

Textiles: 2006

Summary

Issued June 2007

MQ313A(06)-5

Current data are released electronically on Internet for all individual surveys as they become available. Use: <http://www.census.gov/mcd/>. Individual reports can be accessed by choosing "Current Industrial Reports (CIR)," clicking on "CIRs by Subsector;" then choose the survey of interest. Follow the menu to view the PDF file or to download the worksheet file (XLS format) to your personal computer.

These data are also available on Internet through the U.S. Department of Commerce and STAT-USA by subscription. The Internet address is: www.stat-usa.gov/. Follow the prompts to register. Also, you may call 202-482-1986 or 1-800-STAT-USA, for further information.

Current Industrial Reports

Address inquiries concerning these data to Consumer Goods Industries Branch, Manufacturing and Construction Division (MCD), Washington, DC 20233-6900, or call Matt Wheeler, 301-763-4637.

For mail or fax copies of this publication, please contact the Information Services Center, MCD, Washington, DC 20233-6900, or call 301-763-4673.

Table 1. Summary of Production Textiles: 2005 and 2006

Year and quarter	Yarn (millions of pounds)	Broadwoven fabrics, other than silk and tire cord (millions of square yards)	Tire cord and tire cord fabrics (millions of undipped pounds)	Knit fabrics (millions of pounds)	Sheets and pillowcases (thousands of dozens)	Towels (thousands of dozens)
2006	7,100	6,247	826	828	9,673	16,374
Fourth quarter.....	1,510	1,281	157	177	1,863	2,562
Third quarter.....	1,767	1,506	208	194	2,272	2,864
Second quarter.....	1,940	1,638	224	219	2,532	5,209
First quarter.....	1,882	1,822	237	238	3,006	5,739
2005	7,993	9,339	892	1,067	15,990	29,971
Fourth quarter.....	1,908	1,728	215	240	3,722	6,706
Third quarter.....	1,979	2,330	220	258	3,925	7,489
Second quarter.....	2,025	2,564	231	281	3,659	7,306
First quarter.....	2,081	2,717	227	288	4,684	8,470

Note: Detail may not sum to total due to rounding.

Table 2a. Summary of Yarn Production by Fiber: 2006
 [Production in thousands of pounds]

Product description	Total		Fourth quarter		Third quarter		Second quarter		First quarter
Spun cotton yarns.....	2,356,707		487,370	r/	603,311	r/	668,402		597,624
Cotton, carded, 85 percent or more cotton.....	2,066,637		421,161	r/	525,131	a/r/	593,360		526,985
Cotton, carded, other chiefly cotton blends.....	163,029		37,963	r/	46,435	a/	42,410		36,221
Cotton, combed, 85 percent or more cotton.....	122,442	b/	27,170	b/	29,708	b/	31,551	b/	34,013
Cotton, combed, other chiefly cotton blends.....	4,599	a/	1,076	a/	2,037	a/	1,081	c/	405
Wool yarns, and chiefly wool blends.....	18,651		4,564		4,444	r/	4,828	r/	4,815
Carded (woolen), 36 percent or more wool, including reused and reprocessed.....	11,452	a/	2,848	a/	2,796	a/r/	2,846	a/r/	2,962
Combed (worsted), 36 percent or more wool, including reused and reprocessed.....	7,199	a/	1,716	a/	1,648	b/	1,982	b/	1,853
Manmade fiber yarn.....	4,724,297		1,018,517		1,159,253		1,267,221		1,279,306
Cellulosic, 85 percent or more rayon, acetate, and/or lyocell.....	13,506	b/	1,800	b/	3,545	b/	3,606	b/	4,555
Cellulosic, other chiefly rayon, acetate, and/or lyocell.....	6,490	c/	878	c/	880	b/	2,280	b/	2,452
Noncellulosic, 85 percent or more acrylic.....	92,718	b/	24,080	b/	21,672	b/	22,213	b/	24,753
Noncellulosic, other chiefly acrylic blends.....	13,284	b/	4,350	a/	5,230	a/	2,679	b/	1,025
Noncellulosic, 85 percent or more nylon.....	460,028		89,431		110,423		130,057		130,117
Noncellulosic, other chiefly nylon blends.....	44,227		8,999	r/	9,973	r/	14,723		10,532
Noncellulosic, 85 percent or more polyester.....	336,954	a/	72,509		83,059		89,831		91,555
Noncellulosic, other chiefly polyester blends.....	553,494		111,742		139,276		143,457		159,019
Noncellulosic, all other manmade fibers.....	103,202		25,508		26,995		26,207		24,492
Textured, crimped, twisted, or bulked filament yarns, nylon.....	2,063,296		450,855		520,006		540,238		552,197
Textured, crimped, twisted, or bulked filament yarns, rayon, acetate, and/or lyocell.....	1,639	a/	320	r/	452		431		436
Textured, crimped, twisted, or bulked filament yarns, polyester.....	599,198		140,251		148,049		155,946		154,952
Textured, crimped, twisted, or bulked filament yarns, other fibers.....	436,261		87,794		89,693		135,553		123,221

r/Revised by 5 percent or more from previously published data.

Note: Percent of estimation for each item is indicated as follows: a/10 to 25 percent of this item is estimated. b/26 to 50 percent of this item is estimated. c/Over 50 percent of this item is estimated.

Table 2b. Summary of Yarn Production by Fiber: 2005
 [Production in thousands of pounds]

Product description	Total		Fourth quarter		Third quarter		Second quarter		First quarter
Spun cotton yarns.....	2,615,440		663,955		640,971		638,038		672,476
Cotton, carded, 85 percent or more cotton.....	2,199,503		574,214		536,976		527,787		560,526
Cotton, carded, other chiefly cotton blends.....	270,143		55,858		67,908		74,021		72,356

D Withheld to avoid disclosing data for individual companies. NA Not available. S Does not meet publication standards.

1/Represents production of gray broadwoven fabrics; import and export data represent gray as well as finished broadwoven fabrics.

2/Source: Census Bureau report IM 145, U.S. Imports for Consumption.

3/Dollar value represents the c.i.f. (cost, insurance, and freight) at the first port of entry in the United States plus calculated import duty.

4/Source: Census Bureau report EM 545, U.S. Exports.

5/Apparent consumption represents new domestic supply and is derived by subtracting exports from the total manufacturers' shipments plus imports.

6/Individual export data are not available for these products; however, export data are available on a total basis.

7/Includes all cotton and chiefly cotton mixed with manmade fiber.

8/Total for manmade fiber fabrics does not include chiefly manmade/wool blends.

Note: Detail may not add to total because of independent rounding. Fabric blends as shown in "Manufacturers' production" are reported based on the fiber of chief weight; fabric blends shown for imports and exports are based on the fiber of chief value. For comparison of North American Industry Classification System (NAICS)-based product codes with Schedule B export codes and HTSUSA import codes, see Table 10.

Spun/filament combinations (except blue denim and other yarn dyed).....	434,156	199,647	272,155	61,093	119,206	46.0	14.1	572,711
Silk fabrics.....	(D)	41,268	311,252	3,894	21,962	(D)	(D)	(D)

D Withheld to avoid disclosing data for individual companies. NA Not available.

1/Represents production of gray broadwoven fabrics; import and export data represent gray as well as finished broadwoven fabrics.

2/Source: Census Bureau report IM 145, U.S. Imports for Consumption.

3/Dollar value represents the c.i.f. (cost, insurance, and freight) at the first port of entry in the United States plus calculated import duty.

4/Source: Census Bureau report EM 545, U.S. Exports.

5/Apparent consumption represents new domestic supply and is derived by subtracting exports from the total manufacturers' shipments plus imports.

6/Individual export data are not available for these products; however, export data are available on a total basis.

7/Includes all cotton and chiefly cotton mixed with manmade fiber.

8/Total for manmade fiber fabrics does not include chiefly manmade/wool blends.

Note: Detail may not add to total because of independent rounding. Fabric blends as shown in "Manufacturers' production" are reported based on the fiber of chief weight; fabric blends shown for imports and exports are based on the fiber of chief value. For comparison of North American Industry Classification System (NAICS)-based product codes with Schedule B export codes and HTSUSA import codes, see Table 10.

2/Source: 2006 edition, Harmonized System-based Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States.

3/Schedule B export codes are not available on an individual basis for these products; however, Schedule B export codes are available on a total basis. The Schedule B codes that comprise manmade spun yarn are:

5512110000, 5512190000, 5512210000, 5512290000, 5512910000, 5512990000, 5513110000, 5513120000, 5513130000, 5513190000, 5513210000, 5513220000, 5513230000, 5513290000, 5513310000, 5513320000, 5513330000, 5513390000, 5513410000, 5513420000, 5513430000, 5513490000, 5514110000, 5514120000, 5514130000, 5514190000, 5514210000, 5514220000, 5514230000, 5514290000, 5514310000, 5514320000, 5514330000, 5514390000, 5514410000, 5514420000, 5514430000, 5514490000, 5515110000, 5515120000, 5515130000, 5515190000, 5515210000, 5515220000, 5515290000, 5515910000, 5515920000, 5515990000, 5801310000, 5801320000, 5801330000, 5801340000, 5801350000, 5801360000.

4/Schedule B export codes are not available on an individual basis for these products; however, Schedule B export codes are available on a total basis. The Schedule B codes that comprise spun/filament combination yarns are:

5407810000, 5407820000, 5407830000, 5407840000, 5407910000, 5407920000, 5407930000, 5407940000, 5515120000, 5515910000, 5516210000, 5516220000, 5516230000, 5516240000.

Appendix.

General CIR Survey Information, Explanation of General Terms and Historical Note

GENERAL

The CIR program has been providing monthly, quarterly, and annual measures of industrial activity for many years. Since 1904, with its cotton and fats and oils surveys, the CIR program has formed an essential part of an integrated statistical system involving the quinquennial economic census, manufacturing sector, and the annual survey of manufactures. The CIR surveys, however, provide current statistics at a more detailed product level than either of the other two statistical programs.

The primary objective of the CIR program is to produce timely, accurate data on production and shipments of selected products. The data are used to satisfy economic policy needs and for market analysis, forecasting, and decision making in the private sector. The product-level data generated by these surveys are used extensively by individual firms, trade associations, and market analysts in planning or recommending marketing and legislative strategies, particularly if their industry is significantly affected by foreign trade. Although production and shipments information are the two most common data items collected, the CIR program collects other measures also such as inventories, orders, and consumption. These surveys measure manufacturing activity in important commodity areas such as textiles and apparel, chemicals, primary metals, computer and electronic components, industrial equipment, aerospace equipment, and consumer goods.

The CIR program uses a unified data collection, processing, and publication system. The U.S. Census Bureau updates the survey panels for most reports annually and reconciles the estimates to the results of the broader-based annual survey of manufactures and the economic census, manufacturing sector. The manufacturing sector provides a complete list of all producers of the products covered by the CIR program and serves as the primary source for CIR sampling. Where a small number of producers exist, CIR surveys cover all known producers of a product. However, when the number of producers is too large, cutoff and random sampling techniques are used. Surveys are continually reviewed and modified to provide the most up-to-date information on products produced. The CIR program includes a group of mandatory and voluntary surveys. Typically the monthly and quarterly surveys are conducted on a voluntary basis. Those companies that choose not to respond to the voluntary surveys are required to submit a mandatory annual counterpart corresponding to the more frequent survey.

NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS), 1997

The adoption of the North American Industry Classification System (NAICS) in the 1997 Economic Census has had a major impact on the comparability of current and historic data. Approximately half of the industries in the manufacturing sector of NAICS do not have comparable industries in the Standard Industrial Classification (SIC) system that was used in the past.

While most of the change affecting the manufacturing sector was change within the sector, some industries left manufacturing and others came into manufacturing. Prominent among those that left manufacturing are logging and portions of publishing. Prominent among the industries that came into the manufacturing sector are bakeries, candy stores where candy is made on the premises, custom tailors, makers of custom draperies, and tire retreading. The net effect of the classification changes are such that if the 1997 value of shipments data for all manufacturers were tabulated on an SIC basis, it would be approximately 3 percent higher.

Listed below are the NAICS sectors:

- 21 Mining
- 22 Utilities
- 23 Construction
- 31–33 Manufacturing
- 42 Wholesale Trade
- 44–45 Retail Trade
- 48–49 Transportation and Warehousing
- 51 Information
- 52 Finance and Insurance
- 53 Real Estate and Rental and Leasing
- 54 Professional, Scientific, and Technical Services
- 55 Management of Companies and Enterprises
- 56 Administrative and Support and Waste Management and Remediation Services
- 61 Educational Services
- 62 Health Care and Social Assistance
- 71 Arts, Entertainment, and Recreation
- 72 Accommodation and Foodservices
- 81 Other Services (except Public Administration)

(Not listed above are the Agriculture, Forestry, Fishing, and Hunting sector (NAICS 11), partially covered by the census of agriculture conducted by the U.S. Department of Agriculture, and the Public Administration sector (NAICS 92), covered by the census of governments conducted by the Census Bureau.)

The 20 NAICS sectors are subdivided into 96 subsectors (three-digit codes), 313 industry groups (four-digit codes), and, as implemented in the United States, 1170 industries (five- and six-digit codes).

FUNDING

The Census Bureau funds most of the surveys. However, a number of surveys are paid for either fully or partially by other Federal Government agencies or private trade associations. A few surveys are mandated, but all are authorized by Title 13 of the United States Code.

RELIABILITY OF DATA

Survey error may result from several sources including the inability to obtain information about all cases in the survey, response errors, definitional difficulties, differences in the interpretation of questions, mistakes in recording or coding the reported data, and other errors of collection, response, coverage, and estimation. These nonsampling errors also occur in complete censuses. Although no direct measurement of the biases due to these nonsampling errors has been obtained, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize their influence.

A major source of bias in the published estimates is the imputing of data for nonrespondents, for late reporters, and for data that fail logic edits. Missing figures are imputed based on period-to-period movements shown by reporting firms. A figure is considered to be an impute if the value was not directly reported on the questionnaire, directly derived from other reported items, directly available from supplemental sources, or obtained from the respondent during the analytical review phase. Imputation generally is limited to a maximum of 10 percent for any one data cell. Figures with imputation rates greater than 10 percent are suppressed or footnoted. The imputation rate is not an explicit indicator of the potential error in published figures due to nonresponse, because the actual yearly movements for nonrespondents may or may not closely agree with the imputed movements. The range of difference between the actual and imputed figures is assumed to be small. The degree of uncertainty regarding the accuracy of the published data increases as the percentage of imputation increases. Figures with imputation rates above 10 percent should be used with caution.

DATA REVISIONS

Statistics for previous years may be revised as the result of corrected figures from respondents, late reports for which imputations were originally made, or other corrections. Data that have been revised by more than 5 percent from previously published data are indicated by footnotes.

DISCLOSURE

The Census Bureau collects the CIR data under the authority of Title 13, United States Code, which specifies that the information can only be used for statistical purposes and cannot be published or released in any manner that would identify a person, household, or establishment. "D" indicates that data in the cell have been suppressed to avoid disclosure of information pertaining to individual companies.

EXPLANATION OF GENERAL TERMS

Capacity. The maximum quantity of a product that can be produced in a plant in 1 day if operating for 24 hours. Includes the capacity of idle plants until the plant is reported to be destroyed, dismantled, or abandoned.

Consumption. Materials used in producing or processing a product or otherwise removing the product from the inventory.

Exports. Includes all types of products shipped to foreign countries, or to agents or exporters for reshipment to foreign countries.

Gross shipments. The quantity or value of physical shipments from domestic establishments of all products sold, transferred to other establishments of the same company, or shipped on consignment, whether for domestic or export sale or use. Shipments of products purchased for resale are omitted. Shipments of products made under toll arrangements are included.

Interplant transfers. Shipments to other domestic plants within a company for further assembly, fabrication, or manufacture.

Inventories. The quantity or value of finished goods, work in progress, and materials on hand.

Machinery in place. The number of machines of a particular type in place as of a particular date whether the machinery was used for production, prototype, or sampling, or was idle. Machinery in place includes all machinery set up in operating positions.

Net receipts. Derived by subtracting the materials held at the end of the previous month from the sum of materials used during the current month.

Production. The total volume of products produced, including: products sold; products transferred or added to inventory after adjustments for breakage, shrinkage, and obsolescence, plus any other inventory adjustment; and products that undergo further manufacture at the same establishment.

Quantities produced and consumed. Quantities of each type of product produced by a company for internal consumption within that same company.

Quantity and value of new orders. The sales value of orders received during the current reporting period for products and services to be delivered immediately or at some future date. Also represents the net sales value of contract change documents that increase or decrease the sales value of the orders to which they are related, when the parties concerned are in substantial agreement as to the amount involved. Included as orders are only those that are supported by binding legal documents such as signed contracts or letter contracts.

Quantity and value of shipments. The figures on quantity and value of shipments represent physical shipments of all products sold, transferred to other establishments of the same company, or shipped on consignment, whether for domestic or export sale. The value represents the net sales price, f.o.b. plant, to the customer or branch to which the products are shipped, net of discounts, allowances, freight charges, and returns. Shipments to a company's own branches are assigned the same value as comparable appropriate allocation of company overhead and profit. Products bought and resold without further manufacture are excluded.

Stocks. Total quantity of ending finished inventory.

Unfilled orders (backlog). Calculated by adding net new orders and subtracting net sales from the backlog at the end of the preceding year.

HISTORICAL NOTE

Data for the MQ313A, Textiles, have been collected by the Census Bureau since 2005.

In 2005, data formerly collected under MA313F--Yarn Production, MA313K--Knit Fabrics Production, MQ313T--Broadwoven Fabrics Production, and MQ314X--Bed and Bath Furnishings were reported under the new survey MQ313A--Textiles.

Data on production of knit fabrics have been collected by the Census Bureau since 1966. Additional information (employment, payroll, cost of materials, capital expenditures, inventories, etc.) on knit fabrics is available in both the economic census, manufacturing sector and the annual survey of manufactures.

Data on the production of spun, textured, bulked, and crimped yarns have been collected by the Census Bureau since 1960.

Data on sheets, pillowcases, and towels have been collected by the Census Bureau since 1960.

Data on the production of broadwoven fabrics have been collected by the Census Bureau since 1943.

Historical data may be obtained from Current Industrial Reports (called Facts for Industry prior to 1959) at your local Federal Depository Library.
