Footnotes:

1/For comparison of North American Industry Classification System (NAICS) - based product codes with Schedule B export codes and HTSUSA import codes, see Table 4.

2/Import and export data were collected in cubic meters. A conversion factor of 2.35973725 thousands of cubic meters per 1 million of board feet was used to convert production from millions of board feet to thousands of cubic meters.

3/Import and export data for 2010 and 2009 do not include cross-ties.

4/The totals for softwoods and hardwoods include the n.s.k. production data.

Note: Total may not equal the sum of the details due to independent rounding.

HISTORICAL NOTE

The Census Bureau has collected data on lumber production and stocks since 1904.

Historical Current Industrial Reports data (called Facts for Industry before 1959) may be obtained from a Federal Depository Library. To locate a Federal Depository Library in your area, please visit <http://www.gpoaccess.gov/libraries.html>.
