

Metalworking Machinery: 2002

Issued July 2003

Summary

MQ333W(02)-5

Current Industrial Reports

Current data are released electronically on Internet for all individual surveys as they become available. Use: <http://www.census.gov/mcd/>. Individual reports can be accessed by choosing "Current Industrial Reports (CIR)," clicking on "CIRs by Subsector;" then choose the survey of interest. Follow the menu to view the PDF file or to download the worksheet file (WK format) to your personal computer.

These data are also available on Internet through the U.S. Department of Commerce and STAT-USA by subscription. The Internet address is: www.stat-usa.gov/. Follow the prompts to register. Also, you may call 202-482-1986 or 1-800-STAT-USA, for further information.

For general CIR information, explanation of general terms and historical note, see the appendix.

Address inquiries concerning these data to Investment Goods Industries Branch, Manufacturing and Construction Division (MCD), Washington, DC 20233-6900, or call Larry Blumberg, 301-763-4744.

For mail or fax copies of this publication, please contact the Information Services Center, MCD, Washington, DC 20233-6900, or call 301-763-4673.

Table 1. Value of Shipments, Including Exports of Metalworking Machinery by Class of Product: 1993 to 2002
[Thousands of dollars]

Product code	Product description	2002	2001	2000	1999	1998
	Metalworking machinery.....	2,002,082	2,987,581	3,632,410	3,783,336	4,817,066
	Metal cutting type 1/2/.....	1,418,660	2,163,666	2,552,370	2,512,638	3,481,754
333512A1	Boring machines.....	128,329	124,763	87,200	53,822	73,583
333512A1	Drilling machines 3/.....	17,137	22,576	23,694	50,649	102,930
33351211	Gear cutting machines 3/.....	111,048	137,232	180,616	132,046	197,672
33351221	Grinding and polishing machines (except gear-tooth grinding, lapping, polishing, buffing machines).....	210,691	367,715	454,313	477,132	535,508
33351231	Lathes 4/.....	132,365	262,020	287,021	297,398	472,943
33351241	Milling machines 5/.....	56,125	137,778	150,503	200,495	281,101
33351271	Machining centers (multi-function numerically controlled machines).....	273,639	435,493	629,717	597,862	897,331
33351281	Station type machines.....	169,896	347,948	401,772	407,136	571,038
33351291	Other metal cutting machine tools (except those designed primarily for home workshops, laboratories, etc.).....	238,295	276,354	333,204	291,742	344,562
3335126111	Remanufactured metal cutting machine tools.....	50,404	49,174	(NA)	(NA)	(NA)
	Metal forming type.....	583,422	823,915	1,080,040	1,270,698	1,335,312
33351311 pt.	Punching and shearing machines.....	105,925	155,316	203,813	219,988	254,323
33351311 pt.	Bending and forming machines.....	141,273	202,586	262,372	265,754	262,748
33351331	Presses (except forging).....	140,063	180,347	303,146	433,736	399,489
33351351 pt.	Forging machines 6/.....	(D)	(D)	(D)	(D)	(D)
33351351 pt.	Other metal forming type machines 6/.....	187,360	275,785	310,709	351,220	418,752
3335137121	Remanufactured metal forming machine tools.....	8,801	9,881	(NA)	(NA)	(NA)

D Withheld to avoid disclosing data for individual companies. NA Not available. pt. Part.

1/Data for "All lathes (turning machines) valued under \$3,025 each" and "All milling machines valued under \$3,025 each" are included in total "Metal cutting type" for 1998 through 2002.

2/For 2002, data for product codes 3335123126, "Vertical NC turning machines," and 3335123134, "All nonnumerically controlled lathes (turning machines) valued at \$3,025 each or more," are included in total "Metal cutting type."

3/Data for part of "Drilling machines" have been combined with "Gear cutting machines" for 2001 and 2002 to avoid disclosing data for individual companies.

4/For 2002, product code 33351231, "Lathes," excludes the values for product codes 3335123126, "Vertical NC turning machines," 3335123131, "All lathes (turning machines) valued under \$3,025 each," and 3335123134, "All nonnumerically controlled lathes (turning machines) valued at \$3,025 each or more."

5/Product code 33351241, "Milling machines," excludes the value for product code 3335124101, "All milling machines valued under \$3,025 each."

6/Data for "Forging machines" have been combined with "Other metal forming type machines" to avoid disclosing data for individual companies.

Table 2. Total Shipments and Unfilled Orders
[Quantity in units; value in thousands of dollars]

Product code	Product description	No. of cos.	2002				2001			
			Total shipments		Unfilled orders (value)	Total shipments		Unfilled orders (value)

- Represents zero. D Withheld to avoid disclosing data for individual companies. n.e.c. Not elsewhere classified. X Not applicable.

1/Product codes 3335123126 and 3335123134, and 3335128101 for "Unfilled orders (value)" for 2002, and product code 3335123134 for "Unfilled orders (value)" in 2001, are included in "Metal cutting type machine tools valued at \$3,025 each or more," but excluded from product classes 33351231 and 33351281 respectively.

2/"Unfilled orders (value)" for product codes 333512A111 and 3335129101 are included in the total for "Metal cutting type machine tools valued under \$3,025," but excluded from product classes 333512A1 and 33351291.

3/Product code 3335123131 is included in the total for "Metal cutting type machine tools valued under \$3,025" but excluded from product class 33351231.

4/Product code 3335124101 is included in the total for "Metal cutting type machine tools valued under \$3,025" but excluded from product class 33351241.

5/Product codes 333512A119, 333512A121, 333512A123 and 3335121100 were combined to avoid disclosing data for individual companies. Product codes 333512A119, 333512A121, and 333512A123 were not included with 333512A1 "Boring and drilling machines."

6/Product codes 333512A103 and 333512A105 were combined to avoid disclosing data for individual companies.

7/Product codes 333512A113 and 333512A117 were combined to avoid disclosing data for individual companies.

8/Product codes 3335122108, 3335122116, and 3335122151 for shipments, and 3335122142 and 3335122151 for "Unfilled orders (value)" for 2002, and product codes 3335122108 and 3335122116 for 2001 were combined to avoid disclosing data for individual companies.

9/Product codes 3335122122 and 3335122136 for 2002 and 3335122120 for 2001 were combined to avoid disclosing data for individual companies.

Table 2. Total Shipments and Unfilled Orders
[Quantity in units; value in thousands of dollars]

10/Product codes 3335122156 and 3335122161 for shipments were combined to avoid disclosing data for individual companies.
11/"Unfilled orders (value)" for product codes 3335122156, 3335122161, and 3335122166 were combined to avoid disclosing data for individual companies.
12/Product codes 3335123101, 3335123116, and 3335123121 were combined to avoid disclosing data for individual companies.
13/Product codes 3335124106, 3335124111, and 3335124121 were combined to avoid disclosing data for individual companies.
14/Product codes 3335127101 and 3335127106 for shipments for 2002 were combined to avoid disclosing data for individual companies.
15/Product codes 3335127112, 3335127113, and 3335127114 were combined to avoid disclosing data for individual companies.
16/Product codes 3335128101, 3335128106 and 3335128111 with the exception of "Unfilled orders (value)" for 2002 (see footnote 1) were combined to avoid disclosing data for individual companies.
17/Product codes 3335129106 and 3335129136 for shipments were combined to avoid disclosing data for individual companies.
18/"Unfilled orders (value)" for product codes 3335129122 and 3335129123 were combined to avoid disclosing data for individual companies.
19/"Unfilled orders (value)" for product codes 3335133101 and 3335135101 are included in the total for "Metal forming type machine tools valued under \$3,025" but excluded from product classes 33351331 and 33351351.
20/Product codes 3335131111 and 3335131126 for 2002 were combined to avoid disclosing data for individual companies.
21/Product codes 3335131111 and 3335131116 for shipments for 2001, and "Unfilled orders (value)" for product codes 3335131111, 3335131116, and 3335131126 for 2001 were combined to avoid disclosing data for individual companies.
22/"Unfilled orders (value)" for product codes 3335131136 and 3335131161 for 2002 were combined to avoid disclosing data for individual companies.
23/Product codes 3335131142 and 3335131151 were combined to avoid disclosing data for individual companies.
24/Product codes 3335133106 and 3335133113 for shipments, and "Unfilled orders (value)" for 2001 were combined to avoid disclosing data for individual companies.
25/Product codes 3335133121, 3335133128, 3335133136 and 3335133141 for 2002 were combined to avoid disclosing data for individual companies.
26/Product codes 3335133121, 3335133128, and 3335133141 shipments for 2001 and product codes 3335133121 and 3335133141 for "Unfilled orders (value)" for 2001 were combined to avoid disclosing individual company data.
27/Product codes 3335133146 and 3335133151 were combined to avoid disclosing data for individual companies.
28/"Unfilled orders (value)" for product codes 3335133161 and 3335133166 for 2002, and "Unfilled orders (value)" for product codes 3335133156, 3335133161, and 3335133166 for 2001 were combined to avoid disclosing data for individual companies.
29/Product codes 3335135176, 3335135116 and 3335135126, and "Unfilled orders (value)" for 3335135106, and 3335135111 for shipments for 2002, were combined to avoid disclosing data for individual companies.

Note: The percent of estimation of each item is indicated as follows: a/16 to 25 percent of this item is estimated. b/26 to 50 percent of this item is estimated. c/Over 50 percent of this item is estimated.

Table 3. Shipments of Numerically Controlled Machines; All Export Shipments: 2002 and 2001

D Withheld to avoid disclosing data for individual companies. n.e.c. Not elsewhere classified. X Not applicable.

1/Data includes the value of all types of machines exported, as reported by MQ333W survey panel.

2/Data were included in total "Metal cutting type machine tools."

3/Data included in "Horizontal NC turning machines, valued at \$3,025 or more."

4/Data included in "Chuck sizes 15 inches and over and multiple spindle."

5/Data for export shipments included in "Drill, mill and bore, vertical (automatic tool change)."

6/Data for shipments of numerically controlled machines included in "Y-axis travel 20 inches through 26 inches."

7/Data for export shipments included in "Drill, mill and bore, horizontal (automatic tool change)."

8/Data for shipments of numerically controlled machines included in "Over 800mm pallet."

9/Data for "Remanufactured metal forming machines" included in "Forging machines, and all other metal forming type machine tools."

Table 4. Shipments, Exports, and Imports of Metalworking Machinery: 2002 and 2001

General CIR Survey Information, Explanation of General Terms and Historical Note

GENERAL

The CIR program has been providing monthly, quarterly, and annual measures of industrial activity for many years. Since 1904, with its cotton and fats and oils surveys, the CIR program has formed an essential part of an integrated statistical system involving the quinquennial economic census, manufacturing sector, and the annual survey of manufactures. The CIR surveys, however, provide current statistics at a more detailed product level than either of the other two statistical programs.

The primary objective of the CIR program is to produce timely, accurate data on production and shipments of selected products. The data are used to satisfy economic policy needs and for market analysis, forecasting, and decision making in the private sector. The product-level data generated by these surveys are used extensively by individual firms, trade associations, and market analysts in planning or recommending marketing and legislative strategies, particularly if their industry is significantly affected by foreign trade. Although production and shipments information are the two most common data items collected, the CIR program collects other measures also such as inventories, orders, and consumption. These surveys measure manufacturing activity in important commodity areas such as textiles and apparel, chemicals, primary metals, computer and electronic components, industrial equipment, aerospace equipment, and consumer goods.

The CIR program uses a unified data collection, processing, and publication system. The U.S. Census Bureau updates the survey panels for most reports annually and reconciles the estimates to the results of the broader-based annual survey of manufactures and the economic census, manufacturing sector. The manufacturing sector provides a complete list of all producers of the products covered by the CIR program and serves as the primary source for CIR sampling. Where a small number of producers exist, CIR surveys cover all known producers of a product. However, when the number of producers is too large, cutoff and random sampling techniques are used. Surveys are continually reviewed and modified to provide the most up-to-date information on products produced. The CIR program includes a group of mandatory and voluntary surveys. Typically the monthly and quarterly surveys are conducted on a voluntary basis. Those companies that choose not to respond to the voluntary surveys are required to submit a mandatory annual counterpart corresponding to the more frequent survey.

NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS), 1997

The adoption of the North American Industry Classification System (NAICS) in the 1997 Economic Census has had a major impact on the comparability of current and historic data. Approximately half of the industries in the manufacturing sector of NAICS do not have comparable industries in the Standard Industrial Classification (SIC) system that was used in the past.

While most of the change affecting the manufacturing sector was change within the sector, some industries left manufacturing and others came into manufacturing. Prominent among those that left manufacturing are logging and portions of publishing. Prominent among the industries that came into the manufacturing sector are bakeries, candy stores where candy is made on the premises, custom tailors, makers of custom draperies, and tire retreading. The net effect of the classification changes are such that if the 1997 value of shipments data for all manufacturers were tabulated on an SIC basis, it would be approximately 3 percent higher.

Listed below are the NAICS sectors:

- 21 Mining
- 22 Utilities
- 23 Construction
- 31-33 Manufacturing
- 42 Wholesale Trade
- 44-45 Retail Trade
- 48-49 Transportation and Warehousing
- 51 Information
- 52 Finance and Insurance
- 53 Real Estate and Rental and Leasing
- 54 Professional, Scientific, and Technical Services
- 55 Management of Companies and Enterprises
- 56 Administrative and Support and Waste Management and Remediation Services
- 61 Educational Services
- 62 Health Care and Social Assistance
- 71 Arts, Entertainment, and Recreation
- 72 Accommodation and Food Services
- 81 Other Services (except Public Administration)

(Not listed above are the Agriculture, Forestry, Fishing, and Hunting sector (NAICS 11), partially covered by the census of agriculture conducted by the U.S. Department of Agriculture, and the Public Administration sector (NAICS 92), covered by the census of governments conducted by the Census Bureau.)

The 20 NAICS sectors are subdivided into 96 subsectors (three-digit codes), 313 industry groups (four-digit codes), and, as implemented in the United States, 1170 industries (five- and six-digit codes).

FUNDING

The Census Bureau funds most of the surveys. However, a number of surveys are paid for either fully or partially by other Federal Government agencies or private trade associations. A few surveys are mandated, but all are authorized by Title 13 of the United States Code.

RELIABILITY OF DATA

Survey error may result from several sources including the inability to obtain information about all cases in the survey, response errors, definitional difficulties, differences in the interpretation of questions, mistakes in recording or coding the reported data, and other errors of collection, response, coverage, and estimation. These nonsampling errors also occur in complete censuses. Although no direct measurement of the biases due to these nonsampling errors has been obtained, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize their influence.

A major source of bias in the published estimates is the imputing of data for nonrespondents, for late reporters, and for data that fail logic edits. Missing figures are imputed based on period-to-period movements shown by reporting firms. A figure is considered to be an impute if the value was not directly reported on the questionnaire, directly derived from other reported items, directly available from supplemental sources, or obtained from the respondent during the analytical review phase. Imputation generally is limited to a maximum of 10 percent for any one data cell. Figures with imputation rates greater than 10 percent are suppressed or footnoted. The imputation rate is not an explicit indicator of the potential error in published figures due to nonresponse, because the actual yearly movements for nonrespondents may or may not closely agree with the imputed movements. The range of difference between the actual and imputed figures is assumed to be small. The degree of uncertainty regarding the accuracy of the published data increases as the percentage of imputation increases. Figures with imputation rates above 10 percent should be used with caution.

DATA REVISIONS

Statistics for previous years may be revised as the result of corrected figures from respondents, late reports for which imputations were originally made, or other corrections. Data that have been revised by more than 5 percent from previously published data are indicated by footnotes.

DISCLOSURE

The Census Bureau collects the CIR data under the authority of Title 13, United States Code, which specifies that the information can only be used for statistical purposes and cannot be published or released in any manner that would identify a person, household, or establishment. "D" indicates that data in the cell have been suppressed to avoid disclosure of information pertaining to individual companies.

EXPLANATION OF GENERAL TERMS

Capacity. The maximum quantity of a product that can be produced in a plant in 1 day if operating for 24 hours. Includes the capacity of idle plants until the plant is reported to be destroyed, dismantled, or abandoned.

Consumption. Materials used in producing or processing a product or otherwise removing the product from the inventory.

Exports. Includes all types of products shipped to foreign countries, or to agents or exporters for reshipment to foreign countries.

Gross shipments. The quantity or value of physical shipments from domestic establishments of all products sold, transferred to other establishments of the same company, or shipped on consignment, whether for domestic or export sale or use. Shipments of products purchased for resale are omitted. Shipments of products made under toll arrangements are included.

Interplant transfers. Shipments to other domestic plants within a company for further assembly, fabrication, or manufacture.

Inventories. The quantity or value of finished goods, work in progress, and materials on hand.

Machinery in place. The number of machines of a particular type in place as of a particular date whether the machinery was used for production, prototype, or sampling, or was idle. Machinery in place includes all machinery set up in operating positions.

Net receipts. Derived by subtracting the materials held at the end of the previous month from the sum of materials used during the current month.

Production. The total volume of products produced, including: products sold; products transferred or added to inventory after adjustments for breakage, shrinkage, and obsolescence, plus any other inventory adjustment; and products that undergo further manufacture at the same establishment.

Quantities produced and consumed. Quantities of each type of product produced by a company for internal consumption within that same company.

Quantity and value of new orders. The sales value of orders received during the current reporting period for products and services to be delivered immediately or at some future date. Also represents the net sales value of contract change documents that increase or decrease the sales value of the orders to which they are related, when the parties concerned are in substantial agreement as to the amount involved. Included as orders are only those that are supported by binding legal documents such as signed contracts or letter contracts.

Quantity and value of shipments. The figures on quantity and value of shipments represent physical shipments of all products sold, transferred to other establishments of the same company, or shipped on consignment, whether for domestic or export sale. The value represents the net sales price, f.o.b. plant, to the customer or branch to which the products are shipped, net of discounts, allowances, freight charges, and

returns. Shipments to a company's own branches are assigned the same value as comparable appropriate allocation of company overhead and profit. Products bought and resold without further manufacture are excluded.

Stocks. Total quantity of ending finished inventory.

Unfilled orders (backlog). Calculated by adding net new orders and subtracting net sales from the backlog at the end of the preceding year.

HISTORICAL NOTE

Data on metalworking machinery have been collected by the Census Bureau since 1942. Historical data may be obtained from Current Industrial Reports (called Facts for Industry before 1959) available at your local Federal Depository Library.
