University property or while conducting University business regardless of location. An example is the New Hampshire Hands- Free Law.

University staff who have been authorized to access Confidential Information using their personally owned device must use reasonable security controls, including requiring authentication to access the device (PIN, password, biometric, encryption).

Users who are not authorized to use personal devices to access Confidential Information must not:

- Access, store, or record legally regulated University information on personal devices. Privacy data, payment card and bank account information, health data, and student data are examples of data regulated by law (see the Data Classification Policy and Standard for more information on protected data).
- Use personally owned devices of any kind to take pictures or record video in the gym, locker room, bathrooms, and any other area of the University where a reasonable expectation of privacy exists.

Copyright Guidelines

Guide to Online Use of Published Material in SNHU Courses

The following is a guide prepared by the Shapiro Library for the use of published material in support of SNHU courses through a learning management system. This is intended for educational purposes only and does not constitute legal advice or SNHU policy. SNHU employees are responsible for adhering to U.S. copyright law and applicable SNHU policies.

Some material is not protected by U.S. copyright law. Material that is in the Public Domain can be posted without copyright clearance or further Fair Use analysis. This applies mostly to older material (in general 1923 or older) that was published in the U.S. A convenient tool to use when trying to determine if something is in the Public Domain is the Copyright Digital Slider at <http://librarycopyright.net/resources/digitalslider/>. Additionally, government documents created by an officer or employee of the U.S. Government as part of that person's official duties are not protected by copyright law. Material published in an open format, such as under a Creative Commons license (<http://creativecommons.org/licenses/>), may also be used in accordance with the license.

Providing students with links to material available on the Internet or in library databases is not the creation of a copy and may be done unless there are specific licensing agreements in place prohibiting linking (Harvard Business Review articles are a notable instance in which licensing prohibits linking). Linking to illegally created material that infringes on copyrights can, however, be considered contributory copyright infringement and should be avoided.

Fair Use allows for the copying of copyrighted material in certain circumstances based on the balancing of several factors:

1. The purpose and character of the use, including whether such use is of a commercial nature or is for nonprofit educational purposes;
2. The nature of the copyrighted work;
3. The amount and substantiality of the portion used in relation to the copyrighted work as a whole; and
4. The effect of the use upon the potential market for or value of the copyrighted work.

Under Fair Use it is generally permissible to post:

- One chapter from a book with more than 10 chapters, or 10% of a book with fewer than 10 chapters;
- One article from an issue of a periodical or newspaper;
- A short story or short essay (less than 2,500 words) or short poem (less than 250 words);
- A chart, graph, diagram, drawing, cartoon or picture from a book, periodical, or newspaper.

If you wish to use a portion of a copyrighted work in excess of the limitations listed above, you may do so under Fair Use; provided, there is not a reasonable method for obtaining copyright clearance AND the amount duplicated does not constitute a replacement for purchasing the original work. Otherwise, copyright clearance is required.

Making Copies

- When using an excerpt the portion of the material used should not be "the heart of the work."
- Access to the material must be limited to students enrolled in the course and must not persist beyond the end of the course.
- Students must be reminded of the limitations of the U.S. Copyright Law and must be expressly told that policy

Campus Programs

- prohibits re-distribution of copied material.
- Copied material “must fill a demonstrated, legitimate purpose in the course curriculum” and be narrowly tailored to accomplish it.
- The duplication of works that are consumed in the classroom, such as standardized tests, exercises, and workbooks, normally requires copyright clearance.
- It is permissible to use the same materials from semester to semester without seeking copyright clearance.
- Materials purchased on an individual basis, such as case studies, cannot be posted without copyright clearance.
- Material borrowed through interlibrary loan cannot be posted without copyright clearance.

Clearance can be obtained through vendors such as the [Copyright Clearance Center](#).

If you have questions regarding the copyright status of a particular work, please contact your [library liaison](#).

For more information on Copyright, please visit the library's [copyright guide](#).

Copyright Policy

SNHU requires all members of the University community to comply with all state and federal laws including copyright laws. The students, faculty and staff at SNHU have access to the fundamentals of copyright law and SNHU's guidelines for educational use of copyright materials at [SNHU policies and resources concerning U.S. Copyright Law](#) and the [U.S. Copyright Office's Home Page](#). Unauthorized distribution of copyrighted material, including unlawful peer-to-peer file sharing, is a violation of University policy and may subject the infringing individual to disciplinary action, and also civil and/or criminal penalties described below.

Allegations of copyright infringement by SNHU users that comply with the Digital Millennium Copyright Act, Title II, Section 512 (c) (3) (“DCMA”) will be investigated. The University's designated DCMA agent will notify the Provost and Vice President of Academic Affairs of all valid notification of claimed copyright infringement received by SNHU for appropriate action. If SNHU determines that any users have infringed copyrights of others on a repeat basis, the offending user's access to online services may be terminated. SNHU reserves the right to choose how to address or respond to any allegation of copyright infringement received including, without limitation, the choice of any defense under applicable law.

Notification of Claimed Infringement under the Digital Millennium Copyright Act: If any owners of copyrights believe SNHU's users are infringing copyright protected work, they may send a notice to SNHU's designated agent at:

Evan Lowry, Staff Attorney
General Counsel's Office
Southern New Hampshire University
2500 North River Road
Manchester, NH 03106
603.626.9100
e.lowry@snhu.edu

Notification of claimed infringement must contain the information required by and otherwise comply with the Digital Millennium Copyright Act, Title II, Section 512(c).

SNHU DMCA Take-Down Procedure:

In compliance with the Digital Millennium Copyright Act, Southern New Hampshire University adopts the following procedure for the removal of infringing materials. As stated above, the University reserves the right to modify this response procedure on a case by case basis provided that the requirements of the law are met.

1. All DMCA notices shall be sent to the University's designated agent listed above. The agent will review the notice to ensure that it contains all elements required by Section 512(c)(3)(A) of the DMCA.
2. The designated agent shall acknowledge receipt of the claim to the complainant. If the notice provided does not substantially comply with the requirements of the DMCA, the agent shall attempt to contact the sender to notify of the non-compliant notice.
3. The designated agent shall coordinate the University's response, maintain records of notices and offenses, and assure all incidents are processed in accordance with the law. The actions of the agent shall protect the rights of intellectual property owners, while also respecting the rights of those accused of infringement. The agent shall consult the University's General Counsel regarding any questions of applicable law.
4. Upon receipt of a complaint, the designated agent shall work with a representative of the Information Security team to ensure the prompt removal of all infringing material. The agent will take reasonable steps to ensure such action does not negatively impact activities essential to the University's mission.
5. When a compliant counter-notice is received, the designated agent will ensure that the material is restored in accordance with the provisions of the DMCA.
6. Southern New Hampshire University may take steps to terminate access and exercise other disciplinary action in response to valid copyright infringement claims, particularly with regard to claims of repeat infringement.
7. Questions regarding this procedure should be directed to the University's designated agent listed above.

Using SNHU's Copyright Protected Materials

As a general rule, you may print, reproduce, and use the information in, and retrieve files containing publications or images from, only those WWW documents to which SNHU expressly grants permission or license, provided: (1) the use is for non-commercial, personal, or educational purposes only, (2) you do not modify any information or image, and (3) you include any copyright notice originally provided in the materials. If a particular author places further restrictions on

Campus Programs

the material, you must honor those restrictions. In some instances, specific information contents may be copyrighted by others. By using any of this material, you assume all risks of copyright infringement and related liability.

Using SNHU Logos, Trademarks and Licensed Graphics, and Web Templates

All standard graphics, photographs, and text of the SNHU Home Page and connected pages displaying the SNHU logos and logotype are copyrighted and trademarked by SNHU. Redistribution or commercial use are prohibited without express written permission.

Unlawful File-Sharing

Southern New Hampshire University strictly prohibits unlawful peer-to-peer file sharing, and has instituted a [File Sharing Policy](#) and [Network Acceptable Use Policy](#), which prohibit illegal sharing over the University's network. Students who engage in illegal downloading or unauthorized distribution of copyrighted materials over the University's networks will be subject to disciplinary action and may have their network privileges suspended or terminated.

Summary of Civil and Criminal Penalties for Violation of Federal Copyright Laws

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under section 106 of the Copyright Act (Title 17 of the United States Code). These rights include the right to reproduce or distribute a copyrighted work. In the file-sharing context, downloading or uploading substantial parts of a copyrighted work without authority constitutes an infringement. Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or "statutory" damages affixed at not less than \$750 and not more than \$30,000 per work infringed. For "willful" infringement, a court may award up to \$150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys' fees. For details, see Title 17, United States Code, Sections 504, 505. Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to \$250,000 per offense. For more information, please see the website of the U.S. Copyright Office at www.copyright.gov.

Disciplinary Dismissal

If a student is dismissed from SNHU for disciplinary reasons, he/she is permanently dismissed from the university without opportunity for readmission and the student will not be allowed on campus at any time.

Disciplinary Suspension

Southern New Hampshire University reserves the right to suspend any student for disciplinary reasons. Suspension means that the student is dismissed from Southern New Hampshire University for a given period, with an opportunity for readmission. This sanction may only be imposed by the Dean of Students or designee after a hearing. If suspended from the university, the student will be persona non grata on all university facilities and from all university functions for the period of his/her suspension. This information will be used in evaluating re-admission.

Pending action on any disciplinary allegations, the status of students shall not be altered, nor are their rights to continue working toward a degree suspended, except to protect the well-being of students or staff. Only the Chief Academic Officer or Dean of Students may make such a determination and direct provisional suspension.

File Sharing

Introduction

H.R 4137, the Higher Education Opportunity Act (HEOA), is a reauthorization of the Higher Education Act. It includes provisions that are designed to reduce the illegal uploading and downloading of copyrighted works through peer-to-peer (P2P) file sharing. These provisions include requirements that:

- Institutions make an annual disclosure informing students that the illegal distribution of copyrighted materials may subject them to criminal and civil penalties and details the steps institutions will take to detect and punish illegal distribution of copyrighted materials.
- Institutions certify to the Secretary of Education that they have developed written plans to "effectively combat" the unauthorized distribution of copyrighted material.
- Institutions, "to the extent practicable," offer alternatives to illegal file sharing.
- Institutions identify procedures for periodically reviewing the effectiveness of the plans to combat the unauthorized distribution of copyrighted materials.

This policy document outlines SNHU's plan to comply with these requirements.

Annual Disclosure

Consistent with our educational principles, we view education as the most important element in combating illegal sharing of copyrighted materials at SNHU. We use a wide variety of methods to inform our community about the law and SNHU's response to copyright infringement claims:

1. In order to use University computing resources, all members of the SNHU community are required to adhere to a [Network Acceptable Use Policy](#) that prohibits use of University computing resources for copyright infringement and a [Copyright Policy](#) that specifically addresses the University's position on copyright laws and file sharing.
2. Every fall we send an email to all students regarding illegal distribution of copyrighted materials.
3. SNHU's policies and procedures concerning the Digital Millennium Copyright Act and our response to

Campus Programs

infringement claims are published on the University web site.

4. Southern New Hampshire's library staff have provided extensive educational materials regarding copyright rights and responsibilities, which can be viewed [here](#).

Plans to "Effectively Combat" the Unauthorized Distribution of Copyrighted Material

Southern New Hampshire University employs multiple technology-based deterrents to combat the unauthorized distribution of copyrighted materials. SNHU's firewall and network monitoring technologies enable bandwidth-shaping technology to both block network access to known sites/services employed in the unauthorized distribution of copyrighted materials. SNHU responds promptly to legitimate notices or letters of illegal copyright infringement based on the requirements of the Digital Millennium Copyright Act and sent to our DMCA agent address. In addition, SNHU takes appropriate disciplinary action against community members who violate its rules and policies governing file-sharing and copyright. Disciplinary procedures may include, but are not limited to, referral to student affairs or human resources with possible sanctions including suspension or termination of network privileges for repeat infringers.

Alternatives to Illegal File Sharing

There are many legal sources for copyrighted material such as music and movies. They have a wide range of business models; some are free and some charge a nominal fee. The Motion Picture Association of America maintains an up-to-date and comprehensive list of legal sources available at <https://www.wheretowatch.com>. In addition, Educause maintains a comprehensive list of Legal Downloading Resources at <https://www.educause.edu/legalcontent>. Members of the SNHU community are encouraged to take advantage of these legitimate sources of digital content.

Reviewing Effectiveness

Beginning in 2011-2012 and periodically thereafter, SNHU will assess the extent to which our anti-piracy efforts are succeeding. We will analyze the impact of our technical efforts to combat illegal file sharing, and other aspects of our plan to combat the unauthorized distribution of copyrighted materials, and make changes or updates deemed necessary.

Inclusivity & Non-Discrimination

Southern New Hampshire University values and promotes social diversity, inclusivity, and social justice. In order to provide an inclusive, respectful, and constructive educational environment, all members of the SNHU community will:

- Respect the varied histories, identities, ideas, and experiences of all people.
- Respect the diversity of all social groups, including race, ethnicity, sex, gender identity, gender expression, nationality, veteran status, sexual orientation, ability, age, religion, socio-economic class, and all intersections.
- Reject bigotry and discrimination of all forms, including harassment, bullying, hate speech, and non-compliance with preferred names and gender pronoun requests.

Accusations of discrimination on our campus may result in serious disciplinary action. Students are encouraged to report incidents that compromise the inclusivity and civility of our academic environments to their professors and / or to their School Dean, as follows.

- The School of Education: Belknap 100; 629-4675
- The School of Business: Webster 101; 644-3153
- The School of Arts and Sciences: Frost 103; 645-9692
- The Dean of Student Success (Exploratory Studies students): Exeter 59; 645-9630

Definitions of Types of Discrimination

Harassment

- Intentional (though sometimes subtle) intimidation, aggression, and / or coercion based on discrimination against perceived differences.

Bullying

- Intentional physical and or verbal aggression that involves an imbalance of power. Bullying may include teasing and insults intended to belittle, ostracize, and / or harm another, based on perceptions of inferiority or weakness.

Hate Speech

- Any speech, gesture, writing, or display that encourages violence or prejudice against an individual or group based on perceived membership with a social identity (often a subordinate identity) group.

Bigotry

- Intolerance towards those perceived as different or holding different views, including the refusal to comply with preferred names and / or preferred pronouns.

Incidents and Protocols: Students who feel that their classrooms are not inclusive are encouraged to adhere to protocol for voicing their concerns, as follows:

Student Complaints about Students: If a student feels that another student has violated the classroom Inclusivity and Non-Discrimination Policy, the student should request a meeting with their professor.

Campus Programs

The professor will:

1. Hear and discuss the student's complaint within seven days of receiving meeting request.
2. Review with the student the definitions of types of discrimination (listed on this policy).
3. Develop, within seven days, an appropriate response to the complaint, using one or both of the following methods:
 1. Work with the student(s) to resolve the complaint. *The professor may consult with their school Dean, the Vice President of Academic Affairs, the President's Commission for LGBTQ+ Advocacy and / or with SNHU's Chief Diversity Officer, in order to develop recommendations and / or educational resources relevant to the incident.
 2. Prepare a SNHUCares ticket, in order to advocate for further intervention and support. *The SNHU Cares team will coordinate next steps and dictate follow up procedures with the student.

Student Complaints about Faculty: If a student feels a professor has violated the classroom Inclusivity and Non-Discrimination Policy, the student should request a meeting with their professor to discuss the incident. The student may request that others are present, including but not limited to other students, the Associate Dean, or the school Dean. If the student is uncomfortable discussing the matter directly, they may contact their school Dean or in the case the Dean is unavailable, the Associate Dean. *Students who have not declared a major may request a meeting with the Dean of Student Success.

The Dean will:

1. Hear and discuss the student's complaint within seven days of receiving meeting request.
2. Review with the student the definitions of types of discrimination (listed on this policy).
3. Develop an appropriate response to the complaint, within seven days. *The Dean may consult with the Vice President of Academic Affairs, the President's Commission for LGBTQ+ Advocacy and / or with SNHU's Chief Diversity Officer to inform an appropriate response to the complaint.
4. Meet as soon as possible with the student to discuss the response / recommendations as permitted by relevant laws and policies.

Appeal Process: Students who disagree with their professor's response / resolution to their complaints may submit appeals to their school Dean (or in the case the Dean is unavailable, to the Associate Dean) who will then follow the above protocol. Students who disagree with their Dean's response / resolution to their complaints may submit appeals to the Vice President of Academic Affairs (VPAA), located in ACC 107, 645-9695. Within seven days of receiving a student's appeal, the VPAA will involve the student's school Dean to support or revise the response, as follows:

- If the VPAA *supports* the response, the Dean is responsible for follow through on the recommended action within seven days.
- If the VPAA *revises* the response, the Dean is responsible for follow through on the revised action within seven days. *The VPAA may consult with the President's Commission for LGBTQ+ Advocacy, SNHU's Chief Diversity Officer and / or with Human Resources, in order to develop recommendations and / or educational resources relevant to the incident.
- If the VPAA decides that the incident warrants more serious adjudication, the VPAA will consult with other institutional officers, as needed.

Online Course Etiquette

All students are expected to adhere to the Student Code of Conduct when working in the online environment. Due to the open nature of the discussion forums, students are expected to post professional, relevant responses that are suitable to an academic environment. Since any number of sensitive topics may be discussed, students must maintain an open mind while reading their peers' postings. Students are required to be mindful of and respectful toward the person receiving any communication. Any comments deemed disruptive to the learning environment may be permanently deleted and may result in disciplinary action (minor or major).

Online Services

Students can search for classes, register online, print course schedules, view mid-term and final grades, submit address or phone number changes, drop or add classes and much more with my.SNHU. Students gain access to my.SNHU by visiting my.snhu.edu, and using their assigned login ID and password. Complete instructions are available online for all students.

Personal Computer Software

Southern New Hampshire University licenses the use of computer software from a variety of outside companies. Southern New Hampshire University does not own this software or its related documentation and, unless authorized by the software developer, does not have the right to reproduce it.

Southern New Hampshire University students learning of any misuse of software or related documentation within the university shall notify Southern New Hampshire University's Information Technology Solutions Department.

According to the U.S. Copyright Law, persons involved in the illegal reproduction of software can be subject to civil damages of as much as \$50,000 and criminal penalties, including fines and imprisonment. Southern New Hampshire University does not condone the illegal duplication of software. Southern New Hampshire University students who make, acquire or use unauthorized copies of computer software shall be disciplined as appropriate under the circumstances. Such discipline may include dismissal from the university.

Support Services

ADA/504 Grievances

1 Introduction

Southern New Hampshire University (the University) is dedicated to providing equal access to individuals with disabilities in accordance with Section 504 of the Rehabilitation Act of 1973 and Title III of the Americans with Disabilities Act (ADA) of 1990, as amended by the Americans with Disabilities Act Amendments Act of 2008. The University prohibits unlawful discrimination on the basis of disability and takes action to prevent such discrimination by providing reasonable accommodations to eligible individuals with disabilities. The University has adopted this policy providing for prompt and equitable resolution of complaints regarding any action prohibited by the ADA or Section 504.

2 Definitions

Complaint	Disability discrimination concern handled informally through the appropriate department as outlined in the Informal Complaint Process
Grievance	Disability discrimination concern handled formally through the appropriate department as outlined in the Formal Grievance Process

3 Policy

3.1 Scope

It is the policy of Southern New Hampshire University to not discriminate on the basis of disability. This policy extends to all rights, privileges, programs, and activities including housing, employment, admissions, financial assistance, and educational and athletic programs. It is also the policy of the University to provide reasonable accommodations to persons with disabilities unless such accommodations would impose an undue burden or fundamental alteration to the program in question; or for employees, would unreasonably interfere with the performance of the position's essential functions.

3.2 Purpose

The purpose of this policy is to ensure that all complaints based on disability are thoroughly and fairly investigated by the authorized units of the University, which will conduct an adequate, reliable, and impartial investigation of all complaints, with due regard for the rights of all parties. The University will take steps to prevent the recurrence of any discrimination or harassment and to correct its discriminatory effects on the complainant and others, if appropriate. Retaliation against any individual who has filed a complaint, or who has cooperated in the investigation of such a complaint, is unlawful and in violation of University policy.

The University has adopted an internal grievance process providing for prompt and equitable resolution of complaints regarding any action prohibited by the Americans with Disabilities Act (ADA) and by the Department of Education regulations implementing Section 504 of the Rehabilitation Act of 1973, as amended. Section 504 states, in part, that "no otherwise qualified individual with a disability...shall solely by reason of his or her disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance..." Complaints can include physical, electronic, or programmatic barriers (such as an inoperative elevator, an inaccessible website, or a blocked access ramp), a refusal to make a reasonable accommodation, failure to follow an approved accommodation, the inadequacy of an accommodation that has been granted, etc.

4 Procedure

Any student, faculty, staff, or member of the public who believes he or she has been subject to discrimination on the basis of disability, by any party, may file a complaint or grievance under this procedure. Concerns can be handled through an *informal complaint process* or can be escalated to a more *formal grievance process*. Steps for both options are outlined below.

Southern New Hampshire University will make appropriate arrangements to ensure that persons with disabilities are provided reasonable accommodations, if needed, to participate in the grievance process. The complainant should contact the ADA/504 Compliance Coordinator by email at adacompliance@snhu.edu or phone 603.645.9664 for such arrangements.

Informal Complaint Process

The University encourages the informal resolution of complaints and will assist any individual with that process. The University is also committed to the prompt investigation and resolution of concerns pertaining to the civil rights of individuals attending the University, employed by the University or participating in University functions, of which it is aware regardless of the filing of an actual grievance. Complaints can be resolved informally by:

Campus Programs

- Online & Advantage students should contact:

Director, Online Accessibility Center

866.305.9430

oad@snhu.edu

- Campus students should contact:

Director, Campus Accessibility Center

603.644.3118

cac@snhu.edu

- Staff and Faculty of the University should contact their local HR Business Partner or request information from:

Hr4u@snhu.edu

- Members of the public and those with questions should contact:

ADA/504 Compliance Coordinator

adacompliance@snhu.edu

Phone: 603.645.9664

- Students working in a paid capacity for the University should contact the appropriate department depending on the circumstances. Student-related complaints would be handled through the student channels listed above. Employment-related complaints would be handled through Human Resources.

Formal Grievance Process

1. An individual dissatisfied with the informal resolution attempt or wishing to forego an informal resolution may follow the more formal grievance process. A formal grievance should be filed as soon as possible after the incident or informal resolution attempt and no more than 180 calendar days from date of the incident. A formal grievance must be filed in writing and should contain a statement of facts, as specific as possible, regarding the concern or action. Any person having an issue with completing the grievance form may contact the ADA/504 Compliance Coordinator by email at adacompliance@snhu.edu or by phone at 603.645.9664 for assistance.

- **Online & Advantage:**

Students should file a grievance using the following form: https://cm.maxient.com/reportingform.php?SouthernNHUnivCOCE&layout_id=3

- **Campus:**

Students should file a grievance using the following form: https://cm.maxient.com/reportingform.php?SouthernNHUnivCOCE&layout_id=55

- **HR:**

Staff and Faculty should contact their local HR Business Partner or request information from: Hr4u@snhu.edu

- The formal grievance process for employees will differ from the steps below. Employees should refer to the Employee Handbook and Master Agreement for details on the employee grievance process. Contact Human Resources for more information.

Campus Programs

- **Members of the public:**

- Members of the public may file a formal grievance by requesting a formal grievance form from the ADA/504 Compliance Coordinator by email at adacompliance@snhu.edu or by phone at 603.645.9664.

- The formal grievance process for members of the public will be similar to the processes identified below and will be investigated by the appropriate reviewer depending on the nature of the grievance.
- Students working in a paid capacity for the University should contact the appropriate department depending on the circumstances. Student-related complaints would be handled through the student channels listed above. Employment-related complaints would be handled through Human Resources.

1. To be timely, a formal grievance must be filed within 180 calendar days of the date the incident.

1. Once a formal grievance form is received, the reviewer will investigate the matter set forth in the written grievance, as may be appropriate, within 20 working days following the opening of a grievance. These rules contemplate thorough investigations, affording all interested persons and their representatives, if any, an opportunity to present witnesses and submit evidence relevant to the grievance. In conducting an investigation, the reviewer may forward a copy of the grievance statement to the persons whose actions (or inactions) are the subject of the grievance and may request a written response from appropriate individuals within the University. The reviewer may also interview witnesses, meet with concerned parties, receive oral or written statements, and make other appropriate inquiries.
1. The reviewer will issue a written determination as to the validity of the grievance and a description of the resolution, if any, and forward a copy to the complainant's SNHU email account, and respondent if applicable, no later than 20 working days after the grievance is received. The deadline may be extended for good cause.

- **Online:**

After completing the investigation, if no discrimination is found, the reviewer will forward a copy of the report and recommendation to the Senior Director of Dispute Resolution. If discrimination is found, the reviewer will forward a copy of the report and recommendation to the appropriate University officials as follows:

COCE:

- If the grievance arises out of an academic unit, the report will be forwarded to the Senior Director of Dispute Resolution as well as the Dean of the appropriate school or college, unless he or she is the subject of the grievance. In such cases, the report will be sent to the COCE Vice President of Academic Affairs (or designee).
- If the grievance arises from a non-academic unit, the report will be forwarded to the Senior Director of Dispute Resolution as well as the administrative head of the unit, unless he or she is the subject of the grievance. In such cases, the report will be forwarded to the COCE Associate Vice President of Student Experience (or designee).
- In all cases, formal written notification will be sent to the student's SNHU email account at the conclusion of the investigation.

CfA:

- If the grievance arises out of an academic unit, the report will be forwarded to the Senior Director of Dispute Resolution as well as the Director of Academic Operations, unless he or she is the subject of the grievance. In such cases, the report will be sent to the Executive Director of CBE Programs (or designee).
- If the grievance arises from a non-academic unit, the report will be forwarded to the Senior Director of Dispute Resolution as well as the Associate Vice President of Student Experience.
- In all cases, formal written notification will be sent to the student's SNHU email account at the conclusion of the investigation.

- **Campus:**

After completing the investigation, if no discrimination is found, the reviewer will forward a copy of the report and recommendation to the Director of Campus Accessibility Center. If discrimination is found, the reviewer will forward a copy of the report and recommendation to the appropriate University officials as follows:

Campus Programs

- If the grievance arises out of an academic unit, the report will be forwarded to the Director of Campus Accessibility Center as well as the Dean of the appropriate school or college, unless he or she is the subject of the grievance. In such cases, the report will be sent to the Vice President of Academic Affairs (or designee).
- If the grievance arises from a non-academic unit, the report will be forwarded to the Director of Campus Accessibility Center as well as the administrative head of the unit, unless he or she is the subject of the grievance. In such cases, the report will be forwarded to the supervisor of the administrative head of the division.
- In all cases, formal written notification will be sent to the student's SNHU email account at the conclusion of the investigation.

1. Southern New Hampshire University will keep all files and records related to the grievances filed for seven years.

1. The complainant, or respondent if applicable, may appeal the decision of the initial grievance within 10 working days to the ADA/504 Compliance Coordinator who will involve other University officials as deemed necessary. A link to the appeals form will be included in the formal written notification sent to the complainant, and respondent if applicable, at the conclusion of the formal investigation.

The appeal must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the current resolution. In the written appeal, the appellant must explain why he or she believes the factual information considered was incomplete, the analysis of the facts was incorrect, and/or the appropriate standard or procedure was not applied, *and* how this should change the University's determination of the matter.

A copy of the ADA/504 Compliance Coordinator's written decision will be sent to the reviewer of the formal grievance, the Senior Director of Dispute Resolution (for Online and Advantage students) or Director of Campus Accessibility Center (for Campus students), and the complainant's SNHU email account, and respondent's if applicable, within 20 working days of the filing of the appeal. The decision of the ADA/504 Compliance Coordinator is final.

1. The informal resolution option remains available at all stages of a grievance, up to and including appeal.

These rules will be construed to protect the substantive rights of interested persons, meet the appropriate due process standards, and assure that Southern New Hampshire University complies with the ADA and Section 504 and their implementing regulations. Any of the above time frames for the University may be extended if the University determines there are extenuating circumstances. Examples of extenuating circumstances include University holidays and absence or illness of witnesses or personnel. Under such circumstances, the complainant, and respondent if applicable, will be notified in writing as to the delay and a projected date for resolution.

General Education

Description

The General Education program at Southern New Hampshire University provides students with the knowledge, skills, and cultural awareness necessary to succeed in their major fields of study and become leaders in their chosen professions and communities. Students who complete the General Education program will also acquire the tools to become independent thinkers and lifelong learners who are able to make informed moral and ethical decisions. The General Education program is spread across all four years of study. The program is made up of three interrelated components: Foundation Courses that are primarily skills-based; Exploration Courses that require students to explore courses in fine arts and humanities, social and behavioral sciences, as well as in science, technology, and mathematics; and Culmination Courses which aim to provide students an opportunity to tie together the skills and knowledge attained throughout the General Education Program. ** Please refer to your Program Evaluation or your Academic Advisor for specific course information. **

Program Outcomes

1. A graduate of SNHU is expected to gain awareness and understanding of human cultures and the physical and natural world through study in Fine Arts and Humanities; Social and Behavioral Sciences; and Science, Technology, and Mathematics
2. A graduate of SNHU is expected to use effective written, verbal, and non-verbal communication for a variety of situations, genres, purposes, and audiences
3. A graduate of SNHU is expected to think critically and creatively by locating, assessing, and analyzing relevant information using quantitative and qualitative reasoning
4. A graduate of SNHU is expected to demonstrate the ability to learn and work collaboratively with individuals of diverse cultures and perspectives in order to reach common goals
5. A graduate of SNHU is expected to assess and accept the consequences of one's actions, be an informed and responsible citizen, and affect positive change in the world
6. A graduate of SNHU is expected to integrate general and discipline-based knowledge, apply this knowledge in and beyond the classroom, and reflect upon these experiences

Requirements

Foundation Courses
18 Total Credits

- Complete all of the following
English (FENG)

- Complete:

- ENG120 - College Composition I (3)
- ENG200 - Sophomore Seminar (3)

Mathematics (FMAT)

- Complete all of the following

- 1 of the following:

- MAT101 - Culinary Mathematics (3)
- MAT107 - Mathematical Knowledge for Teaching I (3)
- MAT108 - Mathematical Knowledge for Teaching II (3)
- MAT130 - Applied Finite Mathematics (3)
- MAT135 - The Heart of Mathematics (3)
- MAT140 - Precalculus (3)
- MAT160 - Introduction to Game Theory (3)
- MAT210 - Applied Calculus I (3)
- MAT224 - Calculus I: Single-Variable Calculus Part B (3)
- MAT225 - Calculus I: Single-Variable Calculus (3)
- MAT230 - Discrete Mathematics (3)
- MAT238 - Inferential Statistics with Algebra (3)
- MAT240 - Applied Statistics (3)
- MAT241 - Modern Statistics with Software (3)
- MAT275 - Calculus II: Integration & Series (3)
- MAT299 - Mathematical Proof and Problem Solving (3)

- NOTE: MAT 101 is for Culinary majors only.

- NOTE: MAT 107 and MAT 108 are for Early Childhood Education, Elementary Education, Middle School Mathematics Education, Music Education, and Special Education majors only.

First Year Experience

- Complete all of the following

Humanities Foundation (FHUM)

- 1 of the following:

Campus Programs

- FAS101 - Learning to Look (3)
- HIS101 - Exploring the Past (3)
- HIS102 - The Medieval World: Exploring the Past (3)
- HIS103 - The Early Modern World: Exploring the Past (3)
- HIS104 - The Modern World: Exploring the Past (3)
- LIT101 - The Literary Imagination (3)
- MUS101 - Music and Meaning (3)
- PHL101 - Philosophical Reasoning (3)
- Complete:
 - FYS101 - First Year Seminar (3)
 - PCC201 - Professional Communication and Career Planning (3)

Exploration Courses 21 Total Credits

- Complete all of the following
 - These requirements focus on students' development of knowledge of human cultures and the physical and natural world. This area requires students to explore courses in various disciplines. Students must take at least one (1) 100-, 200-, and 300-level Exploration course. Students will be required to develop their skills by completing a 100-level course before taking a 200-level course; by completing a 200-level course before taking a 300-level course; and by completing a 300-level course before taking a 400-level course. Courses taken as Exploration Courses may not also count as Major Courses.
 - NOTE: Students must choose two (2) courses from each of the Exploration Areas, with the exception of the one (1) course students must choose from the General Education electives area, with a maximum of one (1) course per subgroup.
 - Complete 2 of the following
 - Group A
 - 1 of the following:
 - FAS226 - Digital Photography (3)
 - FAS260 - History of Architecture (3)
 - FAS270 - Introduction to Film History (3)
 - FAS301 - Film and American Culture (3)
 - FAS302 - Gender and Film (3)
 - FAS320 - History of Design (3)
 - FAS326 - History of Photography (3)
 - FAS335 - Romanticism to Impressionism (3)
 - FAS342 - Modernism (3)
 - FAS345 - Contemporary Art (3)
 - FAS370 - American Art (3)
 - FAS380 - Women, Art and Society (3)
 - GST302 - Gender and Film (3)
 - GST380 - Women, Art and Society (3)
 - HUM201 - Humanities: Ancient to Renaissance (3)
 - HUM202 - Humanities: Renaissance to the Present (3)
 - MUS223 - Appreciation and History of Music (3)
 - Group B
 - 1 of the following:
 - GST247 - Gender and Text (3)
 - HON201 - Interdisciplinary Studies I (3)
 - HON202 - Interdisciplinary Studies II (3)
 - LIT229 - World Mythology (3)
 - LIT231 - Nature Writers (3)
 - LIT233 - Banned Books (3)
 - LIT235 - War Literature (3)
 - LIT237 - Young Adult Literature (3)
 - LIT239 - Literature and the Mind (3)
 - LIT241 - Crime Literature (3)
 - LIT243 - Pop Fiction (3)
 - LIT247 - Gender and Text (3)
 - LIT300 - Literary Theory (3)
 - LIT306 - Medieval Literature (3)
 - LIT307 - Renaissance and Restoration Literature (3)
 - LIT309 - Romance, Revolutions, and the Birth of the Novel (3)
 - LIT310 - Victorian Literature (3)
 - LIT311 - Modern British Literature (3)
 - LIT312 - Early American Literature (3)
 - LIT313 - The American Renaissance (3)
 - LIT314 - American Realism and Naturalism (3)
 - LIT315 - Twentieth Century American Literature and Beyond (3)
 - LIT317 - European Literature (3)
 - LIT318 - World Literature (3)
 - LIT319 - Shakespeare (3)

Campus Programs

- LIT323 - Studies in Drama (3)
- LIT325 - Studies in the Novel (3)
- LIT327 - Studies in Poetry (3)
- LIT328 - Multi-Ethnic Literature: Describing the Hyphen (3)
- LIT335 - Major Authors: American, British, or Global (3)
- LIT345 - Postcolonial Encounters (3)
- LIT350 - The Black Literary Tradition (3)
- LIT450 - Seminar in American Literature (3)
- LIT451 - Seminar in British Literature (3)
- LIT452 - Seminar in Global Literature (3)

Group C

- 1 of the following:
 - HIS109 - Western Civilization to 1500 (3)
 - HIS110 - Western Civilization Since 1500 (3)
 - HIS220 - Modern European History: 1890-Present (3)
 - HIS222 - War and Society: Antiquity to 1800 (3)
 - HIS223 - Modern War & Society (3)
 - HIS235 - Modern Russia (3)
 - HIS238 - Modern Germany: 1871 - Present (3)
 - HIS240 - World War I (3)
 - HIS241 - World War II (3)
 - HIS242 - The Cold War (3)
 - HIS245 - United States History since 1945 (3)
 - HIS249 - The Common Good (3)
 - HIS254 - Civil Rights Movement (3)
 - HIS259 - Silk Roads and Samurai (3)
 - HIS260 - Modern China (3)
 - HIS264 - Modern Japan (3)
 - HIS270 - American Environmental History (3)
 - HIS301 - World History and Culture (3)
 - HIS308 - Case Studies in Revolution (3)
 - HIS309 - Dictators in the Modern Era (3)
 - HIS321 - The Ancient World of Greece and Rome (3)
 - HIS330 - Civil War and Reconstruction (3)
 - HIS338 - Young America (3)
 - HIS357 - American Slavery (3)
 - HON201 - Interdisciplinary Studies I (3)
 - HON202 - Interdisciplinary Studies II (3)

Group D

- 1 of the following:
 - HON201 - Interdisciplinary Studies I (3)
 - HON202 - Interdisciplinary Studies II (3)
 - PHL111 - Introduction to Critical Thinking (3)
 - PHL210 - Introduction to Philosophy (3)
 - PHL212 - Introduction to Ethics (3)
 - PHL220 - Death and the Meaning of Life (3)
 - PHL222 - Happiness and the Good Life (3)
 - PHL230 - Religions of the World (3)
 - PHL316 - Business Ethics (3)
 - PHL363 - Environmental Ethics (3)

Social and Behavioral Sciences (ESBS)

- Complete 2 of the following

Group A

- 1 of the following:
 - ATH111 - Introduction to Cultural Anthropology (3)
 - SOC112 - Introduction to Sociology (3)
 - SOC213 - Sociology of Social Problems (3)
 - SOC317 - Sociology of the Family (3)
 - SOC320 - Sociology of Gender (3)
 - SOC324 - Sociology of Crime and Violence (3)
 - SOC333 - Sport and Society (3)
 - SPT333 - Sport, Society, and Ethics (3)
- NOTE: Students may take only one of the following two courses, SOC 333 and SPT 333.

Group B

- 1 of the following:
 - ECO101 - Economics of Social Issues (3)
 - ECO201 - Microeconomics (3)
 - ECO202 - Macroeconomics (3)
 - ECO375 - Economics of Professional Sports In the U.S. (3)
- NOTE: Students may take only one of the following two courses, ECO 375 and SPT 375.

Group C

Campus Programs

- 1 of the following:
 - ENV100 - Introduction to Sustainability (3)
 - ENV322 - Environment, Development, and Sustainability (3)
 - ENV348 - U.S. Environmental Law and Politics (3)
 - ENV372 - Sustainability Strategies for Business (3)
 - ENV445 - Sustainability Capstone Experience (3)
 - POL210 - American Politics (3)
 - POL211 - International Relations (3)
 - POL322 - Environment, Development, and Sustainability (3)
 - POL348 - U.S. Environmental Law and Politics (3)
- Group D
 - 1 of the following:
 - PSY108 - Introduction to Psychology (3)
 - PSY211 - Lifespan Development (3)
 - PSY216 - Psychology of Personality (3)
 - PSY257 - Social Psychology (3)
- Science, Technology, and Mathematics (ESTM)
 - Complete 2 of the following
 - Group A
 - 1 of the following:
 - BIO101 - Principles of Biology (3)
 - BIO210 - Introduction to Anatomy and Physiology (3)
 - BIO215 - People, Places, and Plagues (3)
 - BIO302 - Field Ornithology (3)
 - BIO340 - Human Health and the Environment (3)
 - CHM101 - Fundamentals of Chemistry (3)
 - ENV100 - Introduction to Sustainability (3)
 - ENV219 - Environmental Issues (3)
 - ENV372 - Sustainability Strategies for Business (3)
 - ENV445 - Sustainability Capstone Experience (3)
 - GEO200 - World Geography (3)
 - PHL305 - Animal Rights and Ethical Issues (3)
 - PHY101 - Principles of Physics (3)
 - SCI215 - Contemporary Health (3)
 - SCI218 - Natural Resources (3)
 - SCI219 - Environmental Issues (3)
 - SCI220 - Energy and Society (3)
 - SCI251 - Natural Sciences I (3)
 - SCI252 - Natural Sciences II (3)
 - Group B
 - 1 of the following:
 - GAM207 - Information Technology and Digital Games (3)
 - IT100 - Introduction to Information Technology (3)
 - IT135 - Interactive Scripting in Virtual Environment (3)
 - IT205 - Digital Music (3)
 - IT209 - Introduction to Robotics (3)
 - IT210 - Business Systems Analysis and Design (3)
 - IT270 - Web Site Design (3)
 - Group C
 - 1 of the following:
 - MAT107 - Mathematical Knowledge for Teaching I (3)
 - MAT108 - Mathematical Knowledge for Teaching II (3)
 - MAT130 - Applied Finite Mathematics (3)
 - MAT135 - The Heart of Mathematics (3)
 - MAT140 - Precalculus (3)
 - MAT160 - Introduction to Game Theory (3)
 - MAT210 - Applied Calculus I (3)
 - MAT224 - Calculus I: Single-Variable Calculus Part B (3)
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT230 - Discrete Mathematics (3)
 - MAT238 - Inferential Statistics with Algebra (3)
 - MAT240 - Applied Statistics (3)
 - MAT241 - Modern Statistics with Software (3)
 - MAT260 - Cryptology (3)
 - MAT275 - Calculus II: Integration & Series (3)
 - MAT299 - Mathematical Proof and Problem Solving (3)
 - PHL214 - Formal Logic (3)
- NOTE: MAT 107 and MAT 108 are for Early Childhood Education, Elementary Education, Middle School Mathematics Education, Music Education, and Special Education majors only.
- General Education Electives (EGED)
 - Complete all of the following

Campus Programs

- 1 of the following:
 - COM130 - Media Communication and Visual Literacy (3)
 - COM212 - Public Speaking (3)
 - COM220 - Intercultural Communication (3)
 - COM320 - Exploring World Cultures/Mass Media (3)
 - DEV260 - Family and Culture (3)
 - ECO322 - International Economics (3)
 - EDU255 - Robotics in K-12 Education (3)
 - ENG220 - Business Communication (3)
 - ENG350 - The English Language (3)
 - FIN250 - Personal Financial Planning (3)
 - GAM205 - Introduction to Games (3)
 - GAM210 - History of Digital Games (3)
 - GST260 - Family and Culture (3)
 - HOS220 - Geography of Global Cultures (3)
 - INT113 - Introduction to International Business (3)
 - INT221 - Global Financial System (3)
 - INT316 - Cultural & Political Environment of International Business (3)
 - IT450 - Artificial Intelligence (3)
 - LAR111 - Elementary Arabic and Culture I (3)
 - LAR112 - Elementary Arabic and Culture II (3)
 - LAS111 - Elementary American Sign Language I (3)
 - LAS112 - Elementary American Sign Language II (3)
 - LFR111 - Beginning French I (3)
 - LFR112 - Beginning French II (3)
 - LMN111 - Elementary Mandarin Language/Culture I (3)
 - LMN112 - Elementary Mandarin Language/Culture II (3)
 - LMN211 - Intermediate Mandarin Language and Culture (3)
 - LSP111 - Beginning Spanish I (3)
 - LSP112 - Beginning Spanish II (3)
 - MKT113 - Introduction to Marketing (3)
 - MKT265 - Social Media & Marketing Communications (3)
 - MKT270 - Professional Selling (3)
 - MKT337 - Marketing Research (3)
 - MKT345 - Consumer Behavior (3)
 - MKT350 - Ethical Issues in Marketing (3)
 - PSY300 - Biopsychology (3)
 - PSY305 - Cognitive Psychology (3)
 - SPT465 - Global Sport Business (3)
- Students may choose courses from the above selection or from any other Exploration Courses.

Culmination

3 Total Credits

- Complete all of the following
 - A student must choose a Culmination Course that resides outside of the student's chosen major. A student must have completed at least 45 credits, including ENG 120, ENG 200, First Year Seminar, the Humanities Foundation course, and PCC 201 in order to be eligible for registering for a Culmination Course.
 - 1 of the following:
 - FAS301 - Film and American Culture (3)
 - FAS302 - Gender and Film (3)
 - FAS335 - Romanticism to Impressionism (3)
 - FAS370 - American Art (3)
 - FAS380 - Women, Art and Society (3)
 - GST302 - Gender and Film (3)
 - GST380 - Women, Art and Society (3)
 - HIS301 - World History and Culture (3)
 - HIS308 - Case Studies in Revolution (3)
 - HIS309 - Dictators in the Modern Era (3)
 - HIS321 - The Ancient World of Greece and Rome (3)
 - HIS330 - Civil War and Reconstruction (3)
 - HIS338 - Young America (3)
 - HIS357 - American Slavery (3)
 - LIT306 - Medieval Literature (3)
 - LIT309 - Romance, Revolutions, and the Birth of the Novel (3)
 - LIT310 - Victorian Literature (3)
 - LIT311 - Modern British Literature (3)
 - LIT312 - Early American Literature (3)
 - LIT313 - The American Renaissance (3)
 - LIT314 - American Realism and Naturalism (3)
 - LIT315 - Twentieth Century American Literature and Beyond (3)
 - LIT317 - European Literature (3)
 - LIT319 - Shakespeare (3)

Campus Programs

- PHL363 - Environmental Ethics (3)

Grand Total Credits: **42**

Campus Programs

Individualized Major (BA)

Description

A true, UC-wide IMP would allow students to pull relevant courses from throughout our Schools—and even our Colleges and beyond—to create majors and minors that directly address their academic and career-preparation needs. How it works: Students may elect to create an IMP at any time until they complete 60 credit hours. The process for the creation of an IMP is as follows: 1. The student identifies an appropriate full-time faculty member who is willing to oversee and help the student throughout the major or minor; this faculty mentor would serve as the point person for the student's academic program. The mentor also gives the individualized major/minor an academic home in an appropriate Department and School. It is the student's responsibility to ask the faculty member to serve as mentor. Mentors must be approved by their Department Chairs, who will consider availability, appropriateness of background and expertise, and other factors. If no faculty members are willing and able to serve as the mentor, the IMP cannot be approved. 2. Working with the faculty mentor, representatives from the Career Development Center, the Office of the University Registrar, Career Services, alumni in relevant fields, professors from relevant departments, and others, the student develops the curriculum for the individualized major or minor. Please see "Curriculum Parameters" below for specifics. 3. The student and the faculty mentor submit the curriculum to the faculty member's Department Chair for consideration. The Department Chair weighs the appropriateness and academic rigor of the curriculum and approves only those proposals that meet SHNU academic expectations. 4. If approved by the Chair, the proposal goes to the Dean for further consideration. 5. Finally, the proposal is submitted to the VPAA, who has the ultimate responsibility for ensuring rigor. 6. Once the proposal is fully approved, the student works closely with the faculty mentor throughout the program's duration to ensure that the curriculum is followed and to make any changes that are needed. Students are strongly encouraged to consult frequently with a professional advisor as well. Changes to the curriculum must be approved by the Mentor, Chair, Dean, and VPAA as well. Curriculum parameters: The curriculum for majors must include the full General Education program, and both majors and minors must include courses in an appropriate range of 100- to 400-level offerings. It is the responsibility of the faculty mentors to ensure strong academic rigor throughout the program, and they should report the curriculum and rationale to the Department and School for discussion. At least two-thirds of the courses should come from UC's existing course catalog, but some independent studies can be crafted to fill gaps. An essential requirement for all IMPs would be the involvement of appropriate faculty members capable of teaching the courses and independent studies. Proposals that fall too far outside the expertise of our existing faculty will be declined. The curriculum can include online courses from COCE, and some courses can also come from other institutions if they offer courses that more fully align with the IMP curriculum. SNHU participates in a large consortium of institutions that allow the free exchange of credits; courses taken at institutions outside SNHU consortia can often be brought in through a normal transfer process. The curriculum for Individualized Majors should break down along these guidelines: • General Education: 45 credit hours. • Major: 33 to 45 credits. • Minor: 15 credits. (These can be standard or individualized minors.) • Free electives: remainder. Individualized Minors can be more flexible. The development of the curriculum must also include an Information Resource Plan, developed in collaboration with Library faculty. Other policies: • For prospective students, we can encourage participation in the IMP, but we cannot guarantee availability in advance. The support of a faculty mentor and the Chair, Dean, and VPAA is required. If that can be arranged prior to matriculation, the student can arrive with the IMP in place. • Because serving as the mentor for an IMP would require significant time and energy, no faculty member should serve as the mentor for more than three IMPs at any given time. • Students graduating with an individualized major will be noted in University records as having earned an "IMP major in X." • Deans will receive frequent updates regarding the students requesting IMPs. • Students are encouraged to work with the Study Abroad office to build study-abroad opportunities into their IMPs.

Requirements

General Education Courses
42 Total Credits

- 42 credit(s) from: General Education

Major Courses
45 Total Credits

- Complete all of the following
 - 45 credit(s).
 - Note: students can design a major containing 33 to 45 credits. Depending on the number of credits chosen in the major, the number of credits required in the free electives will make up the remainder to equal a total of 120 overall program credits.

Free Electives
33 Total Credits

- 33 credit(s).

Campus Programs

Individualized Major (BS)

Description

A true, UC-wide IMP would allow students to pull relevant courses from throughout our Schools—and even our Colleges and beyond—to create majors and minors that directly address their academic and career-preparation needs. How it works: Students may elect to create an IMP at any time until they complete 60 credit hours. The process for the creation of an IMP is as follows: 1. The student identifies an appropriate full-time faculty member who is willing to oversee and help the student throughout the major or minor; this faculty mentor would serve as the point person for the student's academic program. The mentor also gives the individualized major/minor an academic home in an appropriate Department and School. It is the student's responsibility to ask the faculty member to serve as mentor. Mentors must be approved by their Department Chairs, who will consider availability, appropriateness of background and expertise, and other factors. If no faculty members are willing and able to serve as the mentor, the IMP cannot be approved. 2. Working with the faculty mentor, representatives from the Career Development Center, the Office of the University Registrar, Career Services, alumni in relevant fields, professors from relevant departments, and others, the student develops the curriculum for the individualized major or minor. Please see "Curriculum Parameters" below for specifics. 3. The student and the faculty mentor submit the curriculum to the faculty member's Department Chair for consideration. The Department Chair weighs the appropriateness and academic rigor of the curriculum and approves only those proposals that meet SNHU academic expectations. 4. If approved by the Chair, the proposal goes to the Dean for further consideration. 5. Finally, the proposal is submitted to the VPAA, who has the ultimate responsibility for ensuring rigor. 6. Once the proposal is fully approved, the student works closely with the faculty mentor throughout the program's duration to ensure that the curriculum is followed and to make any changes that are needed. Students are strongly encouraged to consult frequently with a professional advisor as well. Changes to the curriculum must be approved by the Mentor, Chair, Dean, and VPAA as well. Curriculum parameters: The curriculum for majors must include the full General Education program, and both majors and minors must include courses in an appropriate range of 100- to 400-level offerings. It is the responsibility of the faculty mentors to ensure strong academic rigor throughout the program, and they should report the curriculum and rationale to the Department and School for discussion. At least two-thirds of the courses should come from UC's existing course catalog, but some independent studies can be crafted to fill gaps. An essential requirement for all IMPs would be the involvement of appropriate faculty members capable of teaching the courses and independent studies. Proposals that fall too far outside the expertise of our existing faculty will be declined. The curriculum can include online courses from COCE, and some courses can also come from other institutions if they offer courses that more fully align with the IMP curriculum. SNHU participates in a large consortium of institutions that allow the free exchange of credits; courses taken at institutions outside SNHU consortia can often be brought in through a normal transfer process. The curriculum for Individualized Majors should break down along these guidelines: • General Education: 45 credit hours. • Major: 33 to 45 credits. • Minor: 15 credits. (These can be standard or individualized minors.) • Free electives: remainder. Individualized Minors can be more flexible. The development of the curriculum must also include an Information Resource Plan, developed in collaboration with Library faculty. Other policies: • For prospective students, we can encourage participation in the IMP, but we cannot guarantee availability in advance. The support of a faculty mentor and the Chair, Dean, and VPAA is required. If that can be arranged prior to matriculation, the student can arrive with the IMP in place. • Because serving as the mentor for an IMP would require significant time and energy, no faculty member should serve as the mentor for more than three IMPs at any given time. • Students graduating with an individualized major will be noted in University records as having earned an "IMP major in X." • Deans will receive frequent updates regarding the students requesting IMPs. • Students are encouraged to work with the Study Abroad office to build study-abroad opportunities into their IMPs.

Requirements

General Education Courses
42 Total Credits

- 42 credit(s) from: General Education
- Must include:
 - MAT240 - Applied Statistics (3)

Major Courses
45 Total Credits

- Complete all of the following
 - 45 credit(s).
 - Note: students can design a major containing 33 to 45 credits. Depending on the number of credits chosen in the major, the number of credits required in the free electives will make up the remainder to equal a total of 120 overall program credits.

Free Electives
33 Total Credits

- 33 credit(s).

Grand Total Credits: **120**

Individualized Minor (Minor)

Description

A true, UC-wide IMP would allow students to pull relevant courses from throughout our Schools—and even our Colleges and beyond—to create majors and minors that directly address their academic and career-preparation needs. How it works Students may elect to create an IMP at any time until they complete 60 credit hours. The process for the creation of an IMP is as follows: 1. The student identifies an appropriate full-time faculty member who is willing to oversee and help the student throughout the major or minor; this faculty mentor would serve as the point person for the student's academic program. The mentor also gives the individualized major/minor an academic home in an appropriate Department and School. It is the student's responsibility to ask the faculty member to serve as mentor. Mentors must be approved by their Department Chairs, who will consider availability, appropriateness of background and expertise, and other factors. If no faculty members are willing and able to serve as the mentor, the IMP cannot be approved. 2. Working with the faculty mentor, representatives from the Career Development Center, the Office of the University Registrar, Career Services, alumni in relevant fields, professors from relevant departments, and others, the student develops the curriculum for the individualized major or minor. Please see "Curriculum Parameters" below for specifics. 3. The student and the faculty mentor submit the curriculum to the faculty member's Department Chair for consideration. The Department Chair weighs the appropriateness and academic rigor of the curriculum and approves only those proposals that meet SNHU academic expectations. 4. If approved by the Chair, the proposal goes to the Dean for further consideration. 5. Finally, the proposal is submitted to the VPAA, who has the ultimate responsibility for ensuring rigor. 6. Once the proposal is fully approved, the student works closely with the faculty mentor throughout the program's duration to ensure that the curriculum is followed and to make any changes that are needed. Students are strongly encouraged to consult frequently with a professional advisor as well. Changes to the curriculum must be approved by the Mentor, Chair, Dean, and VPAA as well. Curriculum parameters The curriculum for majors must include the full General Education program, and both majors and minors must include courses in an appropriate range of 100- to 400-level offerings. It is the responsibility of the faculty mentors to ensure strong academic rigor throughout the program, and they should report the curriculum and rationale to the Department and School for discussion. At least two-thirds of the courses should come from UC's existing course catalog, but some independent studies can be crafted to fill gaps. An essential requirement for all IMPs would be the involvement of appropriate faculty members capable of teaching the courses and independent studies. Proposals that fall too far outside the expertise of our existing faculty will be declined. The curriculum can include online courses from COCE, and some courses can also come from other institutions if they offer courses that more fully align with the IMP curriculum. SNHU participates in a large consortium of institutions that allow the free exchange of credits; courses taken at institutions outside SNHU consortia can often be brought in through a normal transfer process. The curriculum for Individualized Majors should break down along these guidelines: • General Education: 45 credit hours. • Major: 33 to 45 credits. • Minor: 15 credits. (These can be standard or individualized minors.) • Free electives: remainder. Individualized Minors can be more flexible. The development of the curriculum must also include an Information Resource Plan, developed in collaboration with Library faculty. Other policies: • For prospective students, we can encourage participation in the IMP, but we cannot guarantee availability in advance. The support of a faculty mentor and the Chair, Dean, and VPAA is required. If that can be arranged prior to matriculation, the student can arrive with the IMP in place. • Because serving as the mentor for an IMP would require significant time and energy, no faculty member should serve as the mentor for more than three IMPs at any given time. • Students graduating with an individualized major will be noted in University records as having earned an "IMP major in X." • Deans will receive frequent updates regarding the students requesting IMPs. • Students are encouraged to work with the Study Abroad office to build study-abroad opportunities into their IMPs.

Research (Minor)

Description

The multidisciplinary undergraduate minor in research is intended to complement a wide array of majors, allowing students to develop critical skills in consuming, interpreting, designing, and conducting research. The flexible nature of the minor allows students across majors to personalize the curriculum to fit their specific interests, professions, and projects. Prerequisites must be met for all courses taken in this minor and requirements must be met for graduate level courses.

Program Outcomes

1. Apply appropriate design methods and techniques for research problems and questions specific to an academic or professional discipline.
2. Apply standards of ethical practice in research, including the protection of human subjects.
3. Develop clear, accurate, and well-organized oral and written communications for the various stages of the research process.

Campus Programs

Requirements

Minor Courses

15 Total Credits

- Complete all of the following
 - Research Methods & Ethics
 - 3 credit(s) from the following:
 - BIO315 - Ecological Principles and Field Methods (3)
 - ENV220 - GIS, Field Methods and Technology (3)
 - ENV250 - Environmental Science Research Methods (3)
 - HON314 - Seminar in Research Methods (3)
 - JUS224 - Legal and Justice Research Methods (3)
 - MKT337 - Marketing Research (3)
 - PSY224 - Research II: Scientific Investigations (3)
 - PSY317 - Reading and Research in Psychology (1)
 - RSC110 - Understanding Research (3)
 - SCS224 - Social Science Research Methods (3)
 - Data Analysis
 - 3 credit(s) from the following:
 - QSO250 - Business Analytics (3)
 - QSO260 - Descriptive Analytics (3)
 - QSO370 - Predictive Analytics (3)
 - QSO530 - Applied Statistics for Managers (3)
 - QSO511 - Business Analytics (3 - 4)
 - MAT238 - Inferential Statistics with Algebra (3)
 - MAT241 - Modern Statistics with Software (3)
 - MAT300 - Applied Statistics II: Regression Analysis (3)
 - PSY223 - Research I: Statistics for Psychology (3)
 - MKT365 - Social Media Marketing Analytics (3)
 - MAT434 - Statistical Learning and Classification (3)
 - Applications
 - 3 credit(s) from the following:
 - RSC420 - Research Practicum (3)
 - SCS444 - Capstone Colloquium (3)
 - HIS401 - Making History: Capstone (3)
 - ENV440 - Senior Seminar (3)
 - JUS480 - Independent Study in Law and Justice (0 - 3)
 - PSY444 - Senior Seminar in Psychology (Capstone) (3)
 - PSY480 - Independent Study (3)
 - SNHU399 - Inquiry Scholars of SNHU (1 - 3)
 - HON401 - Independent Honors Thesis (1.5 - 3)
 - SPED499 - Internship (0 - 15)
 - EDU499 - Internship (0 - 15)
 - MKT312 - Consumer Research Experience (1.5 - 3)
 - OL408 - Building Diverse and Inclusive Organizations (3)
 - SOC373 - Regional Sustainability Field Study (3)
 - SCI373 - Regional Sustainability Field Study (3)
 - INT315 - International Management (3)
 - INT410 - International Entrepreneurship (3)
 - QSO550 - Applied Business Research (4)
 - MAT480 - Independent Study (3)
 - 6 credit(s) from the following type of course(s):
Any courses from the Research Methods & Ethics, Data Analysis, and Applications sections of this minor.

Grand Total Credits: **15**

College of Engineering, Technology, and Aeronautics

Aeronautical Engineering (BS)

Campus Programs

Description

The Aeronautical Engineering program prepares students for professional careers in civilian and military aviation, including aircraft piloting and the design, development and testing of aircraft and aircraft systems. The program includes a multi-semester design sequence within which students work in teams applying theories learned in the classroom to solve complex problems and transform concepts into functioning designs that they will build and operate. In addition to the design sequence, CETA offers students the opportunity to plan and conduct their own flight tests. The College maintains an instrumented light aircraft flown by professional pilots to provide students with in-flight experience; this allows students to participate as flight test engineers, using a specially designed data collection system to record key flight parameters and perform post-flight data analysis. CETA offers specific concentration areas in Robotics, Telecommunications, and Unmanned Aerial Systems that complement core engineering training and enhance student's post-graduation placement opportunities. Students also have the opportunity to be involved in engineering clubs and organizations, such as student chapters of the American Institute of Aeronautics and Astronautics (AIAA), the American Society of Mechanical Engineers (ASME), and Sigma Gamma Tau, the national aerospace engineering honor society. The BS.AEG program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Program Outcomes

1. An ability to apply knowledge of mathematics, science, and engineering.
2. An ability to design and conduct experiments, as well as to analyze and interpret data.
3. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
4. An ability to function on multi-disciplinary teams.
5. An ability to identify, formulate, and solve engineering problems.
6. An understanding of professional and ethical responsibility.
7. An ability to communicate effectively.
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
9. A recognition of the need for, and the ability to engage in life-long learning.
10. A knowledge of contemporary issues.
11. An ability to use the techniques, skills, and modern engineering tools needed for engineering practice.
12. A knowledge of aerodynamics, aerospace materials, structure, propulsion, flight mechanics, and stability and control.
13. Design competence that includes integration of aeronautical topics.
14. An ability to develop flight test plans and conduct in-flight experiments, as well as analyze, interpret, and report the resulting data.

Campus Programs

General Education Courses

42 Total Credits

- Complete all of the following
 - 42 credit(s) from: General Education

Must include:

- MAT225 - Calculus I: Single-Variable Calculus (3)
- EG110 - Engineering Design I (3)
- EG498 - Capstone Design I (3)
- CHM120 - General Chemistry I (3)
- PHY215 - Physics I (3)
- MAT275 - Calculus II: Integration & Series (3)
- EG499 - Capstone Design II (3)
- NOTE: EG 110, EG 498, and EG 499 require a minimum grade of C-.

Major Courses

71 Total Credits

- Complete all of the following
 - Complete:
 - EG201 - Fluid Mechanics (3)
 - EG202 - Mechanics of Materials I (3)
 - EG203 - Dynamics (3)
 - EG209 - Thermodynamics I (3)
 - EG308 - Gas Dynamics (3)
 - EG314 - Aerodynamics (3)
 - EG326 - Aircraft Structures (3)
 - EG330 - Propulsion (3)
 - EG412 - Aircraft Design I (3)
 - EG418 - Flight Dynamics I (Performance) (3)
 - EG418FT - Flight Testing - Performance (1)
 - EG419 - Flight Dynamics II/Stability/Control (3)
 - EG419FT - Flight Testing - Stability and Control (1)
 - NOTE: All Engineering Major courses require a minimum grade of C-.
 - Engineering Core
 - Complete all of the following
 - Complete:
 - EG200 - Statics (3)
 - EG207 - Instrumentation & Measurements (3)
 - EG208 - Materials Science (3)
 - EG310 - Junior Engineering Design (3)
 - EG316 - Electrical Circuits (3)
 - EG333 - Control Systems Analysis (3)
 - MAT325 - Calculus III: Multivariable Calculus (3)
 - MAT330 - Differential Equations (3)
 - MAT350 - Applied Linear Algebra (3)
 - PHY216 - Physics II (3)
 - PHY216L - Physics II Lab (1)
 - CHM120L - General Chemistry I Lab (1)
 - PHY215L - Physics I Lab (1)
 - 1 of the following:
 - EG340 - Probability and Statistics for Engineers (3)
 - MAT370 - Numerical Analysis (3)
 - NOTE: All Engineering Core courses require a minimum grade of C-

Major Electives or choose a Concentration

9 Total Credits

- Complete all of the following
 - 9 credit(s) from subject(s): EG within the range of course numbers 300 - 499
 - NOTES: All Engineering Major Electives and Concentration courses require a minimum grade of C-. Students must meet with their advisor before enrolling in major electives or choosing a concentration.

Aeronautical Engineering (BS) - Materials Science and Engineering (Concentration)

Description

Being broad in nature, the study of materials involves several disciplines including chemistry, physics, biology, mathematics, engineering, and business. Principles from all disciplines are embedded in the courses in a cohesive manner. This makes for a varied and stimulating experience, giving students the tools to make a real difference in industry and research. First, by completing this concentration, students will gain a deeper understanding of the relationship between materials structure, properties, and performance. Students will apply their fundamental knowledge of materials structure, properties, and performance to a wide range of applications and designs relevant to future work experience. Students will also gain hands-on experience with important characterization and processing techniques via laboratory exercises, as well as with materials engineering design projects.

Concentration Outcomes

Requirements

Concentration Courses
9 Total Credits

- Earned a grade of C- or better in each of the following:
 - EG345 - Characterization of Materials (3)
 - EG431 - Advanced Materials (3)
 - EG432 - Materials Selection for Design (3)

Grand Total Credits: **9**

Aeronautical Engineering (BS) - Robotics (Concentration)

Requirements

Concentration Courses

- Complete:
 - EG424 - Industrial Robots (3)
 - EG426 - Mobile Robots (3)
 - EG428 - Robotics: Project-Based Applications (3)

Grand Total Credits: **9**

Aeronautical Engineering (BS) - Telecommunications (Concentration)

Requirements

Concentration Courses
9 Total Credits

- Complete:
 - EG302 - Continuous and Discrete Systems (3)
 - EG403 - Principles of Photonics (3)
 - EG415 - Digital Communication Systems (3)

Grand Total Credits: **9**

Campus Programs

Aeronautical Engineering (BS) - Unmanned Aerial Systems (Concentration)

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - EG335 - Fundamentals of Systems Engineering (3)
 - EG360 - Fundamentals of Unmanned Aerial Systems (3)
 - EG450 - Conceptual Design of Unmanned Aerial Systems (3)

Grand Total Credits: **9**

Air Force Studies (Minor)

Description

This minor is offered in conjunction with the University of Massachusetts ROTC program. Students need to maintain a minimum GPA of a 2.0 in order to participate and need to maintain full-time status. Interested students should work with the Office of the University Registrar to determine eligibility

Requirements

Minor Courses

16 Total Credits

- Complete:
 - AS101 - The Foundations of the United States Air Force I (1)
 - AS102 - The Foundations of the United States Air Force II (1)
 - AS201 - The Evolution of USAF Air and Space Power I (1)
 - AS202 - The Evolution of USAF Air and Space Power II (1)
 - AS301 - The United States Air Force Leadership Studies I (3)
 - AS302 - The United States Air Force Leadership Studies II (3)
 - AS401 - National Security Affairs/Preparation for Active Duty I (3)
 - AS402 - National Security Affairs/Preparation for Active Duty II (3)

Grand Total Credits: **16**

Air Traffic Management (BS)

Description

The Air Traffic Management (ATM) curriculum supplements specific aviation coursework with business management, human resources, personnel management, and communication courses. Classes in meteorology, aircraft operations, airport management, human factors, and safety build a solid aviation professional. Specialized courses in air traffic control, control tower operations, and terminal radar control operations are accompanied by hands-on air traffic training in the Visual Flight Rules (VFR) control tower simulator and in the Terminal Radar Approach Control (TRACON) radar simulator. Overall, the lab simulator portion of ATM curriculum yields 240 hours of simulated air traffic control and may provide an advantage for students interested in a career as an air traffic controller, flight manager, or other aviation professional. Because SNHU is a partner school in the Federal Aviation Administration's Air Traffic Collegiate Training Initiative (AT-CTI), CETA graduates who meet minimum academic, physical, citizenship, security, and other pre-employment requirements may qualify for endorsement to the FAA for hiring. AT-CTI graduates receive consideration when they apply for entry-level air traffic control positions but are not guaranteed selection.

Program Outcomes

1. Understanding of and be able to apply the AT-CTI learning objectives.
2. Understanding of and be able to work in a team/crew environment.
3. Understanding and apply behaviors consistent with a pervasive safety ethic.
4. Knowledge of and the ability to apply basic tower operations.
5. Knowledge of the skills, techniques and procedures for managing ATC facilities and airspace.

 - MILT302 - Leading Small Organizations II (4)

Grand Total Credits: **16**

Aviation Management (BS)

Description

The Aviation Management program combines general academic preparation with the development of business management skills and the specialized knowledge of the aviation business. Graduates of this program will have skills in communications, quantitative reasoning, and critical thinking; an understanding of general business practices; and core knowledge of the aviation industry. Students are prepared for careers in a wide variety of fields and can pursue concentration areas designed for work in the general and corporate aviation industry, the airline industry, or at airports. CETA offers specific concentration areas in Airport Management, Airline Operations, and General and Corporate Airport Management that complement core aviation and business training and enhance student's post-graduation placement opportunities. Typically, graduates begin at entry-level operations positions and use their educational qualifications and backgrounds to move into jobs with supervisory responsibilities or staff positions. In addition, graduates have the general education and business background to make them particularly well-qualified for master's degree programs in business, public administration, or law.

Program Outcomes

1. Demonstrate an understanding of and be able to apply the fundamental aeronautical skills necessary to function as a manager in the aviation industry
2. Demonstrate an understanding of and be able to use the business tools, skills and concepts to address practical business problems in the aviation industry
3. Demonstrate an understanding of and be able to apply aviation safety issues in all problem solving exercises
4. Apply mathematics, science, and applied sciences to aviation-related disciplines
5. Communicate the principles necessary to integrate as an employee at a fixed base operations company, an commercial airline, and/or at an airport
6. Apply management methodology in identifying and solving management issues
7. Communicate effectively, using both written and oral communication skills, as an entry-level manager
8. Understand the United States National Plan of Integrated Airport Systems (NPIAS), regulatory agencies, rules, rule making and processes

Aviation Operations and Management (BS)

Description

The Aviation Operations and Management (AOM) program leads to the Bachelor of Science degree and combines general academic preparation and professional pilot education with additional study in aviation management and business management. The degree is designed to prepare students for employment as professional pilots and for leadership roles in a variety of flight operations settings, or for enrollment in an appropriate graduate degree program. SNHU's partnership with Air Direct Aviation Flight Academy (ADAFA) is a key component of the AOM program. ADAFA holds Federal Aviation Administration (FAA) Air Agency Certificate # DIPS197T. The program consists of an intensive first year of required flying practicums correlated with associated classroom courses. The front-loaded focus on flying and academics related to aviation allows the student to progress through private, instrument, commercial and certified flight instructor ratings in the first year of the program. The curriculum begins in the summer term to allow for progression through private and instrument ratings by mid-fall semester, allowing the student pilot increased opportunity for weather flying. Upon successful completion of the first year, the student should be awarded an FAA-certified CFI rating, allowing the student both to serve in a flight instructor role while attending college and to build flight hours prior to graduation. The second summer (fourth semester) is a full practicum and internship during which the student will perform as a CFI full time for three months. Semester five is an intensive academic semester and completes the flying requirements with a multi-engine certification. Unique to this degree program, the final semesters will consist of the business core and remaining general education requirements. These requirements can be accomplished either in residence, on-line, or in combination, depending on student's academic needs and preferences.

Program Outcomes

1. Successfully complete requirements for FAA certifications for Certified Flight Instructor, having completed required private, instructor, commercial and CFI ratings.
2. Demonstrate knowledge of and ability to succeed as a commercial airline pilot.
3. Demonstrate an understanding of and be able to apply the fundamental aeronautical skills necessary to function as a manager in the aviation industry
4. Demonstrate an understanding of and be able to use the business tools, skills and concepts to address practical business problems in the aviation industry
5. Demonstrate an understanding of and be able to apply aviation safety issues in all problem solving exercises
6. Apply mathematics, science, and applied sciences to aviation-related disciplines
7. Apply management methodology in identifying and solving management issues
8. Communicate effectively, using both written and oral communication skills, as an entry-level manager

Computer Science (BS)

Description

The Computer Science Program prepares students for professional careers in the development of software for various industrial and service applications. The program focuses on algorithm development, programming, architecture design, and networks, using relevant industry/service-based projects to apply the basic concepts and theories in computer science. In addition to computer science and mathematics courses, students begin programming during their freshman year and conclude the spring semester by implementing a team-based software development project. This academic study and intensive project-based learning approach continues throughout the four-year program and culminates in a senior capstone software development project or an industry or government internship experience. CETA supports student participation in the annual Consortium for Computing Sciences in Colleges – Northeastern Region (CCSCNE) Conference, and students have the opportunity to present posters on their projects and compete in programming challenges. The College also funds undergraduate student research projects, guided by faculty members, in areas such as mobile application development and outcome assessment software tools. Students also have the opportunity to be involved in related clubs and organizations within the College and on campus.

Program Outcomes

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline
3. Communicate effectively in a variety of professional contexts
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline
6. Apply computer science theory and software development fundamentals to produce computing-based solutions

Construction Management (BS)

Description

The Construction Management Program prepares students for a broad range of professional careers within the construction industry, including residential, commercial, and industrial sectors, as well as infrastructure and heavy construction. The program focuses on the application of business, management, and engineering principles in the construction of buildings and large-scale infrastructures. Construction management represents an industry that brings together private businesses, public entities, and trades to create and build projects. CETA students gain knowledge in computer applications and graphics, surveying, project management, construction materials, and construction law and contracts. This will enable them to approach construction decisions with an informed consideration of global and societal contexts and consequences, especially those decisions that might have an economic or environmental impact on an area. Students also have the opportunity to be involved in related clubs and organizations within the College and on campus.

Program Outcomes

1. Apply knowledge of mathematics, science and construction management in their professional functions.
2. Apply effective research and problem solving skills in construction management.
3. Function on multi-disciplinary teams.
4. Plan, organize, and control a construction project.
5. Understand professional and ethical responsibility.
6. Communicate effectively.
7. Understand the impact of construction in a global, economic, environmental, and societal context.
8. Recognize the need for and have the ability to engage in life-long learning.
9. Be aware of contemporary issues and their potential impact on the construction industry.

Construction Science (Minor)

Description

The minor in Construction Science enables students to acquire the necessary skills needed to be successful in the fields of construction. The curriculum is built from case studies and real-world examples. For the last course selection, students have the opportunity to explore sustainable building practices, construction surveying, or the fundamentals of structural assemblies.

Requirements

Prerequisite Courses

3 Total Credits

- Complete:
 - CHM120 - General Chemistry I (3)

Minor Courses

16 - 17 Total Credits

- Complete all of the following
 - Complete:
 - CSM100 - Fundamentals of Construction Science and Management (3)
 - CSM215 - Specifications, Plans, and Building Codes (3)
 - CSM220 - Construction Graphics and Software (3)
 - CSM320 - Materials and Methods I: Standard Materials (4)
 - 1 of the following:
 - CSM270 - Sustainability and the Built Environment I: Introduction to Sustainable Practices (3)
 - CSM280 - Surveying (4)
 - CSM325 - Structures I: Forces, Loads, and Patterns (3)

Grand Total Credits: **19 - 20**

Electrical and Computer Engineering (BS)

Description

The Electrical and Computer Engineering Program prepares students for professional careers in the design, development, and integration of electronic and computer components and equipment in a wide range of industries, including telecommunications and networking, computer hardware, aerospace, automotive, and robotics. The program includes a multi-semester design sequence within which students work in teams applying theories learned in the classrooms to solve complex problems and transform concepts into functioning designs that they will build and operate. This program provides students the opportunity to choose one of two tracks: Electrical Engineering and Computer Engineering. CETA offers specific concentration areas in Robotics, Telecommunications, and Unmanned Aerial Systems that complement core engineering training and enhance student's post-graduation placement opportunities. Students also have the opportunity to be involved in engineering clubs and organizations within the College and on campus.

Program Outcomes

1. An ability to apply knowledge of mathematics, science, and engineering.
2. An ability to design and conduct experiments, as well as to analyze and interpret data.
3. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
4. An ability to function on multi-disciplinary teams.
5. An ability to identify, formulate, and solve engineering problems.
6. An understanding of professional and ethical responsibility.
7. An ability to communicate effectively.
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
9. A recognition of the need for, and the ability to engage in life-long learning.
10. A knowledge of contemporary issues.
11. An ability to use the techniques, skills, and modern engineering tools needed for engineering practice.
12. A knowledge of math, science and engineering skills in analysis, design and application of electrical and electronic systems.
13. The ability to apply mathematical and scientific skills to analyze, design and operate complex software and hardware computer systems.

Electrical Engineering (BS)

Campus Programs

Description

The Electrical Engineering Program prepares students to perform professionally in the design, development, and integration of electronic equipment and systems in a wide range of industries; including telecommunications and networking, electrical machinery and power generation and distribution, automation and control systems, aerospace and robotics. The program includes a design sequence within which students use our well-equipped labs to work in teams applying theories learned in the classrooms to transform concepts into functional designs that they will build and operate. The Electrical Engineering program provides engineering students at CETA the opportunity to choose the Telecommunication Concentration, along with other concentration choices of Robotics, and Unmanned Aerial Systems. These concentration courses complement core engineering training and enhance students' post-graduation placement opportunities. Students also have the opportunity to be involved in different clubs and organizations within the College and on campus.

Program Outcomes

1. Ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. Ability to communicate effectively with a range of audiences.
4. Ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental, and social contexts.
5. Ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. Ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. Ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
8. Ability to understand and apply fundamentals of electrical and electronics engineering including electronics, power, control, and communication systems.
9. Ability to understand and apply principles of electromagnetic fields and waves in electrical machines, power lines, and signal transmission.

Information Technologies (BS)

Description

Technology has become inseparable from an organization's operations, including applying digital strategies to leverage data, collaborating in the virtual marketplace, and leveraging established and emerging technologies. The Bachelor of Science in Information Technologies gives students the opportunity to combine technical abilities, business acumen, people skills, and a keen problem-solving mindset to help organizations large and small leverage new technologies for innovating practices, products, and processes. Aligned to the Accreditation Board for Engineering and Technology (ABET) and informed by the Association for Computing Machinery (ACM) framework for information technology baccalaureate degree programs, this degree will prepare students for current IT work and provide the skills and dispositions to ready themselves and their organizations for the rapid evolution of future technologies. Students will learn the fundamental information technologies, systems, data management methods, and computational thinking strategies necessary to support organizational decision-making and recommend effective system design and maintenance solutions. They will also learn to operate in an ever-changing work environment where communication, collaboration, and the drive to proactively identify and solve problems are markers of success. Learning through hands-on real world problems, students in this degree program will demonstrate the necessary skills that will allow them to grow and adapt within the field of information technology.

Program Outcomes

1. The ability to analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions
2. The ability to design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline
3. The ability to communicate effectively in a variety of professional contexts
4. The ability to recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles
5. The ability to function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline
6. The ability to identify and analyze user needs and to take them into account in the selection, creation, integration, evaluation, and administration of computing-based systems

Mechanical Engineering (BS)

Campus Programs

Description

The Mechanical Engineering Program prepares students for professional careers in the design, development, and manufacture of mechanical systems in a wide variety of industries. The program includes a multi-semester design sequence within which students work in teams applying theories learned in the classroom to solve complex problems and transform concepts into designs and functional prototypes that they build and operate. The program provides a strong foundation in electro-mechanical systems, programming and control systems, robotics and machine vision, thermo-fluid systems, and advanced materials. Within the design sequence, students from all engineering disciplines work together, designing solutions for internal and local community partners. CETA offers specific concentration areas in Robotics, Telecommunications, and Unmanned Aerial Systems that complement core engineering training and enhance student's post-graduation placement opportunities. Students also have the opportunity to be involved in engineering clubs and organizations, such as student chapters of the American Institute of Aeronautics and Astronautics (AIAA) and the American Society of Mechanical Engineers (ASME). The BS.MEG program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Program Outcomes

1. An ability to apply knowledge of mathematics, science, and engineering.
2. An ability to design and conduct experiments, as well as to analyze and interpret data.
3. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
4. An ability to function on multi-disciplinary teams.
5. An ability to identify, formulate, and solve engineering problems.
6. An understanding of professional and ethical responsibility.
7. An ability to communicate effectively.
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
9. A recognition of the need for, and the ability to engage in life-long learning.
10. A knowledge of contemporary issues.
11. An ability to use the techniques, skills, and modern engineering tools needed for engineering practice.
12. An ability to apply principles of engineering, basic science, and mathematics to model, analyze, design, and realize physical systems, components or processes.
13. An ability to work professionally in both thermo-fluid and electro-mechanical system area.

General Education Courses

42 Total Credits

- Complete all of the following
 - 42 credit(s) from: General Education

Must include:

- MAT225 - Calculus I: Single-Variable Calculus (3)
- EG110 - Engineering Design I (3)
- EG498 - Capstone Design I (3)
- CHM120 - General Chemistry I (3)
- PHY215 - Physics I (3)
- MAT275 - Calculus II: Integration & Series (3)
- EG499 - Capstone Design II (3)

- NOTE: EG 110, EG 498, and EG 499 require a minimum grade of C-.

Major Courses

66 Total Credits

- Complete all of the following
 - Complete:
 - EG112 - Engineering Design II (3)
 - EG201 - Fluid Mechanics (3)
 - EG202 - Mechanics of Materials I (3)
 - EG203 - Dynamics (3)
 - EG209 - Thermodynamics I (3)
 - EG325 - Mechanics of Materials II (3)
 - EG341 - Design of Machine Components (3)
 - EG410 - Heat Transfer (3)
 - 2 of the following:
 - EG318 - Thermodynamics II (3)
 - EG350 - Advanced Dynamics of Mechanical Systems (3)
 - EG420 - Design of Thermo-Fluid Systems (3)
 - NOTE: All Engineering Major courses require a minimum grade of C-.
 - Engineering Core
 - Complete all of the following
 - Complete:
 - EG200 - Statics (3)
 - EG207 - Instrumentation & Measurements (3)
 - EG208 - Materials Science (3)
 - EG310 - Junior Engineering Design (3)
 - EG316 - Electrical Circuits (3)
 - EG333 - Control Systems Analysis (3)
 - MAT325 - Calculus III: Multivariable Calculus (3)
 - MAT330 - Differential Equations (3)
 - MAT350 - Applied Linear Algebra (3)
 - PHY216 - Physics II (3)
 - PHY216L - Physics II Lab (1)
 - CHM120L - General Chemistry I Lab (1)
 - PHY215L - Physics I Lab (1)
 - 1 of the following:
 - EG340 - Probability and Statistics for Engineers (3)
 - MAT370 - Numerical Analysis (3)
 - NOTE: All Engineering Core courses require a minimum grade of C-.

Major Electives or choose a Concentration

9 Total Credits

- Complete all of the following
 - 9 credit(s) from subject(s): EG within the range of course numbers 300 - 499
 - NOTES: All Engineering Major Electives and Concentration courses require a minimum grade of C-. Students must meet with their advisor before enrolling in major electives or choosing a concentration.

Free Electives

6 Total Credits

- 6 credit(s).

Grand Total Credits: **123**

Campus Programs

Mechanical Engineering (BS) - Materials Science and Engineering (Concentration)

Description

Being broad in nature, the study of materials involves several disciplines including chemistry, physics, biology, mathematics, engineering, and business. Principles from all disciplines are embedded in the courses in a cohesive manner. This makes for a varied and stimulating experience, giving students the tools to make a real difference in industry and research. First, by completing this concentration, students will gain a deeper understanding of the relationship between materials structure, properties, and performance. Students will apply their fundamental knowledge of materials structure, properties, and performance to a wide range of applications and designs relevant to future work experience. Students will also gain hands-on experience with important characterization and processing techniques via laboratory exercises, as well as with materials engineering design projects.

Concentration Outcomes

Requirements

Concentration Courses
9 Total Credits

- Earned a grade of C- or better in each of the following:
 - EG345 - Characterization of Materials (3)
 - EG431 - Advanced Materials (3)
 - EG432 - Materials Selection for Design (3)

Grand Total Credits: **9**

Mechanical Engineering (BS) - Robotics (Concentration)

Requirements

Concentration Courses
9 Total Credits

- Complete:
 - EG424 - Industrial Robots (3)
 - EG426 - Mobile Robots (3)
 - EG428 - Robotics: Project-Based Applications (3)

Grand Total Credits: **9**

Mechanical Engineering (BS) - Telecommunications (Concentration)

Requirements

Concentration Courses
9 Total Credits

- Complete:
 - EG302 - Continuous and Discrete Systems (3)
 - EG403 - Principles of Photonics (3)
 - EG415 - Digital Communication Systems (3)

Grand Total Credits: **9**

Campus Programs

Mechanical Engineering (BS) - Unmanned Aerial Systems (Concentration)

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - EG335 - Fundamentals of Systems Engineering (3)
 - EG360 - Fundamentals of Unmanned Aerial Systems (3)
 - EG450 - Conceptual Design of Unmanned Aerial Systems (3)

Grand Total Credits: **9**

Military (Minor)

Description

This minor is offered in conjunction with UNH Durham through our New Hampshire College and University Council Consortium Agreement. Students need to maintain a minimum GPA of a 2.0 in order to participate and need to maintain full-time status. Interested students should work with the Office of the University Registrar to determine eligibility.

Requirements

Minor Courses

16 Total Credits

- Complete:
 - MILT113 - Introduction to ROTC (2)
 - MILT114 - Introduction to ROTC II (2)
 - MILT201 - Self/Team Development I (2)
 - MILT202 - Individual/Team Military Tactics (2)
 - MILT301 - Leading Small Organizations I (4)
 - MILT302 - Leading Small Organizations II (4)

Grand Total Credits: **16**

Campus Programs

Robotics (Minor)

Description

Robotics, the technology of robots ranging from industrial robots, mobile robots, to humanoid robots, has pervaded every aspect of human society. This minor, offered in conjunction with Engineering programs and the Computer Science program at the College of Engineering, Technology, and Aeronautics (CETA), is intended to provide students in any major with knowledge and skills to design, program, and apply robotics.

Program Outcomes

1. Expand their knowledge and technical skills in robotics
2. Exert technical experiences over multi-disciplinary projects and teams
3. Attain professional careers in robotics related industries

Requirements

Minor Courses
15 Total Credits

- Complete all of the following
 - Complete:
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT275 - Calculus II: Integration & Series (3)
 - EG361 - Introduction to Autonomous Robots (3)
 - 1 of the following:
 - CS110 - Fundamentals of Programming (3)
 - CS113 - Introduction to Programming (3)
 - 1 of the following:
 - EG424 - Industrial Robots (3)
 - EG426 - Mobile Robots (3)

Grand Total Credits: **15**

Unmanned Aerial Systems (Certificate)

Description

The Unmanned Aerial Systems (UAS) Certificate Program will allow students the opportunity to receive the FAA Part 107 Commercial Remote Pilot Certification and expand on that knowledge with advanced UAS operations tutorials. Students will understand UAS regulations, flight operations, crew resource management, risk management and mitigation, airspace requirements, and emergency operations. The culminating experience will involve advanced mission planning and execution with scenario-based training. Extra fees will be associated with the courses for drone purchase, software, and testing materials.

Program Outcomes

1. Equip students with the essential skills to manage drone operations.
2. Effectively plan and executive missions utilizing drone hardware and software.
3. Understand the safety and legal requirements of operating a drone.

Requirements

Certificate Courses
12 Total Credits

- Complete:
 - UAS107 - UAS Certification (4)
 - UAS207 - UAS Operations (4)
 - UAS307 - Advanced UAS Operations and Mission Planning (4)

Grand Total Credits: **12**

School of Arts and Sciences

Advanced Graduate Studies in Creative Writing (Post Master's Certificate)

Description

The Advanced Certificate in Creative Writing is a low-residency program designed for students who have already completed an MFA in creative writing and wish to revise, reconceive, or complete a creative manuscript. It has tracks in fiction and nonfiction. Students also choose one of two supplementary tracks: the book business and self-promotion; the teaching of composition.

Program Outcomes

1. Revise, reconceive, or complete a creative manuscript so as to produce a finished manuscript of the highest possible literary merit, worthy of publication
2. Learn the basic workings of the contemporary publishing industry, including standard editorial practices, book promotion and authorial self-promotion
3. Learn the basics of the teaching of writing with an emphasis on the teaching of composition at the college level

Requirements

Certificate Courses

30 Total Credits

- Complete all of the following
 - Creative Writing Residency I
 - 1 of the following:
 - MFA610 - Creative Writing Residency I - Fiction (3)
 - MFA620 - Creative Writing Residency I - Nonfiction (3)
 - Creative Manuscript I
 - 1 of the following:
 - MFA612 - Creative Manuscript I - Fiction (12)
 - MFA622 - Creative Manuscript I - Nonfiction (12)
 - Creative Writing Residency II
 - 1 of the following:
 - MFA611 - Creative Writing Residency II - Fiction (3)
 - MFA621 - Creative Writing Residency II - Nonfiction (3)
 - Creative Manuscript II
 - 1 of the following:
 - MFA613 - Creative Manuscript II - Fiction (12)
 - MFA623 - Creative Manuscript II - Nonfiction (12)

Electives

3 Total Credits

- 3 credit(s) from the following:
 - MFA614 - The Book Business (3)
 - Course Not Found

Grand Total Credits: **33**

Campus Programs

American Studies (Minor)

Requirements

Minor Courses
15 Total Credits

- Complete all of the following
 - 5 of the following:
 - FAS301 - Film and American Culture (3)
 - FAS370 - American Art (3)
 - HIS245 - United States History since 1945 (3)
 - HIS254 - Civil Rights Movement (3)
 - HIS270 - American Environmental History (3)
 - HIS330 - Civil War and Reconstruction (3)
 - HIS332 - Colonial New England (3)
 - HIS338 - Young America (3)
 - HIS357 - American Slavery (3)
 - LIT328 - Multi-Ethnic Literature: Describing the Hyphen (3)
 - LIT350 - The Black Literary Tradition (3)
 - POL210 - American Politics (3)
 - POL306 - The American Legal Tradition (3)
 - POL348 - U.S. Environmental Law and Politics (3)
 - May also include HIS-319, LIT 312, LIT 314, LIT 315, LIT 450. These courses are no longer offered or they are only available to College of Online and Continuing Education students, but may be taken in conjunction with the electives currently offered by the University College.
 - NOTE: Maximum three (3) courses per subject.

Grand Total Credits: **15**

Anthropology and Geography (Minor)

Description

In an increasingly interconnected world an understanding of intercultural communication patterns, and cultural competence are critical. This program will provide students in any major with the knowledge and skills to communicate effectively cross culturally, and to deepen their awareness of cultural differences and how to accommodate them in their daily life. This program will further provide students in the social sciences with a strong foundation for graduate study.

Program Outcomes

1. Apply knowledge of culture and geography to students' field of study.
2. Integrate primary source literature and data to formulate new hypothesis about cultural behaviors.
3. Adhere to ethical standards for ethnographic research.

Requirements

Minor Courses
15 Total Credits

- Complete all of the following
 - Complete:
 - ATH111 - Introduction to Cultural Anthropology (3)
 - GEO200 - World Geography (3)
 - 6 credit(s) from the following type of course(s):
Anthropology, Geography, World Religion (PHL-230), or any faculty led travel courses.
 - 3 credit(s) from subject(s): HIS

Grand Total Credits: **15**

Campus Programs

Applied Mathematics (Minor)

Description

The Applied Mathematics Minor at SNHU is devoted to learning and understanding the mathematical methods and reasoning involved in solving real-world problems, including problems in business, the social sciences and the natural sciences.

Requirements

Minor Courses

9 Total Credits

- Complete all of the following
 - Complete:
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT350 - Applied Linear Algebra (3)
 - 1 of the following:
 - MAT240 - Applied Statistics (3)
 - MAT275 - Calculus II: Integration & Series (3)
 - May also include MAT 243. This course is no longer offered or is only available through College of Online and Continuing Education, but may be taken as an option instead of MAT 240 and MAT 275.

Electives

6 Total Credits

- Complete all of the following
 - 6 credit(s) from MAT within the 200 - 499 range or from the following courses:
 - MAT135 - The Heart of Mathematics (3)
 - MAT160 - Introduction to Game Theory (3)
 - Except: MAT 206, MAT 360, or MAT 362

Grand Total Credits: **15**

Art History (Minor)

Requirements

Minor Courses

6 Total Credits

- Complete:
 - HUM201 - Humanities: Ancient to Renaissance (3)
 - HUM202 - Humanities: Renaissance to the Present (3)

Electives

9 Total Credits

- 3 of the following:
 - FAS110 - Introductory Drawing (3)
 - FAS226 - Digital Photography (3)
 - FAS260 - History of Architecture (3)
 - FAS270 - Introduction to Film History (3)
 - FAS301 - Film and American Culture (3)
 - FAS302 - Gender and Film (3)
 - FAS303 - Golden Age of Film Comedy (3)
 - FAS305 - Digital Documentary Photography (3)
 - FAS320 - History of Design (3)
 - FAS326 - History of Photography (3)
 - FAS335 - Romanticism to Impressionism (3)
 - FAS342 - Modernism (3)
 - FAS345 - Contemporary Art (3)
 - FAS370 - American Art (3)
 - FAS380 - Women, Art and Society (3)

Grand Total Credits: **15**

Campus Programs

Behavioral Neuroscience (Minor)

Description

The Behavioral Neuroscience minor provides students an opportunity to gain interdisciplinary insights about how the brain functions at both molecular and behavioral levels, as well as the interactions that occur in between. Behavioral neuroscience has become a hub of the physical, behavioral and social sciences. For example, psychological research has increasingly made use of the terminology and brain scanning technologies from the neuroscience. Behavioral neuroscience has also informed other disciplines as well, from art to marketing. A student may earn a minor in Behavioral Neuroscience by successfully completing the following courses:

Requirements

Prerequisite Courses

3 Total Credits

- Complete:
 - PSY108 - Introduction to Psychology (3)

Minor Courses

16 Total Credits

- Complete all of the following
 - Complete:
 - BIO210 - Introduction to Anatomy and Physiology (3)
 - BIO210L - Anatomy and Physiology Lab (1)
 - BIO320 - Neuroscience (3)
 - PSY300 - Biopsychology (3)
 - 2 of the following:
 - BIO325 - Animal Behavior (3)
 - PSY225 - Health Psychology (3)
 - PSY307 - Sensation and Perception (3)

Grand Total Credits: **19**

Biology (BS)

Description

The Biology Major integrates practical skills (laboratory and field work) and theoretical education into courses that investigate the diversity and biology of plants, animals, and microbes. This Major is designed to provide students with the knowledge and skills to succeed in careers in the biological sciences, including those in the field of health. It is also a strong foundation for those wishing to go on to teach biology. The curriculum focuses on the structure and function of cells, tissues, and organ systems in living organisms, the evolutionary relationships among all organisms, and on the interactions between living systems and the environment. In research partnerships with our faculty, SNHU students participate in original research projects that utilize cutting edge technologies, as well as traditional field based studies. The hands-on teaching environment and small classroom size at SNHU allows students to investigate their own interests, and to find support for high-quality undergraduate research projects that further develop their proficiency in biology. Our goal is to foster awareness, appreciation, and understanding of biology as a diverse and dynamic field, and to prepare students to enter career paths or graduate programs that utilize their skills and knowledge.

Program Outcomes

1. Apply principles and concepts from the broad range of biological sciences, including cell biology, genetics, evolution and ecology.
2. Design and conduct independent laboratory or field research that is consistent with the standards and practices of research in the biological sciences.
3. Collect, evaluate, interpret, and communicate data and information according to the standards of practice in the biological sciences.
4. Apply fundamental mathematical tools (statistics, calculus) and physical principles (physics, chemistry) to the analysis of relevant biological situations.
5. Assess the ethical dimensions inherent in biological research, especially as it pertains to biotechnology and health science.

Requirements

General Education Courses

42 Total Credits

- Complete all of the following
 - 39 credit(s) from: General Education

Campus Programs

Must include:

- PSY108 - Introduction to Psychology (3)
- SOC112 - Introduction to Sociology (3)
- 1 of the following:
 - MAT241 - Modern Statistics with Software (3)
 - MAT225 - Calculus I: Single-Variable Calculus (3)

Arts and Sciences Courses

9 Total Credits

- Complete 1 of the following
 - Complete all of the following
 - Complete:
 - COM212 - Public Speaking (3)
 - SOC312 - Biosociology (3)
 - 1 of the following:
 - MAT300 - Applied Statistics II: Regression Analysis (3)
 - PSY225 - Health Psychology (3)
 - Complete:
 - MAT275 - Calculus II: Integration & Series (3)
 - MAT330 - Differential Equations (3)
 - MAT350 - Applied Linear Algebra (3)

Major Courses

Campus Programs

Biology (Minor)

Description

The problems societies face around the world today, such as epidemics and outbreaks, the rise of antibiotic resistance, and the loss of biodiversity, require solutions that incorporate scientific skills and knowledge. This program will provide students in any major with valuable knowledge of biology to add to their area of focus. It is also suitable for students who wish to pursue further study in the life sciences to meet requirements for graduate school admission.

Program Outcomes

1. Apply knowledge of the structure and function of organisms, genetics, and evolutionary theory to their own field of study.
2. Integrate information from primary scientific literature and data sources in the development and exploration of hypotheses.
3. Adhere to standards and best practices for safely and effectively collecting and analyzing data in the field and laboratory.

Requirements

Minor Courses

17 Total Credits

- Complete all of the following
 - Complete:
 - BIO120 - General Biology I (3)
 - BIO120L - General Biology I Lab (1)
 - BIO121 - General Biology II (3)
 - BIO121L - General Biology II Lab (1)
 - 9 credit(s) from the following:
 - BIO110 - Introduction to Public Health (3)
 - BIO200 - Bioethics (3)
 - BIO215 - People, Places, and Plagues (3)
 - BIO270 - Genetics (3)
 - BIO280 - The Microbial World (3)
 - BIO280L - The Microbial World Lab (1)
 - BIO302 - Field Ornithology (3)
 - BIO312 - Zoology (3)
 - BIO314 - Introductory Botany (3)
 - BIO315 - Ecological Principles and Field Methods (3)
 - BIO325 - Animal Behavior (3)
 - BIO330 - Conservation Biology (3)
 - BIO340 - Human Health and the Environment (3)
 - BIO424 - Vertebrate Morphology (3)
 - BIO431 - Invasive Biology (3)

Grand Total Credits: **17**

Campus Programs

Communication (BA)

Description

The Communication major prepares students for a wide variety of fields including public relations, corporate communications and training, social media, professional writing, journalism, advertising, and other mass media professions. Students also have the opportunity to focus their studies through a variety of minors and internship experiences. At the same time, students are able to develop competencies in particular areas that may be highlighted by capstone projects or portfolio work for future employment

Program Outcomes

1. Design, develop, and deliver professional quality oral, written, and visual communications that are coherent, technically sound, and appropriately adapted to specific audiences and contexts
2. Critically analyze and recommend strategies for addressing the impact of various physical, cognitive, cultural, and social factors that shape communication across interpersonal, group, and organizational settings
3. Evaluate, select, and effectively apply various tools and technology to the design, development, and dissemination of communication messages
4. Evaluate and respond to complex problems associated with the design, development, and delivery of communication messages through critical and creative thinking and collaboration with an interdisciplinary team of specialists and stakeholders
5. Apply professional, ethical, and socially and culturally sensitive communication practices across interpersonal, group, organizational, and intercultural settings

Requirements

General Education Courses

42 Total Credits

- 42 credit(s) from: General Education

Arts and Sciences Courses

9 Total Credits

- Complete all of the following
 - Complete:
 - ENG220 - Business Communication (3)
 - 6 credit(s) from HIS within the 100 - 199 range or from the following courses:
 - GRA310 - Digital Graphic Design for the Web (3)
 - POL210 - American Politics (3)
 - PSY257 - Social Psychology (3)
 - SCI219 - Environmental Issues (3)
 - Course Not Found
 - NOTE: Students may only take one (1) HIS course from the 100 level.

Major Courses

33 Total Credits

- Complete:
 - COM130 - Media Communication and Visual Literacy (3)
 - COM212 - Public Speaking (3)
 - COM227 - Public Relations (3)
 - COM234 - Digital Toolbox (3)
 - COM235 - Multimedia Journalism (3)
 - COM244 - Digital Video Production: Level I (3)
 - COM310 - Social Media (3)
 - COM320 - Exploring World Cultures/Mass Media (3)
 - COM322 - Advanced Public Speaking (3)
 - COM410 - Applied Strategic Communication (3)
 - COM430 - Organizational Communications (3)

Requirements

Minor Courses
15 Total Credits

- Complete all of the following
 - Complete:
 - COM126 - Introduction to Mass Communication (3)
 - COM212 - Public Speaking (3)
 - 9 credit(s) from subject(s): COM

Grand Total Credits: **15**

Creative Writing and English (BA)

Description

Novelists, memoirists, poets, playwrights and screenwriters articulate the questions of our time. They help us to free ourselves from our easy assumptions and to empathize with people whose circumstances differ from our own. Literature gives our culture a way to talk to itself. SNHU's major in creative writing is for students interested in careers in writing and book publishing, and for students who simply wish to explore a passion for writing. It teaches skills useful for journalism, law, communications, and many other professions. It prepares students for graduate programs, like the university's low-residency Master of Fine Arts in fiction and nonfiction writing. Creative writing courses begin during freshman year. Publishing opportunities at SNHU include the student literary journal, The Manatee, and contests in the university's nationally-distributed journal, Amoskeag. Faculty help students prepare work for submission to graduate programs, agents, and editors. Students on the main campus in Manchester spend classroom time with agents, editors, publicists, and visiting writers. Students attend workshops, readings, and networking events. Our faculty includes nationally acclaimed writers. They host renowned visiting writers. Students can join the creative writing club and the New Hampshire Writers' Project, the only statewide literary organization for writers of all levels and genres, which is housed on the university's main campus in Manchester. Students who wish to major in creative writing on the main campus in Manchester must submit a writing sample of 5-10 pages to the program coordinator. Students applying to the online program in creative writing must submit a sample to the online program. Creative writing majors on the main campus in Manchester choose a concentration in fiction, a concentration in nonfiction, or no concentration. Online majors choose a concentration in fiction, nonfiction, poetry or screenwriting. Majors on the main campus who choose no concentration take workshops in three out of four genres. Majors on the main campus who choose a concentration in fiction or nonfiction focus on a long work in the chosen genre. Online majors focus on the chosen genre and take a course in writing for new media. For majors on the main campus, the concentrations in fiction and nonfiction make it easier to complete a B.A. in Creative Writing and English in three years with coursework during summers. The concentrations can also help students write work samples strong enough to earn admission to the low-residency M.F.A. program. Students who finish a B.A. with a concentration in fiction or nonfiction in three years can earn both a B.A. and an M.F.A. over the course of five years, if they are accepted to the M.F.A. program in the third year of the B.A.

Program Outcomes

1. Apply techniques and terminology essential to analyzing (and appreciating) literary form, genre, structure, and style
2. Produce creative works in a variety of genres (fiction, non-fiction, poetry, drama, screenwriting), employing the conventions and techniques of those genres
3. Produce a body of advanced work in the student's chosen genre, reflecting a culmination of the student's workshop training and the beginning of professionalization

Campus Programs

Requirements

General Education Courses

42 Total Credits

- 42 credit(s) from: General Education

Arts and Sciences Courses

9 Total Credits

- Complete all of the following
 - Complete:

Crime and Criminology (Certificate)

Description

For students in majors other than the B.S. in Justice Studies, non-matriculated students, part-time students, and other students by approval of Department Chair. This optional 12 credit program is designed for students interested in future careers or graduate study in the areas of social work, criminal psychology, or sociology. Students will explore related topics including victimology, sociology of deviance, and crimes against children.

Program Outcomes

1. Students completing the Crime and Criminology certificate will be able to draw upon theory, research and historical perspective as professionals and apply such into their daily practice
2. Students completing the Crime and Criminology certificate will be able to apply and demonstrate their academic and professional skills as effective communicators, critical and independent thinkers, and analytical problem solvers
3. Students completing the Crime and Criminology certificate will be socially responsible citizens and professionals who are ethically informed and culturally aware

Requirements

Certificate Courses

12 Total Credits

- Complete all of the following
 - Complete:
 - JUS101 - Introduction to Criminal Justice (3)
 - JUS215 - The Victim and the Justice System (3)
 - 6 credit(s) from the following:
 - JUS129 - Introduction to Terrorism (3)
 - JUS211 - Organized Crime (3)
 - JUS305 - International Criminal Justice (3)
 - JUS309 - White Collar Crime (3)
 - JUS429 - Terrorist Methods, Networks, and Financing (3)
 - JUS468 - Crimes Against Children (3)
 - PSY205 - Forensic Psychology (3)
 - PSY215 - Abnormal Psychology (3)
 - PSY310 - Criminal Psychology (3)
 - SOC213 - Sociology of Social Problems (3)
 - SOC324 - Sociology of Crime and Violence (3)
 - SOC326 - Sociology of Deviant Behavior (3)

Grand Total Credits: **12**

Digital Media Video Production (Minor)

Description

A Digital Media and Video Production minor would enable a student to combine specialized knowledge within their major with theoretic and practical knowledge of video production to create documentary, commercial, or promotional videos.

Requirements

Minor Courses

15 Total Credits

- Complete all of the following
 - Complete:
 - COM244 - Digital Video Production: Level I (3)
 - FAS270 - Introduction to Film History (3)
 - 3 of the following:
 - COM344 - Digital Video Production: Level II (3)
 - COM345 - Animation and Visual Effects (3)
 - COM454 - Documentary Video Production (3)
 - COM455 - Commercial Video Production (3)
 - ENG230 - Writing for Film (3)
 - FAS301 - Film and American Culture (3)
 - FAS302 - Gender and Film (3)

Grand Total Credits: **15**

Digital Studies Minor

Description

The Digital Studies Minor gives students an interdisciplinary opportunity to combine coursework in programming, digital design, and digital media analysis.

Requirements

Minor Courses

15 Total Credits

- Complete all of the following
 - 1 of the following:
 - CS110 - Fundamentals of Programming (3)
 - CIS255 - Applied Data Structure and Database (3)
 - IT135 - Interactive Scripting in Virtual Environment (3)
 - IT270 - Web Site Design (3)
 - Complete:
 - COM130 - Media Communication and Visual Literacy (3)
 - ENG370 - Writing with Digital Media (3)
 - LIT399 - Literature in the Digital Age (3)
 - 1 of the following:
 - COM410 - Applied Strategic Communication (3)
 - GRA310 - Digital Graphic Design for the Web (3)
 - GRA470 - User Interface and Experience (3)
 - IT214 - Technology and Art (3)

Grand Total Credits: **15**

Campus Programs

Diversity and Globalization (Minor)

Description

The minor in diversity and globalization is intended for students who seek to deepen their understanding of how our experiences and differences can challenge our ability to work together in an increasingly globalized world.

Program Outcomes

1. Apply knowledge of globalization to student's field of study
2. Apply knowledge of diversity and ethnic relations to student's field of study
3. Demonstrate understanding of the complexity of global economic, population, and ideological flows

Requirements

Prerequisite Courses

3 Total Credits

- Complete:
 - SOC112 - Introduction to Sociology (3)

Minor Courses

15 Total Credits

- Complete all of the following
 - Complete:
 - SOC207 - Exploring Racial and Cultural Identity (3)
 - SOC310 - Sociology of Globalization (3)
 - POL211 - International Relations (3)
 - 6 credit(s) from the following:
 - SOC303 - Sociology of Wealth and Poverty (3)
 - SOC320 - Sociology of Gender (3)
 - HIS220 - Modern European History: 1890-Present (3)
 - HIS254 - Civil Rights Movement (3)
 - HIS357 - American Slavery (3)
 - PHL230 - Religions of the World (3)
 - MKT326 - Global Consumer Culture (3)
 - SOC214 - International Social Problems (3)

Grand Total Credits: **18**

English Language and Literature (BA)

Description

Turn your passion for reading and writing into a career. Gain the communication and research skills needed in the workplace today. Learn to think critically and write effectively. Welcome to SNHU's BA in English language and literature program. The BA in English language and literature degree opens up several career possibilities beyond the traditional roles of writers and teachers. English language and literature majors also go on to become lawyers, politicians, marketing communication professionals, historians, museum curators, and nonprofit directors, just to name a few. Classes are generally small. The literature courses, for example, average about 20 students and the writing courses just about 15 students. This allows professors to keep the classes lively and highly interactive. You won't ever find yourself sitting in a huge auditorium, struggling to follow along with a lecture. In fact, some of the most unique learning opportunities might take place out of the classroom. Because of SNHU's ideal location in the heart of New England, the birthplace of American literature, professors often build in visits to historic literary sites such as Walden Pond to add depth to the subject matter. The program includes an extensive overview of American and British literature and a sampling of world literature. You'll also be required to take courses in linguistics, literary theory, and Shakespeare. Optional courses include Postcolonial Studies, multinational literature, as well as regularly rotating courses on single authors (Dickens or Hemingway, for example) and specific genres (drama, poetry, and the novel).

Campus Programs

Program Outcomes

1. Critical and Creative Thinking - Identify and analyze ambiguity; Interpret implicit meaning; Assess the reasoning in arguments by others; Support interpretations with textual evidence
2. Cultural Literacy - Differentiate between an author's historical period and place within a literary movement; Assess and critique the influence of cultural categories of race, class, gender, and orientation; Integrate a variety of historical perspectives into analysis of contemporary issues; Articulate orally and in writing the culturally important role of literature in different historical periods
3. Literary Analysis - Employ critical methods and terminology to analyze literary form, genre, structure, and style; Incorporate theoretical perspectives into interpretation of texts; Demonstrate skills of literary analysis through written and oral presentations
4. Analytical Writing - Develop an engaging literary analysis that develops an original thesis through a logical, organized argument that emphasizes close reading of the text; Integrate critical thinking, cultural knowledge, and critical analysis with (at 300-level and higher) research and documentation of secondary sources
5. Collaboration - Demonstrate an ability to work with peers on collaborative projects; Utilize oral and written communication skills in a group dynamic

Environmental Science (BS)

Description

In today's world, it's essential to go green. Nowhere is this task more urgent than in developing countries, where the implementation of Western development models has created serious environmental challenges. The B.S. in Environmental Science and Sustainability (International) at SNHU provides international students with the knowledge, skills, and practical experience needed to meet these challenges sustainably in governments, nongovernmental organizations, and businesses worldwide. Our program blends insights from environmental science, the environmental social sciences, and other sustainability-focused fields into a uniquely practical learning experience that is more than merely interdisciplinary. Students spend their first two years in an environmental or other degree program at their home universities, then complete their remaining degree requirements in two years on campus at SNHU. They also take all of their SNHU environmental science and sustainability courses with the American students enrolled in the ordinary 4-year version of the program, immersing themselves not just in the content of their coursework, but also in American culture and university life.

Program Outcomes

1. Utilize effective oral and written communication strategies in the construction, evaluation, and presentation of solutions to environmental problems
2. Analyze intersections of the human and natural world drawing upon an understanding of the structures and functions of ecological systems and processes
3. Propose practical solutions that address the complexity of environmental problems by employing interdisciplinary approaches
4. Articulate a personal ethical framework that integrates environmental science concepts, principles, and practical experiences
5. Apply various technological and field-based methods to the study of the environment
6. Design and execute projects that effectively integrate the scientific method and quantitative and qualitative research methods (including laboratory procedures) as applied to questions related to the natural environment

Campus Programs

Requirements

General Education Courses

42 Total Credits

- 42 credit(s) from: General Education

Must include:

- MAT240 - Applied Statistics (3)
- PHY101 - Principles of Physics (3)

Environmental Studies (Minor)

Description

This course of study is designed for students who are not pursuing an environmental degree. As environmental concerns become more relevant, a minor in Environmental Studies can enhance one's education and expand career opportunities. A student may earn a minor in Environmental Studies by successfully completing the following courses:

Requirements

Minor Courses

15 Total Credits

- Complete all of the following
 - Complete:
 - PHL363 - Environmental Ethics (3)
 - SCI219 - Environmental Issues (3)
 - 3 of the following:
 - ENV305 - Global Climate Change (3)
 - GEO200 - World Geography (3)
 - HIS270 - American Environmental History (3)
 - LIT231 - Nature Writers (3)
 - SOC318 - Sustainable Communities (3)

Grand Total Credits: **15**

Campus Programs

Ethics (Minor)

Description

The study of ethics involves asking deep questions: What makes an action right or wrong? What makes a person good or bad? How ought to act both in our personal lives and professional capacities? What is the good life and how can I lead one? These are some of the questions that philosophers have been asking about moral reality for well over two millennia, but they are still fascinating and can enrich our experience and inform the way we conduct ourselves. By earning an ethics minor, students will learn about moral theories that were developed in an attempt to answer these questions, but will also learn strategies for identifying other ethical puzzles that arise in our ever-changing world.

Requirements

Minor Courses
15 Total Credits

- Complete all of the following
 - Complete:
 - PHL212 - Introduction to Ethics (3)
 - 4 of the following:
 - BIO200 - Bioethics (3)
 - BUS206 - Business Law I (3)
 - ECO101 - Economics of Social Issues (3)
 - ENV348 - U.S. Environmental Law and Politics (3)
 - ENV349 - Comparative Environmental Law and Sustainable Development (3)
 - HIS249 - The Common Good (3)
 - JUS455 - Legal Traditions (3)
 - PHL222 - Happiness and the Good Life (3)
 - PHL305 - Animal Rights and Ethical Issues (3)
 - PHL363 - Environmental Ethics (3)
 - POL348 - U.S. Environmental Law and Politics (3)
 - POL349 - Comparative Environmental Law and Sustainable Development (3)
 - SCI219 - Environmental Issues (3)
 - SOC213 - Sociology of Social Problems (3)
 - SOC214 - International Social Problems (3)
 - SPT333 - Sport, Society, and Ethics (3)

European Culture (Minor)

Requirements

Minor Courses
15 Total Credits

- Complete all of the following
 - 2 of the following:
 - LIT309 - Romance, Revolutions, and the Birth of the Novel (3)
 - LIT310 - Victorian Literature (3)
 - LIT317 - European Literature (3)
 - LIT311 - Modern British Literature (3)
 - 3 of the following:
 - FAS335 - Romanticism to Impressionism (3)
 - FAS342 - Modernism (3)
 - HIS235 - Modern Russia (3)
 - HIS238 - Modern Germany: 1871 - Present (3)
 - LFR311 - French Civilization and Culture (3)
 - LIT309 - Romance, Revolutions, and the Birth of the Novel (3)
 - LIT310 - Victorian Literature (3)
 - LIT311 - Modern British Literature (3)
 - LIT317 - European Literature (3)
 - MUS223 - Appreciation and History of Music (3)

Grand Total Credits: **15**

Campus Programs

Fiction (MFA)

Description

The School of Arts and Sciences offers a low-residency graduate program in creative writing. A highly focused course of study, the M.F.A. prepares students to write in their chosen genre (fiction or nonfiction) at a professional level. The M.F.A. is also a terminal degree that provides students a foundation from which to prepare (through internships, work experience, and/or allied areas of study) for employment in the fields of teaching and publishing. With four writing residencies held at the Mountain View Grand Resort in Whitefield, New Hampshire during four semesters of mentored correspondence study, the low-residency M.F.A. at Southern New Hampshire University is also convenient and affordable for working adults. Students study with faculty mentors who are accomplished writers and teachers, participate in lectures, readings, and master classes with visiting writers of national reputation, hone their work through mentor and peer review, read publicly from their own work and meet with publishing professionals in a community dedicated to creative endeavor. Workshop courses run five months and are tailored to students' needs and creative goals. Students work closely with faculty mentors. Individualized study is supplemented with residency periods (seven consecutive days each in June and January) during which mentors and their students meet to review the students' long-term writing projects and to build a community of writers. The second year of the program is devoted to the completion of a manuscript of professional quality, suitable for submission to editors, and a critical essay suitable for submission to literary journals. Graduation is held during the winter and summer residencies following a student's fourth semester. Students who have completed their degree are celebrated as they return for a few days to give public readings and lectures and take part in their graduation ceremony.

Program Outcomes

1. Complete a fiction manuscript of professional quality, suitable for submission to editors
2. Understand literary concepts necessary for teaching composition and creative writing and for working in publishing

Requirements

Game Art and Development (BA)

Description

Whether it's creating lifelike characters, imagining rich virtual game worlds or designing creatures from another planet, SNHU's major in Game Art and Development can get you on your way to working in the fast-paced, exciting world of video game art. This BA program balances fundamental skill development with advanced training in the techniques used by industry professionals today. Students learn and apply principles used in video game art asset creation such as 3D modeling, lighting, shading, anatomy illustration, digital painting, 3D mesh topology, texturing and rigging. Courses mirror the standard workflow pipeline used in industry for the production of art assets for multiple video game platforms, including web, console, PC and mobile. You'll graduate with a vast toolkit of skills and a body of work for your portfolio. SNHU Game Art and Development graduates have found employment as: Character Artist Environment Artist Level Designer World Builder Designers Technical Artist Weapons Artist 3-D Generalist 3-D product modelers UI/UX artist Texture Artist

Program Outcomes

1. Design and develop professional quality digital game and interactive media elements that combine technical and aesthetic design principles to create engaging and dynamic experiences
2. Critically analyze and recommend strategies for addressing the impact of various physical, cognitive, cultural, and social factors that shape the design, development, and interpretation of digital games and interactive media
3. Evaluate, select, and effectively apply tools and technology commonly used in the design and production of digital games and other interactive media
4. Evaluate and respond to complex problems associated with the design and development of digital games through critical and creative thinking and collaboration with an interdisciplinary team of specialists and stakeholders
5. Optimize the design of interactive media elements to the strengths and limitations of the processes and techniques used in the production of digital games

Game Programming and Development (BS)

Description

Southern New Hampshire University's Bachelor of Science in Game Programming and Development degree prepares graduates with the knowledge and skills necessary for the challenging and rewarding field of game programming. Students go beyond traditional software development to gain the technical expertise necessary for realizing and enabling the creative vision of game designers and artists. The curriculum is grounded in game design theory, programming, and the various phases of the game development process. Emphasis is placed on the mastery of a variety of computer programming languages, scripting, artificial intelligence, game engine development and deployment, visual design, and the use of industry-standard software applications. Students gain experience in developing games across various platforms, including PC, console, web, and mobile devices. Graduates of the program are well-positioned for careers in game development, be it as part of small indie companies or larger video game development corporations.

Program Outcomes

1. Create, execute, and document clear and effective code in a variety of programming languages and game engines relevant to professional game development
2. Integrate methods and techniques for creating realistic, dynamic gameplay experiences, including game AI, game physics, 2D and 3D graphics, and interface design
3. Articulate and solve complex logic problems associated with programming interactive game systems
4. Apply effective, industry-standard design, production, and testing techniques through all phases of game development
5. Adhere to the standards and expectations of the professional game development community, especially regarding effective communication, respect for all people and cultures, ethical decision-making, and the ability to function effectively as a member of a team
6. Research, develop, and contribute to advances and trends within the field of game programming

Campus Programs

Graphic Design and Media Arts (BA)

Description

The mission of the SNHU Graphic Design major is to equip students to be professional graphic designers competent in the latest design technologies and educated in the cultural contexts of the liberal arts. The SNHU Graphic Design major is the most technologically oriented B.A. graphics program in the region. Its graduates are equipped with high level skills using professional equipment that makes them competitive in the marketplace. At the same time, its grounding in liberal education and the humanities gives students a cultural frame of reference that enriches them both professionally and personally. Their liberal arts background prepares them for undertaking "real-world" visual communication projects that demand an understanding of a broad range of content. Professional graphic designers turn ideas into visual statements. The Graphic Design major is the program of choice for students who have artistic talent or interests and also seek meaningful creative employment upon graduation.

Program Outcomes

1. Design, develop, adapt, and present professional quality graphic and media works that articulate a clear, coherent message using appropriate and effective technical and aesthetic design principles
2. Critically analyze and recommend strategies for addressing the impact of various physical, cognitive, cultural, and social factors that shape how graphic and media messages are interpreted
3. Evaluate, select, and effectively apply various tools and technology to the design, development, and dissemination of graphic and media works
4. Evaluate and respond to complex problems associated with the design, development, and delivery of graphic and visual media through critical and creative thinking and collaboration with an interdisciplinary team of specialists and stakeholders
5. Apply professional, ethical, and socially and culturally sensitive practices to the design and development of visual media elements

 - GRA470 - User Interface and Experience (3)
 - 3 credit(s) from subject(s): FAS within the range of course numbers 300 - 499

Grand Total Credits: **18**

History (BA)

Description

The history major provides students with the mental discipline needed for them to assume lives of positive impact in any specific vocational field. In pursuit of this goal, the program cultivates a historical perspective, which is integrative of all fields of human knowledge; analyzes the choices, and consequences of those choices, of various human communities; appreciates the development of wisdom and beauty; develops advanced critical thinking and communication skills through intensive examination of the elements of history (among them texts, images, objects, landscapes) and the crafting of contemporary historical arguments based upon those sources; examines the creation of history through the work of historians; and encourages civic engagement through a deeper and more nuanced understanding of the development of human societies and the importance of competent, creative, and generous leadership in forging peaceful societies. In addition to the prescribed coursework, students are strongly encouraged to participate in internships and study abroad programs as a way of broadening their intellectual and cultural development and preparing them for success in a wide range of fields.

Program Outcomes

1. Demonstrate knowledge of the development of human societies by analyzing and interpreting a variety of sources that provide evidence to support an argument about the past
2. Utilize critical thinking skills for formulating effective analysis of appropriate primary and secondary sources
3. Develop historical perspectives and arguments and express those arguments in effective and applicable formats
4. Practice civic engagement through the application of history in the public realm
5. Analyze multiple historical and theoretical viewpoints effectively through an open-minded, empathetic perspective on the past

Interactive Storytelling for Games (Minor)

Description

Many contemporary digital games create immersive, engaging experiences for players through the effective development of story and narrative. The interactive nature of games, however, challenges the author-centric approach of conventional fiction writing. The minor in Interactive Storytelling is designed to introduce students to techniques and challenges specific to the interactive medium of the digital game. Students complete coursework emphasizing both theoretical and practical perspectives and apply their learning in hands-on creative assignments.

Requirements

Justice Studies (BS)

Campus Programs

Description

Southern New Hampshire University's Bachelor of Science in Justice Studies presents a systematic vision of the justice system and exposes its majors to the panoply of careers, theories and applications, agencies and institutions that comprise American justice. The B.S. in Justice Studies consists of a core and a series of tracks which allows students to tailor the program toward their career goals. The core lays out the essential knowledge base for Justice Studies majors and reviews the fundamentals of legal and social science research, provides overview courses on the system at large, and instructs on criminal law and correctional systems. The B.S. in Justice Studies emphasizes the full range of justice functions, from policing to corrections, from law to private sector justice. The B.S. in Justice Studies delivers the "professional" perspective in the educational environment, preparing students for future careers in the justice sector.

Program Outcomes

1. Graduates of the Justice Studies program will be able to draw upon theory, research and historical perspective as professionals and apply such into their daily practice
2. Graduates of the Justice Studies program will be able to apply and demonstrate their academic and professional skills as effective communicators, critical and independent thinkers, and analytical problem solvers
3. Graduates of the Justice Studies program will be socially responsible citizens and professionals who are ethically informed and culturally aware

Law and Legal Process (Certificate)

Description

For students in majors other than the B.S. in Justice Studies, non-matriculated students, part-time students, and other students by approval of Department Chair. This optional 12-credit program is designed for students interested in future careers or graduate study in the areas of law, court administration, or legal administration. Students explore related topics including judicial administration, law and evidence, and criminal procedure.

Program Outcomes

1. Students completing the Law and Legal Process certificate will be able to draw upon theory, research and historical perspective as professionals and apply such into their daily practice
2. Students completing the Law and Legal Process certificate will be able to apply and demonstrate their academic and professional skills as effective communicators, critical and independent thinkers, and analytical problem solvers
3. Students completing the Law and Legal Process certificate will be socially responsible citizens and professionals who are ethically informed and culturally aware

Requirements

Certificate Courses

12 Total Credits

- Complete all of the following
 - Complete:
 - JUS101 - Introduction to Criminal Justice (3)
 - JUS261 - Judicial Administration (3)
 - 6 credit(s) from the following:
 - JUS325 - Law, Justice and Family (3)
 - JUS331 - Juvenile Justice System (3)
 - JUS376 - Criminal Procedure (3)
 - JUS395 - The Death Penalty (3)
 - JUS485 - Forensic Law (3)

Grand Total Credits: **12**

Law and Politics (BA)

Campus Programs

Description

Whether you're fascinated by politics or intrigued by the law, the B.A. in Law and Politics at SNHU will provide you with the knowledge and skills essential for success across a broad spectrum of careers that lie at the interface of these two dynamic and exciting fields. Our unique interdisciplinary program will provide you not only with a solid foundation in the art and science of politics, but also with insight into what it means to "think like a lawyer," both in the United States and around the world. We emphasize the development of critical thinking and analytical skills in political and legal contexts, as well as the ability to communicate effectively, both orally and in writing, on topics of political and legal concern. These skills are essential for political and legal professionals, and are transferable to many other professional fields. The range of career options for students with a B.A. in Law and Politics is very broad, encompassing careers in politics, government, diplomacy, business, journalism, consulting, teaching, and many other fields. Our program also prepares students for graduate study in political science, international relations, public policy, or public administration, and for law school, as well as for a lifetime of citizenship in a politically and legally complex and increasingly globalized world. NOTE: There is an accelerated version of this program. The B.A. in Law and Politics (Pre-J.D. Accelerated) at SNHU offers qualified students a unique opportunity to earn both a bachelor's degree from SNHU and a J.D. from any of certain ABA-approved law schools in six years rather than the usual (and more expensive) seven years. Collaborative agreements between SNHU and these schools allow students to count a year's worth of law-school courses toward the requirements of the B.A., thus shortening by a year the time normally required to earn both degrees. Students enrolled in the B.A. in Law and Politics (Pre-J.D. Accelerated) apply as juniors rather than as seniors for admission to their choice of law schools participating in the program. If admitted, students spend what otherwise would have been their senior year at SNHU taking courses at the law school. After successfully completing those courses, students are awarded the B.A. in Law and Politics (Pre-J.D. Accelerated) at SNHU, then spend two more years at the law school fulfilling the remaining J.D. requirements. Although students fulfill the final 30 credits of their B.A. requirements at the law school, they must earn at least 60 of the credits counted toward the B.A. at SNHU.

Program Outcomes

1. Articulate a theoretically coherent conception of law and politics as distinct but related phenomena, and a theoretically and philosophically coherent conception of the public good
2. Analyze a contemporary national, sub-national, international, or foreign dilemma at the nexus of law and politics and its implications for the public good using tools derived from the social sciences and other relevant fields
3. Identify strategies of political participation that individuals could use to help to resolve that dilemma in the service of the public good, whether as legal or political professionals, private citizens, or both

Law and Politics II (BA)

Description

In developed countries like the United States, law and politics are closely intertwined. At the same time, the globalization of national economies worldwide means that lawyers from common law jurisdictions like the United States and civil law jurisdictions like most developing countries often find themselves working side by side in business transactions, where sharp differences in legal cultures can lead to misunderstandings and miscommunication. The B.A. in Law and Politics (International) at SNHU offers international students an opportunity to explore these issues by providing them with insight into what it means to "think like a lawyer," both in the United States and around the world, as well as a solid foundation in the art and science of politics as practiced in the United States, abroad, and internationally. Students spend their first two years in a law, politics, or other degree program at their home universities, then complete their remaining degree requirements in two years on campus at SNHU. They also take all of their SNHU law and politics courses with their American peers, immersing themselves not just in the legal and political content of their coursework, but in American culture and university life too.

Program Outcomes

1. Articulate a theoretically coherent conception of law and politics as distinct but related phenomena, and a theoretically and philosophically coherent conception of the public good
2. Analyze a contemporary national, sub-national, international, or foreign dilemma at the nexus of law and politics and its implications for the public good using tools derived from the social sciences and other relevant fields
3. Identify strategies of political participation that individuals could use to help to resolve that dilemma in the service of the public good, whether as legal or political professionals, private citizens, or both

Requirements

Transfer Requirement

60 Total Credits

- Complete all of the following
 - NOTE: This program is only for international students who must have 60 approved university credits, 3.0 out of 4.0 GPA, and acceptable TOEFL and IELTS scores. Students must also transfer in a POL-210 course equivalent as part of the admission requirement. If the student is transferring credits from a

Campus Programs

- university that does not offer an introductory American politics course, they must take POL-210 at SNHU in the summer term immediately preceding their first fall term on the SNHU campus.
- 60 credit(s).

Leadership in Public Service (Graduate Certificate)

Description

The Leadership in Public Service graduate certificate focuses on providing students with the opportunity to develop skills in leadership, communication, problem-solving and teamwork. These skills are critical for successfully managing and leading governmental and non-profit organizations. The 4-course (12-credit) program is designed primarily for experienced professionals who are seeking to advance in their public service careers.

Program Outcomes

1. Evaluate business and societal trends in their historical, political, economic, financial, social, cultural, geopolitical, and technological context for the purpose of leading public sector organizations.
2. Establish an environment that is conducive to the development of shared values, attitudes, and beliefs of governmental or non-profit organizations.
3. - Integrate shared leadership, group processes, and organizational learning theories into strategic leadership.

Requirements

Certificate Courses

12 Total Credits

- Complete:
 - OL500 - Human Behavior in Organizations (3)
 - OL670 - Organizational Leadership (3)
 - PAD630 - Foundations of Public Administration (3)
 - PAD631 - Strategic Management in Public Service (3)

Grand Total Credits: **12**

Campus Programs

Liberal Arts (AA)

Description

The Associate in Arts Liberal Arts is a two-year program. Students completing this program may transfer to a four-year liberal arts major or a four-year business program.

Program Outcomes

1. Interpret human cultures and the physical and natural world through the Humanities, Social and Behavioral Sciences, History, and Science, Technology, and Mathematics
2. Communicate effectively in written, verbal, and non-verbal forms for a variety of situations, purposes, and audiences
3. Locate and evaluate relevant information through the use of quantitative and qualitative reasoning and a variety of critical and creative approaches
4. Develop strategies for effective collaboration with individuals of diverse cultures and perspectives in order to reach common goals
5. Apply concepts and practices of civic engagement through the critical examination of relevant issues and reflective consideration of a variety of perspectives
6. Apply critical problem-solving approaches to challenges in academically and professionally relevant situations through the integration of general and field-based knowledge

Requirements

General Education Courses
18 Total Credits

- Complete all of the following
 - Complete:
 - ENG120 - College Composition I (3)

Campus Programs

Liberal Arts (BA)

Description

This is a degree aimed at a student population from abroad. It is a 3+1 program for students who are earning a major at their home institution and want simultaneously to earn a degree from the U.S. It is possible to do so at Southern New Hampshire University through a BA in Liberal Arts. The student enters the program with 90 credits from an approved institution abroad and adds 31 credits from SNHU to complete a 121-credit degree as a Liberal Arts major.

Program Outcomes

1. Analyze artifacts representing various local, national, and/or global cultures
2. Practice the systematic study of social relations, human experiences, and patterns of change
3. Reason and solve quantitative and qualitative problems
4. Demonstrate proficiency of the conventions of Standard English including grammar, spelling, punctuation and mechanics
5. Employ oral presentation skills, including the use of appropriate verbal and nonverbal skills
6. Locate relevant information using multiple modes of inquiry
7. Identify a developing sense of self as a learner
8. Distinguish the practical and intellectual characteristics of a liberal arts discipline
9. Appraise the value of multiple perspectives in order to work in complex and diverse environments

Requirements

Transfer Requirement
90 Total Credits

- Complete all of the following
 - NOTE: This program is only for international students who must have 90 approved university credits, 3.0 out of 4.0 GPA, and acceptable TOEFL and IELTS scores.
 - 90 credit(s).

Foundation Courses
0 Total Credits

- Complete:
 - ENG070 - Academic Writing and Research Skills (3)
 - ENG071 - Critical Reading Skills (3)
 - ENG072 - Grammar Workshop (3)
 - ENG099I - Fundamentals of Writing for International Students (3)

General Education Courses
18 Total Credits

- Complete all of the following
 - 18 credit(s) from: General Education
- Must include:
- ENG120 - College Composition I (3)
 - ENG200 - Sophomore Seminar (3)
 - One (1) General Education course must be from Mathematics (FMAT).
 - One (1) General Education course must be from Fine Arts and Humanities (EFAH).
 - One (1) General Education course must be from Social and Behavioral Sciences (ESBS).
 - One (1) General Education course must be from Science, Technology, and Mathematics (ESTM).

Concentration Courses
12 Total Credits

- 12 credit(s) from the following type of course(s):
An approved subject with a minimum of two (2) courses within in the range of course numbers 200 - 499

Grand Total Credits: **120**

Mathematical Modeling (Minor)

Description

The ability to mathematically describe real-world processes has become invaluable in research, industry, and business. A mathematical modeling minor gives students mathematical skills that, in conjunction with their subject area knowledge, allow them to build meaningful and effective mathematical models in their field of interest. The minor emphasizes communication skills, the ability to work in teams, the interplay between subject area knowledge and mathematical models, and the mathematical methods used in deterministic models on both discrete and continuous time scales.

Program Outcomes

1. Communication: Utilize effective oral and written communication strategies in the construction, evaluation, and presentation of mathematical models.
2. Making Meaningful and Reasonable Assumptions: Identify, communicate, and justify assumptions made prior to the model construction phase.
3. Model Construction: Apply mathematical reasoning, analysis, and problem-solving to construct and assess mathematical models that reflect real-world processes.
4. Simulation: Write code in industry-standard software/languages (Matlab, Mathematica, Python, R, etc.) to simulate the behavior of a mathematical model.
5. Mathematical Principles: Analyze and accurately solve mathematical problems across a variety of mathematical areas including calculus, differential equations, and linear algebra.

Requirements

Minor Courses

18 Total Credits

- Complete all of the following
 - Complete:
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT275 - Calculus II: Integration & Series (3)
 - MAT330 - Differential Equations (3)
 - MAT350 - Applied Linear Algebra (3)
 - 2 of the following:
 - MAT431 - Discrete-Time Mathematical Modeling (3)
 - MAT433 - Optimization Modeling (3)
 - MAT440 - BIG Problems in Mathematics (3)

Grand Total Credits: **18**

Mathematics (BA)

Description

The Mathematics major at Southern New Hampshire University gives students a broad background in a wide array of mathematical areas. Students have the opportunity to see the beauty of mathematics, the utility of its applications, and their intersection. The Mathematics major helps students develop strong critical thinking and problem-solving skills. Students pursuing the Mathematics major also elect to either take a concentration or choose courses based on their particular interests. A SNHU graduate with a Mathematics major is prepared for a broad range of careers in quantitative fields including, but not limited to, business, education and government agencies. In addition, the SNHU Mathematics major will serve as strong preparation for students interested in pursuing graduate studies in quantitative fields.

Program Outcomes

1. Utilize effective oral and written communication strategies in the construction, evaluation, and presentation of solutions to mathematical problems
2. Apply mathematical reasoning, analysis, and problem-solving to complex, real world problems including problems in the natural and social sciences
3. Construct and defend clear, rigorous, and logical mathematical proofs
4. Analyze and accurately solve mathematical problems across a variety of mathematical areas including calculus, differential equations, linear algebra, abstract algebra and real analysis

Campus Programs

Mathematics (BA) - Mathematical Modeling (Concentration)

Description

The Mathematical Modeling Concentration gives students mathematical skills and theory in both applied mathematics and statistics that will allow them to build meaningful and effective models in a variety of settings. Mathematical and statistical models can be used, for example, to predict populations of competing species, find optimal strategies to solve games, deblur images, inform targeted marketing campaigns, explain why donors might cut ties with non-profits, flag news stories as fake or disingenuous, or identify gerrymandered congressional districts. Students will become comfortable building and analyzing mathematical and statistical models, working collaboratively both inside and outside of their discipline, and working with industry-standard software.

Requirements

 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT241 - Modern Statistics with Software (3)
 - MAT310 - Number Theory (3)
 - MAT361 - Euclidean and Non-Euclidean Geometry (3)
 - MAT415 - Abstract Algebra (3)

Grand Total Credits: **18**

Mathematics (Minor)

Description

The Mathematics Minor at SNHU is devoted to learning and understanding computational problems in calculus as well as proof and problem solving in pure mathematics. The Mathematics Minor has the following learning outcomes: Demonstrate the capacity to solve computational problems in calculus. Demonstrate the capacity to write proofs and problem solve in pure mathematics. A student may earn a minor in Mathematics by successfully completing the following courses:

Requirements

Minor Courses
12 Total Credits

- Complete all of the following
 - Complete:
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT230 - Discrete Mathematics (3)
 - MAT299 - Mathematical Proof and Problem Solving (3)
 - 1 of the following:
 - MAT415 - Abstract Algebra (3)
 - MAT470 - Real Analysis (3)

Electives
3 Total Credits

- Complete all of the following
 - 3 credit(s) from subject(s): MAT
 - NOTE: MAT 101, MAT 106, MAT 130, MAT 140, MAT 206, MAT 360, MAT 362 are excluded from the elective options.

Grand Total Credits: **15**

Middle School Mathematics (Minor)

Description

The Middle School Mathematics minor at SNHU is for elementary or special education students who desire exposure to the content and pedagogy of middle school mathematics. The courses that comprise the Middle School Mathematics minor integrate knowledge of mathematics, knowledge of teaching, and mathematical knowledge for teaching focusing on the processes of proving and problem solving. A student may earn a minor in Middle School Mathematics by successfully completing the following courses:

Requirements

Minor Courses

15 Total Credits

- Complete all of the following
 - Complete:
 - MAT206 - Math for Elementary Education II (3)
 - MAT230 - Discrete Mathematics (3)
 - MAT299 - Mathematical Proof and Problem Solving (3)
 - 2 of the following:
 - MAT360 - Statistics and Probability for Teachers (3)
 - MAT361 - Euclidean and Non-Euclidean Geometry (3)
 - MAT362 - Algebra for Teachers (3)
 - Course Not Found

Grand Total Credits: **15**

Modern Society (Minor)

Requirements

Minor Courses

15 Total Credits

- Complete all of the following
 - 3 of the following:
 - FAS335 - Romanticism to Impressionism (3)
 - FAS342 - Modernism (3)
 - LIT361 - Modern British Literature (3)
 - LIT363 - Modern American Literature (3)
 - 2 of the following:
 - HIS235 - Modern Russia (3)
 - HIS238 - Modern Germany: 1871 - Present (3)
 - HIS260 - Modern China (3)
 - HIS264 - Modern Japan (3)
 - HIS309 - Dictators in the Modern Era (3)

Grand Total Credits: **15**

Campus Programs

Music (Minor)

Requirements

Minor Courses
15 Total Credits

- Complete all of the following
 - Complete:
 - MUS211 - Music Theory and Aural Skills I (3)
 - MUS223 - Appreciation and History of Music (3)
 - 9 credit(s) from the following:
 - IT205 - Digital Music (3)
 - MUS130 - SNHU Choir (0 - 1)
 - MUS140 - Instrumental Music Ensemble (0 - 1)
 - MUS250 - Private Music Lessons (1)

Grand Total Credits: **15**

Non-Fiction (MFA)

Description

Contact: Prof. Benjamin Nugent, Director The School of Arts and Sciences offers a low-residency graduate program in creative writing. A highly focused course of study, the M.F.A. prepares students to write in their chosen genre (fiction or nonfiction) at a professional level. The M.F.A. is also a terminal degree that provides students a foundation from which to prepare (through internships, work experience, and/or allied areas of study) for employment in the fields of teaching and publishing. With four writing residencies held at the Mountain View Grand Resort in Whitefield, New Hampshire during four semesters of mentored correspondence study, the low-residency M.F.A. at Southern New Hampshire University is also convenient and affordable for working adults. Students study with faculty mentors who are accomplished writers and teachers, participate in lectures, readings, and master classes with visiting writers of national reputation, hone their work through mentor and peer review, read publicly from their own work and meet with publishing professionals in a community dedicated to creative endeavor. Workshop courses run five months and are tailored to students' needs and creative goals. Students work closely with faculty mentors. Individualized study is supplemented with residency periods (seven consecutive days each in June and January) during which mentors and their students meet to review the students' long-term writing projects and to build a community of writers. The second year of the program is devoted to the completion of a manuscript of professional quality, suitable for submission to editors, and a critical essay suitable for submission to literary journals. Graduation is held during the winter and summer residencies following a student's fourth semester. Students who have completed their degree are celebrated as they return for a few days to give public readings and lectures and take part in their graduation ceremony.

Program Outcomes

1. Complete a nonfiction manuscript of professional quality, suitable for submission to editors
2. Understand literary concepts necessary for teaching composition and creative writing and for working in publishing

Requirements

Major Courses
60 Total Credits

- Complete:
 - MFA501NF - Summer Residency I Nonfiction (3)
 - MFA502NF - Winter Residency I Nonfiction (3)
 - MFA503NF - Summer Residency II Nonfiction (3)
 - MFA504NF - Winter Residency II Nonfiction (3)
 - MFA520 - Master of Fine Arts Workshop: Nonfiction Writing I (12)
 - MFA521 - Master of Fine Arts Workshop: Nonfiction Writing II (12)
 - MFA522 - Graduate Nonfiction Workshop III (12)
 - MFA523 - Graduate Nonfiction Workshop IV (12)

Grand Total Credits: **60**

Campus Programs

Nutrition (Minor)

Description

The Minor in Nutrition is designed for students pursuing a variety of majors who also have an interest in nutrition science. The Minor in Nutrition aims to provide expert knowledge about human nutrition and related physiologic principles. The program of study presents current information about topics and issues that concern students such as: a balanced diet, weight management, exercise and sports performance. In addition, the minor explores the social and environmental impact of food we grow and eat and the influence of food systems on public health at a national and global level.

Requirements

Minor Courses
16 Total Credits

- Complete all of the following
 - Anatomy and Physiology
 - Complete 1 of the following
 - Complete:
 - BIO205 - Human Anatomy and Physiology I (3)
 - BIO205L - Human Anatomy and Physiology I Lab (1)
 - Complete:
 - BIO210 - Introduction to Anatomy and Physiology (3)
 - BIO210L - Anatomy and Physiology Lab (1)
 - Complete:
 - BIO303 - Principles of Nutrition (3)
 - BIO310 - Culinary Nutrition Science (3)
 - BIO350 - Nutritional Baking Science (3)
 - BIO360 - Global Nutrition: Challenges and Opportunities (3)

Grand Total Credits: **16**

Philosophy (Minor)

Description

A student may earn a minor in Philosophy by successfully completing the following courses:

Requirements

Minor Courses
15 Total Credits

- 15 credit(s) from subject(s): PHL

Grand Total Credits: **15**

Campus Programs

Physics

Description

The B.S. in Physics at Southern New Hampshire University prepares graduates to understand and address complex physical systems providing a broad interdisciplinary knowledge base, technical expertise, and project based learning. Students receive a solid foundation of core courses and are required to complete a 15 credit project during their junior and senior years in which they work in close collaboration with faculty. Project topics can be chosen from areas of expertise of science faculty in the School of Arts and Sciences or faculty in the College of Engineering, Technology, and Aeronautics. Upon completion of the physics degree students will be prepared to enter the workforce directly or to enter graduate programs.

Program Outcomes

1. Apply appropriate mathematical tools and principles to the analysis of problems and topics in physics.
2. Apply appropriate mathematical tools and principles to the analysis of problems and topics in physics.
3. Draw and communicate defensible conclusions from scientifically rigorous and reliable experiments.
4. Draw and communicate defensible conclusions from scientifically rigorous and reliable experiments.
5. Cultivate a personal sense of curiosity and passion for science by continually asking questions, applying inquiry-driven approaches, and challenging assumptions.

Campus Programs

Requirements

General Education Courses

42 Total Credits

- 42 credit(s) from: General Education

Must include:

- CHM101 - Fundamentals of Chemistry (3)
- MAT225 - Calculus I: Single-Variable Calculus (3)
- MAT275 - Calculus II: Integration & Series (3)

Major Courses

61 Total Credits

- Complete:
 - PHY100 - Topics in Physics (1)
 - PHY215 - Physics I (3)
 - PHY215L - Physics I Lab (1)
 - PHY216 - Physics II (3)
 - PHY216L - Physics II Lab (1)
 - CS113 - Introduction to Programming (3)
 - CS113L - Intro to Programming Lab (1)
 - EG110 - Engineering Design I (3)
 - EG207 - Instrumentation & Measurements (3)
 - EG209 - Thermodynamics I (3)
 - EE220 - Electromagnetics (3)
 - PHY315 - Classical Mechanics I (3)
 - PHY330 - Quantum Mechanics I (3)
 - PHY340 - Modern Physics Laboratory (3)
 - PHY410 - Junior Year Projects (3)
 - PHY420 - Capstone Projects I (6)
 - PHY421 - Capstone Projects II (6)
 - MAT325 - Calculus III: Multivariable Calculus (3)
 - MAT330 - Differential Equations (3)
 - MAT350 - Applied Linear Algebra (3)
 - MAT370 - Numerical Analysis (3)

Major Electives

9 Total Credits

- 9 credit(s) from the following:
 - EG403 - Principles of Photonics (3)
 - PHY318 - Biophysics (3)
 - PHY320 - Optics (3)
 - PHY335 - Plasma Physics (3)
 - PHY336 - Space Physics (3)

Free Electives

9 Total Credits

- 9 credit(s).

Grand Total Credits: **121**

Campus Programs

Policing and Law Enforcement (Certificate)

Description

For students in majors other than the B.S. in Justice Studies, non-matriculated students, part-time students, and other students by approval of Department Chair. This optional 12-credit program is designed for students interested in future careers or graduate study in policing and law enforcement. Students will explore related topics including community policing, police organization and management, and investigative techniques.

Program Outcomes

1. Students completing the Police and Law Enforcement certificate will be able to draw upon theory, research and historical perspective as professionals and apply such into their daily practice
2. Students completing the Police and Law Enforcement certificate will be able to apply and demonstrate their academic and professional skills as effective communicators, critical and independent thinkers, and analytical problem solvers
3. Students completing the Police and Law Enforcement certificate will be socially responsible citizens and professionals who are ethically informed and culturally aware

Requirements

Certificate Courses

12 Total Credits

- Complete:
 - JUS101 - Introduction to Criminal Justice (3)
 - JUS102 - American Policing (3)
 - JUS394 - Problems in Policing (3)
 - JUS465 - Police Organization and Management (3)

Grand Total Credits: **12**

Political Science (Minor)

Description

The Political Science minor at Southern New Hampshire University provides students with a theoretical and practical foundation in the art and science of politics. It emphasizes the development of critical-thinking and analytical skills in political contexts, as well as the ability to communicate effectively both orally and in writing on topics of political concern.

Requirements

Prerequisite Courses

3 Total Credits

- Complete all of the following
 - Complete:
 - MAT240 - Applied Statistics (3)
 - May also take MAT-133. This course may only be available to College of Online and Continuing Education students, but may be taken instead of MAT-240.

Minor Courses

15 Total Credits

- Complete all of the following
 - Complete:
 - POL210 - American Politics (3)
 - POL211 - International Relations (3)
 - SCS224 - Social Science Research Methods (3)
 - 6 credit(s) from subject(s): POL

Grand Total Credits: **18**

Campus Programs

Pre-Law (Certificate)

Description

The Pre-Law Certificate program at Southern New Hampshire University is an interdisciplinary instructional and mentoring program that helps students to prepare for law school by giving them substantial insight into what it means to "think like a lawyer." Although the program is hosted by the School of Arts and Sciences, it is open to students in any undergraduate day school degree program other than students in the B.A. in Law and Politics, the B.A. in Law and Politics (International) for international students, or the B.A. in Law and Politics (Pre-J.D. Accelerated). The Pre-Law Advisor is available to advise students in the Pre-Law Certificate program on all matters related to their preparation for law school and the practice of law. Although the most common undergraduate majors for law students nationwide are political science (Law and Politics at SNHU), history, and English (English Language and Literature at SNHU), the Pre-Law Committee of the American Bar Association ("ABA") does not recommend any particular major or group of courses as the best preparation for law school.* Instead, the ABA recommends that pre-law students take "a broad range of difficult courses from demanding instructors," and "seek courses and other experiences that will engage you in critical thinking about important issues, challenge your beliefs and improve your tolerance for uncertainty." SNHU's Pre-Law Certificate program has been designed with these factors in mind. * American Bar Association. (2018). Pre-Law. Retrieved from https://www.americanbar.org/groups/legal_education/resources/pre_law.html

Program Outcomes

1. Demonstrate substantial insight into what it means to "think like a lawyer" in the United States

Requirements

Minor Courses

21 Total Credits

- Complete all of the following
 - Complete:
 - POL210 - American Politics (3)
 - POL306 - The American Legal Tradition (3)
 - POL336 - Advocacy and the Law (3)
 - 4 of the following:
 - BUS206 - Business Law I (3)
 - BUS307 - Business Law II (3)
 - JUS261 - Judicial Administration (3)
 - JUS375 - Criminal Law (3)
 - JUS376 - Criminal Procedure (3)
 - POL326 - World Legal Traditions (3)
 - POL348 - U.S. Environmental Law and Politics (3)
 - POL349 - Comparative Environmental Law and Sustainable Development (3)
 - SPT307 - Sport Law (3)

Grand Total Credits: **21**

Professional Writing (Minor)

Requirements

Minor Courses

15 Total Credits

- Complete all of the following
 - Complete:
 - COM235 - Multimedia Journalism (3)
 - COM435 - Feature Writing (3)
 - ENG220 - Business Communication (3)
 - ENG350 - The English Language (3)
 - 1 of the following:
 - ENG327 - Playwriting Workshop (3)
 - ENG328 - Poetry Writing Workshop (3)
 - ENG329 - Fiction Writing Workshop (3)
 - ENG330 - Nonfiction Writing Workshop (3)
 - ENG480 - Independent Study (3)

Grand Total Credits: **15**

Campus Programs

Psychology (BA)

Description

Our program stands out from those at other four-year institutions of higher education in that we put students in a position to start engaging in professional activities while they learn. Students are encouraged to participate in field experiences at mental health clinics and social service agencies, publish in Psychological journals and books, present professional papers, administer psychological tests, simulate therapy sessions and/or lead student organizations. Our program includes faculty who have won teaching awards and published books and journal articles. We offer specific concentration areas including child/adolescent development, forensic psychology and mental health. Students also enjoy a variety of extracurricular opportunities. We have a Psychology Student Association and an honors association, Psi Chi. Alumni have attended graduate school or continued on to work (after graduating with a Bachelor of Arts degree) in such areas such as mental health clinics, social service agencies and human resources.

Program Outcomes

1. Assimilate classic and current research within the field of psychology by developing detailed literature reviews and presentations
2. Gather, organize, and analyze acquired knowledge within the field of psychology as evidenced in an e-compendium
3. Develop a conference-level deliverable depicting theoretical or empirical research and how it fits a larger body of knowledge in the research literature of Psychology
4. Evaluate the appropriate research method(s) to use for the problem examined in a theoretical or empirical research project
5. Describe informed conclusions that align with selected research designs and statistical analyses used in an original research project
6. Analyze multifaceted ethical issues associated with the core content areas of psychology as evidenced through the creation of informed consent forms and the use of ethical reasoning applied to dilemmas in research, teaching, counseling, and assessment

Requirements

General Education Courses
42 Total Credits

- 42 credit(s) from: General Education

Must include:

- MAT240 - Applied Statistics (3)

Arts and Sciences Courses
9 Total Credits

- Complete all of the following
 - 3 credit(s) from subject(s): BIO CHM, PHY, or SCI
 - 6 credit(s) from the following:
 - ATH111 - Introduction to Cultural Anthropology (3)
 - BIO110 - Introduction to Public Health (3)
 - BIO320 - Neuroscience (3)
 - BIO325 - Animal Behavior (3)
 - COM212 - Public Speaking (3)
 - COM220 - Intercultural Communication (3)
 - COM340 - Writing for Public Relations (3)
 - ENG350 - The English Language (3)
 - GST100 - Introduction to Women's Studies (3)
 - HIS249 - The Common Good (3)
 - JUS101 - Introduction to Criminal Justice (3)
 - JUS325 - Law, Justice and Family (3)
 - JUS468 - Crimes Against Children (3)
 - JUS485 - Forensic Law (3)
 - LIT239 - Literature and the Mind (3)
 - LIT237 - Young Adult Literature (3)
 - LIT241 - Crime Literature (3)
 - LIT247 - Gender and Text (3)
 - MAT160 - Introduction to Game Theory (3)
 - MAT300 - Applied Statistics II: Regression Analysis (3)
 - MAT434 - Statistical Learning and Classification (3)
 - PHL212 - Introduction to Ethics (3)
 - PHL214 - Formal Logic (3)
 - PHL220 - Death and the Meaning of Life (3)
 - PHL222 - Happiness and the Good Life (3)
 - POL210 - American Politics (3)
 - POL306 - The American Legal Tradition (3)
 - SCI215 - Contemporary Health (3)
 - SOC112 - Introduction to Sociology (3)
 - SOC213 - Sociology of Social Problems (3)

Campus Programs

- SOC317 - Sociology of the Family (3)
- SOC320 - Sociology of Gender (3)
- SOC326 - Sociology of Deviant Behavior (3)
- Course Not Found

Major Courses
24 Total Credits

- Complete all of the following
 - Complete:
 - PSY108 - Introduction to Psychology (3)
 - PSY223 - Research I: Statistics for Psychology (3)
 - PSY224 - Research II: Scientific Investigations (3)
 - PSY444 - Senior Seminar in Psychology (Capstone) (3)
 - 4 of the following:
 - PSY211 - Lifespan Development (3)
 - PSY215 - Abnormal Psychology (3)
 - PSY216 - Psychology of Personality (3)
 - PSY257 - Social Psychology (3)
 - PSY300 - Biopsychology (3)
 - PSY305 - Cognitive Psychology (3)

Major Electives or choose a Concentration
12 Total Credits

- 12 credit(s) from subject(s): PSY within the range of course numbers 200 - 399

Free Electives
33 Total Credits

- 33 credit(s).

Grand Total Credits: **120**

Psychology (BA) - Child and Adolescent Development (Concentration)

Requirements

Concentration Courses
12 Total Credits

- Complete all of the following
 - Exception(s):
 - PSY211 - Lifespan Development (3)
 - NOTE: PSY 211 is required within the major courses section for students who choose the Child and Adolescent Development concentration.
 - Complete:
 - PSY321 - Child Development (3)
 - PSY322 - Adolescent Development (3)
 - 6 credit(s) from the following:
 - PSY201 - Educational Psychology (3)
 - PSY291 - Experiential Learning (3)
 - PSY314 - Disorders of Childhood and Adolescence (3)
 - PSY315 - Counseling Process and Techniques (3)
 - PSY319 - Social Development: Child and Adolescent (3)
 - PSY335 - Assessment and Testing (3)
 - PSY443 - Psychology Internship (0 - 15)
 - PSY480 - Independent Study (3)
 - May also include PSY 230, SNHU 290, and SNHU 495 in the above selection. These courses are no longer offered or they are only available to College of Online and Continuing Education students, but may be taken in conjunction with the electives currently offered by University College.

Grand Total Credits: **12**

Psychology (BA) - Forensic Psychology (Concentration)

Requirements

Concentration Courses

12 Total Credits

- Complete all of the following
 - Complete:
 - PSY205 - Forensic Psychology (3)
 - PSY310 - Criminal Psychology (3)
 - 2 of the following:
 - PSY257 - Social Psychology (3)
 - PSY315 - Counseling Process and Techniques (3)
 - SOC324 - Sociology of Crime and Violence (3)

Grand Total Credits: **12**

- 3 credit(s) from subject(s): PSY

Grand Total Credits: **15**

Public Health and Wellness (Minor)

Description

This interdisciplinary minor explores how health can be maintained or improved through preventative strategies. Rather than wait for health complications to happen, how can individuals and communities be proactive in preventing chronic illness, infectious disease, and addictions? Coursework covers best practices based on current research in Psychology and Public Health. Students in any major will benefit from the training this program will provide in epidemiology, health policy and management, community and clinical prevention initiatives, surveillance and tracking, immunizations and screenings, and drug prevention. Students should be aware that some courses in this minor carry prerequisites.

Requirements

Prerequisite Courses
3 Total Credits

- Complete:
 - PSY108 - Introduction to Psychology (3)

Minor Courses
15 Total Credits

- Complete all of the following
 - Complete:
 - PSY225 - Health Psychology (3)
 - SCI215 - Contemporary Health (3)
 - 9 credit(s) from the following:
 - BIO110 - Introduction to Public Health (3)
 - BIO120 - General Biology I (3)
 - BIO120L - General Biology I Lab (1)
 - BIO210 - Introduction to Anatomy and Physiology (3)
 - BIO210L - Anatomy and Physiology Lab (1)
 - BIO215 - People, Places, and Plagues (3)
 - BIO340 - Human Health and the Environment (3)
 - CHM200 - Environmental Chemistry (3)
 - PSY300 - Biopsychology (3)
 - SCI333 - Waste: Sources, Reduction, & Remediation (3)
 - NOTE: Courses with labs are considered one course.

Grand Total Credits: **18**

Public Relations (Minor)

Description

A student may earn a minor in Public Relations by successfully completing the following courses:

Requirements

Minor Courses
15 Total Credits

- Complete:
 - COM227 - Public Relations (3)
 - COM310 - Social Media (3)
 - COM340 - Writing for Public Relations (3)
 - COM452 - Public Relations Campaign Planning Seminar (Capstone) (3)
 - MKT113 - Introduction to Marketing (3)

Grand Total Credits: **15**

Campus Programs

Race and Ethnicity (Minor)

Requirements

Minor Courses
15 Total Credits

- 15 credit(s) from the following:
 - HIS254 - Civil Rights Movement (3)
 - HIS260 - Modern China (3)
 - HIS264 - Modern Japan (3)
 - HIS330 - Civil War and Reconstruction (3)
 - HIS357 - American Slavery (3)
 - HOS220 - Geography of Global Cultures (3)
 - INT316 - Cultural & Political Environment of International Business (3)
 - LIT328 - Multi-Ethnic Literature: Describing the Hyphen (3)
 - LIT350 - The Black Literary Tradition (3)
 - PHL230 - Religions of the World (3)
 - SOC207 - Exploring Racial and Cultural Identity (3)
 - SOC490 - Community Sociology Internship (0 - 15)

Grand Total Credits: **15**

Social Media and Mental Health (Minor)

Description

This minor explores social media as it relates to mental health and well-being, including consideration of social media addiction, social comparison, cyberbullying, feelings of inclusion/exclusion, and multitasking. This minor also facilitates investigation into how social media can be used as a tool to promote positive mental health outcomes. Students should be aware that some courses in the minor carry prerequisites.

Requirements

Minor Courses

- Complete all of the following
 - Complete:
 - COM310 - Social Media (3)
 - PSY215 - Abnormal Psychology (3)
 - PSY257 - Social Psychology (3)
 - PSY305 - Cognitive Psychology (3)
 - SOC335 - Technology and Society (3)
 - 3 credit(s) from the following:
 - PSY443 - Psychology Internship (0 - 15)

Grand Total Credits: **18**

Sociology (BA)

Description

Sociology is the scientific study of social life and the causes and consequences of human behavior, social groups, and societies. The term social life encompasses all interpersonal relationships, all groups, all types of social organizations, and all human culture; past and present. We want our majors to experience Sociology. Our emphasis is on professional practices as well as scholarship, with a career orientation and experiential learning approach. We provide first-person experiences in analyzing and dealing with processes, problems and institutions of society. In a world of globalization and cultural diversity, Sociology is of increased practical importance in many career paths. Partnering with community organizations, the Sociology major emphasizes a hands-on approach to learning. Graduates of our program seek employment in social services and counseling, management and administrative support, teaching, research, sales, marketing, public relations, criminal justice positions, and many other fields. Our program also prepares students to continue their education to obtain a graduate degree in Sociology or in other areas: for example, entrance into law school or a MBA program

Campus Programs

Program Outcomes

1. Analyze group behavior through current and emerging sociological theory for a broader understanding of society
2. Analyze and employ appropriate sociological research to critically assess published research and develop sociological research proposals that address contemporary social issues
3. Evaluate the social construction of realities for their impact on human social interactions and their consequences across cultures
4. Develop sociological questions demonstrating versatility of thought and problem-solving skills in addressing contemporary social issues, employing ethical and professional communication of sociological information
5. Cultivate the sociological perspective in communicating research interests and career goals in the social sciences
6. Analyze social structures and processes within social institutions for recognizing patterns and relationships across cultures

Requirements

General Education Courses

42 Total Credits

- 42 credit(s) from: General Education

Must include:

- ATH111 - Introduction to Cultural Anthropology (3)
- GEO200 - World Geography (3)

Sociology (Minor)

Description

A student may earn a minor in Sociology by successfully completing the following courses:

Requirements

Minor Courses
15 Total Credits

- Complete all of the following
 - Complete:
 - SOC112 - Introduction to Sociology (3)
 - SOC213 - Sociology of Social Problems (3)
 - 9 credit(s) from subject(s): SOC

Grand Total Credits: **15**

Statistical Modeling (Minor)

Description

In a world where data has quickly gone from a scarce resource to an abundant one, statistical tools are rapidly evolving. In the age of "big data", "data science", and "data analytics" individuals who are trained to build and interpret statistical models are in high demand. Through this minor, students experience the data tidying process, visual story-telling with data using the grammar of graphics, and will also build, analyze, and interpret both competing regression models and classification models (in supervised and unsupervised settings). Students gain exposure to the theory behind, and application of, advanced techniques for modeling uncertainty with data.

Program Outcomes

1. Utilize effective oral and written communication strategies in the construction, evaluation, and presentation of statistical models.
2. Obtain and clean data sets, engineering new features where appropriate.
3. Identify, communicate, and justify assumptions made prior to the model construction phase.
4. Apply mathematical and statistical reasoning, analysis, and problem-solving to hypothesize and construct meaningful models that reflect real-world processes.
5. Identify strengths and weaknesses of particular model types; use a variety of criteria to choose between competing models; and utilize models for both prediction accuracy and interpretive value.

Requirements

Minor Courses
15 Total Credits

- Complete all of the following
 - Complete:
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT300 - Applied Statistics II: Regression Analysis (3)
 - MAT350 - Applied Linear Algebra (3)
 - MAT434 - Statistical Learning and Classification (3)
 - 1 of the following:
 - MAT240 - Applied Statistics (3)
 - MAT241 - Modern Statistics with Software (3)

Sustainability (Certificate)

Description

In today's world, it's essential to go green, which means living and working sustainably. Public opinion, political pressure, emerging business opportunities, and ecological realities have created sustainability-focused career options in nearly every major job sector. The Sustainability Certificate at SNHU provides students with the knowledge, skills, and practical experience needed to succeed in these careers. Our program blends insights from environmental science, the environmental social sciences, and other sustainability-focused fields into a uniquely practical learning experience that is more than merely interdisciplinary. Its many one-of-a-kind features are designed to meet the demand for sustainability-focused professionals of many different types in today's job market, especially in the private sector. The Sustainability Certificate is especially for students pursuing bachelor's degrees in SNHU's School of Business or enrolled in other complementary SNHU degree programs, such as the base program or any concentration of B.S. in Environmental Science other than the Compliance and Sustainability Concentration. It also is open to anyone not already enrolled in a degree program at SNHU who is interested in earning a stand-alone undergraduate certificate in the sustainability field.

Program Outcomes

1. Analyze an environmental sustainability dilemma in a private sector, public sector, or non-profit sector context using tools derived from the natural and social sciences and other relevant fields, with an emphasis on the social sciences
2. Develop a practical, supradisciplinary strategy for managing that dilemma so as to support both stewardship of the natural environment and long-term improvement in the human condition

Requirements

Certificate Courses

21 Total Credits

- Complete all of the following

Teaching English as a Foreign Language (MS)

Description

The M.S. TEFL degree at SNHU is designed for people teaching or intending to teach English in foreign school systems, language schools, corporations, etc., but is also appropriate for those who wish to teach in similar situations here in the United States. Opportunities for teaching English in other countries are numerous and increasing yearly as English continues to be the preferred language for many professions and a requirement in many foreign school systems, beginning as early as primary school. A master's degree in teaching English as a foreign language is the degree of choice for overseas employment. Methodologies for all types of teaching situations are integrated into the curriculum, as well as strategies for teaching learners of all ages. Twelve courses are required (including supervised practice teaching) for a total of 36 credits. The degree program is offered over four terms and can be completed within 12 months (full-time), though most students take longer (up to 18 months). Participants in the M.S. TEFL program have the opportunity to observe classes throughout the Greater Manchester area and in the year-round Intensive English Program offered by The Institute for Language Education.

Program Outcomes

1. Summarize and critically evaluate journal articles (verbally or in writing), reflecting on the practical implications for the classroom
2. Choose appropriate methodologies and strategies for particular teaching contexts(e.g., age, level of ability, mono-/multicultural settings, large/small class sizes)
3. Design and implement practical, relevant, and effective curricula and lesson plans that address student learning goals and program objectives
4. Model ethical, culturally-sensitive, and appropriate personal and professional behavior across the teaching and learning environment
5. Conduct basic research and prepare classroom and conference presentations
6. Prepare and produce clear and comprehensible written assignments (papers, curricula, lesson plans, etc.) and oral presentations (microteaching, chapter summaries, student-led discussions, etc.)
7. Apply effective leadership strategies for promoting student advocacy and instilling a student-centric educational culture

Requirements

Major Courses
36 Total Credits

- Complete all of the following
 - Complete:
 - EFL501 - Language Learning and Acquisition (3)
 - EFL502 - Evaluation and Assessment (3)
 - EFL503 - Descriptive Linguistics of American English (3)

 - EFL531 - Pronunciation Techniques (3)
 - EFL536 - Content-Based Instruction (3)
 - EFL537 - Computer-Assisted Language Learning (3)

Grand Total Credits: **36**

Campus Programs

Teaching of Composition (Graduate Certificate)

Description

In this graduate certificate program, two students in UC's Mountainview Low-Residency MFA in Fiction and Nonfiction receive a semester of training in the teaching of composition, MFA-555, in the MFA program's fall semester, SIX01. In addition to receiving instruction in the teaching of composition, they observe and assist instructors in fall composition classes on campus, and tutor in the Writing Center. The students are not charged tuition beyond the regular Mountainview MFA tuition. In the spring semester, SIX02, each student teaches a spring section of ENG-120 or ENG-200 on campus, depending on the availability of sections. For teaching this class, the students will be paid at half the normal rate of an adjunct instructor. After the student has successfully completed teaching a section of ENG-120 or ENG 200, following the successful completion of MFA-555, the student will receive a Graduate Certificate in the Teaching of Composition. The student can then enter the UC SAS adjunct pool, teaching sections of ENG 120 and ENG 200 at the normal adjunct rate while still earning an MFA. Because this program requires regular trips to campus, it should be undertaken by Mountainview students who live within commuting distance of Manchester.

Program Outcomes

1. Gain experience and training in the teaching of composition and rhetoric at the college level
2. Develop a portfolio of syllabi and assignments that can be applied to teaching composition and rhetoric

Requirements

Certificate Courses
12 Total Credits

- Complete:
 - MFA555 - Writing Program TA Colloquium (6)
 - MFA557 - Teaching with Observation and Feedback (6)

Terrorism and Homeland Security (Certificate)

Description

For students in majors other than the B.S. in Justice Studies, non-matriculated students, part-time students, and other students by approval of Department Chair. This optional 12-credit program is designed for students interested in future careers or graduate study in the area of terrorism, homeland security, or intelligence. Students explore related topics including terrorist organizations, terrorist tactics, and response by homeland security organizations.

Program Outcomes

1. Students completing the Terrorism and Homeland Security certificate will be able to draw upon theory, research and historical perspective as professionals and apply such into their daily practice
2. Students completing the Terrorism and Homeland Security certificate will be able to apply and demonstrate their academic and professional skills as effective communicators, critical and independent thinkers, and analytical problem solvers
3. Students completing the Terrorism and Homeland Security certificate will be socially responsible citizens and professionals who are ethically informed and culturally aware

Accounting and Finance - Degree in Three (BS)

Campus Programs

Description

The Degree-in-Three Accounting/Finance program is an innovative and integrated three-year, six semester, outcomes focused degree in accounting/finance that allows students to earn a Bachelor of Science degree through a blend of traditional and non-traditional curricula. Students are provided with varied academic experiences that not only include core courses but also non-seat time experiences beyond the classroom. This interdisciplinary approach merges business disciplines as well as the liberal arts, allowing students to put theoretical knowledge and theory into business experiences inside and outside of the classroom. Speaker events, seminars, community engagement experiences and team-based semester projects are just some of the unique learning environments afforded to students in this Degree-in-Three program.

Program Outcomes

1. Identify long-term corporate investment opportunities to increase shareholder value
2. Apply theories of asset allocation, security analysis, & portfolio diversification to efficiently manage an investment portfolio.
3. Demonstrate knowledge of the rules and regulations for financial accounting and reporting and how they are established in a global economy.

Business Administration (BBA)

Description

The past two decades have generated unparalleled change in business, industry and society. Emerging trends suggest that change is going to continue to be rapid, unpredictable at times and frequently disruptive. As business and society have grown more complex, the demand for trained managers and leaders has increased. Managers no longer can make business decisions based on hunches or look to old solutions to solve new problems. Students in the Business Administration Program will learn how to be leaders and managers in this ever-changing and hectic business environment. Southern New Hampshire University's Business Administration Program emphasizes leadership, communication, accounting, behavioral dynamics and quantitative analysis. These business and management skills, when complemented with the solid foundation provided by the B.A./B.S. Core courses, enable students to become successful managers.

Program Outcomes

1. Interpret business & societal trends in historical, political, economic, financial, social, cultural, geopolitical, technological context for purpose of leading a business unit.
2. Apply cross-cultural awareness & sensitivity designed to facilitate the creation of shared values, attitudes, beliefs.
3. Apply social and emotional awareness for the purpose of fostering shared leadership, group process, organizational learning.
4. Integrate ethical principles & core personal values into business decision-making.
5. Employ change management theories & concepts in various organizational contexts.

Campus Programs

Business Administration (BS)

Description

The Bachelor of Science in Business Administration emphasizes interpersonal skills, strategic problem solving, and operational principles. Students will gain a strong, comprehensive business education, becoming resourceful and creative thinkers in diverse, professional environments. A hallmark of the degree is the opportunity to apply theoretical knowledge and business skills gained in the program both inside and outside the classroom. Experiential learning opportunities such as simulations and internships are available in some cases to provide additional engagement and help students learn the importance of teamwork, adaptability, and agility in a business context. Additionally, students may benefit from valuable networking opportunities with the alumni community, industry professionals, and regional business partners. Business clubs and professional groups are available to students who would like to connect with faculty and peers and hone their skills. Through the study of problem-solving, communication, collaboration, innovation, and data-informed decision-making, students are prepared to be entrepreneurial thinkers and decision-makers in fast paced, complex environments. Students gain confidence in identifying business opportunities using current tools and technologies, leveraging data to address business needs, and collaborating effectively in a variety of situations. The program's core courses provide a well-rounded business administration foundation, and students have the opportunity to dive deeper into specific disciplines to enhance their skill-sets and prepare them to enter a variety of professional fields. In some cases, students may also work with faculty to create a customized pathway in conjunction with the foundation that builds skills to support them in achieving their personal and professional goals. Additionally, the flexibility of elective courses offered in both online and campus based experiences allow students to further explore customizing their educational experience.

Program Outcomes

1. Develop business management approaches that align with organizational philosophies and help build collaborative relationships with diverse teams
2. Problem-solve across functional areas by integrating personal values with ethical, legal, and socially responsible business practices
3. Articulate implications of global and societal contexts on business decisions
4. Recommend strategic and creative business options using data gathered through research and current technological applications
5. Communicate effectively to diverse internal and external audiences to contribute to a positive team climate and address various strategic and operational business needs

Requirements

General Education Courses
42 Total Credits

- 42 credit(s) from: General Education

Must include:

- ECO201 - Microeconomics (3)
- MAT240 - Applied Statistics (3)

Grand Total Credits: **15**

Business Administration (BS) - Finance (Concentration)

Description

The Bachelor of Science in Business Administration concentration in Finance provides students with an overview of financial management for both organizations and individuals that includes various financial planning strategies and investment vehicles. Students analyze quantitative and qualitative data to address a variety of financial scenarios. Students are introduced to corporate finance in a global setting and examine the effects that exchange rate volatility, international risk, and macroeconomic fluctuations have on financial planning and decision-making.

Concentration Outcomes

1. Analyze various types of financial information to make informed corporate and personal financial decisions

Requirements

Concentration Courses
15 Total Credits

- Complete:
 - FIN250 - Personal Financial Planning (3)
 - FIN330 - Corporate Finance (3)
 - FIN340 - Fundamentals of Investments (3)
 - ECO306 - Money and Banking (3)
 - FIN336 - Multinational Corporate Finance (3)

Grand Total Credits: **15**

Campus Programs

Business Administration (BS) - Global Business (Concentration)

Description

The five-course concentration in Global Business provides students with the competencies and knowledge to understand the challenges facing managers and to allow them to operate successfully in the global environment. This concentration provides knowledge supporting both international business and international trade. The concentration covers four distinct areas: Global Management; Trade Finance; Global Marketing; and International Supply Chain Management. Students also receive practical information on import and export activities. The campus-based Bachelor of Science Global Business Concentration can help to educationally prepare you for the professional Certified Global Business Professional (CGBP) exam offered by NASBITE International. Students cannot earn the CGBP certification through SNHU; however, the University is a participant in the CGBP Student Pathway Program, and the content of the concentration aligns with the four primary domains of the exam: Global Business Management, Global Marketing, Supply Chain Management, and Trade Finance. Please note that completion of the Global Business Concentration program does not guarantee certification. Students must successfully pass the Certified Global Business Professional exam offered by NASBITE.

Concentration Outcomes

1. Identify effective risk management strategies that address the various commercial, political, legal, financial, and cultural risks associated with international trade, contractual relationships and investments.
2. Analyze potential international business opportunities using quantitative and qualitative data and research.
3. Evaluate how the interaction between cultural, economic, legal, political, and business practices impact organizations in the international environment.
4. Apply legal and ethical principles to international business activities.
5. Integrate interdisciplinary practices and principles into management decisions in a global environment.
6. Apply interdisciplinary knowledge in the areas of management, trade finance, marketing, supply chain management to take the NASBITE Certified Global Business Professional exam.

Requirements

Concentration Courses
15 Total Credits

- Complete:
 - INT222 - Trade Finance (3)
 - INT315 - International Management (3)
 - INT335 - Importing & Exporting in International Trade (3)
 - INT433 - Multinational Marketing (3)
 - QSO330 - Supply Chain Management (3)

Grand Total Credits: **15**

Business Administration (BS) - Healthcare Administration (Concentration)

Description

The Bachelor of Science in Business Administration concentration in Healthcare Administration introduces students to various areas and management of healthcare organizations. Students explore sector specific topic coverage in economics, reimbursement, delivery, and quality management, as well as the role of ethics and legal considerations in healthcare.

Concentration Outcomes

1. Promote dynamic organizational cultures that establish strategic visions, methodically analyze and interpret data based on sound healthcare delivery and statistical principles, and embrace change for continuous health care quality improvement

Requirements

Concentration Courses
15 Total Credits

- Complete:
 - HCM320 - Healthcare Economics (3)
 - HCM340 - Healthcare Delivery Systems (3)
 - HCM345 - Healthcare Reimbursement (3)
 - IHP420 - Ethical and Legal Considerations of Healthcare (3)
 - IHP430 - Healthcare Quality Management (3)

Grand Total Credits: **15**

Campus Programs

Business Administration (BS) - Hospitality Business (Concentration)

Business Administration (MBA)

Description

Today's business environment requires professionals to rapidly adapt to change, strategically assess resource constraints, and provide solutions to complex problems related to customers or clients, staff, structure, operations, and shareholders. A demand exists for business professionals that possess the skills and abilities necessary to effectively make well-informed and strategic decisions to better position their company within the market. The Master of Business (MBA) program is designed for professionals seeking the tools, knowledge, and analytical skills needed for effective business analysis, decision making, and management in a wide variety of industries and organizations. Your experience will include navigating between the ups and downs of a volatile business world. The MBA program is built around principal areas that are necessary to acquire specific knowledge and skill sets for guiding your business career. The curriculum approach is an integrated one providing an opportunity for immediate application of knowledge from course to course resulting at the end in a fully implementable business plan. This holistic experience allows you to work on all aspects involved in the development and implementation of an entrepreneurial or intrapreneurial business idea or solution. As a graduate of the MBA program, you will leave with: Knowledge of a Specific Discipline: Whether you are interested in finance, marketing, accounting, or another discipline, you are able to customize your MBA program around your interests through selection of a concentration area. Effective Research Strategies: You will learn how to effectively gather, organize, and analyze data and information from a variety of sources. Interpersonal Communication Skills: Through written and oral presentations, you will sharpen your ability to connect with people from different cultures and with different perspectives. Greater Business Awareness: By learning about customs and practices, you will expand your understanding of the business arena, and you will be better equipped to compete in the local and global marketplace. Thorough Understanding of Critical Business Areas: You will discover how to take a holistic view of business areas by factoring in internal and external influences on decision making such as politics, ethics, law, economic policies, and cultural beliefs, etc. Foundational coursework may be required for those with an undergraduate degree in a non-business discipline. A bachelor's degree with a minimum GPA of 2.75 or higher is required.

Program Outcomes

1. Analyze primary and secondary data using quantitative and qualitative techniques and information technology skills for effective problem solving and decision making
2. Lead and operate within cross-functional teams in complex and diverse business environments
3. Demonstrate oral and written communication skills to effectively articulate thoughts and intentions in diverse business environments
4. Integrate cross-cultural, economic, geopolitical and systems knowledge to solve complex business problems in a global environment
5. Incorporate legal and ethical conduct, and corporate social responsibility in making sustainable business decisions
6. Create intrapreneurial and entrepreneurial opportunities in a global environment that add value to an organization through the integration, synthesis, and application of business practices

Campus Programs

Requirements

Foundation Courses

0 Total Credits

- Complete all of the following
 - Complete:
 - MBA501 - Mathematics and Statistics for Business (3)
 - MBA502 - Economics for Business (3)
 - MBA503 - Financial Reporting and Analysis (3)
 - MBA610 - Business Law (3)
 - OL500 - Human Behavior in Organizations (3)
 - If you are required to take these courses, you may use the courses as General Business Electives if you have General Business Electives required for your program. You will only receive credit ONCE for these courses even though they satisfy the additional requirement of General Business Electives.

Major Courses

27 Total Credits

- Complete:
 - MBA515 - Business Environment, Innovations and Entrepreneurship (3)
 - MBA520 - Accounting and Financial Analysis (3)
 - MBA550 - Leading in an Organization (3)
 - MBA560 - Marketing and Strategy (3)
 - MBA635 - Ethics, Corporate Culture, and Social Responsibility (3)
 - MBA640 - Finance, Economics, and Decision Making (3)
 - MBA665 - Government Impact on Business (3)
 - MBA690 - Operations Management and Technology (3)
 - MBA705 - MBA Capstone (3)

Major Electives or choose a Concentration

9 Total Credits

- 9 credit(s) from subject(s): ACC CED, CSR, DAT, ECO, FIN, HIM, IHP, INT, IT, MBA, MBE, MGT, MKT, PAD, QSO, SEC, SPT, TAX, or WCM within the range of course numbers 500 - 899

Grand Total Credits: **36**

Business Administration (MBA) - Business Analytics (Concentration)

Description

The business analytics concentration includes courses that cover the three major areas in business analytics (descriptive analytics, predictive analytics and prescriptive analytics). The curriculum of the concentration will prepare you for the application of tools and techniques of business analytics.

Concentration Outcomes

1. Interpret data to inform business decisions
2. Gain insights into the business by analyzing historical data
3. Use predictions to improve future business performance

Requirements

Concentration Courses

9 - 10 Total Credits

- Complete:
 - QSO511 - Business Analytics (3 - 4)
 - QSO560 - Descriptive Business Analytics (3)
 - QSO570 - Predictive Business Analytics (3)

Grand Total Credits: **9 - 10**

Campus Programs

Business Administration (MBA) - Finance (Concentration)

Concentration Outcomes

1. Analyze financial data using quantitative and qualitative techniques and information technology skills for effective problem solving and decision-making

Requirements

Concentration Courses
9 Total Credits

- Complete:
 - FIN550 - Corporate Financial Management (3)
 - FIN610 - Short-Term Financial Management (3)
 - FIN640 - Investment Analysis & Portfolio Management (3)

Grand Total Credits: **9**

Business Administration (MBA) - International Business (Concentration)

Description

The MBA with a concentration in International Business enables students to take a deeper look at the opportunities, uncertainties, and risks present in today's increasingly global business environment. Students apply current international business concepts and theories, and integrate real world experiences, to assess global business phenomena in a variety of cultural, political, social and economic contexts. This concentration prepares students to be more effective leaders and managers of domestic and multinational organizations challenged by increasing global competition.

Concentration Outcomes

1. Develop effective strategies for evaluating and managing global business organizations, personnel, and foreign market expansion in various cultural, economic, political, and legal environments

Requirements

Concentration Courses
9 Total Credits

- Complete:
 - INT610 - Multinational Corporate Environment (3)
 - INT640 - International Market Strategy (3)
 - INT650 - Managing International Trade and Finance (3)

Grand Total Credits: **9**

Business Administration (MBA) - Marketing (Concentration)

Description

The MBA concentration in Marketing prepares students for a career in the fast-paced and ever-evolving field of marketing. This concentration provides students with the opportunity to explore market research, advertising, branding, and consumer behavior through various lenses. Students learn how to translate knowledge gained into actionable strategies and implementations within the marketing field.

Concentration Outcomes

1. Integrate, synthesize, and apply business practices in a marketing context for creating intrapreneurial and entrepreneurial opportunities

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - MKT610 - Promotions Management (3)
 - MKT620 - Consumer Behavior and Marketing (3)
 - MKT678 - Brand Management (3)

Grand Total Credits: **9**

Business Administration (MBA) - Operations and Supply Chain Management (Concentration)

Concentration Outcomes

1. Integrate, synthesize, and apply business practices in an operations management context for creating intrapreneurial and entrepreneurial opportunities

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - QSO510 - Quantitative Analysis for Decision Making (3)
 - QSO600 - Operations Management (3)
 - QSO630 - Supply Chain Management (3)

Grand Total Credits: **9**

Business Administration (MBA) - Project Management (Concentration)

Concentration Outcomes

1. Demonstrate specialized knowledge in project management that builds upon and extends the core competencies of effective business administration

Requirements

Concentration Courses

9 Total Credits

- Complete all of the following
 - Complete:
 - QSO640 - Project Management (3)
 - QSO680 - Seminar in Project Management (3)
 - 3 credit(s) from the following:
 - QSO510 - Quantitative Analysis for Decision Making (3)
 - QSO645 - Project Management for PMP® Certification (3)

Grand Total Credits: **9**

Campus Programs

Business Administration (MBA) - Sport Business (Concentration)

Description

The Sport Management Concentration is built on the foundation of the Masters Core Curriculum with added emphasis on the application of Sport Marketing, Analytics, and Partnerships.

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - SPT525 - Sport Licensing and Strategic Alliances (3)
 - SPT608 - Sport Marketing and Media (3)
 - SPT622 - Sport Business Analytics (3)

Grand Total Credits: **9**

Campus Programs

Business Analytics (BS)

Description

Business Analytics is the intersection of data science with business. It has become important with the availability of big data and the real time nature of many business decisions. It helps in making business decisions that are based on hard data that are routinely collected by organizations. Business Analytics consists of three parts – descriptive analytics, predictive analytics and prescriptive analytics. Descriptive analytics analyzes past data in order to gain insights that can be used in future decision making. Predictive analytics goes a step further and tries to predict future behavior. Prescriptive analytics which includes optimization techniques takes the predictions and aids in making decisions that will be optimal for the organization. This program includes courses that cover all the three parts of the business analytics, some foundational courses and courses that help in the implementation of business analytics in an organization. The curriculum of the program is very hands-on and experiential that will prepare you for a successful career in the world of business analytics.

Program Outcomes

1. Acquire in-depth understanding of the fundamental techniques of business analytics
2. Analyze historical data through descriptive analytics to uncover business relationships and gain insights into the business operations
3. Use predictive modeling and analysis to predict future business outcomes and associated risks
4. Use management science techniques to model business problems and determine optimal solutions
5. Manage analytics projects efficiently and effectively by the application of project management techniques

Requirements

General Education Courses

42 Total Credits

- Complete all of the following
 - 39 credit(s) from: General Education
- Must include:
 - ECO201 - Microeconomics (3)
- 1 of the following:
 - MAT240 - Applied Statistics (3)
 - MAT241 - Modern Statistics with Software (3)

Business Core

30 Total Credits

- 30 credit(s) from: Integrated Business Core

Major Courses

21 Total Credits

- Complete:
 - QSO250 - Business Analytics (3)
 - CIS255 - Applied Data Structure and Database (3)
 - QSO260 - Descriptive Analytics (3)
 - QSO320 - Management Science through Spreadsheets (3)
 - QSO340 - Project Management (3)
 - QSO370 - Predictive Analytics (3)
 - QSO382 - Integrating Experience in Business Analytics (3)

Major Electives or choose a Concentration

9 Total Credits

- 9 credit(s) from QSO or CIS within the 100 - 499 range or from the following courses:
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MKT365 - Social Media Marketing Analytics (3)
 - QSO495 - Internship in Business Analytics (0 - 15)

Free Electives

18 Total Credits

- 18 credit(s).

Grand Total Credits: **120**

Business Analytics (BS) - Computer Information Systems (Concentration)

Description

The students will advance their knowledge of business analytics by learning about information systems tools and techniques used in storing, managing and analyzing massive amounts of data generated by business organizations.

Requirements

Concentration Courses
9 Total Credits

- Complete:
 - CIS335 - Business Systems Applications (3)
 - CIS355 - Business Intelligence Applications (3)
 - CIS410 - Enterprise Systems (3)

Grand Total Credits: **9**

Business Analytics - Degree in Three (BS)

Business Analytics (Minor)

Description

Business Analytics is the intersection of data science with business. It has become important with the availability of big data and the real time nature of many business decisions. It helps in making business decisions that are based on hard data that are routinely collected by organizations. Business Analytics consists of three parts – descriptive analytics, predictive analytics and prescriptive analytics. Descriptive analytics analyzes past data in order to gain insights that can be used in future decision making. Predictive analytics goes a step further and tries to predict future behavior. Prescriptive analytics which includes optimization techniques takes the predictions and aids in making decisions that will be optimal for the organization. This program includes courses that provide the foundational quantitative knowledge necessary for business analytics and application courses that cover all three areas of business analytics. The curriculum of the program is very hands-on that will prepare you for a successful career in the world of business analytics.

Requirements

Minor Courses

15 Total Credits

- Complete:
 - MAT240 - Applied Statistics (3)
 - QSO250 - Business Analytics (3)
 - QSO260 - Descriptive Analytics (3)
 - QSO320 - Management Science through Spreadsheets (3)
 - QSO370 - Predictive Analytics (3)

Grand Total Credits: **15**

Campus Programs

Business Analytics (MS)

Description

This program provides a market-relevant combination of a comprehensive education in business analytics with real-world applications. It will give you the knowledge, tools and skills necessary to pursue or accelerate careers in Business Analytics. It includes courses that cover all three areas of business analytics – descriptive, predictive and prescriptive as well as courses that integrate information technologies with data-analytic methods. You will get a chance to work on real-life business analytics projects with area and remote organizations. The electives in the program will provide you the options to do an internship, expand your reach into applications of analytics to functional areas of business and allow you to pursue your special interests. The curriculum of the program is very hands-on and experiential that will prepare you for a successful career in the world of business analytics.

Program Outcomes

1. Apply appropriate business analytics concepts, tools, and methods to address organizational challenges.
2. Integrate business analytics methods with the use of information technologies to extract value from data sets.
3. Provide insight from business analytics methods to inform data-driven solutions to organizational challenges.
4. Professionally communicate business analytics conclusions and recommendations to technical and non-technical audiences using industry-standard written, presentation, and visualization formats.
5. Collaborate in cross-functional teams as a solutions-oriented contributor who brings leadership and sound ethical judgment to projects.

Requirements

Foundation Courses
0 Total Credits

- Complete:
 - MBA501 - Mathematics and Statistics for Business (3)
 - OL501 - Business Foundations (3)

Major Courses
24 Total Credits

- Complete all of the following
 - 3 credit(s) from the following:
 - QSO511 - Business Analytics (3 - 4)
 - Complete:
 - QSO520 - Management Science through Spreadsheets (3)
 - QSO560 - Descriptive Business Analytics (3)
 - QSO570 - Predictive Business Analytics (3)
 - QSO640 - Project Management (3)
 - CIS525 - Applied Data Structure and Database (3)
 - CIS530 - Design of Decision Support Systems (3)
 - QSO705 - Capstone in Business Analytics (3)

Major Electives
12 Total Credits

- 12 credit(s) from subject(s): ACC CIS, CSR, DAT, ECO, EMA, FIN, INT, ISE, IND, MGT, MKT, OL, QSO, SEC, or SPT

Grand Total Credits: **36**

Campus Programs

Business Information Systems (Certificate)

Description

Certificate programs are designed for those individuals who need basic skills for entry-level positions or for employees who want to be promoted or transferred within their organizations.

Requirements

Certificate Courses
23 - 24 Total Credits

- Complete all of the following
 - Complete:
 - IT135 - Interactive Scripting in Virtual Environment (3)
 - MAT230 - Discrete Mathematics (3)
 - 1 of the following:
 - IT105 - Business Information Technology (2)
 - IT210 - Business Systems Analysis and Design (3)
 - 1 of the following:
 - MAT130 - Applied Finite Mathematics (3)
 - MAT140 - Precalculus (3)
 - MAT210 - Applied Calculus I (3)
 - MAT240 - Applied Statistics (3)
 - 12 credit(s) from subject(s): IT

Grand Total Credits: **23 - 24**

Business of Fashion (Minor)

Description

Southern New Hampshire University's Fashion Merchandising and Management program prepares students for the far-reaching demands of the global fashion industry. Students who complete the minor will gain a broad perspective on the business of fashion through hands-on learning experiences in the field.

Program Outcomes

1. Demonstrate an understanding of the contemporary transformation of the fashion products including innovative material and innovative manufacturing and distribution processes
2. Explain the effect of merchandising planning and purchasing on the financial performance of a fashion business unit
3. Track the fashion merchandising process from initial design and manufacturing to the purchase behaviors of resellers and consumers

Requirements

Prerequisite Courses
2 - 3 Total Credits

- 1 of the following:
 - MKT105 - Foundations of Marketing (2)
 - MKT113 - Introduction to Marketing (3)

Minor Courses
15 Total Credits

- Complete:
 - FMM114 - Introduction to Fashion Merchandising (3)
 - FMM204 - Textiles and Color Theory (3)
 - FMM300 - Retail Buying (3)
 - MKT239 - Essentials of Retail Management (3)
 - FMM325 - Sustainability in Fashion (3)

Grand Total Credits: **17 - 18**

Campus Programs

Computer Information Systems (BS)

Description

The Computer Information Systems (CIS) program is an undergraduate major for students who want to design and implement effective solutions to meet organizational and management needs for information and decision support. Graduates of the Computer Information Systems program are poised to take a leading role in shaping our information-based future, in both small and large organizations. Students completing the program through the School of Business will be well grounded in the fundamentals of organization theory, decision making, teamwork and leadership, as well as current and emerging information systems tools and technologies. They will be able to communicate effectively with stakeholders. They will be able to bridge the gap between IT and business units to improve processes and solve challenges now and in the future.

Program Outcomes

1. Utilize business intelligence applications that address a variety of business needs and analyze the underlying data models
2. Analyze existing business information systems and identify new systems to meet an organization's needs
3. Develop communication strategies to bridge the IT and business units, using appropriate terminology and language to assist the units in working together effectively
4. Apply systems analysis and design and project management concepts to develop and implement systems to support an organization's goals

Requirements

General Education Courses

42 Total Credits

- 42 credit(s) from: General Education

Must include:

- MAT240 - Applied Statistics (3)
- ECO201 - Microeconomics (3)

Business Core

30 Total Credits

- 30 credit(s) from: Integrated Business Core

Major Courses

24 Total Credits

- Complete:
 - CIS255 - Applied Data Structure and Database (3)
 - CIS315 - Information System Requirements and Design (3)
 - CIS335 - Business Systems Applications (3)
 - CIS355 - Business Intelligence Applications (3)
 - CIS410 - Enterprise Systems (3)
 - CIS435 - Capstone in Information Systems (3)
 - IT135 - Interactive Scripting in Virtual Environment (3)
 - IT145 - Foundation in Application Development (3)

Major Electives or choose a Concentration

9 Total Credits

- 9 credit(s) from CS CIS, IT, or QSO within the 100 - 499 range or from the following courses:
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT300 - Applied Statistics II: Regression Analysis (3)
 - MAT350 - Applied Linear Algebra (3)

Free Electives

15 Total Credits

- 15 credit(s).

Grand Total Credits: **120**

Computer Information Systems (BS) - Business Analytics (Concentration)

Description

The business analytics concentration includes courses that cover the three major areas in business analytics (descriptive analytics, predictive analytics and prescriptive analytics). The curriculum of the concentration will prepare you for the application of tools and techniques of business analytics.

Concentration Outcomes

1. Acquire in-depth understanding of the fundamental techniques of business analytics
2. Use management science techniques to model business problems and determine optimal solutions
3. Analyze historical data through descriptive analytics to uncover business relationships and gain insights into the business operations

Requirements

Concentration Courses

9 Total Credits

- Complete:

 - QSO260 - Descriptive Analytics (3)
 - QSO370 - Predictive Analytics (3)

Grand Total Credits: **9**

Computer Information Systems (BS) - Project Management (Concentration)

Description

The concentration in Project Management would enable you to acquire the knowledge and skills needed to keep projects on task, on time and on budget. The curriculum traverses from theories of project management to real-world practices applicable to all industries and fields, including marketing, financial services, business administration, information technology, international trade, health sciences, government, construction, and more.

Concentration Outcomes

1. Integrate project management methodologies, tools, and practices for appropriate use in the planning, implementation, and assessment of project that address organizational and stakeholder requirements

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - QSO340 - Project Management (3)
 - QSO345 - Project Management for CAPM® Certification (3)
 - QSO440 - Topics in Project Management (3)

Grand Total Credits: **9**

Computer Information Systems (BS) - Statistical Modeling (Concentration)

Description

In a world where data has quickly gone from a scarce resource to an abundant one, statistical tools are rapidly evolving. This concentration helps students learn the skills necessary to build and interpret statistical models, in the age of "big data," "data science," and "data analytics."

Concentration Outcomes

1. Utilize effective oral and written communication strategies in the construction, evaluation, and presentation of statistical models.
2. Obtain and clean data sets, engineering new features where appropriate.
3. Identify, communicate, and justify assumptions made prior to the model construction phase.
4. Apply mathematical and statistical reasoning, analysis, and problem-solving to hypothesize and construct meaningful models that reflect real-world processes.

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT300 - Applied Statistics II: Regression Analysis (3)
 - MAT350 - Applied Linear Algebra (3)

4. Apply mathematical and statistical reasoning, analysis, and problem-solving to hypothesize and construct meaningful models that reflect real-world processes.

Requirements

Concentration Courses

9 Total Credits

- Complete:
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - MAT300 - Applied Statistics II: Regression Analysis (3)
 - MAT350 - Applied Linear Algebra (3)

Grand Total Credits: **9**

Computer Information Systems (Minor)

Description

The minor in Computer Information Systems provides students foundational knowledge and skills in client systems, SQL programming, data and information management, and business intelligence tools and techniques for reporting.

Program Outcomes

1. Apply information management tools and techniques to mine, compile and analyze data for the purpose of addressing business questions and problems
2. Develop effective communications using audience appropriate terminology to relay complex data and management information systems information to stakeholders

Requirements

Minor Courses

18 Total Credits

- Complete all of the following
 - 1 of the following:
 - MAT240 - Applied Statistics (3)
 - MAT241 - Modern Statistics with Software (3)
 - Complete:
 - CIS255 - Applied Data Structure and Database (3)
 - CIS335 - Business Systems Applications (3)
 - CIS355 - Business Intelligence Applications (3)
 - 6 credit(s) from subject(s): CIS or QSO

Grand Total Credits: **18**

Campus Programs

Culinary and Baking Arts (Minor)

Description

CBA.Minor is designed for the student pursuing a variety of majors and has an interest in culinary and baking arts. Five courses are required for completion and include an array of hands-on labs and discussions both in culinary and baking arts. Students are able to select courses from a variety of genres within the field, from developing fundamental skills and exploring various cuisines to creating artistic showpieces and learning the art of food presentation.

Requirements

Minor Courses

15 Total Credits

- Complete all of the following
 - Complete:
 - CUL135 - Baking Basics: Scratch Baking for the Non-Professional Baker (3)
 - CUL170 - Cooking Basics: Making Your Food Taste Delicious (3)
 - 1 of the following:
 - CUL155 - The Art of Cake (3)
 - CUL245 - Alternative Baking (3)
 - CUL315 - Confectionery Art (3)
 - CUL365 - Introduction to Bread Baking (3)
 - 1 of the following:
 - CUL210 - Cooking Healthy and Delicious (3)
 - CUL260 - The Flavors of Global Cuisines (3)
 - CUL350 - Mixology (3)
 - CUL360 - The Art of Food Presentation and Food Photography (3)
 - 1 of the following:
 - CUL155 - The Art of Cake (3)
 - CUL210 - Cooking Healthy and Delicious (3)
 - CUL245 - Alternative Baking (3)
 - CUL260 - The Flavors of Global Cuisines (3)
 - CUL315 - Confectionery Art (3)
 - CUL350 - Mixology (3)
 - CUL360 - The Art of Food Presentation and Food Photography (3)
 - CUL365 - Introduction to Bread Baking (3)

Grand Total Credits: **15**

Culinary Arts (Minor)

Description

The minor in culinary arts is designed for students pursuing a variety of majors who also have an interest in food and cuisine. The required courses introduce the major cuisines, and develop necessary culinary technical skills and fundamental knowledge of foods and food preparation. Students are able to select elective courses in various cuisines or can explore more theoretical areas of the field through topics including nutrition, mixology, and food photography.

Requirements

Minor Courses

15 Total Credits

- Complete:
 - CUL170 - Cooking Basics: Making Your Food Taste Delicious (3)
 - CUL210 - Cooking Healthy and Delicious (3)
 - CUL260 - The Flavors of Global Cuisines (3)
 - CUL350 - Mixology (3)
 - CUL360 - The Art of Food Presentation and Food Photography (3)

Grand Total Credits: **15**

Campus Programs

Economics and Finance (BS)

Description

The Economics/Finance Program has a dual mission: to examine the behavior of the economy and its relationship to business and government, and to study the funding and investment needs of corporations, individuals and institutions. The primary goal of the program is to establish a solid foundation in the applied and theoretical areas of international and domestic finance, business and economics. Economics/finance majors develop the analytical and quantitative skills needed for corporate and individual financial management and economic modeling and forecasting. Students who choose to major in the Economics/Finance Program will be prepared for careers in industry, financial organizations and government. Many go on to graduate school to continue their studies in economics, finance, other business-related disciplines or law.

Program Outcomes

1. Demonstrate knowledge of basic estimators and their properties.
2. Test hypotheses, forecast, and interpret results using economic data and financial models.
3. Make strategic business decisions based on the application of economic and financial knowledge and tools.
4. Effectively communicate economic and financial issues and opportunities to stakeholders.
5. Critique government policy proposals using concepts such as optimization, equilibrium, and the incentives faced by economic agents.

Requirements

General Education Courses
42 Total Credits

- Complete all of the following
 - 39 credit(s) from: General Education
- Must include:
- ECO201 - Microeconomics (3)
 - 1 of the following:
 - MAT240 - Applied Statistics (3)
 - MAT241 - Modern Statistics with Software (3)

Business Core
30 Total Credits

- 30 credit(s) from: Integrated Business Core

30 Total Credits

- Complete all of the following
 - Complete:
 - ECO301 - Managerial Economics (3)
 - ECO306 - Money and Banking (3)
 - ECO402 - Intermediate Macroeconometrics (3)
 - FIN330 - Corporate Finance (3)
 - FIN340 - Fundamentals of Investments (3)
 - 12 credit(s) from subject(s): ECO or FIN within the range of course numbers 200 - 499
 - 1 of the following:
 - MAT140 - Precalculus (3)
 - MAT210 - Applied Calculus I (3)
 - MAT300 - Applied Statistics II: Regression Analysis (3)

Free Electives
18 Total Credits

- 18 credit(s).

Grand Total Credits: **120**

Campus Programs

Economics and Finance - Degree in Three (BS)

Description

The Degree-in-Three Economics/Finance program is an innovative and integrated three-year, six semester, outcomes focused degree in economics/finance that allows students to earn a Bachelor of Science degree through a blend of traditional and non-traditional curricula. Students are provided with varied academic experiences that not only include core courses but also non-seat time experiences beyond the classroom. This interdisciplinary approach merges business disciplines as well as the liberal arts, allowing students to put theoretical knowledge and theory into business experiences inside and outside of the classroom. Speaker events, seminars, community engagement experiences and team-based semester projects are just some of the unique learning environments afforded to students in this Degree-in-Three program.

Program Outcomes

1. Demonstrate knowledge of basic estimators and their properties.
2. Test hypotheses, forecast, and interpret results using economic data and financial models.
3. Make strategic business decisions based on the application of economic and financial knowledge and tools.
4. Effectively communicate economic and financial issues and opportunities to stakeholders.
5. Critique government policy proposals using concepts such as optimization, equilibrium, and the incentives faced by economic agents.

Campus Programs

Economics and Math (BS)

Description

The Bachelor of Science in Economics and Math at Southern New Hampshire University has a dual mission: to examine the behavior of the economy and its relationship to business and government, and to study the funding and investment needs of corporations, individuals and institutions, all grounded in the foundations of mathematical theory and application. The primary goal of the program is to establish a solid foundation in the applied and theoretical areas of international and domestic finance, business, economics and math. As an Economics and Math major, you will develop the analytical and quantitative skills needed for corporate and individual financial management, economic modeling and forecasting, or be very well prepared to enter a graduate or doctoral program.

Program Outcomes

1. Demonstrate knowledge of basic estimators and their properties.
2. Test hypotheses, forecast, and interpret results using economic data and financial models.
3. Make strategic business decisions based on the application of economic and financial knowledge and tools.
4. Effectively communicate economic and financial issues and opportunities to stakeholders.
5. Critique government policy proposals using concepts such as optimization, equilibrium, and the incentives faced by economic agents.

Campus Programs

Esport (Minor)

Description

Esports is an industry on the rise, with rapid expansion and growth occurring globally and in the U.S. market, alongside the VR/AR and gaming industries. A minor in esport may lead to a specialization in esports that could potentially provide key content knowledge that gives students a leg up in the job market. By studying esports students get exposed to learning about similar aspects from traditional sport including: professional players, teams, uniforms, coaches, managers, agents, leagues, competitions, marquee events, endorsement deals, player transfer fees, color commentators, highlight reels, college scholarships, match fixing, doping, gender related disputes.

Program Outcomes

1. Analyze and examine the various elements found unique to the esport industry.

Requirements

Minor Courses

15 Total Credits

- Complete all of the following
 - Complete:
 - ESPT150 - Introduction to Esport (3)
 - ESPT205 - Esport Streaming and Marketing (3)
 - ESPT315 - Social, Ethical, and Legal Issues in Esports (3)
 - 3 credit(s) from the following:
 - ESPT345 - Esports Practicum (3)
 - SPT491 - Sport Management Internship (0 - 15)
 - 3 credit(s) from the following:
 - COM310 - Social Media (3)
 - GAM205 - Introduction to Games (3)
 - GAM210 - History of Digital Games (3)
 - GRA210 - Fundamentals of Game Design (3)
 - MKT265 - Social Media & Marketing Communications (3)
 - SPT425 - Sport Licensing/Strategic Alliances (3)
 - SPT465 - Global Sport Business (3)
 - SPT491 - Sport Management Internship (0 - 15)

Grand Total Credits: **15**

Fashion Merchandising and Management (BS)

Description

The business of fashion remains impervious to the economic environment. Fashion in the US is a multi-billion dollar industry. Despite economic shifts, people still buy clothing, buyers still choose fashions to sell, and retailers and contract manufacturers still make and sell clothing. Graduates of fashion merchandising management programs must demonstrate the skills, knowledge, and ability required for careers in the field. The Fashion Merchandising and Management program at Southern New Hampshire University fills a niche in the New England fashion education marketplace. It is one of only seven such programs in New England. It provides a strong combination of business, fashion and experiential learning to students enrolled in the program. Students explore the ever-changing fashion industry by investigating how fashion apparel is developed, marketed and distributed. They learn how technological and organizational changes affect the business of fashion. Through field trips, guest speaker series and internships, students develop a broad perspective about the business of fashion. Upon successfully completing the program students develop an understanding of merchandise planning and operation systems.

Program Outcomes

1. Develop fashion merchandise planning strategies that integrate the retailer's positioning, vendor's interests, and plans for generating profit
2. Apply management theories and techniques in the fashion merchandising environment to achieve retail objectives and remain competitive
3. Collect and organize industry data through the use of qualitative and quantitative tools
4. Interpret data to predict influences of fashion trends in the fashion merchandising environment
5. Employ effective decision-making skills to select textile and production sources from both domestic and international markets

Fashion Merchandising and Management - Degree in Three (BS)

Description

The degree in three program gives students the opportunity to experience real world business scenarios of apparel product development, distribution and marketing by working directly with fashion retailers from the field. Situation analyses, case studies and strategic plans will be developed. Students will be required to experience a semester long study abroad at Florence University of the Arts in Florence Italy.

Program Outcomes

1. Develop fashion merchandise planning strategies that integrate the retailer's positioning, vendor's interests, and plans for generating profit.
2. Apply management theories and techniques in the fashion merchandising environment to achieve retail objectives and remain competitive.
3. Collect and organize industry data through the use of qualitative and quantitative tools.
4. Interpret data to predict influences of fashion trends in the fashion merchandising environment.
5. Employ effective decision-making skills to select textile and production sources from both domestic and international markets.

Hospitality Business (BS)

Description

The Hospitality Business program helps prepare students for management and entrepreneurial careers in the hospitality and tourism industry and various other industries where hospitality is essential to the business. While providing quality learning experiences that incorporate hospitality business theory, and practice, the curriculum integrates social and ethical responsibility with a strong emphasis on experiential learning. In addition to a strong foundation of core courses in business and hospitality management, the program provides the unique opportunity for students to pursue concentrations in: Hotel & Resort Management, Restaurant & Beverage Management, and Events & Convention Management. To compliment the robust curriculum and learning environment, the program provides valuable teaching and mentoring support through strategic industry partnerships and a diverse group of qualified faculty who have strong academic credentials and industry experiences. Courses: In addition to general education and business core courses, all students in the program are required to take the hospitality major courses and must declare and complete the course work in one of the three concentrations. Graduation Requirements: In addition to completing the minimum 120 course credits for the Bachelor of Science Degree, all hospitality majors must complete the minimum recommended hours (1000) of work in the hospitality industry and submit a professional portfolio of the Experiential Learning activities. Career Opportunities: The hospitality industry is the second largest employer in the United States. Graduates of the hospitality program acquire the knowledge and skills competencies to build successful management careers in the hospitality industry and related businesses. The industry sectors for management careers include, but not limited to, Hotels & Resorts, Restaurants and Food & Beverage related businesses, Events & Conventions, Cruise & Casinos, Theme Parks & Recreation, Travel & Transportation.

Campus Programs

Hospitality Business - Degree in Three (BS)

Description

This Hospitality Business program provides a unique opportunity to students to graduate with a bachelor of science degree in three years without taking any night, weekend or summer courses. Students have the option to spend a fourth year studying abroad, or participate in an internship or complete a graduate degree. The Hospitality Business program helps prepare students for management and entrepreneurial careers in the hospitality & tourism industry and various other industries where hospitality is essential to the business. While providing quality learning experiences that incorporate hospitality business theory, and practice, the curriculum integrates social and ethical responsibility with a strong emphasis on experiential learning. In addition to a strong foundation of core courses in business and hospitality management, the program provides a unique opportunity for students to pursue specializations in: Hotel & Resort Management, Restaurant & Beverage Management, and Events & Convention Management. To complement the robust curriculum and learning environment, the program provides valuable teaching and mentoring support through strategic industry partnerships and a diverse group of qualified faculty who have strong academic credentials and industry experience. Graduates of the hospitality program acquire the knowledge and skills competencies to build successful management careers in the hospitality industry and related businesses. Courses: Students in the degree- in-three program complete 30 credits of the School of Business and Hospitality major directed out-of-class experiential learning activities. In addition to general education and business core courses, all students in the program are required to take the hospitality major courses and must declare and complete the course work in one of the three concentrations. Graduation Requirements: In addition to completing the required minimum 120 course for the Bachelor of Science Degree, all hospitality majors must complete minimum recommended hours (750) of work in the hospitality industry and submit a professional portfolio of the Experiential Learning activities. Career Opportunities: The hospitality industry is the second largest employer in the United States. The industry sectors for management careers include, but not limited to, Hotels & Resorts, Restaurants and Food & Beverage related businesses, Events & Conventions, Cruise & Casinos, Theme Parks & Recreation, Travel & Transportation.

9 Total Credits

- Complete all of the following
 - 9 credit(s) from subject(s): DAT IT, ISE, or QSO , excluding:
 - DAT500 - Data and Information Management (3)
 - IT500 - Information Technology (3)
 - IT505 - Core Technologies (3)
 - May also include SNHU 690. This course is no longer offered or it is only available through College of Online and Continuing Education, but may be taken in conjunction with the electives currently offered by University College.

Grand Total Credits: **36**

Information Technology (MS) - Business Analytics (Concentration)

Description

The business analytics concentration includes courses that cover the three major areas in business analytics (descriptive analytics, predictive analytics and prescriptive analytics). The curriculum of the concentration will prepare you for the application of tools and techniques of business analytics.

Concentration Outcomes

1. Acquire in-depth understanding of the fundamental techniques of business analytics
2. Use management science techniques to model business problems and determine optimal solutions
3. Analyze historical data through descriptive analytics to uncover business relationships and gain insights into the business operations

Requirements

Concentration Courses
9 - 10 Total Credits

- Complete:
 - QSO511 - Business Analytics (3 - 4)
 - QSO520 - Management Science through Spreadsheets (3)
 - QSO530 - Applied Statistics for Managers (3)

Grand Total Credits: **9 - 10**

Information Technology (MS) - Project Management (Concentration)

Description

The concentration in Project Management would enable you to acquire the knowledge and skills needed to keep projects on task, on time and on budget. The curriculum traverses from theories of project management to real-world practices applicable to all industries and fields, including marketing, financial services, business administration, information technology, international trade, health sciences, government, construction, and more.

Concentration Outcomes

1. Recommend strategies for optimizing production of goods and services based on a detailed analysis of existing processes, resources, and business goals
2. Create, evaluate, and assess project plans to ensure desired project outcomes
3. Evaluate operational and project management environments using quantitative tools and techniques

Requirements

Concentration Courses
9 Total Credits

- Complete:
 - QSO510 - Quantitative Analysis for Decision Making (3)
 - QSO645 - Project Management for PMP® Certification (3)
 - QSO680 - Seminar in Project Management (3)

Grand Total Credits: **9**

Integrated Business Core

Campus Programs

International Affairs (Minor)

Description

This interdisciplinary minor allows students to supplement their knowledge of global business with knowledge and skills related to public administration and non-profit management. This three-pronged program provides knowledge in for-profit, non-profit and governmental activities, providing students with more options in the global marketplace. Students in the Global Business concentration or other concentration areas, who are seeking internships in any of the fields listed above, should consider the Washington Center program that has organizations aligned with the content of the concentration and minor. Students in non-business disciplines will gain knowledge of how business concepts and practices intersect with non-business disciplines.

Program Outcomes

1. Identify effective risk management strategies that address the various commercial, political, legal, financial, and cultural risks associated with international activities for diverse business models in the profit, non-profit and government environments.
2. Evaluate how the interaction between cultural, economic, legal, political, and business practices impact organizations in the international environment.
3. Integrate cross-cultural awareness and sensitivity into communication, negotiation, collaboration, and management practices.
4. Analyze potential international business opportunities using quantitative and qualitative data and research.

Requirements

Minor Courses

15 Total Credits

- Complete:
 - POL211 - International Relations (3)
 - INT265 - Managing Nonprofit Organizations in a Global Environment (3)
 - INT316 - Cultural & Political Environment of International Business (3)
 - INT330 - International Public Administration (3)
 - INT441 - Licensing and Negotiations in the International Arena (3)

Grand Total Credits: **15**

International Business (PhD)

Campus Programs

Description

The Ph.D. in International Business trains highly qualified individuals for careers in academics, consulting environments, and multinational corporations. Such positions require a theoretical understanding of global business operations and a keen interest in applied research. The program strives to meet the interests and needs of full- and part-time students and is flexible enough to accommodate the professional life circumstances of the adult learner. The full-time program also is geared toward international students who are interested in teaching and pursuing research in their own countries and around the world. Admission into the Ph.D. program is competitive. Applicants must have an MBA, MS in International Business or a Master's degree in a related area from an accredited University. In addition to completing an application form that requires a statement of purpose and a fee, applicants must provide:

- Official undergraduate and graduate transcripts with proof of degree conferred (if in progress for a graduate degree, the student may apply before completion, but degree must be conferred before beginning Ph.D. program)
- Official GMAT or GRE score (optional for provisional* admission and required if you are seeking scholarship opportunities)
- Statement of Purpose
- Resume
- Proof of English proficiency (if English is not the applicant's first language). Official TOEFL, IELTS, or PTE score required. If degree earned was entirely taught in English, please contact the International Admissions office to obtain English Proficiency waiver request form. The Ph.D. Admissions Committee will review only completed applications. *Students who are provisionally admitted to the program are not eligible for scholarship. Provisionally admitted students are required to maintain a B+ average in their Ph.D. seminars. Performance of the students who are provisionally admitted are reviewed at the end of the first year. If the provision is lifted, students may apply for scholarship. The scholarship allocations are contingent on student performance and availability of funds and competitively allocated. Program Requirements: Students who are admitted without an MS IB degree or MBA with IB concentration must complete a pre-requisite course prior to taking IB Ph.D. Seminars. Students are required to take eight Ph.D. seminars (including two Advanced Quantitative Analysis Seminars) and four designated 600 or 700 level courses in their minor area of specialization prior to taking the comprehensive exam. Comprehensive Examination: Upon the completion of all course work, doctoral students must enroll in INT 889 (Comprehensive Exam) and sit for a series of comprehensive examinations in international business, research methodology and their minor area of specialization. Dissertation Stage: Each student is assigned a committee, which normally is comprised of two faculty members from the international business area, one from the minor field of specialization, and one who specializes in research methodology. The committee is chaired by a faculty who actively advises/guides the student during the dissertation stage. The dissertation is expected to contribute to the student's chosen field of study. During the dissertation stage, students are required to enroll in a minimum of two Doctoral Dissertation Colloquia (INT 890). These colloquiums provide a forum for students to develop their dissertation research under the supervision of committee chair and help monitor their progress in completing their dissertations. Students are expected to present their dissertation topic proposal and defend their dissertation proposal while they are enrolled in Doctoral Dissertation Colloquia (INT 890). Students move on to the final stage of dissertation after successfully defend their dissertation proposal. At the final stage, students are enrolled in Dissertation Defense (DOC 950) where they finalize their research and defend their dissertation. Upon completion of their research and the final draft of dissertation, students receive approval from their dissertation chair and give an oral presentation to the committee and any other interested individuals. A student must receive approval from all members of the dissertation committee to successfully complete the doctoral program.

Program Outcomes

1. Demonstrate in-depth knowledge of international business theories and theoretical, empirical literature
2. Critically apply theories, methodologies, and knowledge to address fundamental questions in International Business and minor area of specialization
3. Develop independent research skills and pursue research of significance in the discipline or in a minor field of specialization
4. Demonstrate knowledge and application of qualitative and quantitative research methods
5. Demonstrate oral and written communication skills to teach effectively and to present and publish scholarly research.

Marketing (BS)

Campus Programs

Description

The marketing field encompasses activities related to: identifying needs of prospective customers, selecting a target market, designing a product, packaging, pricing, advertising, selling, distributing, and servicing products in both domestic and international markets. It is the driving force in business. Therefore, the degree to which companies are able to do it well and respond to customer needs and wants largely determines their success. Southern New Hampshire University's Marketing Program integrates theory and application. Marketing majors also study general management, finance, organizational behavior, information technology and selected liberal arts courses, ensuring that students learn the tenets of marketing in concert with those disciplines. Domestic and international marketing internships and study abroad programs allow Marketing majors additional opportunities to link marketing theory with practice. Students will also formulate an ePortfolio and a career portfolio which are included in the coursework of the marketing curriculum.

Program Outcomes

1. Utilize primary and secondary data to determine the position of a product in the market
2. Recommend strategies for maximizing both internal and external opportunities through the effective use of the marketing mix
3. Develop strategic marketing plans in alignment with stated missions, objectives, and goals of the organizations
4. Employ effective written and oral communication skills appropriate to the professional marketing context
5. Apply legal and ethical principles to marketing activities
6. Collaborate in cross-functional internal and external environments to ensure the creation, capture, and delivery of value

Marketing - Degree in Three (BS)

Description

The marketing field encompasses activities related to: identifying needs of prospective customers, selecting a target market, designing a product, packaging, pricing, advertising, selling, distributing, servicing products and services in both domestic and international markets. It is the driving force in business. Therefore, the degree to which companies are able to do it well and respond to customer demands largely determines their success. Southern New Hampshire University's Marketing Degree in Three, B.S. program provides students with a challenging fast-paced three-year learning experience that blends a robust general education curriculum with core business and marketing courses along with industry-based experiences that includes a required internship in year three of the program. Throughout the program, each student develops a professional ePortfolio featuring work completed throughout the program. The ePortfolio is a valuable tool students can leverage to market themselves for internship and employment opportunities.

Campus Programs

Program Outcomes

1. Utilize primary and secondary data to determine the position of a product in the market.
2. Recommend strategies for maximizing both internal and external opportunities through the effective use of the marketing mix.
3. Develop strategic marketing plans in alignment with stated missions, objectives, and goals of the organizations.

Operations and Project Management (BS)

Description

Operations Management is the planning and execution of operations (routine work) in the service and manufacturing worlds, including demand forecasting, production planning, inventory control, quality management, and supply chain collaboration. Project Management is the planning and execution of projects (non-routine work) in the service and business worlds, including project initiating, project planning, project executing, project monitoring and controlling, and project closing. Efficient management of operations and projects is of utmost importance for both the success and survival of a firm. This program is designed for students interested in the production of goods and services and the application of quantitative methods to solve business problems. The program also serves students interested in planning and executing a variety of projects in service and manufacturing firms. The program helps students to pursue careers such as Operations Analyst/Manager, Project Analyst/Coordinator/Manager, Supply Chain Analyst/Manager, Production Planner, Logistics Engineer, Distribution Analyst/Manager, Purchasing Analyst/Manager, Inventory Control Analyst/Manager, Quality Analyst/Manager, Plant Manager, Warehouse Manager, Materials Manager, and Master Scheduler.

Program Outcomes

1. Acquire in-depth understanding of the fundamental techniques of business analytics.
2. Analyze historical data through descriptive analytics to uncover business relationships and gain insights into the business operations.
3. Use predictive modeling and analysis to predict future business outcomes and associated risks.
4. Use management science techniques to model business problems and determine optimal solutions.
5. Manage analytics projects efficiently and effectively by the application of project management techniques.

Professional Accountancy - Plus One (MS)

Description

The Master of Professional Accountancy program is a graduate day program to be completed in three 16-week semesters beginning with the summer term. While this program is targeted for graduates of the B.S. Accounting Degree in Three program at SNHU, it is possible for graduates with a B.S. in accounting degree to be eligible to complete the graduate program. This program is aimed at students who are interested in pursuing a career in public accounting and prepares them to take the CPA exam.

Program Outcomes

1. Employ advanced financial and governmental accounting concepts and techniques to properly account for and report complex transactions in accordance with standards promulgated by FASB, GASB, IASB and IRC.
2. Develop, research, analyze, and evaluate complex business decisions, issues and results related to operational performance and efficiency, tax situations and considerations, and the practice of corporate accounting and controllership.
3. Synthesize ethical principles and technical knowledge of auditing standards and techniques, to design audit programs, evaluate risks, develop and perform appropriate audit tests, and communicate findings to internal and external constituents as required.
4. Assimilate the compendium of accounting and auditing knowledge required to sit for the Financial Accounting and Reporting, and the Auditing and Attestation sections of the CPA Exam.

Requirements

Professional Sales (Concentration)

Description

Sales professionals play a vital role in businesses and organizations across all industries. The Professional Sales Concentration gives students, regardless of major, the opportunity to receive the foundation necessary for a career area with numerous opportunities. It also provides students the opportunity to participate in a local or regional sales competition.

Program Outcomes

1. Utilize data to adequately prepare for sales calls with prospective buyers.
2. Demonstrate effective oral and written communication skills appropriate to an entry level sales position.
3. Demonstrate the ability to successfully follow the sales process and adapt it to buyers' unique needs.

Requirements

Prerequisite Courses

2 - 3 Total Credits

- Complete all of the following
 - 1 of the following:
 - MKT105 - Foundations of Marketing (2)
 - MKT113 - Introduction to Marketing (3)
 - NOTE: This prerequisite is required for students who are not in a Business major.

Concentration Courses

9 Total Credits

- Complete:
 - MKT270 - Professional Selling (3)
 - MKT300 - Advanced Professional Selling (3)
 - MKT320 - Sales Force Management (3)

Grand Total Credits: **11 - 12**

Professional Sales (Minor)

Description

The Professional Sales Minor complements any major as it provides important skills necessary to succeed in any career and industry. These skills include critical-thinking, problem-solving, negotiation, active listening, leadership, inter-personal communication and much more. The SNHU Sales Program has been recognized as a top 100 sales program in the country. Some of the unique experiences this program provides: • Obtain certifications in various areas of sales including Inbound Sales, Sales Enablement, and Sales Software (CRM) • Experience a Sales Management Simulation to make real-world sales team leadership decisions • Refine inter-personal communication and selling skills through live and simulated role-plays • Use relevant sales technology • Participate in near-peer coaching • Be coached and assessed by faculty (and seasoned sales practitioners, many of whom are alumni and graduates of the SNHU Sales Program), if invited into MKT 328) • Participate in a local, national or international sales competition

Requirements

Minor Courses

15 Total Credits

- Complete all of the following
 - Complete:
 - MKT270 - Professional Selling (3)
 - MKT300 - Advanced Professional Selling (3)
 - MKT310 - Sales Negotiation (3)
 - MKT320 - Sales Force Management (3)
 - 1 of the following:
 - COM212 - Public Speaking (3)
 - FAS353 - Improvisation and Performance (3)
 - FMM300 - Retail Buying (3)
 - MKT328 - Sales Competition Team (3)
 - Course Not Found
 - PSY108 - Introduction to Psychology (3)

Grand Total Credits: **15**

Project Management (Minor)

Description

The minor in Project Management would enable one to acquire the skills needed to keep projects on task, on time, and on budget. The curriculum builds from theories of project management to real-world practices applicable to all industries and fields, including marketing, financial services, business administration, information technology, international trade, health sciences, government, construction, and more.

Requirements

Minor Courses

15 Total Credits

- Complete all of the following
 - Complete:
 - MAT240 - Applied Statistics (3)
 - QSO340 - Project Management (3)
 - QSO440 - Topics in Project Management (3)
 - 6 credit(s) from subject(s): QSO

Grand Total Credits: **15**

Retail Management (Minor)

Description

The objective of the retail minor is to expose students to retail management strategies predicated on factors such as visual merchandising, consumer behavior, sales promotion, merchandise planning and store atmospherics. Students that complete the retail minor will demonstrate an understanding of the impact of current and emerging issues on the retail business. Projects with local and national retailers will help enhance students learning experience in this program.

Program Outcomes

1. Gain insight into strategic retail concepts, environmental forces, technological issues, value and status driven shopping behaviors, and other retail factors that impact retail marketing planning.
2. Students will demonstrate ability to use and assess tools and strategies that will draw a positive response for a targeted group of consumers by developing a retail marketing communications plan.
3. Identify successful merchandising strategies and establish and calculate a merchandise budget plan

Requirements

Prerequisite Courses

2 - 3 Total Credits

- 1 of the following:
 - MKT105 - Foundations of Marketing (2)
 - MKT113 - Introduction to Marketing (3)

Minor Courses

15 Total Credits

- Complete:
 - MKT230 - Retail Sales Promotion (3)
 - MKT231 - Visual Merchandising (3)
 - MKT239 - Essentials of Retail Management (3)
 - FMM300 - Retail Buying (3)
 - MKT345 - Consumer Behavior (3)

Grand Total Credits: **17 - 18**

Social Media Marketing (Minor)

Description

The minor in Social Media Marketing provides students with a broad approach to the history, theory, technology, impact, and strategic uses of social media utilizing the most relevant and current attributes in technology, marketing, advertising, communication, public relations, and journalism.

Requirements

Minor Courses
12 Total Credits

- Complete:
 - MKT225 - Digital Marketing (3)
 - MKT265 - Social Media & Marketing Communications (3)
 - MKT355 - Social Media Marketing Strategy (3)
 - Course Not Found
 - MKT455 - Social Media Campaign (3)

Grand Total Credits: **12**

Sport and Special Event Management (Minor)

Description

A student may earn a minor in Sport & Special Event Management by successfully completing the following courses:

Requirements

Minor Courses
15 Total Credits

- Complete all of the following
 - Complete:
 - HOS340 - Special Events Management (3)
 - 12 credit(s) from the following:
 - HOS311 - Policy and Planning for Sustainable Development (3)
 - HOS401 - Convention Sales and Group Planning (3)
 - QSO340 - Project Management (3)
 - SPT310 - Sport Sponsorship (3)
 - SPT319 - Sport Sales and Promotions (3)
 - SPT401 - Sport Facilities Management (3)
 - SPT415 - Event Management and Marketing (3 - 6)
 - NOTE: Sport Management majors must take at least one (1) HOS elective. Hospitality majors must take SPT and QSO electives only.

Grand Total Credits: **15**

Sport Management (BS)

Campus Programs

Description

The growth of sports as a major industry has increased the need and opportunities for well-trained professional managers. A well-rounded business education with a focus on sport management skills is essential in this rapidly growing field. The mission of Southern New Hampshire University's Sport Management program is to deliver an innovative educational experience grounded in relevant theory and practice that enables students to be successful leaders in the global sport industry. Students couple ten specialized courses in sport management with a strong mix of business and liberal arts courses. Students will have an opportunity to gain practical experience through field experiences with a variety of sport, fitness and recreational organizations. The Sport Management programs have Program Approval from the North American Association of Sport Management & the National Association of Physical Education for both the Undergraduate and Graduate degrees; and are in the Candidacy Process for accreditation with the Commission of Sport Management Accreditation. Through the national program accreditation the requirements of the major in Sport Management include extensive field experience(s) totaling a minimum of 300 hours. Therefore, students majoring in Sport Management are required to complete SPT 491 which has a minimum GPA requirement of 2.5. Any student with a minor or concentration in Sport Management is encouraged to complete field experience(s) which also have a minimum GPA requirement of 2.5. In order to facilitate this and to ensure that all students are eligible and prepared for their field experience, any student with a Sport Management major, minor or concentration must receive a minimum of a "C" in all required Sport Management courses. Similarly, all students wishing to change their major to Sport Management must complete a brief application process to ensure their understanding of the field experience requirement in the program.

Program Outcomes

1. Recognize management and leadership theory in an applied environment
2. Use management and leadership theory in an applied environment
3. Demonstrate problem solving in an applied environment
4. Formulate connections between classroom learning and practical experience
5. Demonstrate the ability to communicate
6. Understand and practice networking and relationship building
7. Employ ethical frameworks in decision-making
8. Display a professional personal image
9. Use reflection to develop multiple perspectives of self as a professional
10. Demonstrate an awareness of factors that contribute to global sport business issues
11. Apply sport management principles in an international context
12. Analyze the influences of social, cultural, or political institutions on global sport businesses
13. Analyze the role of social responsibility in global sport business
14. Understand the interrelationships between functional areas in sport organizations
15. Employ a strategic analysis to demonstrate an understanding of the forces that a sport business must have in order to achieve its mission
16. Integrate strategic analysis into the strategic planning process
17. Evaluate external and internal factors and the interrelationships affecting decision-making

School of Education

Campus Programs

Advanced Graduate Studies in Curriculum and Instruction (Certificate)

Description

This program will enable educators with an earned Masters Degree to earn a Certificate of Advanced Graduate Studies in Educational Instruction. Delivered in a competency based model, the coursework is designed to produce graduates prepared to be change agents and effective leaders of learning in their schools and districts. This program includes an option to earn a NH Endorsement as a Curriculum Administrator. Five years of teaching experience as a certified educator is required for candidates to be eligible for the endorsement.

Program Outcomes

1. A change agent
2. A leader of learning in the schools
3. A reflective systems thinker
4. Responsible for the climate and culture of the school (vision and mission)
5. Responsible for the operations management and development as important for all leaders
6. All CAGS students are expected to extensively research literature on the topic(s), site that research appropriately and write in great detail on the topic. The writings will be judged against a Writing Rubric and Action Research Rubric provided in advance for all CAGS students

Requirements

Certificate Courses
36 Total Credits

- Complete:
 - CAGS507 - Leadership for Learning (3)
 - CAGS508 - Effective Management (3)
 - CAGS550 - Educational Assessment (3)
 - CAGS554 - The Development of a Mission, Vision and Goals (3)
 - CAGS590 - Process and Communication Skills (3)
 - CAGS604 - Leading the Collaborative School (3)
 - CAGS608 - The Curriculum, Instruction and Data Continuum (3)
 - CAGS656 - The Reflective Leader (3)
 - CAGS670 - Leading Creativity and Innovation (3)
 - CAGS680 - Teacher Support, Monitoring and Accountability (3)
 - CAGS739 - Action Research in Curriculum and Instruction I (3)
 - CAGS740 - Action Research in Curriculum and Instruction II (3)

Campus Programs

Advanced Graduate Studies in District Leadership (Certificate)

Description

The purpose of the partnership between SNHU and the NHSAA/GSLP is to provide a pathway to certification as a superintendent in NH and provide an option to a Certificate of Advanced Graduate Studies (CAGS).

Program Outcomes

1. Develop strategic and systemic processes for sustained school improvement
2. Empower instructional leadership teams
3. Build and sustain a collaborative learning culture and a shared decision-making structure in their schools
4. Coach teachers and leaders about how to use student data and developmental theory in order to enrich classroom instruction
5. Foster effective communication with colleagues, families and citizens
6. Increase the effectiveness of student improvement plans
7. Build strong governance teams and policies
8. Create an ethical culture of high achievement
9. All CAGS students are expected to extensively research literature on the topic(s), site that research appropriately and write in great detail on the topic. The writings will be judged against a Writing Rubric and Action Research Rubric provided in advance for all CAGS students.

Campus Programs

Advanced Graduate Studies in Leading and Learning in a Competency-Based System (Post Master's Certificate)

Description

The CAGS Program is integrated with the M.Ed. Program. We differentiate by adding expectations with each course that speak to research and citation expectations for those learners. The CAGS Program is the culmination of three stackable blocks. The program goal is to not only support and guide teams through a process of gaining knowledge and skills in competency-based education but to also build a districts capacity to deliver the vision, mission and goals of the program in the district. The connection between CBE and leadership is an integral part of the CAGS.

Program Outcomes

1. Learning Orientation - embracing learning and challenge, tolerance for ambiguity and complexity, willingness to learn alongside students and colleagues
2. Ownership of Learning/Agency - start with self, metacognition, growth mindset, be courageous, learn at your edge
3. Equity Orientation - high expectations for all learners, designing for the extreme learners, disrupting inequities of the traditional system
4. Professional Collaboration - social awareness, emotional intelligence, being a team player, contributing to a professional learning community
5. Champion Change - embrace change, advocate for change, lead change
6. Leveraging Competencies - Designing/revising strong competencies and implementing for learner transparency; leveraging quality competency frameworks; leveraging learning progressions
7. Competency-Based Instruction - designing and implementing a competency-based learning cycle; designing and implementing deeper learning; designing and implementing personalized learning
8. Competency-Based Assessment - meeting learners where they are via formative assessment and feedback; designing and implementing quality performance assessment; co-designing and implementing extended investigations with learners
9. Fostering Learner Agency - foundations in relationship, environment, and strategies (e.g. goal-setting); designing and facilitating learner-centered pedagogies; fostering skills and dispositions for learner agency (e.g. self-direction)
10. The Case for CBE - flaws of the traditional system, CBE design principles, designing for equity
11. Visionary Leadership - co-creating a vision to engender ownership and articulate a clear and compelling North Star, engaging the community, using the vision as anchor
12. Leading Change - creating the conditions for transformation, the human side of change, design as methodology for creating a culture of innovation, adaptive leadership
13. CBE Infrastructure - creating a collaborative learning culture, systems for monitoring and support, equity by design, grading and reporting, leveraging technology
14. Capacity to Transform - transforming professional learning, building for quality and scale

Requirements

Advanced Graduate Study (Graduate Certificate)

Campus Programs

Description

The Certificate in Advanced Graduate Study is a post-masters certificate designed for practicing educators looking to expand upon their professional knowledge to improve their professional practice. This application-focused program provides an opportunity for educators to focus on a variety of education topics in the areas of curriculum, assessment, learning and development, and other domains.

Program Outcomes

1. Advance understanding of ways in which to be responsive to the learning and development of all students
2. Plan and deliver advanced learning opportunities that incorporate current research and practices to engage students in meaningful ways
3. Demonstrate advanced knowledge of students' physical, cognitive, cultural, and emotional development as relates to fostering learning in a variety of education contexts and climates
4. Advance knowledge of ways to create strengths-based, inclusive, collaborative learning communities in classrooms and schools
5. Advance understanding of inquiry and the use of advanced inquiry-based instructional practices
6. Explore personal and theoretical concepts of leadership and their application to personal professional practice
7. Demonstrate advanced skills needed for professional analysis, innovation, and generation of professional strategies
8. Conduct advanced, critical self-evaluation of professional growth, teaching practice development, and personal leadership
9. Advance skills as a reflective, collaborative, scholar-educator

Advanced Teacher Practices

Description

The Master of Education in Advanced Teaching Practices is designed for professional educators seeking to enhance, extend, and deepen their professional practice and positively impact learners. The program emphasizes the development of proficiency in the latest evidence-based approaches in key areas of practice shown to have the biggest impact on learning. Students build upon their strengths and areas of interest through hands-on projects that can be immediately applied in their practice in an authentic, relevant way, all of which culminates in a three-course sequence grounded in the Inquiry Practitioner model of transformational practice.

Program Outcomes

1. Promote community and equity and enhance the role of student and teacher voice through intentional practices designed to serve the needs of all learners
2. Adopt reflective, collaborative, and inquiry-based approaches to professional development that promote growth as a professional educator
3. Integrate advanced evidence-based strategies, tools, and approaches to teaching and learning into professional practice

Early Childhood and Special Education (MEd)

Campus Programs

Description

This 16-month program prepares teacher candidates to become classroom teachers in pre-school through grade 3, as well as special education teachers in preschool through third grade. Candidates engage with young children from the start of their program, spending a full school year working alongside practicing educators in local public schools. During the summer, candidates will develop Project Based Learning activities, and then work with Early Childhood students during a summer learning program sponsored by SNHU. This program is competency-based, ensuring graduates of this program are fully prepared to teach in the growing number of NH schools who have adopted a competency-based approach to teaching and learning. Teachers with certifications in both Early Childhood Education and Early Childhood Special Education are sought after by school districts looking to hire new teachers. In addition to meeting all degree requirements, students seeking certification must meet all testing requirements for their specific certification area as required by the New Hampshire Department of Education. Students will not be recommended for certification until all requirements are met. SNHU requires a passing score on the Praxis II Elementary Education: Multiple Subjects Exam for students seeking a recommendation for certification in General Special Education, even if the exam is not otherwise required by the NH Department of Education.

Program Outcomes

1. Demonstrate the skills, competencies and knowledge to teach young children, PreK-3. Across academic coursework and supervised clinical experiences, teacher candidates will demonstrate the skills to engage with young children, PreK-3. Across academic coursework and supervised clinical experiences, teacher candidates will demonstrate the full range of teaching activities, roles and responsibilities encountered in the school and community settings, PreK-3.
2. Apply and analyze the developmental characteristics of young children, to individualize instruction.
3. Apply and analyze family and community relationships, and resources to support the development of young children.
4. Use multiple forms of observation, documentation and assessment to support young children and their families.
5. Develop curriculum and instructional strategies to support the development of young children.
6. Develop, implement and evaluate early childhood content to support the development and learning of young children.
7. Apply professional and ethical standards to their professional practice.
8. Identify, analyze, implement and evaluate the key components of Project-Based Learning Activities.
9. Assume leadership roles and opportunities to take responsibility for student learning to collaborate with learners, families, colleagues, other school professionals and community members to ensure learner growth and to advance the profession.
10. Demonstrate the skills, competencies and knowledge to teach young children with disabilities from birth up to age 8. Performance Indicators Across academic coursework and supervised clinical experiences, teacher candidates will demonstrate the skills to engage with children with disabilities from birth up to age 8. Across academic coursework and supervised clinical experiences, teacher candidates will demonstrate the skills to engage with children without disabilities from birth up to age 8. Across academic coursework and supervised clinical experiences, teacher candidates will demonstrate the full range of teaching activities, roles and responsibilities encountered in the school and community settings of a child with disabilities.
11. Apply and analyze the theoretical foundations of general education and special education to their professional practice.
12. Analyze the characteristics of learners and its impact on the personal, physical, social and academic dimensions of learning.
13. Analyze learning differences to individualize instruction to provide meaningful and challenging learning experiences.
14. Design, implement and evaluate learning environments that foster: (a) academic success; (b) positive social interactions; (c) cultural understanding; (d) safety and emotional well-being; and (e) active engagement.
15. Design, implement and evaluate curriculum that addresses the central concepts, tools of inquiry and structure of the discipline.
16. Demonstrate an understanding and ability to use multiple methods of assessments to inform educational decisions.
17. Individualize instruction.
18. Individualize language and communication instruction.
19. Explain and apply special education law to his/her professional practice.
20. Identify, analyze, implement and evaluate the key components of Project-Based Learning Activities.

Campus Programs

Early Childhood Education (BA)

Description

The Early Childhood Education Program leads to teaching certification for birth through grade 3. The program provides students with a comprehensive understanding of child development, family systems, curriculum, instruction, and assessment. This program prepares educators with a solid foundation in developmental theory, teaching methods, and a content area concentration in an academic discipline. Students examine traditional and innovative research-based approaches to teaching a diverse population of young children. In addition to meeting all degree requirements, students seeking certification must meet all testing requirements for their specific certification area as required by the New Hampshire Department of Education. Students will not be recommended for certification until all requirements are met.

Program Outcomes

1. Organize and synthesize the core concepts and principles of the subjects they teach in accordance with local, state, and national standards
2. Translate content knowledge into meaningful evidence-based experiences that ensure student learning for each student
3. Integrate and use tools of inquiry to become reflective, self-directed learners
4. Use technology to learn and support students' access to learning
5. Design, build, and maintain classroom cultures that are caring and inclusive
6. Identify cultural perspectives, norms, and traditions and see their connections to teaching and learning
7. Exhibit dispositions showing the potential to become effective, ethical, professional educators and leaders

Campus Programs

Early Childhood Special Education (BA)

Description

This program prepares New Hampshire based students for eligibility to earn teaching certification in Early Childhood Special Education (N-3). Teachers with this certification are qualified to teach children with disabilities from birth through grade 3. In addition to meeting all degree requirements, students seeking certification must meet all testing requirements for their specific certification area as required by the New Hampshire Department of Education. Students will not be recommended for certification until all requirements are met. SNHU requires a passing score on the Praxis II: Education of Young Children Exam (5024) for students seeking a recommendation for certification in Early Childhood Special Education, even if the exam is not otherwise required by the NH Department of Education.

Program Outcomes

1. Organize and synthesize the core concepts and principles of the subjects they teach in accordance with local, state, and national standards.
2. Translate content knowledge into meaningful evidence-based experiences that ensure student learning for each student.
3. Integrate and use tools of inquiry to become reflective, self-directed learners.
4. Use technology to learn and support students' access to learning.
5. Design, build, and maintain classroom cultures that are caring and inclusive.

Education

Campus Programs

Description

This program is part of a 2 + 2 Teacher residency program that leads to dual teacher licensure in Elementary Education and General Special Education in the State of New Hampshire. This program creates a pathway for paraeducators to become certified teachers. This program is only available to students participating in a pre-approved partnership between the School of Education and a New Hampshire school district.

Program Outcomes

1. Interpret human cultures and the physical and natural world through the Humanities, Social and Behavioral Sciences, History, and Science, Technology, and Mathematics
2. Communicate effectively in written, verbal, and non-verbal forms for a variety of situations, purposes, and audiences
3. Locate and evaluate relevant information through the use of quantitative and qualitative reasoning and a variety of critical and creative approaches
4. Develop strategies for effective collaboration with individuals of diverse cultures and perspectives in order to reach common goals
5. Apply concepts and practices of civic engagement through the critical examination of relevant issues and reflective consideration of a variety of perspectives
6. Apply critical problem-solving approaches to challenges in academically and professionally relevant situations through the integration of general and field-based knowledge
7. Apply knowledge of learners and learning to promote learning in self and others.
8. Exhibit dispositions showing the potential to become effective educators.
9. Identify attributes of classrooms that are caring and inclusive.
10. Use technology to facilitate learning in self and others.
11. Integrate and use tools of inquiry to become reflective, self-directed learners.
12. Apply knowledge of human growth and development to promote learning.
13. Interpret Special Education laws and statutes as they apply to the role of a professional educator.
14. Develop an understanding of the ethical, social, moral and legal issues in education.
15. Demonstrate an understanding of the historical context and/or underlying issues that shape education in the United States.

Campus Programs

Education (BA)

Description

The Education Program provides students not seeking certification a degree in the field of education. A plan of study allows the individual to design a program to accomplish career goals in the areas of educational services or related fields that do not require certification. Individuals may select courses from related disciplines to complete the 45 credit hours for the General Studies in Education program. Students design a plan of study with an academic advisor from the School of Education. Acceptance into the major requires approval by the Certification Officer.

Program Outcomes

1. Organize and synthesize core concepts and principles across education and other subjects.
2. Integrate and use tools of inquiry to become reflective, self-directed learners.
3. Use technology to learn and support ongoing growth and connection to a global society.
4. Identify cultural perspectives, norms, and traditions and see their connections to educational systems.
5. Exhibit dispositions showing the potential to become effective, ethical, professional citizens.

Education Leadership (PhD)

Description

The PhD in Education Leadership program is designed to advance the next generation of education scholars and education leaders who seek to impact education, educational organizations, education policy, and help foster the ongoing creation of new knowledge for the field. With a focus on leadership and research, students build their knowledge and skills about leadership theory, education policy, and research methodologies and methods. A focus on the development of individuals as scholars provides an opportunity for students to advance their individual practice and conduct original research. In addition, the SNHU PhD in Education Leadership program has a distinct focus on Social Justice Leadership, which allows students to develop a unique specialization within the field of Education Leadership.

Program Outcomes

1. Develop broad knowledge of theory and scholarship related to education leadership, research practices, and research connected to education leadership.
2. Understand how paradigms, worldviews, and perspectives are embedded in the development of scholarship, theory, research, and concepts and practices related to education leadership.
3. Analyze and synthesize existing theory and research in order to pose and answer questions that will advance knowledge and understandings of effective education leadership and related leadership practices.
4. Develop ability to design and implement original quantitative, qualitative, and mixed methods research in response to opportunities for enhancing empirical and theoretical understandings of education leadership.
5. Demonstrate skills necessary to create and publish peer-reviewed products.
6. Develop a specialization, including in depth explorations of the scholarship, research, and leadership practices, in a specific leadership area.

Educational Leadership (EdD)

Description

The Doctor of Education in Educational Leadership program at Southern New Hampshire University helps prepare a new generation of transformational leaders to engage and lead positive change in education organizations and education systems. This cohort program is designed to help develop participants as scholar-practitioners by advancing their knowledge of leadership theory and practice, organizational development and research methodologies. The program supports those who wish to work beyond the confines of conventional leadership as they develop innovative ways to contribute to the success of an organization. Program content is immediately applicable in the workplace and participants are encouraged to develop their leadership practice with others within a cohort learning environment.

Program Outcomes

1. Demonstrate scholarship by demonstrating doctoral-level reading and writing skills.
2. Demonstrate scholarship by analyzing and synthesizing both theory and research to address issues and problems in educational settings.
3. Demonstrate sociocultural responsiveness by applying sociocultural knowledge to build goals that advocate for a vision that commits to equitable learning for all students.
4. Demonstrate sociocultural responsiveness by articulating and exhibiting the habits of mind to engage in ethical, moral, and socially just practices.
5. Demonstrate applied research skills by using research and research methodologies to understand educational issues.
6. Demonstrate applied research skills by formulating questions of educational significance to guide the conduct of research.
7. Demonstrate applied research skills by using appropriate research methodology to gather and analyze data.
8. Demonstrate applied research skills by drawing defensible conclusions from research findings.
9. Demonstrate reflection and evaluation by engaging in leadership level critical reflection throughout the program.
10. Demonstrate reflection and evaluation by using deductive and inductive reasoning to identify theories and assumptions in matters of professional practice.
11. Demonstrate reflection and evaluation by using reasoning, collaborative strategies, and research to evaluate professional practice.
12. Demonstrate decision-making and seek solutions to issues and problems that arise in an educational setting by applying research findings and sound judgement to educational setting.
13. Demonstrate decision-making and seek solutions to issues and problems that arise in an educational setting by using participatory and democratic strategies to engage others in problem solving and decision-making.

Educator Practices

Description

The M.Ed. in Education in Educator Practices is centered on excellence in teaching and promotes intellectual development, empowerment, and teacher leadership in a supportive environment. This program is designed for educators working in the field who wish to improve their professional practices. The program takes place off campus in school communities, based on the belief that the professional educator's working environment is a vital center of learning. Graduate courses are taught in non-traditional formats that work for the lives of teachers and instructed by faculty who are known for their expertise in a variety of professional positions in the field of education. The program's philosophy allows students the flexibility to create a focus and develop greater expertise at any instructional level, from early childhood to high school and beyond. Program instructors provide the most current and best research and practice for students, who may immediately apply these topics to their classroom and school. This individualization allows educators to match the program's content to school-specific needs and cultures. Courses and program activities engage teachers where they are, embedding professional educators in the work together throughout the program. An Action Research Practicum replaces the traditional graduate thesis. This Master of Education (M.Ed.) program is intended for educators who hold bachelor's degrees that can be verified by official transcripts. Students must be practicing educators to be admitted to the program. The program is offered in cohort models and in collaboration with other organizations. For special application information, contact advancedstudy@snhu.edu.

Campus Programs

Program Outcomes

1. Deepen your understanding of ways in which to be responsive to the learning and development of all students.
2. Plan and deliver purposeful learning opportunities that incorporate current research and practices to engage students in meaningful ways.
3. Demonstrate advanced knowledge of students' physical, cognitive, cultural, and emotional development as relates to the learning process.
4. Broaden your knowledge of ways to create strengths-based, inclusive, collaborative learning communities in classrooms and schools.
5. Develop your understanding of inquiry and the use of inquiry in practice.
6. Explore your own concept of leadership and its application to your own professional practice.
7. Demonstrate skills needed for professional analysis, innovation, generation, and reflection.
8. Conduct rigorous self-evaluation of professional growth and teaching practice development.
9. Develop your skills as a reflective, collaborative, scholar-educator.
10. Design, develop, and carry out a scholarly action research project that improves your individual practice.

Elementary and Special Education (MEd)

Description

This 16-month program prepares teacher candidates to become classroom teachers in grades K-8, as well as special education teachers in grades K-12. Candidates engage with K-12 students from the start of their program, spending a full school year working alongside practicing educators in local public schools. During the summer, candidates will develop Project Based Learning activities, and then work with Elementary students during a summer learning program sponsored by SNHU. This program is competency-based, ensuring graduates of this program are fully prepared to teach in the growing number of NH schools who have adopted a competency-based approach to teaching and learning. Teachers with certifications in both Elementary Education and Special Education are sought after by school districts looking to hire new teachers. In addition to meeting all degree requirements, students seeking certification must meet all testing requirements for their specific certification area as required by the New Hampshire Department of Education. Students will not be recommended for certification until all requirements are met. SNHU requires a passing score on the Praxis II Elementary Education: Multiple Subjects Exam for students seeking a recommendation for certification in General Special Education, even if the exam is not otherwise required by the NH Department of Education.

Campus Programs

Program Outcomes

1. Demonstrate the skills, competencies and knowledge to teach elementary school students, K-8. Across academic coursework and supervised clinical experiences, teacher candidates will demonstrate the skills to engage with elementary school students, K-8. Across academic coursework and supervised clinical experiences, teacher candidates will demonstrate the full range of teaching activities, roles and responsibilities encountered in the school and community settings, K-8.
2. Apply and analyze the theoretical foundations of general education to their professional practice.
3. Analyze the characteristics of learners to determine its impact on the personal, physical, social and academic dimensions of learning.
4. Analyze learning differences to individualize instruction to provide meaningful and challenging learning experiences.
5. Design, implement and evaluate learning environments that foster: (a) academic success; (b) positive social interactions; (c) cultural understanding; (d) safety and emotional well-being; and (e) active engagement.
6. Design, implement and evaluate curriculum that addresses the central concepts, tools of inquiry and structure of the elementary school curriculum.
7. Use multiple methods of assessments to inform educational decisions.
8. Design, implement and evaluate accessible learning experiences that foster: (a) active engagement; (b) academic success; (c) positive social interactions; (d) cultural understanding; (e) cross-disciplinary application; and (f) safety and emotional well-being.
9. Design, implement and evaluate learning facilitation strategies that foster: (a) active engagement; (b) academic success; (c) positive social interactions; (d) cultural understanding; (e) cross-disciplinary application; and (f) safety and emotional well-being.
10. Be reflective practitioners: (a) monitoring student learning; (b) applying research, theory and reflections on teaching and learning to guide practice.
11. Demonstrate the ability to identify, analyze, implement and evaluate the key components of Project-Based Learning Activities.
12. Assume leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals and community members to ensure learner growth and to advance the profession.
13. Demonstrate the skills, competencies and knowledge to teach elementary/middle/high school students with disabilities from age 5 up to age 21. Performance Indicators c. Across academic coursework and supervised clinical experiences, teacher candidates will demonstrate the skills to engage with children with disabilities from age 5 up to age 21. d. Across academic coursework and supervised clinical experiences, teacher candidates will demonstrate the skills to engage with children without disabilities from age 5 up to age 21. e. Across academic coursework and supervised clinical experiences, teacher candidates will demonstrate the full range of teaching activities, roles and responsibilities encountered in the school and community settings of a child with disabilities
14. Apply and analyze the theoretical foundations of general education and special education to their professional practice.
15. Demonstrate an understanding and ability to use multiple methods of assessments to inform educational decisions.
16. Individualize instruction.
17. Individualize language and communication instruction.
18. Apply professional and ethical standards to their professional practice.
19. Explain and apply special education law to his/her professional practice.

- Complete all of the following
 - 3 credit(s) from the following:
 - EDU609 - Theoretical Foundations (2 - 3)
 - 3 credit(s) from the following:
 - EDU611 - Classroom and Behavior Management (2 - 3)
 - 3 credit(s) from the following:
 - EDU631 - Clinical Experience I - Science (2 - 3)
 - 3 credit(s) from the following:
 - EDU620 - Instruction in Mathematics (3 - 4)
 - 3 credit(s) from the following:
 - EDU621 - Instruction in Literacy (3 - 4)
 - 3 credit(s) from the following:
 - EDU632 - Clinical Experience II (3 - 4)
 - 2 credit(s) from the following:
 - SPED616 - Intervention in Mathematics (2 - 4)
 - 2 credit(s) from the following:
 - SPED618 - Intervention in Literacy (2 - 4)
 - 2 credit(s) from the following:
 - SPED581 - Assessment in Special Education (2)
 - 3 credit(s) from the following:
 - SPED632 - Clinical Experience III (3 - 4)
 - 3 credit(s) from the following:
 - SPED680C - IEP Development (3)
 - 2 of the following:
 - EDU633 - Clinical Experience IV -Social Studies & Leadership (2 - 6)
 - 2 credit(s) from the following:
 - EDU634 - Clinical Experience V: Science and Leadership (2)
 - 2 credit(s) from the following:
 - SPED633 - Clinical Experience VI: Special Education (2)

Grand Total Credits: **36 - 40**

Elementary Education (BA)

Description

The Elementary Education Program leads to New Hampshire elementary teaching certification for grades K-8 and New Hampshire general special education teaching certification for grades K-6. Elementary Education certification K-8 is available with a content concentration. Eligibility for the K-8 certification is determined by a transcript audit completed by the School of Education. Additional Praxis II or equivalent testing is also required. The program provides graduates with comprehensive knowledge of instructional theory and practice and a content area concentration in general special education. Students examine traditional and innovative research-based approaches to teaching a diverse population of students with mild/moderate disabilities. Requirements for both endorsements are accomplished without taking any additional credits (120 total credits). Students who complete this program are highly marketable candidates for both elementary education and special education teaching positions. In addition to meeting all degree requirements, students seeking certification must meet all testing requirements for their specific certification area as required by the New Hampshire Department of Education. Students will not be recommended for certification until all requirements are met.

Campus Programs

Program Outcomes

1. Organize and synthesize the core concepts and principles of the subjects they teach in accordance with local, state, and national standards
2. Translate content knowledge into meaningful evidence-based experiences that ensure student learning for each student
3. Integrate and use tools of inquiry to become reflective, self-directed learners
4. Use technology to learn and support students' access to learning
5. Design, build, and maintain classroom cultures that are caring and inclusive
6. Identify cultural perspectives, norms, and traditions and see their connections to teaching and learning
7. Exhibit dispositions showing the potential to become effective, ethical, professional educators and leaders

Campus Programs

Elementary Education with General Special Education (BA)

Description

This program is a Teacher residency program leading to a degree in Elementary Education with General Special Education. This program leads to New Hampshire elementary teaching certification for grades K-6 and New Hampshire general special education teaching certification for grades K-12. Elementary Education certification K-8 is available with a content concentration. Eligibility for the K-8 certification is determined by a transcript audit completed by the School of Education. The program provides graduates with comprehensive knowledge of instructional theory and practice and a content area concentration in general special education. In addition to meeting all degree requirements, students seeking certification must meet all testing requirements for their specific certification area as required by the New Hampshire Department of Education. Additionally, passing scores on Praxis II Elementary Content Knowledge are required for candidates seeking licensure in General Special Education. To be accepted into this program, candidates must have a conferred Associate's Degree awarded by a regionally accredited institution in the United States or its equivalent overseas. Students with a conferred Associate's Degree from a non-regionally accredited institution (i.e. nationally accredited institution) may be admitted on a case-by-case basis as approved by the Dean. A minimum GPA of 2.75 is required, as well as Praxis Core assessment results (or an equivalent assessment) that meet the State of NH requirements for teacher licensure. Candidates for this program must have successfully completed an Introduction to Education course, as well as an Introduction to Exceptionalities course at the college level prior to admission. Transfer credits are not applicable to this program. This program is only available to students participating in a pre-approved partnership between the School of Education and a school district.

Program Outcomes

1. Organize and synthesize the core concepts and principles of the subjects they teach in accordance with local, state, and national standards
2. Translate content knowledge into meaningful evidence-based experiences that ensure student learning for each student
3. Integrate and use tools of inquiry to become reflective, self-directed learners
4. Use technology to learn and support students' access to learning
5. Design, build, and maintain classroom cultures that are caring and inclusive
6. Identify cultural perspectives, norms, and traditions and see their connections to teaching and learning
7. Exhibit dispositions showing the potential to become effective, ethical, professional educators and leaders

English Education (BA)

Campus Programs

Description

The Bachelor of Arts in English Education (EED) Program meets the requirements of the State of New Hampshire to teach English in grades 5-12. Students will complete their content area coursework and preliminary training in three years. Students in the program will also be eligible for an English Language and Literature minor. Methods courses will be taught in the field, giving students access to real classrooms in which to test the theories they have been taught. They will gain insight and learn additional content from actual practitioners, as well as university professors. In their senior year they will participate in a full year student teaching internship in local middle and high schools, providing them increased opportunities for working directly with students. They will practice their skills and apply their knowledge in middle and high schools, fully preparing them for success. In all, the new program, with a full year internship, promises to give students an integrated and comprehensive plan for a certification in English Education. Turn your love of literature and writing into a career sharing your talents and passions with your students.

Program Outcomes

1. Organize and synthesize the core concepts and principles of the subjects they teach in accordance with local, state, and national standards;
2. Translate content knowledge into meaningful evidence-based experiences that ensure student learning for each student;
3. Integrate and use tools of inquiry to become reflective, self-directed learners;
4. Use technology to learn and support students' access to learning;
5. Design, build, and maintain classroom cultures that are caring and inclusive;
6. Identify cultural perspectives, norms, and traditions and see their connections to teaching and learning;
7. Exhibit dispositions showing the potential to become effective, ethical, professional educators and leaders;

Campus Programs

Field Based Education (MEd)

Description

The Field-based Graduate Programs in Education offer a master of education degree as well as a certificate of advanced graduate study (post master's degree). Its graduate degree and advanced certificates are centered on excellence in teaching and promote intellectual development, empowerment and social responsibility in a supportive environment. This is a part-time program designed for educators working in the field who wish to improve their professional practices. The program takes place off campus in school communities, often in rural settings, based on the belief that the professional educator's working environment is a vital center of learning. Graduate courses are taught in condensed weekend formats during the school year by faculty members who are known for their expertise in a variety of professional positions in the field of education. Students must be practicing educators to be admitted to the program. The program's constructivist philosophy allows students the flexibility to create a focus and develop greater expertise at any level, from early childhood to high school and beyond. Program instructors provide the most current and best research and practice for students, who may immediately apply them to their classroom and school needs. This individualization allows educators to match the program's content to school-specific needs and cultures. All courses and program activities occur off-site on location in cohort models, where area professional educators work together over a period of several years. The networking and collegial support for ensuring ongoing culture-specific change and improvement often continues even after the graduate degree or certificate is completed. An Action Research Practicum replaces the traditional graduate thesis. A new site or cohort is created when a need is identified in a particular geographic location. A minimum of 15 educators interested in pursuing their graduate work is required for the creation of a new graduate face-to-face education cohort group. Admission – Field-based Graduate Programs in Education The Master of Education (M.Ed.) program is intended for educators who hold bachelor's degrees that can be verified by official transcripts. The Certificate of Advanced Graduate Study (C.A.G.S.) is intended for educators who hold a master's degree. When a new regional field-based graduate education site has been identified and confirmed, interested applicants should submit the following materials for the designated site to: Southern New Hampshire University-Vermont Programs Field-based Graduate Programs in Education 463 Mountain View Drive, Suite 101 Colchester, VT 05446 1.844.282.4484 info@snhvt.org <http://www.snhvt.org>

Program Outcomes

1. Deepen your understanding of ways in which to be responsive to the learning and development of all students
2. Plan and deliver purposeful learning opportunities that incorporate current research and practices to engage students in meaningful ways
3. Demonstrate advanced knowledge of students' physical, cognitive, cultural, and emotional development as relates to the learning process
4. Broaden your knowledge of ways to create strengths-based, inclusive, collaborative learning communities in classrooms and schools
5. Develop your understanding of inquiry and the use of inquiry in practice
6. Explore your own concept of leadership and its application to your own professional practice
7. Demonstrate skills needed for professional analysis, innovation, generation, and reflection
8. Conduct rigorous self-evaluation of professional growth and teaching practice development
9. Develop your skills as a reflective, collaborative, scholar-educator
10. Design, develop, and carry out a scholarly action research project that improves your individual practice

Focus, Leading, Learning and Teaching in a Competency-Based School (Graduate Certificate)

Description

Block I leads to a certificate in Leading, Learning and Teaching in a Competency-Based System. Learners will collaborate to build their knowledge and skills in competency-based education, foundations of student agency, instructing in a competency-based classroom and building a vision and mission for how the school or district will focus on a process to get them to a successful transition to CBE.

Program Outcomes

1. Learning Orientation - embracing learning and challenge, tolerance for ambiguity and complexity, willingness to learn alongside students and colleagues
2. Ownership of Learning/Agency - start with self, metacognition, growth mindset, be courageous, learn at your edge
3. Equity Orientation - high expectations for all learners, designing for the extreme learners, disrupting inequities of the traditional system
4. Professional Collaboration - social awareness, emotional intelligence, being a team player, contributing to a professional learning community
5. Champion Change - embrace change, advocate for change, lead change
6. Leveraging Competencies - Designing/revising strong competencies and implementing for learner transparency; leveraging quality competency frameworks; leveraging learning progressions
7. Competency-Based Instruction - designing and implementing a competency-based learning cycle; designing and implementing deeper learning; designing and implementing personalized learning
8. Competency-Based Assessment - meeting learners where they are via formative assessment and feedback; designing and implementing quality performance assessment; co-designing and implementing extended investigations with learners
9. Fostering Learner Agency - foundations in relationship, environment, and strategies (e.g. goal-setting); designing and facilitating learner-centered pedagogies; fostering skills and dispositions for learner agency (e.g. self-direction)
10. The Case for CBE - flaws of the traditional system, CBE design principles, designing for equity
11. Visionary Leadership - co-creating a vision to engender ownership and articulate a clear and compelling North Star, engaging the community, using the vision as anchor
12. Leading Change - creating the conditions for transformation, the human side of change, design as methodology for creating a culture of innovation, adaptive leadership
13. CBE Infrastructure - creating a collaborative learning culture, systems for monitoring and support, equity by design, grading and reporting, leveraging technology
14. Capacity to Transform - transforming professional learning, building for quality and scale

Leadership (MEd)

Description

This program is designed for individuals who wish to become educational leaders. The program shall provide students with skills, competencies, and knowledge to provide leadership in the following areas: philosophy of learning; culture of teaching and learning; management of the organization and operation of a school; relationships with the broader community; ethics in learning; and the political, social, economic, legal, and cultural context of learning. The program shall allow for individualized programs of study and experience.

Program Outcomes

1. Be a change agent.
2. Be a leader of learning in schools.
3. Be a reflective systems thinker.
4. Be responsible for the climate and culture of a building, including creating and maintaining a vision and a mission.
5. Be responsible for the operations management and development of all teachers.

Campus Programs

Leadership (MEd) - School Administration (Concentration)

Description

This program is designed for individuals who wish to become certified school principals in the State of New Hampshire. The program shall provide students with skills, competencies, and knowledge to provide leadership in the following areas: philosophy of learning; culture of teaching and learning; management of the organization and operation of a school; relationships with the broader community; ethics in learning; and the political, social, economic, legal, and cultural context of learning. The program shall allow for individualized programs of study and experience. Candidates must have five years of teaching experience as a certified educator before being recommended for licensure with the State of NH. Must possess an Experienced Educator license from the State of NH, or its equivalent from another state.

Concentration Outcomes

1. Be a change agent.
2. Be a leader of learning in schools.
3. Be a reflective systems thinker.
4. Be responsible for the climate and culture of a building, including creating and maintaining a vision and a mission.
5. Be responsible for the operations management and development of all teachers.
6. Meet all required competencies to be recommended for licensure in the State of New Hampshire as a school principal.

Requirements

Campus Programs

Leading and Learning in a Competency-Based System (MEd)

Description

The M.Ed. Program is the culmination of three stackable blocks. The program goal is to not only support and guide teams through a process of gaining knowledge and skills in competency-based education but to also build a district's capacity to deliver the vision, mission and goals of the program in the district. The connection between CBE and leadership is an integral part of the M.Ed.

Program Outcomes

1. Learning Orientation - embracing learning and challenge, tolerance for ambiguity and complexity, willingness to learn alongside students and colleagues
2. Ownership of Learning/Agency - start with self, metacognition, growth mindset, be courageous, learn at your edge
3. Equity Orientation - high expectations for all learners, designing for the extreme learners, disrupting inequities of the traditional system
4. Professional Collaboration - social awareness, emotional intelligence, being a team player, contributing to a professional learning community
5. Champion Change - embrace change, advocate for change, lead change
6. Leveraging Competencies - Designing/revising strong competencies and implementing for learner transparency; leveraging quality competency frameworks; leveraging learning progressions
7. Competency-Based Instruction - designing and implementing a competency-based learning cycle; designing and implementing deeper learning; designing and implementing personalized learning
8. Competency-Based Assessment - meeting learners where they are via formative assessment and feedback; designing and implementing quality performance assessment; co-designing and implementing extended investigations with learners
9. Fostering Learner Agency - foundations in relationship, environment, and strategies (e.g. goal-setting); designing and facilitating learner-centered pedagogies; fostering skills and dispositions for learner agency (e.g. self-direction)
10. The Case for CBE - flaws of the traditional system, CBE design principles, designing for equity
11. Visionary Leadership - co-creating a vision to engender ownership and articulate a clear and compelling North Star, engaging the community, using the vision as anchor
12. Leading Change - creating the conditions for transformation, the human side of change, design as methodology for creating a culture of innovation, adaptive leadership
13. CBE Infrastructure - creating a collaborative learning culture, systems for monitoring and support, equity by design, grading and reporting, leveraging technology
14. Capacity to Transform - transforming professional learning, building for quality and scale

Campus Programs

Middle School Mathematics Education (BA)

Description

The Middle School Mathematics education program leads to certification for mathematics grades 5-8. The program of study provides prospective middle school mathematics teachers with strong mathematical knowledge and a good sense of mathematics learning that takes place during the middle grades. Throughout this program, courses integrate knowledge of mathematics, knowledge of teaching, and mathematical knowledge for teaching. The program provides graduates with a comprehensive knowledge of instructional theory and practice while examining traditional and innovative research-based approaches to teaching Middle School Mathematics. In addition to meeting all degree requirements, students seeking certification must meet all testing requirements for their specific certification area as required by the New Hampshire Department of Education. Students will not be recommended for certification until all requirements are met.

Program Outcomes

1. Organize and synthesize the core concepts and principles of the subjects they teach in accordance with local, state, and national standards;
2. Translate content knowledge into meaningful evidence-based experiences that ensure student learning for each student;
3. Integrate and use tools of inquiry to become reflective, self-directed learners;
4. Use technology to learn and support students' access to learning;
5. Design, build, and maintain classroom cultures that are caring and inclusive;
6. Identify cultural perspectives, norms, and traditions and see their connections to teaching and learning;
7. Exhibit dispositions showing the potential to become effective, ethical, and professional educators and leaders;

Middle School Science Education (BS)

Description

The Middle School Science Education Program leads to certification for middle level science grades 5-8. The program provides students with strong scientific knowledge and a good sense of science learning that take place during the middle grades. Throughout this program, courses integrate knowledge of science, knowledge of teaching, and scientific knowledge for teaching. The program provides graduates with a comprehensive knowledge of instructional theory and practice while examining traditional and innovative research-based approaches to teaching middle school science. University Jurisdiction: The School of Education will deliver the program, and certifies student teachers. The key faculty members include full-time faculty of the Department of Science at SNHU: Kevin Degnan (Chair), Joseph Corbin, Michele Goldsmith, and Katharine York. In addition to meeting all degree requirements, students seeking certification must meet all testing requirements for their specific certification area as required by the New Hampshire Department of Education. Students will not be recommended for certification until all requirements are met.

Program Outcomes

1. Organize and synthesize the core concepts and principles of the subjects they teach in accordance with local, state, and national standards
2. Translate content knowledge into meaningful evidence-based experiences that ensure learning for each student
3. Integrate and use tools of inquiry to become reflective, self-directed learners
4. Use technology to learn and to support students' access to learning
5. Design, build, and maintain classroom cultures that are caring and inclusive
6. Identify cultural perspectives, norms, and traditions and see their connections to teaching and learning
7. Exhibit dispositions showing the potential to become effective, ethical, professional educators and leaders

Middle School Science Education (Minor)

Description

The Middle School Science Education minor at SNHU is for students interested in the content and pedagogy of middle school science. Courses focus on particular areas of science that are integrated across the middle school curriculum, and will also provide a strong foundation for understanding effective teaching methods for middle school science. This minor is appropriate for students already enrolled in teacher certification programs.

Music Education (BA)

Description

The Music Education Program leads to teacher certification for music grades K-12. The program provides an intensive study of music, a broad and integrated background in the liberal arts, and the skills, knowledge and experience to help elementary, middle, and high school students develop to their full potential. Music education majors practice traditional and innovative research-based approaches to teaching music through a six semester series of weekly internships in the local public schools, and a full immersion semester of student teaching. In addition to meeting all degree requirements, students seeking certification must meet all testing requirements for their specific certification area as required by the New Hampshire Department of Education. Students will not be recommended for certification until all requirements are met.

Program Outcomes

1. Organize and synthesize the core concepts and principles of the subjects they teach in accordance with local, state, and national standards;
2. Translate content knowledge into meaningful evidence-based experiences that ensure student learning for each student;
3. Integrate and use tools of inquiry to become reflective, self-directed learners;
4. Use technology to learn and support students' access to learning;
5. Design, build, and maintain classroom cultures that are caring and inclusive;
6. Identify cultural perspectives, norms, and traditions and see their connections to teaching and learning;
7. Exhibit dispositions showing the potential to become effective, ethical, and professional educators and leaders;

Professional Study (Graduate Certificate)

Description

The Graduate Certificate of Professional Study is designed for educators who are seeking to advance their professional practice by pursuing additional coursework beyond their degree. Created as a field-based program, this graduate certificate program is ideal for practicing educators seeking applied learning and professional development opportunities. Individuals pursuing this certificate can choose from courses in five different topic areas: Curriculum, Assessment and Evaluation, Education Technology, Learning and Development, and Teacher Leadership.

Program Outcomes

1. Deepen understanding of ways to be responsive to the learning and development of all students
2. Plan and deliver purposeful learning opportunities that incorporate current research and practices to engage students in meaningful ways
3. Demonstrate advanced knowledge of students' physical, cognitive, cultural, and emotional development as relates to the learning process
4. Broaden knowledge of ways to create strengths-based, inclusive, collaborative learning communities in classrooms and schools
5. Demonstrate skills needed for professional analysis, innovation, and generation of professional strategies
6. Conduct self-evaluation of professional growth, teaching practice development, and personal leadership
7. Develop skills as a reflective, collaborative, scholar-educator

Requirements

Professional Study (Post Master's Graduate Certificate)

Description

The Post-Master's Certificate of Professional Study is intended for educators interested in an advanced pursuit of professional knowledge and practices and wishing to pursue additional coursework beyond their Master's Degree. Created as a field-based program, this post-master's certificate program is ideal for practicing educators seeking applied learning and professional development opportunities. Individuals pursuing this certificate can choose from courses in five different topic areas: Curriculum, Assessment and Evaluation, Education Technology, Learning and Development, and Teacher Leadership.

Program Outcomes

1. Advance understanding of ways to be responsive to the learning and development of all students
2. Plan and deliver advanced learning opportunities that incorporate current research and practices to engage students in meaningful ways
3. Demonstrate advanced knowledge of students' physical, cognitive, cultural, and emotional development as relates to fostering learning in a variety of education contexts and climates
4. Advance knowledge of ways to create strengths-based, inclusive, collaborative learning communities in classrooms and schools
5. Demonstrate advanced skills needed for professional analysis, innovation, and generation of professional strategies
6. Conduct advanced, critical self-evaluation of professional growth, teaching practice development, and personal leadership
7. Advance skills as a reflective, collaborative, scholar-educator

Campus Programs

Secondary Education with STEM Education

Description

The secondary certification programs listed below are fully approved by the New Hampshire State Board of Education. The secondary certification programs offered at the undergraduate level are currently accepting applications through summer 2021. Admission to the undergraduate programs will be closed beginning with the 2021-20 academic year: • English Language Arts for Grades 5-12 • Mathematics Teaching – Middle Level • Mathematics Teaching- Upper Level • Science for Grades 5-8 • Social Studies for Grades 5-12 Candidates engage with grade 5-12 students from the start of their program, spending a full school year working alongside practicing educators in local schools. During the summer, candidates will develop Project Based Learning activities, and then work with middle and high school students during a summer learning program sponsored by SNHU. This program is competency-driven, ensuring graduates of this program are fully prepared to teach in the growing number of NH schools who have adopted a competency-based approach to teaching and learning. Teachers with secondary certifications, especially in the STEM fields and with STEM knowledge and skills, are sought after by school districts looking to hire new teachers. Candidates in this program learn essential transdisciplinary knowledge and skills enabling them to collaborate effectively across content areas regardless of certification area. This is a valued skill in today's middle and high schools as they increasingly implement project based learning and authentic assessments. Note that students will not be recommended for certification until they have met all testing requirements as required by the New Hampshire Department of Education which includes a passing score on the Praxis CORE (or its equivalent) and the relevant Praxis II Content Exam (or its equivalent).

Program Outcomes

1. Organize and synthesize the core concepts and principles of the subjects they teach in accordance with local, state, and national standards
2. Translate content knowledge into meaningful evidence-based experiences that ensure student learning for each student
3. Integrate and use tools of inquiry to become reflective, self-directed learners
4. Use technology to learn and support students' access to learning
5. Design, build, and maintain classroom cultures that are caring and inclusive
6. Identify cultural perspectives, norms, and traditions and see their connections to teaching and learning
7. Exhibit dispositions showing the potential to become effective, ethical, professional educators and leaders

Secondary Mathematics Education (BA)

Campus Programs

Description

The University is pursuing approval by the New Hampshire State Board of Education for an approved certification program in Mathematics Grades 7-12. Students may take courses associated with this certification while the University seeks approval. Until approval is granted, students cannot be recommended to the State Department of Education for certification. State certification is contingent upon the program being approved by the New Hampshire State Board of Education. The program of study provides prospective mathematics teachers for grades 7-12 with strong mathematical knowledge and a good sense of mathematics learning that takes place during grades 7-12. Throughout this program, courses integrate knowledge of mathematics, knowledge of teaching, and mathematical knowledge for teaching. The program provides graduates with a comprehensive knowledge of instructional theory and practice while examining traditional and innovative research-based approaches to teaching mathematics in grades 7-12. This program is approved by the New Hampshire State Department of Education for Teacher Certification as leading to an initial teacher's license or endorsement in New Hampshire. Southern New Hampshire University cannot guarantee licensure, certification, endorsement, or salary benefits. Professional licensure, certification, endorsement, and salary benefit requirements for educators vary from state to state and district to district. Southern New Hampshire University (SNHU) cannot guarantee licensure, certification, endorsement, or salary benefits. It is the students' responsibility to understand and comply with requirements in the state where they intend to work as an administrator or teacher. Students seeking licensure in states other than New Hampshire are solely responsible for determining whether they are eligible for licensure, and before beginning the program, confirming the precise requirements that must be satisfied to be licensed in that state. Students specifically seeking a New Hampshire certificate must meet all of the requirements, policies, and protocols included in the program approval(s) granted to Southern New Hampshire University by the State Department of Education under the auspices of School of Education and Certification Officer. In addition to meeting all degree requirements, students seeking certification must meet all testing requirements for their specific certification area as required by the New Hampshire Department of Education. Students will not be recommended for certification until all requirements are met. SNHU requires a passing score on the Praxis II Elementary Education: Multiple Subjects Exam for students seeking a recommendation for certification in General Special Education, even if the exam is not otherwise required by the NH Department of Education.

Program Outcomes

1. Organize and synthesize the core concepts and principles of the subjects they teach in accordance with local, state, and national standards;
2. Translate content knowledge into meaningful evidence-based experiences that ensure student learning for each student;
3. Integrate and use tools of inquiry to become reflective, self-directed learners;
4. Use technology to learn and support students' access to learning;
5. Design, build, and maintain classroom cultures that are caring and inclusive;
6. Identify cultural perspectives, norms, and traditions and see their connections to teaching and learning;
7. Exhibit dispositions showing the potential to become effective, ethical, and professional educators and leaders

Social Studies and Education (BA)

Description

The Bachelor of Arts in Social Studies and Education (SSE) meets the requirements for State of New Hampshire certification to teach social studies in grades 5-12 which includes the content areas of United States and World History, Geography, Civics, Economics, psychology, sociology, and anthropology. This program is demanding and intense: students who aspire to teach in public secondary education systems will spend significant time embedded in local middle and high schools before engaging in a yearlong student teaching experience. Additionally, students completing this program are eligible for a minor in History. By choosing history courses for General Education electives/requirements students may earn a second major in History. No longer about memorization of dates, Social studies teaching engages the mind, encourages inquiry, and delves into life's deeper questions. Students completing the program will have acquired skills in communication and critical thinking, developed an historic perspective, and gained an understanding of the processes of teaching and learning applicable not only in school settings but also to other learning and training settings.

Campus Programs

Program Outcomes

1. Organize and synthesize the core concepts and principles of the subjects they teach in accordance with local, state, and national standards
2. Translate content knowledge into meaningful evidence-based experiences that ensure student learning for each student

Special Education (BA)

Description

The program for children with disabilities prepares New Hampshire based students for eligibility for teaching certification for grades K-12 in General Special Education. Teachers with this certification are qualified to teach children with disabilities in all settings. In addition to meeting all degree requirements, students seeking certification must meet all testing requirements for their specific certification area as required by the New Hampshire Department of Education. Students will not be recommended for certification until all requirements are met. SNHU requires a passing score on the Praxis II Elementary Education: Multiple Subjects Exam for students seeking a recommendation for certification in General Special Education, even if the exam is not otherwise required by the NH Department of Education.

Program Outcomes

1. Organize and synthesize the core concepts and principles of the subjects they teach in accordance with local, state, and national standards;
2. Translate content knowledge into meaningful evidence-based experiences that ensure student learning for each student;
3. Integrate and use tools of inquiry to become reflective, self-directed learners;
4. Use technology to learn and support students' access to learning;
5. Design, build, and maintain classroom cultures that are caring and inclusive;
6. Identify cultural perspectives, norms, and traditions and see their connections to teaching and learning;
7. Exhibit dispositions showing the potential to become effective, ethical, and professional educators and leaders

Transdisciplinary Competencies (Graduate Certificate)

Description

This program is geared for those who currently teach or plan to teach at the middle or high school level and have an interest in promoting project based learning, design thinking, and other STEM related skills. Learning focuses on developing STEM knowledge and facilitation skills to engage pupils in exciting, hands-on experiences. Specifically, candidates earn six badges on: STEM Content Knowledge, STEM Facilitation, STEM Project Based Learning Design and Implementation; and Assessing STEM related products. This program is competency-driven, ensuring graduates of this program are fully prepared to facilitate STEM Education at New Hampshire's middle and high school levels. Candidates in this program learn essential transdisciplinary knowledge and skills enabling them to collaborate effectively across content areas regardless of certification area. This is a valued skill in today's middle and high schools as they increasingly implement project based learning and authentic assessments. This certificate does not lead to New Hampshire certification/licensure in teaching.

Program Outcomes

1. Identify and demonstrate knowledge of all aspects of the STEM field citing relevant academic standards.
2. Engage adolescent learners in appropriate and relevant STEM practices.
3. Design STEM related Project Based Learning experiences and relevant connections across content areas.
4. Design and implement a variety of assessment tools that measure pupils' learning of STEM related outcomes.
5. Design and implement learning environments that facilitate STEM learning and transdisciplinary instruction.
6. Implement a STEM project that results in pupil learning across disciplines and connects to the real world.

Requirements

Courses

Accounting

ACC105 - Foundations of Accounting I

Description

This course will provide an overview of selected topics from financial accounting. It is designed to help business majors understand how accounting information can help them make decisions and evaluate decisions made on the job. Business majors will explore the rules and regulations for preparing financial accounting information and learn how to prepare and analyze basic financial statements.

Credits

2

Academic Level

Undergraduate

ACC201 - Financial Accounting

Description

Students will learn the steps of the accounting cycle and how to prepare financial statements in accordance with industry established rules and regulations. Students will develop skills needed to analyze financial accounting information, communicate this information to stakeholders, and understand the accounting procedures that produce this information.

Credits

3

Academic Level

Undergraduate

ACC202 - Managerial Accounting

Description

Students will explore the financial impact of short-term and long-term business decisions. By learning how accounting and other productivity information can be used to assess and improve performance of an organization, managers will be provided the essential information they need to execute growth strategies and select opportunities that create business value.

Credits

3

Requisites

- 1 of the following:
 - ACC201 - Financial Accounting (3)

Academic Level

Undergraduate

Campus Programs

ACC205 - Foundations of Accounting II

Description

This course will continue to reinforce the concepts learned in Foundations of Accounting I and add selected topics from managerial accounting. Business majors will learn about cost types and their behaviors. They will also learn the principles to evaluate the financial impact of alternative business decisions.

Credits

2

Requisites

- 1 of the following:
 - ACC105 - Foundations of Accounting I (2)
 - ACC215 - Fundamentals of Financial Accounting (3)

Academic Level

Undergraduate

ACC207 - Cost Accounting

Description

Examine the accounting concepts and practices used in the recording, classifying, and reporting of cost data. Analyze the behavior of costs and its use to management in the planning and control process. Examine budgeting, standard cost, job order and process, along with special problems in cost accounting.

Credits

3

Requisites

- 1 of the following:
 - ACC202 - Managerial Accounting (3)
 - ACC205 - Foundations of Accounting II (2)

Academic Level

Undergraduate

ACC215 - Fundamentals of Financial Accounting

Description

This course is designed to give students an introduction to financial accounting and reporting techniques and concepts including an overview of the accounting cycle, financial statements and ethical responsibilities of accountants in business.

Credits

3

Academic Level

Undergraduate

Campus Programs

ACC225 - Foundations of QuickBooks

Description

This course will provide an introduction to QuickBooks which is one of the most popular accounting systems used by small businesses. This course will take you through the fundamentals of how this software works. You will learn how to apply the accounting cycle using this software and produce various reports that can be used to provide valuable information to a business.

Additional Information

Offered in the DY02 term only.

Credits

1

Requisites

- Complete:
 - ACC215 - Fundamentals of Financial Accounting (3)

Academic Level

Undergraduate

ACC302 - Professional Communication in Accounting

Description

Professional Communication in Accounting introduces students to the rhetorical strategies necessary to plan, design, write and distribute texts necessary for professional accounting experiences. Emphasizing the need to address appropriate audience and language, students will be able to create a portfolio of workplace documents representative of their field.

Additional Information

Offered every spring term.

Credits

2

Requisites

- Complete all of the following
 - Complete:
 - ENG200 - Sophomore Seminar (3)
 - 30 credit(s).

Academic Level

Undergraduate

ACC307 - Intermediate Accounting I

Description

Review introductory concepts including the accounting cycle, journal and adjusting entries. Learn to address more intricate accounting scenarios such as recording more complex financial statement elements. Apply theoretical frameworks and various accounting standards and regulations to the proper preparation of financial statements.

Credits

3

Requisites

AS101 - The Foundations of the United States Air Force I

Description

AS-101 is a survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. This course provides an introduction to the Air Force (AF), hopefully encouraging students to pursue an AF career or at least seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman such as AF customs and courtesies, AF dress and appearance, team building, communication skills, AF Core values, and more. As a foundational course, AS-101 also provides a historical perspective such as lessons on war and US military, AF operations, principles of war, and airpower (see the complete lesson list below). As a whole, this course provides students with a knowledge-level understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. The students will be introduced to the Air Force way of life and gain knowledge on what it means to be an Airman. A succinct perspective of the AS-101 course objective is to sell the AF as a career and lay a strong foundation built on AF Core Values and AF perspectives.

AS101L - Leadership Laboratory

Description

LLAB is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment Commander and Operations Flight Commander. LLAB cadets are classified into one of four groups with respect to field training attendance and/or commissioning. Initial Military Training (IMT) cadets are part of the General Military Course (GMC) but are not scheduled to attend field training (normally AS100 cadets). The focus of IMT objectives/activities are to promote the Air Force way of life and help effectively recruit and retain qualified cadets. This time is spent acquainting the cadets with basic Air Force knowledge and skills to help them determine whether they wish to continue with the AFROTC program. Field Training Prep (FTP) cadets are scheduled to attend field training in the upcoming year (normally AS200 cadets). The FTP objectives provide training to ensure every cadet is mentally and physically prepared for the rigorous field training environment. Intermediate Cadet Leaders (ICL) are cadets returning from field training (normally AS300 cadets). ICL objectives/activities give cadets the opportunity to further develop the leadership and followership skills learned at field training. Every cadet position should provide the ICL the opportunity to sharpen their planning, organizational, and communication skills, as well as their ability to effectively use resources to accomplish a mission in a constructive learning environment. Senior Cadet Leaders (SCL) are cadets scheduled to be commissioned in the upcoming year (normally AS400 cadets). This time is spent on additional opportunities to develop leadership and supervisory capabilities, and prepares cadets for their first active duty assignment. Extended Cadet Leaders (ECL) are cadets whose AFROTC academic requirements are complete but still have one or more terms of college left to complete. These cadets may hold special duty or regular positions within the cadet corps upon discretion of the Detachment Commander (Det CC) or Operations Flight Commander (OFC).

AS201 - The Evolution of USAF Air and Space Power I

Description

AS-201 features topics on Air Force heritage and leaders; introduction to air power through examination of the Air Force Core Functions; and continued application of communication skills. Its purpose is to instill an appreciation of the development and employment of air power and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. This course is designed to examine general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles to the space-age systems of air power today. Historical examples are provided to show the development of Air Force distinctive capabilities (previously referred to as core competencies), and missions (operations) to demonstrate the evolution of what has become today's USAF. Furthermore, the course examines several fundamental truths associated with war in the third dimension, e.g., principles of war and tenets of air and space power. As a whole, this course provides the students with a knowledge-level understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. The students will be introduced to The Air Force Core Values through the use of operational examples, and they will conduct several writing and briefing assignments to meet Air Force communication skills requirements.

AS201L - Leadership Laboratory

Description

LLAB is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment Commander and Operations Flight Commander. LLAB cadets are classified into one of four groups with respect to field training attendance and/or commissioning. Initial Military Training (IMT) cadets are part of the General Military Course (GMC) but are not scheduled to attend field training (normally AS100 cadets). The focus of IMT objectives/activities are to promote the Air Force way of life and help effectively recruit and retain qualified cadets. This time is spent acquainting the cadets with basic Air Force knowledge and skills to help them determine whether they wish to continue with the AFROTC program. Field Training Prep (FTP) cadets are scheduled to attend field training in the upcoming year (normally AS200 cadets). The FTP objectives provide training to ensure every cadet is mentally and physically prepared for the rigorous field training environment. Intermediate Cadet Leaders (ICL) are cadets returning from field training (normally AS300 cadets). ICL objectives/activities give cadets the opportunity to further develop the leadership and followership skills learned at field training. Every cadet position should provide the ICL the opportunity to sharpen their planning, organizational, and communication skills, as well as their ability to effectively use resources to accomplish a mission in a constructive learning environment. Senior Cadet Leaders (SCL) are cadets scheduled to be commissioned in the upcoming year (normally AS400 cadets). This time is spent on additional opportunities to develop leadership and supervisory capabilities, and prepares cadets for their first active duty assignment. Extended Cadet Leaders (ECL) are cadets whose AFROTC academic requirements are complete but still have one or more terms of college left to complete. These cadets may hold special duty or regular positions within the cadet corps upon discretion of the Detachment Commander (Det CC) or Operations Flight Commander (OFC).

AS202 - The Evolution of USAF Air and Space Power II

Description

AS-202 features topics on Air Force heritage and leaders; introduction to air power through examination of the Air Force Core Functions; and continued application of communication skills. Its purpose is to instill an appreciation of the development and employment of air power and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. This course is designed to examine general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles to the space-age systems of air power today. Historical examples are provided to show the development of Air Force distinctive capabilities (previously referred to as core competencies), and missions (operations) to demonstrate the evolution of what has become today's USAF. AS301 - The United States Air Force Leadership Studies I

Description

AS-301 teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. The AS-301 cadet should comprehend selected individual leadership skills and personal strengths and weaknesses as applied in an Air Force environment. The individual should comprehend the responsibility and authority of an Air Force officer, the Air Force officer's responsibilities in the counseling and feedback process, and the selected duties and responsibilities as a subordinate leader. The individual should comprehend and apply concepts of ethical behavior as well as comprehend the selected concepts, principles, and theories of quality in Air Force leadership and management. The individual should apply listening, speaking, and writing skills in Air Force-peculiar formats and situations with accuracy, clarity, and appropriate style.

AS401 - National Security Affairs/Preparation for Active Duty I

Description

AS-401 is designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The AS-401 cadet should comprehend the basic elements of national security policy and process. The individual should comprehend the air and space power functions and competencies. Also, the individual should comprehend selected roles of the military in society and current issues affecting the military profession as well as selected provisions of the military justice system. The individual should comprehend the responsibility, authority, and functions of an Air Force commander. The individual should apply listening, speaking, and writing skills in Air Force-peculiar formats and situations with accuracy, clarity, and appropriate style. The individual should comprehend the factors, which facilitate a smooth transition from civilian to military life.

Air Traffic Management

AT110 - Fundamentals of Air Traffic Control

Description

This is an introduction to the federal air traffic control, airspace and airway structures, and fundamental ATC concepts, skills, techniques, and procedures. The course is intended to allow students to explore air traffic control as a professional option and to provide a foundation for further ATC education. ATC simulation exercises will focus on exposing the student to an understanding and appreciation for ATC fundamentals through simple exercises of realistic air traffic scenarios. On-site visits to air traffic facilities may provide the student with an understanding of the air traffic environment, relationships and interaction among air traffic facilities, and pilot/controller relationships. This course is open to primary ATC and Flight Students. The introductory nature of the material in this course makes it an inappropriate selection for advanced flight students seeking elective credits.

AT210 - Air Traffic Control Tower Operations

Description

This course explores the roles and responsibilities of personnel assigned to airport traffic control towers, including Flight Data, Clearance Delivery, Ground Control, Local Control, Controller-In-Charge, and Tower Supervisor positions. Using both classroom and the control tower simulator, students are taught basic and fundamental visual flight rules (VFR) control over tower requirements, procedures, and purpose. Students will be required to demonstrate knowledge in control tower operations through written examinations in the classroom and practical performance evaluations in the lab. On-site visits to local Federal Aviation Administration (FAA) and contract control towers will help students understand how towers interface with other ATC facilities and the important role control towers play in the National Airspace System (NAS).

AT310 - Airspace and Air Traffic Systems Management

Description

This is an in-depth exploration of the functions and responsibilities of the ATC specialist in the ATC system. The student will master the fundamentals of airspace and air traffic management, including general control terms and definitions, basic ATC procedures and standards, proper communications phraseology and the use of clearances, and explicit instructions for heading, altitude, and airspeed to maintain air traffic flow while preserving separation standards. Emphasis is on developing and maintaining a faithful cognitive model of the air traffic situation using pictorial and simulated radar presentations. Lab included.

American Sign Language

Campus Programs

LAS111 - Elementary American Sign Language I

Description

This course provides an introduction to the vocabulary, finger spelling, grammatical processes, phonology, syntax and semantics of American Sign Language. Designed to prepare a student with little or no prior experience or knowledge of ASL with basic conversational skills and to discover the various aspects of deafness, the course emphasizes the application of principles of sign language; the psychosocial aspects of deafness; recognition of the deaf person as bilingual; and the grammatical processes that modulate the meaning of sign in discourse. Audiological, educational, social, cultural, and historical aspects of deafness will also be presented.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

LAS112 - Elementary American Sign Language II

Description

This course is a continuation of Elementary American Sign Language I.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete:

ATH111 - Introduction to Cultural Anthropology

Description

This course is the study of preliterate and changing societies that emphasizes social organization and cultural aspects.

Credits

3

Academic Level

Undergraduate

Arabic

Campus Programs

LAR111 - Elementary Arabic and Culture I

Description

This beginning-level course introduces students to the speaking, listening, reading, and writing skills necessary for basic communication in Modern Standard Arabic (MSA), the standard language of the Arab world. Designed for students with no previous course work in Arabic, this course focuses on learning the alphabet, building vocabulary and sentence patterns in communicative contexts, and pronunciation. Students will also be introduced to simple survival skills. Reading and writing will be introduced and acquired through different activities in conjunction with speaking and listening skills. Finally, awareness of the cultures, behaviors, and traditions of the Arabic-speaking world will also be emphasized.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

LAR112 - Elementary Arabic and Culture II

Description

This course is a continuation of LAR-111.

Additional Information

Offered every spring term.

Credits

3

Undergraduate

LAR211 - Intermediate Arabic Language and Culture

Description

This course is an upper-intermediate language and culture course designed for students who have fulfilled the requirements for LAR 112 and/or those who demonstrate an equivalent competence in Modern Standard Arabic. Students successfully finishing this course receive three credits. This course will be conducted approximately 80 to 90% of the time in Arabic. It is designed to improve all your language skills in Arabic, with a special emphasis on the development of reading and listening comprehension as well as speaking skills. Additional attention will be paid to improving students' writing skills. You will be exposed to cultural, historical, and contemporary aspects of the Arabic-speaking world through literary, journalistic, and textbook reading passages, music, videos, advertising, etc. You will practice summarization, description, narration, restatement, and expressing personal feelings and opinions through a variety of writing and speaking tasks.

Additional Information

Offered every fall term.

Credits

3

Requisites

Aviation

AV201 - Aviation Meteorology

Description

Aviation Meteorology provides a theoretical and practical investigation of climate and weather with practical applications for aviation. Students will gain an understanding of the structure and energy of the atmosphere; clouds and precipitation; air-mass circulation and fronts; weather observation, analysis, and forecasting; critical weather phenomena and severe storms; and applications of their understanding to aviation operations.

Credits

3

Academic Level

Undergraduate

AV205 - Aircraft Operations I

Description

This course is the first in a series of two courses that provides a practical introduction to aircraft operational characteristics of importance to aviation managers, operators, support personnel, and air traffic controllers. Topics include: principles of flight; fundamentals of aircraft flight behavior; specific items of aircraft performance such as takeoff/landing performance, climb/descent performance, cruise performance, and turning performance; aircraft operating limitations; aircraft navigation methods and systems and their application. Students will become familiar with the operating characteristics of a representative sample of air carrier, military and general aviation aircraft.

Credits

3

Academic Level

Undergraduate

Campus Programs

AV206 - Aircraft Operations II

Description

This is part two of a two part course that provides an immersion introduction to aircraft operational characteristics of importance to aviation managers, support personnel, and air traffic controllers. Topics include but are not limited to: principles of flight; fundamentals of aircraft flight behavior, weight and balance, flight, instrument flight, the National Airspace System, navigation, rudimentary weather, thunderstorms, and old and new subsystems applications. Students continue to familiarize with the operating characteristics of a representative sample of air carrier, military, and general aviation aircraft.

Credits

3

Requisites

- Complete:
 - AV205 - Aircraft Operations I (3)

Academic Level

Undergraduate

AV207 - Fundamentals of Instruction

Description

Whether you choose teaching as a profession or a stepping stone to the airlines, if conducted with professionalism and enthusiasm, flight instruction can help a beginning pilot strengthen and perfect their technique and deepen the understanding science of flight. The Fundamentals of Instruction class is designed to help guide you to become a good teacher, by working with current professional flight instructors and mentors who guide you to an understanding of human behavior and learning. Fundamentals of Instruction is designed to inspire future instructor pilots by teaching within the framework of an aviation career the application of human learning as it is applied to flight instruction.

Credits

3

Requisites

- Complete all of the following
 - Placement in BS.AOM
 - Complete:
 - PLT101 - Private Pilot Ground (0 - 3)
 - PLT102 - Private Pilot Flight (0 - 3)

Academic Level

Undergraduate

AV220 - Advanced Aircraft and Navigation Systems

Description

This course provides advanced and modern cockpit technology used in commercial and air transport aircraft. This course addresses the advanced functions and operation of the glass cockpits operating equipment such as a variety of flight management systems, NEXTGEN navigation, satellite-based and inertial navigation systems, automatic pilot systems, flight management data systems, electronic flight information systems, ground proximity warning systems, traffic collision avoidance systems, datalink systems, electronic flight publications bags, weather radar, enhanced/synthetic vision systems, flight data, cockpit voice recording systems, and new technologies.

Credits

 - PLT305 - Commercial Pilot III (0 - 3)

Academic Level

Undergraduate

Campus Programs

AV300 - Aviation Logistics

Description

The Aviation Logistics course trains tomorrow's aviation leaders on the optimization of the supply chain to beat the competition. The science of logistics studies the actual tracking and movement of parts, goods, and materials inside and outside of a company. Supply chain items from acquisition, build up, or rebuild move through channels of distribution. The smartest aviation leaders use logistics management to get items to customers on or before promised dates and internally to outperform competition for maintenance turnarounds. Time is money and this course focuses on logistics theory for lower cost or profitable management of aviation materials handling, inventory, planning, capacities, and distribution.

Credits

Undergraduate

AV306 - Human Factors of Flight

Description

The student will explore human physiological processes as affected by flight including high altitude flight, and human cognitive and judgment processes typically required of the human "half" of complex human/machine systems found on flight decks, in air traffic control suites, and in other flight operations contexts, to gain understanding of our unique capabilities and limitations, both as physiological organisms and thinking beings. The student will learn to apply these insights to assessing and improving the performance of flight crews, air traffic controllers, and other operations personnel, and to identify and respond to critical physiological and cognitive factors such as hypoxia, disorientation, and the effects of stress, fatigue, anxiety, and alcohol and other drugs. The student will gain an understanding of medical standards and certification of pilots and other flight personnel, and of available resources for responding to medical deficiencies and/or certification difficulties.

Credits

3

Requisites

- Complete 1 of the following
 - Complete all of the following
 - Placement in BS.AVM, or BS.ATM
 - Complete:
 - PSY108 - Introduction to Psychology (3)
 - Complete all of the following
 - Placement in BS.AOM
 - Complete or concurrently enroll in:
 - PLT105 - Commercial Pilot I (0 - 2)

Academic Level

Undergraduate

Campus Programs

AV314 - Pilot Aerodynamic Fundamentals

Description

This course covers traditional theories of flight and performance factors including airfoil shape, lift and drag, velocity, power and prop setting, thrust, long term and short term stability, control, high speed aerodynamic effect, principles of engine and turbine performance, capabilities and limitations, aircraft performance design, and load factors. AV 314 is an aviation core course required for Aviation Management concentrations in Airline Operations and General and Corporate Management. Note: This course does not suffice for EG314 Aerodynamics for engineering students.

Credits

3

Requisites

- Complete:
 - AV205 - Aircraft Operations I (3)
 - AV206 - Aircraft Operations II (3)

Academic Level

Undergraduate

AV380 - Aviation Flight Instructor Practicum

Description

This course provides an opportunity for students who have completed the FAA Certified Flight Instructor Course to operate inside of and learn the dynamics of a flight school. In partnership with Air Direct Aviation Flight Academy, students will learn the mechanics of the commercial flight training business on-site and prepare themselves to operate as Certified Flight Instructors in an operational environment.

Credits

3

Requisites

- Complete:
 - PLT201 - Fundamentals of Instruction (3)
 - PLT203 - Certified Flight Instructor II (0 - 3)
 - PLT305 - Commercial Pilot III (0 - 3)

Academic Level

Undergraduate

AV401 - Aerodynamics and Aircraft Performance

Description

This course teaches and combines attributes of advanced principles of performance, capabilities, and limitations; performance design criteria; and load factors. This course covers advanced theories of flight and performance factors including engines, limitations engines, limitations of normally aspirated piston engines, limitations of turbine engines, effects of moisture, temperature and altitude, airfoil shape; theories of lift and drag; velocity; power and thrust; stability; controls; high speed aerodynamics; compressibility and mach effects.

Credits

3

Requisites

- Complete:
 - PLT305 - Commercial Pilot III (0 - 3)

Academic Level

Undergraduate

Campus Programs

AV410 - Aviation Safety

Description

This seminar integrates the professional and technical knowledge and methods gained in the flight operations, air traffic control, or aviation management sequences and applies these understandings to the prime objective of achieving aviation system safety. Students will work in multi-disciplinary teams to evaluate and respond to representative case studies drawn from National Transportation Safety Board (NTSB) accident investigations, reports and findings, aviation industry analyses and reports, and analysis and policy statements by government and trade organizations. In addition, students will complete self-assessments of their professional preparation, status of their professional certification, short and mid-term career planning, and long-term career objectives.

Credits

3

Requisites

- Complete 1 of the following
 - Placement in BS.AOM
 - Complete all of the following
 - Placement in BS.AVM
 - 1 of the following:
 - AM320 - Air Carrier Operation (3)
 - AM330 - Business & Corporate Aviation (3)
 - AM460 - Airport Planning and Management (3)
 - Complete all of the following
 - Placement in BS.ATM
 - Complete:
 - AT410 - Sector Resource Management (3)

Academic Level

Undergraduate

AV442 - Aviation Economics and Policy

Description

This course provides a foundation to understand the economics of corporate and commercial aviation. Moreover the course will provide an understanding of the policy formulation process as it impacts the aviation industry. Students will be exposed to the myriad of policy influences including Congressional action, industry advocacy, and state and local government influence.

Credits

3

AV490 - Aviation Internship I

Description

For the AOM major this internship is designed to build flying experience through a three month experience as a Certified Flight Instructor. Students actively teach ground and flight lessons with the goal of maximizing instructor experience and flight time. Students are assigned to an associated flight school for the three month internship. For AVM and ATM majors this internship offers students the opportunity to apply concepts and principles of aviation/air traffic management developed in prior coursework. This internship links aviation principles to practical applications, responsibilities, and higher level aviation skills in a professional work environment under the supervision of current aviation professionals. Department approval is required for aviation intern program enrollment.

Credits

3

Requisites

- Complete 1 of the following
 - Placement in BS.AOM
 - Complete all of the following
 - Placement in BS.AVM, or BS.ATM
 - 60 credit(s).

Academic Level

Undergraduate

AV491 - Aviation Internship II

Description

For the AOM major this internship is designed to build flying experience through a three month experience as a Certified Flight Instructor. Students actively teach ground and flight lessons with the goal of maximizing instructor experience and flight time. Students are assigned to an associated flight school for the three month internship. For AVM and ATM majors this internship offers students the opportunity to apply concepts and principles of aviation/air traffic management developed in prior coursework. This internship links aviation principles to practical applications, responsibilities, and higher level aviation skills in a professional work environment under the supervision of current aviation professionals. Department approval is required for aviation intern program enrollment.

Aviation Management

AM201 - Aviation Law

Description

This course covers the development of air law including federal and state regulatory functions, rights and liabilities of aviators and operators, rights of third parties on the ground, and passengers in tort and contract cases. It also provides a study of international conventions, agreements, and associations such as the International Civil Aviation Organization.

Credits

3

Academic Level

Undergraduate

Campus Programs

AM205 - Aircraft Operating Economics

Description

This course covers the analysis of aircraft operating capabilities, the capital value of aircraft, and the cost of aircraft operation. An emphasis will be placed on identifying the interrelationship between these three factors. Aircraft from the basic general aviation trainers to large commercial transports will be included. Computer applications programs will be used in the analysis and presentation of information.

Credits

3

Requisites

- Complete:
 - AV205 - Aircraft Operations I (3)

Academic Level

Undergraduate

AM215 - General Aviation Operations

Description

This course provides an in-depth study of the general aviation field, including finances, management, operations and regulations. Major concentration will be placed on the management and administration of a fixed-base operation; the duties and responsibilities of the airport manager; and the managerial considerations in the application of the small airplane in business aviation, aerial photography, agricultural spraying, aircraft sales, financing, and insurance. Guest lecturers are often scheduled.

Credits

3

Requisites

- Complete:
 - IT100 - Introduction to Information Technology (3)
 - AM205 - Aircraft Operating Economics (3)

Academic Level

Undergraduate

AM220 - Airport Operations

Description

This course provides an introduction to airport operating practices. Topics will include the history of airport development, landside and airside operations, airport layout, airport equipment, applicable regulations, and the impact of technological advances in air transportation. The course will also introduce students to airport planning, airport finances, managing growth, airport management, and community relations. The course will cover general aviation, regional, and major airports. Field trips may be required.

Credits

Undergraduate

Campus Programs

AM320 - Air Carrier Operation

Description

This course covers analysis of the economic and administrative factors involved in airline operations. An emphasis is placed on demand analysis, pricing, route structure, fleet planning and financing. A simulation of airline operations will be used to provide practical insights into the problems faced in managing an airline.

Credits

3

Requisites

- Complete:
 - AM205 - Aircraft Operating Economics (3)

Academic Level

Undergraduate

AM330 - Business & Corporate Aviation

Description

This course provides an analysis of the operation of corporate/business flight operations, including administration and operations. Topics include how aviation relates to business and industry; the administrative and fiscal concerns of a flight department; maintenance operations and departmental organization; and aircraft and equipment evaluation.

Credits

3

Requisites

- Complete:
 - AM205 - Aircraft Operating Economics (3)

Academic Level

Undergraduate

AM340 - Airport and Airspace Capacity Management

Description

This course provides an analysis of the key elements of airport and airspace capacity. Current techniques for measuring airport and airspace capacity will be examined, including the relationship between delay and capacity, as well as aircraft operating characteristics and airline scheduling practices. The impact of airport development on airspace capacity, including projects such as locating new airports and building new runways at existing airports, will also be explored. The role of federal, state, and local agencies and the private sector will be analyzed in terms of airport/airspace capacity. Computer simulation modeling, such as the FAA's SIMMOD, will be used in analyzing case studies in airspace and airport capacity and delay.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - MAT240 - Applied Statistics (3)
 - AV205 - Aircraft Operations I (3)
 - 1 of the following:
 - AM220 - Airport Operations (3)
 - AT310 - Airspace and Air Traffic Systems Management (3)
 - Concurrently enroll in:
 - AM340L - Airport and Airspace Capacity Management (1)

AM410 - Trends/Current Problems in Aviation Management

Description

This is an honors seminar focusing on contemporary issues, problems, and trends in airline, corporate, and general aviation.

Credits

3

Requisites

- Complete 1 of the following
 - Complete all of the following
 - Earned a minimum cumulative GPA of 3.0
 - 90 credit(s).
 - Permission of Instructor

Academic Level

Undergraduate

AM445 - Aviation Policy Seminar

Description

Aviation policies are primarily established in Washington, D.C. through the enactment of legislation and the DOT/FAA's rulemaking authority. This course analyzes the process by which that policy is established and how various organizations and individuals can affect the final legislation or rule. The first part of the course involves classroom and research activity on a selected aviation policy issue. The second portion of the course is a seminar, held the first week in January in Washington, D.C. during which the students interact with the policy makers to gain a greater understanding of the policy making process. There are travel, hotel, and meal expenses associated with participation in the seminar.

Credits

3

Requisites

- 45 credit(s).

Academic Level

Undergraduate

AM460 - Airport Planning and Management

Description

This is an advanced course in the planning, management, and operation of airports. Students will learn to apply fundamental management theory to airports; determine an airport's capacity and assess the potential for delays; evaluate the environmental impact of an airport; identify the basic components of the National Airspace System and its relationship to airports; apply basic financial management and accounting techniques to airport finances; set airport fees, rates, and charges; understand the process required to obtain capital funding for airport improvements; evaluate and use airport master plans, state airport system plans, and airport layout plans; apply basic principles of terminal design and operations; have a working knowledge of Part 139 of the Federal Aviation Regulations; evaluate the security of an airport; and prepare basic airport emergency response procedures.

Credits

BIO101 - Principles of Biology

Description

Introductory level biology course that includes mammalian cell structure and function, cellular reproduction and physiology, and basic Mendelian genetics. Laboratory exercises (BIO-101L) to follow lecture topics.

Credits

3

Academic Level

Undergraduate

BIO110 - Introduction to Public Health

Description

Introduction to Public Health provides an overview of factors associated with disease affecting populations. Students will be exposed to the history of public health in the United States, its political and social dimensions, basic epidemiology, and current approaches to issues of public health, including health care and health services.

Additional Information

Course offered every fall term.

Credits

3

Academic Level

Undergraduate

BIO120 - General Biology I

Description

General biology course that includes mammalian cell structure and function, cellular reproduction and physiology, and Mendelian genetics. Laboratory exercises (BIO 120L) to follow lecture topics.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

BIO120L - General Biology I Lab

Description

Laboratory course to follow topics presented in BIO 120.

Additional Information

Offered every fall term.

Credits

1

Requisites

- Complete or concurrently enroll in:
 - BIO120 - General Biology I (3)

Academic Level

Undergraduate

Campus Programs

BIO121 - General Biology II

Description

This course builds on information presented in BIO 120. Topics include: principles and history of evolutionary theory, taxonomy, and systematic examination of the five Kingdoms of organisms: Bacteria, Protista, Fungi, Plantae, and Animalia.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete:
 - BIO120 - General Biology I (3)

Academic Level

Undergraduate

BIO121L - General Biology II Lab

Description

Laboratory course to follow topics presented in BIO 121. This course gives students hands-on experience with laboratory techniques, and in-depth investigation and comparison of organisms. Students will observe the structure and function of cells, tissues, and organs. They will also examine evolutionary connections between the five Kingdoms of organisms

Additional Information

Offered every spring term.

Credits

1

Requisites

- Complete or concurrently enroll in:
 - BIO121 - General Biology II (3)

Academic Level

Undergraduate

BIO200 - Bioethics

Description

This course is a survey course in bioethics. Real case studies and readings will be used to familiarize students with current issues. Topics include abortion, life and death issues such as brain death and assisted suicide, experimentation with humans and animals, and public health issues. Students will present case studies for discussion, participate in debates, and learn to justify their own ethical positions related to these issues. This course is useful for anyone who intends to work in health care, laboratory settings, teaching, or biotechnology. Students will have a greater awareness for these important issues, and they will learn how to discuss these sometimes sensitive topics with others.

Campus Programs

BIO205 - Human Anatomy and Physiology I

Description

BIO 205 Human Anatomy and Physiology I is the first of two courses examining the structure, function, and interdependence of human body systems. The course begins at the cellular and molecular levels with a concentration on the organization of the human body as a symbiotic system. The integumentary, skeletal, muscular, and nervous systems provide focal points for case studies and discussions throughout the term. The laboratory component allows the student to integrate and apply theory based knowledge from the course to simulations and critical appraisal exercises.

Additional Information

This course is accompanied by the lab course BIO 205L.

Credits

3

Requisites

- Complete:
 - BIO120 - General Biology I (3)
 - BIO121 - General Biology II (3)

Academic Level

Undergraduate

BIO205L - Human Anatomy and Physiology I Lab

Description

Anatomy and Physiology I lab is a counterpart to BIO 205, in which students will examine tissues, bones, muscles, and the major organ systems. The laboratory will include use of microscopes, visual representation in models, videos, and online dissection. Actual dissections will be utilized when appropriate. This lab course is required for Biology students.

Credits

1

Requisites

- Complete or concurrently enroll in:
 - BIO205 - Human Anatomy and Physiology I (3)

Academic Level

Undergraduate

BIO210 - Introduction to Anatomy and Physiology

Description

Discussion/comparison of the principles of mammalian form and function. Includes molecular and cellular mechanisms of major processes (such as muscle contraction, neural transmission, and signal transduction) and examines the structure and function of the 11 organ systems of the human body. Laboratory exercises (BIO-210L) to follow lecture topics.

Credits

3

Academic Level

Undergraduate

Campus Programs

BIO210L - Anatomy and Physiology Lab

Description

Anatomy and Physiology Lab is a counterpart to BIO-210, in which students will examine tissues, bones, muscles and the major organ systems. The laboratory is hands-on and will include use of microscopes, visual representation in models, videos and online dissection.

Credits

1

Requisites

- Complete or concurrently enroll in:
 - BIO210 - Introduction to Anatomy and Physiology (3)

Academic Level

Undergraduate

BIO211 - Human Anatomy and Physiology II

Description

BIO 211 Human Anatomy and Physiology II is the second of two courses examining the structure, function, and interdependence of human body systems. The course covers endocrine, circulatory, immune, respiratory, digestive, excretory, and reproductive systems. The laboratory component allows the student to integrate and apply theory based knowledge from the course to simulations and critical appraisal exercises.

Additional Information

This course is accompanied by the lab course BIO 211L.

Requisites

- Complete:
 - BIO205 - Human Anatomy and Physiology I (3)
 - BIO205L - Human Anatomy and Physiology I Lab (1)

Academic Level

Undergraduate

BIO211L - Human Anatomy and Physiology II Lab

Description

Human Anatomy and Physiology II lab is a counterpart to BIO 211, in which students will examine tissues, bones, muscles, and the major organ systems. The laboratory will include use of microscopes, visual representation in models, videos, and online dissection. Actual dissections will be utilized when appropriate. This lab course is required for Biology students.

Credits

1

Requisites

- Complete or concurrently enroll in:
 - BIO211 - Human Anatomy and Physiology II (3)

Academic Level

Undergraduate

Campus Programs

BIO215 - People, Places, and Plagues

Description

This course will explore the social, environmental, and community impacts of communicable disease. Significant pandemic, epidemic, and endemic diseases will be examined, in light of catastrophic outbreaks that have shaped the course of human history. Students will be exposed to the thrilling stories of many people who were involved with these events, as victims, investigators, and scientists. Weekly discussion will revolve around students' perceptions of disease, the future of epidemiological studies, and specific questions about microbes and other disease agents.

Additional Information

Offered every spring term.

Credits

3

Academic Level

Undergraduate

BIO270 - Genetics

Description

This course covers the basic principles of eukaryotic cell genetics. Emphasis is placed on the molecular basis of heredity, DNA and chromosomal structure, patterns of Mendelian and non-Mendelian inheritance, gene expression, and biotechnological applications.

Additional Information

Offered every Spring.

Credits

3

Requisites

- Complete:
 - BIO120 - General Biology I (3)
 - BIO120L - General Biology I Lab (1)
 - CHM120 - General Chemistry I (3)
 - CHM120L - General Chemistry I Lab (1)

Academic Level

Undergraduate

BIO280 - The Microbial World

Description

This course exposes students to the fundamentals of microbiology. It opens with a survey of the microbial world and a discussion of the interactions between microbes and host. Students will evaluate microbial diseases of humans, and the environmental and economic impact of microorganisms. The course provides a background in basic and applied microbiology with an emphasis on the role microorganisms play in human health.

Credits

3

Requisites

- Complete:
 - BIO120 - General Biology I (3)
 - BIO120L - General Biology I Lab (1)
 - CHM120 - General Chemistry I (3)
 - CHM120L - General Chemistry I Lab (1)

Academic Level

Undergraduate

Campus Programs

BIO280L - The Microbial World Lab

Description

Laboratory exercises to follow topics presented in BIO 280. Students will focus on developing skills in the laboratory, including microscopy, staining and isolation of bacterial species, identification of microbes, and use of chemical and physical agents to control microbial growth.

Credits

1

Requisites

- Complete or concurrently enroll in:
 - BIO280 - The Microbial World (3)

Academic Level

Undergraduate

BIO302 - Field Ornithology

Description

BIO 302 is an introduction to the biology of birds and the methods of modern field studies. Emphasis will be on identification, life histories, ecology, behavior, and local species of birds. The course involves a major field component, supported by lectures and demonstrations that explore aspects of bird biology and ecology, such as bird morphology and flight, nesting and reproductive displays, diet and feeding behaviors, song, and migration patterns. Lecture and lab will include demonstrations, discussion, and required Thursday or Saturday field trips.

Credits

3

Academic Level

Undergraduate

BIO303 - Principles of Nutrition

Description

This course focuses on the principles of nutrition. Topics for this course include basic knowledge of food nutrients; functions, interactions, and balance of carbohydrates, proteins, lipids, vitamins, minerals, and water in normal human physiology; nutrient deficiency diseases; energy metabolism; nutrition and fitness.

Credits

3

Academic Level

Undergraduate

BIO310 - Culinary Nutrition Science

Description

This course explores scientific principles behind modern culinary techniques that transform raw food product into prepared foods that have sensory appeal. Hands-on kitchen demonstrations show how physical and chemical forces acting on solids, liquids, and gases transform raw ingredients into foods with desirable taste, texture, and aroma. The course also explores the various roles of nutrition professionals within the broader health-care system.

Credits

3

Academic Level

Undergraduate

Campus Programs

BIO312 - Zoology

Description

This course will discuss the anatomy, classification, adaptive physiology, ecology, and evolution of the major phyla of invertebrate and vertebrate animals. Virtual lab exercises and demonstrations will be used to support lecture material.

Additional Information

Offered every even year during the fall term only.

Credits

3

Requisites

- Complete:
 - BIO120 - General Biology I (3)
 - BIO121 - General Biology II (3)

Academic Level

Undergraduate

BIO312L - Zoology Lab

Description

This laboratory course for majors provides hands-on experience with live and preserved specimens that are used to illustrate topics presented in BIO 312 lecture. Students will use techniques including dissection and direct observation to examine the structure and function of animal bodies.

Credits

1

Requisites

- Complete:
 - BIO120 - General Biology I (3)

Academic Level

Undergraduate

BIO314 - Introductory Botany

Description

This course will examine the physiology, genetics, taxonomy, and evolution of plants. Lab exercises, field work, and demonstrations will be used to support lecture material.

Additional Information

Offered in the fall term of every odd year.

Credits

3

Requisites

- Complete:
 - BIO120 - General Biology I (3)
 - BIO121 - General Biology II (3)

Academic Level

Undergraduate

Campus Programs

BIO314L - Introductory Botany Lab

Description

This laboratory course for majors provides hands-on experience with plant specimens, and will utilize dissection and direct observation to illustrate topics that are discussed in BIO 314 lecture. Students will design and conduct original research with plants in lab, which may utilize the Arboretum space on campus, or growth tanks and containers in the lab.

Credits

1

Requisites

- Complete or concurrently enroll in:
 - BIO120 - General Biology I (3)

Academic Level

Undergraduate

BIO315 - Ecological Principles and Field Methods

Description

This course introduces students to the principles of ecology and practical methods used in the field. Students will explore theoretical topics in the ecological systems including the level of the population, community and ecosystem; energy flow and biogeochemical cycles; and the concept of sustainability. Students will read literature and conduct research projects in the field and will use critical thinking to evaluate research, design studies, present findings and debate on the issues.

Additional Information

Offered every fall term.

Credits

3

Requisites

- 1 of the following:
 - ENV101 - Environmental Science (3)
 - ENV219 - Environmental Issues (3)
 - SCI219 - Environmental Issues (3)

Academic Level

Undergraduate

BIO320 - Neuroscience

Description

This course explores the fundamental molecular and cellular events underlying the processing of information and the maintenance of homeostasis. Topics include neurons and glia, the electrophysiology of cells membranes, synaptic transmission, motor and sensory systems, chemical messengers, neuroendocrine interactions, neural circuitry, and selected topics in neuropharmacology. It is strongly recommended that the student take BIO-210 (Intro to Anatomy and Physiology) before taking BIO-320.

Credits

3

Academic Level

Undergraduate

Campus Programs

BIO325 - Animal Behavior

Description

This course will introduce the student to the field of animal behavior. To gain a full understanding of the complexities of this subject, students will study aspects that influence innate behaviors, such as genetics, population biology, evolution and learned behaviors, such as learning theory and cultural transmission. The course examines theoretical and conceptual issues in animal behavior using experiments and case studies to highlight examples. We will focus on many important biological activities such as mating, the role of kinship, cooperation, communication, aggression, and play. In addition to identifying major patterns and processes of animal behavior, we will discuss the observational and experimental techniques used to study behavior and explore the major conceptual models guiding past and current research in this field. The course is offered as an upper level science course aimed at environmental science and psychology majors.

Additional Information

Offered every Spring.

Credits

3

Requisites

- Complete 1 of the following
 - 1 of the following:
 - ENV101 - Environmental Science (3)
 - PSY108 - Introduction to Psychology (3)
 - BIO120 - General Biology I (3)
 - Permission of instructor

Academic Level

Undergraduate

BIO330 - Conservation Biology

Description

This course will focus on the importance of biodiversity. Currently, we are experiencing an unprecedented loss in species; losing, on average, two species a day. Unlike past mass extinctions humans are largely responsible. Following the Society of Conservation Biology's guidelines for conservation literacy, this course will investigate how we can apply biological principals to reverse trends in species loss. We will focus on case studies to develop our understanding of what maintains, reduces, and restores biodiversity. The course will be organized into three sections 1) history and value of conservation biology, 2) threats to biodiversity, and 3) approaches to solving conservation problems.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete 1 of the following
 - 1 of the following:
 - ENV101 - Environmental Science (3)
 - SCI219 - Environmental Issues (3)
 - SCI220 - Energy and Society (3)
 - Permission of instructor

Academic Level

Undergraduate

Campus Programs

BIO340 - Human Health and the Environment

Description

This course examines major environmental health problems in industrialized and developing countries, and evaluates possible future approaches to control of these issues. Topics include dose and response to pollutants, agents and vectors of contamination (air, water, and soil), susceptible populations and risk analysis, the scientific basis of policy and decisions, and emerging global health problems.

Additional Information

Offered every Spring.

Credits

3

Requisites

- Complete:
 - BIO120 - General Biology I (3)
 - BIO120L - General Biology I Lab (1)

Academic Level

Undergraduate

BIO350 - Nutritional Baking Science

Description

Optimizing nutritional benefits of baked goods through the incorporation of various ingredients is a focus of Nutritional Baking Science. Students will learn the role ingredients play in the baking process and how modifications can be made to create nutrient dense baked goods. Recipe modification will be practiced to address common food allergies and special diets. Through the combination of a foundation in science and a hands on approach, students will apply nutritional science theories in the bakeshop to the creation of various baked goods.

Credits

3

Academic Level

Undergraduate

BIO360 - Global Nutrition: Challenges and Opportunities

Description

This course explores how foods are used by different societies and cultures around the world to deliver nutrients and energy. Students will learn first-hand about the evolution of the global food supply, food preparation techniques, food patterns, and eating habits as they relate to diets, nutrition, and personal and public health.

Credits

3

Academic Level

Undergraduate

BIO405 - Evolution

Description

Pattern and process in the evolution of life on earth. Evolution is integrative on many levels because it is the central and the driving force in biology. This course integrates all aspects of biology including significant amounts of genetics and ecology to explain how life on earth has adapted and continues to adapt.

Credits

BIO424 - Vertebrate Morphology

Description

Comparative morphology is the analysis of the patterns of structures within the body plan of organisms, and forms the basis of taxonomical categorization. This course focuses on systematic comparisons between tissues and organs of the vertebrate phyla, including the fossil evidence for these relationships.

Additional Information

Offered spring of odd years.

Credits

3

Requisites

- Complete:
 - BIO121 - General Biology II (3)
 - BIO210 - Introduction to Anatomy and Physiology (3)

Academic Level

Undergraduate

BIO431 - Invasive Biology

Description

Invasive species have had serious economic and ecological impacts around the world. The number of invasive species continues to grow every year, and it is therefore important for people to understand their specific biology, identification techniques, and how to implement management strategies. This course will utilize case studies from New England, the United States, and around the world to illustrate the problems and potential solutions for invasive species. Plant and animal species will be considered, both terrestrial and aquatic, and also the impact of microbes.

Additional Information

Offered spring of odd years.

Credits

3

Requisites

- Complete:
 - BIO120 - General Biology I (3)
 - BIO120L - General Biology I Lab (1)
 - BIO121 - General Biology II (3)
 - BIO121L - General Biology II Lab (1)

Academic Level

Undergraduate

BIO480 - Independent Study

Description

This course offers students the opportunity to study an in-depth research topic not covered in courses listed in the catalog, under the supervision of a faculty member.

Additional Information

Course by arrangement only.

Credits

0 - 3

Academic Level

Undergraduate

Campus Programs

BIO490 - Biology Internship

Description

This course is designed to give the student a working experience in the field of biology. The student will find a site that is of interest and has career potential, and will work out a schedule of hours spent on site or in the community to fulfill the learning outcomes of the course. This is an experiential course in which the student works closely with site supervisors, community members, and faculty mentors. It also provides the opportunity to engage in personal reflection about academic and professional skills related to career choice.

Credits

0 - 15

Requisites

- Complete all of the following
 - Complete:
 - BIO120 - General Biology I (3)
 - BIO121 - General Biology II (3)
 - Please contact the Career and Professional Development Center to register.

Business

BUS205 - Foundations of Business Law

Description

Foundations of Business Law acquaints the business-oriented student with the principles of the law of contracts, agency, and business organizations. In addition, tort law, business ethics, and cyberlaw, will be considered. This course is intended to develop an awareness of, and a logical approach to, the legal factors that affect business decision.

Credits

2

Requisites

- Complete:
 - ENG200 - Sophomore Seminar (3)
 - SB105 - Integration & Application of Business II (2)

Academic Level

Undergraduate

BUS206 - Business Law I

Description

Students will examine the background, foundation, and ethical aspects of the United States' legal system as it applies to business organizations. Students will also learn the impact of torts, product liability, criminal law, contracts, sales, business organizations, and agency and cyber law in a business setting.

Credits

3

Requisites

- Complete:
 - ENG200 - Sophomore Seminar (3)

Campus Programs

BUS210 - Managing and Leading in Business

Description

Students will explore leadership and management theories and how to incorporate them in one's own personal style for effective contribution and collaboration in diverse team environments, and learn about the skills necessary to lead in various organizational structures and areas of business. Students will also examine how the functional areas of business are interrelated and work together in organizations.

Credits

3

Academic Level

Undergraduate

BUS225 - Critical Business Skills for Success

Description

Students will learn the critical business skills required for successful leadership and management in organizations. By applying business research skills and data analysis, students will solve problems and support business decisions. Students will also explore various techniques and forms of professional communications and their uses in business contexts.

Credits

3

Requisites

- Complete:
 - MAT240 - Applied Statistics (3)

Academic Level

Undergraduate

BUS303 - Foundations of Business Law II

Description

Business Law II continues the studies from Business Law I, and acquaints the business-oriented student with the principles of the law of sales, agency, bankruptcy, creditor's rights and business organizations. This course is intended to develop an awareness of, and a logical approach to the legal factors that affect business decisions.

Additional Information

Offered every spring term.

Credits

Campus Programs

BUS307 - Business Law II

Description

The study begun in Business Law I continues as the topics of commercial paper, real and personal property, creditors' rights and bankruptcy, agency, business organizations, estate planning and government regulation of business are explored.

Credits

3

Requisites

- 1 of the following:
 - BUS205 - Foundations of Business Law (2)
 - BUS206 - Business Law I (3)

Academic Level

Undergraduate

BUS400 - Driving Business Opportunities

Description

Students will examine the process of formulating strategic plans and maximizing organizational potential, and explore ways in which organizational and external risk and growth opportunities impact strategy. Students will also evaluate the potential of business decisions in relation to gaining a competitive advantage and defend the ways in which strategic decisions align with organizational goals.

Credits

3

Requisites

- Complete:
 - ACC201 - Financial Accounting (3)
 - ACC202 - Managerial Accounting (3)
 - ECO201 - Microeconomics (3)
 - ECO202 - Macroeconomics (3)
 - BUS210 - Managing and Leading in Business (3)
 - BUS225 - Critical Business Skills for Success (3)
 - FIN320 - Principles of Finance (3)
 - MKT205 - Applied Marketing Strategies (3)
 - QSO323 - People, Planet, and Profit (3)

Certificate Advanced Graduate Study

CAGS507 - Leadership for Learning

Description

This course will focus on the knowledge, skills and abilities of a principal to be an instructional leader in his or her building. Learners will study effective instructional practices, levels of rigor and student engagement practices in schools. We will explore aligning those practices to the expectations of state standards at various grade levels. The focus of the course will be to apply knowledge, skills and abilities of an instructional leader so that the outcome of their leadership work is about academic success for all students.

Credits

CAGS508 - Effective Management

Description

This course offers a study of the leadership, management, and safe operations of a school facilities and an understanding of school finances as it relates to the teaching and learning process. Leaders will learn how to facilitate and engage school board members in a discussion about how school finance and facilities related to student achievement. Learners will examine various tools and methodologies that support the school process and how to engage and connect the community members in the budget building process. This course aims to make leaders better managers and consumers of financial information rather than budget officers; learners will better understand the real world implications and consequences of how they allocate funds based on the process and decisions they make.

CAGS511 - Foundations of Competency-Based Education

Description

This course is designed to help you build the knowledge and skill you need to become a spokesperson, advocate, and change agent for advancing competency education. In the first part of the course, you'll learn what competency-based education is, why we need competency education, and explore different national models of competency education. In the second part of the course, you'll learn about five essential elements of competency-based education and examine relationships between these elements. In the third part of the course, you'll explore four key issues facing competency education, alongside effective strategies for addressing these issues. In the final part of the course, you'll apply your learning by working with a collaborative team to design and test a prototype that addresses an issue related to competency education in your local context.

CAGS517 - Facilitating Project-Based Learning in a Competency-Based System

Description

In this course module, you'll build knowledge and skill in four key areas related to facilitating project-based learning: student engagement, sustained inquiry, scaffolded learning, and progress monitoring. You'll engage with resources for each area and create your own representation of what each facilitation skill means to you in the context of facilitating PBL. Next, you'll participate in a supported facilitation model where you'll submit reflections and video footage in our online community. You'll respond to others' reflections so that everyone is giving and receiving feedback to improve their PBL facilitation. Finally, you'll synthesize your learning into a final presentation that demonstrates how you facilitate PBL in your context.

CAGS518 - Foundations of Student Agency in a Competency-Based System

Description

In the Student Agency Foundations module, learners will engage in four foundational practices for cultivating student agency: establishing safe and supportive environments; providing opportunities for student voice and choice; designing and leading empowering learning experiences; and creating a culture where everyone - including the teacher - gives and receives feedback for continuous growth. Learners will participate in a experiential cycle for each foundation area, including empathizing with the learner, active learning and experimentation, and reflecting and responding. By the end of the module, learners will have designed and implemented four prototypes, one for each foundational practice. In the culminating performance task, learners will document, synthesize, and reflect on learning across these four prototypes.

CAGS519 - Performance Assessment for Deeper Learning in a Competency-Based System

Description

This course module assumes that you already have a strong foundation in key concepts and skills related to performance assessment and formative assessment. We'll build on your understanding and skill to ensure that we're designing performance assessments and supporting instruction to capture deeper learning. Assessing students' ability to demonstrate key academic skills and content is important, but what about key workforce skills and dispositions such as collaboration, communication, creativity, and self-direction? In this module we'll make the case for developing integrative performance tasks that capture student learning of academic skills, academic content, and essential skills and dispositions. Then we'll provide tools and activities to help you design integrative assessments and supporting instruction and formative assessments.

Credits

3

Academic Level

Graduate

CAGS521 - Assessing in a Competency-Based Classroom (Performance Assessment Essentials) in a Competency-Based System

Description

In this course module, we'll explore foundational concepts in assessment, including comprehensive and balanced assessment, validity, reliability, and the importance of multiple measures. We'll also focus on two foundational assessment practices: formative assessment and feedback. You will frequently reflect and work to grow your practice over the course of this module. Key learning evidence will involve demonstrating your improved formative assessment and feedback practices.

CAGS527 - Leadership for Learning in a Competency-Based System

Description

This course will focus on the knowledge, skills and abilities of leadership team dedicated to being leaders of learning in the district. Learners will study effective instructional practices, levels of rigor, learner empowerment, and student engagement practices in schools. We will explore aligning those CBE practices to the expectations of state standards at various grade levels. The focus of the course will be to apply knowledge, skills and abilities of the leaders of learning so that the outcome of their work is about building teachers capacity (growth) in a CBE system and promoting academic success for all students.

Credits

Graduate

CAGS534 - The Development of a Mission, Vision and Goals in a Competency-Based System

Description

This course will focus on the knowledge, skills, abilities and dispositions a leadership team needs to focus on in order to facilitate the process of developing a district's school's vision, mission, and goals that focus on CBE. Learners will discuss how to meet personalized state expectations, state standards, the community and school expectations, and the needs of the students through an inclusive and collaborative process. Different processes for meeting the demands of the articulated vision, mission, and goals will be researched and discussed. All learners will have the opportunity to create a process to simulate how they would engage people in this process and insure that the CBE vision, mission, and goals are articulated in a way that the school can meet the challenge of increasing student achievement in a personalized way.

Credits

2

Academic Level

Graduate

CAGS550 - Educational Assessment

Description

This course focuses on the forms and appropriate use of educational assessment. Students construct and administer an assessment tool to elementary/secondary students and then analyze the resultant data. Students examine the use of assessment at the individual, class, and school levels, particularly the New Hampshire statewide assessment and published norm-referenced tests used in the special education placement process. This course examines a variety of assessment techniques for evaluating and documenting student performance and toward desired outcomes.

CAGS608 - The Curriculum, Instruction and Data Continuum

Description

This course builds on previous courses, Curriculum Development, Student Centered Curriculum and Instruction, and Educational Assessment. The course will focus on building a continuous process to monitor, support and hold accountable the system for implementing an effective curriculum, monitoring instructional strategies, and collect data to inform us of the successful implementation of the curriculum. Levels of proficiency are needed in order to show gaps between the intended curriculum and success in the implementation of the instructional strategies. Leaders will develop strategies to engage teachers in changing instructional strategies to close the gaps in achievement.

Chemistry

CHM101 - Fundamentals of Chemistry

Description

An introductory, general education course for the non-science major emphasizing the contribution of chemistry in our everyday lives. This course will enable students to look at various aspects of the world around them through the lens of chemistry. It will introduce basic concepts and applications of chemistry as well as chemical topics and their relationship to matters of societal concern.

Credits

3

Academic Level

Undergraduate

CHM120 - General Chemistry I

Description

First semester of a one-year sequence covering the basic principles of chemistry. Topics include atomic and molecular theory and structure, the chemical and physical behavior of gases, liquids, solids, and solutions; chemical bonding; chemical equations and thermochemistry.

Additional Information

Offered every fall term.

Credits

3

Requisites

- Concurrently enroll in:
 - CHM120L - General Chemistry I Lab (1)

Academic Level

Undergraduate

Campus Programs

CHM120L - General Chemistry I Lab

Description

This course will introduce laboratory techniques that will be used to gain fundamental knowledge of chemical systems associated with the subject matter of CHM 120 - College Chemistry I

Additional Information

Offered every fall term.

Credits

1

Requisites

- Concurrently enroll in:
 - CHM120 - General Chemistry I (3)

Academic Level

Undergraduate

CHM121 - General Chemistry II

Description

Second semester of a one-year sequence covering the basic principles of chemistry. Topics include chemical equilibria; acid-base chemistry; electrochemistry; kinetics and nuclear chemistry.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CHM120 - General Chemistry I (3)
 - Concurrently enroll in:
 - CHM121L - General Chemistry II Lab (1)

Campus Programs

CHM200 - Environmental Chemistry

Description

This course explores how the origin, reactivity, and fate of chemical compounds in both natural and polluted environments shapes the environmental impacts of a full range of agricultural, energy-related, manufacturing, waste disposal, and other human activities. By using the fundamental principles of chemistry as a lens through which to explore the environmental impacts of these activities, students acquire an in-depth understanding of how humanity is reshaping the chemical composition of the atmosphere, hydrosphere, and lithosphere, and greater insight into the many threats posed by these changes to both ecosystems and human health.

Additional Information

Offered every even year during the spring term only.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:
 - ENV219 - Environmental Issues (3)
 - SCI219 - Environmental Issues (3)
 - ENV101 - Environmental Science (3)
 - Complete:
 - CHM101 - Fundamentals of Chemistry (3)

Academic Level

COM126 - Introduction to Mass Communication

Description

This communications survey course covers mass media, culture, and society. The course focuses on how and why the US media operate as they do, as well as on how media performance might be improved.

Credits

3

Academic Level

Undergraduate

COM128 - Language and Practice of Media Arts

Description

This is an introduction to the practice of media production and the study of visual media literacy. The course examines the fundamental components and structure of moving image texts, explores how dynamic relationships between those elements convey meaning, and then exercise that knowledge through media production. Production design, language, technology, and methods will be discussed enabling all students in the class to have a common language of image analysis and creation. Readings and discussions on topics such as cinematography, narrative meaning, image and sound design, editing, genres, and culture will be included. Creative interpretative and expression of ideas will be exercised in the production of media.

Credits

3

Academic Level

Undergraduate

COM130 - Media Communication and Visual Literacy

Description

Examine the concept of media literacy. Practice deconstructing media messages to recognize their potential effect. Understand how media literacy is associated with an individual's role as a consumer of and participant in media.

Credits

3

Academic Level

Undergraduate

COM212 - Public Speaking

Description

This course is designed to help students develop abilities, including organization and delivery skills, for all speaking situations. The evaluation and improvement of voice, diction, articulation and posture also are studied. May not be used as literature elective.

Credits

3

Academic Level

Undergraduate

Campus Programs

COM220 - Intercultural Communication

Description

In a time of increasing globalization it is important to understand how communication differs in other cultures. This course is designed to expose students to a variety of different cultures through organizational and business communication. Students will study specific countries each semester and learn successful communication strategies for each culture through lectures, panel discussions/guest speakers, and a variety of individual and group projects.

Credits

3

Academic Level

Undergraduate

COM227 - Public Relations

Description

This course introduces students to the theory and practice of public relations in the United States. Students study the major figures in this field as well as organizations, their behavior, and the relationships between organizations and their publics.

Additional Information

Offered every fall term.

Credits

3

Requisites

- 1 of the following:
 - ENG121 - College Composition II (3)
 - ENG200 - Sophomore Seminar (3)

Academic Level

Undergraduate

COM230 - Graphics and Layout in Print Media

Description

This course is an introduction to the principles and practices of graphic design. Students are introduced through lecture, demonstration and hands-on computer work to the basic elements of graphic visual communication. Adobe Illustrator is used as a primary tool in exploring visual perception through a variety of creative exercises that familiarize the student with basic visual principles such as figure/ground manipulation, shape grouping, letterform shape creation, and grid and system creation. Formal elements of graphic design such as line, shape, color, texture, pattern, balance, symmetry, rhythm, space and unity are thoroughly explored by example and hands-on computer exercises; special topics included are: designing with type, layout strategies, logo design, symbol and pictogram development and stationery systems.

Credits

3

Academic Level

Undergraduate

Campus Programs

COM232 - Desktop Publishing

Description

This course is an introduction to the software application Adobe InDesign designed for the novice user. Students are introduced to the creative and practical aspects of the desktop publishing program that is considered indispensable in the contemporary communications and design industries. This course is based on a series of introductory exercises and a regimen of hands-on practice that teaches software and design skills; students learn how to combine the use of professional graphic design and word-processing software applications.

Credits

3

Requisites

- Complete:
 - COM230 - Graphics and Layout in Print Media (3)

Academic Level

Undergraduate

COM234 - Digital Toolbox

Description

This hands-on course allows student to learn and explore industry-standard software in preparation for more advanced graphics, design, and video production courses. In addition, the important techniques of imaging software integration and file format compatibilities are discussed and applied while preparing images for print, video and Web. At the conclusion of this course, students will have developed and assembled a multimedia portfolio presentation for public viewing.

Credits

3

Academic Level

Undergraduate

COM235 - Multimedia Journalism

Description

This writing practicum introduces students to writing for print and electronic media under deadline. Gathering information by using records, documents, observation, interviewing, and the Internet. Emphasis on library resources, electronic databases, and current events. Basic style and editing based on AP Stylebook and Libel Manual and AP Broadcast News Handbook.

Credits

3

Requisites

- 1 of the following:
 - ENG121 - College Composition II (3)
 - ENG200 - Sophomore Seminar (3)

Academic Level

Undergraduate

Campus Programs

COM237 - Journalism Practicum

Description

The option for this practicum is print journalism. Students have the opportunity to publish the student newspaper. Students interested in receiving credits for this practicum must present portfolios of their work. The newspapers' editorial board and faculty advisor assign credits.

Credits

1 - 6

Academic Level

Undergraduate

COM238 - Radio Practicum

Description

Students have the opportunity to participate in the university radio station, Radio SNHU, as on-air disc jockeys, on the governing board, or both. Students interested in receiving credits for this experience must present portfolios of their work. The Department of Communications in association with the station's faculty advisor/s assigns credits.

Additional Information

Course by arrangement only.

Credits

0 - 2

Academic Level

Undergraduate

COM244 - Digital Video Production: Level I

Description

This course introduces the student to video aesthetics, and techniques, as well as providing students with hands-on production experience. Video will be approached as a creative visual communication tool for the exploration of abstract concepts, creative endeavors and the human condition. Skills covered in the class will include the fundamentals of all stages of production, use of the camera as a visual tool, audio, lighting, and editing in a digital non-linear environment. Students attend lectures and technical demonstrations, view work of various video and film directors, complete production planning and coordination, and produce creative projects.

Credits

3

Academic Level

Undergraduate

COM310 - Social Media

Description

The possibilities and dangers of social media increase daily. This course explores the history, technology, impact, and strategies of social media. Students will examine the uses of social media for business, personal branding, community building, journalism, affecting change, and marketing communications. The course provides hands-on experience with the most current technology.

Credits

3

- 1 of the following:
 - ENG121 - College Composition II (3)
 - ENG200 - Sophomore Seminar (3)

Academic Level

Undergraduate

Campus Programs

COM320 - Exploring World Cultures/Mass Media

Description

This course seeks to expand global cultural understanding and communication by examining pop culture and media systems in various countries. Students will have the opportunity to expand their cultural perspective by exploring music, film, television, radio, print media, technology, and urban and youth culture. Topics will include media imports and exports, media audiences, media financing and regulation, media research and reporting, media effects, media ethics, meaning and communication through media, and intercultural communication. In lieu of a text students will use extensive Internet research, personal interviews, podcasts, discussion boards, various supplemental material, and independent cultural exploration. Classes will consist of brief lectures, discussion, viewing of media, and in-class research and projects.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:
 - COM126 - Introduction to Mass Communication (3)
 - COM128 - Language and Practice of Media Arts (3)
 - 1 of the following:
 - ENG121 - College Composition II (3)
 - ENG200 - Sophomore Seminar (3)

Academic Level

Undergraduate

COM322 - Advanced Public Speaking

Description

This course provides students with the skills to produce effective oral presentations in professional contexts. The course includes formal individual speeches as well as interactive and group presentations. It is run as a seminar to provide students with experience as moderators.

Credits

3

Requisites

- 1 of the following:
 - COM212 - Public Speaking (3)
 - ENG200 - Sophomore Seminar (3)

Academic Level

Undergraduate

COM337 - Journalism Practicum II

Description

The option for this advanced practicum is print journalism at the executive board (editorial staff) level on the student run newspaper. Students interested in receiving credit for this practicum must assume the editorial roles to operate and publish the student newspaper; and present portfolios of their work at the end of the academic year. The faculty advisor awards credit(s) based on student participation and involvement at the editorial staff level, and quality of portfolio based on work completed over the academic year.

Credits

1 - 6

Requisites

- Complete:
 - COM237 - Journalism Practicum (1 - 6)

Academic Level

Undergraduate

COM340 - Writing for Public Relations

Description

Survey course requiring copywriting in public communication formats, including news releases, features, editorials, brochures, executive summaries, company profiles, newsletters and annual report copy.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete:
 - COM227 - Public Relations (3)

Academic Level

Undergraduate

COM344 - Digital Video Production: Level II

Description

Students will continue gaining hands-on production experience and will increase their knowledge of video theory, aesthetics, and techniques. Video will be approached as a creative visual communication tool for the exploration of abstract concepts, creative endeavors, and the human condition. Emphasis will be on writing, lighting, sound design, directing, editing, and production management. Students will attend lectures and technical demonstrations, view work of various video and film directors, and produce creative projects individually and in groups.

Additional Information

Offered every fall term.

Credits

3

Requisites

- Complete:
 - COM244 - Digital Video Production: Level I (3)

Academic Level

Undergraduate

COM345 - Animation and Visual Effects

Description

This hands-on technical course provides training for the use of Adobe After Effects, the industry standard software utilized for animation, visual effects, and motion graphics in film, video, multimedia, and the Web. Students will be attending lectures and technical demonstrations, viewing various After Effects creations, completing exercises, and producing short projects with After Effects. Given the breadth of possibilities open to the After Effects artist we will focus our efforts on learning the objectives listed below.

Credits

3

Requisites

- Complete:
 - GRA220 - Introduction to Digital Imaging (3)

Undergraduate

Campus Programs

COM410 - Applied Strategic Communication

Description

In this course students will learn how to write for the digital age across various media and will create a robust portfolio and knowledge base of modern communication materials and tactics to help publics survive and thrive in the digital age. As businesses, nonprofits, government organizations, celebrities, sports teams, and individuals continue to expand their online presence, communications professionals will be called upon to help them navigate a complex digital world. Through real-world scenarios and examples, students will analyze the social, political, economic, and cultural context of communication in a rapidly changing and complex world while integrating the latest thinking in how to design and execute powerful and successful digital communications strategies.

Credits

3

Requisites

- Complete:
 - COM130 - Media Communication and Visual Literacy (3)
 - COM227 - Public Relations (3)

Academic Level

Undergraduate

COM430 - Organizational Communications

Description

This course gives students the opportunity to develop skills, knowledge, and philosophies in organizational communication through lectures, research, readings, discussions, application, and written assignments. Emphasis is placed on verbal and nonverbal communication, cultural communication, interpersonal relationships within organizations, and dealing with the future and change.

Credits

3

Requisites

- Complete:
 - COM212 - Public Speaking (3)

Academic Level

Undergraduate

COM435 - Feature Writing

Description

This course is for students who want to explore feature writing as a means of improving their research and writing skills or to pursue a print journalism focus in the communication major. Students will learn how to develop and organize ideas, adapt their writing for specific audiences and revise and polish their prose style.

Credits

3

Requisites

- Complete:
 - COM235 - Multimedia Journalism (3)

Academic Level

Undergraduate

Campus Programs

COM452 - Public Relations Campaign Planning Seminar (Capstone)

Description

This capstone course offers practice in managing communication campaigns from the public relations perspective and emphasizes the production and presentation of campaign plans. Students will develop and pitch a campaign for a real client.

Additional Information

Offered every fall term.

Credits

3

Requisites

- Complete:
 - COM227 - Public Relations (3)
 - COM340 - Writing for Public Relations (3)

Academic Level

Undergraduate

COM454 - Documentary Video Production

Description

This advanced-level course combines the study of the documentary genre with hands-on documentary video production. Through film viewings, readings, and discussions, students will explore the issues and obstacles that have faced documentary filmmakers through the years. They will then explore these issues through their own creative practice in the documentary genre. Students will write and defend documentary project proposals, and will work in groups and individually on documentary projects.

Additional Information

Offered every other spring.

Credits

3

Requisites

- Complete:
 - COM244 - Digital Video Production: Level I (3)

Academic Level

Undergraduate

Campus Programs

COM455 - Commercial Video Production

Description

This advanced level, hands-on course provides additional technical training for video production, and assists the student in learning what is involved in setting up a video production business, or working in the commercial/corporate video production industry. Topics could include electronic field production(EFP), working with clients and talent, audience and market considerations, purchasing equipment, producing budgets, maintaining production records, gaining music rights, video graphics, video streaming and conferencing, and careers in the industry. Students will be attending lectures and technical demonstration, viewing various productions, completing production planning and coordination, and producing commercial/corporate projects.

Additional Information

Offered every other spring.

Credits

3

Requisites

- Complete:
 - COM244 - Digital Video Production: Level I (3)

Academic Level

Undergraduate

COM490 - Communication Internship

Description

The communication internship provides an opportunity for students to apply their skills and communication expertise in a supervised, career-related experience. Students will be measured on their professionalism and effectiveness by an internship supervisor and will reflect on their personal and professional goals as they relate to the internship experience.

Credits

0 - 15

Academic Level

Undergraduate

COM492 - Digital Media Internship

Description

This internship experience, for Digital Media majors, enables students to use 3, 6, or 12 credit hours of free electives for placement in a supervised, career-related work experience. Students report on the experience as required by the co-op education syllabus. The Career Development Center administers the experience and the program coordinator/department chair provides the academic evaluation.

Additional Information

Course offered as needed.

Computer Information Systems

Campus Programs

CIS255 - Applied Data Structure and Database

Description

This course reviews the data structure concepts such as link lists, stack and queues, binary trees, graph representation and traversals, sorting, and hashing. The course is also an introduction to the basic principles and practices underlying the analysis, design, and implementation of the database, as they are used in the contemporary business environment. Students will learn the major approaches used in designing database applications. Students will also learn the details of the logical and physical design techniques of data modeling. The course has an extensive hands-on technical component using Structured Query Language (SQL).

Credits

3

Academic Level

Undergraduate

CIS315 - Information System Requirements and Design

Description

This course focuses on software engineering principles and practices underlying the analysis, design, implementation and management of computer-based information systems. The course involves use of the unified modeling language (UML) and Agile (SCRUM) methodology, through the vehicle of a student group project, applying various elements to the system development life cycle. This course is writing and lab intensive, as project teams are required to submit a comprehensive project, with report and presentation.

Credits

3

Academic Level

Undergraduate

CIS335 - Business Systems Applications

Description

This course covers a variety of business types and the appropriate information systems to help run them. Students will demonstrate an ability to identify and model a business process with the goal of improving the process with a business system application. Examples include systems to assist in customer relationship management (CRM), enterprise resource planning (ERP), helpdesk management, payroll, accounting, decision-making, supply chain management, and other business functions. The course also covers the pros and cons of various means of acquiring information systems, for example using cloud services, purchasing software, using public domain software, building software in-house, and integrating multiple business applications into a whole. Students will gain hands-on experience with several business system applications, gain experience in proposing and justifying recommendations of information systems for particular businesses, and gain experience in quantifying the effectiveness of a business system applications.

CIS410 - Enterprise Systems

Description

Enterprise Systems are now essential infrastructure to organizations of all sizes, as well as they remove the need to have individual business systems within functional departments. This course examines the implementation process of enterprise systems and how these systems fit into business operations. Functionalities of enterprise systems will be presented and analyzed, including enterprise resource planning (ERP) systems, customer relationship management (CRM) systems, and supply chain management (SCM) systems. Topics covered include business processes, implementation tools and methodology, project planning, enterprise systems integration, vendor/product selection and web services.

Credits

3

Requisites

- 60 credit(s).

Academic Level

Undergraduate

CIS435 - Capstone in Information Systems

Description

The course is designed for students to learn to integrate a large number of concepts they have studied in previous course work within the department and school. The class uses a case/project-based design that requires students to identify and develop a detailed managerial analysis of an information technology and/or computer information system (IT, CIS) project, and design an implementation plan that takes into account business needs and constraints. This requires the knowledge, skills, tools, and techniques of systems analysis and design, project management, quality assurance, and people management. Students will work in teams, and will be required to present their solutions as a way of honing their communication skills.

CIS490 - Computer Information Systems Internship

Description

The primary goal of the internship experience is to expose students to actual practices in the world of work outside of the classroom, to relate this experience to academic coursework and to synthesize the two in a practical application of knowledge in an experiential setting. Secondly, internships offer the opportunity to develop crucial job searching skills, explore career interests, enhance your resume, make contacts in your chosen field and build references for future employment. Each intern will work in a career-related position during the academic term for which the student is enrolled for the internship - fall, spring or summer - completing a minimum of 150 hours on the job per 3 credits.

CIS530 - Design of Decision Support Systems

Description

This course will have students dive into what decision support systems are and how to design one on their own. Decision support systems help support managerial decisions through the use of information technology, data, and models to aid in making decisions. This requires knowledge of the data and how to access it. Students will need to gather requirements to determine what the decision support system should do to provide useful information to the user. Also, students will be leveraging querying and scripting languages to extract useful information from the business data. Various technologies will be studied in the course as the environment of decision support systems is ever changing. The concepts learned in this class will help students design a working decision support system that provides valuable information to the end user.

CS110 - Fundamentals of Programming

Description

This course introduces non-programming majors to the fundamental concepts of programming. The course assumes no prior programming experience. Students study the basics of programming including an introduction to variables, data types, looping, conditional logic, methods, and built-in collections. Students gain valuable problem solving skills and programming experience by writing simple computer applications using Python programming language.

Credits

3

Academic Level

Undergraduate

CS113 - Introduction to Programming

Description

A modern programming language is used to introduce conditional and iterative control structures, subprograms and parameter passing, arrays and records, dynamic memory allocation and linked lists, and recursion. In the required laboratory, students will write programs which exercise these language features.

Credits

3

Requisites

CS331 - Computer Security

Description

With the proliferation of personal computers and Internet and the fact that cyber attacks have turned more aggressive in recent years, computer security becomes mandatory for all connected computer systems. This course first covers the fundamentals of security concepts and provides students with the skills required to recognize and diagnose potential security issues in computer and network systems. Through lectures, readings, and virtual labs which combines cloud computing and virtualization technologies to offer different scenarios of security issues to practice, students will learn how to implement access controls and cryptography to protect computer systems and data, how to analyze risk and set up response and recovery plans, how to administer security operations and administration, and how to audit, test, and monitor the security plans. Other topics include security standards, security education and training, security professional certifications, and US compliance laws. At the conclusion of the course, students will have a heightened sense of security in the actions they take when using and maintaining computer systems.

Credits

3

Requisites

- Complete:
 - CS114 - Intro to Software Engineering (3)

Academic Level

Undergraduate

CS361 - Computer Software and Operating Systems

Description

This course explores the major components of an operating system. Topics covered include processes, threads, mutual exclusion and synchronization, deadlock and starvation, memory management, virtual memory, scheduling on single and multiprocessors, I/O management and scheduling, and file systems.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CS218 - Data Structure and Algorithms (3)
 - CS219 - Computer Architecture I (3)
 - 1 of the following:
 - CS328 - Embedded Systems (3)
 - IT251 - Introduction to Unix/Linux Operating System (3)
 - Course Not Found
 - CS238 - UNIX Programming (3)

Academic Level

Undergraduate

Campus Programs

CS407 - Principles of Machine Learning

Description

With the exponential growth of both available data and computing power, Machine Learning becomes increasingly important and essential knowledge. This course introduces the concept of Machine Learning, commonly used Machine Learning algorithms, and the available tools using Python libraries such as NumPy, SciPy (Scikit-learn), and Panda. Different types of learning algorithms including supervised learning, unsupervised learning, and reinforcement learning are discussed. Some common Machine Learning algorithms are examined in applications with example problems – training the data, finding a model, and making predictions. Practices are done in Python coding. Other topics covered are data visualization, training/testing data and making predictions from the model, model evaluation and parameter tuning.

Credits

3

Requisites

- Complete:
 - CS218 - Data Structure and Algorithms (3)
 - MAT350 - Applied Linear Algebra (3)

Academic Level

Undergraduate

CS411 - Artificial Intelligence

Description

This course provides an introduction to the theories, methods and problems of AI. Knowledge representation, natural language processing, computer vision, neural networks, path finding (A*, navigation meshes) and machine learning will be covered. Discussion of concepts such as intelligence, cognition, personality, and the Winograd/Turing test will be addressed. Practical implementations will be explored in the context of game AI.

Credits

3

Requisites

- Complete:
 - CS218 - Data Structure and Algorithms (3)

Academic Level

Undergraduate

CS413 - Software Engineering Project I

Description

This course is the first part of a two semester sequence. Students will apply the theoretical principles of software engineering to a major software project. The project will be carried through the SDLC from problem definition to implementation with the course evaluation based on deliverables. This two course sequence may be in lieu of a computer science internship.

Credits

3

Requisites

- Complete:
 - CS204 - Sophomore Software Engineering II (3)

Academic Level

Undergraduate

Campus Programs

CS414 - Software Engineering Project II

Description

This course is a continuation of CS413. Students will apply the theoretical principles of software engineering to a major software project. The project will be carried through the SDLC from problem definition to implementation with the course evaluation based on deliverables. This two course sequence may be in lieu of a computer science internship.

Credits

3

Requisites

- Complete:
 - CS413 - Software Engineering Project I (3)

Academic Level

Undergraduate

CS425 - Systems Architecture

Description

An examination of the relationship between hardware and software. The compiler writer's viewpoint as well as the architect's viewpoint are analyzed in various areas, including instruction set design and addressing modes. Advanced topics in operating systems, especially interrupt mechanisms, memory management and processor management are also discussed. Various commonly used architectures will be compared.

Credits

3

Requisites

- Complete:
 - CS361 - Computer Software and Operating Systems (3)

Academic Level

Undergraduate

CS490 - Computer Science Internship

Description

This course provides students with the opportunity to work with a company in the software engineering field. It allows the student to link academic principles to practical applications and to develop responsibility, and interpersonal and communication skills. Department approval of internship description required.

Credits

3 - 15

Requisites

- Complete or concurrently enroll in:
 - CS304 - Junior Software Engineering II (3)

Academic Level

Undergraduate

Construction Management

Campus Programs

CM100 - Fundamentals of Building Construction and Management

Description

This course surveys current materials and methods used in building construction, including building foundations, timber, concrete and steel framing systems, masonry construction and interior and exterior finishes. Topics in construction management will stress the centrality of construction management in the evolution and expansion of the built environment and societal issues. Current large-scale projects, industry trends, and technologies will be discussed.

Credits

3

Academic Level

Undergraduate

CM115 - Construction Plan Reading and Building Codes

Description

This course examines construction plans necessary to organize and supervise construction work. The course covers interpretation of construction plans, symbols, scales, formats, specifications, and building codes and includes field trips and instruction in architectural, structural, mechanical, electrical and general construction details. Students will examine the relationship among drawings, specifications and codes and how to use the included design information to perform a quantity takeoff, an estimate, or build a project.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CM100 - Fundamentals of Building Construction and Management (3)
 - Concurrently enroll in:
 - CM120 - Computer Graphics Applications for Construction (3)

Academic Level

Undergraduate

CM120 - Computer Graphics Applications for Construction

Description

This course explores the development and interpretation of civil, architectural, structural, and electrical drawings; freehand sketching of construction details and sections; computer aided construction drafting. Computing techniques are used for the formulation, analysis and solution of typical construction management problems. Industry CAD standards such as AutoCAD Revit and AutoCAD NAVISWORKS for Building Information Modeling (BIM) will be used.

Credits

3

Requisites

- Concurrently enroll in:
 - CM115 - Construction Plan Reading and Building Codes (3)

Academic Level

Undergraduate

Campus Programs

CM200 - Statics for Building Construction

Description

This course is designed to engage student's curiosities of structural concepts in an easily understandable manner using examples found in building construction. Students will become involved in the discovery of fundamental structural static concepts that encompass architecture & building construction; forces, moments, equilibrium, support conditions, and free body diagrams. Participants of this course will analyze and design beams and trusses using resultants and equivalent force systems, method of joints and method of sections. Participants will create shear and moment diagrams to interpret real world loading examples. To see the implications of statics in the built environment there is a heavy emphasis on illustrations and modeling exercises to link the structural theory to building practices and the basic structural components used in everyday construction.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - PHY215 - Physics I (3)
 - 1 of the following:
 - MAT224 - Calculus I: Single-Variable Calculus Part B (3)
 - MAT225 - Calculus I: Single-Variable Calculus (3)

Academic Level

Undergraduate

CM230 - Construction Surveying

Description

The theory and practice of plane and route surveying for measuring traverses, determining topography, and sectioning are examined as well as site layout and design, and vertical and horizontal curves. Laboratory exercises focus on the application of these techniques as they relate to the building industry including construction layout and grades.

Credits

3

Requisites

- Complete:
 - CM120 - Computer Graphics Applications for Construction (3)

Academic Level

Undergraduate

CM250 - Heavy Construction Equipment

Description

This course studies the current use of heavy equipment in construction projects including highways, tunnels, bridges, dams, storm drains, and sanitary sewers and the production estimating for the operations. Site visits and a term project on estimating equipment usage and operations are required.

Credits

3

Requisites

- Complete:
 - CM120 - Computer Graphics Applications for Construction (3)

Academic Level

Undergraduate

Campus Programs

CM275 - Introduction to Building Structures

Description

Students will actively discover and implement knowledge, analysis, and design of structural systems used in building construction throughout this course. The focus of this course is on building structures as systems of many integrated parts for supporting architecture. Students will realize the fundamental principles that govern the behavior of various structural elements and assemblies. Patterns, horizontal spans, and high-rise structures are examples of topics students will engage in.

Credits

3

Requisites

- Complete:
 - CM100 - Fundamentals of Building Construction and Management (3)
 - CM120 - Computer Graphics Applications for Construction (3)

Academic Level

Undergraduate

CM280 - Passive Environmental Design Systems

Description

Students engage in the opportunity to experiment and implement environmental design systems and sustainable building practices that directly relate to the construction industry throughout this course. By incorporating environment around a future building's milieu - the sun, wind patterns, geographic location, and topographic conditions - projects can leave smaller carbon footprints, become healthier for building occupants, and have the ability to achieve a passive state. This course will analyze case studies in the built environment, teach students the importance of a building's site and its location, and showcase the importance of a building's design, its thermal performance, and its internal systems.

Credits

3

Requisites

- Complete:
 - CM100 - Fundamentals of Building Construction and Management (3)
 - CM120 - Computer Graphics Applications for Construction (3)

Academic Level

Undergraduate

CM320 - Construction Methods and Materials

Description

Construction building materials and components for horizontal and vertical construction are discussed. The course emphasizes the comprehensive analysis of materials with respect to design, specifications, construction methods, testing, and inspection. Testing of soils, asphalt and concrete, structural and behavioral characteristics, engineering properties, measurements and applications of construction materials are examined in depth.

Credits

3

Requisites

- Complete:
 - CHM101 - Fundamentals of Chemistry (3)
 - CM275 - Introduction to Building Structures (3)

Academic Level

Undergraduate

Campus Programs

CM370 - Construction Estimating and Scheduling

Description

This course introduces students to the fundamentals of construction estimating and scheduling using both manual and BIM tools to develop project estimates and takeoffs. Conceptual, area, systems and unit price estimates will be studied and basic CPM scheduling theory to include bar charts and network schedules.

Credits

3

Requisites

- Complete:
 - CM100 - Fundamentals of Building Construction and Management (3)

Academic Level

Undergraduate

CM375 - Building Systems

Description

Provides basic knowledge of building mechanical systems, and methods to estimate, select, install and verify the systems. Mechanical topics include plumbing, HVAC, water supply, fire protection, air quality, and sanitary sewer systems. Electrical topics include basic principles of electricity, single and three phase systems, transformers, branch circuits and feeders and residential and commercial illumination. Includes understanding of codes and the principles of design and materials used in the construction of plumbing, HVAC and transportation systems.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CM100 - Fundamentals of Building Construction and Management (3)
 - CM275 - Introduction to Building Structures (3)
 - CM320 - Construction Methods and Materials (3)
 - 45 credit(s).

Academic Level

Undergraduate

CM380 - Construction Law and Contracts

Description

An overview of the legal system, including court structure and procedure, and the maxims of law as applicable to the management and contractual delivery of a construction project and a contract. Topics covered include bidding, delays and acceleration, differing site conditions, contract interpretation, termination of contract, liability and remedies, and dispute resolution mechanisms. The history and development of contract law will be discussed. Consideration of criminal justice and tort law followed by a thorough study of contract law, including the basic elements of a valid contract, rights of the third parties, and remedies for breach.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CM100 - Fundamentals of Building Construction and Management (3)
 - CM115 - Construction Plan Reading and Building Codes (3)
 - 45 credit(s).

Academic Level

Undergraduate

Campus Programs

CM390 - Materials Testing and Quality Control

Description

Aggregate, concrete, asphalt, wood, and masonry are tested using ASTM procedures to establish design criteria, inspection and quality control programs for testing samples from project sites.

Credits

3

Requisites

- Complete:
 - CM320 - Construction Methods and Materials (3)

Academic Level

Undergraduate

CM400 - Construction Project Management & Safety

Description

Organization and management theory applied to the construction process, including leadership functions, ethical standards, project planning, organizing and staffing are discussed. The course provides an understanding of construction safety as federally mandated by OSHA (Occupational Safety and Health Administration) 30 Standards. Course includes interpretation and application of regulations, and development of safety plans.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CM370 - Construction Estimating and Scheduling (3)
 - 90 credit(s).

Academic Level

Undergraduate

CM410 - Advanced Estimating and Bid Analysis

Description

The details of construction contracts, construction business methods, bidding, construction insurance and value engineering are covered in this course. The principles of cost estimating, value analysis of construction projects, classification of work, quality take-offs, construction operations cost, bidding operations and time value of money are discussed. The preparation of preliminary budgets, factors affecting construction cost, bid strategies and computer applications also are explored.

Credits

3

Requisites

- Complete:
 - CM370 - Construction Estimating and Scheduling (3)

Academic Level

Undergraduate

Campus Programs

CM415 - Construction Planning and Scheduling

Description

This course encompasses detailed project planning and scheduling including work breakdown structure, crew productivity, activity and project time-cost relationships, and project cash flow. Computer applications software will be utilized for scheduling, resource allocation and time/cost analysis.

Credits

3

Requisites

- Complete:
 - CM370 - Construction Estimating and Scheduling (3)

Academic Level

Undergraduate

CM480 - Independent Study

Description

This course is independent by design, allowing a student to investigate any construction subject matter not incorporated into the curriculum. This course requires a scholarly, yet practical completion of a research project in conjunction with a faculty mentor.

Credits

0 - 3

Requisites

- Prior approval of a CM faculty member is required.

Academic Level

Undergraduate

CM485 - Construction Business and Finance

Description

An investigation of construction financing during all phases of project development with topics including permanent loans, construction loans, sources of mortgage funds and venture capital, and tax and interest considerations. Special emphasis is placed on the role of the banker as a vital member of the construction management team.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:
 - ACC105 - Foundations of Accounting I (2)
 - ACC201 - Financial Accounting (3)
 - Complete:
 - CM400 - Construction Project Management & Safety (3)

Academic Level

Undergraduate

Campus Programs

CM490 - Construction Management Internship

Description

Students engage in the opportunity to experience and apply construction management practices in a professional setting, in the world of work, outside of the classroom. This work will relate to the experiences of academic course work and professional practice and to synthesize the two in a practical application of knowledge in an experiential setting. Secondly, internships offer the opportunity to develop crucial job searching skills, explore career interests, enhance your resume, make contacts in your chosen field and build references for future employment. Each intern will work in a career-related position during the academic term for which the student is enrolled for the internship - Term 1, Term 2, Term 3 or Term 4 - completing a minimum of 150 hours on the job per 3 credits.

Credits

0 - 15

Requisites

- Complete all of the following
 - Placement in BS.CMT
 - 75 credits
 - Please contact the Career and Professional Development Center to register.

Academic Level

Undergraduate

CM498 - Senior Capstone Project

Description

Students will work with an industry advisor to develop a preconstruction plan for an actual construction project. At a minimum, this plan would include a project estimate and schedule, field and home office organization, a site logistics plan and a schedule of values. A formal presentation will be made to an industry panel. The course also addresses professional ethics through a case study and includes a research paper requirement.

Credits

3

Requisites

- Complete all of the following
 - 90 credit(s).
 - Permission of instructor

Academic Level

Undergraduate

Construction Science and Management

CSM100 - Fundamentals of Construction Science and Management

Description

Students will gain an introduction to a variety of current materials, methods, and best practices for construction. They will learn the overall progression of construction processes and consider how the science of construction underpins construction management as a profession. Students will also learn about industry trends, models of construction, and the role of tomorrow's construction manager.

Credits

3

Academic Level

Undergraduate

Campus Programs

CSM215 - Specifications, Plans, and Building Codes

Description

Students will analyze the specifications, drawings, and building codes that define construction projects. In particular, students will learn how to interpret construction plans, distinguish drawing symbols, read architectural and engineering scales, and navigate building codes.

Credits

3

Requisites

- Complete:
 - CSM100 - Fundamentals of Construction Science and Management (3)

Academic Level

Undergraduate

CSM220 - Construction Graphics and Software

Description

Students will learn to use standard industry graphic communications software for producing designs and drawing sets, developing models, and managing documents and projects. In particular, students will develop skills enabling them to leverage computer-aided design and drafting (CADD) tools, building information modeling (BIM) software, and document control tools such as project tracking spreadsheets.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CSM100 - Fundamentals of Construction Science and Management (3)
 - Complete or concurrently enroll in:
 - CSM215 - Specifications, Plans, and Building Codes (3)

Academic Level

Undergraduate

CSM250 - Safety and Equipment

Description

Students will cover the evolution of safety practices in the construction industry, as federally mandated by the Occupational Safety and Health Administration (OSHA) 30 Standards. Particular emphasis will be placed on the use of construction equipment and temporary structures as ways to ensure safety during construction projects.

Credits

3

Requisites

- Complete:
 - CSM100 - Fundamentals of Construction Science and Management (3)

Academic Level

Undergraduate

Campus Programs

CSM270 - Sustainability and the Built Environment I: Introduction to Sustainable Practices

Description

Students will explore sustainable building practices that can be used in the construction industry. Students will learn about the importance of a building's location and site conditions, and will consider the advantages and disadvantages of various design and planning processes in terms of sustainability.

Credits

3

Requisites

- Complete:
 - CSM100 - Fundamentals of Construction Science and Management (3)

Academic Level

Undergraduate

CSM280 - Surveying

Description

Students will gain a broad introduction to the field of surveying. They will apply concepts of vertical and horizontal surveying through hands-on exercises with modern land surveying equipment such as automatic levels, total station theodolites, and GPS (Global Positioning Systems). Students will also learn how collected surveying information is interpreted and used.

Credits

4

Requisites

- Complete:
 - CSM220 - Construction Graphics and Software (3)

Academic Level

Undergraduate

CSM300 - Construction Business and Finance

Description

Students will gain an overview of construction as a business. They will explore topics of business development, operations management, and finance that are specific to construction organizations and projects.

Credits

3

Requisites

- Complete:
 - ACC201 - Financial Accounting (3)
 - CSM100 - Fundamentals of Construction Science and Management (3)

Academic Level

Undergraduate

Campus Programs

CSM320 - Materials and Methods I: Standard Materials

Description

Students will be introduced to standard building materials used commonly throughout construction, such as wood, steel, concrete, and masonry. Students will learn through hands-on exercises how these materials get constructed into construction assemblies. Students will also learn how a construction manager evaluates materials and facilitates their selection.

Credits

4

Requisites

- Complete:
 - CHM120 - General Chemistry I (3)
 - CSM215 - Specifications, Plans, and Building Codes (3)
 - CSM220 - Construction Graphics and Software (3)

Academic Level

Undergraduate

CSM325 - Structures I: Forces, Loads, and Patterns

Description

Students will explore the design of structures that are used in construction. Students will learn fundamental principles, such as structural forces, loads, and patterns, which govern the behavior of various structural components.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CSM215 - Specifications, Plans, and Building Codes (3)
 - CSM220 - Construction Graphics and Software (3)
 - Complete or concurrently enroll in:
 - CSM320 - Materials and Methods I: Standard Materials (4)

Academic Level

Undergraduate

CSM330 - Materials and Methods II: Non-Structural Materials

Description

Students will explore non-structural building materials used commonly throughout construction. Students will learn to test and inspect materials and assemblies, and also to interpret the results of tests and inspections.

Credits

4

Requisites

- Complete:
 - CSM320 - Materials and Methods I: Standard Materials (4)

Academic Level

Undergraduate

Campus Programs

CSM335 - Structures II: Statics

Description

Students will study advanced topics in structures, including physics principles of statics. Particular emphasis will be placed on the concepts of shear, moment, and deflection, as well as on the functioning of trusses.

Credits

3

Requisites

- Complete:
 - CSM325 - Structures I: Forces, Loads, and Patterns (3)
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - PHY215 - Physics I (3)

Academic Level

Undergraduate

CSM340 - Building Systems

Description

Students will be introduced to the systems that comprise a building, including mechanical, electrical, plumbing/piping, and fire protection systems. Students will learn the scientific principles governing each system. Students will also explore the construction manager's role in recommending and coordinating building systems during construction.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CSM325 - Structures I: Forces, Loads, and Patterns (3)
 - Complete or concurrently enroll in:
 - CSM330 - Materials and Methods II: Non-Structural Materials (4)

Academic Level

Undergraduate

CSM350 - Construction Law and Contracts

Description

Students will explore topics of business law pertaining specifically to the construction industry, including construction contracts and common contractual relationships between owner/real estate developer, designer, builder, and construction manager. Students will learn to evaluate risk in construction contracts and identify safety concerns to address. Students will also grapple with ethical dilemmas encountered in the construction industry.

Credits

3

Requisites

- Complete:
 - BUS206 - Business Law I (3)
 - CSM215 - Specifications, Plans, and Building Codes (3)

Academic Level

Undergraduate

Campus Programs

CSM370 - Sustainability and the Built Environment II: Implementing Sustainable Practices

Description

Students will learn how to implement sustainable building practices. Students will evaluate the potential of incorporating sustainable practices into construction projects and recommend sustainable practices for projects.

Credits

3

Requisites

- Complete:
 - CSM270 - Sustainability and the Built Environment I: Introduction to Sustainable Practices (3)

Academic Level

Undergraduate

CSM375 - Passive Systems and Design Concepts

Description

Students will explore passive design and passive building systems. Students will assess the potential for passive building systems to offset environmental impacts of active systems, and recommend passive design concepts and passive building systems for projects.

Credits

3

Requisites

- Complete:
 - CSM340 - Building Systems (3)
 - CSM370 - Sustainability and the Built Environment II: Implementing Sustainable Practices (3)
 - CSM400 - Estimating (3)

Academic Level

Undergraduate

CSM400 - Estimating

Description

Students will learn how to develop a construction estimate, which is the foundation for bidding in the construction industry. They will learn to calculate quantity take-offs, as well as direct and indirect project costs. Students will also explore the relationship between construction budgeting and estimating.

Credits

3

Requisites

- Complete:
 - CSM220 - Construction Graphics and Software (3)
 - CSM300 - Construction Business and Finance (3)
 - FIN320 - Principles of Finance (3)

Academic Level

Undergraduate

Campus Programs

CSM410 - Planning and Scheduling

Description

Students will explore methods for planning and scheduling construction projects. They will learn to schedule projects using both the Critical Path Method as well as lean methodology. Students will also learn how to effectively manage changing project conditions.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CSM340 - Building Systems (3)
 - Complete or concurrently enroll in:
 - CSM400 - Estimating (3)

Academic Level

Undergraduate

CSM450 - Construction Project Management

Description

Students will learn principles of project management as they apply to construction projects. Students will also learn how to communicate project status effectively to stakeholders, as well as how to assess project success.

Credits

3

Requisites

- Complete:
 - CSM410 - Planning and Scheduling (3)

Academic Level

Undergraduate

CSM460 - LEED Green Associate Credential Preparation

Description

Students will explore the LEED rating system and its impacts on construction projects. In particular, students will learn the content of the LEED Green Building Design And Construction Reference Guide in preparation to sit for the LEED Green Associate credential. Students will also recommend LEED strategies for projects.

Credits

3

Requisites

- Complete:
 - CSM375 - Passive Systems and Design Concepts (3)
 - CSM450 - Construction Project Management (3)

Academic Level

Undergraduate

Campus Programs

CSM498 - Senior Capstone

Description

Students will explore an area of individual interest within the construction industry through a semester-long project. Emphasis will be placed on demonstrating collaboration and communication skills that are needed by professional construction managers.

Credits

3

Requisites

- Complete:
 - CSM450 - Construction Project Management (3)

Academic Level

Undergraduate

Culinary

CUL135 - Baking Basics: Scratch Baking for the Non-Professional Baker

Description

A lab format course that introduces students to techniques for fundamental baking practices. The production of various baked goods will be studied. Emphasis will be placed on accurate measuring, correctly applied technique, practicing safety and sanitation throughout processes, and evaluation of final product.

Credits

3

Academic Level

Undergraduate

CUL155 - The Art of Cake

Description

This course explores an introduction to cake preparation and icing technique instruction. Through weekly lab sessions, students will learn cake decorating skills to include buttercreams, rolled fondant application, and decorating techniques using the pastry bag and icing tips, stencils, and fondant decoration. Basic tiered construction and support devices will be applied to a multi-tiered cake project.

Credits

3

Academic Level

Undergraduate

CUL170 - Cooking Basics: Making Your Food Taste Delicious

Description

This is a foundation course for students embarking to improve and enhance their basic cooking skills. The double session lab format introduces students to the techniques for fundamental cooking practices and procedures. The course is divided into a series of classroom lectures, chef demonstrations and hands-on preparation. Successful completion of this course proves proficiency in basic culinary arts techniques and that cooking can be fun and enjoyable.

Credits

3

Academic Level

Undergraduate

Campus Programs

CUL210 - Cooking Healthy and Delicious

Description

This course covers the principles of nutrition and its relationship to a healthy life style. Topics include personal nutrition fundamentals, weight management, exercise, nutritional adaptation/analysis of recipes/menus, and healthy cooking techniques. Upon completion, students will be able to apply basic nutritional concepts to food preparation and healthy lifestyle choices.

Credits

3

Academic Level

Undergraduate

CUL245 - Alternative Baking

Description

A lab format is used to introduce students to technique for fundamental baking practices that apply to ingredients used in the accommodation of food allergies and restricted diets. The production of cakes, cookies, muffins, tarts, custards, and breads will be covered. Emphasis will be placed on accurate measuring, correctly applied technique, modifying traditional techniques, the practice of safety and sanitation throughout processes, and evaluation of final product.

Credits

3

Academic Level

Undergraduate

CUL260 - The Flavors of Global Cuisines

Description

This course explores the cultural significance of cuisines from around the world along with their history, preparation, and consumption. Students will learn first-hand how food is made and eaten across the globe and discuss the circumstances, both economic and environmental, that led to the rise of various culinary techniques and dining etiquette's.

Credits

3

Academic Level

Undergraduate

CUL270 - Culinary and Baking Capstone

Description

This two-week, on-campus capstone gives students an opportunity to learn from each other as they bring back specific skills from their internships. Students will also demonstrate their mastery of foundational cooking and baking skills in live-kitchen demonstrations and exams.

Credits

3

Academic Level

Undergraduate

Campus Programs

CUL290 - Culinary Internship

Description

This required internship at a full-service restaurant will give students the opportunity to learn in a professional setting while also applying the skills and techniques they learned in their coursework and labs. Competencies for the internship include skills in banquet and catering; baking and dessert production; cold food and garde manger; expediting, dishwashing, and maintenance; and line cooking.

Credits

0 - 15

Requisites

- Please contact the Career and Professional Development Center to register.

Academic Level

Undergraduate

CUL315 - Confectionery Art

Description

A practical lab course that introduces students to advanced mediums used for decorative pastry items. The science, history, and cultural influences will be studied of each specific medium including chocolate, pastillage and sugar. Students will make showpieces and confections with these mediums throughout the lab course.

Credits

3

Academic Level

Undergraduate

CUL350 - Mixology

Description

This course focuses on the skills used on bar operations, as well as the duties and responsibilities of bar staff and their role in customer relations. The lab component of this class emphasizes the importance of bar tending skills in food service operations. The course focuses on the fundamentals of preparing and serving classic and craft cocktails. Students will explore the history, processes and uses of major spirits. Emphasis will be on the foundations of creating a bar program, costing out recipes, and proper bar service guidelines.

Credits

3

Requisites

- Must be legal drinking age - 21 years

Academic Level

Undergraduate

CUL360 - The Art of Food Presentation and Food Photography

Description

This course focuses on the trends of food presentations and plating techniques. The course examines the fundamentals of food styling with a modern influence of art and design. The lab component of this course focuses on the four key subjects of food presentation - balance, unity, focus and flow. Students will learn techniques of classical and modern food styling and food photography.

Credits

3

Academic Level

Undergraduate

Campus Programs

CUL365 - Introduction to Bread Baking

Description

This course defines the terminology and techniques utilized in the production of a variety of yeast breads. Emphasis will be placed upon proper mixing, proofing, finishing, and baking techniques. Students will be required to analyze the components of the bread dough at its various stages, and to evaluate the finished product. The sequential steps that are essential to successful bread making will be discussed in lecture and applied in daily production.

Credits

3

Academic Level

Undergraduate

Data Analytics

DAT500 - Data and Information Management

Description

Master key foundational concepts and tools in data and information management. Learn data analysis skills required for data assessment and data validation for creating data structures and data analysis reports. Gain exposure to common data and information management technologies that provide decision support capabilities to organizations.

Credits

3

Academic Level

Graduate

DAT510 - Foundations of Data

Description

We live in a world where substantial amounts of data are available at the touch of a button. While this may be a very empowering prospect, it can also be overwhelming. In this course, students will examine the status of Big Data and its impact on the business world, framing analytics challenges using a structured life cycle approach to data analytics problems. Emphasis will be placed upon the verification of data, analytic techniques and open source tools for analyzing data, the role of regulatory organizations, and the privacy and ethics issues that surround its use.

DEV106 - Child Development

Description

This course surveys and focuses on child growth and development from birth through the life cycle. Theories pertinent to individual stages are provided and the sociological, cultural and psychological aspects of human growth and development are included. An overview of all developmental stages will be covered.

Credits

Undergraduate

Campus Programs

DEV126 - Precursors of Academic Skills

Description

This course focuses on the development of pre-academic skills in young children. Students explore how to apply developmental theory to foster cognitive, social, emotional, and language development in young children. The relationship between the development of pre-academic skills and emerging literacy will be emphasized. Promotion of emerging literacy skills through the identification of high quality children's literature is covered.

Additional Information

Offered every spring term.

DEV249 - Field Experience: Child Care Setting Young Children

Description

This course is an opportunity for child development majors to actively participate in the various aspects of child care programming, including teaching and intervention. The course includes on-site experiences and seminars.

Credits

3

Academic Level

Undergraduate

DEV259 - Field Experience: Agency Setting Young Children

Description

This course is an opportunity for child development majors to actively participate in a human-service organization that serves young children and families. The course includes on-site experiences and seminars.

Credits

3

Academic Level

Undergraduate

DEV260 - Family and Culture

Description

This course considers how family and culture influence child development including family structures, sibling relationships, parenting behaviors, children's special needs, family violence, diversity in educational settings and the relations between family and community. Students explore their own and other's cultural influences through the lens of diverse cultural perspectives. The challenges faced by children and families from a variety of cultures and socio-economic backgrounds including communication, interaction, education, and societal norms will be examined from the role of the practitioner. Research informs student projects in which a particular aspect of culture is studied in depth. Ten hours of field experience is included.

DEV424 - Assessment, Observation & Intervention

Description

Students are introduced to qualitative and quantitative forms of developmental assessment used with children during the first eight years of life. The Denver-II, The OUNCE, Bailey, Brigance, HOME, HELP, Peabody, Transdisciplinary Play Based Assessment as well as other commonly used assessments within early childhood and public school settings are reviewed. Assessment will be discussed in relationship to development outcomes, interpretation and planning for intervention and curriculum. (Legal Issues, Diversity)

DEV536 - Developmentally Appropriate Practice

Description

This course focuses on the development of pre-academic skills in young children, highlighting the critical role play has in a child's life. Play is a rich resource for developing self-regulation, promoting language, cognition, and social competence, a method of assessment and a tool for intervention. In this course, students explore how to apply developmental theory to foster cognitive, social, emotional, and language development in young children.

Early Childhood Education

ECE609 - Theoretical Foundations in ECE

Description

This competency-based course will focus on the knowledge, skills, abilities and dispositions teachers need to apply and analyze the theoretical foundations of early childhood education and early childhood special education to his/her professional practice. Teacher Candidates will examine the theoretical foundations of early childhood special education and its impact on young children with disabilities. This course will provide evidence-based research and clinical opportunities that will be implemented, analyzed, evaluated and refined during the 16 weeks of clinical experience. This iterative process facilitates an in-depth understanding of the theoretical foundations needed to address the individual needs of all children, including children with disabilities, PreK-3. With the support of the college faculty and the cooperating practitioner, the teacher candidate will actively engage in on-going self-assessment, focusing on the refinement of their understanding of the unique factors related to students' abilities and disabilities within the learning environment.

ECE620 - Early Childhood Mathematics

Description

This competency-based course will focus on the knowledge, skills, abilities and dispositions teachers need to teach mathematics to PreK-3 students. This course will provide evidence-based research and teaching opportunities that will be developed, implemented, analyzed, evaluated and refined during the 16 weeks of clinical experience. This iterative process facilitates the development of skills and abilities needed to meet the needs of PreK-3 students with disabilities and will include the following: (a) contextualizing learners and learning; (b) assessing student learning; (c) planning and preparation; (d) addressing mathematical concepts, methods and strategies; and (e) linking PreK-3 learning progress to the knowledge, skills, abilities and dispositions of the teacher candidate. With the support of the college faculty and the public school clinical practitioners, the teacher candidate will actively engage in on-going self-assessment, focusing on the refinement of teaching mathematics.

Additional Information

This course includes a course content fee. All of your digital materials and e-texts (if applicable) have been included in the cost of the course. Barnes & Noble on behalf of SNHU has negotiated the very best price for these materials and arranged with the publisher to have them available in Brightspace on the first day of class. While not recommended, any student wishing to exercise their right to opt out of an eligible course fee must visit the Course Materials link in the Brightspace course and follow the Opt-Out instructions. This must be completed by the end of the add/drop period.

Economics

Campus Programs

ECO101 - Economics of Social Issues

Description

This course will introduce students to economics of social issues, focusing on today's most pressing social and economic problems from both a domestic and global perspective. First, students will trace the development of our economic society from the Middle Ages to the present in order to gain a perspective on why our present day economy is the way it is and where it may be headed. Next, participants will examine issues of, but not limited to, environment, healthcare, and the equity of income distribution using tools of macro and microeconomic analysis. Other areas of possible inquiry and analysis could include abortion, gay marriage, drug and alcohol use, assisted suicide, military draft, gun control, bribery, or any other area of inquiry which a student may choose. Students will be required to select a social and/or economic issue of their choice for a semester long study and will present the results of their work and recommendations for public or private action. This is a writing intensive course. Open to non-business majors only.

ECO201 - Microeconomics

Description

This course examines the role of economic systems in allocating scarce resources to satisfy the needs and wants of individual members of a society. After a brief exposure to alternative economic systems, the focus becomes the nature and performance of American capitalism. Primary emphasis is placed upon the development of models that explain the behavior of consumers, producers and resource suppliers in various market structures.

ECO202 - Macroeconomics

Description

This course explores the manner in which the overall levels of output, income, employment and prices are determined in a capitalist economy. The focus is on the forces that act to shape these factors and determine their fluctuations. The role of government fiscal and monetary policy in influencing the level of economic activity is also a major area of study. The impact of international transactions on the domestic economy also is discussed.

ECO375 - Economics of Professional Sports In the U.S.

Description

This course employs the models and theories developed in microeconomics to study the sports industry in the United States. The course applies three areas of economic theory to the study of professional sports (baseball, basketball, football and hockey) as well as intercollegiate sports. The three areas of economic theory utilized are industrial organization, public finance, and labor economics. Industrial organization theory is used to analyze the types of competition and market structure that exist in the sports industries. The analysis includes an exploration of the costs and benefits of market power as well as the role of the media and the government in the operation of sports franchises and leagues. Public finance theory is used to explore how cities have tied economic development to sports franchises, to analyze the impact of tax-based funding of stadiums, and to evaluate the costs and benefits of sports franchises to their community. Labor economic theory is used to investigate labor conflict and collective bargaining in professional sports as well as the role played by discrimination in professional sports labor markets. Finally, the course explores the existence of the unpaid professional student-athletes and their employer, the NCAA.

ECO402 - Intermediate Macroeconometrics

Description

This course develops models of short-to-medium-run fluctuations in overall economic activity as well as long-run models of economic growth of a nation. The former category of models includes the Keynesian, New Classical, and New Keynesian frameworks. Particular emphasis will be placed on the New Keynesian model. Empirical testing of the models using computer software will involve the statistical analysis of macroeconomic data. The primary econometric tools for analyzing this data will be regression and its extensions and modern time series analysis. Long-run models of economic growth including the Solow model and the Romer model will also be examined.

Additional Information

Offered every fall term.

EDU203 - Professional Responsibility and Ethics in Teaching

Description

The purpose of this course is to help students develop an understanding of teaching as a profession by drawing upon established and contemporary research, the wisdom of practice, and emerging educational policies and practice. In addition, this course will help students to prepare for the ethical problems they will routinely confront in their professional lives. Teachers require unique moral sensitivities and understandings. By the end of the course, students should have a command of the basic skills of ethical reasoning, a familiarity with the most important ethical concepts that apply to their work, and an ability to apply these skills and concepts.

EDU324 - The Inclusive Classroom

Description

This course examines teaching strategies and techniques for early childhood, elementary education, middle school, and high school. Students will conduct in-depth study of behavior theory and practical application in the classroom environment. Students will learn to promote learning environments where students can set goals and accept responsibility for their own learning. Modification and accommodations will be researched at each level discussing the best approaches depending upon the age of the child. Alignment with the regular education curriculum includes a review of the Grade Level Expectations and the Grade Span Expectations and Common Core Standards. Students will leave this class with a good understanding of the progression and development of students with disabilities K-12 personally, socially physically, and academically.

EDU359 - Writing/Literature/Elementary

Description

This course focuses on the relationship between literature written for children and young adolescents, and the development of competence in writing, speaking, and listening. The course provides a thorough overview of multiple genres of literature for children and young adolescents. The course examines principles of literacy learning in children and introduces theories, practices, and materials for teaching writing in elementary grades. Many ways to teach writing are included such as writing development, research on writing, curriculum development, methods of teaching writing, models for responding to and evaluating student writing, and classroom methods for teaching the writing process in elementary classrooms. Strategies for teaching writing, and literature to all children in a multi-cultural setting will be emphasized.

Description

This course helps to prepare students to teach mathematics in grades 5 through 8 or 7 through 12. The course will develop content pedagogical practices based on current research and standards through a combination of academic and field-based experiences. Students will explore the developmental and environmental characteristics appropriate for the grade range including but not limited to assessments, learning theories and knowledge construction. Students will learn how to connect mathematics and other disciplines, incorporate manipulatives and current technologies into instructional design.

Additional Information

Offered every spring term.

Credits

3 - 6

Requisites

- Complete:
 - EDU220 - Teaching in the Middle School (3)

Academic Level

Undergraduate

EDU419A - Integrating Social Studies and the Arts In the Elementary School

Description

This course will explore developmentally appropriate strategies for incorporating movement, music, drama, and the visual arts with the content, processes and attitudes of social studies. Curriculum content, materials, instructional strategies, and organizational techniques for integrating social studies and fine arts in early childhood and elementary grades will be addressed.

Credits

1.5

Requisites

- Must be enrolled in the Teacher Certification program

Academic Level

Undergraduate

EDU425 - Literacy Strategies Secondary Education

Description

This course focuses on the development of reading and writing strategies in support of the content areas in grades 5-12. Students will become familiar with effective practices used to support the development of literacy strategies for students on the secondary level.

Additional Information

Offered every fall term.

Credits

3

Requisites

- Complete all of the following
 - Concurrently enroll in:
 - EDU487 - Student Teaching I (3 - 9)
 - Must be enrolled in the Teacher Certification program

Academic Level

Undergraduate

EDU470 - Science for Early Learners

Description

This course applies developmental theory to the construction of curriculum and explores methods for teaching health and science. Students focus on preparing developmentally appropriate experiences that promote investigation, problem solving, and exploration. Methods of instruction and assessment are practiced. Attention will be given to designing constructivist lesson and unit plans that align with science literacy standards.

Additional Information

This course includes a course content fee. All of your digital materials and e-texts (if applicable) have been included in the cost of the course. Barnes & Noble on behalf of SNHU has negotiated the very best price for these materials and arranged with the publisher to have them available in Brightspace on the first day of class. While not recommended, any student wishing to exercise their right to opt out of an eligible course fee must visit the Course Materials link in the Brightspace course and follow the Opt-Out instructions. This must be completed by the end of the add/drop period.

Undergraduate

EDU481 - Clinical Experience IV Elementary Education

Description

This clinical experience will focus on the knowledge, skills, abilities and dispositions teachers need to teach elementary school students, K-6. This clinical experience will provide evidence-based research, and clinical opportunities that will be implemented, analyzed, evaluated and refined during the 16 weeks of clinical experience. This iterative process facilitates the development of skills that promotes the learning of all students, including students with disabilities, in the following: (a) The Learner and Learning; (b) Content Knowledge; (c) Instructional Practice; (d) Professional Responsibility. With the support of the college faculty and the public school clinical practitioners, the teacher candidate will actively engage in on-going self-assessment, focusing on the refinement of supporting student learning and linking the K-8 learning progress to the knowledge, skills, abilities and dispositions of the teacher candidate.

Credits

Campus Programs

EDU487 - Student Teaching I

Description

This course is the first of two full-time student teaching experiences required for undergraduate students seeking teacher certification. Students spend four days each week in a NH public school under the mentorship of a certified teacher for one full semester. During this time, the student teacher receives close and continuous supervision and guidance from teaching personnel at the school and by a member of Southern New Hampshire University faculty. This course also includes seminars at the university. Acceptance to Student Teaching is required.

Additional Information

Offered every fall term.

Credits

3 - 9

Requisites

- Must be enrolled in the Teacher Certification program and Student Teaching

Academic Level

Undergraduate

EDU489 - Field Experience

Description

This course introduces future teachers to the profession through a variety of school-based experiences. Students have the opportunity to explore the nature of teaching and learning in K-12 classrooms through participation in approved field-based educational experiences such as visiting various programs, observing classrooms in action and working with practicing teachers. The course includes a weekly class meeting.

Additional Information

Offered every fall term.

EDU490B - Student Teaching

Description

All teacher education majors seeking certification will participate in 12 weeks of full-time practice teaching at nearby schools. During the 12 weeks, the student teacher receives close and continuous supervision and guidance from teaching personnel at the school and by a member of the Southern New Hampshire University faculty. Submission of a student teaching portfolio at the conclusion of the internship is required. Weekly seminars at the university also may be held.

Credits

6

Requisites

- Must be enrolled in the Teacher Certification Program.

Academic Level

Undergraduate

EDU491 - Advanced Field Experience

Description

This course provides an opportunity for the student to put theory into practice. Through a variety of experiences in public schools, the student is given opportunities to practice the theories studied through prior course work and to build on prior learning experiences. Additional learning outcomes are determined collaboratively by the student and the course instructor. This course may be taken for three to twelve credits. This course is only available with permission from the Dean.

Additional Information

Course offered as needed.

Campus Programs

EDU497 - Ethics in Secondary Teaching

Description

The purpose of this course is to prepare teacher candidates of secondary school certifications for the ethical decisions they will confront in their professional lives. Students will explore ethical best practice and decision-making regarding professional responsibility, caring for students, and promoting the well-being of the school and community.

Additional Information

Offered every spring term.

Credits

2

Requisites

- Complete all of the following
 - Concurrently enroll in:
 - EDU490 - Student Teaching and Seminar (12)
 - TCP acceptance

Academic Level

Undergraduate

EDU498 - Seminar in Mathematics Education

Description

This course is a one-credit course taken by Middle School Mathematics Education and Secondary Mathematics Education majors during the final semester of student teaching. Students will spend time reflecting pedagogical content knowledge learned in previous courses and during student teaching. The course will help students develop a deeper and more connected understanding of middle school and secondary mathematics content. Students will also spend time connecting their knowledge of mathematics education to national and state standards and policies regarding the mathematical education of students.

Additional Information

Offered every spring term.

Credits

1

Requisites

Campus Programs

EDU501 - Methods of Teaching Reading

Description

This course is an overview of reading and writing processes. The course addresses current trends for teaching literacy including basal programs, whole language, language experience, thematic teaching, literature-based instruction, and technology-based instruction. Students will learn about the components of balanced literacy instruction that includes word attack, word identification, vocabulary development, fluency, comprehension and writing.

Credits

3

Academic Level

Graduate

EDU503C - Methods of Teaching Elementary Math

Description

This course focuses on the concepts of mathematics that are taught in grades K-6 and the current methods of teaching that content, including experience with manipulative materials.

Credits

3

Requisites

- Must be enrolled in the Teacher Certification Program

Academic Level

Graduate

EDU506 - Teaching English Learners

Description

In this course students will study the history, pedagogy and techniques for specific ESL/EFL methods and approaches used to teach in culturally diverse classrooms. The course intends to equip mainstream classroom teachers with background, introduction and understanding necessary to teach EL students. The course will include clarification of issues such as the differences between bilingual instruction and teaching English Learners in the classroom. The course will enable teachers to learn how to modify content and scaffold learning for ELs.

Credits

Graduate

EDU507 - Leadership for Learning

Description

This course will focus on the knowledge, skills and abilities of a principal to be an instructional leader in his or her building. Learners will study effective instructional practices, levels of rigor and student engagement practices in schools. We will explore aligning those practices to the expectations of state standards at various grade levels. The focus of the course will be to apply knowledge, skills and abilities of an instructional leader so that the outcome of their leadership work is about academic success for all students.

Credits

Campus Programs

EDU508 - Effective Management of Schools

Description

This course offers a study of the leadership, management, and safe operations of school facilities and an understanding of school finances as it relates to the teaching and learning process. Leaders will learn how to facilitate and engage school board members in a discussion about how school finance and facilities relate to student achievement. Learners will examine various tools and methodologies that support the school process and how to engage and connect the community members in the budget building process. This course aims to make leaders better managers and consumers of financial information rather than budget officers; learners will better understand the real world implications and consequences of how they allocate funds based on the process and decisions they make.

Credits

3

Academic Level

Graduate

EDU513 - Growth Mindset

Description

This course will focus on the difference between a Fixed and Growth Mindset. It will deepen the learners' knowledge, skills and abilities of how a Growth Mindset culture in a school can focus student's attention on their effort as opposed to their perceived intelligence or ability as the only indicators of growth or success. The course will build a teachers experiences and ability to use key words, phrases, activities and feedback with and for students to build their willingness to persevere (grit) to accomplish tasks successfully and learn at higher levels. Teachers will develop a well-articulated plan to implement a Growth Mindset culture in their classrooms and in the school.

Credits

3

Academic Level

Graduate

EDU520 - The Educator Researcher

Description

This course provides an introduction to methods of educational research. These methods encourage educators to be action researchers in their own classrooms, school districts, and/or communities to improve teaching and learning practice. Students will become familiar with purposeful quantitative and qualitative research designs to develop an increased understanding of the issues, both theoretical and practical, arising through the research process. An emphasis will be placed on understanding, interpreting, and critiquing educational research and developing research proposals.

Credits

3

Academic Level

Graduate

EDU521C - Exploring the Principles of Education

Description

This course offers practice in identifying and developing basic beliefs and values while assessing contemporary philosophies. It includes a study of the history and current issues of education in America.

Graduate

Campus Programs

EDU538 - Literacy Acquisition for Young Children

Description

This course focuses on the relationship between literacy environments and acquisition of language and literacy skills from birth-kindergarten. Young children's meaningful experiences with language, books, writing, and representational materials lay the necessary foundations for later literacy development. In this course students will investigate literacies' beginnings at home and in child care settings. The course provides information on how literacy skills are acquired and nurtured in all young children.

Credits

EDU543 - Learning Theories and Instruction

Description

This course studies the role of contemporary learning theories and their application to educational practice, including issues of readiness, motivation, problem solving, and the social context of learning. Students will understand how to apply scientifically based instructional strategies to promote learning.

Credits

3

Academic Level

Graduate

EDU547 - Curriculum Development

Description

This course is a comprehensive, practical basis for preparing school administrators and teachers to be knowledgeable, creative and effective curriculum designers. Readings will provide students information about the importance and relevance of good curriculum design. The primary focus of the course will be on the study and use of UBD (Understanding by Design). Students will develop a working model of a curriculum unit using the UBD framework.

Credits

3

Academic Level

Graduate

EDU550 - Educational Assessment

Description

This course builds assessment competency by analyzing recent trends in assessment for evaluating and documenting student performance and progress toward desired outcomes. Students examine the uses of assessment at the individual, class and school levels; including New England Common Assessment Data. Students will select and design assessments suitable for instructional decisions that support planning developing curriculum, and making recommendations for instructional improvement. Students will interpret and communicate the results of both externally produced and teacher-produced assessment for a variety of audiences. Students will describe valid grading procedures and discuss ethical issues linked to assessment methods and uses of assessment information.

Credits

3

Academic Level

Graduate

Campus Programs

EDU552 - Assessment for and of Learning

Description

This course is an introduction to assessment for teaching and learning content in grades K-12. Topics include the types, benefits, and uses of formal and informal assessment. Ethical issues of assessment and grading will be discussed. Students will create assessments aligned with standards-based content.

Credits

3

Academic Level

Graduate

EDU554 - The Development of a Mission, Vision and Goals

Description

This course offers a study of the leadership, management, and safe operations of school facilities and an understanding of school finances as it relates to the teaching and learning process. Leaders will learn how to facilitate and engage school board members in a discussion about how school finance and facilities relate to student achievement. Learners will examine various tools and methodologies that support the school process and how to engage and connect the community members in the budget building process. This course aims to make leaders better managers and consumers of financial information rather than budget officers; learners will better understand the real world implications and consequences of how they allocate funds based on the process and decisions they make.

Academic Level

Graduate

EDU604 - Leading a Collaborative School

Description

This course requires students to gain principals' knowledge, skills, and abilities to facilitate a process in the building that is highly collaborative and inclusive of all staff members. Building leadership capacity in teachers and staff is an imperative in a collaborative environment. Having everybody understand why we are doing things, what we will do, and how we will accomplish these goals through this process is important to the success of each initiative in a collaborative environment and positive culture. Learners will engage in deep conversation about the collaborative process and create opportunities to work collaboratively in real time situations.

Credits

3

Academic Level

Graduate

EDU608 - Curriculum, Instruction, Data Continuum

Description

This course builds on previous courses, Curriculum Development, Student Centered Curriculum and Instruction, and Educational Assessment. The course will focus on building a continuous process to monitor, support and hold accountable the system for implementing an effective curriculum, monitoring instructional strategies, and collecting data to inform us of the successful implementation of the curriculum. Levels of proficiency are needed in order to show gaps between the intended curriculum and success in the implementation of the instructional strategies. Leaders will develop strategies to engage teachers in changing instructional strategies to close the gaps in achievement.

EDU609 - Theoretical Foundations

Description

This competency-based course will focus on the knowledge, skills, abilities and dispositions teachers need to apply and analyze the theoretical foundations of general education and special education to his/her professional practice. Teacher Candidates will examine the theoretical foundations of special education and its impact on students with disabilities. This course will provide evidence-based research and clinical opportunities that will be implemented, analyzed, evaluated and refined during Clinical Experience I, II, III and IV (42 weeks). This iterative process facilitates an in-depth understanding of the theoretical foundations needed to address the individual needs of K-12 students with disabilities. With the support of the college faculty and the cooperating practitioner, the teacher candidate will actively engage in on-going self-assessment, focusing on the refinement of their understanding of the unique factors related to students' abilities and disabilities within the learning environment.

Credits

2 - 3

Academic Level

Graduate

EDU610 - Ethics and School Law

Description

The primary goal of this course is for the student to develop awareness of ethical, professional and legal issues pertinent to educational settings. These issues include, ethical decision making processes, legal mandates related to education and special education, professional relationships, confidentiality, supervision, conflict of interest, boundaries and diversity. Additionally, we will discuss obstacles that relate to the provision of educational services in the school and with children and their parents in general.

Credits

EDU622 - Secondary Instructional Methods I

Description

This course provides students with foundational, yet innovative and authentic learning experiences about teaching at the middle and high school levels. The course focuses on the most effective approaches to planning, implementing, managing, and assessing successful and effective learning experiences for 5-12 students. Through interactive discussions, examining resources, and relevant readings, students explore aspects and challenges to teaching content at the middle and high school levels. Topics include: knowing your content, knowing your students, collaborative pedagogies, cooperative learning, lesson/unit development, competency based teaching and learning, project based learning, and the reflective process. Students will be embedded in a middle school in order to learn and apply course concepts.

EDU631 - Clinical Experience I - Science

Description

This clinical, competency-based course will focus on the knowledge, skills, abilities and dispositions teachers need to teach science to students during the SNHU Summer Experience for students rising to Grades 1-6. This clinical experience will provide evidence-based research, and clinical opportunities that will be implemented, analyzed, evaluated and refined during the 6 weeks of clinical experience. This iterative process facilitates the development of skills that promotes the learning of all students in the following: (a) Learner development; (b) Learning differences; (c) Learning environment; (d) Content knowledge; (e) Assessment; (f) Planning and learning facilitation; (g) Reflection and continuous growth; (h) Academic Language. With the support of the college faculty and the cooperating practitioners, the teacher candidate will actively engage in on-going self-assessment, focusing on the refinement of instructing students, supporting student learning and linking their learning progress to the knowledge, skills, abilities and dispositions of the teacher candidate.

EDU632 - Clinical Experience II

Description

This competency-based course will focus on the knowledge, skills, abilities and dispositions teachers need to teach elementary/middle/high school students with disabilities from age 5 up to age 21. This clinical experience will provide evidence-based research, and clinical opportunities that will be implemented, analyzed, evaluated and refined during the 16 weeks of clinical experience. This iterative process facilitates the development of skills that promotes the learning of all students, especially students with disabilities, in the following: (a) Learner development; (b) Learning differences; (c) Learning environment; (d) Content knowledge; (d) Assessment; (e) Planning and learning facilitation; and (f) Reflection and continuous growth. With the support of the college faculty and the cooperating practitioners, the teacher candidate will actively engage in on-going self-assessment, focusing on the refinement of instructing students, supporting student learning and linking the K-12 learning progress to the knowledge, skills, abilities and dispositions of the teacher candidate.

Additional Information

This course includes a course content fee. All of your digital materials and e-texts (if applicable) have been included in the cost of the course. Barnes & Noble on behalf of SNHU has negotiated the very best price for these materials and arranged with the publisher to have them available in Brightspace on the first day of class. While not recommended, any student wishing to exercise their right to opt out of an eligible course fee must visit the Course Materials link in the Brightspace course and follow the Opt-Out instructions. This must be completed by the end of the add/drop period.

Graduate

EDU640C - Integrating Digital Technology I K-12

Description

This course involves the study of the use of technology in elementary and secondary classrooms. Students learn strategies for effective integration of technology into the curriculum. This includes learning such things as how to promote and demonstrate effective use of digital and Web 2.0 tools, how to manage the digital portfolio process, how to utilize assistive technologies. Federal and state legislation will be reviewed including New Hampshire Department of Education Information and Communication Technologies (ICT) program and the National Education Technology Standards (NETS) for teachers and students.

Credits

3

Academic Level

Graduate

EDU641C - Integrating Digital Technology II K-12

Description

This course is the second part of the study of the use of technology in the secondary and postsecondary classroom. Students learn how to plan, implement and support effective integration of technology into the curriculum. Students learn instructional leadership and how to participate in developing policies, procedures, and budgets that support technology integration. Federal and state legislation will be reviewed including New Hampshire Department of Education Information and Communication Technologies (ICT) program and the National Education Technology Standards (NETS) for administrators.

Credits

3

Academic Level

Graduate

Campus Programs

EDU642C - Integration Specialist Toolbox

Description

Students study state-of-the-art digital integration technology tools, resources and methodologies for the K-12 classroom. This course develops the technical competencies and skills needed to collaborate with content area teachers. Topics range from digital resources and system network administration to end use applications.

Credits

3

Academic Level

Graduate

EDU656 - Reflective Leadership Skills

Description

This course will allow aspiring principals to develop the knowledge, skills, and abilities to reflect on their behaviors and learn how to match appropriate leadership behaviors to successfully process and implement new programs or goals. It will also allow students to reflect on their current behaviors and how their current behaviors will either positively affect their success or how their behaviors must change in order for them to be effective educational leaders.

Credits

3

Academic Level

Graduate

EDU670 - Leading Creativity and Innovation

Description

This course will support the development of the knowledge, skills, and abilities of a school leader to engage individuals and groups in work that is both creative and innovative to improve student academic success and behaviors. The course will offer leaders an opportunity to develop their innovative skills as leaders in ways that foster improvement and how we approach learning in our schools.

Credits

3

Academic Level

Graduate

EDU680 - Teacher Support, Monitoring, and Accountability

Description

This course will guide building leaders through a process to create a teacher improvement model that is a formative process. This process builds on the leader's ability to work with teachers to create support for specific goals and monitor the implementation strategies for those goals. Next we will examine the continuous process necessary to move the goals forward and collect data on the process of change. Lastly we will examine the variety of accountability systems for leaders to use in their schools and how to ensure the system is working to improve instruction and therefore student achievement.

Academic Level

Graduate

Campus Programs

EDU685C - Global Educational Technology

Description

This course is intended to provide educators with a global perspective of technology integration in elementary and secondary classrooms. Students explore the meaning of global digital citizenship and new media literacy. The course concentrates on understanding cross-cultural awareness, political and economic differences in countries outside of the United States. Students evaluate, adapt and reflect on emerging tools and global trends.

Credits

3

Academic Level

Graduate

EDU699 - Advanced Field Experience

Description

This course provides an opportunity for the student to put theory into practice. Through a variety of experiences in public schools, the student is given opportunities to practice the theories studied through prior coursework and to build on prior learning experiences. Additional learning outcomes are determined collaboratively by the student and the course instructor.

1 - 12

Academic Level

Graduate

EDU739 - Practicum in Curriculum Administration I

Description

Students are required to develop and implement two products and/or experiences and document a leadership role in the area of curriculum administration. Students complete a detailed proposal or plan of study on their goals, product(s), audience, follow-up, etc. for this practicum. The purpose of this practicum is to encourage the educator as a researcher and leader in district curriculum administration and to encourage the integration and application of course work. The practicum is completed during the semester under the supervision of a certified school district administrator and the student's instructor in a setting different from or complementary to EDU-740 Practicum in Curriculum Administration II. This course is the capstone of leadership in Curriculum administration and is taken before EDU-740 Practicum in Curriculum Administration II.

Credits

EDU750 - Seminar in Teaching Writing

Description

This course is designed to help educators who work with middle and secondary school students to design and plan programs and courses that promote improved literacy practices, especially improvement of student writing. By investigating and practicing a variety of writing exercises, processes, and approaches to improve their own writing skills, students will create a portfolio of ideas and options for teaching others.

Credits

3

Academic Level

Graduate

EDU760 - School Facilities and Finance

Description

This course offers a study of the management and operation of a school facility and an understanding of school finance as it relates to the teaching and learning process. Students will learn how to engage school board members in a discussion about how school finance and facility relate to student achievement. Students will examine various tools and methodologies that support the school process and how to connect with community members in the budget building process. This course aims to make students better managers and consumers of financial information rather than budget officers; students will better understand the real-world implications and consequences of their decisions and allocations.

Credits

3

Academic Level

Graduate

Campus Programs

EDU765 - School and Community Relations

Description

This course explores relationships with the broader community to foster learning. Students learn how to engage stakeholders, create and communicate a school vision of learning, develop community collaboration skills, capitalize on the diversity of the school community and use the cultural context of the larger community to develop activities and policies that benefit students and their families. This course makes use of individualized programs of study and experience.

Credits

3

Academic Level

Graduate

EDU770 - Certification Internship

Description

This is the capstone course for certified teachers seeking an additional certification. Students complete a full-time, competency-based internship at a site appropriate to the area of certification being sought. During this internship, the student is mentored by like-credentialed site personnel as well as by a member of the Southern New Hampshire University faculty. This course also includes a weekly seminar held on campus.

Credits

3

Academic Level

Graduate

EDU780 - School Organizational Leadership

Description

The course explores the dynamics of transformational leadership that looks beyond traditional school environments and welcomes non-traditional thinking. Students will consider themselves "architects" of the teaching and learning environments within their schools wherein there is a culture of continuous improvement. Future school leaders will: explore technology that supports teachers and administrators decision-making; learn how to develop policies and practices that support learning; explore how extended learning time can advantage underachieving students; investigate the benefits and challenges of risk taking and transparency; and look at models of professional learning communities.

EDU861 - Social Justice Theories and Perspectives

Description

This course focuses on a wide variety of historical, contemporary, and emerging theories and perspectives of social justice. Research related to these theories and perspectives is also explored. Students deeply examine and analyze these theories, perspectives, and research to gain an advanced perspective of their similarities, differences, and evolution.

Credits

3

Academic Level

Doctoral

Campus Programs

EDU863 - Equity, Leadership, Policies, and Structures

Description

This course applies an equity and social justice critical lens to examine policies, practices, and processes embedded in leadership and organizational, political, and societal structures. This includes analyzing the power and privilege embedded into policies, practices, and processes. The course also prompts the exploration of different definitions and perspectives of equity and the impact these have.

Credits

3

Academic Level

Doctoral

EDU865 - Identity and Constructs of Power

Description

This course focuses on the concept of identity and power as embedded within social justice conversations. This includes exploring identity of self, identity of others, and the impact that stacking identities has on lived realities. This also includes gaining understandings of the visible and invisible structures of power and how they are present in different identities and how they are viewed from different identities.

Credits

3

Academic Level

Doctoral

EDU867 - Education Leadership, Equity, and Social Change

Description

This course focuses on scholarship related to the practice of education leadership and its relationship to fostering equity and positive social change. Within this wide-ranging exploration, specific areas of focus include strategies for charting and navigating social change and infusing social justice awareness and appreciation within others.

Credits

3

Academic Level

Doctoral

EDU901 - Foundations of Leadership

Description

This foundational course explores a wide variety of leadership theories within the field of education as well as other leadership domains. An emphasis is on students forming a robust understanding of leadership theories, the evolution of leadership theories, and their historical and current presence in the practice of leadership.

Credits

3

Academic Level

Doctoral

Campus Programs

EDU903 - Leadership and Progressive Policy

Description

This course explores a wide variety of existing and emerging policies in education contexts related to topics such as equity, finance, taxation, and governance. Other topics explored include policy development, policy implementation, and frameworks for understanding, assessing, and evaluating education policy.

Credits

3

Academic Level

Doctoral

EDU909 - Introduction to Research Analysis and Design

Description

This course prepares students to be advanced consumers of research and to conduct analyses of existing research. Students also gain foundational knowledge of a wide variety of approaches to research and research designs.

Credits

3

Academic Level

Doctoral

EDU910 - Theory into Practice I

Description

This course is the first summer intensive/summer residency experience at the beginning of the Ed.D. program. Students meet for eight days for self-assessment, introduction to the program and to SNHU's educational and technological expectations, and to develop their personal educational plan for the following three years.

Credits

3

Academic Level

Doctoral

EDU911 - Educational Scholarship

Description

This course aims to fuse the practice of twenty-first century education with scholarship which is thought-provoking, relevant, and practical. Candidates will investigate both current educational scholarship and the ways in which that scholarship is disseminated and put into practice.

Credits

3

Academic Level

Doctoral

EDU913 - Sociocultural Analysis of Education System

Description

This course investigates the social and cultural factors that influence academic achievement and the teaching practices that promote diversity and inclusion. Candidates will examine the approaches to addressing the many challenges of social justice.

Credits

3

Academic Level

Doctoral

Campus Programs

EDU914 - Reflection and Evaluation I

Description

This course engages candidates in assessing their reflection and evaluation skills and competencies in a number of areas, such as: data analysis, teaching and learning practice, and approaches to both change and social justice.

Credits

3

Academic Level

Doctoral

EDU916 - Applied Research I

Description

This course introduces techniques and approaches of applied research. Topics addressed include: Qualitative and quantitative methods, ethical and legal responsibilities of the researcher, development of problem statements relevant to candidates own teaching/employment circumstances.

Credits

3

Academic Level

Doctoral

EDU918 - Applied Research II

Description

This course builds upon EDU916. Candidates will use qualitative, quantitative or mixed methods to investigate a research question.

Credits

3

Academic Level

Doctoral

EDU919 - Decision Making in Education Systems I

Description

This course investigates multiple approaches to decision-making in various educational contexts. Decision-making models are introduced and applied to a variety of case studies.

Credits

3

Academic Level

Doctoral

EDU920 - Theory into Practice II

Description

This course follows the first year of the Ed.D. program and allows students to meet as a group to discuss their progress, to meet with faculty to choose a dissertation chair, to develop their literature review, and to identify their qualifying exam questions.

Credits

3

Academic Level

Doctoral

Campus Programs

EDU921 - Reflection and Evaluation II

Description

This course focuses on reflection and the development of collaborative learning organizations which support creativity and innovation.

Credits

3

Academic Level

Doctoral

EDU923 - Decision Making in Education Systems II

Description

This course builds upon EDU-919. Candidates apply the techniques introduced in Decision Making I to their own educational contexts.

Credits

3

Academic Level

Doctoral

EDU924 - Case Study I

Description

This course will explore the various case study methodologies and perspectives used in educational research. Candidates will develop an understanding of the various components of case study research and its application to educational settings.

Credits

3

Academic Level

Doctoral

EDU926 - Case Study II

Description

This course builds on EDU-924. Candidates will use case study methodology to investigate a research question related to their research interests.

Credits

3

Academic Level

Doctoral

EDU928 - Research-Based Independent Study I

Description

This course provides the opportunity for candidates to develop their research questions and frame their research ideas into research plans. Candidates will complete a draft of their dissertation proposal, including a well-developed literature review.

Credits

3

Academic Level

Doctoral

Campus Programs

EDU929 - Research-Based Independent Study II

Description

This course provides the opportunity for candidates to develop the research design and methodology that will be employed in their dissertation research. Candidates will complete a well-developed dissertation proposal.

Credits

3

Academic Level

Doctoral

EDU930 - Theory into Practice III

Description

This course follows the second year of the Ed.D. program. Students defend their qualifying exam questions, present their dissertation proposals, and complete the IRB process.

Credits

3

Requisites

- Instructor Permission Required

Academic Level

Doctoral

EDU931 - Quantitative Research Methods

Description

This course builds student knowledge of quantitative research methods, advances student ability to create meaningful quantitative research questions, and ensures students know the characteristics of valid and reliable research studies that answer these questions.

Credits

3

Academic Level

Doctoral

EDU933 - Advanced Quantitative Analysis

Description

This course focuses on advanced practices and skills needed to conduct original analyses of quantitative data and research. Designing approaches for conducting these analyses, including the use of related research tools, is emphasized.

Credits

3

Academic Level

Doctoral

Campus Programs

EDU935 - Qualitative Research Methods

Description

This course builds student knowledge of qualitative research methods, advances student ability to create meaningful qualitative research questions, and ensures students know the characteristics of trustworthy research studies that answer these questions.

Credits

3

Academic Level

Doctoral

EDU937 - Advanced Qualitative Analysis

Description

The course focuses on advanced practices and skills needed to conduct original analyses of qualitative data and research. Designing approaches for conducting these analyses, including the use of related research tools, is emphasized.

Credits

3

Academic Level

Doctoral

EDU939 - Mixing Methodologies and Methods

Description

This course develops an advanced understanding of research methodologies, the significance of methodological understandings when designing and conducting research, and research with multiple embedded methodologies, paradigms, and worldviews. Designs of research for answering questions by mixing different types of data and methods are explored.

Credits

3

Academic Level

Doctoral

EDU943 - Dissertation I

Description

This course provides the opportunity for candidates to discuss their dissertation research and to help monitor timely progress toward completion of the dissertation. After completing the final draft of the dissertation and receiving approval of the chairperson, the candidate will make an oral presentation defending his/her dissertation for the doctoral committee and other interested individuals. Candidates generally register for a minimum of three terms of dissertation.

Credits

3

Academic Level

Doctoral

Campus Programs

EDU944 - Dissertation II

Description

This course provides the opportunity for candidates to discuss their dissertation research and to help monitor timely progress toward completion of the dissertation. After completing the final draft of the dissertation and receiving approval of the chairperson, the candidate will make an oral presentation defending his/her dissertation for the doctoral committee and other interested individuals. Candidates generally register for a minimum of three terms of dissertation.

Credits

3

Academic Level

Doctoral

EDU945 - Dissertation III

Description

This course provides the opportunity for candidates to discuss their dissertation research and to help monitor timely progress toward completion of the dissertation. After completing the final draft of the dissertation and receiving approval of the chairperson, the candidate will make an oral presentation defending his/her dissertation for the doctoral committee and other interested individuals. Candidates generally register for a minimum of three terms of dissertation.

Credits

3

Academic Level

Doctoral

EDU950 - Dissertation Colloquium

Description

The Doctoral Colloquium provides the opportunity for doctoral candidates to continue their dissertation research and writing under the supervision of program faculty. Candidates who need additional time to bring their dissertation to a successful defense must register for the dissertation colloquium each year beyond the third year of the program.

Credits

3

Academic Level

Doctoral

EDU951 - Dissertation Colloquium II

Description

The Doctoral Colloquium provides the opportunity for doctoral candidates to continue their dissertation research and writing under the supervision of program faculty. Candidates who need additional time to bring their dissertation to a successful defense must register for the dissertation colloquium each Fall beyond the third year of the program.

Credits

3

Academic Level

Doctoral

Campus Programs

EDU952 - Dissertation Colloquium III

Description

The Doctoral Colloquium III provides the opportunity for doctoral candidates to continue their dissertation research and writing under the supervision of program faculty. Candidates who need additional time to bring their dissertation to a successful defense must register for the dissertation colloquium each Winter beyond the third year of the program.

Credits

3

Education Certificate of Advanced Graduate Study

EDCA561 - Advanced Methods for the STEM Classroom

Description

This course creates an opportunity for teachers to advance their knowledge of the methods of teaching and learning that are at the core of a STEM classroom. Topics explored can include constructivism, social learning, classroom relevancy, and constructive experimentation.

Credits

3

Academic Level

Graduate

EDCA562 - Enhancing the STEM Classroom with Advanced Applications

Description

This course focuses on advanced applications within the STEM classroom. A special focus is placed on the differentiation and personalization of the STEM classroom to meet diverse student needs and fostering student autonomy within the classroom.

Credits

3

Academic Level

Graduate

Campus Programs

EDCA563 - Navigating Leadership in STEM Education

Description

In this course, learners leverage school, classroom, and student data to develop a customized vision for STEM teaching and learning within their organization. A focus is also placed on the leadership aspect of analyzing existing curriculum and teaching practices to determine the obstacles, required steps, and necessary supports need to achieve this vision.

Credits

3

Academic Level

Graduate

EDCA564 - Envisioning and Sustaining System-Wide STEM Implementation

Description

This course focuses on learners building on their advanced understanding of STEM education to design and implement a system-wide plan to achieve a vision for STEM teaching and learning. Key focus areas include building teacher and student capacity for STEM teaching and learning.

Credits

3

Academic Level

Graduate

EDCA600 - Profile Seminar for Post-Graduates

Description

This seminar is taken at the start of the program and is a prerequisite for admission into the graduate program. Students determine how the program best serves their professional goals and meet with faculty to determine whether these goals can be met. Students in this seminar are oriented to the program and begin to shape their courses of study and future integrative activities.

Credits

1

Requisites

- Complete 1 of the following
 - Placement in CERT.CAGS, CERT.CAGS.CIN, or CERT.CAGS.LEA
 - Permission of instructor

Academic Level

Graduate

EDCA600B - Post-Masters Profile Seminar - STEM

Description

This seminar is taken at the start of the program. Students in this seminar are oriented to the program with a STEM focus and begin to shape their courses of advanced study and future integrative activities.

Credits

1

Academic Level

Graduate

Campus Programs

EDCA610 - Practices in Curriculum and Management

Description

This course examines the knowledge and skills a professional educator needs to exercise leadership in curriculum development, implementation and assessment.

Credits

3

Requisites

- Complete 1 of the following
 - Placement in CERT.CAGS, CERT.CAGS.CIN, or CERT.CAGS.LEA
 - Permission of instructor

Academic Level

Graduate

EDCA611 - Advanced Methods of STEM Curriculum

Description

The course explores advanced methods of teaching, learning, and curriculum characteristics and standards related to STEM education. A focus is on applying these methods to professional practice.

Credits

3

Academic Level

Graduate

EDCA615 - Advanced Applications in Curriculum and Management

Description

In this second-level course, processes involved in curriculum implementation are stressed, practiced and related specifically to students' school settings or education environments.

Credits

3

Requisites

- Complete 1 of the following
 - Placement in CERT.CAGS, CERT.CAGS.CIN, or CERT.CAGS.LEA
 - Permission of instructor

Academic Level

Graduate

EDCA616 - Enhancing STEM Curriculum Development with Advanced Applications

Description

This courses advances knowledge and application of STEM teaching and learning standards within a classroom setting. A focus is on widely-established structured elements of STEM curriculum and learning designs.

Credits

3

Academic Level

Graduate

Campus Programs

EDCA620 - Practices in Technology and Instruction

Description

Is teaching an art or a science? In what ways can it be enhanced through technology? Course participants investigate the act of teaching and the integration of technology to construct relevant learning experiences for themselves and their students.

Credits

3

Requisites

- Complete 1 of the following
 - Placement in CERT.CAGS, CERT.CAGS.CIN, or CERT.CAGS.LEA
 - Permission of instructor

Academic Level

Graduate

EDCA625 - Advanced Applications in Technology and Instruction

Description

This second-level course intensifies the effort to determine the best processes to integrate the varying forms of instructional technology into different disciplines and environments on behalf of students.

Credits

3

Requisites

- Complete 1 of the following
 - Placement in CERT.CAGS, CERT.CAGS.CIN, or CERT.CAGS.LEA
 - Permission of instructor

Academic Level

Graduate

EDCA630 - Practices in Assessment and Evaluation

Description

How are assessment and evaluation part of the learning process? What works in assessment? Participants in this course examine assessment and evaluation approaches and give special attention to developing products, such as Portfolio.

Credits

3

Requisites

- Complete 1 of the following
 - Placement in CERT.CAGS, CERT.CAGS.CIN, or CERT.CAGS.LEA
 - Permission of instructor

Academic Level

Graduate

EDCA631 - Advanced Methods of STEM Assessment

Description

This course focuses on advancing student and teacher assessment practices that are aligned with STEM content and education. A focus is placed on the application of advanced assessment methods within a learning context.

Credits

3

Academic Level

Graduate

Campus Programs

EDCA635 - Advanced Applications in Assessment and Evaluation

Description

Students apply forms of assessment and evaluation learned in the first-level course to their own classrooms, school buildings or education systems.

Credits

3

Requisites

- Complete 1 of the following
 - Placement in CERT.CAGS, CERT.CAGS.CIN, or CERT.CAGS.LEA
 - Permission of instructor

Academic Level

Graduate

EDCA636 - Enhancing STEM Assessment Practices with Advanced Applications

Description

This course focuses on learners leveraging advanced applications of STEM-aligned teaching and student assessment and evaluation practices to support student growth and academic success. This includes designing and using practices that help monitor teaching and learning progress over varying lengths of time.

Credits

3

Academic Level

Graduate

EDCA640 - Practices in Leadership and Organizations

Description

Are teachers leaders? How has the role of the school administrator evolved? Students in this class examine the body of leadership research within the context of educational organizations and explore the relationship between leadership style and educational leadership.

Credits

3

Requisites

- Complete 1 of the following
 - Placement in CERT.CAGS, CERT.CAGS.CIN, or CERT.CAGS.LEA
 - Permission of instructor

Academic Level

Graduate

Campus Programs

EDCA645 - Complexities in Leadership

Description

How can educators use their leadership styles on behalf of their students? This course provides an in-depth exploration of the processes of maximizing educators' skills to effect positive change in classrooms or other education settings.

Credits

3

Requisites

- Complete 1 of the following
 - Placement in CERT.CAGS, CERT.CAGS.CIN, or CERT.CAGS.LEA
 - Permission of instructor

Academic Level

Graduate

EDCA650 - Practices in Learning and Development

Description

Learning is the process of constructing meaningful connections. Class participants explore and apply theories of learning and human development in the context of educational settings.

Credits

3

Requisites

- Complete 1 of the following
 - Placement in CERT.CAGS, CERT.CAGS.CIN, or CERT.CAGS.LEA
 - Permission of instructor

Academic Level

Graduate

EDCA651 - Advanced Methods of STEM Instruction

Description

This course advances teacher thinking about what makes STEM instruction unique from other types of instruction. A focus is on the advanced methods of STEM instructional practices and identifying opportunities for continued instructional improvements.

Credits

Graduate

Campus Programs

EDCA655 - Advanced Applications in Learning and Development

Description

Though we know the developmental stages of the children with whom we work and the adults with whom we interact, how do we maximize those efforts in real life? This class explores in-depth the processes involved in interactions with children and adults in order to ensure progressive change.

Credits

3

Requisites

- Complete 1 of the following
 - Placement in CERT.CAGS, CERT.CAGS.CIN, or CERT.CAGS.LEA
 - Permission of instructor

Academic Level

Graduate

EDCA656 - Enhancing STEM Instruction with Advanced Applications

Description

This course elevates the learners thinking and understanding of advanced STEM instructional practices, giving a particular focus to instructional practices that are aligned with practices with science, technology, engineering, and mathematics. A focus is placed on the application of these advanced practices within the classroom.

Credits

3

Academic Level

Graduate

Education-Field Based Ed

EDGR510 - Foundations of Advanced Teaching Practice

Description

Exploring the latest trends and knowledge of advanced teaching practices is a source of inspiration for educators looking to continually have a positive impact on learners. Through this exploration, educators can continue to advance their professional skill. In this course, learners are given the opportunity to connect their work to contemporary trends, approaches, and evidenced-based research that are especially relevant to their practice, and integrate new thinking, skills, and strategies into their professional setting.

Credits

3

Academic Level

Graduate

EDGR520 - Becoming a More Reflective Practitioner

Description

Perhaps no other quality distinguishes highly effective teachers more than their ability to reflect upon and construct meaning from their professional experiences. This skill allows them to gain new insights into their motivations for teaching, deepen their interactions with students and peers, and improve their practice in meaningful ways. In this course, learners explore a variety of approaches, strategies, and models for developing as reflective practitioners.

EDGR530 - Cultivating Community In & Out of the Classroom

Description

Learning communities today expand well beyond the traditional classroom walls. Educator practices have evolved to incorporate the influence and collaboration of various stakeholders to enrich learning experiences for students and create a deeper connection between schools and local/global communities. In this course, learners explore strategies for engaging with internal and external stakeholders to develop a shared vision for their classroom community and enhance learning experience through those collaborations.

Credits

3

Academic Level

Graduate

EDGR540 - Strategies for Impactful Professional Collaboration

Description

By its nature, the goal of meeting the needs of all learners requires a collaborative approach, but that can be challenging for teachers given the considerable demands placed on their time. This course is designed to help educators examine various best practices for getting the most out of professional collaboration by leveraging opportunities in an intentional and systematic manner.

Credits

3

Academic Level

Graduate

EDGR561 - Foundations of the STEM Classroom

Description

This course creates an opportunity for teachers to explore foundational characteristics of teaching and learning that are at the core of a STEM classroom. Topics explored can include constructivism, social learning, classroom relevancy, and constructive experimentation.

Credits

3

Academic Level

Graduate

EDGR562 - Advanced Practices for the STEM Classroom

Description

This course focuses on advanced practices and characteristics of the STEM classroom. A special focus is placed on the differentiation and personalization of the STEM classroom to meet student needs and fostering student autonomy within the classroom.

Credits

3

Academic Level

Graduate

Campus Programs

EDGR563 - Providing Effective STEM Leadership

Description

In this course, teachers analyze school, classroom, and student data to develop a customized vision for STEM teaching and learning within their organization. A focus is also placed on the existing curriculum and teaching practices to determine the development required to achieve this vision.

Credits

3

Academic Level

Graduate

EDGR564 - Developing Systems to Sustain STEM Implementation

Description

This course focuses on teachers designing and implementing a plan to achieve a vision for STEM teaching and learning. Key focus areas include building teacher and student capacity for STEM teaching and learning.

Credits

3

Academic Level

Graduate

EDGR600 - Profile Seminar

Description

This seminar is taken at the start of the program and is a prerequisite for admission into the graduate program. Students determine how the program best serves their professional goals and meet with faculty to determine whether these goals can be met. Students in this seminar are oriented to the program and begin to shape their courses of study and future integrative activities.

Credits

1

Academic Level

Graduate

EDGR600B - Profile Seminar - STEM

Description

This seminar is taken at the start of the program. Students in this seminar are oriented to the program with a STEM focus and begin to shape their courses of study and future integrative activities.

Credits

1

Academic Level

Graduate

EDGR601 - Action Research Practicum I

Description

This seminar reviews the entire Action Research process and sequence. Students are expected to begin to conceptualizing their practicum topics and developing research questions specific to their work environments.

Credits

1

Academic Level

Graduate

Campus Programs

EDGR602 - Action Research Practicum II

Description

This seminar continues the Action Research process through collegial networking and discussion. Students address literature and research reviews and develop data collectors for researching their environments. The concept of triangulation to maximize the reliability of developed assessment tools is stressed as part of the research design.

Credits

1

Academic Level

Graduate

EDGR603 - Action Research Practicum III

Description

Students in this session begin collecting data using the tools they developed in the previous seminar. This collection occurs over a period of time to ensure complete acquisition of data and assessment information. Networking with classmates to draw upon the "collective genius" of the cohort is part of the process.

Credits

1

Academic Level

Graduate

EDGR604 - Action Research Practicum IV

Description

Students examine in detail the information they have collected for their studies. Trends are identified and options for change are discussed. Students identify and implement plans of action.

Credits

1

Academic Level

Graduate

EDGR610 - Dimensions of Curriculum and Management

Description

This course examines the knowledge and skills a professional educator needs to exercise leadership in curriculum development, implementation and assessment.

Credits

3

Academic Level

Graduate

EDGR611 - Foundations of STEM Curriculum

Description

The course introduces unique teaching, learning, and curriculum characteristics and standards related to STEM education. A focus is on applying these elements to professional practice.

Credits

3

Academic Level

Graduate

Campus Programs

EDGR615 - Curriculum and Management Decision Making

Description

In this second-level course, processes involved in curriculum implementation are stressed, practiced and related specifically to students' school settings or education environments.

Credits

3

Academic Level

Graduate

EDGR616 - Advanced STEM Curriculum Development

Description

This course advances knowledge and application of STEM teaching and learning standards within a classroom setting. A focus is on widely-established structured elements of STEM curriculum and learning designs.

Credits

3

Academic Level

Graduate

EDGR620 - Dimensions of Teaching/Instructional Technology

Description

Is teaching an art or a science In what ways can it be enhanced through technology Course participants investigate the act of teaching and the integration of technology to construct relevant learning experiences for themselves and their students.

Credits

3

Academic Level

Graduate

EDGR625 - Teaching and Instructional Technology Applications

Description

This second-level course intensifies the effort to determine the best processes to integrate the varying forms of instructional technology into different disciplines and environments on behalf of students.

Credits

3

Academic Level

Graduate

EDGR630 - Dimensions of Assessment and Evaluation

Description

How are assessment and evaluation part of the learning process? What works in assessment? Participants in this course examine assessment and evaluation approaches and give special attention to developing products, such as Portfolio.

Credits

3

Academic Level

Graduate

Campus Programs

EDGR631 - Foundations of STEM Assessment

Description

This course introduces new thinking about student and teacher assessment practices that are aligned with STEM content and education. A focus is placed on the application of these practices within a learning context.

Credits

3

Academic Level

Graduate

EDGR635 - Applications in Assessment/Evaluation

Description

Students apply forms of assessment and evaluation learned in the first-level course to their own classrooms, school buildings or education systems.

Credits

3

Academic Level

Graduate

EDGR636 - Advanced Practices in STEM Assessment

Description

This course fosters the advanced application of STEM-aligned teaching and student assessment and evaluation practices. This includes designing and using practices that help monitor teaching and learning progress over varying lengths of time.

Credits

3

Academic Level

Graduate

EDGR640 - Dimensions of Leadership & Organization

Description

Are teachers leaders? How has the role of the school administrator evolved? Students in this class examine the body of leadership research within the context of educational organizations and explore the relationship between leadership style and educational leadership.

Credits

3

Academic Level

Graduate

EDGR641 - Transformative Teacher Leadership

Description

Teacher leadership is essential to supporting system-wide change and building a school's capacity to advance the learner's experience. In this course, learners will explore and develop the skills and strategies necessary to embrace formal and informal leadership roles and have an influence that extends well beyond their classroom.

Credits

3

Academic Level

Graduate

Campus Programs

EDGR645 - Challenges in Leadership

Description

How can educators use their leadership styles on behalf of their students? This course provides an in-depth exploration of the processes of maximizing educators' skills to effect positive change in classrooms or other education settings.

Credits

3

Academic Level

Graduate

EDGR650 - Dimensions in Learning and Development

Description

Learning is the process of constructing meaningful connections. Class participants explore and apply theories of learning and human development in the context of educational settings.

Credits

3

Academic Level

Graduate

EDGR651 - Foundations of STEM Instruction

Description

This course helps develop teacher thinking about what makes STEM instruction unique from other types of instruction. A focus is on the application of core STEM instructional practices and identifying opportunities for instructional improvements.

Credits

3

Academic Level

Graduate

EDGR652 - Teaching for Educational Equity

Description

The classroom, be it brick-and-mortar or virtual, represents the heart of the educational process, but for many learners, it is not always designed with consideration for their unique backgrounds, needs, or abilities. In this course, learners explore advanced strategies for promoting equity and fairness in the learning process through the design and implementation of developmentally, linguistically, and culturally appropriate instruction.

Credits

3

Academic Level

Graduate

EDGR655 - Learning and Development Applications

Description

Though we know the developmental stages of the children with whom we work and the adults with whom we interact, how do we maximize those efforts in real life? This class explores in-depth the processes involved in interactions with children and adults in order to ensure progressive change.

Credits

3

Academic Level

Graduate

Campus Programs

EDGR656 - Advanced Practices in STEM Instruction

Description

This course expands teacher thinking about STEM instructional practices, giving particular focus to instructional practices that are aligned with practices with science, technology, engineering, and mathematics. A focus is placed on the application of these practices within the classroom.

Credits

3

Academic Level

Graduate

EDGR660 - Purposeful Planning & Design

Description

Increasingly, the demands placed on teachers and the complex context of the classroom make instructional planning one of the most challenging aspects of the teaching profession. Yet, effectively anticipating the needs of learners can have a profound impact on the success of a module, lesson, or unit. In this course, learners explore a variety of advanced, evidence-based methods and approaches for designing instruction that address the needs of individual learners.

Credits

3

Requisites

- Complete:
 - EDGR510 - Foundations of Advanced Teaching Practice (3)
 - EDGR520 - Becoming a More Reflective Practitioner (3)

Academic Level

Graduate

EDGR661 - Meaningful Assessment Practices to Promote Learning

Description

When properly integrated, assessment methods can provide learners with rich feedback and a sense of agency over their own learning. In this course, students explore various approaches to learning assessment that transcend accountability-based approaches in lieu of those that enable more dynamic interaction between students and the teacher, while simultaneously providing the empirical data necessary for making informed instructional decisions.

Credits

Campus Programs

EDGR662 - Authentic & Experiential Learning Practices

Description

A hallmark of advanced educational practice involves the design of experiences that place the learner in an authentic context in which they possess agency and take an active role in their own learning. In this course, learners explore various evidence-based approaches for designing and implementing experiential learning practices.

Credits

3

Requisites

- Complete:
 - EDGR510 - Foundations of Advanced Teaching Practice (3)
 - EDGR520 - Becoming a More Reflective Practitioner (3)

Academic Level

Graduate

EDGR690 - Capstone Seminar

Description

This seminar is taken at the final stage of the program. It provides an opportunity for students to celebrate the professional milestones that they have achieved as they complete the master of education program. This also is the occasion for extending and celebrating professional growth by sharing key insights or research results from the practicum with the professional community.

Credits

1

Academic Level

Graduate

EDGR697 - Practitioner Research in Advanced Planning

Description

In this project-based course, learners draw upon earlier coursework to conduct a systematic investigation and improvement of an aspect of their own instructional planning and design processes. The resulting project involves the incorporation of new approaches or models gathered from empirical research, as well as strategies for addressing the needs of a diverse set of learners.

Credits

EDGR900 - Doctoral Profile Seminar

Description

This seminar is taken at the start of the program and is a prerequisite for admission. Students determine how the program best serves their professional goals and meet with faculty to determine whether these goals can be met. Students in this seminar are oriented to doctoral-level work and begin to shape their courses of study and program activities.

Credits

1

Academic Level

Doctoral

EDGR912 - Innovative Leadership

Description

This course builds on foundational leadership theories and discussions and focuses on innovation as a complex, organization-wide endeavor that requires a specific set of crosscutting leadership practices. These practices that intentionally structure, organize, and encourage innovation are explored collaboratively and in specific contexts.

Credits

3

Academic Level

Doctoral

Campus Programs

EDGR914 - Leading a Culture of Abundance

Description

This course combines an exploration of leadership principles, concepts, theories, and practices with personal appreciative reflection in order to provide opportunities to discover how opportunities can be cultivated within an organizational context and for the benefit of individuals within an organizational context.

Credits

3

Academic Level

Doctoral

EDGR916 - Social Entrepreneurial Leadership

Description

This course examines social entrepreneurial leadership and approaches that help drive innovation and transformation. In addition to a theoretical and generalized focus on social entrepreneurial leadership, a variety of social enterprises with mission-driven and values-based leadership are explored to uncover inspiration for developing personal leadership.

Credits

3

Academic Level

Doctoral

EDGR918 - Sociocultural Perspectives

Description

This course provides an opportunity for leaders to expand their understanding of important sociocultural trends and their application to leadership in an increasingly diverse world. A focus is placed on individual and group voice in communities, assessing one's own biases, and relativistic decision-making to establish an ethical understanding of culture as a leader.

Credits

3

Academic Level

Doctoral

EDGR922 - Organizational Analysis

Description

This course provides a foundation for considering the complexities of organizations by drawing upon theories in behavioral and physical science that contribute to a better understanding of human and organizational development.

Credits

3

Academic Level

Doctoral

Campus Programs

EDGR924 - Organization Innovation

Description

This course builds on foundational organization and analysis topics and invites exploration of the types, levels, and stages of organizational innovation. Consideration is given to innovation as both an outcome and as a process associated with organizational development.

Credits

3

Academic Level

Doctoral

EDGR926 - Organizations and Positive Social Change

Description

This course invites consideration of the role organizations have in positive social change. Scholarly, applied, and inspirational explorations uncover the actions, behaviors, relationships, and activities for strategic advocacy as well as the leadership for fostering ongoing, multi-stakeholder engagement in positive social change.

Credits

3

Academic Level

Doctoral

EDGR928 - Thriving Organization Culture

Description

This course focuses attention on organizational habits and leadership strategies that are instrumental in cultivating and sustaining an organizational culture for supporting members of the organization, inspiring actions in accordance with a positive emotional commitment, and fostering productive mindsets.

Credits

3

Academic Level

Doctoral

EDGR932 - Applied Research

Description

This course provides a foundation for an advanced scholar-practitioner to understand, evaluate, apply, and understand the significance of research within individual and organizational contexts. A variety of research approaches and their respective underlying assumptions are explored in order to better understand the differences and strengths of each.

Credits

3

Academic Level

Doctoral

Campus Programs

EDGR934 - Research Analysis

Description

This course provides an opportunity for leaders to expand their understanding of research analysis and its application to leadership and organizational development. A focus is placed on learning, identifying, and evaluating the strengths of different methods of analyzing research, and conducting original research analysis.

Credits

3

Academic Level

Doctoral

EDGR936 - Research Design

Description

This course explores different qualitative, quantitative, and mixed methods approaches to research design and data collection. An emphasis is placed on understanding the strengths and appropriateness of different research designs for various research topics and research questions.

Credits

3

Academic Level

Doctoral

EDGR938 - Advanced Research Methodologies

Description

This course provides an opportunity for deeper exploration into particular research methodologies based on individual interest and needs. Scholar-practitioners explore and apply methodologies and methods that are of special individual interest and need.

Credits

3

Academic Level

Doctoral

EDGR941 - Scholar-Practitioner I

Description

These initial courses provide a foundation for a Dissertation in Practice and the develop of oneself as a Scholar-Practitioner. The concept of a Dissertation in Practice is considered, as is the importance of appreciatively framing a dilemma as part of a focus of one's work. Organization Analyses and Reviews of Literature are explored from a Scholar-Practitioner perspective.

Education-Professional Devel

EDPD511 - Foundations of Competency-Based Education

Description

This course is designed to help you build the knowledge and skill you need to become a spokesperson, advocate, and change agent for advancing competency education. In the first part of the course, you'll learn what competency-based education is, why we need competency education, and explore different national models of competency education. In the second part of the course, you'll learn about five essential elements of competency-based education and examine relationships between these elements. In the third part of the course, you'll explore four key issues facing competency education, alongside effective strategies for addressing these issues. In the final part of the course, you'll apply your learning by working with a collaborative team to design and test a prototype that addresses an issue related to competency education in your local context.

Credits

Graduate

EDPD518 - Foundations of Student Agency in a Competency-Based System

Description

In the Student Agency Foundations module, learners will engage in four foundational practices for cultivating student agency: establishing safe and supportive environments; providing opportunities for student voice and choice; designing and leading empowering learning experiences; and creating a culture where everyone - including the teacher - gives and receives feedback for continuous growth. Learners will participate in a experiential cycle for each foundation area, including empathizing with the learner, active learning and experimentation, and reflecting and responding. By the end of the module, learners will have designed and implemented four prototypes, one for each foundational practice. In the culminating performance task, learners will document, synthesize, and reflect on learning across these four prototypes.

EDPD519 - Performance Assessment for Deeper Learning in a Competency-Based System

Description

This course module assumes that you already have a strong foundation in key concepts and skills related to performance assessment and formative assessment. We'll build on your understanding and skill to ensure that we're designing performance assessments and supporting instruction to capture deeper learning. Assessing students' ability to demonstrate key academic skills and content is important, but what about key workforce skills and dispositions such as collaboration, communication, creativity, and self-direction? In this module we'll make the case for developing integrative performance tasks that capture student learning of academic skills, academic content, and essential skills and dispositions. Then we'll provide tools and activities to help you design integrative assessments and supporting instruction and formative assessments.

Credits

3

Academic Level

Graduate

EDPD521 - Assessing in a Competency-Based Classroom (Performance Assessment Essentials)

Description

In this course module, we'll explore foundational concepts in assessment, including comprehensive and balanced assessment, validity, reliability, and the importance of multiple measures. We'll also focus on two foundational assessment practices: formative assessment and feedback. You will frequently reflect and work to grow your practice over the course of this module. Key learning evidence will involve demonstrating your improved formative assessment and feedback practices.

EDPD527 - Leadership for Learning in a Competency-Based System

Description

This course will focus on the knowledge, skills and abilities of leadership team dedicated to being leaders of learning in the district. Learners will study effective instructional practices, levels of rigor, learner empowerment, and student engagement practices in schools. We will explore aligning those CBE practices to the expectations of state standards at various grade levels. The focus of the course will be to apply knowledge, skills and abilities of the leaders of learning so that the outcome of their work is about building teachers capacity (growth) in a CBE system and promoting academic success for all students.

Graduate

Campus Programs

EDPD534 - The Development of a Mission, Vision and Goals in a Competency-Based System

Description

This course will focus on the knowledge, skills, abilities and dispositions a leadership team needs to focus on in order to facilitate the process of developing a district's school's vision, mission, and goals that focus on CBE. Learners will discuss how to meet personalized state expectations, state standards, the community and school expectations, and the needs of the students through an inclusive and collaborative process. Different processes for meeting the demands of the articulated vision, mission, and goals will be researched and discussed. All learners will have the opportunity to create a process to simulate how they would engage people in this process and insure that the CBE vision, mission, and goals are articulated in a way that the school can meet the challenge of increasing student achievement in a personalized way.

Credits

2

Academic Level

Graduate

EDPD605 - Leading the Collaborative School in a Competency-Based System

Description

This course requires the principal leadership team to gain the knowledge, skills, abilities and dispositions to facilitate a process in the building that is highly collaborative and inclusive of all staff members as they examine, build goals and implement a Competency-Based System. Building leadership capacity in teachers and staff is an imperative in a collaborative environment. Having everybody understand why we are doing things, what we will do, and how we will accomplish these goals through this process is important to the success of each initiative in a positive collaborative environment and positive culture. Learners will engage in deep conversation about the collaborative process and create opportunities to work collaboratively in real time situations.

Credits

2

Academic Level

Graduate

EDPD671 - Leading Creativity and Innovation in a Competency-Based System

Description

This course will support the development of the knowledge, skills, abilities and dispositions of all leaders to open up the culture to individuals and groups to work that is both creative and innovative. This would lead to ways that improve student academic success and their behaviors. The course will offer leaders an opportunity to develop their innovative skills as leaders in ways that foster improvement and how we approach CBS, learning and personalization in our schools.

Credits

3

Academic Level

Graduate

EDPD681 - Teacher Support, Monitoring, and Accountability in a Competency-Based System

Description

This course will guide building leaders through a process to create a teacher improvement model that is a formative process. This process builds on the leader's ability to work with teachers to create support for specific goals and monitor the implementation strategies for those goals. Next we will examine the continuous process necessary to move the goals forward and collect data on the process of change. Last we will examine the variety of accountability systems for leaders to use in their schools and how to ensure the system is working to improve instruction and therefore student achievement.

Campus Programs

EE220 - Electromagnetics

Description

This course covers both static and dynamic electric and magnetic fields, electromagnetic wave propagation, steady-state and transient analysis of transmission lines, and design applications. Antenna fundamentals and antenna types are also covered. Numerical methods and software are used to analyze problems.

Credits

3

Requisites

- Complete:
 - MAT325 - Calculus III: Multivariable Calculus (3)
 - PHY216 - Physics II (3)
 - PHY216L - Physics II Lab (1)

Academic Level

Undergraduate

EE301 - Digital Circuits

Description

After a review of digital principles and logic, modern digital integrated circuit and hybrid circuit families are studied. This includes: gates, multi-vibrators, counters, comparators, Digital-to-Analog and Analog-to-Digital converters, and digital computer interface circuits. Emphasis is placed on integrating software design and interface design to achieve interactive system design with an external environment.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CS219 - Computer Architecture I (3)
 - Complete or concurrently enroll in:
 - EE301L - Digital Circuits Lab (1)

EE304 - Electrical Machines and Power Systems

Description

This course is an introduction to electric machines and principles of electric power generation and distribution. The topics covered include: DC and AC voltage, current and power, fundamentals of DC and AC machines, transformers, synchronous generators and motors, single-phase motors, fundamentals of electric power systems, power transmission lines, system analysis and protection, power electronics and converters in power systems.

Credits

3

Requisites

- Complete:
 - EG316 - Electrical Circuits (3)
 - EE220 - Electromagnetics (3)

Academic Level

Undergraduate

EE304L - Electrical Machines and Power Systems Lab

Description

This is the lab for EE304- Electrical Machines and Power Systems.

Credits

1

Requisites

- Complete or concurrently enroll in:
 - EE304 - Electrical Machines and Power Systems (3)

Academic Level

Undergraduate

EE305 - Electrical Machines

Description

This course is an introduction to electric machines. The topics covered include: DC and AC voltage, current and power, Ferro-magnetic materials, magnetic circuits, calculation of force and torque caused by magnetic fields, transformers, fundamentals of AC machinery, synchronous generators, synchronous motors, induction motors, DC machinery fundamentals, DC motors and generators, single-phase motors, and special purpose motors.

Credits

3

Requisites

- Complete:
 - EE220 - Electromagnetics (3)
 - EG316 - Electrical Circuits (3)

Academic Level

Undergraduate

Campus Programs

EE306 - Electrical Power Systems

Description

This course is an introduction to electric power systems. The topics covered include: electric energy and power, sources of electric power, AC voltage, current and power, real and reactive power and voltages, transmission line parameters, poly-phase systems, electrical and magnetic circuits, power transformers, poly-phase lines and single-phase equivalents, electromagnetic forces and loss mechanisms, synchronous generators, system analysis and protection, load flow, power electronics and converters, induction generators, DC machines.

Credits

3

Requisites

- Complete:
 - EE305 - Electrical Machines (3)

Academic Level

Undergraduate

EE310 - Communication Systems

Description

This course provides an introduction to the analysis and design of analog and digital communications systems. Topics include signals, modulation technique, sampling, and frequency conversion. Additional topics include a review of probability theory, the transmission of information, spread spectrum systems, and error correcting codes.

Credits

3

Requisites

- Complete:
 - EG340 - Probability and Statistics for Engineers (3)
 - EE201 - Signals and Systems (3)

Academic Level

Undergraduate

EE318 - Electrical Circuits II

Description

This course provides an advanced continuum to Electrical Circuits I on the topics of electrical circuit theory. Materials to be covered include: sinusoidal steady-state analysis, AC steady-state power, three-phase circuits, frequency response, Laplace transform application in circuit analysis, use of Fourier series and Fourier transforms in circuits, filter circuits, a simulation software package is employed throughout this course to analyze various electric circuits.

Credits

3

Requisites

- Complete:
 - EG316 - Electrical Circuits (3)

Academic Level

Undergraduate

EE318L - Electrical Circuits II Lab

Description

This Lab course provides hands-on experiments with the circuits studied in electrical circuit theory courses. Lab experiments will cover laws of electric circuits including Ohm's law, Kirchhoff's laws, voltage and current division as well as some circuits such as amplifiers, oscillators, and filters.

Credits

1

Requisites

- Complete or concurrently enroll in:
 - EE318 - Electrical Circuits II (3)

Academic Level

Undergraduate

EE320 - Digital Signal Processing

Description

This course covers the theory and application of digital signal processing. Topics to be covered include discrete-time sequences and sampling; the discrete-time Fourier transform and the discrete Fourier transform; windowing, the short-time Fourier transform and spectrograms; convolution, digital down-conversion, quadrature signals and sample-rate conversion; analysis and design of FIR filters and Hilbert transformers; matched-filtering, block processing, frequency estimation, and digital signal processing applications to spectrum analysis.

Credits

3

Requisites

- Complete:
 - EE201 - Signals and Systems (3)

Academic Level

Undergraduate

EE330 - Analog Electronics

Description

This laboratory centered course examines the design, fabrication, and operation of key analog circuit elements including diodes, bipolar-junction transistors, and metal-oxide semiconductor field-effect transistors. Key analog building blocks, such as operational amplifiers, voltage regulators, and oscillators are presented. Students are required to employ analytic methods, simulation tools, and laboratory analysis to model and understand these circuit elements.

Credits

Engineering

EG110 - Engineering Design I

Description

This is the first course in a sequence of engineering design classes at SNHU. In this course you will be introduced to a process engineers use when solving problems and creating and/or improving designs. Students will gain appreciation of traits effective engineers share. This project based course gives students the ability to understand, contextualize, analyze, and communicate engineering designs and systems. By learning and applying creative design thinking and the scientific method, students will more effectively solve problems in any domain. This course develops students' skills to conceive, organize, lead, implement, and evaluate successful projects in any engineering discipline. Students will work individually and in groups and learn how to manage collaborative efforts effectively. Additionally, students learn how to give presentations, document, and present data, process, and reports. Engineering tools and skills such as engineering graphics, sketching techniques, designing experiments as well as introduction to discipline specific tools and machine shop will be applied. This freshmen course is open to all majors.

Credits

3

Requisites

- Permission of dean required for non-engineering students

Academic Level

Undergraduate

Campus Programs

EG112 - Engineering Design II

Description

This is the second course in the engineering design sequence and expands the capabilities introduced in EG110. Additional high-level software tools for use in interactive algorithm development, data visualization, simulation, and data analysis are introduced. Microsoft Project will be introduced as a project management tool for design projects. Team projects, presentations, and reports will continue as in EG110. Successful completion of the design project will require the team to integrate their mechanical design, manufacturing, project management, computer control system, programming, and presentation skills.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - EG110 - Engineering Design I (3)
 - MAT 210 is highly suggested.

Academic Level

Undergraduate

EG200 - Statics

Description

This course explores the definitions and concepts of forces and moments, and their applicability to the analysis of static, rigid mechanical systems. Specific topics include free body diagrams, resultants and equivalent force systems, static equilibrium, shear and bending diagrams, static analysis of trusses and frames, friction forces, and calculation of centroids and area moments of inertia.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - PHY215 - Physics I (3)
 - Complete or concurrently enroll in:
 - MAT275 - Calculus II: Integration & Series (3)

Academic Level

Undergraduate

EG201 - Fluid Mechanics

Description

This course provides an introduction to the concepts and applications of mechanics of fluid. The course begins by introducing the student to fluid properties. This is followed by a discussion of fluid statics, including pressure distribution and forces on submerged, curved and plane surfaces. The student will then learn how to derive and apply integral formulations of conservation of mass, momentum, and energy with emphasis on control-volume applications. Dimensional analysis is studied and applied. The latter part of the course focuses on pipe flows with consideration of head loss, use of the Moody diagram, and analysis of pipe networks. Finally, the concepts of drag and lift are introduced. Students will perform three laboratory experiments in this course.

Credits

3

Requisites

- Complete or concurrently enroll in:
 - EG200 - Statics (3)
 - EG209 - Thermodynamics I (3)

Academic Level

Undergraduate

Campus Programs

EG202 - Mechanics of Materials I

Description

This course enhances the students understanding of stress and strain, and their linear-elastic relationship through Hooke's Law. The stress induced in simple beams and columns, as subjected to axial, torsional, bending, and shear loading, is extensively covered. The concept of state of plane-stress, as a result of combined loadings (superposition), and transformation to principal components, is covered. Based on allowable stress, basic beam design is introduced. Methods to determine the deformation of beams and shafts are covered. The concepts are supported by software-based stress analysis and the application of computational software in structural design.

Credits

3

Requisites

- Complete 1 of the following
 - Complete:
 - MAT275 - Calculus II: Integration & Series (3)
 - EG200 - Statics (3)
 - Complete:
 - CM200 - Statics for Building Construction (3)

Academic Level

Undergraduate

EG203 - Dynamics

Description

This course develops the student's ability to solve non-equilibrium problems, extending mechanics beyond statics to the mechanics of motion. Vector analysis, trigonometry, and calculus are used to analyze advanced problems involving motion. The first component of the course covers particle motion (translational motion kinematics, kinetics via general equations of motion, energy methods, and conservation of momentum). Particle dynamics are explored by analyzing data from an actual flight in an instrumented airplane. The second component of the course covers rigid body motion (translational and rotational kinematics, kinematics via general equations of motion, energy methods, and conservation of momentum). A final course team project deals with the analysis of a complex dynamics problem.

Credits

3

Requisites

- Complete:
 - EG200 - Statics (3)
 - MAT275 - Calculus II: Integration & Series (3)

Academic Level

Undergraduate

Campus Programs

EG207 - Instrumentation & Measurements

Description

This course is an introduction to the fundamental concepts, principles, procedures, and computations regarding modern instrumentation and measurement systems. Students will gain a sound understanding of a language (LabVIEW®) used to describe modern instrumentation, measurement, and control systems and an appreciation of the various types of systems in common use in industry. Students will use this software to create virtual instruments. Particular emphasis will be given to electrical, mechanical, flow, and thermal measurement systems. The course will also cover statistical analysis to evaluate the quality of measurements, standard methods of characterizing measurement results, and methods for characterizing measurement system response. The students work in teams to conceive-design-implement-operate a project incorporating multiple sensors and data acquisition and analysis.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - EG110 - Engineering Design I (3)
 - Complete or concurrently enroll in:
 - PHY216 - Physics II (3)

Academic Level

Undergraduate

EG208 - Materials Science

Description

This course provides a broad survey of the fundamental concepts in materials science and engineering. It focuses on material microstructure and its impact on various bulk properties. The relationship between properties, structure, processing, and performance will be a repeating theme in this course. We will pay most attention to metals as about 80% of the elements form metallic bonds with an introduction to ceramics and polymers. The course includes introduction to the mechanical, thermal, and electrical, properties of materials. Through the course, we will discuss case studies that relate materials to applicable engineering design.

Credits

3

Requisites

- Complete:
 - CHM120 - General Chemistry I (3)
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - PHY215 - Physics I (3)

Academic Level

Undergraduate

Campus Programs

EG209 - Thermodynamics I

Description

This course provides the student with a working knowledge of thermodynamic concepts and the problem solving ability to set up and apply the appropriate laws in the thermodynamic analysis of engineering systems. Energy, heat, and work are defined and used in the First Law of Thermodynamics. Other thermodynamic properties and equations of state are introduced with emphasis on tabular and graphical forms for simple compressible systems and on the ideal gas. Phases and phase transitions are discussed and energy analysis of both open and closed systems is examined. The Second Law of Thermodynamics and the property entropy are introduced, and their macro and microscopic implications are discussed. Emphasis is placed on the consequences of irreversibility and the limitation this places on the behavior of engineering systems.

Credits

3

Requisites

- Complete:
 - MAT275 - Calculus II: Integration & Series (3)
 - PHY216 - Physics II (3)

Academic Level

Undergraduate

EG302 - Continuous and Discrete Systems

Description

This course is an introduction to systems and will cover the following topics: a brief review of CT and DT signals, continuous and discrete-time system theory, difference and differential equations of systems, system block diagrams, Fourier transforms and frequency response, system analysis with Bode diagrams, feedback and stability theory, Z-transforms and transfer functions, sampling theory, and introduction to digital filtering.

Credits

3

Requisites

- Complete:
 - MAT325 - Calculus III: Multivariable Calculus (3)
 - EG316 - Electrical Circuits (3)

Academic Level

Undergraduate

EG308 - Gas Dynamics

Description

This course provides students an opportunity to study the one-dimensional and quasi-one-dimensional compressible fluid flow with an emphasis on supersonic flow. The fundamental equations (continuity, momentum, and energy) that govern the characteristics of compressible flow are derived. The Mach number and various flow regimes are introduced. The phenomena and sources of normal shock waves, oblique shock waves, and Prandtl-Meyer expansion waves and their analysis techniques are presented. Other topics are: nozzles, diffusers, one-dimensional flow with heat addition (Rayleigh flow), one-dimensional flow with friction (Fanno flow), moving shock waves, shock tubes, and linearized supersonic theory.

Credits

3

Requisites

- Complete:
 - EG201 - Fluid Mechanics (3)
 - EG209 - Thermodynamics I (3)
 - MAT330 - Differential Equations (3)

Academic Level

Undergraduate

Campus Programs

EG310 - Junior Engineering Design

Description

In this continuation of the engineering design sequence for all engineering students, this course reinforces student knowledge of the design process to prepare students for Capstone Design. As part of a variety of instructor-approved design projects, students explore relevant mechanical, electrical, and aeronautical engineering topics. All stages of the design process are reinforced, including project proposals, project planning, preliminary and detailed design and relevant reviews, analysis, design iteration, fabrication, and testing. As in other design courses, teamwork, report writing, and presentation skills are emphasized.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - EG207 - Instrumentation & Measurements (3)
 - 60 credit(s).

Academic Level

Undergraduate

EG314 - Aerodynamics

Description

This course studies the fundamentals of incompressible fluid flow, compressible flow, subsonic and supersonic flow, inviscid flow, laminar and turbulent flow, and potential flow, followed by their theoretical applications on airfoil theory and finite wing theory, including Kutta-Joukowski law, linear thin airfoil theory, and Prandtl's lifting-line theory. The course also introduces fundamental aerodynamic concepts and phenomenon such as wing tip vortex, downwash, induced drag, induced angle, spanwise efficiency factors, friction drag, pressure drag, and aerodynamic center.

Credits

3

Requisites

- Complete:
 - EG201 - Fluid Mechanics (3)
 - EG209 - Thermodynamics I (3)
 - MAT330 - Differential Equations (3)

Academic Level

Undergraduate

Campus Programs

EG316 - Electrical Circuits

Description

This course provides an introduction to the essentials of electrical circuit theory. Topics to be covered include resistive circuits, nodal and mesh analysis using Kirchhoff's laws, superposition, Norton & Thévenin equivalences, capacitance & inductance, first and second order transient analysis, RC, RL, and RLC circuits, Laplace transform, and frequency response. A simulation software package is employed throughout this course to analyze various electric circuits.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - MAT330 - Differential Equations (3)
 - PHY216 - Physics II (3)
 - Complete or concurrently enroll in:
 - EG207 - Instrumentation & Measurements (3)

Academic Level

Undergraduate

EG318 - Thermodynamics II

Description

This course focuses on the application of the fundamental laws of thermodynamics (learned previously in thermodynamics I) to the analysis of energy conversion devices, systems, and processes, such as internal combustion engine, gas turbine, vapor power generation, and refrigeration. Factors that govern energy conversion processes and impact efficiency of those processes are studied in detail. In addition, gas mixture properties, air-conditioning psychrometrics, and fundamental compressible flow theory are also covered.

Credits

3

Requisites

- Complete:
 - EG209 - Thermodynamics I (3)

Academic Level

Undergraduate

EG325 - Mechanics of Materials II

Description

This course is a continuation of Materials Science and Mechanics of Materials I. It investigates material failure mechanisms such as yielding under combined loading, brittle fracture, and fatigue. Additional topics covered by the course include analysis of thick-walled pressure vessels, rotating disks, press fits, and contact stresses. In addition, failure theories, safety factors, and stress concentration are covered topics. Finally, the course includes an introduction to stress analysis utilizing commercial computational software and an associated fatigue-based structural design and analysis project.

Credits

3

Requisites

- Complete:
 - EG202 - Mechanics of Materials I (3)
 - EG208 - Materials Science (3)
 - MAT350 - Applied Linear Algebra (3)

Academic Level

Undergraduate

Campus Programs

EG326 - Aircraft Structures

Description

This course provides a description of aircraft materials, structural components and their functionalities. The maneuvering loads and flight envelope are introduced. The analysis of aircraft thin-walled structural components when subjected to torsion, bending, and shear loads is covered in detail. A design project utilizing commercial finite element software provides students with real-world experience.

Credits

3

Requisites

- Complete:
 - MAT325 - Calculus III: Multivariable Calculus (3)
 - MAT330 - Differential Equations (3)
 - EG202 - Mechanics of Materials I (3)

Academic Level

Undergraduate

EG330 - Propulsion

Description

This course provides a basic understanding of, and analysis tools for, various aerospace propulsion systems. Students apply the fundamentals of thermodynamics and fluid mechanics to complex propulsion systems. Subjects included are: analysis of various common aircraft propulsion systems with emphasis on jet engines (turbojet, turbofan, and turboprop) and their subsystems (including afterburners and exhaust nozzles). Reciprocating engines (including propeller momentum and blade element theories and propeller efficiency analysis) and rocket engines (both solid and liquid propellants) are covered.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - CHM120 - General Chemistry I (3)
 - 1 of the following:
 - EG308 - Gas Dynamics (3)
 - EG318 - Thermodynamics II (3)

Academic Level

Undergraduate

EG333 - Control Systems Analysis

Description

This course provides students an opportunity to model, analyze, and design control systems. It includes mathematical modeling of linear systems for time and frequency domain analysis, transfer function and state variable representations for analyzing control system's performance and stability; and closed-loop control design techniques by frequency response, and root-locus methods. It also involves computer programming and simulation exercises. This course gives a basic understanding and analysis tools of various control systems used in the aeronautical, mechanical, and electric and electronics industries.

Credits

3

Requisites

- Complete:
 - EG316 - Electrical Circuits (3)
 - MAT330 - Differential Equations (3)

Academic Level

Undergraduate

Campus Programs

EG335 - Fundamentals of Systems Engineering

Description

This course introduces students to the fundamental principles of systems engineering and their application to the development of complex systems as applied in industry. It describes how the systems engineering viewpoint differs from that of the engineering specialist and the essential role that systems engineering plays. Topics include definition of systems and systems engineering, systems engineering processes, Concepts of Operations (ConOps), system development programs, system and subsystem requirements development, system and subsystem verification and validation, interface definition, technical risk identification and mitigation, problem/issue identification and failure analysis, and systems engineering management. The course will include a series of individual and team exercises in which students apply the various systems engineering processes to one of the current Capstone design projects in work.

Credits

3

Requisites

- Concurrently enroll in:
 - EG310 - Junior Engineering Design (3)

Academic Level

Undergraduate

EG340 - Probability and Statistics for Engineers

Description

This course is an introduction to probability. The content includes: Introduction to random phenomena, random variable, and random processes. Random experiments, outcomes, events, probability axioms, conditional probability and Bayes rule, independent events, and Bernoulli trials. Function of a random variable, Mean, variance and moments. A function of two random variables. Two functions of two random variables. Joint moments of two random variables. Basics of statistics, graphical plots, numerical description, analysis of variance (ANOVA). Statistical quality control, quality control, control charts, and reliability engineering.

Credits

3

Requisites

- Complete:
 - MAT325 - Calculus III: Multivariable Calculus (3)

Academic Level

Undergraduate

EG341 - Design of Machine Components

Description

This course concerns the analysis, selection, and design of industrial components such as shafts, gears, bearings, springs, and fasteners used in mechanisms and machines. The fundamentals of machine design, including the design process, failure prevention under static and variable loading, and characteristics of the principal types of mechanical elements are covered. A practical approach to the subject through a wide range of real-world applications is presented; and the link between design and analysis is addressed.

Undergraduate

Campus Programs

EG345 - Characterization of Materials

Description

This course introduces commonly used approaches to study the microstructure, composition, and properties of materials. Both the physical principles and practical applications of these techniques are taught. Students will become familiar with property-driven and application-specific materials (for example, Silicon and Germanium, Graphene, metal alloys, glasses, and Alumina). Techniques cover the following areas: advanced testing of mechanical properties, composition and microstructure (XRD, grain size), spectroscopy (UV-VIS-IR), and microscopy (SEM-EDS, TEM). Labs, demonstrations, and video demonstrations of techniques will promote students familiarity beyond the theories. Relevant sample preparation techniques will also be covered and practiced. Modification and engineering of properties via mechanical processes, thermal processes, chemical processes, and additive manufacturing will be explored through a student-designed project.

Credits

3

Requisites

- Complete:
 - EG208 - Materials Science (3)

Academic Level

Undergraduate

EG350 - Advanced Dynamics of Mechanical Systems

Description

This course investigates the basic concepts in machine design based on topics such as linkage synthesis and kinematic-kinetic analysis of planar mechanisms. Spatial mechanisms are also covered. Students will apply these design techniques in projects and labs.

Credits

3

Requisites

- Complete:
 - EG203 - Dynamics (3)
 - MAT325 - Calculus III: Multivariable Calculus (3)
 - MAT330 - Differential Equations (3)

Academic Level

Campus Programs

EG360 - Fundamentals of Unmanned Aerial Systems

Description

This course provides engineering students an opportunity to be exposed to unmanned aerial systems. It covers the UAV classifications, definitions, standards and UAV-related aviation regulations. The course gives a basic understanding of working relationship between various subsystems employed in the unmanned aerial systems and industries. Topics includes a review of unmanned aerial vehicle (UAV), ground station, launch and recovery system, UAV operation, UAV applications, autopilot, electric system, mechanical system, transportation system, propulsion system, communication system, programming, software, sensors, measurement devices, safety issues, current/future challenges and future trends. The most important subsystem in a UAV compared with a manned aircraft is the autopilot, since there is no human in a RPV/UAV/UAS. Thus, the course emphasizes on the features of an autopilot. A few lab experiments will help students to experience the UAV flight operations. The course prepares students to be effective engineers in the highly dynamic and constantly evolving UAV industries. The UAS contemporary issues and features of current and modern UAS products are discussed.

Academic Level

Undergraduate

EG361 - Introduction to Autonomous Robots

Description

This is the first course to introduce students with latest robotic technology with a hands-on project that involves robotic conceptualization, designing and programming. This course first starts with basic linear algebra foundations, and then examines fundamental aspects of autonomous systems including motors, actuators, sensors, mobile robot, drive mechanisms, and programming. The course concludes with techniques for integrating mobile robots and robot manipulators into a complete system. A team-based final project requires students to integrate a mobile or robot manipulators to accomplish a specified task.

Credits

Requisites

- Complete:
 - MAT275 - Calculus II: Integration & Series (3)

Academic Level

Undergraduate

Campus Programs

EG390 - Experiment Design and Analysis

Description

In this course students learn how to design, evaluate, and implement experiments, and analyze the resulting data. The professional presentation and reporting of experimental results are addressed. Uncertainty analysis techniques are covered in detail. General uncertainty analysis is introduced as a means to evaluate a proposed experiment. Both the Taylor Series and Monte Carlo methods for estimating error propagation are covered. Hypothesis testing procedures for one-sample and two sample data comparisons are covered in detail. Factorial experiment design and analysis are also introduced. Students apply these theories in a final project.

Credits

3

Undergraduate

EG403 - Principles of Photonics

Description

Three of the most important discoveries in modern time that had dramatic impact on our lives, are lasers, optical fibers and solid-state detectors. These discoveries became the basis of numerous industrial applications that transformed the fields of medicine, communications and industrial manufacturing. They represent the basic elements of a complete optical system, namely the source, the transport media and the detection mechanism of light signals. These three elements form the foundation of the field of Photonics, a field similar to Electronics however, the first uses light not electrons to carry information. Hence, Engineers have a need to understand this important field and its wide-range applications. This course is intended to expose the students to the fields of Photonics theory and its communication applications.

EG409 - Composite Materials

Description

This is an introductory course on the theoretical and practical design, analysis, and fabrication of polymer matrix composites. The course starts with an overview of composite materials and related manufacturing methods. As a baseline, the behavior of uni-directional composites is addressed, including stiffness and strength prediction methods. The topic of short fiber composites is also covered with an emphasis on load transfer mechanics and property averaging. The analysis of orthotropic laminas includes stress-strain relations, prediction of engineering constants, and transformation matrices. Finally, Lamination Theory is covered as a means to design and analyze laminated composite structures with the introduction of failure theories. The course is supported by a significant laboratory component where the students fabricate and mechanically test various composite material systems for comparison of measured properties to theoretical predictions. A Design Project, involving both computer code implementation of Lamination Theory, design and analysis of a composite component, and fabrication and evaluation of the composite component, is the capstone of the course.

Credits

3

 - MAT350 - Applied Linear Algebra (3)

Academic Level

Undergraduate

EG410 - Heat Transfer

Description

This course provides theory and application of steady heat conduction in solids, involving contact resistance, thermal networks, and fin arrays. Transient heat conduction in solids, involving lumped system analysis, similarity solutions for semi-infinite domains, and general 1D transient solutions per Heisler Charts. Related topics include external, internal, and natural convection, with coverage of boundary layer theory and correlation equations, and thermal radiation with application to heat exchange between black and gray bodies. Select exercises are supported by Numerical Simulations to compare results and enhance conceptual understanding. Finally, the theoretical content is supported by a substantial Lab component which also involves Numerical Simulation exercises.

EG411 - Composite Processing

Description

In this course advanced composite fabrication processes are examined with the intent of understanding primary process control variable and their effect on composites fabrication. As general background, the primary manufacturing processes for polymer matrix composites are overviewed and classified. To develop a theoretical background, transport and conservation equations are introduced and supported with examples. viscosity and reaction kinetics of thermostats and thermoplastics are introduced with attention to measurement methods. The concept of permeability and Darcy's law are covered. Dimensional analysis is used as a means to generalize process models, and process models from simplified geometries are covered to form a foundation for more advanced process modeling. With this information, a few composites fabrication processes are studied in some details, and simple process models are developed. In manufacture, and testing of a basic composite processing system.

EG412 - Aircraft Design I

Description

In this course students learn aircraft design techniques and apply aeronautical science concepts to aircraft design. It brings together most of the aeronautical subjects studied so far and requires the students to demonstrate creativity in the application of these concepts. Design procedures, processes, steps and tools related to aircraft are introduced and applied to the three major phases of design: conceptual design, preliminary design, and detail design. The course includes an aircraft design project, with problem sets and lectures devoted to various aspects of the design and analysis of a complete air vehicle.

EG415 - Digital Communication Systems

Description

This course covers fundamentals of theory and design of digital communication systems. The topics include: components of a communication system and their functions, principles of information theory, digital signals and digital channels, digital modulation techniques, A-to-D conversions, and error control channel coding.

Credits

3

Requisites

- Complete:
 - EG340 - Probability and Statistics for Engineers (3)
 - EG302 - Continuous and Discrete Systems (3)

Academic Level

Undergraduate

EG418 - Flight Dynamics I (Performance)

Description

In this course, the equations of motion for steady state rectilinear flight are derived and applied to various flight conditions, such as pressure and temperature as functions of altitude and other atmospheric variables. Students learn to calculate all performance specifications of an aircraft such as maximum speed, maximum endurance, range, ceiling, take-off run, rate of climb, fastest turn, and tightest turn. Both propeller-driven and jet aircraft are covered. As part of this course, students plan and conduct three flight tests using a specially instrumented Cessna 172 aircraft; they evaluate the results of the flight tests and compare them with theoretical calculations.

Credits

3

Requisites

- Complete:
 - EG314 - Aerodynamics (3)

Academic Level

Undergraduate

EG418FT - Flight Testing - Performance

Description

In this lab, students conduct three engineering flight tests using the SNHU instrumented Cessna aircraft; they plan the test flights, fly aboard the airplane during the actual flights, analyze recorded data, and write a technical report for each test. The three flight tests explore aircraft performance in conjunction with theoretical parts of EG418.

Credits

Campus Programs

EG419 - Flight Dynamics II/Stability/Control

Description

This is a basic course in the stability and control of aircraft which are two pre-requisites of a safe flight. The six degree-of freedom differential equations of motion are introduced, after which the linearized perturbed state equations of motion are derived. Important topics in this course are: longitudinal static and dynamic stability, stick fixed and stick free neutral points and static margin, lateral-directional static and dynamic stability, trim conditions, longitudinal-lateral-directional coupling, control and maneuverability, stick fixed and stick free maneuver points, stability and control derivatives and handling qualities and control response. As part of this course, students will plan and conduct three flight tests using a specially instrumented Cessna 172 aircraft; they will evaluate the results of the flight tests and compare them with theoretical calculations.

Credits

3

Requisites

- Complete:

Undergraduate

EG420 - Design of Thermo-Fluid Systems

Description

This course provides theory and practical application examples on the design of thermo-fluid systems. Topics include measurement and of non-Newtonian viscosity, design and analysis of piping systems and networks, pumps and fan characterization and selection, boiling and condensation in heat exchange, and heat exchanger design. The course involves significant commercial software utilization, a lab component, and a paper-study project focusing on analysis of a thermo-fluid system design.

Credits

3

Requisites

- Complete:

 - MAT330 - Differential Equations (3)

Academic Level

Undergraduate

Campus Programs

EG424 - Industrial Robots

Description

In this course students will be introduced to the mathematical theory underlying multi-degree-of-freedom industrial robot systems including such topics as spatial descriptions and transformations, and manipulator kinematics including Denavit-Hartenberg notation. The course will also include an introduction to the topics of Industrial Automation and Machine Vision. The lab component of the course will take the students through a series of exercises that will introduce them to a 6-axis industrial robot (ABB IRB 140), the robot software systems, end-of-arm actuators, an industrial machine vision camera (COGNEX Insight 5400), and the camera-related software. A series of building-block exercises leading to the team-based final project will require the students to integrate the robot and camera systems to accomplish a specific task and will demonstrate the students' competence with these systems. Other robot types such as parallel axis robotic systems are introduced as well.

Credits

3

Requisites

- 1 of the following:
 - EG361 - Introduction to Autonomous Robots (3)
 - MAT350 - Applied Linear Algebra (3)

Academic Level

Undergraduate

EG426 - Mobile Robots

Description

This course examines key aspects of autonomous systems including mobile robot kinematics, drive mechanisms and control, perception, sensors, localization, map making, and path planning. A particular emphasis is given to the use of computer vision for robot navigation, including feature identification, camera calibration, and optical measurement. The course concludes with techniques for integrating vision, mobile robots, and robot manipulators into a complete system and a team-based final project that requires students to integrate a robot and a camera system to accomplish a specified task. The final project provides a multi-disciplinary team experience for students.

EG428 - Robotics: Project-Based Applications

Description

This project-based robotics course offers students an opportunity to integrate, research, or implement any robotics related project. The topics include: advanced gripper mechanisms, control algorithms, humanoid robots, warehouse robots, and mobile robots. An undergraduate research poster and presentation are required to achieve this course's educational goals. Other aspects of this course include multidisciplinary teaming skills, oral and written communication skills, and project management.

Additional Information

Matlab or Mathcad is required.

EG430 - Unmanned Aerial Vehicle Analysis and Design

Description

In this course, students learn Unmanned Aerial Vehicle (UAV) design techniques and apply aeronautical science concepts to UAV design. It brings together most of the aeronautical subjects studied so far and requires the students to demonstrate creativity in the application of these concepts. Topics include: definitions, UAV classifications, design groups, design requirements, mission planning, conceptual design, design procedures, ground system, power system, payloads, propulsion system, ground tests, structural design, automatic flight control systems, guidance systems, navigation systems, launch and recovery systems, manufacturing considerations, design challenges, flight tests, flight software, microcontroller, and design examples. The course includes an UAV design project, with problem sets and lectures devoted to various aspects of the design and analysis of a complete unmanned air vehicle. A major emphasis is on the automatic flight control system; and the autopilot.

EG431 - Advanced Materials

Description

This survey course will introduce students to technological advancements and innovations in materials engineering as well as to current trends in materials development. Structure, properties, processing, performance, and applications of electronic materials, biomaterials, nanomaterials, smart materials, and metamaterials will be introduced. Materials still in research and development such as “smart materials,” “moving materials,” “cloaking” materials, “energy-storage” materials, nature-inspired materials, auxetic and tensegrity structures will be discussed.

Credits

3

Requisites

- Complete:
 - EG208 - Materials Science (3)
 - EG345 - Characterization of Materials (3)

Academic Level

Undergraduate

EG432 - Materials Selection for Design

Description

This course explores the role that materials play in design. The students will deepen their understanding of the structure and properties of metals, polymers, and ceramics relative to design and applications. Reverse engineering will be used to emphasize reasoning for material selection. Students will analyze artifacts and evaluate material selection for a wide range of products. Once students develop this knowledge, a systemic, data-driven approach to material selection will be introduced. Relevant case-study practice via small group discussion and analysis, as well as a student-proposed design project will be featured.

- Complete:
 - EG208 - Materials Science (3)

Academic Level

Undergraduate

EG450 - Conceptual Design of Unmanned Aerial Systems

Description

In this course, students learn how to employ systems engineering techniques and apply engineering fundamentals/concepts to the mission-driven conceptual design of an unmanned aerial system (UAS). It brings together most of the engineering subjects studied so far and requires the students to demonstrate creativity in the application of these concepts using trade-off studies. The relationship between three major phases of design; conceptual design, preliminary design, and detail design with regards to UAS will be presented. This course provides engineering students an opportunity to evolve UAS design requirements, conduct safety assessment, and practice subsystem integration to develop an optimal configuration. Due to engineering characteristics of the aerial vehicle, a review of the aerodynamics, flight performance, flight stability and control, aero-structures is also provided. The course includes an UAS design project, with UAV mission sets and lectures devoted to various aspects of the conceptual design and analysis of subsystems (mainly aerial vehicle, ground station, and launch and recovery subsystem). During this project students form teams for various subsystems, and walk through design procedures, processes.

EG490 - Engineering Internship

Description

Students engage in the opportunity to experience and apply engineering practices in a professional setting, in the world of work, outside of the classroom. This work will relate to the experiences of academic course work and professional practice and to synthesize the two in a practical application of knowledge in an experiential setting. Secondly, internships offer the opportunity to develop crucial job searching skills, explore career interests, enhance your resume, make contacts in your chosen field and build references for future employment. Each intern will work in a career-related position during the academic term for which the student is enrolled for the internship. The credit varies from 0 to 3 to reflect the student's effort and time spent on the job with 0 credit indicating non-SNHU-supervised internship.

ENG070 - Academic Writing and Research Skills

Description

This course focuses on the academic writing skills required of an undergraduate student. It will explore and practice the process writing approach: invention (brainstorming, clustering/mapping, free writing, and outlining), drafting, peer review, revising, and editing. This course also emphasizes the concepts of organization, development, unity and coherence in writing paragraphs and essays. Essay writing will encompass the following discourse patterns: description, definition, division and classification, cause and effect, argumentation. Furthermore, the course will focus on justifying claims by teaching proper source integration and documentation. The academic skills of summarizing, paraphrasing, and quoting will ultimately lead to a scholarly and well documenting research paper.

Credits

3

Academic Level

Undergraduate

ENG071 - Critical Reading Skills

Description

This course focuses on preparing undergraduate international students for the rigors of academic reading at the college level. Emphasis will be placed on critical reading, vocabulary building, vocabulary pronunciation, note taking techniques and text organization and study skills. Authentic academic texts will be used to assist in the development of critical reading and thinking skills. Students will develop a variety of strategies for understanding the reading, locating main ideas, inferring the author's intent, drawing conclusions and distinguishing between facts and opinions. Students will also learn specific skills for note-taking, outlining, annotating and summarizing.

Credits

3

Academic Level

Undergraduate

ENG072 - Grammar Workshop

Description

This course focuses on the development of grammatical accuracy in writing. Students are taught how to distinguish global errors (sentence structure, tense consistency, and cohesive devices) from local errors (pronoun reference, subject-verb agreement, word forms) in their own writing and to categorize their errors to better understand their specific needs for further study. Students are introduced to other learning strategies as well, such as using available resources and peer collaboration to assist them in developing greater accuracy and fluency. In addition, students become familiar with common feedback symbols and abbreviations used by college instructors. This course is offered in conjunction with ENG 070 and ENG 071.

Undergraduate

Campus Programs

ENG073 - Effective Intercultural Communication

Description

Studying and living in a different culture is not without its challenges. Effective, intercultural communication strategies prepare students to live or work in other countries, gain respect for one another, and gain confidence in their English language speaking skills. Cultural differences often put international students at a disadvantage when studying and interacting with both domestic and international students. By recognizing that different groups of people solve common problems in different ways, students come to value their differences and learn new approaches. This course will help students understand how cultural attitudes are reflected in language use. Students will read case studies to employ strategies that involve critical thinking, problem-solving, and authentic use of the language. The course will include pronunciation practice to help international students communicate more smoothly as well as build upon writing skills taught in other ENG 070 courses that need developing. Students will engage in role-play and learn about group interaction among cultures.

Credits

Developmental

ENG099 - Fundamentals of Writing

Description

ENG 099 is a developmental course designed to help students acquire the composition skills they need to succeed in ENG-120. The course begins with a focus on critical reading skills. Students will be engaged in preparing essays that respond to written texts, thereby combining critical reading skills with writing strategies. In addition, ENG-099 provides introduction to/review of grammar, mechanics, and other college-writing conventions with a focus on application of those skills in student writing. One major objective of ENG 099 is to teach students to prepare essays that review and evaluate the ideas and issues found in the writing of others. Summary, analysis, and response skills will be taught and practiced culminating in the creation of a final portfolio where students demonstrate proficiency in critical reading and writing skills. Classroom instructors confirm placement in ENG 099 during the first two weeks of instruction. The three credits received for ENG 099 count towards a student's GPA, but they do not count towards the 120 credits required for graduation. Students who take this course will have to take an additional course to complete their degree. Classes are kept intentionally small, typically 15 students per section, to assure maximum benefit.

ENG099I - Fundamentals of Writing for International Students

Description

ENG-099I is a developmental course designed to help International students acquire the composition skills they need to succeed in ENG-120. The course begins with a focus on critical reading skills. Students will be engaged in preparing essays that respond to written texts, thereby combining critical reading skills with writing strategies. In addition, ENG-099I provides introduction to/review of grammar, mechanics, and other college writing conventions with a focus on application of those skills in student writing. One major objective of ENG-099I is to teach students to prepare essays that review and evaluate the ideas and issues found in the writing of others. Summary, analysis, and response skills will be taught and practiced culminating in the creation of a final portfolio where students demonstrate proficiency in critical reading and writing skills. Classroom instructors confirm placement in ENG-099I during the first two weeks of instruction. ENG-099I is required for all ILE students who have completed the 070 series and must be completed before students can enroll in ENG-120. The three credits received for ENG-099I count towards a student's GPA, but they do not count towards the 120 credits required for graduation. Students who take this course will have to take an additional course to complete their degree. Classes are kept intentionally small, typically 12 students per section, to assure maximum benefit.

ENG120 - College Composition I

Description

ENG 120 is a college-level writing course that introduces students to various forms of academic discourse. Students are required to prepare essays in a variety of rhetorical modes, including exposition, description and argumentation. In addition to out-of-class writing assignments, students will be required to compose in-class essays in response to readings and other prompts. ENG 120 introduces students to process-writing techniques, library research and MLA documentation procedures. The primary focus of ENG 120 is to help students acquire the writing skills they need to succeed in an academic environment. Enrollment is kept intentionally small, typically 15 students per section, to assure maximum benefit.

Credits

3

Academic Level

Undergraduate

ENG121 - College Composition II

Description

ENG 121 is the sequel to ENG 120. This course concentrates on argumentative writing and requires students to prepare a major research report, one that reveals fluency with argumentative strategies and rhetorical conventions. In addition, students are introduced to analytical reading techniques, critical research methods and current documentation procedures. Although other kinds of writing are commonly assigned in ENG 121, argumentation remains the major focus of study. Enrollment is kept intentionally small, typically 15 students per section, to assure maximum benefit.

ENG226 - Introduction to Creative Writing

Description

An introductory creative writing course designed to acquaint students with the craft of creative writing and the skills that will be required in subsequent creative writing workshops. Students will explore such craft issues as point of view, voice, characterization, dialogue, setting, conflict, rhythm, imagery, poetic structure, and dramatic scene development. Students will be expected to submit a number of writing exercises, including stories and poems. Student will also be expected to read and comment on their peers' writing with thoughtful and constructive criticism, as well as read and discuss published work.

Credits

3

Academic Level

Undergraduate

ENG229 - Writing for the Stage

Description

This course works with theatrical writing from the inside out, and focuses on a psychokinetic method of playwriting as process rather than production. Students do not write plays as such. They develop the narrative within by using a variety of approaches such as clustering the senses, engaging the plasticity of the page, and activating the surrealist exquisite corpse. The students will discover the need that drives their stories.

Additional Information

Offered every fall term.

ENG370 - Writing with Digital Media

Description

This project-based course introduces English majors and students interested in professional writing to foundational practices of writing for, composing with, and publishing across various digital media. Students will study how users interact with online and multimodal texts, and consider how various digital genres shape the rhetorical choices available to writers. They will work independently and in teams to create multimodal writing projects with special attention given to how audience, context, and purpose are impacted by their choice of media. The course exposes students to skills applicable to a range of careers and creative activities, and each student will finish the course with a small portfolio of work in digital media.

ENG431 - Advanced Creative Writing

Description

This course is designed to support a sequence of writing workshops in the creative writing and English major, to provide students serious about their writing an opportunity to study a particular genre (fiction, poetry, scriptwriting or nonfiction) beyond the 300-level workshops. The course also prepares the student for his or her senior thesis in creative writing. In addition to extensive reading within the chosen genre, workshops require participation in class discussions, student presentations and analyses of other students' work. Select class periods will be devoted to individual tutorials with the instructor.

English As a Foreign Language

EFL501 - Language Learning and Acquisition

Description

This course explores contemporary knowledge about foreign language acquisition, including the influences of age, environment and motivation; learning styles, including ELSIE, Barsch Learning Style Inventory and other cognitive and behavioral scales; multiple intelligences; and learner language and inter-language.

Credits

3

Academic Level

Graduate

EFL502 - Evaluation and Assessment

Description

The first part of this course is an introduction to proficiency, achievement, diagnostic and placement testing. The use of student portfolios in the EFL classroom and self-evaluation and observation techniques, including checklists and anecdotal reports, also are covered.

Credits

3

Academic Level

Graduate

Campus Programs

EFL503 - Descriptive Linguistics of American English

Description

This course covers the American English sound system and American English grammar. Students learn the basics of AE phonetics and phonology; including vowels, consonants, diphthongs, pitch and stress; place and manner of articulation; and the International Phonetic Alphabet (IPA). They also learn the basics of AE morphology and syntax, including the parts of speech, words and their constituents, inflection, sentence types, sentence diagramming, surface and deep structure and transformational process.

Credits

3

Academic Level

Graduate

EFL504 - Introduction to Curriculum Development, Design and Implementation

Description

Topics include curriculum, syllabus and lesson planning with emphasis on observable performance objectives; lesson stages and principles of effective EFL lesson construction; effective procedures for choosing, editing and managing EFL lesson content; long-term lesson planning; teacher roles in the classroom; and principles and techniques for teaching mixed-proficiency level classes.

Credits

3

Academic Level

Graduate

EFL505 - Overview of Teaching English to Speakers of Other Languages Methodology

Description

This course emphasizes communicative language teaching. Specific methods and approaches to be explained include grammar translation, audio-lingual method, total physical responses, natural approach, language experience approach, literature-based approach, phonics, whole language, community language learning, Suggestopedia, Silent Way, cognitive academic language learning, content- and theme-based instruction and computer-assisted language learning.

Graduate

EFL530 - Methods of Teaching English through Drama

Description

This innovative new course provides an overview of the use of drama in English education, especially second language acquisition, and provides training in the use of applied drama techniques, process drama, and readers' theatre for language teaching. Students will gain an understanding of appropriate means of integrating drama activities with the goals of language acquisition including use of games, improvisation, work with structuring drama, play-writing, and development, dramatic reading, and training in voice and diction. Students will learn how to integrate educational theatre approaches with curriculum and make them relevant to all ages and levels of language learners.

Credits

3

Academic Level

Graduate

EFL531 - Pronunciation Techniques

Description

This course begins with a review of the International Phonetic Alphabet (the IPA) and the American English sound system and proceeds to a diagnosis of individual student pronunciation problems. Explanations and descriptions of techniques to improve pronunciation and activities to teach proper formation of consonants, vowels, and diphthongs will be given. Practice with connected speech, word/sentence stress, and intonation patterns will be emphasized through drama related activities. Also included are issues of first language interference and the design and implementation of lessons and curricula.

EFL537 - Computer-Assisted Language Learning

Description

This course provides a hands-on, collaborative environment in which to learn about and explore the use of computer technology for language learning. As much as possible, participants are encouraged to use various technologies examined in class to develop learning materials relevant to their current or future teaching contexts. Participants are also encouraged to use these technologies to collaborate with and engage other EFL/ESL professionals in learning about the theory, pedagogy, and application of CALL.

English As a Second Language

Campus Programs

ESL100 - English as a Second Language

Description

This is an intensive ESL program designed to improve one's English language proficiency in order to pursue a degree program at SNHU or other purposes. Students are placed according to five levels of proficiency, from beginning to advanced (TOEFL range to 173+ on the CBT). Classes meet 20 hours per week and focus on listening, speaking, reading, writing, grammar, and cultural communication skills.

ESL106A - Basic Core Literacy A

Description

This course is a basic level (CEFR A2 to A2+) reading and writing course for English learners. The learning outcomes for reading focus on the comprehension of simple texts with an emphasis on active reading skills such as scanning, skimming, identifying main ideas and details, and building vocabulary through context. The learning outcomes for writing target basic sentence structure and word order, culminating in the development of compound and complex sentences and the composition of well-organized paragraphs. The course meets six (6) clock hours per week.

Credits

ESL107A - Basic Core Fluency A

Description

This course is a basic level (CEFR A2 to A2+) listening and speaking course for English learners. The learning outcomes for listening focus on the comprehension of simple stretches of general spoken discourse with an emphasis on active listening skills such as identifying the topic, main ideas, and details; following the sequence of events; and predicting the meaning of unknown words in familiar contexts. The learning outcomes for speaking target question structure and intonation; production of English consonant and vowel sounds; and communicating in routine conversations and discussions – all of which culminate in the production of informal presentations on general topics. The course meets three (3) clock hours per week.

ENV100 - Introduction to Sustainability

Description

How sustainable are modern human lifestyles? What would the world be like if they were more sustainable? How could we create such a world through the choices that we make as citizens, professionals, and consumers? Students leave traditional academic disciplines behind as they seek answers to these questions in this more than merely interdisciplinary course. By learning how to diagnose and to prescribe effective responses to sustainability challenges large and small using systems thinking, backcasting, and other holistic strategies, students also learn how they can contribute to the emergence of societies that facilitate, enhance, and sustain indefinitely the well-being of human individuals, their communities, and their environments.

Credits

ENV101 - Environmental Science

Description

This course provides an introduction to the scientific aspects of the environmental field. The first part of the course introduces students to the foundations of environmental science, while the second part concentrates on the application of these foundations to real life environmental problems. Therefore, the course not only engages the fundamentals of environmental science but also shows students how science informs sustainability, environmental policies, economics and personal choice.

Credits

Academic Level

Undergraduate

Campus Programs

ENV111 - Environmental Science Compass

Description

This 1-credit course familiarizes students with the structure and personnel of the Environmental Science degree program, and the resources in place for their support and success. Course sessions focus on introducing students to science faculty members and their areas of expertise, to lab spaces on campus and the equipment available to them, and to additional resources such as the Shapiro Library's science databases. Students will also be introduced to professional experiences through Career Services and guest talks from local Environmental Science professionals from a variety of organizations.

ENV250 - Environmental Science Research Methods

Description

This course provides students with an understanding of how to evaluate, conduct, write and design research. Required for environmental science majors, it introduces the why, when and how quantitative and qualitative methods are used as investigative tools. The course follows the scientific method and focuses on how to search the literature, write a literature review, formulate research questions/hypotheses, and design experiments to test these hypotheses. We will also explore qualitative methods and discuss their use in the field with special attention to conducting interviews, case studies, and focus groups. Students will prepare a research proposal on a topic of interest. Formulation of this project begins early, forms the basis for a final project, and is presented in a mock scientific conference.

Additional Information

Offered every spring term.

Credits

3

Academic Level

Undergraduate

ENV280 - Hydrology and Watershed Management

Description

Lectures, discussions, and field trips on measurements and processes affecting water quality and quantity within watersheds. Introduction to hydrologic principles, geomorphology, and water quality assessment. The course also discusses best management practices for the development of a watershed management plan. This course will cover the requirement for obtaining EPA'' Watershed Academy certificate, and students will receive the certificate at the end of the semester.

ENV305 - Global Climate Change

Description

This interdisciplinary course brings students up to date on what is known and not known about the causes and consequences of global climate change, and about viable response options. Topics include analysis of climate drivers such as greenhouse gas emissions, and land-use changes, and investigation of some climate system responses such as increased storm intensity and increased surface temperature. Students also explore some of the societal and economic impacts of global climate change. By reference to the most recent report of the Intergovernmental Panel on Climate Change, paleoclimate studies, and other authoritative sources, students learn how to separate fact from fiction in the often publicized debate about the dynamics of global climate change and about how we should respond to it.

ENV322 - Environment and Development

Description

How can businesses, governments, and civil society organizations work together to build environmentally sustainable economies and livable local communities in an increasingly crowded and globalized world? Students in this interdisciplinary course use insights drawn from the social sciences to identify assumptions about human nature and nurture that lead to environmentally unsustainable economic and development practices, then apply those insights to the practical problems of building robust national economies and healthy local communities worldwide, with an emphasis on less developed countries. Students spend part of the course playing and critiquing their own performance in Stratagem, a computer-assisted simulation game, in which they assume the roles of government ministers in a less developed country and try to chart a course of environmentally sustainable development for that country over more than half a century.

Additional Information

Offered in the spring term of every odd year.

ENV348 - U.S. Environmental Law and Politics

Description

How can businesses, governments, and public interest groups achieve environmental sustainability goals in legal and political contexts that were designed with other goals in mind? This interdisciplinary course explores the options in the United States, and provides a comprehensive point of comparison for topics explored in ENV 349. Students spend about half of the course learning how to spot facts that give rise to compliance issues for businesses and other private parties under a full spectrum of federal environmental laws, and to identify opportunities for achieving broader sustainability goals within the constraints imposed by the law. In the other half, students learn both how to predict environmental law and policy outcomes and how to shape them adaptively in pursuit of sustainability goals in a fragmented system of governance that was designed to privilege special interests and to favor the status quo.

ENV349 - Comparative Environmental Law and Sustainable Development

Description

How effective is environmental law as a strategy for achieving sustainable development? How does its diversity across countries and cultures constrain the ability of businesses, governments, and civil society organizations to achieve environmental sustainability goals in an increasingly globalized world? This interdisciplinary course examines the many legal, political, cultural, and other factors that shape the answer to these questions, using China, India, Russia, the European Union, and the United States as illustrative examples. Students explore the implications of these factors not only for businesses, governments, and civil society organizations pursuing sustainability goals within their own countries, but also for their counterparts in other countries to whom the former are linked through bilateral trade relationships and global supply chains.

ENV361 - Environmental Impact and Site Assessment

Description

This broadly interdisciplinary course introduces students to the principles, practices, and procedures followed by environmental professionals in assessing sites for the presence of environmental hazards that could trigger cleanup requirements under federal or state environmental laws, and in assessing the environmental impacts of proposed development projects under the National Environmental Policy Act and similar state laws, using insights drawn from the natural sciences, the social sciences, and other fields. Students spend most of the course undertaking a virtual Phase I site assessment at a hypothetical former industrial site and its environs using Brownfield Action, a web-based simulation developed by experts to teach students the skills needed to prepare a professional-level environmental site assessment, and preparing a draft environmental impact statement for the hypothetical redevelopment project proposed for the site.

ENV372 - Sustainability Strategies for Business

Description

How can businesses contribute to the environmental sustainability of human societies without sacrificing the bottom line? This broadly interdisciplinary, systems-based course draws insights from the natural sciences, social sciences, and other fields to explore a full range of strategic options relevant to businesses large and small in nearly every economic sector. Students spend nearly half of the course in a group-based simulation in which they assume the roles of the principals of consulting firms competing with rival firms to design a sustainability-focused strategic facility siting and environmental management plan for adoption by their client's board of directors using a version of The Triple Bottom Line Tool, a web-based platform designed by sustainability experts to help investors, decision-makers, and economic development professionals to enhance and to communicate investment performance across a broad array of environmental and other investment impacts.

ENV373 - LEED Green Associate Credential

Description

This course is the vehicle through which students receive ENV course credit for successfully completing the U.S. Green Building Council's ("USGBC") Leadership in Energy & Environmental Design ("LEED") Green Associate exam preparation program, which provides students with an up-to-date understanding of the most current green building principles and practices. Students demonstrate successful completion of the program by earning a passing score on the USGBC's Green Associate professional credential exam. For more information, see the USGBC's credentials and Green Associate professional credential exam preparation web pages (<http://www.usgbc.org/leed/credentials> & <http://www.usgbc.org/articles/prepare-your-leed-green-associate-exam>, as well as SNHU's sustainability certificate program coordinator.

Additional Information

Course by arrangement only. Offered on a pass/fail basis only.

Credits

1

Requisites

- Complete all of the following
 - Complete:
 - ENV372 - Sustainability Strategies for Business (3)
 - Permission of the supervising faculty member designated by the sustainability certificate program coordinator.

ENV374 - OSHA General Industry Outreach Training

Description

This course is the vehicle through which students receive ENV course credit for completing the U.S. Occupational Safety and Health Administration's ("OSHA") Outreach Training Program for General Industry, which prepares students to recognize, avoid, abate, and prevent safety and health hazards in general industry workplaces. Students may enroll in either the 10-hour course (1 credit) or the 30-hour course (3 credits). Students demonstrate successful completion of either course through receipt of a student course completion card or training certificate. For more information, see OSHA's General Industry Outreach Training web page (<https://www.osha.gov/dte/outreach/generalindustry/index.html>) and Outreach Training Program General Industry Procedures (https://www.osha.gov/dte/outreach/generalindustry/generalindustry_procedures.pdf), as well as SNHU's sustainability certificate program coordinator.

Additional Information

Course by arrangement only. Offered on a pass/fail basis only.

Credits

1 - 3

Requisites

- Complete all of the following
 - 1 of the following:
 - ENV348 - U.S. Environmental Law and Politics (3)
 - POL348 - U.S. Environmental Law and Politics (3)
 - Permission of SNHU's environmental management and sustainability program coordinator.

ENV410A - Semester in Washington, D.C.: Environmental Policy Field Experience

Description

This course is the vehicle through which students receive ENV course credit for participation in all but the seminar component of SNHU's Semester in Washington, D.C. The program promotes experiential learning through civic engagement and other activities. The Washington Center for Internships and Academic Seminars, which hosts the program, provides students with housing and places them in internships appropriate to their interests. Space in the program is limited, so students must notify the SNHU environmental management program coordinator of their intention to enroll a year in advance of SNHU course registration for the relevant semester. For more information about the program, see the Washington Center's web site (www.twc.edu) and the SNHU environmental management program coordinator. This course is taken concurrently with ENV 410B.

Additional Information

Course by arrangement only.

Esport

ESPT150 - Introduction to Esport

Description

This introductory course explores the management principles related to the business of esports. The purpose of this course is to provide a historical background on esports from its inception in the early 1980's to its current state as a multi-billion dollar industry. It includes personnel, programs, marketing, media, financial management, organizational structures and an overview of career possibilities in this growing field. Students will develop a media release/player profile, create and reflect on streaming content through Twitch, and simulate activities associated with being an esports manager.

Credits

3

Academic Level

Undergraduate

ESPT205 - Esport Streaming and Marketing

Description

The purpose of this course is to provide students an overview of the broadcast history and options as it pertains to esports. In addition it will cover esports marketing techniques, including and not limited to social media, live streaming, and corporate sponsorship.

Credits

3

Academic Level

Undergraduate

ESPT315 - Social, Ethical, and Legal Issues in Esports

Description

This course examines the major issues and controversies surrounding the esports industry. Students will develop an understanding of the interrelations between ethics and morality, society, and esports. Students will also learn about the law as it applies to esports organizations, live streaming, and contracts.

Credits

3

Requisites

- 30 credit(s).

Undergraduate

Fashion Merchandising

FMK290 - Fashion Merchandising Internship

Description

Students enrolled in this program will complete a minimum of 150 hours internship in the fashion field. The internship must pertain to the way apparel products and apparel accessories are marketed and distributed. It has to be approved by the career development center and the fashion program coordinator. It is strongly suggested that students complete the internship in the summer between their first and second year at Southern New Hampshire University.

Fashion Merchandising Management

FMM101 - Basic Design and Color Theory

Description

This course examines the basic principles of design, including balance, emphasis, proportion and rhythm. The art elements of line, space, texture and color are studied with special emphasis on how they relate to advertising layout and design and visual merchandising. This course is cross-listed with GRA-101.

Additional Information

Offered as needed.

Credits

3

Academic Level

Undergraduate

Campus Programs

FMM111 - Foundational Integration Experience

Description

The fashion merchandising foundational integration experiences give students the opportunity to apply the knowledge acquired in the core areas of fashion management. They will explore macro and micro environmental factors that affect companies in the industry. They will conduct an industry overview to understand the challenges and opportunities facing this industry by visiting and collecting data from companies operating in the industry in the U.S. and Canada. The trips will include a lab fee of approximately 300 dollars per student for hotel and transportation (lab fee-current market estimate). 1. Develop industry overview: Challenges and opportunities on the domestic and international apparel markets 2. Identify local/regional fashion/accessories retailer to investigate: Conduct their situation analysis 3. Initiate a contact with the retailer: Patronize the retailer's store (Collect data to inform the situation analysis). Lab fee applies-estimate: 300 dollars per student 4. Present findings (alternatives/recommendations) to client to address challenges and maximize opportunities 5. Research the business and personal responsibilities of buyers 6. Attend a regional retail conference on retail industry issues: Asset protection and loss prevention annual conference in DCU center in Worcester, MA

Credits

3

Academic Level

Undergraduate

FMM114 - Introduction to Fashion Merchandising

Description

Fashion principles and procedures used in planning, selecting, pricing and selling fashion goods in retail stores, catalogs and on the Internet are studied. Merchandising systems, assortment plans and inventory control methods are analyzed.

Additional Information

A field trip to New York City's market district is a possibility.

Credits

3

Academic Level

Undergraduate

FMM204 - Textiles and Color Theory

Description

Textile information pertinent to merchandising is included in this course. Analysis of fibers, yarns and weaves, fabric recognition, and a detailed study of natural and man-made materials are emphasized.

Additional Information

Offered every spring term.

Credits

3

Academic Level

Undergraduate

Campus Programs

FMM208 - History of Fashion and Costume

Description

Fashion is another term for the costume of a time and place, an expression of a period with all of its passions, politics, attitudes and history. This course considers textiles, silhouettes, shapes, and design adaptations in light of the technological capacities of the time, the geographic environment, social structure, political systems and economic conditions around the globe and over time. Students will gain an understanding of appreciation of how these underpin and influence contemporary fashion design and development.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

FMM209 - Sourcing, Supply Systems and Distributions

Description

The overall objective of this course is to expose students to sourcing and distribution in the global fashion industry. The specific objectives are twofold: first, the course exposes students to the Production and distribution side of apparel and accessories in the global fashion market. Second, students compare and contrast these processes between the host country (Italy) and U.S. To achieve and maintain a good profit margin fashion marketers, product developers and designers analyze cultural indicators and conduct fashion and consumer scans. The sources and nature of textiles used by designers, time to market and distribution channels play an important role in fashion retailers' profitability. Students will explore the influence of these factors on business decisions in the host country (Italy) and U.S industries.

Additional Information

Offered every spring term.

Credits

3

Academic Level

Undergraduate

FMM300 - Retail Buying

Description

This course seeks to instill in students a complete understanding of the influence of merchandise planning and purchasing on retail profit. Effective merchandise management involves efficient decision making. Ordering, keeping and managing the right merchandise in terms of size and quantity are the key to a retailer's success. Students explore various strategic techniques that influence profit including vendors-fashion retailers' negotiations over merchandise. Students analyze profit and loss statement and demonstrate a complete understanding of the factors that influence the retailer's financial performance.

Credits

3

Academic Level

Undergraduate

Campus Programs

FMM325 - Sustainability in Fashion

Description

The overall objective of this course is to explore the role that sustainability plays in fashion merchandising managers' decision to buy from vendors. It explores production and commercialization decisions with respect to buying green. It exposes students to the influence of social responsibility on fashion retailers' decisions.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

FMM333 - Exploration Integration Experience

Description

The fashion merchandising exploration integrated experiences expose students to apparel and accessories stores management. Students will work directly with local or regional apparel/accessories vendors and retailers to organize fashion merchandise exhibition in the marketing studies center on the SNHU Manchester campus. Displayed merchandise would include women and men apparel and accessories products. Their target market consists of SNHU students, staff, faculty and people from the community. Students will develop the following skills through these experiences: Merchandise and event planning, vendor relation, event and store promotion, merchandise display, store management and customer relations. To display merchandise that meet consumer expectation, students will conduct qualitative and quantitative research. 1. Qualitative research (Primary data collection): Observation and Focus group 2. Qualitative research (Secondary data): Literature review In the second semester of the exploration integrated experience students will experience a mandatory semester long study abroad at Florence University of the Arts (FUA, Florence Italy). The FUA experience will consist of being members of students teams that manage an on campus apparel boutique created and managed by the Fashion program at FUA.

Additional Information

Offered every fall term.

Credits

3 - 6

Academic Level

Undergraduate

FMM410 - Fashion Research and Forecasting

Description

This course applies the qualitative and quantitative investigations approaches to fashion and fashion accessories. Students will analyze descriptive and inferential statistics to understand consumer taste for current and future trends in fashion.

Additional Information

Offered every fall term.

Credits

3

Requisites

- Complete:
 - MAT240 - Applied Statistics (3)

Fine Arts

Campus Programs

FAS101 - Learning to Look

Description

In this course students will develop foundational visual literacy skills: describing, analyzing, and writing about visual works, reading primary and secondary source material, creative and critical thinking, and oral communication.

Credits

3

Academic Level

Undergraduate

FAS110 - Introductory Drawing

Description

In this course, students are introduced to the fundamentals of drawing from observation and imagination in a variety of media. A series of in-class drawing exercises will introduce the basic visual elements and their application to pictorial composition. Still life, figurative, and abstract drawing projects will afford students multi-faceted experiences in the creation of composition.

Additional Information

Class meets 60 hours per term.

Credits

3

Academic Level

Undergraduate

FAS210 - Introduction to Acting

Description

Students in this class will explore movement, voice, text and theatrical compositions that encourage, nurture and develop the authentic creative expression of the actor. Student work will culminate in a performance project that utilizes collaborative and generative ensemble work within the context of the evolving actor.

Additional Information

Course offered every fall term.

Credits

3

Undergraduate

FAS225 - Introduction to Photography

Description

The course reviews the various kinds of still cameras and the ways in which students can employ the use of light, visual impact and optical effects. Students are encouraged to take photographs during the term and to apply the knowledge to practical situations.

Credits

3

Academic Level

Undergraduate

Campus Programs

FAS226 - Digital Photography

Description

Photography as a visual medium is integral to the study of contemporary communication. This course introduces students to the history and practice of producing photographic images. The course is a combination of lecture and the hands-on practice of both the analog and digital methods of photographic image-making. The traditional darkroom is dispensed with, giving over to the computer the role of dark-room, with the student using Adobe Photoshop and other image editors to process traditional film and digital image captures. The student is taught to use various digital cameras techniques to capture, process, and print a portfolio of several original photographic images. Lectures on pictorial composition, subject matter choice, and methods of presentation display will accompany hands-on technical exercises.

Credits

3

Academic Level

Undergraduate

FAS260 - History of Architecture

Description

The aim of this course is to stimulate the appreciation of architecture in students who have had little or no exposure to the subject. The course is organized by historical periods, from ancient Egypt through the end of the 20th century. It considers architectural aims, materials, methods, structural principles, major works and styles. It makes connections between individual buildings and the cultural contexts from which they were derived. Field trips are required.

Additional Information

Course offered every fall term.

FAS302 - Gender and Film

Description

This course will undertake a comprehensive and chronological history of gendered representations on the screen. We will begin in the turn-of-the twentieth century silent era with "damsels in distress," and we will conclude with twenty-first century films that address the continuing and global struggle for gender equality. In between we will cover such subjects as: "The New Woman" of the 1920s; pioneering films exploring lesbian, gay, and transgender issues which date back to the 1930s; femme fatales in film noir; and male filmic stereotypes such as the cowboy. This will be achieved through screenings, readings, lectures, active discussions, and presentations.

Additional Information

Course offered in the spring term of every even year.

FAS305 - Digital Documentary Photography

Description

This course provides an opportunity for students to explore the art of storytelling through visual means. Utilizing either digital photography or film, students will be expected to produce a body of work that focuses on a particular subject (individual, place, organization) or larger issue. This class will not be assignment driven. Instead, each student will work on one long-term project. To prepare for that, students will begin the term by focusing on a small story that can be captured in about two weeks. The main goal of the term will be the completion of a single project that will be worked on weekly during the course and presented in final form at the end of the term. Each week students will be expected to bring in photographs that will be the building blocks to the story they have chosen to tell. Participating students must be self-starters, interested in documentary photography and curious about how to use photography as a means of expression and persuasion. Projects will need to be approved by the instructor, though there will be a great deal of space for students to tailor their projects to their own interests and creative needs. The class is a hands-on course and success will be measured by students' ability to choose a subject, capture it visually, show material regularly in class and present the project in a final form that reflects the subject explored. Each week we will discuss each student's progress, we will discuss particular images and the overall stories being told. Students will be asked to keep a written diary as well to help track the work they do as they seek out and execute their story ideas.

FAS310 - Illustration

Description

This course builds upon skills and concepts learned in FAS-110 (Introductory Drawing) with the focus shifting to applications of drawing in projects related to the discipline of graphic design. Drawing skills will be applied to such practical applications as storyboarding, text illustration and display, packaging design, web design, video animation and multimedia.

FAS327 - Advanced Digital Photography

Description

As the practice of digital photography leverages new technical skills through software programs and digital editing, it is critically important that practicing photographers gain a greater understanding of emerging methods for producing, editing, and distributing photographic works. This course provides an intermediate experience in the process of generating portfolios of digital images for presentation, distribution, or exhibition. Key to this experience is a broad understanding of design concepts that lead to decisions in coloring, resolution, formatting, and so on to produce high quality images that reflect a creative point of view. Students are exposed to advanced techniques using industry standard software to manipulate digital works for print and digital output, including color theory, management, calibration, and standard file formatting.

FAS335 - Romanticism to Impressionism

Description

This course examines European painting of the 19th-century, one of the most abundantly creative periods in all of art history. From grand historical paintings of Napoleon, to intimate Romantic visions, to remarkably fresh, dewy landscapes, to sublime views of industry and urban development, the art of this period rises to the height of both aesthetic achievement and cultural relevance. In addition, to presenting famous artists and works, the course draws forth central themes of the time, including the rise of individualism, industrialization, urbanization, the growing power of the market place, and the flourishing of middle class culture.

Additional Information

Offered every spring term.

FAS370 - American Art

Description

This course will introduce students to the unique artistic tradition of the United States from the Colonial era to the present. In addition to studying masterworks from these periods, students will engage with issues such as the construction of an American identity, the role of the fine arts in American society, and the tensions of class, gender, race, and ethnicity in American art. As such the course functions as a vibrant retelling of American history as revealed through its visual production.

Additional Information

Course offered once every two years.

FAS380 - Women, Art and Society

Description

This course explores the nature of gendered representation in the history of art from the Renaissance to the present. While the primary focus will be on the representation of women and the work of women artists, the construction of masculinity in the arts will also be addressed. Art will be examined in relation to its political, social, economic, and religious context to establish the broader implications of these visual documents. The student will gain a broadly inclusive understanding of the Western artist tradition as well as sensitivity to gender issues and the gendered nature of representation.

Additional Information

Course offered in the fall of every even year.

FAS390 - Non-Western Art

Description

This course is an introduction to aspects of non-European art created by cultures selected from the following geographic areas: Africa, the Americas (indigenous cultures), Oceania, Southwest Asia (the Middle East), South Asia, Southeast Asia, and East Asia. Although the specific artistic content, geographical coverage and/or thematic structure of the course may vary from semester to semester, after its completion students should be able to identify and analyze selected works of non-Western art with regard to aesthetics, media, means and content, using appropriate vocabulary and demonstrating links to such cultural contexts as history, social structure, philosophy and religion.

MFA510 - MFA Workshop: Fiction Writing I

Description

Fiction Writing I is a course designed to help the student entering the MFA program in fiction grasp the central principles of writing fiction. Students will submit to the instructor every five weeks 10-25 pages of manuscript, double-spaced, 12 point font, with pagination. In addition, and on a schedule established with the instructor, students will submit three polished fiction writing exercises throughout the semester and ten short essays, each on one book in a reading list compiled by the mentor in consultation with the student. By the end of the course the student should have completed between 30 and 80 pages of polished fictional prose (prose well beyond the first or second draft) and 30 pages of polished fiction exercises.

MFA555 - Writing Program TA Colloquium

Description

This is a semester-long course that follows from a weeklong introductory workshop on the basics of teaching college composition and course syllabus design. The colloquium provides an opportunity for ongoing mentorship and professional development in the field of composition pedagogy and theory. A weekly seminar provides time for the mentoring and professional development of TAs' teaching practice with the support of a full-time Writing Program faculty member. Topics covered in the seminar include an introduction to composition pedagogies theories through reading and response; introduction to and practice in assessment, including grading norming and effective written response to student writing; the basics of how to develop a Teaching Portfolio and craft a Statement of Teaching Philosophy. Students will also observe and assist in sections of ENG 120 and ENG 200 taught on campus by the Writing Program faculty.

Additional Information

Each student will attend the faculty member's ENG120 class once per week as an observer/assistant, and also work one (1) hour per week as a tutor in the Writing Center. TA Students attend MFA-555 twice per week (or equivalent of 6 hours per week) TA Students attend the class observation twice per week (equivalent of 3 hours per week) TA Students tutor twice per week (equivalent of 3 hours per week) Guidelines for Observation and Assistance of Composition Faculty: This list represents the TA's responsibilities over two semesters unless otherwise noted. • The TA will attend class once a week (first semester) or twice a week (second semester) to observe teaching and the facilitation of student learning. • The TA may assist students in the classroom in multiple ways including answering questions, offering feedback, listening to ideas, and clarifying points. • The TA will work with students one-to-one in The Learning Center once a week. The students may be from the assigned class, or they may be walk-in students looking for writing assistance (first semester). • The TA will hold one office hour per week to work with students in the class (second semester). • The TA will read assigned readings on pedagogy and practice (weekly during the first semester and when needed during the second semester). • The TA will participate in a weekly discussion board reflecting on the assigned readings, classroom activities, and student experiences (first semester). • The TA will discuss the goals, tasks, and, if applicable, readings for each class with the faculty mentor before and after class. • The TA will attend a face-to-face weekly discussion to expand on ideas shared in the discussion board. During that face-to-face meeting, actual scenarios of classroom instruction and challenges will be considered. The TA will be expected to incorporate ideas grounded in pedagogy that have been learned from readings and discussions when participating in these conversations (first semester). • The TA will have weekly correspondence with the faculty mentor, which may include either in-person meetings or e-mail check-ins based on the needs of the class (second semester). • The TA may discuss assessment with the instructor. Student work will be considered as teaching assistants participate in norming sessions to guide assessment. The TA will be learning about how to assess student work; the TA will not be responsible for grading papers or assigning grades. • The TA may discuss semester planning with the instructor: learning objectives, instructional methods, assignments, texts, scheduling, syllabus creation. • Under the guidance of the faculty mentor, the TA may develop lessons in the second part of the semester to help student learning and practice teaching skills. The teaching of the TA may start with mini-lessons and move into longer periods of class time as the TA takes on more responsibility for instruction and facilitation in the classroom. The TA will only teach lessons with the faculty mentor present. The TA may reflect in writing about any lessons taught. He/she will then meet with the faculty mentor who can offer feedback and facilitate discussion about the instruction.

MFA557 - Teaching with Observation and Feedback

Description

The student will teach a section of ENG 120 or ENG 200, depending on the availability of sections. A full-time Writing Program faculty member will conduct one (1) observation of the student in the course of the semester. After the student has successfully completed teaching a section of ENG 120 or ENG 200, the student will receive a Graduate Certificate in the Teaching of Composition.

Additional Information

The faculty member who conducts the observation will evaluate the student's teaching and provide feedback in discussions with the student. The student will also attend a monthly training seminar with other TAs in the certification program, led by a Writing Program faculty member. Offered every spring term.

MFA612 - Creative Manuscript I - Fiction

Description

In this course, the student is assigned a faculty member as a one-on-one mentor. The mentor will begin the semester by reading the current draft of the full creative manuscript, up to 300 pages in length. After the mentor has read the manuscript, the student and mentor will conduct a conference in person, or by phone if an in-person conference isn't viable. If possible, the mentor and student should take advantage of a residency to discuss the manuscript face-to-face. During the initial conference, the mentor and student discuss the strengths and weaknesses of the manuscript and decide on goals for the semester ahead. Every kind of revision and rewriting is on the table. That is, the mentor and student might decide that an entire manuscript should be scrapped and started over. On the other side of the spectrum, they might decide on a course of line-level revisions. From that point forward the student submits 30 pages of creative manuscript every five weeks, for a total of four additional submissions. The mentor's responses to these submissions should center on marginalia and phone conferences, with thorough line-by-line edits and comments responding to passages. The mentor's responses should be like those of an excellent, devoted, unusually hands-on book editor. There should be a great deal of conversation; the responses to the packets should not be one-way instruction. This reflects the fact that the student has already completed an MFA program and is a somewhat experienced writer, in all likelihood preparing the manuscript for submission to literary agents.

12

Academic Level

Graduate

MFA613 - Creative Manuscript II - Fiction

Description

As in Creative Manuscript I, the semester begins with the student and faculty member holding a conference to discuss the manuscript, the faculty member having read the complete current manuscript (up to 300 pages long) beforehand. As in Creative Manuscript I, the student and mentor will then set goals for the coming semester, this time with a greater emphasis on editing and polish, less emphasis on rewriting and experiment. Six weeks later, the student submits the first half of the revised manuscript. In another six weeks, the student submits the second half of the revised manuscript. Six weeks after that, the student submits the complete, final manuscript. The mentor should treat each of the submissions as an exceptional book editor might treat portions of a manuscript (see guidelines for Creative Manuscript I). At the end of the semester, the faculty member and student should have a conference about the manuscript's prospects for representation and publication, with the faculty member advising a course of action for any student interested in obtaining representation by a literary agent.

MFA614 - The Book Business

Description

This is a course in the publishing industry and book promotion. As a general rule, it should be taken during the second semester of the Advanced Certificate program, concurrent with Creative Manuscript II. A faculty member with sufficient expertise in the workings of the publishing industry and current book-promotion methods should assign the student a number of brief response papers (3-5 pages) analyzing books, articles, social media feeds, podcasts, and/or other relevant works. The course should be focused on knowledge of practical use to an author, but it should also be a primer useful for a student who one day decides to seek internships and/or entry-level jobs in publishing.

Game Art

GAD201 - Introduction to Digital Sculpting

Description

In this course, learners will build upon their prior knowledge of 3D modeling and UV unwrapping and gain experience creating organic 3D models and assets through the application of digital sculpting techniques. They will also explore the various methods and tools for the digital sculpting process.

Credits

3

Academic Level

Undergraduate

GAD202 - 3D Modeling and Unwrapping

Description

In this course, learners will develop foundational knowledge and skills relevant to the process of 3D modeling and unwrapping. They will create low-poly and high-poly models through the use of industry-standard 3D modeling tools and technologies. Through the use of UV mapping tools, learners will then unwrap 3D models to create UV maps that represent the 3D model's surfaces on a two-dimensional plane. Additionally, learners will transform a high-poly model into a low-poly model and create and optimize UV maps in preparation for implementation into a game engine.

Credits

3

Academic Level

Undergraduate

Campus Programs

GAD215 - Texturing for Games

Description

In this course, learners will develop the knowledge and skills necessary for designing and adding textures and materials to 3D models. The addition of textures and materials is a critical step in the production pipeline for interactive visual designs. Learners will design various textures and materials, and then apply them to add color, texture, opacity, and reflectivity to the surfaces of 3D models.

GAD401 - Character Design

Description

Following the phases of the production pipeline, learners in this course will create a finalized character asset ready for game implementation. They will develop an initial character concept and then apply the appropriate 3D modeling, digital sculpting, texturing, and rigging techniques to bring the character to life. Additionally, learners will be able to articulate how their various design choices throughout the pipeline reflect the original concept art as well as the backstory of the character.

Credits

3

Requisites

- Complete:
 - GAD400 - Creature Design (3)

Academic Level

Undergraduate

GAD499 - 3D Professional Design

Description

As the culminating experience for the Bachelor of Science in Game Art and Interactive Design degree program, learners in this course will synthesize all of the knowledge and skills developed throughout their coursework and apply it to the development of a professional persona as a game artist or interactive designer, along with the creation of a professional-quality asset to showcase their career readiness. Learners will identify the type of game artist or interactive designer they would like to be, and then create an asset to show off that specific skill set. They will also demonstrate the ability to present both themselves, as well as their asset, to various professional audiences.

GDE150 - Game Design I: Systems and Mechanics

Description

In this course, learners will be introduced to the field of game design. They will examine the systems and mechanics of games and how they relate to the overall gameplay experience. Learners will apply this knowledge to create systems and mechanics for new games and to improve existing games. They will also produce appropriate design documentation for their created game systems and mechanics. This course will include an examination of both digital and non-digital games.

Credits

3

Academic Level

Undergraduate

GDE210 - Game Design and Production: Rapid Prototyping

Description

In this course, learners will develop the knowledge and skills necessary for the design and production of game prototypes. In order to develop their prototypes, learners will develop a game concept and corresponding designs, while taking into consideration their intended audience and business goals for the game. They will also determine the mechanics that will drive the overall gameplay and produce a functional prototype to conduct gameplay testing.

Credits

Game Design & Development

GAM110 - Game Programming I

Description

Students will learn the basis of computing as well as the fundamentals of programming. Students will be taught the correlation between math and programming languages and how they are used in games. Students will get a firsthand introduction on how C# and C++ are used in game engines. A student will be introduced to scripting languages, object oriented languages and functions. Students will have an understanding of multiple types of classes that include base, abstract, and concrete, as well as class hierarchies.

Credits

Campus Programs

GAM120 - Introduction to Game Development

Description

This course introduces students to game development industry as well as the technologies that make games function. This course will involve exploration into current and past industry technology trends while students work on collaborative multidisciplinary projects. Using current game technologies, students will learn how to develop their game ideas into playable titles through rapid, iterative development. By taking a hands-on approach, students with little-to-no experience will learn the fundamentals necessary to develop games using visual scripting languages while using professional toolsets. Content is taught with play, lecture, discussion, miniature game jams, and a variety of projects. This course will introduce topics in programming and logic, art, lighting, as well as design. Additionally, this course will introduce students to the structure and roles within the various game industries.

Credits

3

Academic Level

Undergraduate

GAM150 - Game Design I: Systems and Mechanics

Description

This course introduces students to the principles and fundamental techniques used in designing interactive game experiences. Emphasis is placed on the underlying structure of good game design, including the systems, mechanics, and psychological principles involved. As these principles are universal to games of all types, students will work primarily on designing non-digital games. No programming knowledge is required.

Credits

3

Academic Level

Undergraduate

GAM205 - Introduction to Games

Description

While games have long been regarded as trivial or inconsequential, their increasing popularity and influence in American culture demands more critical perspectives that better enable us to understand their significance and value. This course provides an introduction to the critical study of games. Through course readings, discussion, and academic research, students will analyze the design, production, consumption, and aesthetics of games, drawing on perspectives from across a variety of disciplines. Specific attention is paid to how games affect and are affected by the people who play them and the context in which they are developed and played.

Additional Information

Offered every fall term.

Campus Programs

GAM207 - Information Technology and Digital Games

Description

Introduction to digital games and information technology covers game genres and platforms, interface design, game implementation, artificial intelligence, business economics of the game industry, game marketing and design, e-collaboration, and e-commerce. Students learn how to use software packages to design and implement digital games and how to use the Internet to market and distribute digital games. The course includes a project which will culminate in the conception, design, and prototype of an original digital game. The course is designed for students who have an interest in IT and games, including original game concepts, design and implementation, and executive leadership in the game industry. Knowledge of computer programming is not required.

Credits

3

Academic Level

Undergraduate

GAM210 - History of Digital Games

Description

Digital games have, in their relatively brief history, evolved to become the most dominant form of entertainment on the planet. The modern digital game is as much a product of cultural context as the technologies that enabled their development. This course is designed to explore the history of digital games, their foundation in traditional games, and the modern application of game design theory. Through course readings, discussion, and academic research, students will analyze the history of digital games through both a technological and a socio-cultural perspective.

Additional Information

Offered every spring term.

Credits

3

Academic Level

Undergraduate

GAM211 - Interactive Animation

Description

This course focuses on programming capabilities to enhance graphic animations and user interfaces to provide spectacular interactive results. Those benefiting from this course include students in game development, advertising, marketing, education, web development, art and other fields that can benefit from interactive animated graphics helping to convey concepts. The course is intended for those with no programming experience as well as those with some programming background. The use and creation of animations will be covered at a level of interest to both those new as well as experienced. The results can be displayed by a browser from the internet or as standalone results displayable on a range of operating systems. This is a hands on computer based course in which the students create a number of individual projects based on their interests and capabilities, focusing on creativity and programming aspects of interactive animation. The course utilizes emerging technologies in interactive animation.

GAM215 - World-Building for Games

Description

Rich, highly immersive imagined worlds have a long tradition in fantasy and science fiction from J.R.R. Tolkien's Middle Earth to the dystopian universe of Suzanne Collins' Hunger Games. Increasingly, digital games rely on these imagined worlds to create environments for players to interact with and explore. In this course students will learn and apply the principles of world-building and environmental storytelling to craft a series of imagined worlds for digital games. Students will be tasked with developing worlds around a number of common themes in digital games such as fantasy realms, forgotten civilizations, post-apocalyptic futures, and alien worlds, including the historical, geographic, social, and cultural details that make imagined worlds so engaging.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

GAM218 - Programming and Mechanics for Games

Description

In this course students will learn the basics of using code and how it is applied in games. No prior programming knowledge is required. Students will be taught how to use data types, classes, functions, and variables inside a modern game engine using a coding language that fits a specific game engine. This course is geared toward introducing core game specific programming practices and mechanics. This course will allow students to explore and create code in a modern game engine within its core programming language.

Credits

3

Academic Level

Undergraduate

GAM220 - Game Programming II

Description

Students will learn advanced programming topics to further enhance their abilities to implement software solutions to problems. Object oriented design, data abstraction techniques, and data structures like linked lists, vectors, maps, stacks and queues will be introduced and developed. More advanced uses of functions, such as function pointers and recursion will be discussed. Students will also be introduced to various algorithms used for searching and sorting data. All topics will be introduced and discussed with a focus on how they are used to build interactive games.

Additional Information

Typically offered during spring terms.

GAM230 - Scripting for Games

Description

This course will introduce students to scripting for video games, making use of modern game engine technologies as well as the commonly used math topics within game development. Students will learn how to create custom logic and mechanics for real-time simulations, using a scripting language. Technical components of common game engines, such as physics, animations, game objects, transform and position information, as well as visual effects will be explored and manipulated from the perspective of a software developer. Commonly used math topics for game development will be implemented in real-time systems.

Credits

3

Requisites

- Complete:
 - GAM110 - Game Programming I (3)
 - GAM120 - Introduction to Game Development (3)

Academic Level

Undergraduate

GAM250 - Game Design II: Level Design

Description

In this course, students learn and apply the principles and techniques used in designing the various stages of a game. Students are tasked with designing settings, challenges, obstacles, and other elements that are consistent with the game genre and theme, and provide a rich, compelling game experience. No programming knowledge is required for this course, as most design work is completed using analog and basic computer applications.

Campus Programs

GAM315 - Interactive Storytelling

Description

Storytelling in digital games is often rightly criticized for being unimaginative and lackluster. The interactive nature of this medium requires dramatically different approaches but historically, little attention has been paid to the development of these skills in potential authors. In this course, students explore the different ways that modern digital games and other forms of interactive fiction tell stories by applying theories and principles of narrative development and story structure. Emphasis is placed on how video games are similar to and profoundly different from traditional linear fiction. In addition to reading scholarly works on games and narrative, students develop original and engaging stories fit for contemporary digital games.

Credits

3

Academic Level

Undergraduate

GAM325 - Programming for Game Engines

Description

In this course, learners will explore programming within game engines. Learners will analyze how integrated development environments interface with game engines, and learn how to leverage the features of game engines based on design needs.

Credits

3

Requisites

- Complete:
 - GAM110 - Game Programming I (3)
 - GAM120 - Introduction to Game Development (3)

Academic Level

Undergraduate

GAM330 - Physics for Games

Description

This course looks into the basics of Physics techniques specific for games from a programming perspective. Students will learn the basics of physics on Objects, Characters, Vehicles, Crowds, and Weather. Topics will also include collision objects and detection. Students will also get an introduction to AI with Character, Crowd and World Behaviors.

Credits

3

Requisites

- Complete:
 - PHY101 - Principles of Physics (3)

Academic Level

Undergraduate

Campus Programs

GAM335 - Gameplay Programming: Systems and Mechanics

Description

In this course, learners will develop the gameplay systems and mechanics that bring game design ideas to life. Learners will build both underlying technical systems that enable gameplay, as well as event-based user interface systems.

Credits

3

Requisites

- Complete:
 - GAM220 - Game Programming II (3)
 - GDE150 - Game Design I: Systems and Mechanics (3)

Academic Level

Undergraduate

GAM345 - Algorithms and Data Structures for Games

Description

Students will learn advanced algorithms and data structure topics to further enhance their abilities to implement software solutions to problems. Linked lists, doubly linked lists, vectors, maps, stacks and queues will be reviewed and developed. Graphs, binary trees, and quadrees will be discussed and implemented. Common algorithms used for searching and sorting data stored in the various types of data structures will be covered. Runtime and memory analysis for all data structures and algorithms will also be discussed.

Additional Information

Typically offered every fall term.

Credits

3

Requisites

- Complete:
 - GAM110 - Game Programming I (3)
 - GAM220 - Game Programming II (3)

Academic Level

Undergraduate

GAM350 - Multiplayer Video Game Development

Description

This class looks into the techniques required to develop multiplayer game experiences. The course will start with the basics on how to develop video games with multiple player controlled objects using various input devices, shared and split-screen experiences, as well as designing asynchronous and asymmetric games. During the second half of the semester, online networking topics will be introduced which will include peer to peer and client server networking models. Topics such as syncing game objects between networked clients, remote procedure calls, and persistence will also be discussed.

Credits

3

Requisites

- Complete:
 - GAM230 - Scripting for Games (3)

Academic Level

Undergraduate

Campus Programs

GAM355 - Algorithms for Games and Simulations

Description

In this course, learners will build on their knowledge of algorithms and data structures, exploring algorithms that are widely used in games and interactive simulations. Learners will also develop data structures needed for game and simulation needs, including writing custom containers, and apply spatial organization and partitioning concepts and techniques.

Credits

3

Requisites

- Complete:
 - GAM220 - Game Programming II (3)

Academic Level

Undergraduate

GAM360 - Introduction to Game Production

Description

In this course, learners will gain experience working collaboratively with other game development team members in an integrated development environment. In their efforts, learners will gather the various artistic and programming requirements for a game project to determine the overall scope of both the creative outputs and logistics. They will then create a prototype that they will iterate upon and prepare for final launch.

Credits

3

Requisites

- Complete:
 - GDE210 - Game Design and Production: Rapid Prototyping (3)

Academic Level

Undergraduate

GAM370 - Developing Online and Networked Games

Description

In this course, learners will develop skills necessary to develop online and networked games. Learners will explore how these games function technically in order to synchronize game worlds across multiple devices.

Credits

3

Requisites

- Complete:
 - GAM325 - Programming for Game Engines (3)

Academic Level

Undergraduate

Campus Programs

GAM375 - Mobile Game Development

Description

The mobile games industry has grown massively in the past decade, creating a dynamic market where creative and entrepreneurial software solutions reinvent our interactions. Students will learn programming, design, and deployment techniques for developing and publishing mobile games. Students will also gain an understanding of the major mobile platforms, the prominent app stores, and market factors. This is a technical course and will require students to write code.

Credits

3

Requisites

- Complete:
 - GRA211 - Interactive Animation (3)

Academic Level

Undergraduate

GAM405 - Artificial Intelligence for Games

Description

Students get an introduction to AI inside a game engine. Using Action scripting, C++, or C# students will be introduced to Path finding, Crowd Control, Character Control, Non Player behavior, World behavior and Object behavior. Students will also be introduced to game play algorithms designed to create immersive reactive worlds.

Credits

3

Requisites

- Complete:
 - GAM230 - Scripting for Games (3)
 - GAM345 - Algorithms and Data Structures for Games (3)

Academic Level

Undergraduate

GAM415 - Graphics Game Engine

Description

Students get an introduction to advanced graphics topics including skeletal animation, ray tracing, particle integration, lighting, shaders and materials. Projects are introduced to implement these important visual effects. The knowledge obtained will be assimilated and applied to a wide range of usages and application. Linear Algebra algorithms will be refreshed and/or introduced specific to the topic at hand. Students will learn the basics of Direct X, Open GL, and Rendering solutions (forward and deferred).

Credits

3

Requisites

- Complete:
 - GAM220 - Game Programming II (3)
 - GAM230 - Scripting for Games (3)

Academic Level

Undergraduate

Campus Programs

GAM420 - Artificial Intelligence for Interactive Simulations

Description

In this course, learners will explore concepts of artificial intelligence (AI), particularly as they relate to gaming and simulations. Learners will explore AI algorithms, apply common logic and behavior methodologies, and grapple with ethical issues raised by AI.

Credits

3

Requisites

- Complete:
 - GAM325 - Programming for Game Engines (3)
 - GAM355 - Algorithms for Games and Simulations (3)

Academic Level

Undergraduate

GAM425 - Game Programming Capstone

Description

The game programming capstone is designed to help students bring together all of the knowledge and skills they have acquired throughout the program. Students will work on a project of their own design that showcases their abilities as game programmers. Emphasis is placed on students' ability to create dynamic gameplay experiences through the application of industry standard methods, techniques, and technologies.

Credits

3

Requisites

- Complete:
 - GAM312 - Gameplay Systems Development (3)
 - GAM330 - Physics for Games (3)
 - GAM405 - Artificial Intelligence for Games (3)
 - GAM415 - Graphics Game Engine (3)

Academic Level

Undergraduate

GAM465 - Digital Multimedia Development

Description

This course presents digital multimedia theory and develops skills that meet the design and technical requirements of professionally created multimedia for World Wide Web commercial applications on a variety of platforms and Internet applications. Each student develops a professional portfolio consisting of CD-ROM material. Students also develop working Web sites that display their multimedia projects. Topics include sound, animation, video, interactivity and multimedia distribution.

Additional Information

Offered as needed.

Gender Studies

GST100 - Introduction to Women's Studies

Description

This course introduces students to Women's Studies—an interdisciplinary field of study that centers gender as an important site of critical inquiry. Rooted in feminist philosophy, this course will use a wide range of interdisciplinary concepts, tools, and methods to ask questions about women's inequality, intersectional identities, and the movements organized to support the rights of women and the freedom of all people. This course will consider these essential questions through a variety of disciplines and lenses including but not limited to history, economics, literature, religion, fine arts, technology, politics, and sociology.

Additional Information

The course will be offered every semester.

Credits

3

Academic Level

Undergraduate

GST247 - Gender and Text

Description

This course examines gender in and through literary texts, and considers the ways in which categories of sexuality, sex, race, class, ethnicity, nationality, religion, and other factors influence writers' depictions of gender. The course analyzes historical conditions relevant to gender studies, and may address social and theoretical topics such as women's suffrage, feminisms, third-world feminism, the LGBT and LGBTQ communities, and queer theory. The course analyzes these topics through the lens of literature and asks: how is gender represented in literary texts? how do literary texts not only replicate but sometimes contest or imagine new realities for gendered subjects? what does it mean to write as a gendered subject?

Credits

3

Requisites

- Complete:
 - ENG120 - College Composition I (3)

Academic Level

Undergraduate

GST260 - Family and Culture

Description

This course considers how family and culture influence child development including family structures, sibling relationships, parenting behaviors, children's special needs, family violence, diversity in educational settings and the relations between family and community. Students explore their own and other's cultural influences through the lens of diverse cultural perspectives. The challenges faced by children and families from a variety of cultures and socio-economic backgrounds including communication, interaction, education, and societal norms will be examined from the role of the practitioner. Research informs student projects in which a particular aspect of culture is studied in depth. Ten hours of field experience is included.

Credits

3

Academic Level

Undergraduate

Campus Programs

GST302 - Gender and Film

Description

This course will undertake a comprehensive and chronological history of gendered representations on the screen. We will begin in the turn-of-the twentieth century silent era with "damsels in distress," and we will conclude with twenty-first century films that address the continuing and global struggle for gender equality. In between we will cover such subjects as: "The New Woman" of the 1920s; pioneering films exploring lesbian, gay, and transgender issues which date back to the 1930s; femme fatales in film noir; and male filmic stereotypes such as the cowboy. This will be achieved through screenings, readings, lectures, active discussions, and presentations.

Additional Information

Course offered in the spring term of every even year.

Credits

3

Academic Level

Undergraduate

GST319 - Social Development: Child and Adolescent

Description

The purpose of this course is to expose students to theory and research concerning infant's, children's, and adolescent's social and personality development. This course will focus on how individuals become members of their social world, including how we conceptualize the social world, interact with parents and caretakers, develop social relationships with peers, and interpret, analyze, and respond to cultural messages and ideologies. We will discuss these issues through analysis of the theoretical and research literature.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete:
 - PSY211 - Lifespan Development (3)

Academic Level

Undergraduate

GST335 - Gender and Sport

Description

Students will draw from integral theory to critically examine the behaviors, culture, structures and systems that shape the relationship between gender and sport and reinforce gender differences and existing inequality. Students will also create potential strategies for restructuring sport as a more equitable and empowering institution for all genders.

Credits

3

Requisites

- Complete:
 - ENG120 - College Composition I (3)

Academic Level

Undergraduate

Campus Programs

GST380 - Women, Art and Society

Description

This course explores the nature of gendered representation in the history of art from the Renaissance to the present. While the primary focus will be on the representation of women and the work of women artists, the construction of masculinity in the arts will also be addressed. Art will be examined in relation to its political, social, economic, and religious context to establish the broader implications of these visual documents. The student will gain a broadly inclusive understanding of the Western artist tradition as well as sensitivity to gender issues and the gendered nature of representation.

Additional Information

Course offered in the fall of every even year.

Credits

3

Academic Level

Undergraduate

Geography

GEO200 - World Geography

Description

This course examines the implications of global location and topography for the people of planet Earth. Students will explore how geography shapes the dynamics of human societies, with an emphasis on the geoenvironmental, geopolitical, and geosocial phenomena that help to define the modern world.

Credits

3

Academic Level

Undergraduate

GEO202 - Regional Geography: Appalachia

Description

This course will examine the geography of Appalachia. Emphasis will be placed on the physical, historical, social, and cultural geography of this region. Topics include: geologic formation of the Appalachian Mountains, the Civil War, socioeconomic problems, impacts of coal mining, and regional culture. This course requires a field trip with associated fees to Appalachia during spring break.

Additional Information

Offered every spring term.

Graduate Business Administration

Campus Programs

MBA501 - Mathematics and Statistics for Business

Description

This is an applied course, which will provide students with the mathematical knowledge and skills that underlie many courses offered in the school of business. Students will learn the fundamental concepts and methods of linear algebra, mathematical functions, differential calculus and statistics and their applications to business. They will also sharpen their quantitative, analytical and problem-solving skills that are so important for success in the world of business today.

Credits

3

Academic Level

Graduate

MBA502 - Economics for Business

Description

This course is intended to provide the student with a concisely focused yet rigorous introduction to both micro- and macroeconomic theory needed at the foundational level of a graduate degree program. Some of the topics to be addressed include: market behavior; demand theory and related elasticity concepts; production and cost theory; managerial decision-making in perfectly competitive and imperfectly competitive markets; GDP determination; unemployment and inflation; and fiscal and monetary policy.

Credits

3

Requisites

- Complete:

MBA610 - Business Law

Description

This course provides a survey of the legal environment of business by looking at legal issues and regulations in a business context. The students assess the impact of business law on organizational decision making for informing strategic legal decisions. The course covers employment law, contracts, tort and product liability, internet law as well as other legal issues affecting the business environment. The students also assess the legal and ethical implications of US companies doing business abroad.

MBA635 - Ethics, Corporate Culture, and Social Responsibility

Description

This course examines corporate culture and social responsibility, how to build a sustainable business, and how to promote corporate ethics and values. The course also looks at how to deal with group think, diversity and cultural awareness, civic engagement, and how to be at the forefront of using environmental and sustainable practices that have a positive global impact. The course will also examine personal ethics in relationship to corporate ethics, governance, and civic mindedness.

Graduate

MBA640 - Finance, Economics, and Decision Making

Description

The course is a continuation of MBA 520 Accounting and Financial Analysis and focuses on effective business decisions using quantitative and qualitative data, microeconomic and macroeconomic variables, and internal financial priorities. The students refine operational and investment decision-making skills with respect to organizational sustainability and growth, mergers, debt vs. equity funding and capital markets. In addition, students are exposed to foreign currencies, foreign direct investment (FDI), and international trade.

MBA690 - Operations Management and Technology

Description

This course explores essential aspects of project management, the tracking and measurement of key performance indicators (KPI), and the use of current technology to create automation and sustainability. Students have the opportunity to examine technology management and operations management from a strategic perspective, creating a common view into the different layers of a business. In addition, students learn to collect, identify, and determine quality measures and use common methodologies and strategic planning processes.

Graphics

GRA101 - Basic Design and Color Theory

Description

This course examines the basic elements and principles of design, including balance, emphasis, proportion and rhythm. Students are introduced to visual designing systems that guide the student through the application of computer graphics tools. The basic visual design elements of line, space, texture and color are creatively explored as students complete a series of projects that relate to advertising layout and design and visual merchandising.

Credits

Academic Level

Undergraduate

Campus Programs

GRA105 - Concept Art and Color Theory

Description

Students will begin with an understanding of how narrative design, color design, form vs. function and world building define the aesthetics of concept art. Students will be introduced to the fundamentals of digital and traditional techniques for creating concept art. These fundamental skills will help students in the design phase for creating concepts for characters, creatures, and environments. Students will learn about color theory as a cohesive workflow with design to create aesthetically pleasing concept art.

Credits

3

Requisites

- Complete:
 - FAS110 - Introductory Drawing (3)

Academic Level

Undergraduate

GRA201 - Intro to Digital Sculpting

Description

In this course students will be introduced into Digital sculpting with zbrush. Also understand how digital sculpting fits into a pipeline in a game production environment. Techniques covered in this course will be software navigation, sculpting with multiple brushes, masking, poly painting, and materials. The course will cover some practices used to prep a model for the next stage in creating a game model. Some techniques will show how zbrush can work seamlessly with other 3D modeling software. The class will also have assignments that include observational and concept drawing.

Additional Information

Offered every spring term.

Credits

3

Academic Level

Undergraduate

GRA202 - 3-D Modeling and Animation

Description

In this course students will be introduced to 3DS max. It will give them an overview of what max does specifically for games. This course will be focused on modeling. Students will learn the basics of modeling low poly and high poly models. How they are unwrapped and used in conjunction with textures. It will also show a wide range of techniques used in the industry for modeling for mobile, PC and current generation consoles.

Undergraduate

GRA211 - Interactive Animation

Description

This course focuses on programming capabilities to enhance graphic animations and user interfaces to provide spectacular interactive results. Those benefiting from this course include students in game development, advertising, marketing, education, web development, art and other fields that can benefit from interactive animated graphics helping to convey concepts. The course is intended for those with no programming experience as well as those with some programming background. The use and creation of animations will be covered at a level of interest to both those new as well as experienced. The results can be displayed by a browser from the internet or as standalone results displayable on a range of operating systems. This is a hands on computer based course in which the students create a number of individual projects based on their interests and capabilities, focusing on creativity and programming aspects of interactive animation. The course utilizes emerging technologies in interactive animation.

GRA215 - Texturing for Games

Description

Starting with an introduction to 2D software, this course will cover the many methods of texturing game assets using today's industry standard techniques and software.

Credits

3

Requisites

- Complete:
 - GRA202 - 3-D Modeling and Animation (3)

Academic Level

Undergraduate

GRA220 - Introduction to Digital Imaging

Description

Using Photoshop and Illustrator software, this course is an introduction to professional computer graphics creation and to the software and hardware typically used in the graphic design, video, photography and interactive Web/multimedia industries. Emphasis will be placed on the professional use of image-capturing devices, such as scanners, digital still cameras and video cameras. Image editing and color management systems will be discussed and demonstrated. The important differences between vector and bitmap graphics will be defined, as will the significant differences in preparing images for print, broadcast and Web distribution. Students will be encouraged to experiment with their own and pre-existing images using sophisticated digital editing techniques such as layering, channel masking, filtering, cloning and montaging. Special attention will be paid to copyright awareness in the age of digital image.

Credits

3

Academic Level

Undergraduate

GRA310 - Digital Graphic Design for the Web

Description

This course focuses on digital graphic design theory and its application to web design. Students learn about the technical requirements of professionally created digital web documents. Students will be focused on designing communication and marketing applications for the World Wide Web all the while considering user experience and functionality. Differences in designing for the desktop computer and mobile internet appliances will be a topic for discussion and incorporated in hands-on exercises and projects. Each student will develop several minisites and by the end of the semester will have produced at least one deployable site. Topics include design strategies, web authoring/editing environments, color calibration and aesthetics, web typography, style sheets, template use, graphics format selecting and optimization, and HTML coding and debugging.

Credits

3

Undergraduate

Campus Programs

GRA311 - Environment Design

Description

In the first half of this course students will be introduced to a pipeline for the creation of environments inside of a game studio. Students will be shown how to use reference drawings and images to help build props and environment pieces. Students will also be shown how these assets can be used, not only as standalone assets but to create other bigger picture assets when used as a modular set piece. Then the students will digitally sculpt environment assets from references provided to them. When the sculpting phase is finished the students will learn how to build a game model from their digital sculpt. Students will then create the textures that will be used for a final render. In the second half of this course students will be able to go through this same pipeline but instead of using provided artwork, they will create something from their own imagination.

Additional Information

Offered every spring term.

GRA315 - Game Design and Production

Description

This course ties together subjects such as project management, game design theory, and development. Working together in small and randomly assigned teams, students design, document, manage, and develop projects within set time frames. Each student will have the opportunity to experience different roles within a development team including designer, programmer, artist, and producer. All projects are presented to the class each development cycle for feedback and peer reviews before working on the next project. Design and project management methods are lectured and put into practice in each new cycle.

Additional Information

Offered every spring term.

GRA317 - Studio Environment

Description

The video game industry relies on professionals who can work together as a team, and understand the functions of their peers. In this class, students are put into teams based on their degree focus to work together in a simulated studio environment. Through this process, students will learn gaming industry business development skills such as project management, marketing, and legal vocabulary. Upon completion of this course, students may apply these skills in a small studio or startup environment, where product creators are often asked to aid in the development of the business.

Additional Information

Offered every spring term.

Credits

3

Requisites

 - GAM150 - Game Design I: Systems and Mechanics (3)
 - GRA315 - Game Design and Production (3)

Academic Level

Undergraduate

GRA340 - Typography

Description

Typography deals with the language of type, the history of typography, typeface and character recognition, legibility, appropriate uses of measure, manuscript specifications and the individual visual dynamics of letterforms. In this class students will learn how to work with type as a stand-alone design element. Students will also learn how to incorporate type successfully with imagery. The assignments will cover a broad range of type applications. Students will primarily focus their efforts towards developing a greater understanding of typographic form through exercises based on the setting of words, phrases, sentences and short paragraphs. Students will first focus on the appropriate setting of spaces in-between the letters that make up words and projects will gradually increase in scope and complexity up to the setting of pages of text with multiple levels of hierarchical meaning.

Additional Information

Offered every fall term.

Credits

3

Requisites

- Complete:
 - COM230 - Graphics and Layout in Print Media (3)

Academic Level

Undergraduate

Campus Programs

GRA401 - Character Design

Description

This course will involve a combination of concept, texturing, digital sculpting and 3d modeling to create characters that would appear on both mobile and current generation consoles. Students will learn a proven pipeline used in the gaming industry to bring a concept to creation and ready for game implementation. The course will begin showing students how this pipeline works in combination of different types of software following a given concept. They will have the understanding of how specific software works along the path of the pipeline to create a character. Students will then be asked to create their own concept following the techniques used in class to present a finished game character for their final project.

Additional Information

Offered every spring term.

3

Requisites

- Complete:
 - GRA201 - Intro to Digital Sculpting (3)
 - GRA202 - 3-D Modeling and Animation (3)
 - GRA215 - Texturing for Games (3)

Academic Level

Undergraduate

GRA402 - Creature Design

Description

In this course students will be shown how creatures are created from an idea to a fully fleshed out game model. They will work through weekly assignments to see the connection of real world animals and fantasy creatures. Students will follow step by step instruction with supplied concepts to build a fantasy creature through real world animal anatomy and the creative process. In the second half of this course students will learn how to go through this same process of using reference of actual creatures/animals from the real world as a spring board to create their own fantasy creature.

Additional Information

Offered every fall term.

Undergraduate

GRA410 - Advanced Digital Graphic Design for Web

Description

This course engages upper-level design students in current industry standards used in designing content for multimedia and interactive communication. Emphasis is placed on designing for computers, tablets and phones. The course is divided into teaching modules emphasizing the integration of several software packages for design problem solving. Emphasis is placed on conceptualization and the mastery of professional site mapping and wire framing techniques. Exercises and projects provide challenging design problem-solving experience. Project themes involve self-promotion and client-based work. All projects rely on the student's ability to integrate previously mastered techniques in a broad range of software.

Credits

Requisites

- Complete:
 - GRA310 - Digital Graphic Design for the Web (3)

Academic Level

Undergraduate

GRA420 - Advanced Digital Imaging

Description

This hands-on computer graphics course combines skills from previous design courses to explore the history, process and essential skills required to develop successful brand identity systems. Topics such as logo design, selection of fonts and colors, and the development of branded marketing materials are covered in depth. In addition, the important techniques of imaging software integration and file format compatibilities are discussed and applied while preparing images for print, video and Web. At the conclusion of this course, students will have developed a complete branded identity system and assembled a portfolio presentation for public viewing.

- Complete:
 - COM232 - Desktop Publishing (3)

Academic Level

Undergraduate

GRA440 - 3-D Art and Design

Description

In this course students will explore how their individual creative strengths and digital skill sets fit into a professional work flow of commercial game production. Students will choose one or multiple aspects of game art creation: Character design, Environment design, or Animation. All creative work produced in this course will be executed in the context of strict deadlines that simulate industry expectation. Students will concentrate on game development source control and integration of art assets into a production pipeline. Each student develops a digital portfolio and website that showcase their ability to create professional creative art work. Students will learn the process of objective self-evaluation and peer criticism and preparing their portfolios to match professional job board postings.

Additional Information

Offered every spring term.

0 - 15

Academic Level

Undergraduate

Healthcare Management

HCM320 - Healthcare Economics

Description

Learn about the standard economic principles and tools that healthcare administrators need to utilize for effective decision making within the healthcare industry. Explores a framework for understanding government policies, legislation, pricing, profitability, market supply and demand, and risk issues within the healthcare economic system.

Credits

3

Academic Level

Undergraduate

HCM340 - Healthcare Delivery Systems

Description

This course provides an overview of the nature, organization, and function of the continuum of health services found in the United States. Emphasis is placed on the interrelation of cultural, economic, political and social aspects of health care delivery at the federal, state and local level. Topics include health care costs, accessibility of services, governmental influence on health care delivery, private industry role in health care, services for the medically indigent and elderly, ethical issues regarding transplants, reproductive technology, end of life decisions and funding.

Credits

3

Academic Level

Undergraduate

HCM345 - Healthcare Reimbursement

Description

This course explores some of the major issues facing the healthcare industry and the effect that public policy and business environment has on a healthcare organization. Emphasis is on supply and demand theory, reimbursement systems, managed care, charge-master management, Case-mix management, DRG prospective payment, insurance, Medicare, Medicaid, governmental regulations, accessibility, eligibility, budgeting, and planning. Students learn to use informational and research tools to make effective management decisions.

Credits

Academic Level

Undergraduate

History

HIS101 - Exploring the Past

Description

A skills-oriented introduction to the study of history for majors and non-majors alike. Through the study of a key historical episodes or events, students will develop foundational historical skills: reading, writing, analysis, creative and critical thinking, and problem solving. Students will learn how to handle both primary and secondary historical sources, to evaluate historical evidence, and to analyze historical arguments.

Credits

3

Academic Level

Undergraduate

HIS102 - The Medieval World: Exploring the Past

Description

A skills-oriented introduction to the study of history for majors and non-majors alike. Through the study of a key episode or event in the Medieval period, students will develop foundational historical skills: reading, writing, analysis, creative and critical thinking, and problem solving. Students will learn how to handle both primary and secondary historical sources, to evaluate historical evidence, and to analyze historical arguments.

Credits

3

Academic Level

Undergraduate

HIS103 - The Early Modern World: Exploring the Past

Description

A skills-oriented introduction to the study of history for majors and non-majors alike. Through the study of a key episode or event in the Early Modern period, students will develop foundational historical skills: reading, writing, analysis, creative and critical thinking, and problem solving. Students will learn how to handle both primary and secondary historical sources, to evaluate historical evidence, and to analyze historical arguments.

Credits

3

Academic Level

Undergraduate

HIS104 - The Modern World: Exploring the Past

Description

A skills-oriented introduction to the study of history for majors and non-majors alike. Through the study of a key episode or event in the Modern period, students will develop foundational historical skills: reading, writing, analysis, creative and critical thinking, and problem solving. Students will learn how to handle both primary and secondary historical sources, to evaluate historical evidence, and to analyze historical arguments.

HIS109 - Western Civilization to 1500

Description

This course offers an overview of the major developments in Western history, from antiquity to the discovery of the New World. Students will examine the ancient world, Greece, Rome, the European medieval period and the Italian Renaissance. Required for majors in history and social studies education with a concentration in history. Writing Intensive Course.

Credits

3

Academic Level

Undergraduate

HIS110 - Western Civilization Since 1500

Description

This course traces the growth of Western history from the 16th century and the rise of the nation-state through the modern era. The ideologies and political developments that shaped modern Europe receive careful study. Required for majors in history and social studies education with a concentration in history. Writing Intensive Course.

Credits

3

Academic Level

Undergraduate

HIS113 - United States History I: 1607-1865

Description

The first half of the United States history survey courses covers the period from the founding of Jamestown to the end of the Civil War. The development of regionalism and its effect on the coming of the Civil War provides the framework for the investigation. Required for majors in history and social studies education with a concentration in history.

Credits

3

Academic Level

Undergraduate

HIS114 - United States History II: 1865-Present

Description

The second half of the United States history survey course covers the period following the Civil War. The economic, political and ideological developments that allowed the United States to attain a position of the world leadership are closely examined. Required for majors in History and Social Studies Education with a concentration in History.

Credits

3

Academic Level

Undergraduate

HIS117 - World Civilizations: Prehistory-1500

Description

An introductory survey of the world's major civilizations from prehistory to 1500. Key societies will be examined from political, socio-economic, and cultural-intellectual perspectives.

Credits

3

Academic Level

Undergraduate

Campus Programs

HIS118 - World Civilizations: 1500 - Present

Description

An introductory survey of major civilizations from 1500 to the present, with particular emphasis on interactions and conflicts between Western and non-Western parts of the world. Key societies will be examined from political, socio-economic, and cultural-intellectual perspectives.

Credits

3

Academic Level

Undergraduate

HIS220 - Modern European History: 1890-Present

Description

This course investigates the trajectory of European hegemony in the 20th century. Special attention is devoted to the effects of the two major conflicts that were fought on European soil.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

HIS222 - War and Society: Antiquity to 1800

Description

A survey of warfare during the ancient, medieval, and early modern eras. Particular attention will be devoted to the evolution of military technology and the various ways that Western and non-Western societies adopted gunpowder weaponry.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

HIS223 - Modern War & Society

Description

This course will introduce students to the history of warfare in the modern world. It will focus on the modernization of military technique and technology among Western societies, and also on the various ways non-Western societies encountered this new and evolving way of war- either falling victim to it or importing and emulating it with varying degrees of success.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

Campus Programs

HIS235 - Modern Russia

Description

This course studies Russian/Soviet history from 1905 to the present with an emphasis on revolutionary traditions, government and politics, culture and religion and social philosophy.

Additional Information

Not available every semester.

Credits

3

Academic Level

Undergraduate

HIS238 - Modern Germany: 1871 - Present

Description

An introduction to modern German history, covering the period from 1871 to the present. Topics include unification under Bismarck's leadership, Germany's role in World War I and World War II, and postwar division and reunification.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

HIS240 - World War I

Description

The course will begin with an overview of how warfare evolved during the industrial era, not just in terms of technology and tactics, but doctrinally, socially, and economically. It will then examine nineteenth- and early-twentieth-century diplomacy, along with the underlying and immediate causes of World War I. Chronological and topical treatments of the war's conduct will follow. The course will conclude with in-depth discussion of the war's aftermath, focusing on the peace settlements and the formation of new political orders in Europe and elsewhere.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

HIS241 - World War II

Description

This course emphasizes the battles, campaigns, events and personalities that dominated World War II. Special attention is given to political and diplomatic factors during the 1930s which contributed to the outbreak of World War II.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

Campus Programs

HIS242 - The Cold War

Description

This course examines the origins, development, and consequences of the Cold War as an ideological, cultural, economic, military and political struggles that concentrated the energies of two nuclear "superpowers" while fundamentally reshaping the way that scores of nations interacted with each other. As the Cold War often manifested itself in any number of proxy conflicts, this course approaches the topic from a global perspective, paying special attention to the Cold War as an international phenomenon.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

HIS245 - United States History since 1945

Description

An examination of the United States in its rise to global power in the aftermath of World War II. Central to the course are the international and domestic realities of the Cold War, particularly the struggle for equal civil rights within the United States. The course will examine the post-Cold War world as well, examining the transition to the domestic and international challenges of the 21st century.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

HIS249 - The Common Good

Description

This course will examine a fundamental historical group: its commitment to the common good. It operates from the thesis that all organizations and societies share certain characteristics in regard to the common good that, despite differences in time, place, and ideology, remain the same. As such, the course seeks to understand the dynamics of the common good - what it is comprised of, how various communities have embraced or rejected it, and what the consequences were of those choices.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

Campus Programs

HIS254 - Civil Rights Movement

Description

Beginning with the rise of Jim Crow laws in post-Civil War America, this course examines the efforts of Americans, particularly black Americans, to uproot the race-based segregation and exclusion that defined American society. In particular, it will examine the efforts of the post-World War II generation of black Americans to upend segregation with all manner of efforts, from non-violent resistance to the threat of open violence to the advocacy of a new kind of Black Nationalism

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

HIS259 - Silk Roads and Samurai

Description

An overview of the societies and cultures of China and Japan (and to a lesser extent, Korea) before 1600 C.E. through primary and secondary sources. Because East Asia developed in relative isolation from the West one goal of this course is to point out and study distinctive aspects of "East Asian civilization." A second goal is the study of the relationship between the evolution of China and Japan. Since China has the oldest identifiable civilization in the region, we will spend somewhat more time on Chinese history.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

HIS260 - Modern China

Description

A survey of Chinese history, beginning in the mid-1700s and continuing to the present. Topics include the decline and collapse of the Qing Dynasty, the Chinese Republic's struggle for survival, and the transformation of China into a communist state.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

Campus Programs

HIS264 - Modern Japan

Description

An introduction to the history of Japan from the late 1700s to the present. Topics include the decline of the Tokugawa Shogunate, the Meiji Restoration, the militarization of Japan during the world wars, and the country's postwar recovery and economic modernization.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

HIS270 - American Environmental History

Description

The course examines the history of the American environment, paying particular attention to the impact of European settlement on the landscape and the subsequent commodification of resources that defined the American experience in the modern age. It will pay close attention to such phenomena as industrialization, pollution, population trends, urbanization, chemically-dependent food production, and energy consumption, to name only a few. Particularly important, the course will delve into the process of political responses to environmental and ecological challenges as they have evolved over time.

Additional Information

Course offered every third semester.

Credits

3

Academic Level

Undergraduate

HIS301 - World History and Culture

Description

This course is designed to offer the student a historical and cultural understanding of Africa, India, China and Japan, in their interactions with the western world. Recommended for majors in History and Social Studies Education with a concentration in History.

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

Campus Programs

HIS308 - Case Studies in Revolution

Description

This course will introduce students to case studies in key revolutions of the modern era. Examples will vary from semester to semester-and may involve the direct comparison of different revolutions-but each offering of the course will focus on a major transformative moment or process. At the instructor's discretion, "revolution" may be interpreted in its traditional sense of political upheaval (including, but not limited to, the American, French, Russian, and Chinese revolutions), but more abstract forms of socio-economic or cultural/intellectual transition may be considered as well (such as scientific, industrial, sexual, or digital revolutions, to name only a few possibilities).

Additional Information

Course offered every sixth semester.

Credits

3

Academic Level

Undergraduate

HIS309 - Dictators in the Modern Era

Description

This course will acquaint students in depth with examples of major dictatorships selected from the history of the 20th and 21st centuries. During this era, certain regimes have come to exercise unprecedented levels of control over their populations. What developments created the preconditions for these new forms of government? What historical impact have such governments had? The regimes under consideration will vary from year to year; possible case studies may include, but are not restricted to, Soviet Russia; Fascist Italy and Nazi Germany; Imperial Japan, Maoist China, and North Korea; and Latin American dictatorships, such as Cuba under Castro or Argentina under Pinochet.

HIS321 - The Ancient World of Greece and Rome

Description

This course will begin by looking at the heritage of Greek civilization and the thinkers who first struggled with the fundamental issues concerning mankind: life, love, suffering, courage, endurance and death. The course will continue with the immediate inheritors of Greek thought, the Romans. By assessing Roman achievements of empire building and expansion, students will discover a vital civilization that ruled the known world through the force of its armies and the attraction of its culture. The course will end with the development of Christianity and the fall of the Classical World. Required for majors in social studies education with a concentration in history.

HIS340 - Making History

Description

This course is founded upon a fundamental yet complex question; what is history? The course investigates this question by examining the various kinds of history; witnessing the myriad ways of communicating historical stories and arguments ranging from the scholarly monograph to the town square statue to the museum exhibit; and learning how historians of all types actually make history through close, rational analysis of historical sources. In the process students will learn that history is an ever-evolving craft, central to the life of every society.

HIS401 - Making History: Capstone

Description

The capstone experience asks students to examine the fundamental elements of how history is created by historians. It does this through critical examination of primary historical artifacts, popular and public historical interpretations, peer-reviewed analyses of historical phenomena, and scholarly narrative syntheses. Through examination, analysis, and discourse, students will learn how historical perspectives are created and consumed as an ever-evolving craft central to the life of every society. Students' examination of the nature of history will culminate in an original piece of historical research based on primary and scholarly secondary sources.

Additional Information

Offered in Spring Terms Only.

HOS492 - Experiential Learning

Description

Students pursuing the Bachelor of Science degree in Hospitality are required to complete industry related experiential learning experiences as a requirement for graduation. Students are encouraged to pursue diverse experimental learning opportunities within hospitality businesses. This is a non-credit course. For fall graduates, the documentation portfolio highlighting the development and improvement of student learning via industry work experiences is due on/before December 1. For spring graduates, the documentation portfolio highlighting the development and improvement of student learning via industry work experiences is due on/before March 15. Credit will not be awarded for work experience prior to admission into the Hospitality Program. Students enrolled in the BS four (4) year traditional degree program must complete 1,000 hours of experiential learning in the hospitality and tourism industry with a minimum of 200 hours in guest/customer contact services. Students enrolled in the BS degree in three program complete 750 hours of experiential learning in the hospitality and tourism industry with a minimum of 150 hours in guest/customer contact services. Students transferred from other programs in the sophomore year and enrolled in the BS degree program complete 750 hours of experiential learning in the hospitality and tourism industry with a minimum of 150 hours in guest/customer contact services. Students transferred from other programs in the junior or senior year and enrolled in the BS degree program complete 500 hours of experiential learning in the hospitality and tourism industry with a minimum of 100 hours in guest/customer contact services.

IT100 - Introduction to Information Technology

Description

This is the fundamental computer fluency course. It is designed to promote a working knowledge and understanding of computer information technology concepts, skills and capabilities that support academic and professionally related goals and requirements. Students learn about the application and science of information technology. Concepts to master include the fundamentals of computer information technologies along with issues that affect people today such as : Internet and other network technologies, web publishing, digital media, hardware, software, file and database management, information security, viruses, and spyware, social impact, as well as algorithmic thinking and the limits of computation. Students develop capabilities such a managing complexity, assessing the quality of information, collaborating and communicating using IT, anticipating technological change and thinking abstractly and critically about IT. Students develop computer-related skills in support of their college studies and career goals. This is accomplished, in part, by the mastery of word processing, spreadsheet, presentation, and database software.

IT205 - Digital Music

Description

This course introduces students to information technology and the music business. The primary theme of the course is to understand how information technology has transformed the music industry in the last five years. The course is part lecture and part lab work. During lectures, students will learn about topics such as waveform audio, data compression and sampling, digital signal processors and soundcards, audio file formats, MIDI, e-collaboration, and e-business. During lab work, students will learn how to use software packages to compose, record, and mix music, to put music on a CD, to design a CD package, and to use the Internet to market and distribute music CD's. The course includes a project which will culminate in the creation of a professional CD suitable for distribution. The course is designed for students who have an interest in music and IT, e.g. sound engineering, song-writing, or executive leadership in the music industry. An ability to play an instrument is not required.

Undergraduate

IT209 - Introduction to Robotics

Description

This course covers Introduction to Robotics, Applications of Robots, Return-on-Investment, Abstract Models, Controlling Robot Motion, Complex Motion, Robotic Sensors, Input / Output, External Sensors, Threads, Event Programming, Remote Communication, Remote Sensing, Behavior Programming, and Human/Robot Interfaces. Students will gain hands-on experience with emerging robot technologies, understand industrial applications of robots, and ramifications of human/robot interaction.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

IT210 - Business Systems Analysis and Design

Description

This course provides students with the necessary level of information technology education relative to understanding the uses and roles of information systems in business organizations. Students receive instruction on the information concepts and methodologies associated with the development of business information systems, and their effective application to the solution of business problems. Students learn the major issues of managing information technology in the contemporary business environment and the relationship between organizations' structures and information technology. Team approaches are utilized along with structured computer laboratories and cases using spreadsheet and database management tools. Writing intensive course.

Credits

3

Academic Level

Undergraduate

Campus Programs

IT213 - Humanoid Robots

Description

This course explores contemporary tools and principles of humanoid robots. Students will learn about the essential elements of humanoid robots. Students will review a variety of humanoid robots and their applications. Students will create scenarios in which a humanoid robot will be useful, create prototype behaviors for a robot application, and critique the application with respect to practicality, social impact, and ethics. Knowledge of computer programming is not required.

Additional Information

Offered every spring term.

Credits

3

Academic Level

Undergraduate

IT214 - Technology and Art

Description

This course is designed to look at the intersection of technology and art. The focus will be on how technology is currently being used to create art and how the technology works. Students will learn about different types of technology and have a chance to use them to create projects for the course.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

IT221 - Web-based Information Technology

Description

This course introduces students with web systems and a range of web technologies, both client-side and server-side. The course examines open-source/proprietary software, search engine architectures, web standards and standard bodies. The course covers the design, implementation and testing of web-based applications and the incorporation of a variety of digital media into these applications. The course also covers the cloud computing model of infrastructures and skills to maintain them.

Credits

3

Requisites

- Complete:
 - CS110 - Fundamentals of Programming (3)

Academic Level

Undergraduate

Campus Programs

IT230 - Software Development with C#.NET

Description

This course is designed to introduce C#, an event-driven, fully object-oriented, visual programming language. The course covers the Visual Studio.NET integrated development environment (IDE) while covering the basics of the C# language. Topics include input / output statements, arithmetic and logical operations, control structures, program modules (methods and classes) and arrays. Students will be involved in writing programs of increasing complexity throughout the course. This is a programming course.

Additional Information

Offered as needed.

Credits

3

Requisites

- Complete:
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

IT251 - Introduction to Unix/Linux Operating System

Description

This course provides an introduction to the structure and functioning of the UNIX operating system. It is designed to give students a solid foundation in the design and organization of the operating system and to teach the basic set of UNIX commands.

Additional Information

Offered as needed.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - IT201 - Computer Platform Technologies (3)
 - Complete:
 - CS113 - Introduction to Programming (3)
 - NOTE: Only students in the CSC major will take CS-113 in place of IT-201

Academic Level

Undergraduate

IT270 - Web Site Design

Description

This course serves as an introduction to creating interactive pages for the World Wide Web. Specifically, it will survey Internet concepts, network protocols and client-server communications. The course covers HTML, the language of the World Wide Web; the Document Object Model (DOM), essential to creating and manipulating elements of a Web page under program control; CSS, the syntax for building consistent styles and appearances across Web pages; and JavaScript, the programming language that cements the various technologies together to facilitate dynamic interactive elements.

Additional Information

Offered every year.

Credits

3

Academic Level

Undergraduate

Campus Programs

IT291 - IT Foundation Experience

Description

The IT Foundation Experience exposes students to a variety of fundamental skills and knowledge that solidify the core IT curriculum delivered in Year-1 of their program. This course provides the technology background and business applications in modern web systems. Students will learn Human-computer interaction (HCI) as a discipline concerned with the design, evaluation, and implementation of interactive computing systems. Students will develop interactive web pages and integrate them with web-based systems and mobile applications for hand-held devices. Topics include: principles of HCI, factors that determine a design's effectiveness, dynamic web concepts and implementation techniques using both markup languages, style sheet and scripting.

Credits

2 - 4

Academic Level

Undergraduate

IT315 - Object Oriented Analysis and Design

Description

This course develops software systems engineering principles combining object-oriented design principles and methods augmented by computer assisted engineering (CASE) technology. The course involves use of the unified modeling language (UML) and, through the vehicle of a student group project, applies these elements to the system development life cycle. This course is writing intensive, as student project teams are required to submit a comprehensive project report and a PowerPoint presentation. Specialized Systems Development Computer Laboratory intensive and open laboratory intensive. Writing intensive course.

Additional Information

Offered every year.

Credits

3

Requisites

- Complete 1 of the following
 - Complete:
 - IT145 - Foundation in Application Development (3)
 - Complete:
 - IT201 - Computer Platform Technologies (3)
 - CS110 - Fundamentals of Programming (3)

Undergraduate

Campus Programs

IT330 - Database Design and Management

Description

This course covers the design and implementation of information systems within a database management system environment. Students will demonstrate their mastery of the design process acquired in earlier courses by designing and constructing a physical system using database software to implement logical design. Topics include data models and modeling tools and techniques; approaches to structural and object design; models for databases (relational, hierarchical, networked and object-oriented designs) CASE tools, data dictionaries, repositories and warehouses, Windows/GUI coding and/or implementation, code and application generation, client-server planning, testing and installation, system conversion, end-user training and integration and post-implementation review.

Additional Information

Offered every year.

Credits

3

Requisites

- Complete:
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

IT340 - Network and Telecommunication Management

Description

This course provides an in-depth knowledge of data communications and networking theory, concepts and requirements relative to telecommunications and networking technologies, structures, hardware and software. Emphasis is on the concepts of communications theory and practices, terminology, and the analysis and design of networking applications. Management of telecommunications networks, cost-benefit analysis and evaluation of connectivity options are covered. Students can design, build and maintain a local area network (LAN).

Additional Information

Offered as needed.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - IT201 - Computer Platform Technologies (3)
 - 1 of the following:
 - IT210 - Business Systems Analysis and Design (3)
 - IT105 - Business Information Technology (2)
 - IT200 - Fundamentals of Information Technology (3)

Academic Level

Undergraduate

Campus Programs

IT361 - Systems and Network Administration

Description

This course introduces students with the tasks and skills required to perform as a system administrator of operating systems, like Microsoft Windows and Linux systems, and to support a network infrastructure. Topics to be covered include: booting, process control, the file system and permission, managing users and resources, backups, upgrading, configuration management, networking, the network file system, troubleshooting, server architecture, administration, storage, network attached storage improvements, and disaster recovery.

Credits

3

Requisites

- Complete:
 - IT221 - Web-based Information Technology (3)
 - IT340 - Network and Telecommunication Management (3)

Academic Level

Undergraduate

IT375 - Digital Graphics Design

Description

This course presents digital graphic theory and develops skills that meet the design and technical requirements of professionally created digital images for World Wide Web commercial applications on a variety of platforms and Internet appliances. Each student develops a professional portfolio consisting of printed as well as CD-ROM material. Students also develop working Web sites that display their graphic design projects. Topics include design strategies, Web authoring environments, color calibration and aesthetics, special HTML tags, image mapping, style sheets, digital cameras and scanners, GIF animation and an introduction to Dynamic HTML.

Additional Information

Offered as needed.

Credits

3

Requisites

- Complete:
 - IT100 - Introduction to Information Technology (3)

Academic Level

Undergraduate

IT380 - Cybersecurity and Information Assurance

Description

This course explores the basic concepts in cybersecurity and information assurance. Topics include security policies, models, and mechanisms for secrecy, integrity, and availability of communications and information. The course also covers approaches to prevent, detect and recover from the loss of information, cryptography and its applications, vulnerability scanning, functions of a chief security officer software applications and web services for maintaining information security and security in computer networks and distributed systems.

Additional Information

Offered as needed.

Credits

3

Requisites

- Complete:
 - IT201 - Computer Platform Technologies (3)

Academic Level

Undergraduate

Campus Programs

IT385 - Information Technology Communications

Description

The course focuses on the essential oral and written communication tools and strategies used when communicating in technology organizations, emphasizing on how to make information more usable and accessible to multiple audiences. Students will review how to develop functional specifications and proposals, training programs, technical illustrations, and web information architecture.

Credits

3

Academic Level

Undergraduate

IT390 - Mobile Application Design and Development

Description

This course focuses on the techniques and tools necessary to achieve successful system implementation of mobile applications. Topics covered include managing the system implementation process, implementation design issues, how mobile application development is affected/constrained by existing software, techniques for writing quality code, techniques for testing code, understanding the role of proper documentation, and understanding, designing and managing implementation support functions. Students go through all the steps necessary to code, test and develop an actual mobile application. The course consists of a mix of lectures and hands-on laboratory work.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:
 - IT135 - Interactive Scripting in Virtual Environment (3)
 - IT145 - Foundation in Application Development (3)
 - Complete 1 of the following
 - 1 of the following:

IT391 - IT Integration Experience

Description

The IT Research and Integration Experience exposes students to the current research trend in technology and engages them to integrate curricula delivered in Year-2 of their program into applied research in technology. This course exposes students to basic research techniques and methodology in information technology, and engages in a technical research on contemporary topics. Students synthesize past course work, knowledge, skills, and experiences in order to research and study a scholarly Information Technology topic. Student may choose a topic, with the consent of the instructor, to research in depth. The course results in each student producing a final written product - a research thesis, along with a public oral presentation of the thesis. Writing Intensive.

Credits

2 - 4

Requisites

- Complete 1 of the following
 - Permission of Instructor
 - Complete:
 - IT291 - IT Foundation Experience (2 - 4)

Academic Level

Undergraduate

IT412 - Cyberlaw and Ethics

Description

This course stresses the social and professional context of IT and computing related to ethical codes of conduct. Students will examine the historical, social, professional, ethical, and legal aspects of computing in the 21st century.

Credits

3

Requisites

- Complete:
 - SOC335 - Technology and Society (3)
 - IT340 - Network and Telecommunication Management (3)

Academic Level

Undergraduate

IT450 - Artificial Intelligence

Description

This course explores contemporary tools and principles of artificial intelligence that focus on Web commerce applications and business intelligence in particular. Topics include mining data for business intelligence and collaborative software agents that utilize resources on the Web to carry out tasks for individuals and organizations.

Additional Information

Offered every spring term.

Credits

3

Requisites

- 1 of the following:
 - IT135 - Interactive Scripting in Virtual Environment (3)
 - IT145 - Foundation in Application Development (3)

Academic Level

Undergraduate

Campus Programs

IT467 - Digital Commerce and eBusiness

Description

This course is a comprehensive survey of the principles, techniques and implications of digital commerce and e-business. It covers the entire spectrum of Web-centric forms of communication and trade among commercial, industrial, institutional, governmental, employee and consumer participants and partners. Topics include: e-business models, security, privacy, ethics, major Internet tools and architectures behind digital commerce. Students use a Web development tool to build and post a site.

Additional Information

Offered as needed.

Credits

3

Requisites

- 1 of the following:
 - IT210 - Business Systems Analysis and Design (3)
 - IT105 - Business Information Technology (2)

Academic Level

Undergraduate

IT481H - Trends in Computer Information Technology Honors

Description

This course is about mastering tools to create charts and graphs in the service of business decision making. Many business decisions are based upon supporting data and their analyses. The presentation of data in support of decisions is as important as understanding what the data analyses tells us. Businesses need employees who are able to communicate powerfully in order to reveal trends and explain underlying data. Students learn how to customize Excel charts that show trends, differences, and relationships. They learn how to effectively create stock analysis charts, pivot tables, and pivot charts to analyze large data sets. In addition to learning advanced charting features such as mixing two chart types into a single chart and creating dynamic charts, students learn how to use Excel Sparklines and data visualization techniques associated with conditional formatting in worksheet cells. Students learn how to plot data geographically on maps and know when someone is trying to deceive with charts. Case studies are utilized in the course.

Credits

3 - 6

Requisites

- Complete all of the following
 - Complete:
 - IT210 - Business Systems Analysis and Design (3)
 - Must be enrolled in 3 Year Honors program.

Academic Level

Undergraduate

IT485 - Information Technology Strategy and Management

Description

This course presents the principles and concepts involved in the management of organizational information technology resources. It includes CIO functions, information technology planning, project management, legal and professional issues and the strategic impact of information technology systems. Offered every year. Writing intensive course.

Credits

3

Requisites

- 60 credit(s).

Undergraduate

IT491 - IT Application Experience (Capstone)

Description

The IT Capstone Application Project Experience give students the opportunity to apply the knowledge acquired in the core areas of information technology in their entire program. This course provides students with a summative capstone experience where students gain integrated skills across the curriculum and articulate their professional goals in relation to their studies. The course reinforces the foundational aspects of information technology concepts, languages, tools, and resources. The course includes an integrated project in which student teams apply their knowledge and skills in IT/business alignment, requirements analysis, security requirements, modeling, software engineering, implementation, computer networks, database, and project management. Teamwork and hands-on design and development are essential components of the course.

Credits

2 - 4

Requisites

- Complete 1 of the following
 - Permission of instructor
 - Complete:
 - IT391 - IT Integration Experience (2 - 4)

Academic Level

Undergraduate

IT500 - Information Technology

Description

This course focuses on the many ways information technology is incorporated within contemporary organizations and used to achieve a competitive advantage in the national and international marketplace. The interrelationships between information technology, management and organizations are emphasized. Management of the system development process and the tools and methods used to produce quality information systems also are studied. IT 500 cannot be taken for credit or as an elective if IT 510 has been completed.

Credits

3

Academic Level

Graduate

Campus Programs

IT505 - Core Technologies

Description

This course familiarizes students with the basic concepts of information systems to strengthen their knowledge of hardware and software systems, including supporting information technology infrastructures. Students will gain an understanding of the application of fundamental information technology competencies related to computer networks, software and delivery systems for delivering products and service within an enterprise to customers, suppliers and clients. Additionally, students examine the skills and dispositions that shape their professional identities.

Credits

3

Academic Level

Graduate

IT510 - Advanced Information Technology

Description

This course focuses on the principles and practices underlying the analysis, design, implementation and management of information technology systems. Topics include information system development methodologies, systems planning, requirements analysis, systems implementation, software engineering, project management, and interface, database and process design.

Credits

3

Academic Level

Graduate

IT511 - Object Oriented Application Development

Description

This course provides a comprehensive introduction to the principles and practices of object-oriented software development and provides a foundation for developing quality software. Students develop skills in applying object-oriented concepts to solve software problems and implement solutions. The course also teaches the concepts and design of algorithms for problem solving and includes the topics of data structures as they are related to the algorithms that use them. The course provides the technical foundation necessary to handle the material covered in the subsequent IT courses.

Credits

3

Academic Level

Graduate

IT515 - Innovations in Information Technology

Description

In this course, students strengthen their understanding of leadership theory and ethical frameworks in the context of a technology enterprise. Students will apply this understanding to business cases that reflect the need for innovative technology solutions in today's workplace in order to transform the thinking of an organization when change is required or to develop ideas that enable new business strategies.

Credits

3

Academic Level

Graduate

Campus Programs

IT520 - Technical Communication

Description

The course focuses on the essential oral and written technical communication skills needed for producing technical documentation and presentations in many different forms for varying business situations. The course enables students to understand the needs of stakeholders in order to develop different technical documents such as white papers, design specifications, project plans, test plans, user manuals, etc. The ability to communicate research findings using appropriate academic formatting will also be addressed.

Credits

3

Academic Level

Graduate

IT600 - Operating Systems

Description

This course focuses on computer architecture and the operating systems of digital computers. Students learn about the operational methods of hardware; the services provided by operating systems' software; acquisition, processing, storage and output data; and the interaction between computers. Topics include widely used operating systems such as DOS, Windows, and UNIX.

Credits

3

Requisites

- Complete:
 - IT510 - Advanced Information Technology (3)

Academic Level

Graduate

IT625 - Information Technology Project and Team Management

Description

This course introduces the students to the principles and practices necessary to be an effective IT project manager. The course covers project scope, time, cost, quality and human resource management techniques as applied to the kinds of project management problems and issues unique to the IT environment. Students learn how to design an actual IT project structure and will obtain hands-on experience using project management software. Emphasis is on the techniques of project management, leadership, teamwork and project risk management as applied to the IT environment. Case work is an important part of this course.

Credits

3

Academic Level

Graduate

IT640 - Telecommunications and Networking

Description

Telecommunications is a business resource that must be well managed. This includes the technical aspects and the application of telecommunications technology to solve specific business problems and enhance the strategic position of a business enterprise. Topics include the importance of telecommunication in today's business environment, the analysis, design and implementation of telecommunications systems, the scope of the telecommunications industry and current trends; telecommunications hardware, the Open Systems Interconnection (OSI) network model, networking technologies and telecommunications software, protocols and standards.

Credits

3

Academic Level

Graduate

Campus Programs

IT647 - Website Construction

Description

This course is an introduction to the construction of interactive websites. It involves technical issues such as standards, HTML/XML, scripting, embedded rich media, and database connectivity, and design issues such as audience analysis, content organization, accessibility, page layout, styling and templates. The course focuses on designing websites with creative interfaces, aesthetic style, functional structure, and navigation.

Credits

3

Academic Level

Graduate

IT650 - Principles of Database Design

Description

This course is a study of the design, development and implementation of database management systems (DBMS) that emphasize relational DBMS architecture using SQL. Students will design and implement projects and complete case exercises as they are introduced to new developments in database design.

Credits

3

Requisites

- Complete:
 - IT510 - Advanced Information Technology (3)
 - IT511 - Object Oriented Application Development (3)

Academic Level

Graduate

IT665 - Client/Server Systems

Description

This course focuses on the elements and methodologies used in the development of client server applications. Students design and build client applications that manipulate data in a shared database environment on a network. Topics include user interface design, object-oriented design, data management and data security. Theoretical concepts are reinforced with applications. The course is project-oriented, with students implementing projects using a front-end application development language.

Credits

3

Academic Level

Graduate

Campus Programs

IT700 - Capstone in Information Technology

Description

This capstone course is the culminating experience for the M.S. in Information Technology program. The aim of the capstone is to assess students' ability to synthesize and integrate the knowledge and skills they have developed throughout their coursework, rather than introducing new concepts. This course is structured to support student success in fulfilling program requirements.

Credits

3

Requisites

- Complete all of the following
 - 30 credit(s).
 - Complete:
 - IT650 - Principles of Database Design (3)

Academic Level

Graduate

IT710 - Information Technology Internship

Description

This course is to enable the School of Business graduate students to gain valuable work experience within the field of Information Technology. The objective is to give the students an opportunity for practical application of Information Technology business concepts learned in classes and complement the course work taken. Secondly, internships offer the opportunity to develop crucial job searching skills, explore career interests, enhance your resume, make contacts in your chosen field and build references for future employment. Each intern will work in a career-related position during the academic term for which the student is enrolled for the internship - completing a minimum of 150 hours on the job per 3 credits.

Credits

3

Requisites

- Complete all of the following
 - 18 credit(s).
 - Grad Internship only
 - Instructor permission required
 - CDC Approval

Academic Level

Integrated Health Profession

IHP420 - Ethical and Legal Considerations of Healthcare

Description

Students in this course examine the role of health care policy and legal, regulatory, and quality control in ethical decision making in healthcare. Students explore concepts and principles of health care policy, legal control, ethical conduct, and regulatory environments and their application to the health care environment. The impact of health care policy and multicultural, socioeconomic, political, legal, and regulatory factors on health care systems is explored.

Credits

3

Academic Level

Undergraduate

Campus Programs

IHP430 - Healthcare Quality Management

Description

The goal of this course is to introduce students to the management of operations and explore how healthcare organizations can use advance methods to improve healthcare processes, delivery, and outcomes. Specific focus will be on analyzing cycle times (e.g., patient wait times), measuring productivity, streamlining process flows, tracking outcomes and performance metrics, and generally improving health management processes and health outcomes. The process improvement will be measured by how it can improve quality of care and safety of healthcare delivery, reduce waste, and reduce costs. The role of technology and innovative approaches in improving continuing quality improvement in healthcare delivery will be presented.

Credits

3

Undergraduate

Integrated Studies

IST395 - DRIVEN: Leadership in Action

Description

In this course, students will earn credit for their work in a specific leadership role on campus when there is a department initiated course that accompanies that experience. The course may be 8 or 16 weeks and credits can vary based on course requirement. The course will generally adhere to the following eligibility requirements: - The students has been selected for a specific leadership role on campus - This role requires students to be responsible for leading or managing their peers through facilitation, program planning, organizing group activities, etc. - There are a minimum of 10 students in the same leadership role who could create the course cohort - The student is required to enroll in a course in order to fulfill this role for credit

International Business

INT105 - International Business: A Macro Perspective

Description

This course is designed to provide students with an introductory exposure to the essential elements of international business. In a contemporary modern economy, businesses operate in a highly integrated global market where factors of production are mobilized within and across the borders. Accordingly, business decisions made in local settings require a keen understanding of global the context of the business transcending the domestic boundaries. This course provides a conceptual foundation for International Business with an emphasis on hands-on activities and applications. The course promotes understanding of international dynamics affecting domestic and international businesses. It introduces a framework to explore the environment of international business operations through a comparative analysis of economic, political and sociocultural systems. As an introductory course, it focuses on the internationalization of operations of SMEs and MNCs across diverse geographic, political, economic and cultural boundaries. A practical country entry analysis is an integral part of the course that allows students to explore the complexities and risks encountered in diverse boundaries.

INT113 - Introduction to International Business

Description

This course is the foundation for business in a global context with an emphasis on applications. It offers a survey of fundamentals and principles of management in the context of globally oriented firms and primarily presents an assessment of the differences between business in domestic and international context. The course explores fundamental issues in business in an increasingly interdependent world; including management principles and techniques in a global context. Themes constituting fundamentals of international business such as economic, political, cultural and social environment of business; organizations that facilitate international business and organizational structures; trade theory; government influence on trade; international business modalities and entry strategies into foreign markets, global financial system as well as the emerging issues related to international business; are also explored.

Credits

3

Academic Level

Undergraduate

INT203 - Information Technology & Globalization

Description

Exploration of the fundamental processes underlying globalization with particular emphasis on the role of technological development in both historical and contemporary context. Globalization is a complex process marked by intensified transnational flows of people, information and goods and services. This course examines the role of information technology as a key feature and facilitator in the globalization process with a particular emphasis on international business and commerce. We analyze and explore the ways technology shapes contemporary social and economic changes in a global context.

Credits

1

Requisites

- Complete:

Campus Programs

INT221 - Global Financial System

Description

This course is designed to familiarize students with global financial architecture and the modus operandi of global financial markets and multinational financial institutions, with the focus on policy- and concept-oriented issues in international banking and international capital markets. It aims to provide a comprehensive background to understand the international financial environment and to expose students to a wide range of international financial functions, operations and products.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

INT222 - Trade Finance

Description

This course introduces the basic elements of international trade finance methods and the circumstances under which they are used. A wide range of trade finance methods and products including documentary collections, variety of letters of credit, bonds/guarantee/standby letters of credit are explored. The course also offers a framework to assess the risk for international trade transactions and strategies to minimize such risk. This course provides knowledge related to the Certified Global Business Professional exam offered by NASBITE International.

Credits

INT330 - International Public Administration

Description

This course is designed to introduce students the fundamentals of public administration, which is associated with the development and implementation of public policies and programs. Students will be familiarized with the concepts and cases from political, managerial, and legal perspectives from both a domestic and international perspective. Furthermore, students will learn about governance, public policies, and institutional-based programs at the local, state, national and international arenas. Upon conclusion of the course, students will have competencies in understanding of the historical development of the discipline, how public administration differs from the private sector, and key administrative elements including, politics, intergovernmental relations, ethics, organizing, planning, decision making, budgeting and managing. Students will investigate public policy setting from a global perspective through case studies, web searches and classroom discussions.

INT380 - Global Practicum-I

Description

The Global Practicum-I is the second year non-seat international business experience in the Three Year Degree Program in International Business. The course offers a broad exposure to geographic, commercial, political, economic and cultural attributes to an economically significant region of the world, and a firsthand exposure to a selected country in the region through a structured 7 to 10 day international field trip. The primary goal of the Global Practicum-I is to consolidate and reinforce functional/disciplinary practice in a non-classroom setting, and to relate this experience to discipline based knowledge acquired in the second year of the Three Year Degree Program in International Business. Students will be given opportunities to synthesize and integrate functional knowledge into practice in an experiential setting. The course is designed to provide the three-year students majoring in international business with a systematic foundation in the analysis, formulation and implementation of international business knowledge and skills in the context of a selected region of the world. IB students examine the forces underlying the political and economic dynamics in the region and the selected country. Through an in depth analysis of cultural, political and economic factors, students learn about critical strategic issues and operating challenges as well as business conditions in the region and the selected country and develop perspectives on managerial issues and essential skills for success. The exposure and the experience gained in this course is intended to offer IB students the opportunity to develop crucial job searching skills, explore career interests, enhance their resume, and to make contacts in the student's chosen field as well as to build references for future employment. It is formulated to be an integrative experience enabling students to synthesize and apply the theories and concepts learned previously in the required international business courses in a macro and micro context.

INT481 - Global Practicum-II

Description

This third year experiential learning course is the second course of its kind required for the Three Year Degree Program in International Business. Although both courses submerge in the functional/disciplinary goals of the international business program, the first course INT-300 Global Practicum I takes on a macro approach by focusing on the experience and research related to country and/or region involved in the study, and this course maintains a micro stance by making the central theme the firm and its international operations. With the firm being the central focus, all other related international business processes will be studied and analyzed in relation to the firm and its international operations. In the first semester of the course students will gather data and other relevant information by conducting expansive research and make analysis of the research conducted. In addition, students will prepare for the second half of the course which will entail a country visit. Students will be exposed to firm related subjects in three interrelated segments: (1) Firm strategy and international market opportunity assessment of the firm located in the country to be visited; (2) Firm's operations in international markets and patterns of market entry; and (3) Understanding and analysis of the country's infrastructure, political economic and financial institutions, as well as economic integration/s that it may be a member of by visiting local institutions in the country. Upon completion of all activities, students will make assessment of firm activities based on the guidelines. These experiential learning activities will enable students to gain valuable insights into the firm and internationalization activities.

3

Academic Level

Undergraduate

Campus Programs

JUS215 - The Victim and the Justice System

Description

This course will examine issues surrounding the central character in a criminal act - the victim. Contents are designed to develop an understanding of what it means to be victimized, including the physical, psychological, and economic impact of crime upon victims, their families, and society in general. Special consideration will be given to specific victim populations (i.e. survivors of homicides, sexual assault, and family violence), secondary victimization by the criminal system, victim assistance programs, and future trends in this field. A full review of how the American justice system has responded to the needs of victims is part of the course content and includes a look at victim testimony at sentencing and parole and probation hearings, victim notification, Meghan's law, victim advisory and protection services, and other means in which the judicial system assures victim participation during the adjudicative phase.

Additional Information

Course offered every other spring term.

Credits

3

Academic Level

Undergraduate

JUS224 - Legal and Justice Research Methods

Description

A criminal justice exploration of the specialized methods and sources of legal and justice research in these areas. Justice publications and resources, case collections, computer-assisted research, constitutional materials, legal history, legal periodicals, legislative history, practice and procedures, and social science materials related to law. Application of legal research strategies will be required.

Credits

3

Academic Level

Undergraduate

JUS261 - Judicial Administration

Description

An examination of the American judicial system, highlighting state, local, and federal tribunals, including an assessment of their hierarchy, subject matter jurisdiction, and administration. Also reviewed will be judicial reasoning, judicial process and the chief personnel responsible for judicial operations. More particularly the course will expose the various phases inherent in civil and criminal litigation including the concepts of jurisdiction, venue, parties and the pleadings that guide advocacy. Typical case calendars and dockets will be examined throughout the course so that students may acquire a complete understanding of the litigation process.

Credits

3

Academic Level

Undergraduate

JUS305 - International Criminal Justice

Description

This course compares and contrasts the criminal justice system of the United States with the systems of other countries on a substantive and procedural basis. A thorough examination of other cultural models of law and justice in order that differences in justice processing and definition become apparent. Some emphasis is placed on international policing and legal enforcement, whether through INTERPOL, treaty or other regulation.

Credits

3

Academic Level

Undergraduate

Campus Programs

JUS309 - White Collar Crime

Description

This course considers crime committed by corporations as well as white collar criminals; how such crimes are defined, who commits or is victimized by it, which moral, ethical, legal and social contexts promote it and how society responds. Procedural and policy considerations in the investigation and enforcement of relevant statutes will also be covered, including the concept of legal privilege, the role of the grand jury and other pre-trial processes, evidentiary questions, litigation strategies, and potential sanctions and other punishments.

Credits

3

Academic Level

Undergraduate

JUS325 - Law, Justice and Family

Description

A full-fledged review of the justice system's response to the establishment and maintenance of family in the American culture. How the family is defined, its heritage of rights and protections and the differentiated roles of parent and child are central considerations. Further review includes a look at family dissolution, divorce, custody and support disputes and the ongoing problems of visitation. The emerging problems of spousal and child abuse will be keenly analyzed and how the legal systems provide protection from these abuses will be closely scrutinized.

Additional Information

Course offered every other fall term.

Credits

3

Academic Level

Undergraduate

JUS331 - Juvenile Justice System

Description

This course covers the juvenile justice system, with special emphasis on the way it procedurally differs from adult offender adjudication. The parts of the juvenile justice system, hearings, due process standards and constitutional mandates are fully reviewed. Status offenders and other youth classifications are considered, together with a historical summary of juvenile court philosophy. New trends in the procedural disposition of juveniles especially transfer to adult jurisdiction, types of punishment, suitability of the death penalty are discussed.

Additional Information

Offered every spring term.

Credits

3

Academic Level

Undergraduate

Campus Programs

JUS345 - Probation and Parole

Description

This course examines the theory and practices of probation and parole with juvenile and adult offenders, including: release philosophy, bail and petition, hearings on grant, revocation or denial, alternative community based corrections and legal issues that emerge in award revocation or imposition of probation and parole.

Additional Information

Course offered every other fall term.

Credits

3

Academic Level

Undergraduate

JUS375 - Criminal Law

Description

An introduction to substantive criminal law that reviews the social, philosophical, and legal foundations of criminal codification. In addition, the course covers the historical development of criminal law in the U.S. Other subject matters include parties to crimes including principals/accessories, criminal capacity, criminal elements, e.g. mens rea, actus rea, and the specific crimes against person, property, and public order. Lastly, the course captures criminal law from the defendant's perspective by reviewing the accuser's mental states, potential defenses and uses of mitigation.

Credits

3

Academic Level

Undergraduate

JUS376 - Criminal Procedure

Description

A procedural law course which includes a review of the law of arrests, search, and seizure, the making of bail, adjudication, pre- and post-trial activities and the nature of plea bargaining. Substantial emphasis is given the constitutional protections afforded through the Bill of Rights, particularly the 1st, 4th, 5th, 6th, 8th, and 14th. The course deals extensively with case law applications of these principles and the role of judge and jurist in the crafting of criminal process standards.

Additional Information

Offered every fall term.

Credits

JUS400 - Foreign Study in Criminal Justice

Description

A semester or summer based experience in a foreign nation, e.g. Ireland, Hungary, London, or Germany by enrolling in actual classes at a foreign host institution for purposes of credit. Class instruction relates to the study of law and justice and affords a comparative critique of foreign justice models. The experience consists of not only study, but also visitations to justice agencies, research, travel to historical and cultural locations and social activities. Credits awarded will vary according to course offerings, time and length of experience.

JUS455 - Legal Traditions

Description

This course encompasses a complete examination of the law, its origins, roots and underpinnings in a jurisprudential context. Coverage includes a focused examination of classical, medieval and contemporary legal thinkers. Problems of personal privacy, sexual freedom, procreative control, the imposition of penalties, and notions of good will be considered. Course participants will consider these questions: What is law? Is law related to religion and morality? What are the foundations of law in Western Culture? Can law, ethics and morality be differentiated? How can a legal system be just? Can law shape morality or does morality shape law? How does Western legal tradition resolve ethical questions such as abortion, suicide, euthanasia, and the death penalty? Is there a unified vision of law that consists of the good, of virtue and the idea of justice?

JUS485 - Forensic Law

Description

An interdisciplinary course covering law, criminal justice, science, and technological issues in the evidentiary arena. Coverage in the course provides a broad-based assessment of expert witnesses, microanalysis, pathological evidence, admissibility and investigatory practice, ballistics, fingerprints, vascar/radar, and photographic techniques. Contrasted with criminalistics, subject matter of this course is primarily evidentiary. More particularly, the course will delve into the rules of evidence, which guide the admissibility of forensic evidence in a court of law. Examination includes threshold tests for reliability and admissibility, qualification of witnesses competent to testify, scientific rigor required for admission and case law determinations on the use and abuse of scientific evidence.

LIT239 - Literature and the Mind

Description

This course explores the relationship between ideas of the mind and consciousness in literature. Long before Sigmund Freud, poets, playwrights, and novelists investigated the human experience of knowing and experiencing one's self. After Freud, new concepts of the mind have reshaped how we understand creativity in both writing and reading literature. This course will introduce you to the pleasure and insight of literature through a representative selection of literature by European and American writers, and will include selected readings in psychology. Topics may include madness, identity, melancholy, deviance, memory, or creativity.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

LIT241 - Crime Literature

Description

This course will examine one of the most popular and celebrated literary genres: crime literature. Literature may include selections from British, American, and global fiction, non-fiction, short stories, plays, and/or poetry. Literary selections may include several subgenres of crime literature, such as historical crime literature, true crime, hard-boiled fiction, psychopathology, the police procedural, and legal analysis.

Additional Information

Offered every spring term.

Credits

3

Academic Level

Undergraduate

LIT243 - Pop Fiction

Description

This course will analyze popular fiction. What makes a book a "best seller"? What makes literature sell in the millions of copies? Writers who strike it rich generally write books that are fast-paced and easy to read, following a set of conventions that readers recognize, and touch a nerve within their society. With a focus on current and past best sellers, this course will introduce you to a variety of literary sub-genres (true crime, romance, horror, memoir, road novel, extreme adventure, western, roots quest). The books we will read often return to themes of individualism, cultural difference, and violence in American culture-prominent elements in our psyches, popular culture, and pulp fiction. We will discuss, among other topics, how popular literature can help us understand the intersectionality of identity-especially issues of race, class, gender, sexuality, and ability.

Additional Information

Offered every spring term.

Credits

3

Academic Level

Undergraduate

Campus Programs

LIT247 - Gender and Text

Description

This course examines gender in and through literary texts, and considers the ways in which categories of sexuality, sex, race, class, ethnicity, nationality, religion, and other factors influence writers' depictions of gender. The course analyzes historical conditions relevant to gender studies, and may address social and theoretical topics such as women's suffrage, feminisms, third-world feminism, the LGBT and LGBTQ communities, and queer theory. The course analyzes these topics through the lens of literature and asks: how is gender represented in literary texts? how do literary texts not only replicate but sometimes contest or imagine new realities for gendered subjects? what does it mean to write as a gendered subject?

Additional Information

Offered every other year.

LIT309 - Romance, Revolutions, and the Birth of the Novel

Description

This course focuses on the "long 18th century" in Great Britain, covering the era of the Enlightenment as well as Romanticism. This was a tumultuous time in British history, marked by numerous political and social revolutions as well as notable literary creativity. In this course, students will study developments in English literature such as the novel, the essay, satire, journalism, popular theater, and poetry. Themes of the course will vary, but may include civil liberty, sexuality and gender, colonialism and abolition, the city and the country, industrialization, and the French Revolution. Authors studied may include Congreve, Defoe, Swift, Pope, Fielding, Wordsworth, Keats, Shelley, and Byron.

LIT311 - Modern British Literature

Description

This course will explore the modernist movement in 20th century British fiction through the works of three of its most prominent practitioners - James Joyce, D.H. Lawrence, and Virginia Woolf - as well as selected works by other writers. The course will examine the birth of the modern aesthetic in literature not only as a response to the alienation and despair resulting from World War I but also as a reaction to the enormous impact made by the ideas of such thinkers as Darwin, Freud, Marx and Nietzsche. Various modernist writing techniques, including stream-of-consciousness, episodic narrative and radical experimentation with punctuation, will also be studied.

LIT328 - Multi-Ethnic Literature: Describing the Hyphen

Description

Since the beginnings of American literature, writers have been concerned with defining and creating American identity through their art. Since the 1960s, during and after the Civil Rights movement, numerous writers have defined their American identity in relation to specific ethnic identities, writing works that explore how dual or multiple cultural identities coexist within themselves and within American culture, sorting through the stories they've heard and created about who they are. In this course, we will read fiction, poetry, and essays by twentieth-century American authors who identify with African American, Native American, Asian American, Jewish, Latino and Chicano heritages. In addition to race and ethnicity, we will discuss how class, native language, religion, gender, sexuality, and history figures into these writers' images of an American self and community.

LIT345 - Postcolonial Encounters

Description

Postcolonial Encounters focuses on the interdisciplinary aspects of literatures that have been historically silenced by the mechanisms of colonial powers. This course will attempt to retrieve from the margins those voices that Gayatri Spivak (following Antonio Gramsci) has called "subaltern." As such, our task will be to theorize the notions of power and powerlessness, margin and periphery, first and third world, nationality, race, identity, and globalization via the close readings of various postcolonial texts.

LIT350 - The Black Literary Tradition

Description

This course offers an overview of African-American literature, with glimpses into African and Caribbean literature. Beginning around 1845 with Frederick Douglass' Narrative, students will read from various literary genres, including slave narratives, poetry, short stories, fiction and plays that illuminate both the history of African America and changing ideas of race. Students will conduct ongoing independent research, which they will present to the class, on the major literary and historical periods we cover, including the Harlem Renaissance in the 1920s and early 1930s, the civil rights movement(s), the Black Arts movement of the 1960s and early 1970s and the decades following. Reading works by Booker T. Washington, W.E.B. DuBois, Zora Neale Hurston, Ralph Ellison, Gwendolyn Brooks, Chinua Achebe, Toni Morrison and Ishmael Reed, among others, will enable us to analyze how sexuality, gender, class and nationality influence various writers' definitions of race and ethnicity.

LIT485 - Senior Thesis in Literature

Description

This one-semester course is an option for seniors who are majoring in English language and literature and who wish to have a graduate level research and writing experience in some chosen area of American, British, or world literature. Before registering for the course, students must formulate a written thesis proposal and locate a thesis advisor and second reader among English Department faculty, equipped with relevant expertise. The proposal will then be submitted for approval to the individual's advisory committee. Assuming the project is universally approved, the student will meet with one or more members of the committee on a bi-weekly basis to review progress on research and written work. The final result will be a scholarly essay of 40-60 pages, to be presented as an academic paper in a public forum at least three weeks before graduation. This course may be repeated up to one time for credit.

Additional Information

Course by arrangement only.

LIT485A - Senior Thesis in Literature

Description

This course is an option for seniors of exceptional ability who are majoring in English language and literature and who wish to have a graduate-level research and writing experience in some chosen area of American, British or world literature. Students must petition to take the course. The following requirements are for undergraduate day campus students. Students who receive permission from the area coordinator/department chair and their academic advisors must proceed to formulate a written thesis proposal and assemble a three-person academic support committee, equipped with relevant expertise, no later than March 30th of the junior year. The proposal will then be submitted for approval to the individual's advisory committee. Assuming the project is universally approved, the student will meet with one or more members of the committee on a biweekly basis to review progress on research and written work. The final result will be a scholarly essay of 40 to 60 pages, to be presented as an academic paper in a public forum at least three weeks before graduation. Offered on an ongoing basis, as this is a yearlong course option. The following requirements are for undergraduate COCE students: Students who receive permission from their academic advisors must proceed to formulate a written thesis proposal to be submitted for approval to the selected instructor. If the project is approved, the student will collaborate with the instructor in the online course to review progress on research and written work. The final result will be a scholarly essay of 40 to 60 pages, to be presented to the instructor as a cohesive and polished academic paper with a supplemental essay that outlines plans to present/publish the paper after the course is complete. Offered on an ongoing basis, as this is, at a minimum, a two-term research and writing project.

Mandarin Language/Culture

Campus Programs

LMN111 - Elementary Mandarin Language/Culture I

Description

This beginning-level course introduces students to the speaking, listening, reading, and writing skills necessary for basic communication in Mandarin. Designed for students with no previous course work in Mandarin, this course focuses on reading and writing with the pinyin (phonetic) system; learning and practicing the radical simplified characters and related compounds; building vocabulary and practicing basic sentence patterns in communicative contexts; and pronunciation. Students will be expected to achieve approximately the mid-novice level based on guidelines published by the American Council on the Teaching of Foreign Languages (ACTFL). Finally, awareness of the cultures, behaviors, and traditions of the Chinese-speaking world will also be emphasized.

Additional Information

Offered every fall term.

MKT231 - Visual Merchandising

Description

Retail marketing is a highly charged, highly competitive component of the marketing discipline. Consumers everywhere and of every age and economic category, are well informed by internet sources. Driven by access and awareness, they are looking to be courted and enticed to buy one merchant's goods over another. Visual merchandising is the art and business of creating such attraction, using merchandise that is color coordinated, accessorized, sparkling, exciting, and causing shoppers to stop, take a closer look, and buy. Visual merchandising is retail theater at its best, complete with costumes, props, and sets. Like all marketing, however, visual merchandising has a clear purpose - sales- and therefore is strategic in nature, a component of a larger marketing picture. This course addresses the creative and strategic nature of visual merchandising, connecting students with both the flair and fancy of visual merchandising and the nitty-gritty of strategic planning, and clarifying the connection between them.

Additional Information

Offered every fall term.

MKT266 - Services Marketing

Description

Given the substantial shift in emphasis from a base in manufactured goods to a domestic economy based in services, as well as the interconnectedness of the global economy, comprehension of the service aspect of business is a necessity for every marketer, in every company, in every industry. Therefore, an understanding of the unique requirements of marketing services or service components has become a basic marketing skill. This course presents key concepts in the marketing of services through readings in current business publications and experiential opportunities. It addresses the global perspective of services, and both B2B and consumer service dimensions.

MKT270 - Professional Selling

Description

Selling is a real life skill that everyone uses every day no matter what the profession. The role of professional salespeople is to uncover the needs and wants of buyers in order to develop value-added relationships. This role is vital to the marketer as it entails creating value for and communicating value to the customer which positively impacts the success of an organization's marketing strategy. This introductory selling course focuses on the basic sales skills and tools necessary to become a successful professional salesperson. Although the topic of business-to-consumer (B2C) sales is addressed, the emphasis is placed on business-to-business (B2B) sales, the sales process and sales methodology.

Academic Level

Undergraduate

Campus Programs

MKT300 - Advanced Professional Selling

Description

The success of professional salespeople is dependent upon their ability to successfully convert prospects into customers by implementing effective sales techniques and the sales process at a deeper level. The course builds upon coursework completed in the Professional Selling course and explores various sales methodologies based on the complexity of the sale and the buyer's deciding journey. In this course, students develop their prospecting and sales skills by obtaining certifications in sales and sales software. They further refine their inter-personal communication and selling skills through live and simulated role-plays. The skills demonstrated in these role plays are assessed through the use of video feedback skill-development software. Students are also coached by upper-level sales students to prepare them for a local sales competition.

MKT310 - Negotiation in Professional Sales

Description

Negotiation is an art and a science. We use it every day to settle differences in order to achieve beneficial outcomes. The fundamental skill of negotiation is used on a personal level for complex purchases such as in obtaining a position in a company or purchasing a car or a home. It is also used by business professionals to influence each other in order to meet their own goals as well as those of their organizations. While this course is intended for those preparing for a career in Professional Sales, it is also one which will benefit students regardless of their major. Students will learn the principles, strategies and tactics of effective negotiation and develop and enhance their own negotiation skills. Topics include negotiation fundamentals, the negotiation process, negotiation techniques, strategies and tactics, distributive bargaining, integrative bargaining, as well as individual and team negotiation.

Campus Programs

MKT320 - Sales Force Management

Description

Effective management of sales people directly impacts the success of a marketing strategy and of the company in general. Consequently, it is imperative that sales managers develop the basic competencies to effectively manage and lead a business-to-business (B2B) sales force in order to meet the overall goals of the organization. This course enables students to develop these valuable competencies as well as business-related decision making skills in the areas of a successful sales force program. Emphasis is placed on sales potential and forecasting, sales force investment and budget, ethical and legal issues, emotional intelligence, account relationship strategies, recruitment, training, motivation, and compensation.

MKT326 - Global Consumer Culture

Description

Every day, everywhere in the world, people make decisions about what to wear and how to wear it. Daily dressing is about much more than clothing. It includes making choices of clothing, accessories and grooming. Its relationship to human nature is at once biological, social and aesthetic. As cultures and geography changes around the world, so too do the representations of that relationship become more diverse. Dressing thus represents a broad swath of widely differing actions and decisions. This course studies the way consumers worldwide choose their dress forms to represent who and what they are, and how they wish to express themselves those around them. It considers both commonalities and differences in global consumer cultures of dress.

MKT331 - Business to Business Marketing

Description

There are many key factors which make business-to-business (B2B) markets special and different from business-to-consumer (B2C) markets. Understanding these differences is not only beneficial but also critical for the Marketer's creation of successful, revenue-generating marketing strategies. This course helps students understand the complexity of business products, the buying dynamics of organizations, the level of professional selling required in the industrial environment, and the skills needed to meet the business target audience's needs. Students will develop the competencies to help drive business-to-business Marketing processes for growth. Topics include B2B markets, the business marketing mix, perceived value, supply chain, inter-organizational relationships and relationship marketing.

MKT678 - Brand Management

Description

Strong brands are increasingly recognized as one of a company's most valuable assets. Brands create expectations in consumers, and by their nature implicate the company in delivering on those expectations. Therefore, the tasks of creating, building and managing brands are critical success factors for a firm. This course seeks to develop in students an understanding of the theories, models, and strategies that enable a firm to achieve its branding goals. Through a combination of text and current research publications, students will be exposed to current and emerging brand theories and models. By analyzing cases, and reading and reviewing current business literature, students will gain understanding into how those theories and models translate into strategies and implementations.

MKT700 - Marketing Capstone

Description

This capstone course is the culminating experience for the M.S. in Marketing program. The aim of the capstone is to assess students' ability to synthesize and integrate the knowledge and skills they have developed throughout their coursework, rather than introducing new concepts. This course is structured to support student success in fulfilling program requirements.

MAT024 - Calculus I: Single-Variable Calculus Part A (STEM)

Description

This course is a developmental course for specified majors. Calculus is the mathematical study of change that has widespread applications in science, engineering, economics, and business. This course is the first half of a two-course series that provides a rigorous introduction to single-variable calculus with supporting materials from algebra and trigonometry. Calculus topics include limits, continuity, differentiation of algebraic and trigonometric functions, and applications of derivatives. This class will also include supporting topics from precalculus enforcing functions, transformations of functions, and families of functions. This course will encourage students to think beyond memorizing formulas and to work towards understanding concepts.

Campus Programs

MAT050 - Fundamentals of Algebra

Description

This course includes a review of basic arithmetic and an introduction to elementary algebra. Topics may include: pre-algebra review; real numbers; algebraic expressions; linear equations/inequalities; quadratic equations; graphing; systems of equations; exponents, polynomials and rational expressions. (Credits awarded for this course are in addition to the 120-credit minimum graduation requirement.)

Credits

3

Academic Level

Developmental

MAT051 - Prerequisite Mathematical Knowledge for Teaching

Description

This course is a developmental preparatory course for those students who are not able to pass the placement exam for MAT 107: Mathematical Knowledge for Teaching Elementary School. This course explores the mathematics content in grades K- 8. Topics include: Base Ten System, Fractions, Addition, Subtraction, Multiplication, Division, Ratio and Proportion, Number Theory, and Algebra.

Credits

Requisites

- Determined by math placement exam

Academic Level

Developmental

MAT101 - Culinary Mathematics

Description

This course reviews the fundamental computation skills required for accurate food service preparation, operation and management. Topics covered include operations with whole numbers, fractions, decimals, percents, weights and measures, recipe conversion, menu pricing, inventories, food costs basic break-even analysis, financial statement content, and employee related expenses.

Additional Information

Offered every fall term.

Credits

3

MAT106 - Math for Elementary Education I

Description

This is the first course of a two-semester sequence which explores the mathematics content in grades K-6 from an advanced standpoint. Topics include: problem solving; functions and graphs; and numbers and operations.

Credits

3

Requisites

- Placement in BA.ECE, BA.ELE, BA.ELE.SPED, BA.MSME, BA.MUE, or BA.SPED

Academic Level

Undergraduate

MAT107 - Mathematical Knowledge for Teaching I

Description

This course explores the mathematics content in grades K- 8 from an advanced standpoint. Topics include: problem solving, the base-ten system, fractions, addition, subtraction, multiplication, decimals, negative numbers, division, and ratios and proportions.

Credits

3

Requisites

- Complete 1 of the following
 - Must earn a minimum grade of C in the following course(s):
 - MAT051 - Prerequisite Mathematical Knowledge for Teaching (3)
 - Passing Score on Placement Exam

Academic Level

Undergraduate

MAT108 - Mathematical Knowledge for Teaching II

Description

This is the second course of a two-semester sequence which explores the mathematics content in grades K-6 from an advanced standpoint. Topics include: Number Theory, Algebra, Geometry, Measurement, Area, Solid Shapes, Geometry of Motion, Statistics and Probability.

Credits

3

Requisites

- Must earn a minimum grade of C in the following course(s):
 - MAT107 - Mathematical Knowledge for Teaching I (3)

Undergraduate

Campus Programs

MAT115 - Math and Society

Description

How do we wrap our heads around a trillion dollars? What are some of the pros and cons of the U.S. Electoral College? What is the best option for financing a car? What do the scientific data tell us about global warming? Through the exploration of questions like these, students in this course will learn how to manage numbers in everyday situations, apply appropriate mathematical tools to analyze data, make evidence-based conclusions, and effectively communicate their reasoning. Topics may vary based on the instructor, student interest, and current local and global issues, such as social, environmental, and health issues, personal finance, and politics. This course will encourage students to think critically about quantitative statements and information they encounter in everyday life.

Credits

Academic Level

Undergraduate

MAT130 - Applied Finite Mathematics

Description

This course is designed to prepare students for other courses in the core curriculum and in their majors and to provide a basis for making decisions in life after graduation. Topics include mathematics of finance, probability and counting, descriptive statistics and basic linear regression. (Students who have successfully completed MAT 120 or MAT 150 may not register for MAT 130).

Credits

3

Academic Level

Undergraduate

MAT135 - The Heart of Mathematics

Description

The Heart of Mathematics considers the history, mathematical beauty, and real world applications of a wide variety of topics. This discussion-based course encourages "out-of-the-box" thinking to explore the connections between mathematics and the world around us. Topics may include: patterns in nature, infinity, topology, geometry, networking, fractals, and chaos theory, among others.

Credits

3

Academic Level

Undergraduate

Campus Programs

MAT138 - Descriptive Statistics with Algebra

Description

This is the first of a 2-course sequence in introductory statistics and probability with a review of underlying algebra skills as needed. Students solve statistical problems and apply concepts to a variety of business and social science applications. Students learn how to solve statistical problems by hand and through the use of computer software. Topics include surveys and sampling; organizing and describing data; probability; and an introduction to discrete and continuous probability distributions. Together the content of MAT 138 and MAT 238 covers the content of MAT 240. Students may not take both MAT 138 and MAT 130 for credit.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

MAT140 - Precalculus

Description

This course emphasizes the algebra and concepts of functions. Students will learn the properties and graphing techniques for different types of functions including: linear, polynomial, rational, trigonometric, exponential, and logarithmic functions. Students will also learn to solve a variety of real world problems that rely on a number of different problem solving strategies and an understanding of these different types of functions. This course is intended for those students who wish to prepare for Calculus.

Credits

3

Academic Level

Undergraduate

MAT160 - Introduction to Game Theory

Description

Want to learn how to cut a cake in the most "fair" manner? Or why doping in sports has more in common with cigarette advertisement techniques than you might think? Take a jaunt into the field of game theory, where mathematical techniques help solve these and many more problems facing the realms of economics, psychology, political science, mathematics, biology, and poker. This course introduces the concepts of graphs, matrices, and probability, amongst others, and uses games as a backdrop. So, next time you want a winning strategy for Rock, Paper, Scissors, look no further!

Credits

3

Academic Level

Undergraduate

MAT206 - Math for Elementary Education II

Description

This is the second course of a two-semester sequence which explores the mathematics content in grades K-6 from an advanced standpoint. Topics include: descriptive statistics; probability; algebra; geometry and measurement.

Credits

3

Requisites

- Placement in BA.ECE, BA.ELE, BA.ELE.SPED, BA.MSME, BA.MUE, or BA.SPED

MAT210 - Applied Calculus I

Description

This is an introductory course in single-variable calculus. Topics include limits, continuity, derivatives, differentiation, integration and the Fundamental Theorem of Calculus. Students will gain experience solving real-world problems involving calculus, including problems in business, economics, natural sciences and social sciences.

Credits

3

Academic Level

Undergraduate

MAT224 - Calculus I: Single-Variable Calculus Part B

Description

Calculus is the mathematical study of change that has widespread applications in science, engineering, economics, and business. This course is the second half of a two-course series that provides a rigorous introduction to single-variable calculus with supporting materials from algebra and trigonometry. Topics include differentiation and integration of algebraic, trigonometric, exponential, and logarithmic functions, applications of derivatives, and integration, including the Fundamental Theorem of Calculus. This course will encourage students to think beyond memorizing formulas and to work towards understanding concepts.

Credits

3

Requisites

- Earned a minimum grade of C- in at least 1 of the following:
 - MAT024 - Calculus I: Single-Variable Calculus Part A (STEM) (3)
 - MAT124 - Calculus I: Single-Variable Calculus Part A (3)

Academic Level

Undergraduate

MAT225 - Calculus I: Single-Variable Calculus

Description

Calculus is the mathematical study of change that has widespread applications in science, engineering, economics and business. This course provides a rigorous introduction to single-variable calculus. Topics include limits, continuity, differentiation and integration of algebraic, trigonometric, exponential, and logarithmic functions, applications of derivatives, and integration, including the Fundamental Theorem of Calculus. This course will encourage students to think beyond memorizing formulas and to work towards understanding concepts.

MAT230 - Discrete Mathematics

Description

Discrete mathematics is the study of mathematical structures that are fundamentally discrete rather than continuous. That is, in contrast to the real numbers that vary continuously, the objects of study in discrete mathematics take on distinct, separated values. Topics include operations on sets, logic, truth tables, counting, relations and digraphs, functions, trees and graph theory. A significant goal of this course is to improve students' critical-thinking and problem-solving skills.

Credits

3

Academic Level

Undergraduate

MAT235 - Discrete Mathematics II

Description

Using the foundation of logic and set theory developed in MAT 230, this course explores theory and application in the areas of graph theory and enumeration. Topics include planarity, graph coloring, searching and sorting algorithms, network flows, generating functions, recurrence relations, and combinatorial games.

Credits

3

Requisites

- Must earn a minimum grade of C in the following course(s):
 - MAT230 - Discrete Mathematics (3)

Academic Level

Undergraduate

MAT238 - Inferential Statistics with Algebra

Description

This is the second of a two-course sequence in introductory statistics and probability with a review of underlying algebra skills as needed. Students solve statistical problems and apply concepts to a variety of business and social science applications. Students learn how to solve statistical problems by hand and through the use of computer software. Topics include continuous probability distributions, sampling distributions, confidence intervals, sample size, hypothesis testing, and regression. Together the content of MAT 138 and MAT 238 covers the content of MAT 240. Students may not take both MAT 238 and MAT 240 for credit.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Must earn a minimum grade of C in the following course(s):
 - MAT138 - Descriptive Statistics with Algebra (3)

Campus Programs

MAT240 - Applied Statistics

Description

This is a fundamental course in the application of statistics. In this course, students will learn to apply statistical techniques to a variety of applications in business and the social sciences. Students will learn how to solve statistical problems by hand and through the use of computer software. Topics include probability distribution functions, sampling distributions, estimation, hypothesis testing and linear regression.

Credits

3

Academic Level

Undergraduate

MAT241 - Modern Statistics with Software

Description

This is a fundamental course in modern day data, data visualization, and the application of statistical techniques to analyze and make inferences from sample data. In a world where data is being constantly collected, it is necessary for individuals to be data literate, to have exposure to the power of data, and to understand and practice proper and ethical statistical analyses. In a world where data has become abundant, rather than scarce, statistical tools are evolving. This course looks at modern statistical techniques in the age of "Big-Data".

Credits

3

Requisites

- Not completed nor concurrently enrolled in:
 - MAT240 - Applied Statistics (3)
 - MAT138 - Descriptive Statistics with Algebra (3)
 - MAT238 - Inferential Statistics with Algebra (3)

Academic Level

Undergraduate

MAT260 - Cryptology

Description

Cryptology is a mathematically rich subject that includes both cryptography - the science of making secret codes - and cryptanalysis - the science of breaking secret codes. Historically, cryptology has played a central role in military and government covert actions and modern-day data security. In this course, we develop a number of mathematical topics including modular arithmetic, statistics, probability, permutation functions, algorithms, binary numbers, base twenty-six, primes, factorization, the Euclidean algorithm, and Fermat's Little Theorem as they pertain to classical cryptographic techniques, symmetric computer-based cryptography, and public key cryptography. We also examine the historical backdrop of cryptology and examine legal issues concerning cryptology.

Additional Information

Offered every fall term.

Credits

3

Campus Programs

MAT275 - Calculus II: Integration & Series

Description

This course is a continuation of MAT 225 that deepens a student's understanding of single-variable calculus. Students will learn new techniques of integration, including substitution, integration by parts, partial fractions, and integration tables. This course will also extend a student's knowledge of addition. That is, students already know how to add two, three, or n numbers together but, in this course they will learn how to add an infinitely many numbers together. This will enable students to represent differentiable functions-including exponential, trigonometric and logarithmic functions-as functions that look like polynomials with infinitely many terms. In doing so, students will enhance their abilities to evaluate and estimate integrals. Finally, students will also learn about parametric curves and polar coordinates-both useful tools for describing the motion of moving objects such as projectiles, planets, or satellites-in order to apply single-variable calculus skills in additional settings. Students may not take both MAT 211 and MAT 275 for credit.

Additional Information

Offered every spring term.

Credits

3

MAT299 - Mathematical Proof and Problem Solving

Description

This course introduces students to the language and methods used to create and write mathematical proofs and solve problems. Methods of proof will include: direct, contrapositive, contradiction, and induction. Methods of problem solving will be based on Polya's four steps for problem solving. Students will learn about and utilize the many functions of proof including: verification, explanation, communication, discovery, justification, and inquiry. The course will also explore the relationship between problem solving and the process of proving. Students will explore fundamental abstract concepts in mathematics including: functions and relations, set theory, number theory, and logic.

Credits

3

Requisites

- Must earn a minimum grade of C in the following course(s):
 - MAT230 - Discrete Mathematics (3)

Academic Level

Undergraduate

Campus Programs

MAT300 - Applied Statistics II: Regression Analysis

Description

This is a second course in statistics that builds upon knowledge gained in an introduction to statistics course. Students will learn to build statistical models and implement regression analysis in real-world problems from engineering, sociology, psychology, science, and business. Topics include multiple regression models (including first-order, second-order and interaction models with quantitative and qualitative variables), regression pitfalls, and residual analysis. Students will gain experience not only in the mechanics of regression analysis (often by means of a statistical software package) but also in deciding on appropriate models, selecting inferential techniques to answer a particular question, interpreting results, and diagnosing problems.

Credits

3

Requisites

- Earned a minimum grade of C or better in at least 1 of the following:
 - MAT238 - Inferential Statistics with Algebra (3)
 - MAT240 - Applied Statistics (3)
 - MAT241 - Modern Statistics with Software (3)

Academic Level

Undergraduate

MAT310 - Number Theory

Description

This is an introductory course in Number Theory. The course will explore the properties of, and the relationship between, the natural numbers, integers, rational numbers, and irrational numbers. This course will explore and prove theorems related to topics in number theory such as: Pythagorean Triples, Divisibility, The Fundamental Theorem of Arithmetic, Congruences, the Chinese Remainder Theorem, Prime numbers, Modulo arithmetic, Pell's Equation, Diophantine's Approximation, and the Gaussian Integers.

Additional Information

Offered every third semester.

Credits

3

Requisites

- Must earn a minimum grade of C in the following course(s):
 - MAT299 - Mathematical Proof and Problem Solving (3)

Academic Level

Undergraduate

Campus Programs

MAT325 - Calculus III: Multivariable Calculus

Description

Many real-world applications of calculus in science, engineering, economics, and business employ functions with many variables. This course extends the basic concepts of single-variable calculus developed in MAT 225 and MAT 275 to functions of several variables. Topics include vectors, the geometry of space, vector-valued functions, motion in space, partial derivatives and multiple integrals.

Additional Information

Offered every fall term.

Credits

3

Requisites

- Must earn a minimum grade of C in the following course(s):
 - MAT275 - Calculus II: Integration & Series (3)

Academic Level

Undergraduate

MAT330 - Differential Equations

Description

Differential equations are useful in modeling real-world phenomenon involving rates of change such as the spread of disease, the change in a population, the free fall of an object, and the decay of a radioactive substance. This is a first course in differential equations. Topics include solving first- and higher-order differential equations and modeling with first- and higher-order differential equations.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete all of the following
 - Earned a minimum grade of C or better in at least 1 of the following:
 - Course Not Found
 - MAT275 - Calculus II: Integration & Series (3)
 - Must earn a minimum grade of C in the following course(s):
 - MAT350 - Applied Linear Algebra (3)

Academic Level

Undergraduate

Campus Programs

MAT350 - Applied Linear Algebra

Description

This is a first course in linear algebra and matrices. Topics include systems of linear equations, linear independence, matrices of linear transformations, matrix algebra, determinants, vector spaces, eigenvalues and eigenvectors. After mastering the basic concepts and skills, students will use their knowledge of linear algebra to model a selection of applied mathematics problems in business, science, computer science and economics.

Additional Information

Offered every fall term.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:
 - MAT210 - Applied Calculus I (3)
 - MAT225 - Calculus I: Single-Variable Calculus (3)
 - NOTE: Students must earn a grade of C or better.

MAT360 - Statistics and Probability for Teachers

Description

In this course students will study topics in data analysis including: descriptive statistics, probability, odds and fair games, probability distributions, normal distributions, estimation, and hypothesis testing. The course format will include: hands-on activities; computer-based simulations; creating and implementing student developed investigations; and actual middle school mathematics classroom activities. Throughout the course students will be given opportunities to relate the mathematical concepts studied in this course to the mathematical concepts they will be teaching. This course is not appropriate for students who have completed MAT-240, MAT-245 or MAT-250.

Additional Information

Offered every spring term.

Credits

3

Academic Level

Undergraduate

MAT361 - Euclidean and Non-Euclidean Geometry

Description

This course will examine concepts in Euclidean and non-Euclidean geometries. Course topics include: Neutral Geometry, Spherical Geometry, Similarity and Congruence, Euclid's Postulates, properties of and relationships among geometric shapes and structures, and the Pythagorean Theorem. Students will engage with these concepts through proofs, problem solving, and dynamic geometric software.

Credits

3

Requisites

- Must earn a minimum grade of C in the following course(s):
 - MAT299 - Mathematical Proof and Problem Solving (3)

Academic Level

Undergraduate

MAT362 - Algebra for Teachers

Description

This course will examine concepts in algebra including: Patterns, arithmetic sequences, geometric sequences, arithmetic and algebra of the integers, least common multiple and greatest common divisor, The Fundamental Theorem of Arithmetic, The Division Algorithm and Euclidean Algorithm, modular arithmetic and systems of numbers, properties of groups and fields, the field of complex numbers, polynomial arithmetic and algebra, The Fundamental Theorem of Algebra, linear equations, matrix algebra determinants, and vectors. Students will engage with these concepts through proofs, problem solving and through activities used in middle school mathematics. Throughout the course students will be given opportunities to relate the mathematical concepts studied to the mathematical concepts they will be teaching.

Additional Information

Offered every third semester.

Credits

3

Requisites

- Must earn a minimum grade of C in the following course(s):
 - MAT299 - Mathematical Proof and Problem Solving (3)

Academic Level

Undergraduate

Campus Programs

MAT370 - Numerical Analysis

Description

This course introduces basic techniques for the efficient numerical solution of problems in engineering, mathematics, and science. Topics covered may include: root finding methods, interpolation, numerical differentiation and integration, differential equations, and matrix theory concepts such as QR factorization and singular value decompositions. Students will utilize industry-standard software for simulations.

Credits

3

Requisites

- Complete 1 of the following
 - Must earn a minimum grade of C in the following course(s):
 - MAT275 - Calculus II: Integration & Series (3)
 - MAT350 - Applied Linear Algebra (3)
 - Permission of instructor

Academic Level

Undergraduate

MAT415 - Abstract Algebra

Description

Algebra is concerned with sets of objects and operations on these sets. This course will take students beyond the real number and polynomials to groups and other algebraic structures. In a modern, or abstract algebra course, one assumes a small number of basic properties as axioms and then proves many other properties from the axioms. This will assist the student in becoming more proficient at proof-writing.

Additional Information

Offered every third semester.

Credits

3

Requisites

- Must earn a minimum grade of C in the following course(s):
 - MAT299 - Mathematical Proof and Problem Solving (3)

Academic Level

Undergraduate

MAT431 - Discrete-Time Mathematical Modeling

Description

This course is an introduction to discrete-time mathematical modeling with applications in biology, ecology, and epidemiology. This course consists of a rigorous introduction to the basic theory of linear and non-linear difference equations, as well as principles of model construction. Students will utilize industry-standard software for simulations.

Credits

3

Requisites

- Complete 1 of the following
 - Earned a grade of C or better or better in each of the following:
 - MAT350 - Applied Linear Algebra (3)
 - Permission of instructor

Academic Level

Undergraduate

Campus Programs

MAT433 - Optimization Modeling

Description

In the process of modeling "real-life" situations, verification and validation of the model is inherently necessary to strengthen the prediction power of the model. This course will explore optimization and dynamical models, focusing on topics which may include: one variable and multivariable optimization, sensitivity analysis, steady state analysis, continuous time dynamical systems, stability analysis, and phase portraits. Students will utilize industry-standard software for simulations.

Credits

3

Requisites

- Complete 1 of the following
 - Earned a grade of C or better or better in each of the following:
 - MAT330 - Differential Equations (3)
 - MAT350 - Applied Linear Algebra (3)
 - Permission of instructor

Academic Level

Undergraduate

MAT434 - Statistical Learning and Classification

Description

Using the foundational knowledge built in MAT 241 and MAT 300, we continue our study of statistical models. This course moves beyond regression and into classification models, mixed models, and unsupervised learning. This course also emphasizes cross-validation as an important method for approximating test error and analyzing the utility of a model. This course covers discriminant analysis, k nearest neighbors, tree-based methods (bagging, boosting, and random forests), support vector machines, and neural networks.

Credits

3

Requisites

- Must earn a minimum grade of C in the following course(s):
 - MAT300 - Applied Statistics II: Regression Analysis (3)

Academic Level

Undergraduate

MAT440 - BIG Problems in Mathematics

Description

BIG Problems in Mathematics will engage students with research problems in the areas of Business, Industry, and Government (BIG) agencies. Through the course of the semester, students will work toward a solution to a single or series of problems posed by BIG liaisons, concluding with a final written report and video presentation to the sponsoring agency. Specific course topics will change depending on the needs of the sponsoring agency.

Credits

3

Requisites

- 3 credit(s) from subject(s): MAT within the range of course numbers 300 - 399

Academic Level

Undergraduate

Campus Programs

MAT450 - History of Math and Math Education

Description

This course will look at the historical development of the disciplines of mathematics and mathematics education. Within the discipline of mathematics we will examine the development of number and number systems, geometry and measurement, algebra, probability and statistics, calculus, and discrete mathematics. Within the discipline of mathematics education we will examine the development of learning theories, theories of teaching mathematics, research trends, and mathematics curriculum. Throughout this course students will study the history of mathematics and mathematics education through readings, case studies, and problem sets.

Additional Information

Offered every third semester.

Credits

3

Requisites

- 60 credit(s).

Academic Level

Undergraduate

MAT470 - Real Analysis

Description

This course provides a theoretical foundation for single-variable calculus concepts. Topics include the structure of the real numbers, sequences, continuity, differentiation and Riemann integration. This course will be run as a seminar that emphasize problem solving, proof writing and orally defending proofs.

Additional Information

Offered every third semester.

Credits

3

Requisites

- Must earn a minimum grade of C in the following course(s):
 - MAT275 - Calculus II: Integration & Series (3)
 - MAT299 - Mathematical Proof and Problem Solving (3)

Academic Level

Undergraduate

MAT480 - Independent Study

Description

This course allows the student to investigate any mathematics subject not incorporated into the curriculum. Offered as needed. Instructor permission required.

MAT495 - Mathematics Education (Capstone) **Description**

This course is the mathematics capstone course for Middle School and Secondary Mathematics Education majors. Students will spend time reflecting on the mathematics learned in previous courses through rich problems that draw on concepts from multiple disciplines in mathematics. The course will help students develop a deeper and more connected understanding of school mathematics content while continuing to develop their mathematical habits of mind and problem-solving strategies. Students will also spend time connecting their knowledge of mathematics education to national and state standards and policies regarding the mathematical education of students.

Additional Information

Course offered as needed.

Credits

3

Requisites

- Must earn a minimum grade of C or better in the following course(s):
 - MAT360 - Statistics and Probability for Teachers (3)

Military (NHCUC)

MILT101 - Leadership Laboratory I **Description**

Open only to students taking another Military Science class, with different roles offered for students at different levels of the program. Involves leadership responsibilities for the planning, coordination, execution, and evaluation of various training programs. Students develop, practice and refine leadership skills by serving and being evaluated in a variety of supervisory positions. Specific events include a team-building leader reaction course, orientation to military weapons, basic tactical movement, and land navigation. Cr/F. This course is offered in conjunction with UNH Durham through our New Hampshire College and University Council Consortium Agreement.

MILT103 - United States Army History

Description

Develops an understanding of the effects the US military and society have on each other through the establishment and background of the United States Army. Presented in the context of broader US Military history and military strategy and global involvement. Through readings, oral and written presentations, and exams, students describe the role of the US Army, its evolution and its impact on society and technology; and critically analyze an armed conflict using the principles of war. This is a pre-commissioning requirement for professional military education (PME) required by the United States Army Cadet Command. It is open to non-ROTC students.

Credits

2

Undergraduate

MILT113 - Introduction to ROTC

Description

Make your first new peer group at college one committed to performing well and enjoying the experience. Increase self-confidence through team study and activities in physical fitness, rappelling, first aid, basic marksmanship, and basic drill. Learn fundamental concepts of leadership in both classroom and outdoor laboratory environments. One hour and a required leadership lab (MILT 101) plus optional (mandatory for scholarship cadets) participation in three one-hour sessions of physical fitness per week. Participation in one weekend exercise is also required for all cadets. Open to all college students, no military commitment required. This course is offered in conjunction with UNH Durham through our New Hampshire College and University Council Consortium Agreement.

Campus Programs

MILT250 - Camp Challenge

Description

Five-week leadership training course at Fort Knox, Kentucky during the summer that exposes students to intensive leadership evaluation and development. Students learn fundamental military skills such as land navigation using a map and compass, principles of leadership, first aid, drill and ceremony, team building exercises, etc. in preparation for future training as ROTC cadets. Students gain professional knowledge in management and organization and experience group interaction and interpersonal communications through total immersion in a military type environment. Open only to students who have not completed all of the following: MILT 101, 102, 201, and 202. Airfare, lodging, and expenses are paid by the Army. Student incurs no military obligation; program offers opportunities to earn a two-year scholarship and qualifies students to take MILT 301. This course is offered in conjunction with UNH Durham through our New Hampshire College and University Council Consortium Agreement.

Music

MUS101 - Music and Meaning

Description

A skills-oriented introduction to an understanding of music. Through a thoughtful analysis of the nature of music and the boundaries of art, students will develop foundational academic skills: reading, writing, critical analysis, and creative problem solving. Students will learn how to handle a wide variety of sources, to evaluate varied and seemingly contradictory evidence, and to form precise and well-supported positions.

Credits

3

Academic Level

Undergraduate

MUS130 - SNHU Choir

Description

MUS-130 provides students the opportunity to rehearse and perform as a member of the SNHU Choral program. There are two choirs at SNHU. Concert Choir is open to all students without an audition. Students will develop individual practice techniques and are expected to practice their music outside of rehearsal on a regular basis. Students may enroll in this course for credit as many times as they would like. The SNHU Jazz Choir is a small choir focusing on learning the vocal jazz style. This is an auditioned group that is open to all students. Students in Jazz Choir must also be a member of the SNHU Concert Choir. To arrange an audition, please email SNHUMusic@snhu.edu.

Credits

Academic Level

Undergraduate

Campus Programs

MUS135 - Instrumental Chamber Group

Description

MUS 135 provides students the opportunity to rehearse and perform as a member of an instrumental chamber ensemble. Students will study basic music skills including music reading, tone production, ensemble blend, and group intonation. They will also develop individual practice techniques. Students are expected to practice their music outside of rehearsal on a regular basis.

Credits

1

Academic Level

Undergraduate

MUS140 - Instrumental Music Ensemble

Description

Instrumental music provides students the opportunity to rehearse and perform with the SNHU Orchestra, the SNHU Concert Band, the SNHU Brass Choir, the SNHU Jazz Combos, and/or the SNHU Rock Bands. Students will develop group performance skills such as ensemble precision and group intonation. Students are expected to practice their instrument outside of rehearsal on a regular basis. Students may enroll in this course for credit as many times as they would like.

Credits

0 - 1

Academic Level

Undergraduate

MUS211 - Music Theory and Aural Skills I

Description

Music Theory and Aural Skills I introduces students to the basic elements, materials, and structure of Western tonal music with an emphasis on harmony, voice leading, and counterpoint. Students will develop aural skills through sight singing, ear training, rhythmic reading, dictation, and part-singing.

Additional Information

Course offered every fall term.

Credits

3

Academic Level

Undergraduate

MUS212 - Music Theory and Aural Skills II

Description

Music Theory and Aural Skills II continues to expose students to the basic elements, materials, and structure of Western tonal music that were introduced in MUS-211. Students continue to develop aural skills through sight singing, ear training, rhythmic reading, dictation, and part-singing.

Additional Information

Offered every spring term.

Credits

Music Education

MUE100 - Introduction to Music Education

Description

This course is designed to provide the student with an overview of the principles and practices of music education in twenty-first century public schools. Students will observe and do fieldwork in music classrooms with instruction at all levels of Pre-K-12 education. This course is a prerequisite for all professional education courses in music education and includes the component of required pre-practicum fieldwork.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

Campus Programs

MUE201 - Vocal Techniques

Description

This class teaches music education majors how to teach vocalists in a variety of settings. Students learn the basics of vocal pedagogy and develop individual performance skills. Students are expected to visit other music institutions to observe appropriate lessons and classes.

Additional Information

Offered every fall term.

Credits

1

Academic Level

Undergraduate

MUE202 - Piano/Guitar Techniques

Description

Piano/Guitar Techniques instructs music education majors how to play the piano and guitar to accompany musical soloists and performing ensembles. Students also learn how to teach group classes of guitar and piano.

Additional Information

Offered every spring term.

Credits

1

Academic Level

Undergraduate

MUE203 - Percussion Techniques

Description

Percussion Techniques instructs music education majors how to teach each of the percussion instruments in a variety of settings. Students are expected to learn how to play each instrument in the percussion family at a basic level.

Additional Information

Offered every fall term.

Credits

1

Academic Level

Undergraduate

MUE204 - Brass Techniques

Description

This course is designed to prepare music education students for teaching brass students from beginner through high school band. In this course, students will develop skills in performance and teaching technique/ pedagogy for all brass instruments. Instructional strategies used in this course will include lecture, discussion, demonstration, observation, performance, and cooperative learning.

Additional Information

Offered every spring term.

Credits

1

Academic Level

Undergraduate

Campus Programs

MUE205 - String Techniques

Description

String Techniques instructs music education majors how to teach each of the string instruments in a variety of settings. Students are expected to learn how to play each instrument in the string family at a basic level.

OL306 - Job Analysis and Work Design

Description

This course examines Job Analysis and Work Design. Job analysis is the foundation for all assessment and selection decisions. Job analysis is the process of studying and collecting information relating to the operations and responsibilities of a specific job. It is a way to examine the tasks performed in a job, the competencies required to perform those tasks, and the connection between the tasks and competencies. Additionally, job analysis is the systematic process of analyzing job specifications such as job duties and key areas of responsibility, knowledge, skills, abilities, experience and aptitude and job specific qualifications. The immediate outcomes of the analysis are job descriptions, wage-setting, training and performance management.

Credits

OL328 - Leadership

Description

This course examines leadership as an inter-personal and intra-organizational phenomenon with an emphasis on student leadership development. It includes leadership assessment, leadership development, the leadership process, the contagious nature of leadership, leadership and productivity, motivation, and effective leadership styles and theories. An international perspective is included. Current readings, research, simulations and exercises are used. Team intensive course.

Additional Information

Offered every year.

Credits

3

Academic Level

Undergraduate

OL332 - Small Business Advising I

Description

This course is designed to provide students with the technical and intuitive skills to successfully consult with an entrepreneur who is in the beginning stages of starting a business. The student will utilize critical thinking during the advising process to effectively identify the root need that is being presented by the business owner. These advanced interpersonal skills can also be transferred to other professions.

Additional Information

Offered as needed.

Credits

2

Academic Level

Undergraduate

Campus Programs

OL342 - Organizational Behavior

Description

This course focuses on the primary factors that influence behavior in organizations. Emphasis is placed on leadership, group dynamics, inter-group dynamics, organizational structure and design, change, culture, power and politics, environment and technology and organizational behavior in an international context. Offered every year. Writing and team intensive course. Junior standing or permission of instructor.

Credits

3

Requisites

- Complete all of the following
 - 60 credit(s).
 - Complete:
 - OL125 - Human Relations in Administration (3)

Academic Level

Undergraduate

OL408 - Building Diverse and Inclusive Organizations

Description

Using a local community or city as a “live” business case study students will explore the concepts of diversity and inclusivity and the impact on current business practices. The course examines the intersections of race, gender, and ethnicity in organizations by providing students the opportunity to meet with local business leaders and community stakeholders. Students will study the historical context of race relations in the United States to better understand the demographic changes of today’s workforce. The course is designed to be discussion based and writing intensive. Students will follow an action research methodology where they will develop research questions, collect and analyze data, and share their findings with the community in which they are working.

Credits

3

Academic Level

Undergraduate

OL420 - Management Applications

Description

The basis of this course is for students to act in a management capacity to train staff, operate, and manage the business/project on campus

Credits

3

Requisites

- Permission of instructor

Academic Level

Undergraduate

Campus Programs

OL421 - Strategic Management and Policy (Capstone)

Description

Business School Capstone Course. This interdisciplinary approach to the study of the process of strategic management includes strategic analysis planning, implementation, evaluation and control from the perspective of top management in profit-making U.S. and international corporations, and public and non-profit organizations. Text and case studies are used extensively. Writing and team intensive course. Experience with Microsoft Office or equivalent is required.

Credits

3

Requisites

- Complete all of the following
 - 1 of the following:
 - ACC202 - Managerial Accounting (3)
 - ACC205 - Foundations of Accounting II (2)
 - 1 of the following:
 - MKT105 - Foundations of Marketing (2)
 - MKT113 - Introduction to Marketing (3)
 - Complete:
 - ENG200 - Sophomore Seminar (3)
 - 90 credit(s).

Undergraduate

OL429H - Honors Applied Management: New Paradigm Design

Description

This course represents the fall portion of the 3-year business honors program senior experience. The senior experience is an academic consultancy, project management model tied to researching and developing a deliverable to address a business issue in an ongoing organization. The seniors reestablish the New Paradigm Design "NPD" consulting firm and entertain request for projects. Students will be assigned to specific project teams and work on completing the preliminary information and action plan for their project. At the end of the fall semester, the teams will present their findings and action plans that they will implement in the spring term.

Credits

3

Requisites

- Must be enrolled in 3 Year Honors program.

Academic Level

Undergraduate

OL430H - Honors Applied Management: New Paradigm Design

Description

This course represents the spring portion of the 3-year business honors program senior experience. The senior experience is an academic consulting model tied to researching and developing a deliverable to address a business issue in an ongoing organization. Spring term is devoted to implementing the action plan and completing the process. At the end, a public presentation is made highlighting the salient points of the projects and the outcomes. Students submit the final deliverable to the facilitator and to the organization. The students are available to provide detailed explanation of the final product should the organization desire it beyond just the presentation of the deliverable.

Credits

3 - 6

Requisites

- Must be enrolled in 3 Year Honors program.

Academic Level

Undergraduate

Campus Programs

OL442 - Human Resource Strategy and Development

Description

This course provides an in-depth examination of human resource strategy and development. Students will gain an understanding of the importance of sound HR practices and the integral role they play in achieving organizational success. Students will examine the environment of HR management; the challenges of staffing organizations, locally and internationally; the relationship of a learning organization to training and development; the role compensation and benefit strategies play in motivating the developing employee; and the concerns and issues related to employee and labor relations. Senior standing or permission of instructor.

Additional Information

Offered as needed.

Credits

3

 - Complete:
 - OL211 - Human Resource Management (3)
 - OL325 - Total Rewards (3)
 - 90 credit(s).

Academic Level

Undergraduate

OL465 - Fieldwork Experience & Final Project

Description

This course (3 credits) is designed to help students implement core learnings from past courses. Each student will design his/her fieldwork experience and along with a supervising faculty member will determine the parameters and format of the final project to ensure key learnings are met. Additional insight will be gained in the areas of organizational politics, leadership styles, and personal time management techniques. The students will submit a final deliverable based on the format and parameters agreed to with supervising faculty and deliver a formal presentation.

Undergraduate

OL500 - Human Behavior in Organizations

Description

This course is a study of individuals and groups and their interaction. Students examine theories of motivation, communication, leadership, power and change with practical relation to contemporary issues. They also study organizations for key design variables and reward systems aimed at improved performance and organizational efficiency through employee motivational programs, participative management and cooperative decision making.

Credits

3

Academic Level

Graduate

Campus Programs

OL501 - Business Foundations

Description

This course is a foundational survey of the principles, vocabularies, and mechanics of how business firms function. The course is designed to give students with little or no business background the exposure and acumen necessary for advanced coursework in business-related topics and to appreciate the complex interactions of markets and firms. Financial aspects of business including the accounting system, financial statements, and financial reporting are covered in addition to the major macro- and micro-economic theories and market concepts that influence business.

Credits

3

Academic Level

Graduate

OL670 - Organizational Leadership

Description

This course combines theory and practice by encouraging students to learn traditional and contemporary leadership theories and apply them to the analysis of the behavior of business managers, entrepreneurs and other recognized individuals. This course includes readings, cases, exercises and numerous examples of effective leadership models. Areas covered include the societal evolution of leadership; the leadership roles of strategy, vision and transformational change; the development of leaders; the leadership responsibilities of creating effective teams, organizations and cultures; the exploration of different leadership styles; and current popular approaches to leadership theory.

Credits

Philosophy

Campus Programs

PHL101 - Philosophical Reasoning

Description

The ultimate aim of this course is to give you a greater understanding of the history, methodology and purpose of philosophy in order that you may incorporate its analytical methods into your own chosen area of study, and perhaps your life more generally. This is a skill-focused philosophy course, devoted to the identification, evaluation and construction of arguments, but these skills will be refined in the process of learning to do philosophy: reading classic philosophical works, understanding their content, and evaluating their argumentative success. The hope is that having completed the course, you will have a richer sense of a few episodes in human intellectual history and will be better able to appreciate arguments, which are a pervasive phenomenon in contemporary society.

Credits

3

Academic Level

Undergraduate

PHL111 - Introduction to Critical Thinking

Description

What makes a good argument? Are some beliefs better than others? Why should we believe in a certain view? This course is an introduction to critical thinking and reasoning, and demonstrates philosophy's practical value for effectively solving problems, communicating ideas, achieving goals, and uncovering truth. Students will challenge assumptions, evaluate arguments from different perspectives, and articulate positions on contemporary issues. This course draws from students' own experience, asking them to examine real-world situations and case studies in order to apply critical thinking to actual practice. Critical thinking skills and strategies in this course are foundational and directly applicable to a variety of future professional or personal endeavors.

Credits

3

Academic Level

Undergraduate

PHL210 - Introduction to Philosophy

Description

This course provides a general introduction to the big questions of philosophy, including questions of existence, knowledge, freedom and meaning. The purpose of the course is to introduce students to great thinkers and theories while engaging them in the exploration of the same beginning questions applied to contemporary issues.

Additional Information

Course offered every fall term.

Credits

3

Academic Level

Undergraduate

PHL212 - Introduction to Ethics

Description

This course introduces students to ethical theory or the study of how people make decisions about how to treat one another. It emphasizes the historical and theoretical development of answers to such questions as: What kind of a person do I want to be and How do we figure out what the right thing to do is

Credits

3

Academic Level

Undergraduate

Campus Programs

PHL214 - Formal Logic

Description

This course is a study of the fundamental principles of correct and incorrect argument, historical forms of deductive logic, and the significance of language and clear verbalization.

Additional Information

Offered as needed.

Credits

3

Academic Level

Undergraduate

PHL220 - Death and the Meaning of Life

Description

This course focuses on a number of important philosophical questions about death and the meaning of life. The course has three parts: · The first part focuses on questions about the meaning of life: Is life meaningful? If so, what is the meaning of life? If not, is life absurd? Do we "create" meaning? What is the relationship, if any, between religion and the meaning of life? · The second part focuses on questions about death: Is it bad to die? Should we fear death? How should death inform the way we live our lives? Is there life after death? Is life valuable only if there is life after death? Should we want to live forever? · The third part focuses on miscellaneous questions about life and death: Is creating new people good or bad? Are suicide, euthanasia, and/or the death penalty ever morally permissible?

Credits

3

Academic Level

Undergraduate

PHL222 - Happiness and the Good Life

Description

This course focuses on a number of important philosophical questions about happiness and the good life. The course has three parts: · The first part focuses on questions about the good life: Which things make a life go well? Which things are ultimately valuable in life? Is happiness the key to a good life? Is pleasure all that matters? Or is getting what you want sufficient for a good life? What is the connection, if any, between the good life and moral virtue? Is being religious or believing in God necessary for a good life? Are knowledge and/or accomplishments necessary for a good life? · The second part focuses on questions about happiness: What is happiness? Is happiness just a feeling? Can we define "happiness"? What is a happy life? Can you measure happiness? What is the connection between happiness and morality? · The third part focuses on one question about the art of living well: What concrete and practical advice is there in the history of philosophy (most notably in the traditions of Hedonism, Stoicism, Buddhism and Existentialism) about conducting our day-to-day lives?

Additional Information

Course offered every spring term.

Credits

Academic Level

Undergraduate

Campus Programs

PHL230 - Religions of the World

Description

This course reviews the emergence of various belief systems and their differences and similarities. Students explore the role of religious belief in the course of human history. Whenever possible, speakers representing various religions are invited to the class. Special emphasis is given to the five major religions: Hinduism, Buddhism, Judaism, Christianity and Islam.

Credits

3

Academic Level

Undergraduate

PHL305 - Animal Rights and Ethical Issues

Description

This course is designed for any student interested in understanding the difference between animal rights and animal welfare issues. Students will engage in debates over specific issues and case studies in animal rights, and will discuss major legislation and regulations used around the world. Topics will include animals in zoos and circuses, animals in research, the treatment of livestock, wildlife trade, and the rights of companion animals. Students will keep a personal journal, and will create a collective project that synthesizes the topics explored throughout the semester.

Additional Information

Offered every fall term.

Credits

3

Academic Level

Undergraduate

PHL315 - Philosophy of Love, Sex & Gender

Description

Love, Sex, and Gender constitute a complex triad of concepts that play a central role in human life. Everyone, consciously or not, is constantly filtering their experiences and forming beliefs about the world on the basis of these phenomena. Behaviors, beliefs and choices are made on the basis of our understanding of them. Collectively, laws are made and religious ceremonies held that are meant to establish the importance of some (and, by extension, the triviality of others). But personally, our ideas about gender, our conceptions of sex, and our understanding of love are consistently a source of intense emotional responses and meaning in our lives, for better and for worse. Still, despite their centrality, it is common for us to adopt our notions of love, sex, and gender unthinkingly, and simply assume that our received accounts of them are natural, fixed and unproblematic. Many people refrain from asking deep questions about these concepts that seem worth asking. This class is meant to remedy this oversight by creating a venue for asking interesting and difficult critical questions about love, sex, and gender.

Credits

3

Academic Level

Undergraduate

Campus Programs

PHL316 - Business Ethics

Description

This course is a philosophical study of moral issues in business. Topics include corporate responsibility, conflicts of interest, morality in advertising, preferential hiring (e.g., minorities and women), personal morality versus employer loyalty, and cultural theoretical issues and their impact on business decisions.

Additional Information

Course offered in the spring term of every even year.

Credits

3

Academic Level

Undergraduate

PHL323 - Ancient Philosophy

Description

This course is devoted to examining the origins of Western Philosophy. By reviewing the writings of seminal Greek and Roman thinkers in the ancient world, students will learn about the competing metaphysical, ethical and logical theories adopted by different philosophical movements. Additionally, the course will consider some of the vexing theoretical problems ancient thinkers worked to address and will reflect on the historical/political contexts in which this intellectual development grew and spread throughout the ancient world. Figures covered may include Heraclitus, Parmenides, Protagoras, Socrates, Plato, Aristotle, Epicurus, Cicero, Seneca, Marcus Aurelius, Plotinus, and Sextus Empiricus.

Credits

3

Academic Level

Undergraduate

PHL363 - Environmental Ethics

Description

This course analyzes the application of ethical theory to moral questions about the environment. A number of different traditions in environmental ethics will be discussed and their strengths and weaknesses evaluated by applying them to practical moral problems.

Physics / Atomic Physics

Campus Programs

PHY100 - Topics in Physics

Description

This 1-credit course introduces students to the topics available to them for study, the personnel of the Physics degree program, and the resources in place for their support and success. We introduce students to science faculty members and their areas of expertise, including those in CETA. Students learn about the lab spaces on campus and the equipment available to them, and additional resources such as the Shapiro Library's science databases. Students will also be introduced to professional experiences through Career Services.

Credits

PHY102L - Physics for Life Sciences Lab

Description

This course covers introductory methods and techniques of laboratory experimentation regarding topics covered in PHY 102 Physics for Life Sciences. Students learn about procedures for measuring physical quantities and methods for collecting and analyzing experimental data. The purpose of the lab experiments is to gain practical understanding of fundamental concepts of physics and draw conclusions resulting from the experimental procedures and results, as they relate to the physical principles discussed in the lecture course PHY 102. Students are required to complete 12 experiments in areas such as Thermal Physics, Sound and Waves, Electricity, Magnetism, Optics, or Atomic and Nuclear Physics.

Credits

PHY215 - Physics I

Description

This is a calculus-based course that covers introductory topics of physical science and strongly emphasizes problem solving and the use and further development of mathematical and scientific critical thinking. This course assumes that the student possesses a mathematical background compatible with introductory college calculus for majors in science and engineering. The course covers units of measurement, vector quantities, notation and operation, kinematics and dynamics in one and two dimensions, Newton's Laws of motion and gravitation, work, energy, power, impulse, momentum, simple harmonic motion, and angular harmonic motion. The required lab component of this course covers introductory methods and techniques of laboratory experimentation in topics covered in this course. Students learn about procedures for measuring physical quantities and methods for collecting and analyzing experimental data. Students are required to complete 12 experiments in the area of mechanics.

PHY216 - Physics II

Description

This is the continuation of PHY-215 with similar characteristics; i.e., it is a calculus based physics course and stresses problem-solving. Topics covered include temperature, thermal equilibrium, thermal expansion, calorimetry, periodic waves, mathematical descriptions of a wave, speed of transverse waves, sound waves in gases, electric charges, atomic structure, Coulomb's Law, Kirchhoff's rules, magnetic fields and flux, motion of charged particles in a magnetic field, reflection and refraction, total internal refraction, Fermat's Principles of Least Time, geometrical optics, refraction of spherical surfaces, lenses, and an introductory topic of modern physics. The required lab component of this course covers introductory methods and techniques of laboratory experimentation in topics covered in this course. Students learn about procedures for measuring physical quantities and methods for collecting and analyzing experimental data. Students are required to complete 12 experiments in areas such as Thermophysics, Sound and Waves, Electricity, Magnetism, Optics, or Atomic and Nuclear Physics.

Pilot

PLT101 - Private Pilot Ground

Description

The student will fulfill 14 CFR Part 141 Private Pilot ground training. Taken in tandem with PLT 102, Private Pilot Flight, the course will enable the student to acquire all of the skills, as listed in the Practical Test Standards, needed to pass the Private Pilot check ride and to safely operate an airplane as Pilot in Command. The ground training syllabus consists of three stages divided into a total of 17 lessons, culminating in end of course exams to demonstrate student comprehension of all the academic material presented in the course.

PLT102 - Private Pilot Flight

Description

PLT102 represents the flight portion of the integrated ground and flight course that will provide the student with hands on flight training not only to master the knowledge, maneuvers, and procedures necessary to meet the stringent FAA Airman Certification Standards, but to master the challenge of real world flying. This immersive course develops the aeronautical knowledge required for certification as a Private Pilot with an Airplane Single Engine Land Rating and more importantly, forms the foundation for all future aviation training. Ground School topics are taught concurrently on a one on one basis with your Primary Flight Instructor, as well as in study and special subject groups. Some of these topics include regulations, safety, pre-solo and solo operations, cross-country planning, airspace, chart usage, communications, weather, performance, weight and balance, aerodynamics, Crew Resource Management and Aeronautical Decision Making. After the successful completion of this course, the student will have gained the aeronautical experience necessary to attain a Private Pilot Certificate with an Airplane Single Engine Land Rating and will have become a part of one of the most exciting and unique fraternities in the world.

PLT103 - Instrument Ground Training

Description

This course represents the ground portion of the integrated Ground and Flight Instrument course. This course develops the aeronautical knowledge required for addition of an Instrument Airplane rating to a Private Pilot Certificate. It introduces the student to the principles of instrument flight including the operation, use and limitations of flight instruments and instrument navigation systems, and how the air traffic control system operates. PLT 103 also introduces single-pilot resource management (SRM) and human factors concepts related to flight in the IFR environment.

Credits

Undergraduate

PLT104 - Instrument Flight Training

Description

This course represents the flight portion of the integrated Ground and Flight course. This course develops the aeronautical knowledge required for addition of an Instrument Airplane rating to a Private Pilot Certificate. The student will learn and practice precise airplane altitude control solely by instrument reference and by performing a variety of maneuvers common to each stage of flight in the IFR environment. The student must demonstrate proficiency in precision and non-precision instrument approaches and instrument navigation while maintaining situational awareness. Instrument approaches, including circling, course reversals, and missed approach procedures will be reviewed and practiced with both full and partial panel. A variety of Emergency Procedures will be introduced and practiced during flights. Student will master Cross Country procedures in IFR conditions.

PLT105 - Commercial Pilot I

Description

This course is the first stage in developing the aeronautical knowledge and flight requirement required for certification as a Commercial Pilot with Single Engine Land rating. In this refamiliarization course, the student will become reacquainted with the requirements of VFR and Cross-Country flight, aircraft systems and visual scanning procedures, airport operations and entry, pattern work, and by utilizing the observational ability learned as a Private Pilot with the discipline emphasized in the Instrument Rating, maximizes flight safety and operation. All flight training from this point forward will be conducted from the Right Seat, as in almost every instance, the Commercial Pilot begins his or her career from that vantage point. Doing so prior to the CFI portion of the training program gives the student a great advantage in comfort and familiarity, allowing them to concentrate on the teaching, not just getting used to a new perspective when they begin training. Finally, in the event the student goes directly to a line aviation position, they will find the transition to being a copilot uneventful, as they are already completely familiar comfortable with both seats and respective responsibilities of a cockpit crew environment.

PLT201 - Fundamentals of Instruction

Description

Whether you choose teaching as a profession or a stepping stone to the airlines, if conducted with professionalism and enthusiasm, flight instruction can help a beginning pilot strengthen and perfect their technique and deepen the understanding science of flight. The Fundamentals of Instruction class is designed to help guide you to become a good teacher, by working with current professional flight instructors and mentors who guide you to an understanding of human behavior and learning. Fundamentals of Instruction is designed to inspire future instructor pilots by teaching within the framework of an aviation career the application of human learning as it is applied to flight instruction.

PLT202 - Certified Flight Instructor I

Description

This course is the first of two phases to prepare the student as a Certified Flight Instructor. CFI I will build on PLT 201, Principles of Instruction to indoctrinate the student in the discipline of in-flight instruction. Focus will be on in-flight error detection and correction. While it is true that the transition from Private Pilot to CFI marks the point at which your dedication and training reaps financial benefits, most veteran pilots say the real benefit of being able to teach is how much you learn in doing it. Through the Commercial 1 began a process of familiarization with the Right Seat, this course will build on that familiarity to support your teaching while flying from that seat. This process, in fact, is merely a more directed form of the real-world CRM and SRM you have practiced from your first flights, and not only requires an ability to talk through all your procedures, but to learn to observe and direct others to do the same. For many, obtaining the Commercial and CFI Certificates is the culmination of a journey, for most, it truly is the start of another. By combining the experience of both simultaneously, the maneuvers, procedures, and understanding garnered in the respective syllabi support each other and enhance your overall training regimen.

Requisites

- Complete:
 - AV207 - Fundamentals of Instruction (3)

Academic Level

Undergraduate

PLT203 - Certified Flight Instructor II

Description

Flying and teaching requires an understanding of how the art and science of flight become realized through training. The satisfaction of being able to not only to practice your craft but teach it to others can be both challenging and rewarding. This course was designed specifically to utilize not just the FOI and CFI 1 courses, but all previous flight and life experience to maximum advantage. Though designed primarily for those seeking a career aviation path, it can be equally valuable for those or simply looking to improve their personal pilot skills to professional levels. This is the culmination of the basics of Flight Instruction, but most of the maneuvers and procedures will be practiced and perfected throughout the Commercial Syllabus, reinforcing both the procedures and process of the commercial license. After the successful completion of this course the student will have gained the academic and aeronautical experience to complete the FOI, CFI and AGI aeronautical knowledge tests, and per FAR Part 141, will need to successfully pass the FAA Commercial Practical Test prior to FAA CFI Certification.

PLT205 - Commercial Pilot II

Description

In this course, the student develops proficiency in operating a complex aircraft and learns procedures to operate complex aircraft systems and manage equipment malfunctions and failures. In addition, the student gains skills to perform the flight maneuvers required for Commercial pilot certification. The student will receive training in the maneuvers and procedures necessary to meet the standards contained in the FAA Commercial Pilot Airman Certification Standards, as well as increasingly stringent requirements and leadership requirements of a professional pilot. In completing this portion of the curriculum, you will perfect the maneuvers you began in the CFI segments, review your cross-country planning and execution acumen, and strive toward completing your Commercial and AGI Written Tests. Importantly, all of the procedures will be described verbally in real time, and from the right seat, practicing both teaching and execution in preparation for both the Commercial and CFI Checkrides.

Credits

 - PLT105 - Commercial Pilot I (0 - 2)

Academic Level

Undergraduate

PLT305 - Commercial Pilot III

Description

In this final push for professional certification, both CFI and Commercial procedures will be reviewed in preparation for both CFI and Commercial Practical Tests. The Commercial CFI and AGI tests will be completed no later than this stage, and upon completion of the syllabus, the End of Course for both CFI and Commercial will be completed prior to approval to take the FAA Practical Tests for both. The culmination of the entire program comes to fruition here, and reviews of all previous maneuvers through every rating as well as any cross country, IFR, or other type training or makeup flight required for the ratings will be completed at during this time. Any required discrepancies will be dealt with and oral and written tests reviewed and understood completely.

PLT307 - Certified Flight Instructor Instrument

Description

This elective course provides the student the opportunity to gain certification as a CFII. It has been said that the best way to learn is to teach, and in this intensive course, the student will do just that, in what some consider the most challenging environments there are. The responsibility to teach others to fly effectively in less than ideal conditions requires a deep understanding of human nature and learning process that support management principles across many fields, and in completing this course, students will also receive training in the maneuvers and procedures necessary for them to meet the standards contained in the Instrument Flight Instructor practical test standards and Single-Engine Land with Instrument Airplane rating. It is ADAFA's policy to fly in real world conditions as often as possible, and so the additional training received in actual conditions is an excellent addition to a student's flying repertoire. Additionally, the student will receive extensive training in student/instructor cockpit resource management and safe flying practices, review and utilize practical teaching techniques and procedures, and develop decision making acumen in an instructional environment. At the conclusion of the course, the student will have completed all the requirements to meet the Practical Test Standards for Instrument Instructor and receive an Instrument add-on to his or her Certified Flight Instructor Certificate.

PLT308 - CFI-Multi Engine

Description

This elective course provides the opportunity for the student to acquire an additional rating as Certified Flight Instructor, Multi-Engine. Teaching in a multi-engine aircraft is challenging and exciting, and requires exceptional airmanship and communication skills. Ironically, the addition of a second engine can make an airplane safer, or more dangerous, depending on the pilot and the way he was taught. Again, as most of the aircraft flown commercially are multi-engine, learning how to effectively and safely teach them is an excellent way to build your aviation resume and aircraft acumen. Upon completion of the Multi-Engine Instruction Practical Test conducted according to the Practical Test Standards, you will be able to teach others competently and effectively and build ME PIC time and experience, saving thousands in your journey to the airlines.

Political Science

POL210 - American Politics

Description

This course offers a broad introduction to the structure and function of the American political system at the national level, including the roles played by the president, Congress, the courts, the bureaucracy, political parties, interest groups and the mass media in the policy-making and electoral processes. This course places special emphasis on how the efforts of the framers of the Constitution to solve what they saw as the political problems of their day continue to shape American national politics in ours.

Credits

3

Academic Level

Undergraduate

POL211 - International Relations

Description

This course offers a broad introduction to the study and practice of international relations, including the roles played by states and nations, non-state actors, national interests, power, morality and international law. This course places special emphasis on realism and idealism as alternative approaches to the study and practice of international relations and on their implications for ongoing efforts to construct a peaceful and prosperous global political system in the aftermath of the Cold War.

POL301 - U.S. Foreign Policy

Description

This course examines the tools, goals, and patterns of U.S. foreign policy. It evaluates how domestic actors, ideology, and the international system have shaped specific policies and political-military strategies, including isolationism, selective engagement, containment, and preemption. It assesses key U.S. foreign policy challenges, from geopolitical rivalries, terrorism, and the spread of weapons of mass destruction to global governance, climate change, and economic globalization.

POL305 - State and Local Government

Description

This course explores the structure and function of state and local governments in the United States, with an emphasis on their roles as partners with the federal government in a system of cooperative federalism. Students spend much of the course playing and critiquing their own performance in Camelot, a role-playing simulation game in which they assume the roles of civic leaders, representatives of organized interests, and other interested parties in a hypothetical city to try to resolve controversial policy dilemmas like the ones with which local communities are confronted routinely in the United States. This course is not offered online.

POL306 - The American Legal Tradition

Description

This course offers a broad introduction to the American legal tradition, including the structure and function of the courts, the legal profession, legal education, and the politics of judicial selection. As an introduction to what it means to "think like a lawyer" in the United States, students learn how to write parts of a predictive legal memorandum of the type that first-year law students learn how to write, in which they analyze a legal issue of concern to hypothetical clients by applying the reasoning and conclusions in selected judicial opinions to the facts of the clients' case.

Additional Information

Offered every fall term.

POL316 - Legal Reasoning and the Constitution

Description

This course explores the reasoning process by American courts in resolving constitutional disputes. It is modeled on a first-year law school course. The readings consist almost exclusively of abbreviated U.S. Supreme Court opinions in civil liberties and civil rights cases. Students learn how to write brief, formal summaries of these opinions of the type that first-year students in American law schools learn to write, and are expected to participate actively in the type of in-class Socratic dialogues that are the standard method of instruction in American law schools.

POL317 - Campaigns and Elections

Description

Campaigns and elections are central features of the American democratic process. This course will provide students with a deeper appreciation of how campaigns and elections set the rhythm of American political life and shape the functioning of our governmental system. Students will develop an in-depth understanding of the mechanics of political campaigns, with a special emphasis on electoral strategy, media relations, and voter mobilization. Students will use these concepts to analyze key elections during pivotal moments in our nation's political history. The course will also include considerable discussion of the role that our own New Hampshire Primary plays in the electoral process.

Additional Information

POL336 - Advocacy and the Law

Description

This course aims to dispel some of the myths about lawyers as advocates that are perpetuated by popular culture and the mass media in the United States. Students spend much of the course exploring case studies that illustrate the ethical dilemmas faced by lawyers as advocates in the American legal system, the ethical rules that govern their behavior as a condition of their license to practice law, and the fates that befall them when they fail to fulfill their ethical obligations. In addition, students learn how to write parts of an appellate legal brief of the type that first-year law students in American law schools learn how to write, and how to make an appellate oral argument on behalf of hypothetical clients in a moot court setting.

POL348 - U.S. Environmental Law and Politics

Description

How can businesses, governments, and public interest groups achieve environmental sustainability goals in legal and political contexts that were designed with other goals in mind? This interdisciplinary course explores the options in the United States, and provides a comprehensive point of comparison for topics explored in POL 349. Students spend about half of the course learning how to spot facts that give rise to compliance issues for businesses and other private parties under a full spectrum of federal environmental laws, and to identify opportunities for achieving broader sustainability goals within the constraints imposed by the law. In the other half, students learn both how to predict environmental law and policy outcomes and how to shape them adaptively in pursuit of sustainability goals in a fragmented system of governance that was designed to privilege special interests and to favor the status quo.

Additional Information

Offered every other year.

POL349 - Comparative Environmental Law and Sustainable Development

Description

How effective is environmental law as a strategy for achieving sustainable development? How does its diversity across countries and cultures constrain the ability of businesses, governments, and civil society organizations to achieve environmental sustainability goals in an increasingly globalized world? This interdisciplinary course examines the many legal, political, cultural, and other factors that shape the answer to these questions, using China, India, Russia, and the United States as illustrative examples. Students explore the implications of these factors not only for businesses, governments, and civil society organizations pursuing sustainability goals within their own countries, but also for their counterparts in other countries to whom the former are linked through bilateral trade relationships and global supply chains.

POL362 - The American Presidency

Description

This course highlights central themes in the historical development, organization, and functioning of the American presidency. From the origins of our Constitution through two centuries of institutional development and up to the present day, this course will provide students with an in-depth understanding of the dynamics of presidential behavior. Special emphasis will be placed on the growth of presidential power in both foreign and domestic policy and on the central role that presidential elections play in our national politics. Students will learn to view the American presidency as a complex institution, one that requires the president to simultaneously play multiple political roles, including commander-in-chief, legislator, communicator, civic leader and candidate.

POL375 - Weapons of Mass Destruction

Description

This course will explore the significance of nuclear, chemical, and biological weapons to US foreign policy and world politics, including the nuclear rivalry between the US and USSR during the Cold War and more recent international security threats related to the spread of these so-called weapons of mass destruction (WMD). Special attention will be paid to the complex policy and technical challenges concerning these weapons. This course will also examine the politics of arms control and disarmament as they relate to WMD.

Additional Information

Offered in the spring term of every odd year.

Credits

3

Academic Level

Undergraduate

POL376 - Genocide and International Justice

Description

This course is a comparative study of genocide. It is divided into three parts. The first part examines the definition, causes, typologies, and antecedents of modern genocide. The second part analyzes six cases of modern genocide, including the Armenian genocide, the Holocaust, the Cambodian genocide, ethnic cleansing in Bosnia, the Rwandan genocide, and the Darfur (Sudan) genocide. The third and last part evaluates efforts by the international community to punish genocide's perpetrators and to prevent future mass atrocities.

Additional Information

Offered in the spring term of every odd year.

Credits

3

Academic Level

Undergraduate

POL377 - Intelligence and National Security

Description

This course examines the role of intelligence in U.S. national security policy making and implementation. It defines key intelligence concepts, agencies and actors; and explores the evolving forms and functions of intelligence. Emphasis is placed on how effectively the intelligence community addresses specific national security challenges, including terrorism, the spread of weapons of mass destruction, and cyber espionage and warfare. Students will evaluate the success and failure of various intelligence operations and debate what the proper role of intelligence should be in a liberal democracy.

POL378 - The United Nations and Global Governance

Description

This course focuses on the history, functions, and organization of the United Nations. Students will explore the role of UN member states and UN agencies in solving transnational problems concerning international peace and security, economic development, the environment, human rights, world health, and migration. Emphasis will also be placed on the UN's strengths and weaknesses as the leading platform for global governance and on how it should be reformed to strengthen its ability to meet new challenges. The instructor may organize a one-day round trip to New York City, in order for students to participate in a group tour of UN Headquarters and observe a public session of a UN Security Council meeting. There will be additional fees for students who choose to participate in this trip.

PSY223 - Research I: Statistics for Psychology

Description

How do psychologists organize, summarize, and interpret information? Students in this course study applications of statistical methods in psychological research and practice. The emphasis of the course is on the conceptual understanding of statistics so that students can read and conduct psychological research; those skills will be applied to students' original projects in PSY224 - Research II: Scientific Investigations. Computation of tests will be conducted on the computer. Students will build upon statistical knowledge and develop an in-depth conceptual and practical understanding of hypothesis testing, tests of significance, standardization, correlation, and analysis of variance in a wide variety of psychological uses. Students will learn the theory of statistical decisions, practical application of statistical software, and how to analyze journal articles. This course typically should be completed during the first semester of the sophomore year.

Campus Programs

PSY258 - Industrial Organizational Psychology

Description

Industrial/Organizational Psychology is an applied field in psychology focused to improve the effectiveness of the workplace through research, assessment and interventions allowing for enhancement of the office climate, improvement of group and individual performance and overall organizational goals. I/O psychologists work in a wide variety of organizational settings including human resource agencies, professional administration, marketing, consulting, training and development, and university teaching.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete:
 - PSY108 - Introduction to Psychology (3)

Academic Level

Undergraduate

PSY291 - Experiential Learning

Description

This course is an entry-level, experience-based course that focuses on community psychology, career opportunities, and academic direction. Through a minimum of 60 volunteer hours to be completed during the term and 8-10 hours of coursework per week, students deepen their understanding of mental health and community-based human services. Application for placement must be completed before the end of the previous semester/term.

Credits

3

Requisites

- Complete all of the following
 - Complete:
 - PSY108 - Introduction to Psychology (3)
 - Placement in BA.PSY, or BA.CSO
 - Sophomore, Junior or Senior standing
 - Permission of instructor
 - NOTE: This course may only be taken for up to six (6) credits.

Academic Level

Undergraduate

Campus Programs

PSY300 - Biopsychology

Description

This course explores how the brain influences our behaviors, thoughts, and feelings. Topics include: evolution, genetics, anatomy and function of the nervous system, psychopharmacology, brain dysfunction, neuropsychological testing, sleep and circadian rhythms, neuroplasticity, emotions, and mental illness.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete 1 of the following
 - Non-Transfer Students
 - Complete all of the following
 - Complete:
 - PSY108 - Introduction to Psychology (3)
 - 30 credit(s).
 - Transfer Students
 - Complete all of the following
 - Complete:
 - PSY108 - Introduction to Psychology (3)
 - Instructor Permission Required

Academic Level

Undergraduate

PSY305 - Cognitive Psychology

Description

Cognitive psychology focuses on mental processes; we explore research and theory relating to memory, thinking, problem-solving, and language. Applied topics will include learning skills to help improve memory, accommodating memory/language disorders, such as Alzheimer's disease and dyslexia, and understanding how brain scanning techniques can be used to understand memory.

Credits

3

Requisites

- Complete:
 - PSY108 - Introduction to Psychology (3)

Academic Level

Undergraduate

Campus Programs

PSY307 - Sensation and Perception

Description

This course will be an exploration of how we come to know the world through our visual experiences and how those experiences are shaped by prior knowledge, context, and ideas. As such we will cover neurobiological aspects of sensation pertaining to the eye and the brain, and we will cover aspects of higher-order perceptual phenomena, such as object-perception, color, motion, illusions, and representation and art. Students should gain an appreciation for and conversance in the empirical and philosophical complexity of visual experience.

Additional Information

Offered every fall term.

Credits

3

Requisites

- Complete:
 - PSY108 - Introduction to Psychology (3)

Academic Level

Undergraduate

PSY310 - Criminal Psychology

Description

This course will provide the student with insights about crime from a psychological perspective. Specifically, the course will focus on how a criminal offender is influenced by multiple systems within the psychosocial environment. This course examines and evaluates the role of psychological factors in understanding the motives behind antisocial acts. Throughout the course, students will acquire knowledge and practice in the application of psychological methods to understanding criminal behavior.

Additional Information

Offered every spring term.

Credits

3

Requisites

Campus Programs

PSY317 - Reading and Research in Psychology

Description

This course allows students to pursue a supervised psychology research project with a full-time psychology faculty member. This course consists of a seminar and/or individual meetings, and the topic is to be arranged by the student and instructor. May be repeated for credit; three repetitions count as one psychology elective.

Additional Information

Course by arrangement only.

Credits

1

Academic Level

Undergraduate

PSY319 - Social Development: Child and Adolescent

Description

The purpose of this course is to expose students to theory and research concerning infants', children's, and adolescents' social and personality development. This course will focus on how individuals become members of their social world, including how we conceptualize the social world, interact with parents and caretakers, develop social relationships with peers, and interpret, analyze, and respond to cultural messages and ideologies. We will discuss these issues through analysis of the theoretical and research literature.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete:
 - PSY211 - Lifespan Development (3)

Academic Level

Undergraduate

PSY321 - Child Development

Description

This course focuses on psychological development from infancy through late childhood. Research and theoretical perspectives will be used to help students understand contemporary issues and themes central to childhood development, including: biological, cognitive, and social-emotional characteristics of development and the interplay between them.

Additional Information

Offered every fall term.

Credits

3

Requisites

- Complete:
 - PSY108 - Introduction to Psychology (3)
 - PSY211 - Lifespan Development (3)

Academic Level

Undergraduate

Campus Programs

PSY322 - Adolescent Development

Description

Adolescence is a fascinating time of life because of the many psychological and physical changes that occur, as well as the cultural and historical issues surrounding these changes. This course focuses on psychological development from pre-adolescence through adolescence and into emerging adulthood. Research and theoretical perspectives will be used to help students understand contemporary issues and themes central to adolescent development, including: puberty, cognition, morality, identity, relationships, sexuality, school, work, culture, and challenges faced by adolescents and emerging adults. Adolescence will be discussed both as a distinct stage of life, and as an integral component of development across the life span.

Credits

3

Requisites

- Complete:
 - PSY108 - Introduction to Psychology (3)
 - PSY211 - Lifespan Development (3)

Academic Level

Undergraduate

PSY331 - Human Sexuality

Description

This course deals with sex as it relates to the individual, family, group and society. While this is a psychology course, some techniques and knowledge from the biological and social sciences and the humanities are used. Academic achievement and the development of personal insights are the expected results of this course.

Additional Information

Offered as needed.

Credits

3

Requisites

- Complete:
 - PSY108 - Introduction to Psychology (3)

Academic Level

Undergraduate

Campus Programs

PSY335 - Assessment and Testing

Description

Students in this course will become aware of the use and abuse of psychometric techniques. Specific techniques that currently are used will be introduced and understood. While knowledge about specific tests may be somewhat limited, students will obtain knowledge and the types of tests and techniques available.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete:
 - MAT240 - Applied Statistics (3)
 - PSY108 - Introduction to Psychology (3)

Academic Level

Undergraduate

PSY443 - Psychology Internship

Description

Students participate in a supervised, career-related work experience in an area of psychology, encompassing a minimum of 150 hours during the term/semester. Students also complete coursework that gives them the opportunity to apply psychological concepts learned throughout undergraduate study and reflect on their internship experience.

Credits

0 - 15

Requisites

- Complete all of the following
 - Complete:
 - PSY108 - Introduction to Psychology (3)
 - Permission of instructor

Academic Level

Undergraduate

Campus Programs

PSY444 - Senior Seminar in Psychology (Capstone)

Description

This capstone course integrates previous classroom and practical experience with a focus on current issues in psychology. This course likely will include cross-cultural aspects of psychology, ethics, recent career trends in psychology and other topics dictated by current events in psychology. Coverage may change over time, but the basic focus on integrating the past and anticipating the future for psychology seniors will be the major concern. Writing Intensive Course.

Additional Information

Offered every year.

Public Administration

PAD330 - Public Administration

Description

Explore the field of public administration through the analysis of key theory and career possibilities. Examine the role of government and regulation in public policy development. Analyze how ethics drives conduct within the field.

Credits

3

Academic Level

Undergraduate

Campus Programs

PAD630 - Foundations of Public Administration

Description

This course is designed to introduce students to the foundations and constraints that form the environment of the public administration. It will encourage and enable the view of governance issues through the eyes of a public administrator. The course is structured to provide basic skills and set the context of contemporary political, social, economic, and administrative realities. It explores responsive, equitable, effective, efficient, and accountable governance processes, public policies, and institutional-based programs. It also examines, from a multidisciplinary perspective, those essential competencies, values, and issues important to public service organizations and the importance of public policy at the local, state, national and international levels.

Credits

3

Academic Level

Graduate

PAD631 - Strategic Management in Public Service

Description

This course is designed to provide an academic foundation to applied strategic management in public service. Identifying the factors that differentiate public service from the private sector, strategic planning and the implications those differences have for managers. Emphasis is placed on applied strategic planning and management including how to create a mission statement, conduct a SWOT analysis, conduct a stakeholder analysis, writing goals and objectives, and how to design and implement a performance measurement and management system. Current approaches to strategic management used by federal, state, local, and non-profit organizations are emphasized.

Credits

3

Academic Level

Graduate

Quantitative Studies & Operations Management

QS0205 - Business Operations Management

Description

This course teaches management of operations which involve production and delivery of goods and services. Students will learn the concepts and techniques used in managing operations in various business functions of both manufacturing and service organizations. Topics include productivity ratios, process strategy, process improvement, project management, statistical process control, process capacity, lean operations, supply chain management, inventory control, resource planning, and operations scheduling.

Credits

2

Academic Level

Undergraduate

QSO250 - Business Analytics

Description

This course will provide you with the fundamental concepts and tools needed to understand the emerging role of business analytics in organizations. You will learn how to apply basic business analytics tools in a spreadsheet environment, and how to communicate with analytics professionals to effectively use and interpret analytic models and results for making better business decisions.

Credits

3

Requisites

- Complete:
 - MAT240 - Applied Statistics (3)

Academic Level

Undergraduate

QSO251 - Experience in Business Analytics

Description

The aim of this experience is to give the students opportunities to explore the world of Business Analytics and learn about several career options in Business Analytics.

Credits

3

Requisites

- Complete:
 - MAT240 - Applied Statistics (3)

Academic Level

Undergraduate

QSO260 - Descriptive Analytics

Description

You will learn how to analyze historical business data to uncover relationships that can be used to guide predictions about the future and business decision making. JMP statistical and data visualization software will be used to apply tools for analyzing business data.

Additional Information

Offered as needed.

Credits

3

QSO715 - Business Analytics Internship

Description

This course is to enable the School of Business graduate students to gain valuable work experience within the field of Business Analytics. The objective is to give the students an opportunity for practical application of Business Analytics concepts learned in classes and complement the course work taken. Secondly, internships offer the opportunity to develop crucial job searching skills, explore career interests, enhance your resume, make contacts in your chosen field and build references for future employment. Each intern will work in a career-related position during the academic term for which the student is enrolled for the internship - completing a minimum of 150 hours on the job per 3 credits.

Reading

Campus Programs

RDG503C - Emerging and Early Literacy Development K-4

Description

This course will examine several major theoretical perspectives on literacy development from Kindergarten through 4th grade. Students will explore literacy environments that encourage the development of reading, writing, listening and speaking in the early elementary classroom. Students will also learn a variety of effective strategies for the instruction and assessment of reading and writing in the early elementary classroom. Differentiating instruction to meet the needs of students from diverse backgrounds will be integrated into the course content.

RSC420 - Research Practicum

Description

The Research Practicum provides opportunities for students to gain first-hand experience in conducting research through participation in supervised research projects. It is open to students from across the University, from any major or program, who are engaged in a faculty-led research project or who wish to complete a research project under the supervision of a faculty member. The primary aim of the course is to strengthen students' ability to synthesize various phases of the research process, including the development of research questions, reviewing literature, gathering and analyzing data, interpreting findings, and communicating the details of the project to a variety of audiences. Students may complete the course twice for credit.

Additional Information

Offered on a pass/fail basis only.

SB100 - Integration & Application of Business I

Description

This course is a seminar, which provides students with a broad based introduction to the field of global business and reinforces information learned through introductory business course(s) with a focus on international and the technology driven business environment. Topics include accounting, marketing, economics, control, organizational design, human behavior, and communications. Students present individual written analyses and engage in group oral presentations. This course is the first of four Integration and Application of Business courses to be completed by each student majoring in a business program. Must be enrolled in Degree in Three program.

Credits

2

Requisites

- Complete or concurrently enroll in:
 - ACC105 - Foundations of Accounting I (2)
 - ECO205 - Foundations of Macroeconomics (2)
 - INT105 - International Business: A Macro Perspective (2)
 - IT105 - Business Information Technology (2)
 - MKT105 - Foundations of Marketing (2)
 - OL105 - Organizational Fundamentals (2)

Academic Level

Undergraduate

Campus Programs

SB101 - Business Tools I

Description

This course prepares students to be effective members of the business community through effective communication. Students gain knowledge and aptitude with the communication and collaboration tools needed to be successful in both their academic and professional careers as they pursue internship and employment opportunities. Students must demonstrate proficiency with each tool before completing a final project that provides each student with the opportunity to apply their knowledge and ability to a business-related scenario. Students are supported by on-campus faculty throughout their course experience and can progress at their own pace within the semester.

SB202 - Business Tools II

Description

This course prepares students to be effective members of a simulated business community. To be effective members of the community, students are introduced to a Request for Proposal (RFP) that requires them to work with their boss to complete business-related tasks in a self-paced simulated business environment. Students conduct research using multiple information sources to evaluate a business question in their field of study and identify factors that contribute to international market attractiveness and entry. Students must work with their simulated boss throughout the course to complete all required tasks in the RFP. Students are supported by on-campus faculty throughout their course experience and can progress through the simulation at their own pace within the semester.

Campus Programs

SCI219 - Environmental Issues

Description

This course covers a variety of environmental topics in a manner specifically designed for the non-science major. It provides a fundamental understanding of the various processes necessary to support life on Earth and examines how human activities and attitudes (individual, traditional, cultural and others) generate environmental issues that threaten these processes. Topics include ecology, populations, agriculture, desertification and deforestation, water and ocean pollution, air pollution including ozone depletion and acid rain, global climate change, natural resource depletion, solid and hazardous wastes, energy including fossil fuels and nuclear power, economics and sustainability.

Credits

3

Academic Level

Undergraduate

SCI220 - Energy and Society

Description

This course surveys the various forms of energy available to our industrial society. The environmental impact and depletion of each energy form is discussed with emphasis on the development of clean and inexhaustible alternative sources for the home and business. Topics include traditional and renewable energy sources, greenhouse effects, transpiration, nuclear power, and economies.

Additional Information

Offered every spring term.

Credits

SCI251 - Natural Sciences I

Description

Natural Sciences I is an interdisciplinary physical science course specifically designed for non-science majors. It explores three basic themes: cosmology and relativity, the Earth sciences, and astronomy. Under cosmology and relativity the topics include the origin, evolution and fate of the universe, space and time, creation of galaxies and solar systems, black holes and time travel. Under Earth sciences the topics include the Precambrian Earth, plate tectonics, earthquakes and volcanoes, the rock cycle, and weather and climate. Under astronomy the topics include ancient and modern astronomy, gravity, the solar system, and solar and lunar eclipses.

Credits

3

Academic Level

Undergraduate

SCI252 - Natural Sciences II

Description

Natural Sciences II is an interdisciplinary biological science course for non-science majors. It explores the creation of the solar system and Earth and the origin and evolution of life on Earth. It traces the evolution of life from single cells to complex organisms and focuses on the evolution of modern humans. It discusses the cellular and genetic mechanisms of evolution together with fundamental aspects of ecology and theories of mass extinctions. Finally, it explores topics in exobiology and compares life on Earth to possible life elsewhere in the galaxy.

Academic Level

Graduate

Sociology

SOC112 - Introduction to Sociology

Description

Is one's identity individually or socially constructed? Are all stereotypes invalid or can there be value in generalizations? Is globalization widening the gaps or homogenizing the world? In this course, students will grapple with these essential questions in examining the world through the lens of a sociologist. Sociology offers an empirically-based methodology for critically evaluating society-from issues of individual agency to the roots of global institutions. Culture, norm stratification, systems, structure, social institutions, social change, the organization of social behavior and its relationship to society and social conditions are emphasized. Students will challenge their own preconceived notions and evaluate these constructs in terms of their relevancy to contemporary issues and problems.

Credits

3

Academic Level

Undergraduate

SOC199 - International Cultural Engagement III

Description

This course will provide the students the opportunity to engage with the local community through their participation in structured social projects, in one of the NGO or non-profit organizations associated with a foreign university. Through a service-learning component, students will contribute to the development of the local community while discussing, reflecting and debating about the different socioeconomic and cultural contexts of their service site.

Additional Information

Course offered as needed.

Credits

3

Academic Level

Undergraduate

Campus Programs

SOC207 - Exploring Racial and Cultural Identity

Description

This course will provide students the opportunity to study race at the individual level. Students will be asked to consider their own life experiences in relationship to the course material. We will explore several complex topics that include: What does it mean to embrace equality for all people but feel more comfortable in communities that closely resemble us? What is the appropriate response when we observe racism or discrimination of others? The course will familiarize students with the concept of what being white means in our society. By the end, students should possess an enhanced understanding of how race, particularly the concept of "whiteness," is expressed in literary texts, historical studies, and popular media. Learning is not simply a process of acquiring more information but of being open to adjusting how we think about the world in face of new information. This class requires that students take emotional as well as intellectual risks; we will cultivate discussions based on honesty, respect, and kindness.

Additional Information

Offered every spring term.

Credits

3

Academic Level

Undergraduate

SOC213 - Sociology of Social Problems

Description

Students in this course analyze contemporary social problems in America and other societies. Issues include economic limitations, class and poverty, race and ethnic relations, sexism, ageism, and environmental and population concerns.

Campus Programs

SOC310 - Sociology of Globalization

Description

The world is becoming increasingly interconnected. Our clothes come from Asia, our computers and phones from China. How can we make sense of how this is affecting our lives at a personal, community, national and global level? This course will take students through a study of what globalization is. The readings and class discussions will develop key themes for looking critically at how global restructuring is occurring. We will examine the key themes and major debates about our place in the global society. The course will explore questions such as how popular culture and consumer goods are becoming homogenized; how global restructuring is impacting social equality/inequality and social justice; and what these changes mean in terms of corporate and transnational power relationships.

Credits

3

Requisites

- Complete:
 - SOC112 - Introduction to Sociology (3)

Academic Level

Undergraduate

SOC312 - Biosociology

Description

The questions of biological influences on culture and cultural influences on biology are explored from the sociological perspective. "We enter this world with a fundamental human nature - a set of behavioral dispositions-rooted in the design systems of our species and its long evolutionary history" (Walsh 2014). Genes and culture are co-evolutionary partners - we are, in effect, born unfinished; to be finished through culture and our interactions within it (Geertz). There is a biological framework that calls for culture and cultural responses that complete biological development. This continues to be a controversial but evolving field of inquiry.

SOC317 - Sociology of the Family

Description

This course is a sociological examination of the family institution in America and other societies. Traditional and nontraditional family patterns are studied to provide students with a structure for understanding sex, marriage, family and kinship systems.

Credits

3

Requisites

- Complete:
 - SOC112 - Introduction to Sociology (3)

SOC318 - Sustainable Communities

Description

How do we build a society fit for living This course looks to the field of environmentally sustainable community development (ESCD) for answers to this question. Students explore the principles and practices of ESCD using pattern-mapping of community needs, site visits, and other experiential learning tools that turn communities into classrooms, and bring the challenge of building environmentally sustainable communities to life. In the process, students identify assumptions that lead to unsustainable social practices, and develop the skills necessary to help create livable local landscapes and sustainable local futures through individual and community action.

Additional Information

Offered every fall term.

Credits

3

Requisites

- 1 of the following:
 - ENV100 - Introduction to Sustainability (3)
 - ENV219 - Environmental Issues (3)
 - SCI219 - Environmental Issues (3)
 - SOC112 - Introduction to Sociology (3)

Academic Level

Undergraduate

SOC320 - Sociology of Gender

Description

The examination of gender in society. Students will explore the social construction of gender, gender identity development, sexuality and power, and other aspects concerning the meanings and implications of being 'male', 'female', or 'transgender'.

Credits

3

Requisites

- Complete:
 - SOC112 - Introduction to Sociology (3)

Academic Level

Undergraduate

SOC324 - Sociology of Crime and Violence

Description

The course examines the nature, causes, and consequences of crime and violence to a society. Applying a legal and sociological perspective, the course examines: 1) the structure of the law and the criminal justice system; 2) the nature and causation of criminal behavior; and 3) the various types of crime and criminality.

Additional Information

Offered every fall term.

SOC325 - Sociological Perspectives

Description

Sociology is the study of social life and behavior. Sociologists study societies by researching social groups, patterns, interactions, and institutions. We are interested in how they work, how they change, and their connection to people's lives. This course will build on what students learned in SOC-112 Introduction to Sociology. It will engage students in a discussion of what we know theoretically in the discipline of sociology through the work of key "voices" in the sociological tradition. The course intends to cultivate your ability to see social things with the hope that, as Peter Berger states, "things are not what they seem". In other words, in this class students will learn to rethink assumptions about social facets of society that are commonly taken for granted.

Additional Information

Offered every fall term.

Credits

3

Requisites

- Complete:
 - SOC112 - Introduction to Sociology (3)

Academic Level

Undergraduate

SOC326 - Sociology of Deviant Behavior

Description

This course is a sociological analysis of the nature, cause, and societal reactions to deviant behavior, including mental illness, suicide, drug and alcohol addiction and sexual deviation.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Complete:
 - SOC112 - Introduction to Sociology (3)

Academic Level

Undergraduate

SOC333 - Sport and Society

Description

This course examines the major issues and controversies of sport in society. Students will develop an appreciation of the ways sport in society contributes to analyzing and understanding human behavior in sports contexts. Students will be encouraged to ask questions and think critically about sports as part of social life.

Credits

3

Requisites

- 1 of the following:
 - COM212 - Public Speaking (3)
 - ENG200 - Sophomore Seminar (3)

Academic Level

Undergraduate

SOC373 - Regional Sustainability Field Study

Description

The class is designed to be a two week intensive field based class in the Pacific Northwest. Students will travel throughout Washington, Oregon, and Idaho studying the interactions between humans and the environment. Unlike a traditional classroom setting, students will be actually experiencing the topics covered first hand. Some places that will be covered and experienced on the trip are as follows: Channeled Scablands, Mt. Rainer National Park, Grand Coulee Dam, Mount St. Helens National Volcanic Monument, Pacific Ocean, Columbia River Gorge National Scenic Area, John Day Fossil Beds National Monument, and the Oregon Trail. This course can be taken more than once.

Additional Information

Offered every spring term.

Credits

3

Requisites

- Permission of instructor

Academic Level

Undergraduate

SOC490 - Community Sociology Internship

Description

A course designed to give the student a working experience in the social services. The student will find a site that is of interest and career potential, work out a schedule of no less than 150 hours, and fulfills the learning outcomes of the course. This is an experiential course in which the student works closely with a site supervisor, the instructor of the course, as well as engages in some productive function within the agency.

SNHU202 - SNHU Experience: Transition to SNHU

Description

SNHU 202: Transition to SNHU will help transfer students make the most successful, least stressful transition possible. This is a course in the 3-course sequence of SNHU Experience courses (SNHU-101/202, 303, 404) designed to support your academic, personal, and professional development. The goal of class discussions and outside work for SNHU-202 will be to help you develop and refine the knowledge and skills you will need to manage and get the most out of academic and personal opportunities, as well as integrate them with your previous and future academic and personal experiences. Remember that these opportunities may be challenging, but challenges allow us all to grow and change.

Campus Programs

SNHU399 - Inquiry Scholars of SNHU

Description

In this experience, participants will be given the opportunity to research an assessment question that measures student learning at SNHU. Participants will apply basic assessment techniques to develop a measurable question, collect and analyze data using a variety of techniques, and will report findings to university stakeholders using a collaborative, cohort approach. Many participants choose to present their research at professional conferences or for other external audiences. This is an elective class that may be repeated and can be taken for variable credit. Students are invited to participate in this course.

SNHU480 - Independent Study

Description

Independent study allows the student to investigate any SNHU subject not incorporated into the curriculum or to do in-depth study or research in a specialized area.

Credits

0 - 3

Academic Level

Undergraduate

SNHU490 - General Education Internship

Description

SNHU 490 is a credit-bearing internship for students who have already taken two courses in their General Education cluster and choose to complete their third course in their cluster as an approved General Education Internship. Students will work with the Career Development Center (CDC) to secure an internship and will then work with an assigned internship advisor to establish related academic requirements and specific assignments. The Internship, as well as the related academic component, will allow students to apply knowledge from their General Education cluster to real-world experience as well as reflect on how such real-world experience integrates back into the classroom.

SPED106 - Children with Exceptionalities

Description

This course provides students with deep understanding of children with disabilities and specific characteristics of disabilities and how they impact learning in the general curriculum. Students will examine and be prepared to define ways in which such disabilities are diagnosed and possible strategies and techniques (to include assistive technology) to assist the student in the general classroom to the extent possible. Tiered Support Systems will be discussed as a general education initiative that can serve the needs of all students. Students will research resources available for families and schools to support the needs of disabled children. The role of the family and school as partners will be developed as a critical technique to serve the needs of students, as well as facilitating effective meetings and communication efforts that must be part of the role of special educator.

Additional Information

This course includes a course content fee. All of your digital materials and e-texts (if applicable) have been included in the cost of the course. Barnes & Noble on behalf of SNHU has negotiated the very best price for these materials and arranged with the publisher to have them available in Brightspace on the first day of class. While not recommended, any student wishing to exercise their right to opt out of an eligible course fee must visit the Course Materials link in the Brightspace course and follow the Opt-Out instructions. This must be completed by the end of the add/drop period.

Undergraduate

SPED230 - Strategies for Engaging Diverse Learners

Description

Students will examine the personal, physical, social and academic issues related to programming for children with disabilities. An emphasis is placed on practical aspects of behaviors associated with a child's disability and the importance of the classroom environment. This course also addresses the history of Special Education, as well as current trends and research. This is the foundation course for certification or licensure as a General Special Education Teacher Grades K-12. Federal and state legislation will be reviewed, including NH State Standards for Children with Disabilities, the Individuals with Disabilities Education Act (IDEA), the Every Student Succeeds Act (ESSA) and the Americans with Disabilities Act (ADA).

Additional Information

This course includes a course content fee. All of your digital materials and e-texts (if applicable) have been included in the cost of the course. Barnes & Noble on behalf of SNHU has negotiated the very best price for these materials and arranged with the publisher to have them available in Brightspace on the first day of class. SPED383 - Clinical Experience III Special Education

Description

This clinical experience will focus on the knowledge, skills, abilities and dispositions teachers need to teach elementary school students, K-6. This clinical experience will provide evidence-based research, and clinical opportunities that will be implemented, analyzed, evaluated and refined during the 16 weeks of clinical experience. This iterative process facilitates the development of skills that promotes the learning of all students, including students with disabilities, in the following: (a) The Learner and Learning; (b) Content Knowledge; (c) Instructional Practice; (d) Professional Responsibility. With the support of the college faculty and the public school clinical practitioners, the teacher candidate will actively engage in on-going self-assessment, focusing on the refinement of supporting student learning and linking the K-8 learning progress to the knowledge, skills, abilities and dispositions of the teacher candidate.

SPED520 - Assessment of Student Performance

Description

This course is designed to provide an overview of practical performance assessments that can be used to measure student progress in the general education setting. Learners will become familiar with a repertoire of authentic assessments and knowledge of progress monitoring tools including but not limited to formative and summative assessments, diagnostic tools, performance tasks, criteria checklists, rubrics, student portfolios and the use of multiple sources of data in measuring student performance. The course will examine a variety of accountability measures including standardized tests, observation, curriculum based measures, utilization of Response to Intervention (RTI) as a system for planning, instruction, progress monitoring and interventions. The role Professional Learning Community Models (PLC's) in targeting both behavioral and academic achievement will be explored. The overall goal of the course is to prepare educators to utilize assessment data in the design of classroom instruction and monitoring of student progress for a broad range of students.

SPED540C - Classroom and Behavior Management

Description

This course focuses on the principles and approaches that foster a positive learning environment and help to reduce the challenging behaviors that often confront teachers in the classroom. The course will provide both the theoretical foundations of behavior as well as the evidence-based strategies that have proved most effective for classroom management. The concept of positive behavioral interventions and supports will be explored, including the preventive steps that can be used to avert behaviors from escalating. Educators will also become knowledgeable about the federal requirements and guidelines for the discipline of students with disabilities under I.D.E.A. In addition, the course will emphasize the critical connection between student behavior, classroom management and well-designed instructional practices.

SPED624C - Professional Collaboration

Description

This course has been designed to assist special education teachers in examining their consultative roles and responsibilities when working in inclusive settings. Students will be introduced to, and examine the nature of collaboration, developing relationships between general and special educators, and paraprofessionals. The focus of the course will be on practical application and establishing strong relationships between general and special educators. The course also includes facilitating engagement of parents, and families as well as appropriate community agencies. The purpose of the course is to prepare special educators to interact and collaborate with a variety of stakeholders that are typically associated with students placed in inclusive settings. In order for special education teachers to be successful they must have the skills and ability to support students in the general education setting which means collaborative interaction, decision making, accountability and teamwork. Knowledge of general education curriculum requirements, related assessments, researched based interventions and use of data are all topics that will be covered as part of this course.

SPED632 - Clinical Experience III

Description

This competency-based course will focus on the knowledge, skills, abilities and dispositions teachers need to teach students with disabilities. This clinical experience will provide evidence-based research, and clinical opportunities that will be implemented, analyzed, evaluated and refined during the 16 weeks of clinical experience. This iterative process facilitates the development of skills that promotes the learning of all students, especially students with disabilities, in the following: (a) Learner development; (b) Learning differences; (c) Learning environment; (d) Content knowledge; (d) Assessment; (e) Planning and learning facilitation; and (f) Reflection and continuous growth. With the support of the college faculty and the cooperating practitioners, the teacher candidate will actively engage in on-going self-assessment, focusing on the refinement of instructing students, supporting student learning and linking their learning progress to the knowledge, skills, abilities and dispositions of the teacher candidate.

Campus Programs

SPED680C - IEP Development

Description

This course will give students the opportunity to review special education law, with an emphasis upon NH Standards for the Education of Children with Disabilities and the Individuals with Disabilities Education Act. Course expectations will require heavy emphasis upon IEP development through examination of required elements of Individual Education Programs (IEPs) and participation on mock IEP Teams. Students will be introduced to state and federal special education regulations, practical application of the law, ethical codes and related professional standards. The course will require working through mock IEP team experiences in the development of such plans. This will require knowledge of curriculum standards, review of mock student records, participation in mock IEP/Placement meetings, development of mock IEPs and the identification of methods for monitoring progress. Students will also review current cases and trends in special education law, analyze and interpret case studies and learn how to research both statutory and case law. Time will also be spent on review of Section 504 of the Rehabilitation Act of 1973, and the Every Student Succeeds Act of 2015 and the impact of such law upon students with disabilities.

SPT525 - Sport Licensing and Strategic Alliances

Description

The goal of this course is to develop a deep, working knowledge of sports licensing and strategic alliances and how they relate to the business of sports. We will fully explore the process of identifying and developing a sports licensing and/or strategic alliance strategy so the student will be enabled to apply this knowledge in a real business setting. By doing so a student as a future manager will better recognize opportunities that sports licensing and strategic alliances can potentially offer to their sport business. By developing this in an international context, a student will engender a global view of how sports licensing and strategic alliances are developed and implemented in harmony with overall firm strategy leading to increased shareholder value.

SPT608L - Sport Agency Lab 1

Description

This course covers the direct application of sport marketing principles (from SPT 608) through analysis of specific marketing issues and problems for a sport business. Students work with cross functional teams to develop strategies and solutions to address the company's needs and specific project. A hands on and possibly on site format is used. General Agency Lab Description: Specifically, the Agency model is designed to provide students with projects similar to consulting engagements, matched with just-in-time instruction to teach content related to the project. As such, current graduate classes (such as Sport Analytics and Sport Marketing) are integrated into the project and allow students to practice and apply the material as it is learned. Faculty from across the Sport Management department and potentially other Departments will collaborate with students based on their expertise and the demands of the project. Sport students may also work with students from other programs (MBA) to collaborate in cross-functional teams and communicate directly with companies. The final deliverables will include a report and presentation to the company and faculty.

SPT622 - Sport Business Analytics

Description

Sport Analytics (SPT 622) has been crafted to provide the graduate student with a substantive understanding of analytical tools used by organizations involved in sports. Upon completion, a student will be able to develop and apply analytical tools to assist in business decision making. This includes an overview of database management, data collection, statistical methods, and data presentation. Focusing on the application of data within sport organizations, this class examines analytics involving player evaluation, consumer behavior, ticket pricing, and in-game strategies. A significant part of this class is experiential and requires collaboration with other students and selected sport organizations.
